As a pledge of the sincerity of these sentiments we have determined to make every effort in our power to establish a sound and complete education for you and your children. We accomplish all that is practically useful in the peasant system with all that is pure and edifying in the aristocratic system. We accumulate the treasures of both, and reject the dross of each. [illegible] important project, and to carry it into execution. The difficulties to be [illegible] great indeed, but [illegible] we meet them in the spirit of faith—if we act with Christian unions those will soon disappear.

The address is thus signed at the close:—

✝ PAUL, Archbishop of Armagh, Primate of all Ireland, and Delegate of the Apostolic See, President of the Synod.
✝ JOHN, Bishop of Clonfert, Promoter of the Synod.

The signatures of the three secretaries of the Synod follow. In an appendix, the two rescripts of the Pope respecting the Queen's Colleges are inserted, with translations, and also a letter from the Propaganda, addressed to the Roman Catholic Primate, on the subject.

It would appear, from statements in some of the Dublin papers, that the condemnation of the Colleges was not unanimous on the part of the Bishops, and that the minority will take steps to advocate their views, by a protest laid before the Holy See: this latter announcement, however, does not seem to be very probable.

The official organ (the *Evening Post*) gives a prominent position to the following announcement:—

"THE QUEEN'S UNIVERSITY.—We are enabled to state that the Senate of the New Nations, University, founded by the Queen's charter, and to be called the Queen's University in Ireland, has been appointed, and that the letters patent under the Great Seal of Ireland are being prepared, under the authority of the Queen's Letter, which received her Majesty's signature previous to her departure for Scotland. The following distinguished and eminent persons, we hear, have been thereby appointed:—*Chancellor*: His Excellency the Earl of Clarendon, K.G. *Senate*. The Lord Chancellor of Ireland, the Most Reverend Richard Archbishop of Dublin, the Most Reverend Archbishop Daniel Murray, the Earl of Rosse, the Lord Monteagle, Chief Justice Blackburne, the Master of the Rolls, Chief Baron Pigot, Right Hon. Thomas Wyse, Sir Philip Crampton, Bart.; the Presidents of the Queen's Colleges, Belfast, Cork, and Galway; in Richard 3rd fifth, LL.D., Dominick J. Corrigan, Esq., M.D., Captain T. A. Larcom, R.E., and James Gibson, Esq., barrister-at-law."

THE LORD-LIEUTENANT AT BELFAST.

At the civic banquet given to Lord Clarendon in Belfast, on his recent visit there (Thursday week), his Excellency, referring to the great progress of Belfast of late years, said:

Gentlemen, it is now upwards of twenty years since I visited the north of Ireland, and you must permit me to offer you my heartfelt congratulations upon the improvements of every kind which, during that period, have taken place in your town. I have had the gratification to have observed myself, and to have learned from authentic and official sources, that this improvement is almost, if not altogether, without parallel in the history of commercial enterprise. (Loud cheers.) Gentlemen, I understand that in 1839 the first spinning factory was established in Belfast—that magnificent one of Messrs. Mulholland's, and which within the [illegible] (Hear and cheers.) Since that time I understand that more than twenty million pounds sterling have been invested in the establishment of power factories and that between 30,000 and 40,000 spindles are now at work in Belfast. From the year 1839 to the year 1847 the increase in the number of persons employed in flax-spinning, and in the linen trade, was 30 per cent, and in Ireland—by which I suppose is meant the north of Ireland ("Hear," and cheers) it has been no less than 58 per cent. (Loud applause.) I believe that the experts of those from Ireland are upwards of four million pounds sterling, and that, directly or indirectly, 300,000 [illegible] livelihood from this unrivalled national manufacture. (Loud cheers.) And [illegible] I have reason to believe that the imports and exports of Ireland are nearly one [illegible] enter during the last year than the year before, and that the shipping of this port has now [illegible] three times greater than it was twenty years ago, and that within the eight months of the present year it is 60,000 tons greater than during the corresponding months of the last year; and that the increase of the customs' duties for last month is, that within the last thirty years the population of Belfast has considerably more than trebled—I think that all this presents an astonishing [illegible] of the energy and prosperity of Belfast.

On the vexed question of the conduct of Irish landlords, he observed:—

With respect to the landlords of Ireland—who, I must take the opportunity of saying, have been most unjustly condemned as a class ("hear, hear," and cheers), without due allowance, or, I should rather say, without any allowance for the extreme and unavoidable difficulties of their [illegible]. I have the pleasure of being personally acquainted with many of them, who for kindness and moderation towards their tenants—for the real and unresting benevolence with which they exercise—for performing their duties, are second to none in the world (cheers), and are deserving of the highest praise. Among a class so numerous, it is impossible but that some [illegible] must exist, but it is the example of good men that will prevail, and is always [illegible] and I believe the time is not far distant when we shall see the duty of association, and when each landlord will find his own interest advanced by not overlooking the judicious influence of capital, and that, by the sacrifice of those enjoyments procured elsewhere, he will be more than rewarded by promoting the welfare and the social improvement of those whom Providence had placed under his care; and, by constant residence, and upright example—such as I have seen the effect of since I came to the north (cheers)—by encouraging enterprise—by bringing the people to the knowledge of their own interests and their own efforts—you will foster and aid the development of those middle classes, the want of which now constitutes [illegible] weakness; for all experience shows that [illegible] and virtue of a nation. (Cheers.)

Mr. Monaghan (Attorney-General) has been appointed Chief Justice of the Common Pleas, at the reduced salary of £4000 a year. Mr. Hatchell is the new Attorney-General, and there is little doubt that Mr. Serjeant Green is to be Solicitor-General. The promotion of Mr. Hatchell will, as master of course, compel him to resign his seat for Windsor, for which he will be again a candidate.

THE SUBMARINE TELEGRAPH BETWEEN ENGLAND AND FRANCE.—It is not to be concealed that since the sinking of the first wire circumstances have greatly contributed for a short time to retard the carrying out the project to completion, seeing that, in order to the complete establishment of an integral line of telegraphic service between London, Paris, and the Continent, the promoters have to obtain a grant from the French Government of the eighteen miles of line extending from the coast to Calais, from which point to Paris the wires are erected. To secure the concession of this section, in the way of which stood difficulties presented themselves, Messrs. Brett, Wollaston, and Edwards, directors of the undertaking, are now in Paris, awaiting the return of the President of the Republic, who granted the original decree, and to negotiate with the government authorities on the subject. Complaints are made by the fishermen, both on the English and French coasts, that their delicate nets will interfere with their deep-sea fishing and subsistence, and that its track over the Varne and elsewhere is in the way of places most frequented by fish. It is intended, however, as stated by Mr. C. W. Brett, the originator of this species of submarine communication, to pay these people an annual rental, and to establish for their families a philanthropic fund, to induce them to unite in the protection and conservation of a great national enterprise. The assistance of the Admiralty has also been secured for the issue of prohibitory orders against fishing on the route of the electric sea-line, and against shops, unless in unavoidable stress or storm, dropping or dragging anchor over its site. The authorities of Calais and Boulogne have intimated that they will send drummers round the town to advise fishermen not to fish in these spots; and the company will apply for powers to punish, as a misdemeanour, any attempts at injuring the wire. In order to meet all existing or conjectured difficulty, the character of the undertaking, so far as its magnitude and solidity are concerned, will now assume quite an altered complexion. The electric wire, thin as a lady's staylace in itself, will now, it is determined on, be encased either in a 5 or a 10-inch cable of the diameter of those that placed the Britannia tubes in position, and these will be submerged by the aid of enormous heavy weights, almost sufficient to resist the raking of anchors. The wire will be encased in this gigantic coil or cable, to be composed of what is called whipped plait with wire rope, all of it chemically prepared, so as to protect it from rot. It is the intention of the promoters, should such the French Government, to proceed, to carry on the communication to Marseilles, the chief seaport of France.

RAILWAY EXCURSIONS FOR THE MILLION.—The railway excursions projected to take place in all parts of the kingdom are unprecedented. Nearly every railway company has projected pleasure trips for the middle and working classes, and the result has been to create a comparatively new species of traffic. The Great Western Railway have taken a prominent part, and have, in addition to their numerous excursions to Windsor, run weekly-dated trains in and out of London, &c., to and from Oxford, Bath, Bristol, and all other places on their route, at what is termed one fare, or, in other words, half the usual fare, there and back. The trains that go Gradington, Brighton, Bath, and Oxford, took 2300 persons, and returning 2300. Local trains between Cirencester and Bath conveyed 1000 persons, and between Bath and Bristol 4000. The London and North-Western Railway have projected pleasure trips for the Isle of Wight, and a wholesale autumn excursion from the north to London. The London and South-Western and Brighton announces excursions to the various bathing-places on their route; the South-Eastern, a 30s. trip to Paris, and an eight days' sojourn on the Rhine; the Great Northern, a cheap through trip to York, Leeds, Hull, and those districts; and the Lancashire and Yorkshire, between the manufacturing districts and the riding on every Saturday. The new system of excursions is found to be productive of more than the mere saving of money from the kingdom where the inhabitants may not, on economical terms, reciprocate pleasure visits. About 200 excursionists left Salisbury on Monday week for Brighton, which is only seven hours' ride by railway. An excursion train from Brighton brought about 700 visitors into Salisbury on the same day.

COMPLETION OF THE BRITANNIA BRIDGE, MENAI STRAITS.—After some years of unremitting labour, the engineers connected with this great work safely lowered the "last" of the Britannia tubes to its permanent resting-place on Friday week. The Carnarvonshire end of the tube was lowered three feet. Its opposite end being already in its position, the tube in the interior of the tower on the Britannia rock, and, obedient to the law of the novel operation, the centres of both tubes, as before, were raised up several inches. The [illegible] of the tube was then accurately [illegible] by the proper engineers preparatory to its permanent opening. Nothing beyond a mere fractional deflection has been observed to take place in the tube that has been opened since March, and which is subjected to the constant transit of heavy trains and traffic. Some curious acoustic effects have been observed. Pistol shots, the sonorous notes, are echoed within the tube half a dozen times. The cells of the men and boys employed by the engineers as speaking tubes, and they can carry on conversations through the tube with perfect ease. The progress of the works converse through the length of the bridge—nearly a quarter of a mile. The following (not hitherto published) is an official return of the cost of the entire structure:—Preliminary expenses, £10,000; Parliamentary charges and Lords' counsel, £28,626; Britannia tower, £38,671; Anglesey tower, £31,430; pedestals and abutments on Anglesey side, £40,470; Irons, £2048 [illegible] Wrought-iron tubes, £118,946; cast-iron for tubes and towers, £30,619; construction of tubes, £226,234; pontoons, ropes, capstans, paining materials, £28,096; mising machinery, £5783; carpentry and labour in floating, raising, and completing bridge, £35,498; experiments, £3986: grand total, £601,865. The total weight of each of the wrought-iron roadways now completed represents 12,000 tons, supported on a total mass of masonry of a million and a half cubic feet, erected at the rate of three feet in a day.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

At the Bank of England meeting of proprietors on Thursday, a dividend of 3½ per cent was agreed to free of income-tax, the warrants to be ready by the 31st of October. A sum of about £27,000 is added to the "rest" over and above £3,000,000, and the Governor announced that the directors would divide the excess above the million every quarter, if they could see their way to do so.

The English funds opened buoyantly on Monday, registering ¼ improvement on Saturday's prices, which was steadily maintained on Tuesday, until nearly the close of the Market, quoting 99¾ for Money, and 99¾ for Account. The settlement was being disturbance in Hesse Cassel. On Wednesday the Market opened heavily, but recovered towards the afternoon; and prices, after having declined ¼ per cent, became 99⅝ for Money, and 99¾ for Account. The Market was dull on Thursday, Consols for Account having been done at 99⅝. Exchequer Bills, 64s. The close of business left the price of Stocks remaining open heavy from absence of transactions, quotations being as follows:—Consols, 99¾, New Three-and-a-Quarters, 99⅛; Three per Cent. Reduced, £100¾, 99¾;

ADVERTISEMENTS.

J. B. ESDEN, Chairman.

LONDON and SOUTH-WESTERN RAILWAY Sea-bathing on the Hampshire and Dorsetshire Coasts Issue of Family Tickets at very Reduced Prices

An arrangement has been effected with the Proprietors of several attractive places on this coast (the most economical and quiet watering-places within reach of London), whereby first and second class season carriages, for the use of a house-old, are let on the following terms:—

Bournemouth (eighty miles from London) £6
Brockenhurst for Lymington and Freshwater, Isle of Wight, 73 hls.
(A steamboat plies between Lymington and Yarmouth. This is the shortest sea passage to the Isle of Wight and the beautiful scenery at the back of that island.)
Poole for Bournemouth £5
Dorchester for Weymouth £4

The usual allowance of luggage to each passenger. Omnibus communicate with the railway trials at Brockenhurst and Dorchester, and conveyances can be procured on application at the station agents at the above stations. By order of the Directors,

CORNELIUS STOVIN, General Manager of Traffic.
Waterloo Station, Sept. 7.

DEANE'S TABLE CUTLERY has, during one hundred and fifty years, maintained its reputation for cheapness and first-rate quality. It is furnished in Horn, Bone, Stag, and Ivory Handles, in pieces which any complete set. Their Monument Balance Knife, with silver ferrules, is unrivalled, and are exchanged until the purchaser's board is suited. Deane's Warranted Pen-knives, Sixpence each and upwards, are the best manufactured out of Englishmen for many generations. Their Scissors, in sets or by the single pair, are preferred by the Ladies now, as they were by their ancestors, and every article is guaranteed of the best quality. GEORGE and JOHN DEANE, Wholesale and Retail Cutlers, opening to the Monument, London-bridge.

NIGHT LIGHTS.—CAUTION

PATENT ALBERT NIGHT LIGHTS.—Patented 26th January, 1844.—CHILD'S NIGHT LIGHTS, registered 30th September, 1843, are sold by all Grocers and Wax Chandlers throughout the country, at 6d per box. The sale of the above, amounting at the present time to many tons weekly, shews that they meet with the approbation of the public. Any description of them is therefore unnecessary. The object of this advertisement is to request purchasers to examine the name on the Boxes, so as to ensure their getting what they intend.

Night Lights are liable not to last the time that they profess (frequently going out an hour or two after lighting), to be affected by the temperature of the room they are burnt in; to be injured by keeping any length of time; and to have an unpleasant smell.

The Manufacturers consider that the use of materials approved by several Patents and by long experience, and the employment of skilled workmen, they have overcome the difficulties, and can assert that they shall say attempted fallacies to be overcome, and they may be carefully compared as to all the above points.

PRICE'S PATENT CANDLE COMPANY, Belmont, Vauxhall.

TO TAILORS.—REENY and GARD, Woollen Merchants, 80 and 81, St. Martin's-lane, London, beg to inform them, that they have NOW ready, as the first part of the season, two handsome pattern cards of fashionable Woollen Trouserings and Waistcoatings, each pattern will be numbered, and marked the lowest cash price. Duplicates of the numbers are kept at the Warehouse, so that, in ordering goods, the figures have only to be copied and the same pieces ensured. This system offers great advantages to Tailors who do not keep stock; as it is also an important saving, as the smallest profit only is looked for with attention and put faithfully performed in executing orders. The cards are expensive, and to prevent unnecessary application, they cannot be forwarded, returnable on goods being ordered. A large stock of every description of Woollen Cloths, Cassimeres, &c. Cash, or Tailors forwarded as sample, on receipt of a Post-office order to the amount

NEW MUSIC.

SONGS for the MERRY and WISE, with an [illegible] WILLIAM H. JOHNS CALLCOTT. Neatly printed, in New Style. Post 8vo. [illegible]
London: D. DUFF and SON, 213, Regent-street

NEW SONGS.—"THE RICH MAN'S BRIDE," "THE EXILE'S FAREWELL," "THE STRANGER'S GRAVE." Price 2s. each; sent postage free.
"In our estimation by the author of "Will you love me then as now," &c. These Songs are of that charming unpretending kind so necessary for a first ballad effective. "The Rich Man's Bride" will be an immediate favourite. Words and music are of a very superior description. London: DUFF and HODGSON, 65, Oxford-street.

NEW POLKA.—The VERY LAST POLKA, composed by F. BERNARD, price 2s. 6d (sent post free)
This original and characteristic polka, performed by J. Weippert's band at her Majesty's last Stret Ball, June 28, at Buckingham Palace, was one of the most effective and attractive compositions of the night. It is supposed to be the last dance at the ball, and by descriptive of the clock striking, regret at parting, confusion of making the exit, and the least merry, &c. The pianoforte copy is exceedingly well adapted to dance to.—London: DUFF and HODGSON, 65, Oxford-street.

NEW SONGS.—The Very Last Words, composed by F. BERNARD, price 2s. 6d. (sent post free)

DU BARRY'S PULMONIC BON BONS.—A nice, safe, and effectual Remedy for coughs, colds, asthma, and all affections of the lungs, throat, and chest, and general debility. In boxes, 1s 1½d, 2s 9d, 4s 6d; or, post free, 1s 4d, 3s 0d, 4s 9d. DU BARRY and Co., 127, New Bond-street, London, and all wholesale and retail dealers.

PERFECT HEALTH RESTORED without loss of time, inconvenience, or Expense, by DU BARRY'S delicious REVALENTA ARABICA FOOD, which saves 50 times its cost in other remedies.

A FEW OUT OF 50,000 TESTIMONIALS

"Twenty-five years' Nervousness, Consumption, Indigestion, and Debility, from which I have suffered great misery, and which no medicine could remove or relieve, have been effectually cured by DU BARRY'S HEALTH-RESTORING FOOD in a very short time.—Mrs. H. Reeves, Peal Antbury, Tiverton." "Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea, for which my servant had consulted the advice of many, have been effectually removed by DU BARRY'S delicious Health-Restoring Food in a very short time. I shall be happy to answer any inquiries.—Rev. John W. Reed, Eddington Rectory, Norfolk." "Three years' excessive nervousness, with pains in my neck and left arm, and general debility, which rendered my life very miserable, has been radically removed by DU BARRY'S Health-Restoring Food.—Rev. T. C. Smyth, Rector, Bidston, Cheshire." "Upwards of 50,000 cures of the above, and many other complaints, are given gratis by Dr. Barry and Co. Sold in canisters, with full instructions, weighing 1lb., 2s. 9d.; 2lb., 4s. 6d.; 5lb., 10s. 6d.; 10lb., 20s.; 24lb., 42s.; 50lb., 84s.; 100lb., 160s.; and 240lb., 320s.; by DU BARRY and Co., 127, New Bond-street, London; Hedges and Butler, 155, Regent-street; Fortnum, Mason and Co., Piccadilly; and through all Grocers, Chemists, and Booksellers.—Caution.—The health of purchasers has been seriously injured by spurious compounds of peas, beans, lentils and ground, and other cheap imitation of the name, such as Arabica Revalenta, Revalenta, Lentil Powder, or called similar by their unscrupulous venders. It will be necessary to note that the name—a cure of health—a name on each canister, in order to avoid being imposed upon by hawkers and knavers

TRY that FAMOUS REMEDY, PARR'S LIFE PILLS. It is a fact beyond dispute, that most of the diseases with which the human race are afflicted are the result of a disordered state of the blood. To remedy this, the occasional use of PARR'S LIFE PILLS should be had recourse to, as thousands proclaim who have tried. In the operation they so divest to the disease [illegible] the system subject the fac-simile of the signature of the proprietors, T. ROBERTS and Co., Crane-court, Fleet-street,

THE DONCASTER RACE-CUP.—1850.

THIS superb prize cup, run for at Doncaster on Friday, has been manufactured at the establishment of Messrs. Hunt and Roskell (successors to Storr and Mortimer), of Bond-street, from a model by Mr. Alfred Brown. It consists of an elegant cup, of the Cliqué Cento form and style of ornament. On the cover are two groupes of horses—wild and domesticated; surmounted by a figure of Victory crowning a horse with a wreath On the bowl of the cup are four compartments, filled with designs on low relief, representing four different styles of racing—the English, the Italian, the ancient Roman, and a race by torchlight. Around the foot of the cup are cleverly grouped horse-furniture and stable implements. The pedestal is of ebony, and bears the names of the Stewards of the Races, and "Doncaster, 1850," inscribed in silver. The height of the whole is between three and four feet, and the value upwards of 300 guineas. It is, altogether, a magnificent plate.

NAVAL AND MILITARY INTELLIGENCE.

COMMANDER-IN-CHIEF IN INDIA.—On Wednesday a Court of Directors was held at the East India House, when Lieutenant-General Sir William Maynard Gomm, K.C.B., was appointed Commander-in-Chief of the Company's forces in India.

NEW PRACTICE RANGE AT WOOLWICH MARSHES.—The inconvenience experienced, and the repeated stoppages of practice in the present state of the artillery practice-ground at Woolwich, owing to the constant passage of vessels on the river, has induced the authorities to decide on having a new practice-ground on the Woolwich and Plumstead Marshes, which will not be liable to any interruption. The direction of the new range will be to the eastward, and will extend to about three miles in length, with an average breadth of half a mile enclosed, so as to prevent the chances of accidents during the practice. It is also intended to construct a mound at 1900 yards range, against which objects will be placed when making experiments, and for the usual target practice of the Royal Artillery.

WORCESTERSHIRE YEOMANRY CAVALRY.—Last week, 42 officers and 690 men assembled for training at Worcester, preparatory to the inspection of the regiment on the 19th inst.

ADMIRALTY VISIT TO THE OUT-PORTS.—The *Black Eagle*, Admiralty steam yacht, master commander Cook, with the Board of Admiralty on board, arrived at Queenstown, from Devonport, at six o'clock on Saturday morning, and immediately after breakfast their Lordships landed at Haulbowline, and inspected that establishment throughout; from thence they proceeded to the *Ajax*, 58, screw guard-ship, Captain Quin, flag of Rear-Admiral H. M. Dixon, Commander-in-Chief, and afterwards to the *Wizard*, apprentice brig, Lieutenant Commander Barnard. The Board of Admiralty having concluded their inspection at Queenstown, left that port in the *Black Eagle*, at five A.M., on Sunday. Their Lordships arrived at Milford, and inspected the Dockyard and Admiralty establishment there on Monday last, and on Tuesday morning proceeded to Holyhead to visit the packet station, whence they returned to town.

THE FRENCH ADMIRAL, BARON MACKAU.—Special orders from the Admiralty have been received at Woolwich, Chatham, Sheerness, and other ports, directing the authorities to allow the gallant ex-Minister of the French Marine to view the dockyards, and to pay every attention to this distinguished officer. Admiral Mackau, we believe, is the only French officer living who, in a fair fight and on equal terms, captured an English brig of war.

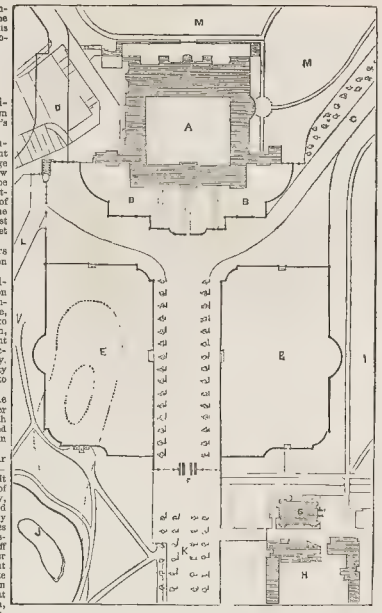
DUTIES OF DISTRICT STAFF SERGEANTS.—The following circular letter has lately been issued to inspecting field officers on the above subject:—"It having been brought under the consideration of the Secretary at War that it is very desirable that the district staff sergeants, when detached on the duty of conducting recruits, should return with all convenient speed from their journey, so as to be available for other duties at the district head-quarters, I am directed to acquaint you that in all cases in which the distance recruits are conducted by railway does not exceed 100 miles from the district head-quarters, or in cases where the distance is only slightly above 100 miles, as between London and Bristol, and London and Birmingham, Mr. Maule considers that the conducting staff sergeants should be sent by the first morning train, and, after delivering over the recruits, should return to their station the same day, by which arrangement the sergeants will be available without loss of time for other duty. The route for the staff sergeants when on this duty, instead of directing them to return without delay, should in future specify the hour of starting, and the hour at which the sergeant should return to his station according to your discretion, with a due consideration of the distance to be travelled, the hour of starting, and, if possible, return upon the same day, together with the nature of the duty, &c.; and the Secretary at War requests that you will cause such routes to be so prepared accordingly.—(Signed) L. SULIVAN.—War-Office, 10th Sept., 1850."

INVALID DEPOT AT CHATHAM.—Since the 1st of last May, 1358 invalids, from all military stations (including the men badly wounded in the Punjaub campaigns), have arrived at this *depôt*. Of these 1196 have been discharged the service, 159 who will be discharged on the 24th inst., 157 have been sent back to their regiments, having been found fit for further service, 33 have died, and the remainder are either at the *depôt* or in this general hospital. On the 7th inst. there was not one man at the *depôt* who had not been examined, his case recorded and decided, and the necessary document for his discharge completed.

IMPROVEMENTS IN ST. JAMES'S PARK.

IN our Journal of last week we detailed the improvements now in progress in St. James's Park. We now engrave the ground-plan, from the Return to an Order of the House of Commons, dated 13th June, 1850, for an Estimate "of the Expense of Making an Ornamental Enclosure, and forming a Public Garden in St. James's Park, in front of Buckingham Palace."

In our Illustration, the dotted lines show the extent of the ornamental water in the Park as it is at present; and it will be seen, the portion to be filled up is not of any very great extent. There can be no question that a garden, laid out as the proposed one will be, and available for the public to walk in, as it is intended they should do, will be not only a great improvement to the Palace, but to the Park also. We have specimens of extensive fine *landscape gardening* in our Parks, but no example of a *flower*-garden; and certain we are, that those who *now* so declaim against this innovation, would hail such a garden as a proof of national taste, if it were to be seen in Continental Palace; but simply because it is proposed to make what has not hitherto been done in London, an outcry is raised, which bids fair to keep the Park and the Palace as ill-arranged as they are at present.



PLAN OF THE IMPROVEMENTS IN PROGRESS IN ST. JAMES'S PARK.

A Buckingham Palace
B B Railing proposed to be placed round the front
C Constitution-hill
D Houses in Stafford-row
E E Gardens proposed to be formed in the Park
F Site to which the marble arch is to be removed
G Stafford House
H St. James's Palace
I The Green Park
J Proposed termination to the ornamental water in the Park
K The Mall, in the Park
L Birdcage-walk
M Buckingham Palace Gardens

The termination of the Mall *now* is not nearly so elegant as it might and ought to be, and very far from the beautiful arrangements of the proposed plan.

We do not know Mr. Nesfield, the gentleman who has designed this plan; but we know enough of his works to believe he will materially improve the Park; and we feel sure that fountains, statues, and other elegant additions to the flower-garden, are amongst the adornments destined for the spot.

On Wednesday, two new entrances were opened into the enclosure, one from the North Mall nearly opposite Sutherland House, and the other into Birdcage-walk. The old Pimlico gate is entirely closed. In the course of a few days the passage of pedestrians in front of Buckingham Palace will be stopped; and the thoroughfare through the enclosure be kept open in lieu of it, night and day.

Annexed is the estimated expense of these improvements:—

ARCH	Removal and rebuilding of the Marble Arch; the Marble to be fine-sanded only, and not polished	..	£ 3900
PALACE	Iron Gates, Railing, and Stone Piers connected with the Arch ..	..	1696
	Iron Gates, Railing, and Stone Piers, to enclose the Front Court of the Palace	..	6116
GARDENS	Iron Railings, Gates and Kerb on Dwarf Stone Walls to enclose the two Gardens	..	10,20
	Stone Piers and Granite Steps at the three Entrances of each Garden ..	..	1463
	Earthwork in levelling and preparing the Surface of the two Gardens for details	..	2330
LAKE.—Excavation for the formation of the Head of the Lake		..	450
			25,175
Contingencies at 7 per cent			1762
			£26,937

CHESS.

TO CORRESPONDENTS.

W and J.—In a case of "double check," such as the one mentioned, Black was equally checked by both pieces, and was bound to remove out of check of *both*

A M.—The solution we gave of Problem No. 343 is perfectly correct, and the point you object to the most beautiful feature of the Problem. Look at it once more, and you will perceive that the Rook in question cannot move without leaving his King en prise of the adverse White Rook

PIMLICO.—The line in the "Odyssey" to which you refer,

Πεντηκοντ προταροιθε θυραων θυραων ετερηφιν,

only shows that Penelope's suitors amused themselves at some game with *pebbles*. But, although Pope renders πεσσοισι *Chess*, there is nothing to inform us what the game really was. In the "Archæologia," vol. 9, there is an interesting disquisition on this subject, which you will do well to study

M'M, Pimlico.—That M'M of Pimlico should be so ignorant of chess as to be incompetent to solve a three-move Problem, he is not to be reproached; but when, knowing so little, he makes pretensions to know so much, and ventures with coarse flippancy to censure productions at "humbug," merely because they are above his very limited reach, he renders himself ridiculous. The enigma, No 695, by a lady, is as correct and beautiful as M'M's remarks upon it are impertinent and foolish

JURY, J F C, and others.—The Enigma of G O C, No. 694, can, undoubtedly be solved in four moves, by first playing the B to K 5th

CAPT TOWS'.—The positions we have given by Major Jasmisch are correctly copied, but you have not yet hit upon the principle of their solution. Let us us suppose, in the First—

Q takes P (ch)	P takes B	P to K 6th	
1.	2.	3.	4
R takes Q	P to K 7th	P to K R 8th	K to K R 6th

and, if White makes a *Queen*, his opponent is stalemated. What then must he do to win?

C M J.—The Problem is below par, but the game, though feebly defended, has one or two very lively features. Why not give the name of your antagonist?

B W F—1. Supposing my adversary is in a position of stalemate unless he take a Pawn *en passing*, is he obliged to take that Pawn? This *crux quoad* still remains undecided. Our own opinion, repeatedly expressed, is, that the act of taking a Pawn in passing being optional, he is not obliged to take the Pawn. 2. Your Problems are not forgotten

C B C.—The game between King's College School and Shrewsbury School shall be reported in our next

EXCELSIUS.—1. Your four-move Problem, admits of a glaring mate in two. 2. No 690 is affected thus:—1. Kt to B 7th (dis ch). 2. R to Q R 5th, and mates next move

J R E.—You played very well. In the next game, try the effect of taking his Bishop at once

F. Bolton.—Where is the mate, when the king plays to his 5th?

JUDY.—1. The arrangements for the projected assemblage next year are not yet matured; when they are completed, full particulars will be published. In the meanwhile, all parties (our friend "Judy" included) wishing for information on the subject, should put themselves in communication with the Editor of the "Chess Magazine." (See notice below.) 2. The Game and Problems she has reported next week. 3. Enigmas Knights 607 once more

CANTABRIGIENSIS.—Decidedly better. Look over it again attentively, and if no further improvement occurs to you it shall appear among our Chess Enigmas.

F E G.—Mr Greenaway's solution of Mr Holton's Farewell Problem is perfectly correct, and reflects great credit on his Chess powers

LUDUS LAYENCULORUM.—Surely, an obvious mate in *two* moves, by—1. [P to K B 4th (ch); and 2. Q to B 3d, Mate

LANGHAM.—We have not room. See our advertisement page, and apply to the maker of Chessmen at the Polytechnic Institution

IRISH QUERIST.—The replies to your thirteen (!) queries would engross one-half of all the space we can afford for Chess. Enquire of any respectable dealer for the "Staunton Chessmen," and see the advertisement headed "Chess," in our last page

SOLUTIONS of Problem No 317 by SIMPLE SIMON, JURY, J B, of Worcester; YARMOUTH DUO JUNIORUM, F G H, CAPE TOWN, M P, REVIT, CROMER, P R S, J A W, BERKELEY, T B, H W F, ST EDMUND, J M, FORBES, LYONIENSIS, TREWEER, LYONIENSIS, CIRCUS, are correct. All others are wrong

SOLUTIONS of the Study by Messrs Klein and Horwitz, No 345, by CHESSLING, J A W, ARTIST, MUNGO, are correct. All others are wrong

* * The gentlemen of King's College School would be happy to play a Game of Chess, by correspondence, with any College or School. Address, C B Clarke, King's College School, Somerset House

* * Very many Chess Correspondents must remain unanswered until next week

Q B—Your Solution of 343 will do

THE B—No 12, Chatham-place, Blackfriars

CIRCUS—Next week, if we have room

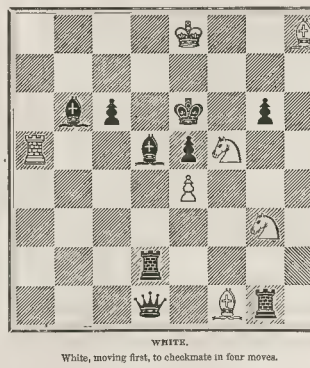
SOLUTION OF PROBLEM NO. 347.

WHITE.	BLACK.	WHITE.	BLACK.
1. Q to Q Kt 4th (ch)	P takes Q	4. B to Q Kt 3d (ch)	Q takes B
2. R to K B 5th (ch)	K moves	5. P to K 4th	
3. Kt to Q B 8th (ch)	K moves	Mate.	

PROBLEM No. 348.

By E. H. C., of Worcester.

BLACK.



WHITE.

White, moving first, to checkmate in four moves.

CHESS ENIGMA.

No. 608.—By M LOQUIN.

White: K at his B sq, R at K Kt sq, B at K B 4th, Kt at K 3d, P at Q B 2d.
Black K at his B 7th, P's at K 4th and K B's 6th.

White to play, and mate in three moves.

STROEBECK, THE VILLAGE OF CHESS.

THERE exists in the Chess world a phenomenon as singular in its kind as that of the Republic of St Marin in the midst of the political states of Europe: it is a little German village, completely devoted, since the eleventh century, to the worship of Chess, and faithful even to this day to the rules and traditions which it originally received. Throughout the rest of Europe the laws and theory of the game have undergone considerable revolutions, and made immense progress; but in this almost imperceptible point of the German soil, these revolutions and advances are utterly unknown. This village is called Stroebeck (formerly Stroepke), and is about a mile from Halberstadt, in the district of Magdebourgh. Among the little community of this place Chess is not, as everywhere else, a relaxation, a luxury of the intellect, a pleasure of the imagination, a privilage of riches and leisure, but a serious and important occupation, a family duty, and an absolute element of social life

The study of the game, indeed, constitutes an integral part of public education. At school there is a *course of Chess*: the people being convinced that the theory and practice of this game are as efficacious in the development of the intellectual faculties as grammar, or history, or arithmetic. At the end of each year, on the eve of the vacation, a solemn course of Chess is opened. Forty-eight pupils are generally chosen to take part in this tournament, the adversaries being decided by drawing lots. The parties defeated in the first instance, retire from the combat. The victors are then pitted against each other, until the last survivor is proclaimed the conqueror of conquerors, and bears away the prize, which is usually a handsome Chess-board and Men. From the arena he is then conducted in triumph to his family, of which thenceforth he is considered the glory and the pride.

When a young girl of Stroebeck marries a stranger, she is compelled, before her departure, to play a game of Chess with the chief magistrate of the village, for the purpose of showing that she has not forgotten the old *traditions* of her native home, and is worthy to transport the rules and taste for the game into the new family which she is about to found elsewhere. This interesting ceremony usually takes place in one of the halls of an inn which bears on its sign the impress "CHESS." During the progress of the farewell game the invited guests surround the betrothed, at her expence drink her health, and are lavish alike of their applauses and censures accordingly as she plays with ability or otherwise

Extraordinary as these customs certainly are, the regulations of the game at Stroebeck are no whit less so. In the first place, the position of the men at the beginning of a game differs from that which is adopted elsewhere The Pawns of the Rooks and the Queens are advanced on each side two steps, and each Queen placed at her 3d square.

Secondly. After the preliminary moves just mentioned, the Pawns never advance more than one step at a time.

Thirdly. The King never Castles.

Fourthly. When a Pawn has arrived at his 8th square, he does not at once assume the powers of a Queen or other piece, but is obliged first to make three back ward leaps, called *freudensprung*, two squaresat a time, until he reaches the square on which he originally stood. For example: suppose a Pawn to reach the King's 8th sq., his first leap will be back to the King's 6th sq.; his next to the King's 4th, and his turd to the King's 2nd, on reaching which, he becomes a Queen, or any other piece the owner may choose. While a Pawn remains on the 8th sq. he cannot be taken, that square being for him an inviolable asylum, but, so soon as he commences his retrograde march, he is liable to capture, like the other men. These rules, so different from ordinary Chess, are, of course, embarrassing to strangers who encounter the heroes in the village of Stroebeck; but when the visitors are masters of the first order, as Bledow or Silberschmidt, they easily carry the victory.*

The reader will naturally desire to know how this singular devotion to Chess, in an obscure country village of Germany, was brought about. The tradition regarding it is this. At the beginning of the eleventh century, the Emperor Henry II. sent a prisoner, named Count Giuncelin, to the Bishop of Stroebeck, with orders that he should be imprisoned and guarded strictly. The Count was shut up in an old tower, which is still pointed out. Being passionately fond of Chess, Giuncelin constructed a board and chessmen, and endeavoured to beguile the long years of his captivity by the study of its infinite varieties. At first he played only by himself, but he subsequently taught the peasants who were employed to guard his dungeon. Through these men a knowledge of the game was soon disseminated, and are long Chess became a passion and a necessary among the inhabitants of the place: it mingled in all the habits of their life—penetrated into their schools—became a part of every one's education—and was thus transmitted, without change of any kind, from generation to generation down to the present day.

When Giuncelin left his prison, his first care was to send, as a memento to the people of Stroebeck, the Chess-board which he had constructed and played on during his captivity, and the precious relic appears to have been preserved with religious veneration for many centuries.

* In our next we shall give a couple of games which were played by Mr. Lewis, one of our best players, a few years since, against one of the villagers of Stroebeck

No. 448.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, SEPTEMBER 28, 1850. [SIXPENCE.

BOURBON OR BONAPARTE?

THE French Revolution begins to narrow itself to this issue. The days of the Constitution are evidently numbered. Nobody has a good word to say for it, and all parties take liberties with it whenever it suits their convenience to do so. There never was such an unlucky document in the world, since the days of political strife began. It was inaugurated as the most democratic of all possible charters. It gave a vote to everybody, women and children excepted. It affirmed liberty with so wide a latitude of interpretation as to leave nothing to be desired by the reddest Republican that ever wore pistols in his belt at the heels of the redoubtable M. Marc Caussidière, or expressed faith in the social Utopia of the enthusiastic M. Proudhon. Freedom to speak, to write, to assemble, and to vote—all were secured to all Frenchmen by this marvellous charter. But no sooner had it become the law of the land, than everybody began to nibble at and destroy it. The right of speaking was speedily reduced to the narrowest limits, amid the applauses of a parliamentary majority elected by, but by no means favourable to, the revolutionary charter. The liberty of the press was pared down to the merest shadow of what would be considered liberty in that England which Frenchmen suppose to be so aristocratic and exclusive. The right of meeting was placed at the tender mercies of the Prefect of Police; so that, if a score of slop-tailors, discontented with the prices of the Hebrews, had wished to detail their woes to one another or to the public, they would not have been permitted to do so, lest a new revolution should be effected. The right of voting was attacked with even more zeal and fervour, and the seven or eight millions of electors that nominated the Legislative Assembly to save the country, and earn 25 francs per day per man as their reward for the achievement, were at one fell swoop reduced to about a million. The Revolution proved more voracious than Saturn himself, in devouring its children. It made short work of men and reputations. It reduced Messrs. de Lamartine, Armand Marrast, and General Cavaignac into nothingness; sent Messrs. Louis Blanc, Ledru Rollin, and Caussidière into the dreary exile of Leicester-square and Regent-street; and consigned the fiery Barbès, the vindictive Blanqui, the impatient Raspail, and a host of other regenerators of the human race, to the fastnesses of Vincennes. Having done this, it got the Constitution itself between its hungry jaws, and has finished by making a meal of it. Scarcely a vestige of it remains—nothing beyond a few crumbs that have fallen at its feet, to prove to the incredulous that such a thing once existed.

Three singular incidents in its history have just occurred, and doubtless they are about the last that will transpire ere the luckless document shall be finally numbered among the things that were, and become as defunct and as utterly dead and buried as any constitution of the three hundred and upwards that ever emanated from the official pigeon-holes of the Abbé Sieyès. The Councils-General of the departments, bodies that have been gaining strength while every other public function in France has been gradually losing it, have all but unanimously declared themselves in favour of the immediate revision of the constitution of 1848, as essential to the well-being and good government of the country. Out of eighty-three Councils-General of the Departments, fifty-two have energetically protested against the theory of the Constitution, which has been destroyed in practice, and have urgently called for its immediate reconsideration. They desire that its last poor shreds and remnants should be swept ignominiously from the statute-book. The President and his friends are of the same opinion. The only rag of the Constitution that is left is that which fixes the periodical election of the chief magistrate once in every four years. Within the last few days, the organs of the President in the press have authoritatively declared, in terms even more explicit than the President employed in his famous address to the people of Lyons, that, in this respect, the Constitution must be forthwith annulled. This last poor tatter is to be consigned to destruction, or to live only in the mournful remembrance of the mournful Marrast, or the plaintive elegies of the tuneful Lamartine. In twenty months the Legislative Assembly would have run its natural, and the President his political, course; and although, in all probability, that section of the Assembly to whom twenty-five francs a day are highly agreeable, if not absolutely necessary, would be well content to cling to the last moment to their salaries, they stand alone—a miserable minority, with the public opinion of the country against them, together with the self-interest of the President and all other conflicting pretenders to the supreme power. *Delenda est Carthago.* The Constitution is virtually dead. The twenty months will not be allowed to expire—perhaps not twenty weeks—before the tomb will be opened to receive it, and the curtain will fall upon the first act of the great revolutionary drama of 1848.

If we are to believe the journals which are known to promulgate the views of the President, the plan for bringing about the catastrophe has been duly arranged. Supported by the strong opinion of the Councils-General, the President is formally to propose to the Assembly the revision of the Constitution, in the interest of order, confidence, and credit; and to satisfy the *bourgeoisie* of the capital and of the departments, who prefer a stringent despotism with a good trade to the most democratic liberty with empty purses, the question of the perpetuation for life of the authority of the President is to be duly proposed. Should the Assembly prove recalcitrant, the Prince, remembering that he was elected to his present office by six millions of voters, and believing that his name and person are more popular than they were at that time, will appeal from the Assembly to the universal suffrage of the people, and risk his power, if not his safety, upon the result. Such is the programme of the performances which the world is credibly informed are about to commence among our neighbours. Judging from all appearances, they will be both attractive and successful.

The President seems, if we may borrow a once popular phrase from the believers in astrology, to have been born under a lucky star. Conduct and fortune are alike in his favour. The one advances him on his own merits; the other removes competitors out of his path, not by his acts, but by their own folly. The Count de Chambord, whose misfortunes, and the interest that always attaches, both in romance and in history, to the "rightful heir," made him a most dangerous rival, has done more than Louis Napoleon or any living being but

MLLE. JENNY LIND—FROM A PHOTOGRAPH TAKEN LATELY BY HER DEPARTURE FOR AMERICA, BY MR. KILBURN, REGENT STREET.—(SEE NEXT PAGE.)

[COUNTRY EDITION, WITH FRIDAY'S LONDON MARKETS.]

himself and his advisers could have done, to weaken and destroy his own chances. He has quarrelled with his warmest, if not with his most discreet, friend, and has advanced the high pretensions of his pure legitimacy in a manner that has already alienated from him all but the antediluvian or unteachable bigots of his party. M. de la Rochejaquelin is of opinion that France, if polled to-morrow on the great question of Republic or No Republic, the Count de Chambord or any other pretender to the Kingly or Imperial power, would pronounce itself, by a vast and overwhelming majority, in favour of the Count de Chambord, and bear him in triumph to the throne of his ancestors. Against such a doctrine as this the responsible advisers of the interesting "Pretender" have protested with the utmost vigour. They declare the rights of the legitimate heir to be rights divine, superior to, and utterly irrespective of, the popular suffrage, and have formally snubbed and reprimanded M. de la Rochejaquelin for his heresy. With Henry V. and his friends, his pretensions to the throne are a matter not of politics, but of religion. They are not to be debated upon, but to be accepted. Such opinions, as influencing conduct, would have been admirably in consonance with the spirit of the twelfth, but are woefully misdated in the nineteenth century. M. de la Rochejaquelin—chivalrous as he is, and deeply imbued with a personal as well as a traditional attachment to the head of the House of Bourbon—has expressed his determination to take no future part in a restoration that is not to be effected by human means. Henceforth, the Legitimist cause will have no aid from him, unless his good wishes should be of service. The friends of the President rub their hands with glee at the schism; and their joy is not diminished at learning, through the same channel that has conveyed this information, that all hopes of a coalition between the elder and junior branches of the Bourbons are finally at an end.

Thus, the prospects of Louis Napoleon are brightening day by day. No competitor has a tithe of his chances. He has the advantage of possession—which in politics, as well as law, always counts for something; and he is the only man whom the Revolution has called into the foremost rank, who has not lost character by gaining power. Those who scoffed at his pretensions, have learned to admire his prudence; those who denied his possession of common sense, have been compelled to do homage to his ability; and those who considered him hair-brained, impulsive, and reckless, have been forced to admit that he is a wary and skilful tactician, who never misses a chance, and never has a chance that he does not skilfully but quietly turn to the discomfiture of his opponents, and the furtherance of his own objects. On the other hand, the Count de Chambord has made but one movement, and that has proved a ridiculous failure.

Whatever may be the case in France, no one out of that country will envy Louis Napoleon his success. With his election to the Presidency for life, his real troubles will begin. The French love, though they do not understand, Liberty, and will assuredly not be contented with the mere shadow of it which they now possess. If he enlarge that liberty, he will open the door to new revolutions; and if he deny it, his extended powers will fasten upon him an extended responsibility, and, like Louis Philippe, in his evil days, he will have to walk in the shadow of death and in constant peril of the assassin. We trust, however, that the prudence which has hitherto guided will continue to befriend him; and that, if he do not fail in the object of his high and honourable ambition, he will know how to prepare the French for future freedom, and how to yield it at the proper time. Unless he do this, every man of common sense would rather be the humblest *boutiquier* on the Boulevards of Paris, than Louis Napoleon.

JENNY LIND IN NEW YORK.

FIRST SALE OF CONCERT TICKETS.

On Friday (says our Transatlantic contemporary) the auction of tickets for choice seats at Jenny Lind's first concert took place at Castle Garden, and a most amusing scene it was. Instead of advertising speculators to buy up tickets at par, and then sell them at a premium, Mr. Barnum sold them to the highest bidder himself, and thus put the profit in his own pocket instead of theirs.

We had imagined that the weather being so unfavourable on Tuesday morning, the attendance at the auction for the choice of seats at the first concert of Jenny Lind would have been thin, but before the appointed hour Castle Garden was crowded with some 3000 or 4000 persons, notwithstanding the heavy rain, and the charge of 1s. at the gate for admission, which was complained of as an unjust exaction. A fleet of umbrellas might be seen sailing steadily through the Battery for a full hour, between six and seven o'clock, and the attendance did not seem to be affected in the least degree by the storm. Such is the power of excitement over the human mind. The *furore* was at its height on Saturday, and old, grey-haired men might be seen there as anxious to secure a ticket for the first night as any youth of twenty. To hear her first strains in public appears to be the great ambition of thousands. We know one man, a tradesman, too, who declared, after seeing Jenny Lind on the night of the serenade, he should go to hear her the first time, and bring his wife with him, if he had to ticket him 100 dollars. Whether his ardour has cooled down since we know not, but certain it is that the public enthusiasm at the auction on Saturday was just as great as it has been at any time since the Swedish warbler arrived on our shores. There were no ladies present, else the excitement would have been vastly increased

The seats were all numbered and divided in sections by means of flags of different colours. The auction was occupied by the clerks of Mr. Barnum and the auctioneer, and by the reporters.

Mr. Leeds, a member of the firm of Henry Leeds and Co., 8, Wall-street, then ascended the stand that had been erected in front of the orchestra, and said that he was now standing on the spot where Jenny Lind would stand. (Laughter.) He then proceeded to sell the first ticket, having the right to the first choice seat in the first concert of Jenny Lind in America. The first bid was 25 dollars, and for a long time the contest was between the Irving House and the New York Hotel, each bidding very spiritedly, to the great amusement of the spectators, the auctioneer, Mr. Medlis, the clerks, Barnum, and the Brandreth also offered for it; but it seems, Genin, the hatter, was determined to have it, and instructed a clerk of his to offer 500 dollars for it, rather than lose it. At length it was knocked down to Genin, for the enormous sum of 225 dollars—more than was ever given for a ticket before. When the clerk announced the name, there was the most enthusiastic cheering, and the people under him stood up on a seat to have one more look at the man. The next choice ticket was sold to Mr Robinson for 25 do lars, and then the price came down to 15 dollars, 13 dollars, 12 dollars, 11 dollars, and 10 dollars. The first large purchase was by Mr. Howard, of the Irving House, who purchased 10 front centre seats in the gallery, at 11 dollars each, and 10 more adjoining them, at 10 dollars each. But the seats for which the highest prices were paid, next to the first choice, were four in Jenny Lind's private box over the stage. The two principal competitors were the Irving House and the New York Hotel. The latter obtained them at 35 dollars, or 140 dollars for the four. After selling about 50 choice seats, which were curiously selected here and there in the building, and not with regard to any advantage they really possessed, there were just as good seats sold afterwards for five and six dollars as those that cost 15, 12, and 10 dollars. There are some as good seats yet to be disposed of as any that have been sold. The auction went off slowly, and with some little confusion in the beginning, for want of a diagram of the seats. However, after the choice seats and chairs had been disposed of, the auctioneer proceeded in the regular order according to the numbers, of course admitting all that had been sold as choice seats, and then matters went on rapidly and smoothly. He sold the first row of the lower floor, and the first row of the gallery, and then the second of the lower floor, and the second of the gallery, and so on till the whole were disposed of at three o'clock, and the sale was then adjourned. Messrs. Hall, and Son, of the music store, Broadway, have purchased a large number on speculation. The last ticket sold was for five dollars. The average is six dollars 28 cents. The total proceeds of the tickets sold amount to 9119 dollars. Not one-fourth of them have yet been disposed of; so that, if the house be filled, a very large sum will undoubtedly be realised. Even at three dollars per ticket, the space yet to be filled would amount to 20,000 dollars.

The adjourned auction for the sale of choice seats to Jenny Lind's concert proceeded at ten o'clock on Monday morning, in Castle Garden; Mr. Leeds, the same auctioneer as on Saturday, knocking them down in the usual rapid style that it was no easy matter to accompany him. The stand was fixed in the gallery, which was more convenient. The house was crowded as before, and, what was very remarkable, it was not the same class of men, but the people, who contributed the great bulk of the assembly. The excitement was intense. Owing to the time being limited, and the rehearsal having to come on at two o'clock, it was necessary to give the purchaser the privilege of taking 20 tickets instead of 10, as on the former day; and when the time pressed still more close they were sold in lots of fifty each; and, finally, the privilege of taking the balance was given to the purchaser of the fourth lot from the end. The sale wound up with Hall purchasing 193 in one lot; and then it was announced that the promenade tickets, amounting to from 400 to 600, would be sold for 3 dollars each, at the office of the American Museum. Several tiers of new seats were erected under the gallery, which sold at from 3 dollars to 4½ dollars. A portion of the upper tier of the gallery was reserved for the press, the portion in the lower part of the house allotted to the reporters having been sold by mistake. It will be seen that Hall and Jollie, but especially Hall, bought largely. Mr. Hall had orders for 1800 tickets, and towards the end of the sale he was offered 2000 dollars for his profits, which he refused.

FOREIGN AND COLONIAL INTELLIGENCE.

FRANCE.

The Count de Chambord, or Duke of Bordeaux, as he is sometimes called, has shown himself a true scion of the Royal house of whom it was justly observed, on their restoration to the throne of their ancestors, that "they had forgotten nothing, and had learned nothing." This veritable Bourbon has startled all France by issuing a Legitimist manifesto, in which the "Divine right of Kings" to reign and misrule (if for them it so seems meet), despite the popular will, is insisted upon with absurd pertinacity and insensate blindness to the enlightened and liberal spirit of the age. The manifesto is dated August 30, from Wiesbaden (the seat of the Legitimist Conference); but it was not permitted to see the light until Saturday last, when a vast number of copies were sent for distribution into the departments, by M. Barthélemy, secretary of the Club of the Rue Montmartre, of which M. Berryer is the president. After dwelling upon the numerous adhesions which the Prince received at Wiesbaden, the manifesto declares that the Count de Chambord is directly opposed to, and will not countenance, the appeal to the people as suggested by M. de Larochejaquelin; and that the Duc de Levis, the Duc des Cars, General de St. Priest, M. Berryer, and the Marquis de Pastoret are authorised by him to discountenance and frustrate, by all means in their power, any attempted appeal to the people, as destructive of the hereditary indefeasible right of "the Bourbon" to the throne of France!

M. de Larochejaquelin has published a long letter in reply, in the Republican paper, the *Debarrard*, in which he says, that he consents to accept excommunication for his party; that he thinks the publication of this manifesto must be fatal to the cause which they have all supported at such cost and sacrifice; that he still advocates the cause of the nation, and that he thinks they should be invited to choose between a Monarchy and a Republic.

The subject has almost wholly engrossed political circles in Paris during the week, and the general opinion appears to be that, by promulgating, in an official act, the right of the French people to decide upon their form of Government, Legitimacy has shelved itself entirely for the present.

Meanwhile, Louis Napoleon does not fail to profit by the stupidity of his opponents in the game of sovereignty. In an article in the *Moniteur du Soir* the following passage occurs, and it has been thought to be a kind of manifesto from the Elysée; viz. "If the National Assembly, forgetting that France desires, above all things, to be tranquillised, should refuse to adopt a measure imperatively demanded by public safety, Louis Napoleon would not hesitate to make an appeal to the entire people, from whom he has received his mission." Although the character of the article has been denied, it has not been disavowed, it is still believed that Louis Napoleon was fully aware of its intended publication, and that it had his full assent.

A grand review at Versailles took place on Tuesday. The President of the Republic, accompanied by the Nepaulese Ambassador and suite, the Minister of War, and a grand *cortége*, arrived on the ground between ten and eleven o'clock, when the military evolutions were performed in a most brilliant manner. A sham fight followed, which was equally attractive. The President was greeted with "*Vive Napoleon!*" "*Vive l'Empereur!*" and some cries of "*Vive le Rétablissez*"

All the "leading articles" published in the Paris journals of Tuesday and the succeeding days had attached to them the names of the writers, pursuant to the new law, which was fixed to come into operation on the 24th inst. The *Journal des Débats*, singularly enough, for the first time during its long existence, was issued without any political remarks, and consequently without any signature. The other newspapers, with one or two exceptions only, had the names of the authors appended to their productions. It would appear, however, that the law was not thoroughly understood by the editors of the public journals, or, if so understood, had not been carried out as the Legislature had intended, some of the articles including hardly only the initials of the writers, instead of their names, appended to them. To prevent, therefore, a recurrence of this violation of the law, the *Moniteur* of Wednesday contained an official hint, to the effect that every paper, in future, will be prosecuted, in which the contributions are not signed in full by their several authors.

HESSE-CASSEL.

From Frankfort, the seat of the Austro-German Diet at present, we learn this week that the first step taken by the Elector of Hesse and his Ministry, on their arrival at Frankfort, was to declare to the Diet that they had not comprehended of the differences which now agitate Hesse, at the same time declaring themselves incapable of terminating them by themselves. The Diet did not, however, entirely accept this vote of confidence, but demanded certain explanations. These were according.y made, and the Diet having discussed them, resolved to lend the Elector federal aid, by virtue of articles 57 and 58 of the final act of Vienna, and of the resolutions taken by the Diet in its twenty-second sitting, in the year 1832

The Diet has also declared the refusal of taxes in Hesse-Cassel an offence calling for the intervention of the Federal Power, and summons the Electoral Government to restore the legal situation, reserving the right of adopting further measures.

In case of opposition to the collection of taxes under the new decrees, 10,000 Hanoverian and Wurtemburg troops are to march into the Electorate. The chiefs of all the Government departments have protested against the late ordinance calling upon them to execute former decrees. The Council of Hanau has addressed a spirited remonstrance to the Elector.

The seat of the Hessian Government has been removed to Wilhelmstad.

UNITED STATES.

We have accounts this week from New York to the 16th inst., brought by the fine steam-ship *Arctic*, which safely effected the passage across the Atlantic in eleven days, having left New York on Wednesday, the 11th instant. She made the usual *détour* to Halifax, where she landed a portion of her mails and passengers on the 12th inst.

The principal item of general news is the increasing excitement connected with Jenny Lind's appearance before the New York public The first concert was to come off on the evening of the steamer's departure, and consequently we have no details; but up to the period of her leaving the port, five thousand tickets had been sold, producing 30,000 dols.

The House of Representatives have rejected all amendments or modifications proposed by the Senate to carry into effect the proposed measure of admitting California in its entire and free state into the American Union, and have recognised it as the 31st state of the republic. The senators nominated at the late state election in the territory have also been admitted to Congress. In addition, after a series of protracted efforts and delays, the great question before Congress in regard to the new territories of the United States has at length been disposed of. The bills for the boundary between Texas and the territory of New Mexico, and the organisation of the former as a regular territory, for the admission of Utah (the country occupied by the Mormons) as a territory, have passed both Houses of Congress, and have received the signature of the President Compromise Bill of Mr. Clay have thus been adopted by the legitimate authorities.

The Fugitive Slave Bill has passed the Lower House by a majority of 109 to 76. The bill for the abolition of the Slave Trade in the district of Columbia still remains to be acted on by the House.

In the senate nothing of importance has transpired since our last reports.

Both Houses were to be adjourned on the 30th instant.

The resignation of the Hon. Mr. M'Clelland, as Secretary of the Interior, in consequence of the duties being too arduous for his "nervous temperament," has given rise to much conjecture as to who his successor will be.

Mr. Stewart, of Virginia, has accepted office.

Our last advices from Texas state that the country was still in a condition of great excitement on account of the controversy with New Mexico. The joint committee of the Legislature have reported a bill providing for the levy of 3600 troops to march forthwith to Santa Fé. The arrangement for the boundary passed in the Senate of the United States, according to Mr Pearce's bill, had been announced at Austin. The Texan Legislature, it is said, has no authority for the purpose of the territory of the state, but the subject must be referred to the sovereignties of the people. Colonel Pragg, late Adjutant-General of the Hungarian army, is now in Texas, with the view to obtain a small section of land on which to settle 200 or 300 of his late companions in arms.

CALIFORNIA.

Our news from California is to August 1st, three steamers from Chagres having arrived since the issue of the last Number for Europe. The intelligence from the mines is of the most flattering character. The gold is found in greater or greater every day, as the waters recede. In less than seven weeks, a company of seven men took out over 15,000 dollars in gold dust, in one spot. Another company of six took forty pounds weight of gold dust in one week at the same spot. The excitement at the mines against foreigners is still strong. Several murders have been committed by adventurers of Spanish descent, and it is the general determination to expel them from the country, or leave them to suffer the consequences

The overland emigrants to California have suffered incredible privations and sufferings, and great numbers have perished for those now upon the route, perishing, it is supposed, to nearly 100,000 souls. There is scarcely a party which has not been on short allowance; the road is said to be lined with dead animals, and the stench from the putrefaction of the carcasses used for food, and partly consumed; and great numbers of women and children are exposed to death from starvation, unless relieved by charity. Public meetings had been called for their aid in the Californian cities

BRAZIL.

We have intelligence from Rio Janeiro to the 29th of July. The fever at that date was again prevailing with great violence, on account of the heat of the weather.

The English cruisers continue to take Brazilian vessels on suspicion of being engaged in the slave trade, even entering the ports, and seizing them under the guns of the forts. Great excitement in consequence of this had been produced at Rio de Janeiro. Several foreigners, masters of English ships, have been beaten by the Brazilians in the streets, and the whole affair has been carried before the Assembly. From the changes that have taken place in public opinion, it is supposed that the Brazilian Government will take serious measures for the suppression of the slave trade. No direct importation of Negroes has been made for some time at Rio, but blacks landing in coasting vessels, although provided with passports, have frequently been sold without the interference of the authorities. Recently, however, an attempt has been made to put a stop to this coastwise slave-trade, and the decided measures adopted will probably prove successful.

An attack from Rosas was apprehended, and the Government was concentrating all the troops that could be spared at Rio.

AUSTRALIA.

We have accounts from Sydney to the end of June. Dr. Lang had commenced his threatened agitation in good earnest by projecting the "Australian League." The rev. gentleman's lectures were numerously and respectably attended, and for the time was sufficient to rouse the dormant energies of the colonists to struggle for the attainment of their freedom. One thing would appear very clearly the effect of Dr. Lang's agitation the apprehensions of the Government, and its attention to the improvement of the condition, strength, and efficiency of the police force. Dr. Lang, however, is manifestly not the man to lead a great movement; he is not popular among any class—all look upon him with distrust, although the principles he has enunciated and the plans he has proposed for radical reform are approved by many. By the moral power of the League, Dr. Lang contemplates the obtaining of universal suffrage, vote by ballot, equalisation of electoral districts, and a shorter period for the duration of the Legislative Council. The provincial council of the League had been nominated, but it was expected that it would fail of accomplishing its objects, and the reverend doctor had got at loggerheads with his principal supporters. The Sydney *Morning Herald* openly accuses Dr. Lang of obtaining money for land orders under false pretences, and holds up the apostle of the League as an instigator of rebellion.

Mr. Donaldson, the great champion of steam communication in the legislative council, was again agitating the subject, and condemned in strong language the inactivity of the imperial government in carrying out the project, notwithstanding the very liberal support afforded by the colonial legislature. On this subject Mr. Donaldson was seeking for the nomination of a committee to inquire and report upon the following points connected with the important subject. The papers have been called for, and the colonists will soon find out by the delays and apathy apparent on the part of the administration:—

1. The expediency of withdrawing the vote of £6000 a year which has now for four years been held at the disposal of the home government for this purpose without effect.
2. The propriety of appropriating £6000 in a year out of the general revenue of this colony as a bonus to any person or body of persons who will accomplish this great object by private enterprise.
3. The expediency of appropriating all the postages directly derived from the mode of communication with India and Europe to the same object from now and
4. The modifications necessary in the present postage law of New South Wales for this purpose.

The committee to consist of Captain P. P. King, R.N. Commander John Lamb, R.N., James Macarthur, Esq., the Secretary, the Colonial Secretary, and William Charles Wentworth, Esq.

From the continued series of experiments on the production of cotton in the Maitland district, a satisfactory result has been obtained. The staple is described as very white, remarkably elastic, of sound strong fibre, longer and finer than the good average American cotton imported into Liverpool. At the present time, now that the attention of our mills is directed towards the raw material, the cotton experiment in Australia is worthy of public attention. The kinds experimented on have been confined to Bourbon and Sea Island seed, and the success of the trial appears to have satisfied many of the leading colonists that the climate of the colony is extremely congenial to the cotton-tree.

Another step towards the introduction of railways into the colony had been taken, the directors of the Sydney Railway Company having paid into the treasury the sum of £10,000 required by the act of incorporation before the company could acquire a legal title to land and commence operations. The amount already actually paid up by the shareholders is nearly £12,000.

Our accounts from Melbourne extend to the 10th of June. In addition to the mineral discoveries formerly noticed, we observe that lead ore had been met with. The appearance of catarrh among the sheep in the western district had caused considerable alarm. A public meeting had at Melbourne, convened by, and under the presidency of, the Roman Catholic Bishop, it was resolved that the character of the Irish orphans had been maligned, and that a continuance of emigration of that description was desirable.

INDIA.

The accounts by the Overland Mail, the arrival of which at Alexandria were telegraphed last week from Trieste, have come to hand. The dates are Calcutta, August 8; Bombay, August 5. The intelligence thus brought is of little interest

The men of the Calcutta militia quartered at Alipore, in the suburbs of the city, have recently been concerned in a serious and disgraceful riot, during which they committed the grossest outrages on the persons and property of some villagers with whom they had a sudden quarrel. The first reports gave the affair the aspect of a massacre, and though official inquiry is said to have proved it to be less serious than was first taken, it is still a fact that women were lavenoted.

There has been a second blow-up of Government powder-boats on the Ganges, but happily with less disastrous results than those of the one at Benares. It occurred near Chunpuk, and the fire was put out with such promptness that only a large fleet exploded, but without any loss of life, so far as could be ascertained. The conductor in charge, by his promptitude and activity in cutting the burning boats adrift, appears to have saved the rest of the fleet. There is reason to suppose that the fire was the work of an incendiary.

The Governor-General and his lady are still enjoying the delightful climate of Darjeeling, near Trebet.

Sir Charles Napier continues at Simlah. He is expected shortly to "come out strong" on the subject of duelling in the army. A duel has lately taken place between two young officers of the 48th Native Infantry at Bandah, of the facts of which, after various contradictions, we have now ascertained, nothing is known certainly, further than that the combatants both broke their arrest to meet each other. It was at first reported that one or both the parties had been killed, but it now appears that no harm or damage was suffered on either side. Of course, the affair will be the subject of a court-martial, and of "remarks" by his Excellency the Commander-in-Chief. Another case of a kindred nature has arisen in that of Lieut. Phillott, of the 3d Regiment Native Infantry, who is to be, or has been, tried for falsely declaring to a third party that Mr. Lang, the editor of the *Mofussilite*, was drunk at a ball, and for seeking the protection of the civil power when Mr. Lang threatened him with personal chastisement.

The Governor of Bombay has been suffering rather severely from fever, but last accounts from Poonah tell us that he was recovering, and that he was to be able to take his usual drives in a few days. There is just now a good deal of sickness at the presidency, and during the past month 36 of the European inhabitants (chiefly, of course, soldiers of the 78th and sailors) have been cut off by the greater number by cholera. The total number of deaths in July was 1378, of which 326 were from cholera. During the past seven months the mortality has amounted to 9798.

ACCELERATION OF THE NORTH MAILS.—The following acceleration is to take place on the 1st proximo, on the north mails from Perth, viâ the Scottish Midland Railway to London. The despatch from Perth will take place at 2.50 P.M., as at present, but the arrival in Aberdeen will be at 6.5 P.M., in place of 7.45 P.M., which will allow of an evening delivery. The return from Aberdeen at 6.5 P.M. will be in time for the 8.45 P.M. despatch from Aberdeen to Inverness will take place at 7.13 P.M., in place of 8.45 P.M., and the arrival at Inverness will be at 6.43 A.M., in place of 8.45 A.M. The return from Inverness will be at 5.44 P.M., in place of 3.43 P.M., and the arrival in Aberdeen will be 5.10 A.M., instead of 3.39 A.M.—*Scotsman.*

PARIS EXCURSIONISTS.—A large party, consisting of about 400 citizens of Perth, left that city on Saturday evening last, by special train on the Great Northern, for Paris, by way of Hull and Hull to London. The party arrived in London, viâ Calais and Dover, on Monday evening. These excursion trips between our own metropolis and the French capital have become so deservedly popular, that it is intended to continue them throughout the remnant and succeeding month of October. The very moderate charge of 30s. entitles each passenger to the journey to and from Paris, without any extra cost whatever.

ACCIDENTAL SUFFOCATION.—On Thursday evening (last week), the wife of a respectable tradesman, residing in the neighbourhood of Tottenham, accidentally suffocated her infant during her return from a pleasure excursion to Hammersmith, by wrapping it up too closely under her shawl. The catastrophe was not discovered till the party reached home.

THE LONDON BALLAST-HEAVERS.—On Tuesday night, the ballast-heavers in the port of London held a public meeting to protest against their present mode of payment, under which, they stated, they are compelled to expend the bulk of their wages in drink, their paymasters being the publicans, who, in most instances, were the tenants of the shipowners, who, by that means, received a considerable portion of the ballast-heavers' money, which, in fact, was an infringement of the spirit, at least, of the Truck Act.

Forty-two years ago, the annual crop of coffee in Brazil did not exceed 300,000 bags, and in 1830 it had increased to 500,000 bags. About that time the high price of coffee in England, superadded to the diminished production in Cuba, stimulated the Brazilian planters to extend its cultivation, and in 1840 it went to market 600,000 bags, or 64,000,000 lb.; and in 1847 the enormous quantity of nearly 300,000,000 lb.

On Friday morning week, Miss Dolling, the daughter of the late Captain Dolling, R.N., who was on a visit at the residence of J. E. Elworthy, Esq., at Bovisand, at the entrance of Plymouth Sound, went down to the beach for the purpose of bathing a favourite dog. After an absence of nearly four hours, the little dog returned without its mistress. Mr. and Mrs. Elworthy became alarmed, and caused a search to be made, and on the beach the body of the unfortunate lady was found floating amongst the rocks, from which it is supposed she must have slipped in reaching to catch the dog

Between nine and ten o'clock on Saturday morning, a lofty scaffolding, erected in front of the house No. 24, Commerce-place, Brixton-road, occupied by Mr. Airey, stationer, came down with a terrific crash. There were two bricklayers and a labourer on the upper platform, all of whom fell on to the footway pavement. The labourer, who escaped with some slight bruises, was taken to his own home; but the bricklayers received such serious contusions that they were immediately removed to St. Thomas's Hospital, where one of them, named Cooper, died in the course of the day [illegible] skull is fractured, is considered in a very precarious st[illegible]

* The Portrait upon the present page is from a Photograph beautifully executed by Mr. Kilburn, of Regent-street, for Mr. [illegible], a few days previous to his departure for New York.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

It is understood that Sir Dennis Le Marchant will succeed the late Mr. Ley as clerk of the House of Commons, on a reduced salary of £2000 per annum. Mr. Booth, the Examiner of Recognizances and Counsel to the Speaker, is likely to succeed Sir Dennis Le Marchant as legal secretary of the Board of Trade. Mr. Booth's office will be abolished. These changes will cause a considerable saving to the public.

The committee appointed by the Court of Common Council, for carrying into effect the act of Parliament for boarding, clothing, and educating 100 orphan children of freemen, have elected Mr. W. S. Hale chairman of the committee, and agreed to have plans and elevations prepared forthwith for the intended school

The *Little Western* steamer left Ramsgate at ten o'clock on Monday morning, called at the different piers, and arrived at the London-bridge Wharf at three o'clock in the afternoon, thus making the passage, including stoppages, in five hours.

It is said that the memoirs which M. de Pasquin, formerly president of the Chamber of Peers (France), is preparing for publication, contain a letter from Talleyrand, which will blot the memory of that statesman deeply for the part which he took in the tragedy of the execution of the Duc d'Enghien.

The *Giornale di Roma* of the 12th publishes a decree of the Sacred Congregation of Studies, directing that henceforward academical degrees shall be granted without any expense to whatever to the candidates. The Universities are to be indemnified by the State for the loss they will sustain in consequence of this decree.

The Austrian Government has prohibited the circulation of the *Cologne Gazette* in Vienna during the state of siege.

The committee of the National Assembly of Wurtemburg has just protested against the Royal decree of August 28, which prescribes the temporary collection of certain taxes, on the ground that the Government is not in an exceptional position, which would alone warrant such a course of proceeding.

Five men, belonging to Tullich of Abernethy, discovered, on Friday week, no less than 400 pieces of the precious Cairngorm stones.

A young man named Richard Cox, employed in the corn grinding mill of Messrs. Guest, at Newport, in the county of Tipperary, met, a few days ago, with the awful death of being ground to atoms, by his arm having been caught in the machinery, and his whole person shortly dragged in.

The British and North American Royal Mail Steam-ship Company at Liverpool were about to direct the construction of another steam-ship to reinforce their fine squadron. She will be of large size and power.

On Thursday last week, a fire broke out in a wood on the estate of Melkleour, immediately to east of the village of Blairgowrie, and before the flames were arrested about an acre and a half of the wood was destroyed. The fire was caused by some boys who had been burning a wasp's nest.

The *Portal Monitore* denies that any agent has been sent to England by the Minister of War for the purchase of horses for the French cavalry, or that any horses have been purchased for that object.

The number of Irish paupers who have entered Scotland, *viâ* the Clyde, this year is estimated at more than 2000

The partial strike of factory workers in Glasgow is not yet terminated.

The cattle dealers and farmers of Glasgow are devising measures to establish a new cattle market beyond the bounds of the municipality.

The Newcastle and Gateshead Gas Company have just divided eight per cent. for the year out of profits.

The Liverpool cab question, it is thought, will be "amicably arranged," the committee recommending an increased rate of fares and certain regulations for the better government of the vehicles and drivers

Among the passengers by the *Indus*, which left Southampton on Friday week with the Indian mail, was the young African snake charmer, whose daring feats with snakes and serpents in the Zoological Gardens have excited so much attention for the last few months. His home is at Grand Cairo.

Two pieces of heavy artillery have been presented to the Berks yeomanry.

The Eastern Counties Railway Company are prosecuting several country carriers for an extensive robbery of turpentine from the railway, amounting to about £100

We are glad to be enabled to state that the Hon. Amias Poulett, who met with so serious an accident, is going on favourably, and it is hoped he will soon be out of danger.

A party of emigrants to California have purchased the *Union*, cutter yacht, of 45 tons, belonging to Abraham Morris, Esq., of Cork, and propose sailing in her to their destination direct from that port.

The culture of the flax plant has been most successful in every part of Ireland this year where it has been sown, and promises a very remunerative return to the growers.

At Workington, the extensive iron foundry upon the quay, formerly occupied by Messrs. Ralph Clay and Son, has recently changed hands, and is about to be worked with vigour and spirit, thus furnishing an important source of employment to the operative population.

On Monday a public meeting was held at Brighton for the purpose of taking steps in respect to the construction of a yatching or refuge harbour, or breakwater, off that town

Additional baths and washhouses are about to be erected at Newcastle-on-Tyne, at the expense of the corporation. The existing establishment, so far from being a burden, has paid its expenses, including interest on capital, and left a surplus.

A range of three iron warehouses, calculated to contain many thousand tons of goods, has just been completed by a firm in Liverpool. They are intended for California.

On the application of Mr. J. A. Carran to Mr. Justice Crampton, in Chambers at Dublin on Saturday, a conditional order was granted to restrain the plaintiff in six actions against the Lord Mayor of that city, for penalties, from proceeding with those actions until he should have given security for costs.

Monster railway excursion parties are now in weekly movement all over Ireland where railways go. From Cork to Dublin, Limerick to Dublin and Cork, Dublin to Drogheda and Navan, &c., and *vice versâ* They start on Saturday and return on Sunday night, so as not to interfere with business.

The very Rev. Dr. Peel, Dean of Worcester, has subscribed £40 towards the erection of the proposed window in the cathedral in memory of her late Majesty Queen Adelaide Canons Cooke, Fortescue, and Cradock have also severally contributed the liberal sum of £20 to the fund.

Last week there arrived in one day at Queen's Town, Cork, six vessels freighted with wheat, eight with maize, and three with beans; and in Cork itself the *Lucanus*, from Galatz, with 813 quarters of wheat.

The wife of a poor man, named Eagles, a coachman, residing in Cumberland-mews-north, Brunswick-square, presented her husband on Friday evening week with three boys, all strong and healthy. We are sorry to say that the father, having been out of employment for the last 14 weeks, with a family of three young children previously and a sick wife, is quite unable to procure them the necessaries of life.

The Paris *Presse* says, in allusion to the glorification of Haynau in certain organs of the English press which has followed the martyrdom of that hero among the vats of Messrs. Barclay and Perkins: —"If this demonstration was reprovable, it must be granted that it has been justified by the scandalous gratification which braves this justice of opinion. Whatever may be done or said, if it is a wrong to have struck the butcher of Bathyany, it is a crime to glorify him."

The French Minister of Commerce has extended to the 31st of October the term for inscription of the French producers who wish to take part in the universal Exhibition of London.

An exhibition hall is intended to be erected in Birmingham. The site is in Broad-street.

There are some reports of disease exhibiting itself amongst the potatoes in several portions of the United States

A snuff-box of a novel construction, and designed to supersede the necessity of using the fingers in taking snuff, has been registered at Birmingham. The box is inverted, and, upon being turned up, two small cups are found charged with the titillating mixture, and ready to be applied to the nose. Snuff in this literally by machinery.

The diligence from Toulouse to Perpignan was last week overturned, in consequence of the floods at La Valals, and was overwhelmed by the torrent. The passengers were fortunately saved

The shock of an earthquake was felt at Algiers on the night of the 10th instant. It lasted fifteen seconds. This makes the sixth shock which has occurred within sixteen days.

The number of emigrants who arrived at New York during the month of August last was 18,091, a decrease of 16,385 as compared with the previous month. The total emigration thus far, up to September, 1850, is 144,836. During the same period in 1849 it was 172,126; and in 1848, 127,291.

A vessel from Calcutta has brought fifty hogsheads of brandy as a portion of her cargo We have never known an importation of foreign spirits to this extent before from the East Indies.

Captain Dickson, late 13th Light Dragoons, has undertaken the management of the Limerick County Hunt for the ensuing season, and the members will take the field next month under the most favourable auspices.

After four years' labour, the great tunnel through Mount Carloso, on the Florence and Leghorn Railway has just been completed.

The collection of the remaining moiety of the hop duty of 1848 (for which bonds were taken by the officers of Inland Revenue, due on the 1st of October) will commence at Battle, on Monday, October 14, terminating, so far as will rest in that district, at Tonbridge Wells, on Friday, the 18th. The collection for the Lewes district will not take place till Friday, November 1.

A destructive fire occurred at Renfrew on Saturday. A large shed, used for purposes connected with the French railway from Paisley, situated immediately adjacent to the wharf, was burned down, together with a dwelling-house and stable which abutted on one side, and a stack of hay that stood close on the other. In the stable were seven horses belonging to Mr. Adair, the lessee of the line We regret to say it was found impossible to rescue any of them

ROBBERY AND EXTRAORDINARY ATTEMPT TO MURDER.

One of the most atrocious, ingeniously planned, and coolly executed acts of robbery and attempts at murder was perpetrated in Aldersgate street on Friday afternoon, last week. The circumstances read more like a chapter in romance, than an actual occurrence in the heart of a capital city.

For a considerable time a gentleman named Cureton has lodged in the house of Mr. Wilson, a tailor, 81, Aldersgate-street. Mr. Cureton is connected with the British Museum, and buys coins and medals for that establishment. He has been in the habit of keeping a quantity of easily-convertible property at his lodgings, and this fact appears, from the event, to have become known to some of the higher class of London thieves. On Friday afternoon, three men, dressed in first-rate style, entered Mr. Wilson's shop, and inquired for Mr. Cureton. Mr. Wilson admitted them, and directed them to the second floor. In about a quarter of an hour afterwards they came down stairs, without showing the least sign of hurry, and left the house. Shortly after their departure Mrs. Wilson had occasion to go up to Mr. Cureton's room, and she found him lying on the floor, insensible, his face black, and blood running from a wound in his forehead. She thought he had fallen in an apoplectic fit, and sent at once for a surgeon. It was many hours before Mr. Cureton was restored to consciousness, and as soon as his strength permitted, he gave the following account of the attack made upon him:—The three supposed gentlemen pretended that they had called to inquire whether he had a brown piece of William and Mary. He replied in the affirmative, and asked them to be seated. As he was in the act of handing a chair to one of the men, the other two got behind him and quickly placed some instrument round his neck, which squeezed him like a vice. Almost at the same moment one of them struck him a blow over the right eye, and he remembered nothing more. Mr. Cureton saw the movement of the instrument towards his neck, and attempted to throw a small box through the window, hoping in that way to give an alarm.

The thieves probably thought they had murdered Mr. Cureton. They removed the instrument from his neck, and carried off coins and medals valued at £300.

On Sunday Mr. Cureton had rallied considerably, and was able to communicate the following details of the manner in which the outrage was committed, and to give a minute description of the property abstracted. He stated that two of the three men appeared deeply engaged together, and after minutely examining the coin which they had enquired about, they desired to be shown half-a-crown of the same reign. At that moment the unfortunate gentleman noticed that one of the men did not enter beyond the step of the door. There is now no doubt in the mind of Mr. Cureton that that party was watching to see whether any one came up or went down the stairs, in order to signal the others. Mr. Cureton thinking that probably he was a friend of the others and not at all interested in the purchase of antiquities, very politely asked him to be seated, and at the same time he turned round to hand him the chair he had been sitting on a few minutes previously. The instrument was at that juncture passed round his neck. From the inquiries subsequently made by the police, and the description given by Mr. Cureton, it is thought that it was formed by lashing two lifepreservers together; the flexibility of the handles and the glance he obtained of the article warrant such a supposition.

The property taken away by the thieves was deposited in sundry cabinets. The enumeration of the articles may probably have the effect of leading to the apprehension of the would-be murderers. A silver lever watch, with double bottom, engine turned, open face, capped and jewelled in eight holes, steel balance, going fusee, hard enamelled seconds dial, number stamped in cases and engraved on watch, 7304; maker's name, John Hux, Percival-street, London. A large gold curb chain, and three seals, one a Persian, attached to the above. A diamond pin. Anglo-Saxon coins of Alfred, and very many others. Crowns from Edward VI. to Victoria, in great variety of types and dates; the Victorias were proofs, with plain edges. Half-crowns from Oliver Cromwell to George III., in great variety of dates and types. Shillings from Henry VIII. to Victoria; a very extensive assortment; many of great variety. Groats from Edward IV to Charles II., including some of Richard III.; a very large collection. Scotch coins—including three shillings of Mary, with her portrait, and a sixpence of the same type, but with a countermark, and various others, from Charles I. to Anne. Some dollars of Mary and Henry, and some specimens of the coins of James VI., three-quarter length. A very large collection of siege coins of Charles I., Newark, Pomfret, Carlisle, Scarborough, &c.

A reward of £50 has been offered for the apprehension of the villains. Should the parties offer the coins for sale, there is no doubt but that they will be apprehended; and although the property is worth from £300 to £400 to Mr. Cureton, yet should it be transferred to the melting-pot, will probably not realise as many shillings for old silver. The police have as yet been unable to obtain any tidings of the guilty parties.

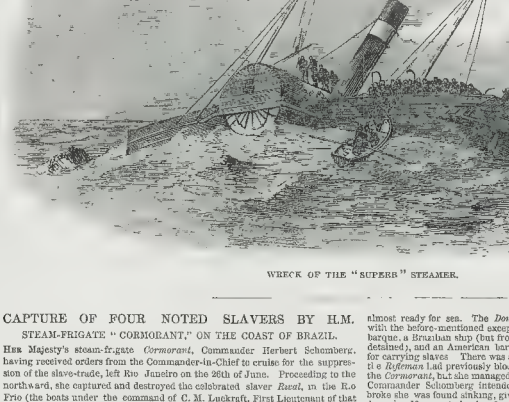
WRECK OF TWO EXCURSION STEAMERS, "LA POLKA" AND "SUPERB," AND LOSS OF LIFE.

On Monday, the 16th inst., the *Superb* steamer (the fatal loss of which on Tuesday last is noticed below) was to have started from St. Heliers, Jersey, on an excursion trip to St. Malo; but, in consequence of her machinery requiring some repairs, *La Polka* was substituted, and started with between 30 and 40 passengers. When within six miles of the Minquiers Rocks she sprang a leak, and the captain had barely time to run her within a quarter of a mile of the easternmost rock, called the Matrielle, and land his crew and passengers, before she foundered in deep water and entirely disappeared.

After passing a dismal night on the bare rocks, the passengers were picked up by the steamboat *South Western*, Captain Goodridge, from Weymouth for St Malo; the captain having luckily perceived through his glass something unusual in the appearance of the rocks, and, imagining that it might be a wreck, steered for them, and took them off. They had been 24 hours on the rock, living on two 4-lb. loaves and some biscuits and water, furnished them by the three poor fishermen living on the rock. They lighted a blazing fire in the night, without attracting any assistance. The passengers, on leaving, subscribed £10 for the poor fishermen, and gave the crew 10s. each; and, at St. Malo, presented a lady passenger, who had the distribution of the rations, a handsome bracelet

The wreck of the *Superb* occurred on the Minquiers Rocks (the locality abovementioned), on Tuesday last, and resulted in the loss of eleven persons, who perished in smooth water and in broad daylight. The particulars are drawn up by some of the survivors, who have reached Southampton by the *Courier* steamer, and are as follow:—

"We regret to have the painful duty of announcing the loss of the steamer *Superb*, Captain Priaulx, and of eleven of the passengers and crew, on the Minquiers Rocks, and very near to the identical spot on which the excursion steamer *Polka* was run to save the lives of the passengers a week ago. The *Polka* was also under the command of the same master. The *Superb* left St. Malo for Jersey at half-past seven o'clock, on Tuesday, and did not take the usual course; but, it is believed, with a view to making a shorter passage, took the course so



WRECK OF THE "SUPERB" STEAMER.

distressingly fatal. She struck violently at half-past nine A.M. on the sunken rocks, and immediately filled with water; her bows having been thrown on the rocks, caused her to heel over, throwing the passengers on the starboard side of the vessel. The captain, it is said, immediately ordered the boats (of which there were only two) to be lowered The fire at the same moment was extinguished by the water, and an immediate rush was made for the other boat; but all who entered it found a watery grave, for there is reason to believe that the plugs were not in the boat, and that it got off without an oar. The consequence was, the boat was seen to be gradually sinking, without possibility of relief, and the circumstances of those unhappy persons presented a scene of horror beyond description, for they sank shortly in smooth water. Fortunately, the ebb was falling fast, which soon left the ship high and dry on the rocks: but the scene of anguish and alarm baffles description. By the exertions of the master and Mr. Hamilton, both of whom displayed great coolness, signals of distress were successfully made to the cutter *Jupiter*, about five or six miles off. The wind being light, two hours elapsed before she could reach us, but she succeeded in doing so, and saved the lives of all excepting those who rushed to the boat, and two children, who were unfortunately thrown overboard by the shock as the vessel struck. The shock having burst upwards with the blow, and thus thrown them over. The *Courier*, which had just come from Shoreham, having her steam up, came off to our assistance, with her owner, Mr. Maples, on board, and took us all from on board the cutter at about five in the afternoon. But on approaching St. Heliers harbour in the dark, she was touched the Oyster Rock, to the further alarm of the surviving passengers, already exhausted by their fearful sufferings. Captain Priaulx and some of the crew remained on board the cutter in the vicinity of the wreck. The cordial reception given to the passengers on their arrival at St. Heliers by hundreds congregating on the pier, excited the warmest thanks; and a more providential escape is perhaps hardly on record. The passengers lost were—Mr Gossett and wife, Mr. Jackson, son, and daughter; Mr. Rattenbury, Miss Price, Mr. Sedgwick, Belot Cook Palmer, a fireman; and Patrick, a boy. The survivors are about 40 in number.

"It is due to a lad, one of the crew, to mention that he behaved with great gallantry and courage. When others were giving way to despair, he set to work to make a raft, which he accomplished in less than half an hour. He also ascended to the masthead to give signals. We regret we cannot give his name, but he was saved."

CAPTURE OF FOUR NOTED SLAVERS BY H.M. STEAM-FRIGATE "CORMORANT," ON THE COAST OF BRAZIL.

HER Majesty's steam-frigate *Cormorant*, Commander Herbert Schomberg, having received orders from the Commander-in-Chief to cruise for the suppression of the slave-trade, left Rio Janeiro on the 26th of June. Proceeding to the northward, she captured and destroyed the celebrated slaver *Raval*, in the Rio Frio (the boats under the command of C. M. Luckraft, First Lieutenant of that ship), and performed this service with great promptitude. After the destruction of the slaver, the *Cormorant* had to run the gauntlet at the entrance of the river, under a sharp fire of musketry from hundreds of persons assembled on the beach. She then steered to the southward for the Bay of Paranagua, distant about 400 miles, off which she arrived on the morning of the 29th; and, passing the fort (mounting 14 or 15 guns) at the entrance, between which and the *Cormorant* the usual civilities passed, the *Cormorant* proceeded up the bay about 15 miles, and at noon opened several large vessels lying at anchor off an island inhabited only by slave-dealers, the trading-port being some four miles further up the bay. Abreast of where these vessels were lying at anchor were erected large sheds, surrounded by lesguers, slave-decks, &c. The *Cormorant* having manned in as close to these vessels as she could possibly get, the channel being very narrow and circuitous, and surrounded by shoals, Commander Schomberg anchored with a spring on the cable, to cover the boats, at five minutes after 12, and immediately despatched the two cutters and gig, under the command of Lieutenant C. M. Luckraft, Lieutenant de Kantzau, Mr. C. W. Buckley (midshipman), and Mr. Haubly (assistant-surgeon), to overhaul suspicious vessels.

One of the two legal vessels lying near immediately weighed and left the anchorage, not wishing to remain among the black sheep. The boats then boarded and examined the brigs and took possession; the first cutter boarding another brig, and the gig a large ship, both of which were also taken. The boats were now employed towing and warping the two brigs towards the *Cormorant*; but, unfortunately, owing to the intricacy of the channel, they soon took the ground, which occasioned much delay, the *Cormorant* then weighed, and endeavoured to close, but having only fifteen feet water, was obliged to desist; she, therefore, as the two brigs were now afloat again, dropped a little further out, and brought up about a mile from them. Both paddle-box boats were now hoisted out, and, together with the whaler, sent to the assistance of the other boats; the captain visiting and examining them in one of the former boats. The ship was then got under weight, and by ten P.M., after a hard day's work, the three vessels were anchored under the *Cormorant*'s lee.

The detained brigs were then found to be the noted slavers *Serea* and *Donna Anna*, and the ship the *Camperdown*, all fully equipped for the slave-trad The two beautiful brigs, unfortunately, had no sails on board, but, otherwise, were almost ready for sea. The *Donna Anna* had cargo and everything on board, with the before-mentioned exception. There were also at anchor a Portuguese barque, a Brazilian ship (but from having landed her fittings, she could not be detained), and an American barque, which, no doubt, only lay there to be fitted for carrying slaves There was also a large brigantine, called the *Astro*, which the *Rifleman* had previously blockaded in Santos for some ten days, as also had the *Cormorant*, but she managed to elude their vigilance, and escape to this port. Commander Schomberg intended taking her in the morning, but when day broke she was found sinking, giving a lift to starboard and then to port, going down headforemost, having been scuttled by her own crew during the night to prevent capture. The captain and master went up to examine and measure her; she had gone down in six fathoms water (soft mud), and numerous boats were then employed landing sails, &c., which had been taken out of her.

All Sunday, June 30, Commander Schomberg was employed preparing his little flotilla for sea, &c. The two brigs were surveyed, and found, in their present state, unfit to make a voyage across the Atlantic. On ripping some painted canvass off the stern of the ship, there was found *Lucy Ann*, of Greenport, in large letters: and from her being American built, and having the flag of the United States on board, and carrying the Yankee jack at her quarter, she might have been passed by our cruisers a thousand times at sea without the slightest suspicion The whole of this day it rained and blew very hard from the S.W.; it was therefore, deemed advisable not to start until the next morning, but the time was not thrown away, for the vessels were prepared for towing, and a prize crew, &c., placed on board the ship, so as not to be detained when they got outside; at sunset were all ready for a start.

On the morning of July 1st the *Cormorant* weighed, and by eight A.M. had got the little squadron in tow, proceeding down the bay. On opening the fort at about 10, and when about a mile off, the Commander was astonished at a blank gun being fired at him; the engines were immediately eased and stopped, and a boat left from under the fort, but immediately returned: at the same time, a shot from the fort fell close under the bows. The *Cormorant* beat to quarters, but refrained from returning it, although perfectly ready: in about two minutes a second shot fell close under the counter, followed by a third, which flew across the forecastle netting. The *Cormorant* went on at full speed (not being built for a target for the Brazilians), and opened fire from starboard broadside, with shot and shell, firing as the guns would bear, going through a very narrow channel, with three large vessels in tow. At this period the action became general on both sides, the fort firing grape occasionally, which fortunately fell short of us in the *Cormorant*, although not 400 yards from it At fifty minutes past ten having passed the front of the battery, unable to return the raking fire from the sea face of it, in consequence of the vessels in tow, but throwing shot occasionally from starn gun, as the opening between the vessels in tow would admit of, the *Cormorant* ceased firing, the fort still continuing, until their last shot fell short of the ships in tow The bar not being passable, the

THE "CORMORANT" AT ANCHOR, DESTROYING THE SLAVE-BRIGS "SEREA" AND "DONNA ANNA."

ECKERNFORDE, ON THE NIGHT OF SEPTEMBER 12—13.

Cormorant anchored. A party was then sent to destroy the brigs *Donna Anna* and *Serea*, which were shortly in a blaze: and, drifting into the breakers, soon went into a thousand atoms. In performing this service, the second cutter unfortunately was drifted near the breakers, and in great danger; a whale-boat was sent to her assistance, and she was shortly released from this imminent peril. The casualties of the affair were most fortunately small—one killed and two wounded. Five shots were fired through the hull, one of which was picked up on the lower deck. The *Cormorant* was barely three miles at anchor from the fort, as they had a good view of her proceedings. By four P.M., the tide having sufficiently risen to enable the *Cormorant* to pass the bar, she weighed, and, having the ship in tow, proceeded to sea, casting her off next morning for St. Helena, and then proceeded herself with all despatch to join the Admiral off Rio, calling *en route* at Santos, for Captain Crofton (whose life in that slave haunt could scarcely be called safe), and arrived at Rio on the evening of the 5th. The flag ship arrived next day.

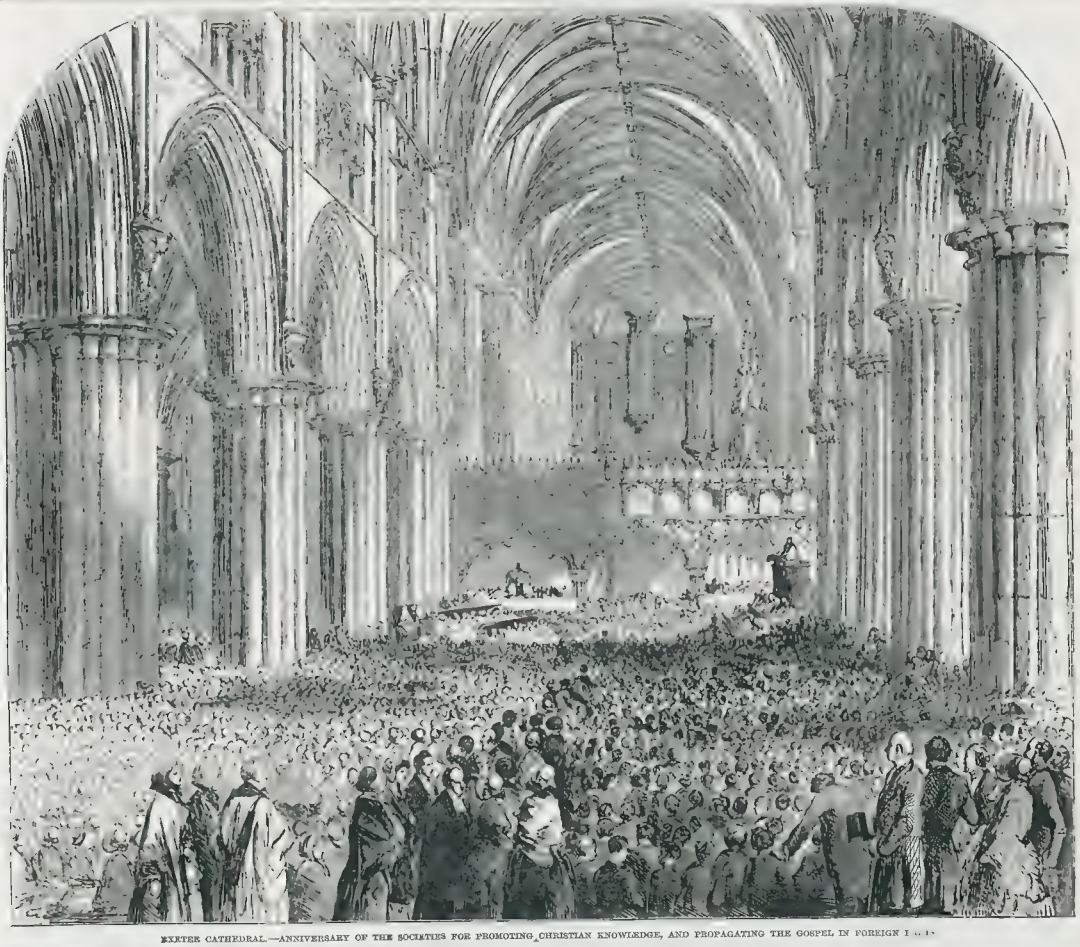
We are enabled to add, that the conduct of Commander Schomberg in capturing these slavers, and avenging the insult to the British flag by demolishing the fort that fired at him, has not only been approved of by the Admiral on the station and the Admiralty at home, but has been justified by the authorities at Rio.

SCHLESWIG-HOLSTEIN WAR.

We are this week enabled to engrave the conflagration at Eckernforde on the night of the 12th inst., described in our Journal of last week. We quote a portion of the semi-official account since published:—

"The Schleswig-Holstein army, advancing by Breckendorf and Kochendorf, with a side corps detached towards Eckernforde, a violent engagement took place in the eastern part of the Duchy. It concluded speedily at Eckernforde with the capture of three strong fieldworks thrown up by the Danes south of the town, and was then carried on by the ships lying in the port. The Danes having been expelled from Kochendorf and Westerthal, one column advanced from thence on the north side of the Noer towards Borby, which discovered that the town had been given up by the Danes. The appearance led to a sort of bombardment of the town by the Danes, in which, as the place was not occupied out of consideration for the fate of its peaceful inhabitants. But the Danish men of war nevertheless found on their approach a good excuse for firing the large wood-yard, and for sending a few cannon-balls into the *Gefion*. The latter was quitted by her Prussian guests, who are said to have encamped in the market-place." The firing of the mill, and its burning for many hours, were mentioned last week.

From our accounts it is week we learn that the Danes have taken possession of the islands on the west coast of Schleswig, after a sharp action which took place on the 17th instant, between some Holstein gun-boats and two Danish steam-ships.



EXETER CATHEDRAL.—ANNIVERSARY OF THE SOCIETIES FOR PROMOTING CHRISTIAN KNOWLEDGE, AND PROPAGATING THE GOSPEL IN FOREIGN [illegible].

SOCIETIES FOR PROMOTING CHRISTIAN KNOWLEDGE AND PROPAGATING THE GOSPEL IN FOREIGN PARTS

The anniversary of these venerable [illegible] was [illegible] on Tuesday week (the 19th), by the performance [illegible] and the delivery of a sermon, in the Cathedral, followed by a meeting at the Guildhall.

The service, which was performed in the nave of the Cathedral, was attended by the Lord Bishop of the Diocese, for whom a temporary throne was placed under the organ screen. His Lordship was surrounded by the following dignitaries:—The Ven. the Archdeacon of Exeter, the Rev. Chancellor Harington, the Rev. Prebendary Ellicombe, the Rev. Prebendary Luney, the Rev. Prebendary [illegible], the Rev. Prebendary Browne. [illegible] the opposite side of the entrance to the choir, were the Right Worshipful the Mayor of Exeter and other members of the corporation, with their usual attendants.

A striking and interesting feature in the congregation was the attendance of the children of the various schools in the city and its suburbs who receive or use books from the Society for Promoting Christian Knowledge. The boys numbered 1091, the total being composed of the following numbers:—St. John's Hospital [illegible] Hele's School, 30; Episcopal School, 148; Central School, 140; [illegible] Exeter), 182; Blind Institution, 8; St. James's School, 100; St. John's Sunday School, 60; St. Sidwell's School, 80; Exeter Workhouse School, 31. Alphington School, 76; Woodbury School, 5; St. Thomas' Parochial [illegible] 63; St. Thomas' Union School, 54. The girls present were 1068, viz.:— [illegible] Episcopal School, 114 [illegible] Sunday School, 40; [illegible] Sunday School, 80; Sunday [illegible] School, 100; St. Mary Major's [illegible] Hele's Charity, 11 [illegible] St. Thomas' Parochial [illegible] St. Thomas' Union School, 100. Total [illegible] children present [illegible] were conducted to and from the Cathedral [illegible] Misses Rice of the St. James' School [illegible] procession, in particular, was heightened by the boys bearing banners, with appropriate devices, and a crown in flowers.

The Rev. Dr. Slatter and the Rev. J. Knight, Priest Vicars, intoned the Prayers, and the Lessons were read by the Rev. J. Corfe and the Rev. J. H. S. Kaye, Priest Vicars [illegible] ice was Croft in A; and in this, as well as the anthem, "Oh, where shall wisdom," *Boyce*, the [illegible] were executed in about forty members of the Exeter Church Music Society, which added great additional effect to these portions of the solemn worship of the day. At the conclusion of the service, the Hundredth Psalm (o. v.) was sung by the children in very creditable time and tune; but here criticism would be out of place, as, independently of other drawbacks, from the means of excellence, the mere want of a *rehearsal* together beforehand would have been sufficient to have excused any amount of imperfection. But their hearts were in it, and He, in whose service they were then engaged, required no more.

The sermon was preached by the Rev. Prebendary Browne, from St. Luke xvi., 9: "And I say unto you, Make to yourselves friends of the Mammon of unrighteousness; that, when ye fail, they may receive you into everlasting habitations."

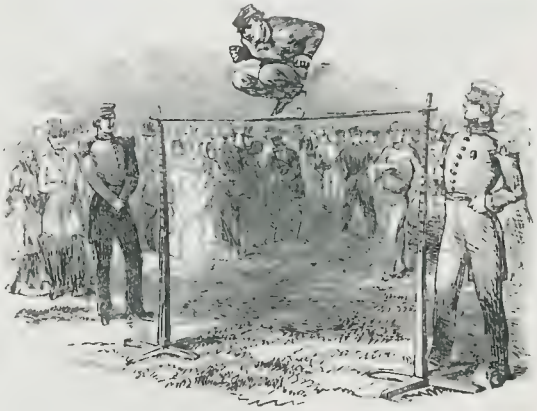
After the sermon, the benediction was solemnly pronounced by the Bishop: and the sum of £76 14s. 4½d. was collected at the doors.

ATHLETIC GAMES AT THE ROYAL MILITARY ACADEMY, WOOLWICH.

On Saturday, the 25th, the Gentlemen Cadets at Woolwich amused themselves and a large party of their friends, by contending in various athletic exercises and feats of strength on the ground in front of their barracks. The sports consisted of foot-racing, hurdle-racing, the long and high leap, vaulting, putting iron shot, chopping pigs (of lead) in two, &c., for prizes. These were of many grades, from a "Blaine's [illegible]" to [illegible] but were all competed for with equal spirit. The leaping was first-rate, and the "vaulting ambition" of one gentleman who cleared the bar at [illegible] an inch or so above his own height, gained great applause. This extraordinary feat, and the "Cutting Lead," are pourtrayed in the Illustrations.

The sports were kept up until dusk, and the party broke up evidently much gratified.

CUTTING LEAD, &c.



ATHLETIC GAMES AT THE ROYAL MILITARY ACADEMY, WOOLWICH.

CALENDAR FOR THE WEEK.

SUNDAY, September 29.—Eighteenth Sunday after Trinity.
MONDAY, 30.—St. Jerome.
TUESDAY, October 1.—Remigius. Pheasant shooting begins.
WEDNESDAY, 2.—Sun rises 6h. 3m., sets 5h. 38m.
THURSDAY, 3.—Old St. Matthias.
FRIDAY, 4.—277th day of the year.
SATURDAY, 5.—Horace Walpole died, 1717.

GREAT EXHIBITION OF THE INDUSTRY OF ALL NATIONS.

SPLENDID PRESENT TO SUBSCRIBERS
TO
THE ILLUSTRATED LONDON NEWS.

IN PREPARATION,
A MAGNIFICENT VIEW
OF
THE EXTERIOR OF THE VAST BUILDING
DESIGNED BY MR. PAXTON FOR
THE GREAT EXHIBITION IN 1851.

This View will be Engraved in a very superior style, and printed on a large sheet of fine paper: it will be published at the time of the opening of the Great Exhibition. The Print will be given to all Regular Subscribers to the ILLUSTRATED LONDON NEWS.

Also in preparation,
A SPLENDID VIEW
OF THE
INTERIOR OF THE GREAT EXHIBITION BUILDING.

*** Further particulars of these Prints, together with other Engravings in preparation connected with the Great Exhibition, will be duly announced.

198, Strand, September, 1850.

TO CORRESPONDENTS.

R S Y Richmond, Yorkshire, is thanked; we shall be glad to receive the report early
S T—Nos. being imperfect. The Dimensions of London robes are made by Mr Corr, 39, Southampton-street, corner of Bow, as stated last week. Mr Cox supplies all the robes belonging to Holborough, including the Q.C. hood in question.
H L S (Gloucester) is thanked, though we cannot avail ourselves of the MS Tab-
X Y Z—No, for the register on which his name would appear would not be complete and in force until the 1st of November
REGISTRAR, Oxford—The Archbishop of Canterbury has early English
W M—In rings and seals the coronet is the mark of the [illegible]
A B Z The Lord Lieutenant of [illegible] publishes [illegible]
W. S. S.—Mr Britton's "Beauties of Wiltshire," Vol. No. 3, is very copious and a variety of useful information of publications on Wiltshire is to be seen in exemplary subjects, will be found in Mr. Britton's "Essay on Topographical Antiquities," of which many fifty copies were printed, in 1825, for the Wiltshire Topographical Society, formed for the excellent purpose of illustrating the very interesting history of the county
M T, R N, Athens, is thanked for the copy of the "General Night Signals," which requires more space for illustration than we can devote to a letter of this class
EOLIPILE, Alexandria, is thanked for the sketch, though it is too slight for the Engraver
J B, Maidstone—We do not possess any further information upon the process
A SUBSCRIBER—A list of the societies may be had in Dorset-street now
GLASGOWIENSIS—We do not contribute in your locality to the Royal Society's Museum
ITALIANO—Apply to Mr. Thomas, news-agent, Catherine-street, Strand
MUSICAL CRITICISM—"Notre-dame" and "Norma" are two operas, by Bellini.
J V, Chesapside—You refer to the remains of the great Dreadnought Leviathan, in Wiltshire (discovered by John Aubrey, in 1649), which a thoughtful some antiquaries to be more ancient than Stonehenge. In the same locality. They consist of ponderous masses of granite and quartz or cannibone, named boulder-stones. See the Rev. Mr Duke's "Druidical Temples of the County of Wilts," page 66—72
A Y S—No CHEMIST (High Holborn—Apply at Messrs Highley's, publisher, Fleet-street
A Y—No. 1, 2, 3, 4, 5, 6, "Cambridge" and "Norma" are two operas, by Bellini.
A SUBSCRIBER—A list of the societies may be had in Dorset-street now
CONSTANTIA—The exact information is recorded in books and pamphlets of the day
PANTECHNICON will, perhaps, favour us with the passage of the Chambers, Paris, or Volumes
H N G—The prize, we understand, is to be given by the London Society for the Protection of Young Females; office, 26, New Broad-street, where the particulars may be learned
I P, Dover—Our Journal may be had from the commencement, 6 Numbers, Parts, or Volumes
T W A—We could not find room for the cricket score
F R H M, Dorchester—H. M. S. *Fury*, Captain Edward Sorrell, sailed from Harwich on a surveying cruise, and was lost next day in a violent gale, off the coast of Norfolk, Nov 13, 1849
H S. S from Wallen, is thanked for the Illustrations
E P, Bradford—At the North and South American Coffee-house. New York papers cannot generally be purchased abroad in London
T G W—The oil book in question is out of print
SYLVANUS—See Wales's "Rivers, History of a Picture," for some remarks on the growth of trees bearing upon your enquiries
AN ORIGINAL SUBSCRIBER, Fulham—Address 198, Strand
G T L, Chiswick, is thanked. The subject is not at all times interesting, but not adapted for a newspaper
EGLIS DE CHENDI address the application to the Lord Chamberlain
A SUBSCRIBER, Liverpool—See the "Transactions of the Geological Society," for valuable contributions to the geology of India
J U, Bonsall—The inscription upon the tomb of Louis Philippe at Weybridge states that his remains are deposited under the stone there built. It is are transferred to his native country. After the same manner date is a cross, and "May he rest in peace"
THEOL. CANT—The Number and Supplement are not chargeable separately
J K, Navy-time, &c.—To apply to the Private Secretaries of the Lords
S H R, Leicester—Your oath is a Nave inning counter, countersing and cubicles
P, Bolton—A Wisdom Hi orum is worth from 5s to 10s
A W, Newport—We cannot give opinions upon the stability of newly formed companies
UNITED, Brighton—The prisoners of Port Dreyton of the Chatt-houses are admirable at fifty years of age, and must be natives of Great Britain, and Protestants of the Church of England, reformed, as given to those who have experienced some days. They must be tended by the governors in addition. (See Jones's very useful volume, "The Charities of London.")
WOOLWICH—Anthony's Dual le-action Patent Churn is described and engraved in No 123 of our Journal
SYLVANUS—As to dimensions and ages of remarkable oaks, see Strutt's "Sylva Britannica;" or Loudon's "Arboretum." We shall be glad to receive the Sketch and details of the great oak in your neighbourhood.
INQUIRER—Ask the French law is so now, and it extends to real and personal, or, as the French term it, to immovable and movable property
U E D—If a horse, which, of course will pay tax to be put into a four-wheeled carriage, it does not matter whether the wheels be above or under thirty inches diameter; the tax will be the same. There appears to be no exemption in a private carriage with four wheels, and, then fore, the painting of the name would be immaterial
TRIFLER—We know of nothing except the Law List and the Red book
J L—We are not aware of arms being registered to either of the families named

C A B—Any post-master will inform you	LIZZY—Castleton
BARCAROLA—We do not understand	ELIZA, St Ives—Cayenne lozenges
BOARDER, Dublin—The flower of the sweet flag	J W W, Lewes—Thames

MUSIC—"The Wave."

THE ILLUSTRATED LONDON NEWS.

SUNDAY, SEPTEMBER 28, 1850.

THE affairs of Hesse-Cassel have assumed a new aspect. The fugitive Elector has returned to his states, but not to his capital; and his unpopular servant, Herr Hassenpflug, still remains the nominal Minister. The Elector has proclaimed martial law, but has not enforced it; and the Minister has summoned the several functionaries of the Government to meet him at Wilhelmshad, instead of at Cassel. The invitation has not been complied with. The people, who in this case comprise not merely the lower, but the middle and upper classes, remain quiet, but firm and united, and have not made a single movement which can be considered even by the Elector as a breach of the law or of the constitution. The army, also, avows its sympathy with the nation; and the opposing parties virtually resolve themselves into the Elector and Herr Hassenpflug on the one side, and the whole of the Hessians on the other. The determination of the Elector to persist in the unconstitutional policy which has brought him and his country into such a dilemma, looks so like madness, that the politicians of Germany, who are still willing to give him credit for sanity, believe that he is encouraged in his resistance by the Austrian Government. It is obvious, whatever may be the reason of his conduct, that the actual state of affairs cannot last. The Elector must either advance or recede. At present he has no more real power than the Roi d'Yvetot, or the Monarch of Dalkey.

California continues to supply the world with gold, and with the records of astonishing adventure. The most important item of intelligence connected with it, which we derive from the last despatches from New York, is, that that State is at length admitted into the Union, upon the terms originally proposed in the compromise of Mr. Clay. California is, therefore, an independent state. Her immediate neighbours—New Mexico and Utah (the latter better known as the Deseret of the Mormons)—are acknowledged as "territories" of the United States. The question of slavery, as regards them both, has been left to the decision of the people; and, from the steps already taken in New Mexico, and the known feelings of the Mormons, who form the great majority in Utah, there can be little or no doubt that, when these two states acquire by immigration the requisite population of 60,000 souls, two free states will be added to the Union.

As regards the gold of this marvellous state, every successive packet confirms and strengthens the previous reports of its abundance. The last letters state that the surface of the mines has been merely "scratched," so that it would appear that all the treasures which have been gathered are but little more than the crumbs which have fallen from the groaning table of its plenty. San Francisco, the capital, having suffered so severely from fire, is being rebuilt of brick, quantities of which arrive from England, and find a ready sale. The security of life and property is much greater than might be expected in such a condition of society as exists in the land of gold; but every man is his own policeman, and relies more upon his own bowie-knife and revolver than upon the law. Many murders have taken place in the San Joaquin mines; all, or nearly all, of which have been traced to men of Spanish and Portuguese extraction. The Anglo-Saxon miners have, in consequence of these repeated acts of assassination, and of the impossibility of teaching these Celto-Iberians the impolicy—to use no more appropriate term—of resorting to the knife and the pistol on even the slightest occasions of quarrel, have resolved to clear California of all foreigners. Whether Englishmen are included under this term, is not very distinctly stated; but it is chiefly with the men of Spanish, Portuguese, and Italian blood that the Californians refuse to fraternise. The settlers and miners in one district have held a meeting *en masse*, and resolved that in fifteen days every foreigner shall be expelled, if he do not previously take his departure quietly; but a sub-committee, subsequently appointed, has been charged with the task of deciding what foreigners of English blood shall be allowed to remain. In the meantime, the overland route to California presents a remarkable scene. Large companies of immigrants for the gold mines travel by ox-teams across the prairies, feeding their cattle on the road, and living by the produce of the chase. Many of these companies are 500 or 1000 strong; and it is estimated that altogether the detachments now on their way to the gold regions number upwards of 100,000 persons, chiefly men and lads. The number of women is supposed to be scarcely one in a hundred. These travellers and their oxen have almost exhausted the game and the grass of the prairies; and fears are entertained in California that many thousands of them will perish ere they can reach their destination. Every available ox has in due time a prey to the necessities of these wandering hordes. "There is scarcely a party," says a letter from California, "which has not been on short allowance. The road is said to be lined with dead animals, that have either perished from exhaustion, or have been slaughtered for food and partly consumed; and numbers of women and children are exposed to death from starvation, unless supplies be sent to them from the western side of the Sierra Nevada." In a short time, however, the route of the prairies will no longer be the favourite, as the Nicaragua route was to be opened for traffic on the 15th of September. Greytown, formerly known as San Juan de Nicaragua, the Atlantic port of this line, can be reached from Southampton by the West India mail-steamers in twenty-six days, and by the packets from New York in about a fourth of the time. We may, therefore, expect to receive, by the spring of next year, still more extraordinary accounts of the progress of the auriferous regions, and to hear of still larger and more wonderful lumps of treasure than any we have yet been informed of. Some people allege very gravely that the present age is unromantic. They surely cannot have read the stories that reach us from California.

COURT AND HAUT TON.

THE COURT AT BALMORAL.

The only variation from the ordinary routine of Court life, during the past week, has been the visits of a Privy Council at her Majesty's Highland home, on Tuesday last, when nearly the whole of the Ministry were present.

Her Majesty has taken daily exercise with the Royal children, and continues, we hear, to be in excellent health. His Royal Highness Prince Albert goes out shooting daily, accompanied by the noblemen and gentlemen of the Royal suite.

Lord John Russell arrived at Balmoral on the 18th instant, on a visit to the Queen and the Prince. Sir Edwin Landseer has had the honour of enjoying the Royal hospitality during the past week.

Her Royal Highness the Duchess of Kent and the Prince of Leiningen dined with her Majesty and the Prince Consort on Friday last, when the Prince took leave, on his return to the Continent

On Tuesday the Queen held a Privy Council. It was attended by his Royal Highness Prince Albert, Lord John Russell, the Hon Sir Francis Baring, and the Right Hon. Fox Maule. At the Council, Parliament was ordered to be further prorogued from Tuesday, the 15th of October, until Thursday, the 14th of November. The Hon William Bathurst was the Clerk of the Council in Waiting.

His Serene Highness the Prince of Leiningen arrived at the Euston-square terminus of the London and North-Western Railway on Saturday morning, from Abergeldie, the residence of her Royal Highness the Duchess of Kent. In the afternoon the Prince, attended by Sir George Couper, proceeded to the London-bridge terminus, and took his departure by the South-Eastern Railway to Dover, *en route* to the Continent.

The Duke and Duchess of Somerset received a large circle of friends at dinner on Saturday, at their mansion in Park-lane. There were present his Excellency the Turkish Ambassador, his Excellency the French Ambassador, the Duchess of Inverness, the Duchess of Buckingham and Chandos, his Excellency the Sardinian Minister, the Earl and Countess of Shrewsbury, &c. In the evening the Duchess received a small party of the members of the *corps diplomatique* and aristocracy at present resident in London.

The Duke of Devonshire will receive a succession of distinguished friends at Lismore Castle until December. The noble Duke has lately expended a very large sum in the re-decoration of the principal apartments of this baronial seat.

His Excellency the Turkish Ambassador has left town *en congé* for Constantinople.

The Countess Reventlow and the Countess Hilda Reventlow have left town on a tour in Italy.

His Excellency Baron Brunnow has returned to Ashburnham House from St. Petersburgh.

The Viscountess Seaham gave birth to a daughter on Monday last, and, with the infant, is going on very well.

A LIONESS FOR THE QUEEN.—Among the passengers by the *Madrid*, which arrived this week at Southampton with the Peninsular mail, was a fine young Lioness, about a twelvemonth old, from Lisbon, and which has arrived in this country as a present from the Queen of Portugal to the Queen of England. The lioness was in a large cage on deck, and was so tame that its keeper used to go into the cage during the voyage to play and wrestle with the animal.

PRIVATE BILLS INTRODUCED IN THE SESSION OF 1850.—It appears, by a parliamentary return printed on Tuesday, that the total number of private bills introduced into the House of Commons during the session of 1850 was 198, of which 29 were brought from the Lords. The number of private bills treated as opposed was 51, and unopposed 74. The total number of private bills which received the Royal assent was 145; of which, 35 related to railways; 16 to roads and bridges; 13 to waterworks; 7 to ports, piers, harbours, and docks; 2 to enclosure and drainage; 20 to paving, lighting, and improving markets; 4 to enclosures and exchange; and 23 miscellaneous. Every railway-bill, without a solitary exception, was opposed.

CHURCH, UNIVERSITIES, &c.

OXFORD.

ELECTION OF PRESIDENT OF TRINITY COLLEGE.—On Monday morning, the Rev. John Wilson, B.D., F.R.S., a fellow of Trinity College, was unanimously elected President, in the room of the late Dr. Ingram. Mr. Wilson took a first class "In Literis Humanioribus," in Michaelmas Term, 1809. The living of Garsington, Oxon, is annexed to the headship.

PREFERMENTS AND APPOINTMENTS.—The Rev. George Bellamy M.A., to Charles' Chapel, Plymouth, Devon, diocese Exeter; value £109, on the nomination of Miss Courtenay. Rev. W. Hawker, resigned. Rev. T. S. Bassnett, Rector of Walthaw, Lincolnshire, to be a surrogate, &c. Lincoln.

VACANCIES.—The Bishopric of Meath, Ireland, [illegible], the Crown; value £6068; Right Hon. and Right Rev. E. Stopford, dec. Cashman V., Salop, dio Lichfield, value £330, with residence; pat., reputed trustees of the late V. Rev. J. Mainwaring, dec. Bromborrough P. C., co. and dio. Chester; value, £51; pats., Dean and Chapter of Chester; Rev. J. Mainwaring, dec. The Mastership of Glasgow High School; Assistant English Master. Wandsworth Collegiate School; Junior Assistant English and Latin Master.

SINECURE BENEFICES.—A return to Parliament was printed on Monday, containing a list of sinecure benefices in England and Wales, with the name of the patron and incumbent, and the annual value and population of each. It appears that there are 57 sinecure benefices, of which 18 are in the diocese of Norwich. The annual value of these benefices ranges from £10 to £1128. In some of the places there are no churches, and in others the churches are dilapidated. The population exceeds, in some places, 1000 souls.

TESTIMONIALS.—The following clergymen have recently received testimonials of respect and esteem:—The Rev H. C. Smalley, Incumbent of Bayswater Episcopal Chapel, from the congregation; the Rev. R. H. Killick, Vicar of Stratton, from the parishioners, and a second from the district visitors of the same; the Rev. J. F. Amos, on his retirement from the Curacy of Childwall, near Liverpool, from a few of the principal inhabitants of Childwall and Little Woolton; the Hon. and Rev. W. H. Spencer, late Vicar of Urchfont, Wilts, from the parishioners; the Rev. James Adcock, late of Nettleham, Lincolnshire, from the parishioners

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

THE BISHOP OF MEATH.

THE Right Hon. and Most Rev. Edward Stopford, D.D., Lord Bishop of Meath, was first son of the Rev. Mr. Stopford, for many years minister of Glanworth, in the county of Cork, and grandson of Mr. James Stopford, Bishop of Cloyne. Prior to his elevation to the bishopric of Meath, Dr. Stopford held the valuable living of Caledon, and was Archdeacon of Armagh: he was consecrated Bishop of Meath in 1842; and made a Privy Councillor in Ireland in 1843. His Lordship died, after a short illness, on the 18th inst., at his Palace, Ardbraccan, near Navan, in the county of Meath. His remains were interred on the 21st inst. in the vaults of Ardbraccan church, where already lie a great number of his mitred predecessors.

LORD WILLIAM CLINTON.

His Lordship, brother of Lord Lincoln, and fourth son of the present Duke of Newcastle, by Georgiana Elizabeth his wife, daughter of Edward Miller Mundy, Esq., of Shipley, was born 13th January, 1815, and consequently only attained his 36th year at the time of his lamented decease, which occurred at Athens (where his Lordship was serving as Attaché to the British Embassy) on the 3d instant.

Lord William Clinton, whose amiability and estimable character endeared him to his friends, was followed to the grave by the whole diplomatic body, and the English residents generally.

JOHN JARDINE, ESQ.

This gentleman, who was Sheriff of Ross and Cromarty, was born in 1778. He was the only son of John Jardine, Esq., of Applegarth, Professor of logic in the University of Glasgow. He himself completed his education at Balliol College, Oxford; and was called to the Scottish bar in 1799, where, for many years, he enjoyed a large and highly respectable practice. In politics he was a Liberal. Mr. Jardine was, in 1833, appointed Sheriff of the united counties of Ross and Cromarty; in which capacity he became, at the same time, one of the Commissioners of Northern Lights. Mr. Jardine married, in 1802, Janet, daughter of James Bruce, Esq., of Kinaird, the celebrated Abyssinian traveller, by whom he leaves two children. He died on the 21st inst., to the great and deserved regret of his family and very numerous friends.

PREPARATION OF FLAX WITHOUT STEEPING.—This simple and economical mode of preparing the fibre for the spinner is attracting much attention in the north of Ireland. The machinery is singularly facile and inexpensive; the flax may immediately be taken from the field, dried, and prepared; and the yield is one-third more, and the strength one-third greater, than when it is prepared in the usual way. Not being tanned by steeping, it is bleached as easily as cotton; and the essential oil remaining in the fibre imparts a lustre to the flax, and supplies that "nature" which will enable the spinner to rival the finest hand-spinning, both in quality and brilliancy. So economical the process, that the woody part, now broken and thrown away, and retaining much of the essential oil of the plant, is admirably adapted for cattle-feeding; and, thus, not one single atom of this valuable produce of our soil need be lost. There is, moreover, a peculiar degeneracy in flax so prepared, to unite "kindly" with fabrics of silk or wool, imparting great strength and beauty, and considerably lessening their cost.

Signor Dantella, formerly employed in the Vatican library at Rome, was condemned, on the 12th inst., to the galleys for twenty years, for having stolen a large number of precious medals from the collection under his superintendence. These robberies, perpetrated more than two years ago, were detected by the examination appointed by Pius IX. immediately on his entrance into Rome, to examine the condition of the public monuments, and ascertain the damage inflicted upon the works of art and antiquities of the capital of the Christian world. Dantella belongs to a highly respectable Roman family.

It is reported from Persia that an English traveller, Mr. Morrison, has discovered at Mahamdeer, the ancient Ecbatana, the tomb of Hephestion, the celebrated favourite of Alexander the Great, who died in that city 324 years before Christ. An inscription, in excellent preservation, is said to identify this monument, beyond doubt, with Hephestion, who, however, has always been supposed to have died at Babylon.

PROCEEDINGS UNDER THE WINDING-UP ACT.—During the vacation and the close of the Masters'-offices, payment of calls and other processes have been nearly suspended, but on the resumption of business next month they are likely to come on heavily, the masters, official managers, and others considering that, consequent on the late decisions of the Lords Commissioners on the law of liability, they have safe ground to go upon, though the grand question, as to whether the Insolvent Debtors Court can overrule the powers of the Court of Chancery, will have to be determined on by an appeal to the House of Lords.

UNIFORM CAB FARES IN EDINBURGH.—The question of a uniform rate of cab fares in Edinburgh has been definitively settled, the magistrates having come to a final determination last Saturday. But the uniform rate, instead of being allowed to extend to the municipal boundary, is to be confined to a much more circumscribed area. The rule, nevertheless, embraces from the railway stations, &c., all the chief points of resort within the city proper. It is anticipated that the new system will give satisfaction to all parties.

DESPATCH IN BUSINESS.—The *New York Herald Reporter* gives the following instances of quickness of business transactions between Europe and New York:—"A Bradford manufacturer sent goods from his warehouse, on the 1st of September, to Liverpool, on the 19th following they were shipped on board the steamer *Hibernia* on the 21st, arrived in New York on Sunday the 6th of October, were sold by sample card on Monday, the 7th, and delivered on Tuesday, the 8th, a week from the day of shipment. Another sketch of the same kind is furnished by the steamer *Europa*, which left Boston on Wednesday, the 4th instant. Allowing the steamer an average run, the consigner will be in possession of the result of the shipment in 27 days from the date of consignment, a shorter space of time than would be likely to elapse between the giving of an order and receipt of goods from an American manufacturer."

SEAL-SKINS.—A vessel belonging to Denmark, which has arrived in the docks from Elsenburg and Copenhagen, has brought from the former place 45,843 salted seal-skins, consigned to order.

The steamer *Viceroy*, which was recently wrecked off Halifax, Nova Scotia, is likely, it is said, to prove a profitable investment for those who purchased her. It appears that when she was on the rocks, they said, it is stated, about 2000 dollars for her. The engines have been taken out without having sustained any damage; and it is now expected, as her ponderous machinery is removed that the hull will be put off and repaired at a trifling expense. The engines alone are worth 50,000 dollars.

On Monday an immense fleet of merchantmen, upwards of 150 in number, arrived off Gravesend. On Sunday and Saturday the arrivals of homeward ships that had been detained in the Channel, windbound, some for three weeks, were equally numerous. At the different wharfs, docks, and river quays, the greatest activity is observable

The *Caton*, French war-steamer, arrived and cast anchor in the Great Reads of St. Heliers, at half-past eleven o'clock on Sunday morning, having on board 45 officers of the French fleet at Cherbourg. These gentlemen went on a visit of pleasure to the island. She left again on Tuesday morning.

METROPOLITAN NEWS.

THE FREEHOLD LAND MOVEMENT.

On Tuesday a public meeting was held at the Angel, Islington, for the purpose of affording explanation of the principles of the Finsbury Freehold Land Society. Mr. D. Harris, who occupied the chair, observed that it must be apparent to all that the great obstruction to reform hitherto was the state of the county representation. The creation of votes in Yorkshire, suggested by Mr. Cobden, rescued that county from the hands of the Tories, and the instrument used there had been further carried out by Mr. James Taylor, of Birmingham, in the most satisfactory manner. The object of the society was to secure votes by the laying aside of 1s. per week, as preparatory to the removal of gross political abuses. By foregoing a pot of beer a day, any working man might secure the franchise, while at the same time he would acquire self-respect and the respect of his fellow-men. (Hear, hear.) In the divisions in the House of Commons, the county members were always found in opposition to popular measures. Of every measure intended to benefit the people, they were the bitterest opponents; and what right had the people to complain of this if, having the power to remedy it, they neglected to do so? Let them not delay to join the society. By combined efforts the success of the cause would be placed beyond doubt, and the enemies of the people would be beaten to rise no more. (Cheers.)

Mr. Scott, the secretary, explained the principal rules of the society, which had, he observed, been formed by working men, and for working men. The committee contemplated that £40 would be the average sum necessary to obtain a vote. The subscription towards a freehold was 1s. per week, though more might be paid at once if convenient to the subscriber. The money was immediately paid into the bank by the treasurer. This land was apportioned by lot, in as equitable a manner as possible. In case of death, the widow, or other representative of the deceased, was entitled to draw the whole amount paid, with a deduction of a small proportion towards the working expenses. Members might, if they pleased, transfer their shares to other persons, without consulting the committee. In case of failure on the part of the bankers, the society was entitled by act of Parliament to 20s in the pound before any of the other creditors could obtain a dividend. All disputes were to be referred to arbitration by five persons drawn by lot, and the decision of the arbitrators was to be final. If from any cause a member could not continue, or wished to suspend, his subscription, the committee had power to provide for such a case. These were some of the principal regulations of the society; and he thought they would all admit them to be fair and just. (Cheers.)

Mr. Beal observed that there were 159 county members sitting in Parliament, and so great was the influence exercised by aristocratic families, that in by far the larger number of instances no contest took place. In the borough, 36 members were returned by 10 small constituencies, with 2794 electors; 20 returned by 10 large constituencies, derived their authority from 182,209 electors; 16 were returned by 155,387 electors, and 329 by 158,722; and if Theobald, returning two members with 214 electors, was to be taken as a sample of the division of popular will, the West Riding should return 336 members. The Freehold Land Society presented a most profitable field for investment, far superior to that presented by savings-banks. Freehold land bought in these societies had in many cases been resold at a premium of five, and in some cases even £10, per £25 share. (Hear, hear.) The freehold land movement would greatly accelerate the full concession of the people's rights. In the actual position of political parties, it would necessitate Whig measures of amelioration and reform. In a few years they would see such a change in members of Parliament that they would scarcely be able to recognise the species. He concluded by moving a resolution declaratory of confidence in the society, and pledging the meeting to afford it cordial and practical support, which, after other gentlemen had addressed the meeting, was unanimously carried, and the proceedings terminated.

ELECTION OF CITY RECORDER.

A Special Court of Aldermen was held at two o'clock on Tuesday, for the purpose of electing a Recorder for the City of London, in the room of the late Mr. Law. The candidates for the office were reported to be the Hon. Mr. Stuart Wortley, Q.C., and M.P. for Bute; Mr. Montague Chambers, Q.C.; Mr. Bullock, City Common Serjeant; Mr. Serjeant Merewether, City Town Clerk (who, in the course of the day, withdrew from the candidateship); Mr. Gurney, Q.C., City Commissioner; and Mr. Bodkin, of the Old Bailey bar. The Right Hon. the Lord Mayor presided.

The Court was attended by Aldermen Sir Chapman Marshall, Humphery, Moon, Copeland, Hulls, Sidney, Farebrother, Musgrove, Sir James Duke, Sir Peter Laurie, Wilson, Finnis, Gibbs, Hunter, Sir John Kelly, Laurence, and Carden.

Besides the Aldermen, there were in the body of the Court, Mr. Bullock, the Common Serjeant; Mr. Commissioner Gurney; Mr. Ryland, City Pleader; and several members of the Old Bailey bar.

The proceedings were carried on with closed doors, on the motion of Sir Peter Laurie.

At half-past four o'clock the Court was opened, and the public were admitted. The numbers were for

Mr. Stuart Wortley	.. .. ..	13
Mr Commissioner Gurney	.. ..	4
Common Serjeant Bullock	.. .. ..	1

Mr. Stuart Wortley was proposed by Mr. Alderman Farebrother, and seconded by Sir Peter Laurie. Mr. Commissioner Gurney was proposed by Mr. Alderman Humphery, and seconded by Mr. Alderman Copeland; and Sir Chapman Marshall proposed the Common Serjeant, Mr. Bullock, who had no seconder.

The other candidates were not put in nomination.

ELECTION OF LORD MAYOR.—Michaelmas-day falling on a Sunday this year, the election of Lord Mayor for the year ensuing will take place on Saturday next. The Sheriffs elect, Alderman Carden and Mr. Hodgkinson, will be sworn in on that day to the election, and afterwards commence their duties as sheriffs in the election of Lord Mayor, and their inauguration will take place on the following Monday. Mr. Alderman Hunter and Mr. Alderman Musgrove, who stood next to Alderman Carden, will be returned to the Court of Aldermen, when their election will fall upon Alderman Hunter.

EAST INDIA HOUSE.—On Wednesday a Court of Directors was held at the East India House, when General Sir William M. Gomm, K.C.B., was sworn in Commander-in-Chief of the Company's forces, and an Extraordinary Member of the Council of India.

LLOYD'S.—A general meeting of the members of Lloyd's was held on Wednesday, in their rooms at the Royal Exchange, for the purpose of receiving the half-yearly report of the committee—Thomas Baring, Esq., M.P., in the chair, who, after alluding to the decease of the late chairman, G. R. Robinson, Esq., M.P., in a complimentary manner, proceeded to propose the following votes, which were unanimously passed:—The honorary silver medal to Captain David Cook, of the British barque *Sarah*, of Yarmouth, N.S., for his humane and intrepid conduct in saving the lives of the crew and passengers of the American ship *Gold Grimalkin*, destroyed by fire in the Atlantic, Nov. 20, 1849, £5 5s. in aid of the subscriptions to two boats' crews who went off in a heavy gale of wind and saved the crew of the brig *Bravo*, of Newcastle, when that vessel was wrecked on the Cumberland Sands, on the 31st of March last. After a vote of thanks to the chairman, the meeting broke up.

SOUTH SEA COMPANY.—A general meeting of this company took place on Thursday, at the South Sea House, Threadneedle-street, City; Mr. Charles Franks in the chair. It appeared that the bond debt due from the company amounted to £4500. The following gentlemen were unanimously appointed to form a committee to inspect the by-laws of the Company:—Mr. Cousen, Guildhall; Claudius S. Hunter, Thomas Ponton, Poynder, Thornton, and Harrison. After a vote of thanks to the chairman, the meeting separated.

THE GREAT CENTRAL GAS COMPANY.—The application of the Chartered Gas Company to the Lord Chancellor for an injunction to restrain the Great Central Gas Consumers' Company from laying their mains and pipes in contact with the plaintiffs', stands over till the 10th of October, the defendants undertaking, in the meantime, not to lay any pipes or mains in contact with those of the plaintiffs, nor to execute any other works to their damage.

CANTERBURY SETTLEMENT, NEW ZEALAND.—A numerous and respectable meeting was held on Tuesday evening, at the Store-room, Lambeth green, for the purpose of hearing from the Rev. T. Jackson, Bishop Designate of Lyttelton, an account of the spiritual condition of the diocese which is to form the scene of his future labours, and of the principles and plans of the association for propounding the settlement in New Zealand. Among those present we observed the Rev. C B. Dalton, Rector of Lambeth; the Rev. W. Carling, Chaplain of St. Saviour's, Southwark; Rev. A. Clissold, Minister of Stockwell Chapel; Rev. S. Stadham, Incumbent of St. Peter's, Walworth; Rev. A Nugee, Rev. J. C. Brown, Rev. W. Bowyer, Rector of Clapham, &c. The Rev. C. B. Dalton having taken the chair, opened the proceedings by prayer; after which he informed the meeting that the Bishop Designate would leave England on Tuesday next, for New Zealand, and was expected to return in the course of a year, in order to be consecrated. The Rev. T. Jackson, the Bishop Designate, then addressed the meeting at great length, and in a speech of considerable power, in the course of which he drew attention to the erroneous principles upon which England had lately been carrying on the work of colonisation, and observed that, instead of expatriating the worst of our people, the refuse of our gaols, those whom we found troublesome to us—instead of doing what Mr. Charles Buller would call "a heterogeneous shovelling out of paupers," we should have sent out those who represented the industrial activity, the intellectual and moral power, and the religious principle of the country. The reverend gentleman reviewed in a masterly manner the history of colonisation from the earliest period down to the present time, and observed that in all cases where colonisation had been successful, the best classes of that parent country had been represented, and that, in any effort of the kind which England should make, the religious element was too essential to be omitted. Mr. Nugee described the geographical position of the settlement as most favourable to the purposes of colonisation, and spoke in terms of enthusiasm of the natural advantages of the soil, the genial character of the climate, and the certainty with which industrious man might provide for himself and his family. The address was listened to with much attention, and the speaker was repeatedly applauded. A collection was made on behalf of the mission, and the rector announced his willingness to receive contributions for the same object during the year

MASONS' AND SCULPTORS' PROVIDENT INSTITUTION.—On Tuesday evening a special meeting of the committee of management of the above institution was held at the Westminster Literary Institute, Great Smith-street, for general business, and to arrange for the first election of pensioners. The report of the society's progress was satisfactory, the funds being sufficiently available for commencing pensionary relief. The committee have met with the kindest support from many of the employers, who have liberally subscribed and signified further encouragement, provided a disposition is shown on the part of the operatives to support it: it is calculated that of the latter class there are about 4000 in London and its suburbs, and above 30,000 of the United Kingdom. It was determined that two members should be elected on the pension fund, at 7s. each per week, on the 1st of October next. The report concluded by an earnest appeal to the trade for increased support to enable the committee to extend its benevolent objects.

EVENING CLASSES FOR YOUNG MEN.—A public meeting took place on Tuesday evening at the St. Paul's School-room, Bermondsey, to promote the establishment of evening classes for young men in that populous parish. The Rev. C. Mackenzie presided. Mr. Bishop read the report of the committee for the last year, which stated that from 300 attendants on the classes the number had gradually increased to 700; and though in the last term it had fallen back to 550, this might be accounted for without implying that the movement was less popular or less appreciated. The committee had modified the standard of instruction below their original design, in order to bring in many neglected district the machinery of adult evening schools. During eight terms 74 classes had been open, and at these there had been an aggregate number of 25,000 attendances; hence the committee felt that there was enough in this to warrant the steps they had taken, but to justify the continuance of some expense. The balance-sheet exhibiting the outlays of seven terms showed that, though the classes were in a degree self-supporting, the expenditure had been three times the income; and an annual outlay of £200 or £300 beyond the young men's payments must still be looked for. No less than 108 lectures had been delivered by 38 lecturers, to attendances averaging 100 hearers; and 37 class teachers had devoted 920 evenings to conduct the classes, an amount of service which, if calculated by money, could not be purchased for less than £784. In Bermondsey there had been two classes last season for French and Hebrew; these had been attended by 85 pupils, the total number of attendances being 926. The receipts had been £92; the expenditure £36. The total receipts since the opening of the classes had been—from students' fees, £169; from subscriptions, £379. There had been paid to class teachers, £219; to clerks and attendants, £56; for advertisements, £49; printing and stationery, £80; lecturers' expenses, £11. The chairman said he presided at the request of the incumbent, the Rev. J. E. Ayerst, who was unavoidably absent. His experience as a schoolmaster in that district had convinced him of the necessity for organising a system of instruction for young men. Though the system had been generally successful in the metropolis, he regretted to say that it was with less encouragement in Bermondsey than elsewhere. Unless at least 20 pupils attended each class, the committee did not feel justified in continuing their labours. A number of young men enrolled themselves as members of the classes.

THE ALTERATIONS IN ST. JAMES'S-PARK.—The "on authority" has been published, to the effect that the only alterations contemplated in St. James's-park are those at present in actual progress of execution, viz.—the clearance of the Fore-court of the Palace, and the removal of the railings in the park, in connexion with a slight change in the boundary fence of the public garden on the one side, and of the Green-park on the other. The railing to enclose the palace, now, will extend about 70 feet in advance of the enclosure which subsisted previously to the erection of the new eastern front of the building. A portion of the ground within the present wooden hoarding will be restored to the park, inasmuch as two-thirds of the intended railing will occupy a line within the hoarding. As regards the fences which are now in progress of removal, the formation of the intended esplanade will give to the public on one side of these fences the ground taken from the other. The arrangements within them (that is, in the garden and in the Green-park) will suffer no change whatever. It is not intended to fill up any portion of the water, or to form any ornamental garden in St. James's-park; and the plan for the formation of such a garden never contemplated the exclusion of the public.

"GEMINI" IRON TWIN STEAMER.—On Tuesday, an experimental trip was made from Blackwall by the patent safety iron steamer *Gemini*, which is the first vessel that has been built and fitted up on the patent recently granted to Mr Peter Bowrie, for improvements in the construction of double-hulled or twin vessels, and is intended to ply on the Thames. Her principal dimensions are: Length between perpendiculars, 140 feet; ditto on deck, 146 feet, breadth of each hull, 6½ feet; space between hulls, 8 feet; breadth on deck, 21 feet; depth from under side of deck to cabin floor, 6½ feet; draught of water, 2½ feet; tonnage of each hull, 27 84 94 tons. O M. The two hulls are entirely constructed of iron, and are securely bound together side by side, with a space or canal between them. Thus joined, the hulls afford a great extent of deck room; and there is ample accommodation for the conveyance of from 800 to 1000 passengers. The cabins are four in number, and 30 feet long by 5½ wide each, and are fitted up in the most convenient and comfortable manner. In addition to this it is intended to be accompanied navigation by the construction of a saloon forty feet long and twelve wide. A leading peculiarity of this vessel is that its keels and stems are not placed in the centre of the hulls, but are situated towards the inside of them, thereby diminishing the resistance of the water to gorge up between the hulls, which has been a great drawback to the success of twin steamers hitherto. She is also eminently adapted for the trade for which she is designed, by having each hull divided into eight compartments by water-tight bulkheads, which in the case of accident will preserve her from sinking; and as the buoyant parts are at the extremities of her breadth, there will be comparatively little tendency to heel over or be crowded with passengers. She was constructed and fitted out with her machinery by Messrs. Robinson and Russell, of the Millwall Iron-Works; and her two engines, which are on the oscillating principle, are of fifty horses' power collectively, the boilers being tubular. The experimental trip on Tuesday was made between Blackwall and the Lower Hope (a few miles below Gravesend). The vessel, with a party of upwards of 100 on board, left the Brunswick Pier at half-past twelve, and returned at half-past five, amid the loud cheering of a crowd of spectators. The trial made of her capacities appeared to give general satisfaction.

An old man eighty-two years of age, residing at Rotherhithe, was killed a few days ago, by accidentally falling down stairs, on his return to his lodgings, after a walk. Up to the time of his death he was in full possession of his faculties, and occasionally worked at the trade of a ship caulker.

BIRTHS AND DEATHS.—The births registered in the metropolis in the week ending Saturday last were 1374, of which 703 were males, and 672 were females. The deaths were 858—a result which, comparatively, must be considered as a favourable indication of the state of the public health. In the corresponding week of 1846 there were 863 deaths; in that of 1847, 1169; in 1848, 1038; and, in the same week of 1849, there were 1981. The average of ten corresponding weeks, corrected for increase of population, is 1110; and the present return shows a decrease of 247 on the estimated weekly mortality. In the week seven deaths were registered from small-pox, and four of the sufferers were persons of 25 years and upwards. Of these, a seaman, brought from the *Dreadnought* hospital ship, aged 28 years, died in the Small-pox Hospital (which is now removed to the west sub-district of Islington) of "small-pox, confluent, unprotected (11 days' illness)" and a mail-driver, aged 27 years, brought from the Maryland-point Station to the Small-pox Hospital, died of "small-pox, unmodified (12 days)." He had been vaccinated in youth, but had no cicatrix. A man died of the same disease in Henry-street, Marylebone, who is stated to have been vaccinated. The fatal cases from measles were 56. Of these, one died of hydrocephalus; in one of which, a woman of 28 years, who had not been vaccinated, died in child-bearing, after an attack of small-pox. Measles was fatal to 10 children, scarlatina to 30, and hooping-cough to 17. Of these, two complaints, the two former more than the average mortality. Typhus was fatal to 38 persons. Intermittent fever, remittent fever, infantile fever, and rheumatic fever were each fatal in one case. In the corresponding weeks of the years (1846-9), the deaths from typhus were severally 144, 111, 58, and 73. Diarrhœa and dysentery continue to decline; in the last four weeks the numbers have been successively 128, 85, 85, and 61. Cholera is returned in two cases on the 13th September, at 6, Tarlington-street, Paddington, an omnibus conductor, aged 30, died of "spasmodic cholera (20 hours)." On the 19th September, at 25, Queen-square, the daughter of a drum-maker, aged 3 years, died of "cholera (2 days)." The persons who had been ill for nine months, suffering frequently from bilious headaches and disordered bowels. Last week 112 persons died of phthisis, or consumption, which approaches very near the weekly average number. From zymotic diseases of the respiratory organs the deaths were 98, about the usual amount. The widow of a law clerk died in the Metropolitan Almshouses, Ball's-pond, at the advanced age of 100 years and eleven months.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean daily reading of the barometer was above 30 in. on Sunday, Monday, and Tuesday; the mean of the whole week was 29.851 in. The day-temperature varied little during the week; it rose towards the end; the [illegible] 4°, which differs not much from the average of corresponding [illegible] afterwards [illegible]

THE GREAT EXPLOSION AT SEAFORD.

THE operation of "blasting," or hurling by the explosion of gunpowder, an immense mass of chalk cliff from the heights at Seaford, down upon the beach, was effected on Thursday week (the 19th instant), with perfect success. The operations had been long announced, and, consequently, a very large concourse of persons was attracted to the hill-quarters to witness the scientific spectacle.

Seaford is a retired watering-place, situated close to the eastern extremity of a bay three miles in length, extending from Seaford Head to Newhaven Head. It is one of the Cinque Ports, and, before the Reform Act, returned members to Parliament. It boasts of Pitt and Canning in its roll of representatives. It is twelve miles from Brighton, and about five from Beachy Head. Close to the sea there is a Martello tower—the last westward; there is also a fort, which is under the care of a resident master-gunner.

The Seaford Cliff is a high range of chalk (from 200 to 300 feet in height) extending almost from the village of Seaford to Beachy Head, between which and the headland off Newhaven is extended a straight line of shingly beach; [illegible] this the *débris* is carried by the tide setting from the eastward, and is deposited within the bay, thus tending to destroy the depth of water. To obviate this, the present experiments were undertaken, with a view to throw out into the sea such a mass of the cliff as shall cause a change in the direction of the tidal current, and so carry the accumulating matter farther to sea into deeper water.

The operations were conducted by the Board of Ordnance, but the owners of land about Seaford contributed towards the expense. The works were begun about seven weeks ago, and there were fifty-five men of the Royal Sappers and Miners engaged upon them.

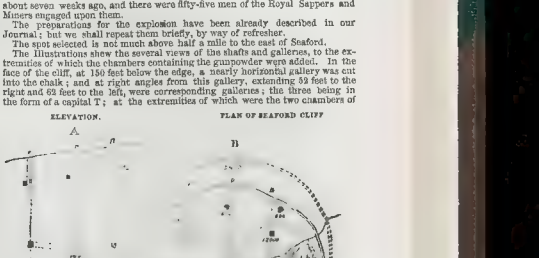
The preparations for the explosion have been already described in our Journal; but we shall repeat them briefly, by way of refresher.

The spot selected is not much above half a mile to the east of Seaford.

The illustrations shew the several views of the shafts and galleries, to the extremities of which the chambers containing the gunpowder were added. In the face of the cliff, at 150 feet below the edge, a nearly horizontal gallery was cut into the chalk; and at right angles from this gallery, extending 52 feet to the right and 62 feet to the left, were corresponding galleries; the three being in the form of a capital T; at the extremities of which were the two chambers of

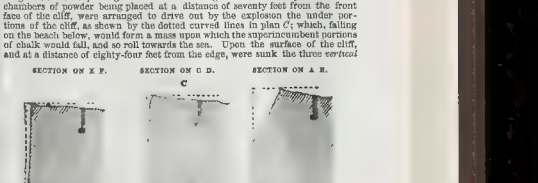
PLAN OF SEAFORD CLIFF.

ELEVATION.



7 feet cubic form, containing 12,000 lb. of powder each. Sketches *A* and *B* shew these chambers and galleries. Two wires, respectively in connexion with two of Grove's batteries of five pairs of plates each, completed the arrangements for exploding the enormous charges simultaneously. These two chambers of powder being placed at a distance of seventy feet from the front face of the cliff, were arranged to drive out by the explosion the under portions of the cliff, as shewn by the dotted outline in plan *C*; which, falling on the beach below, would form a mass upon which the superincumbent portions of chalk would fall, and so roll towards the sea. Upon the surface of the cliff, and at a distance of eighty-four feet from the edge, were sunk the three vertical

SECTION ON E F. SECTION ON C D. SECTION ON A B.



shafts, at the bottom of which were placed the chambers, containing each 600 lb. of powder, to be simultaneously ignited with the lower chambers: these chambers were connected by two wires each with a Smee's battery, containing twelve pairs of plates, placed in a small wooden shed erected very near the pits, about 60 feet from the edge of the cliff. The wires, to convey the electric fluid to each charge, were covered with tape and varnished or tarred over; the wires to the two lower charges in the chambers were, of course, carried over the top of the cliff.

The distance of the centre of the charge was about 70 feet above highwater-mark. The galleries were "tamped" that is, stopped up, with banks of sand, and chalk in bags and loose, to within 50 feet of the mouth, both branches being tamped up, and 50 feet down the large gallery. The tamping is, of course, important: the hole through which the charge of powder is deposited should offer more resistance to the force of the exploded powder than the solid earth, in order that the powder may not find vent through that entrance, but expend its power upon the earth to be cast up; and this may be the better accomplished where the firing is by voltaic battery, because there is only a thin wire to pass through the tamping for the purpose of ignition. These pits were tamped with chalk.

We now proceed to describe the incidents of Thursday

At an early hour, the streets of Town and Port shewed the scene of much bustle and anxiety; and about ten o'clock the roads from Newhaven station to Seaford were lined with an immense concourse of persons, hundreds of whom were from London, brought down by the first monster train of the London, Brighton, and South Coast Railway, the engines being handsomely decorated with flags and bouquets. The railway-trains ran every half-hour during the day; and coaches, carriages, flys, gigs, carts, and all kinds of vehicles, continued to pour into Seaford from Brighton, Lewes, Eastbourne, and, indeed, from every town and village for many miles round. By two o'clock a great crowd had assembled on Seaford Heights, and a dense mass of spectators also on the beach, a great number having taken their places under the cliff, to be as near as possible to the explosion. Numerous pleasure-boats and vessels were in the bay, H. M. war-steamer *Wolfgon*, Captain Bullock commander, was crowded with spectators; and the steamer being very fine, added much to the gaiety of the day. It is generally believed that from the cliff eastward, to the battery at East Bletchington, westward of Seaford, there could not have been less than 10,000 spectators, including those on the water; beside which, a forest of spectators, amounting to some thousands, were to be seen on Newhaven Hill, three miles distant. Among the distinguished individuals and visitors present at Seaford were Major-General Sir J. Burgoyne, K.C.B. (Inspector of Fortifications, and who had the entire control of the works), Colonel F. Fitzclarence, Lord A. Fitzclarence, Colonel Lewis, Brigade Major Walpole, Colonel Sandham, Colonel Landon, Colonel Hall, R.E., Colonel Houltain, R.A., Colonel Madden, &c.; Baron Rothschild, Mr. Peasley, General Upton, Major Barry, Robinson, Burmester, Baines, De Salis, Colonel Lewis, Brigade Major Walpole, Colonel Sandham, Colonel Landon, Colonel Hall, R.E., Colonel Houltain, R.A., Colonel Madden, &c.; Baron Rothschild, Mr. Peasley, General Upton, Major Barry, Robinson, Burmester, Baines, De Salis (8th Hussars), &c.; Captains Frome, Moody, Simmons, Jarrous, Cragie, White, Loyd, R.E., Gibb, Thompson, Williams; Lieutenants Ward, R.E., Fitzclarence, Mure, Greatorex, Mure, Gordon, Lyons, Gordon, Lyons, Philpotts, Whitehead, F. Phillips, R.N, &c; also the Duke of Beaufort, Earl of Chichester, Viscount Gage, Lord A. Paget, Sir J. Rennie, Sir H. Shiffner, Mr. Fergia, M.P., Mr. Gladstone, Chairman of the London, Brighton, and South Coast Railway Company), Rev. T. Cooke, Rev. R. S. Drummond, Rev. G. L. Langdon, &c. Our Artist secured a boat, and thus obtained a near view of the explosion, and of the magnificent scene around.

At Newhaven, a distance of three miles, the shock was sensibly felt. The shock was not remarkable, and there was but little report accompanying the explosion. As soon as the great subterranean operation was observed to have been *successful*, there was loud cheering both by sea and land, which was answered from Seaford Heights by some of the Sappers and Miners, who were also evidently much delighted. A rush immediately took place, [illegible], and the spectators began to swarm on the immense mass of chalk: during which, one or two slips from the cliff took place, and a cloud of powdered chalk transformed the aspect of the spectators into that of millers.

In double lines in plan *B* shew the extent of the throw out, with a plan of the cavity formed; the double dotted lines shew the extent of fissures caused. The whole of the surrounding property, to an immense extent, is possessed by Mr. Catt, a miller, whose interest for the welfare of Newhaven and its harbour has induced him to contribute most handsomely to the expenses of this undertaking.

A Correspondent writes:—"I cannot, in reason, rely upon the destruction thus most unexpectedly caused to the three smaller chambers, but express a thankfulness to Providence, that, by this circumstance, the battery shed, with the officers in charge of it, and the lives of many surrounding spectators, were spared being amongst the crushing masses, which must inevitably have taken place had a very little more force been exerted. The electricity of the two Grove's batteries, on igniting the powder in the larger chambers, caused an in-

THE GREAT EXPLOSION AT SEAFORD.

SEAFORD BAY AND CLIFF.

stantaneous disconnexion of the Smee's battery, from the smaller chambers, the table on which they stood being jerked violently forward between two and three feet, upsetting the Smee's battery on the floor, and throwing out a quantity of acids from the others also; and thus so many lives were happily saved."

To prevent the possibility of accident in all future operations of a similar character, it would be desirable to have the battery house at a much greater distance from the point of explosion; for the great advantage attendant upon voltaic blasting is the power which the battery affords of transmitting a current of electricity, which at any given point, or at any given distance, shall ignite a fine platinum wire, and safely explode the gunpowder the instant the circuit is completed.

Soon after the explosion, the ground began to clear, and the people flocked to the town, where the day was kept as general holiday. A party of officers partook of luncheon in marquées erected within the yard surrounding the fort: General Sir J. Burgoyne, K.C.B., occupied the chair—and the non-commissioned officers and privates afterwards dined together.

Our Artist experienced, during his visit, courteous attention from Captain Rome and Lieutenant Ward, R.E., &c.

Three only of the five mines of 600 lb each at the bottom of the shafts above the cliff were loaded, in consequence of the powder intended for that purpose only arriving at Seaford on Thursday.

The following was the mode of firing the batteries:—The connecting wires from the poles of each of the batteries were inserted in two cups of mercury, and the electric circuits were formed by dipping at the same instant one of the ends of the wire from each charge into cups of mercury, the other ends having been previously immersed in the other cups in connexion with the wires from the opposite poles of the batteries. The two batteries used were made by Mr. Woolvern, of Portsmouth, who was present at the explosion, and was of material assistance in charging the batteries, whilst the officers employed were testing and connecting the wires, an operation that was only just finished when the signal was given to fire.

The quantity of chalk displaced amounts to about 200,000 cubic yards, which, from the average specific gravity of several pieces of the chalk, equals about 380,000 tons. The distance the *débris* was propelled in front of the *original line* of cliff is rather more than 300 feet, extending upwards of 400 feet from the *present* face. The average breadth of the mound formed is about 300 feet, and its mean height about 50 feet.

It is feared the November gales will wash away much of the fall, if some early steps are not taken to secure the chalk from the tides, as already (Monday) several tons have been carried away by the sea. Many persons from Brighton, &c., visited the fall on Sunday, and eagerly sought for fossils, some obtaining pieces of the galvanic wire, flints, &c. and enjoyed the beautiful and extensive sea and land views from the heights at Seaford.

THE EXPLOSION.—CLIFF FALLING.

THE CLIFF AFTER THE EXPLOSION.

THE RHUDDLAN ROYAL EISTEDDVOD.

RHUDDLAN CASTLE

(*From our own Correspondent.*) RHYL, Monday.

The transmission of Welsh music through the Eisteddvods, or Bardic Congresses, for many years, was based on the code of laws of Howel Dda, King of Wales (914), and of Gruffyd-ap-Cynam, in the eleventh century, such enactments being rigidly observed. There is a record of an Eisteddvod in Cardigan Castle in 1107, at which musical prizes were awarded; and Rhys-ap-Gruffyd, Prince of South Wales, had a meeting in the same locality in 1177. Whatever may have been the alleged persecutions and massacres of bards by Edward I. as several celebrated names have been handed down, it is clear that nations

THE PROCESSION TO THE CASTLE.

minstrelsy was not extinguished. We find notices of great gatherings up to the period of the issuing of the Royal commissions by Henry VIII. and Queen Elizabeth for Eisteddvods at Caerwys: and after the holding of these meetings by Royal warrant had ceased, there is no reason to doubt of the uninterrupted chain of Eisteddvods up to 1743. In 1771, the records begin again at Corwen, St. Asaph, &c. In 1819 and 1823 there were Eisteddvods—in 1823, at Caernar-

THE EISTEDDVOD IN RHUDDLAN CASTLE.

won; in 1822 and 1826, at Brecon. In 1838, under the direction of Mr. Parry, there was an attempt to introduce at Denbigh music of other masters besides the Welsh composers, but it does not appear that Wales was sufficiently ripe for this innovation. Eisteddvods have been held at Abergavenny, Cardiff, &c.; and there was one at Beaumaris in 1832, at which her Majesty, then Princess Victoria, invested the successful candidates with silver medals. The Abergavenny meeting of 1848 was under the patronage of the Queen and the Prince of Wales. When it was resolved to hold an Eisteddvod at Rhuddlan Castle, there were two opposite parties—the one desiring to confine the proceedings exclusively to Welsh music, and the other being anxious that Wales should have the opportunity of hearing works of every nation, to her distinction of country as to the composers. The advocates of art progress carried the day, and hence the present meeting with its double title. The locality has been judiciously selected. Rhuddlan, on the river Clwyd, about two miles from the sea, is three miles from St. Asaph, three miles from Rhyl, that fast-rising watering-place, a railroad-station on the Chester and Holyhead line. Steamers also ply between Liverpool and Rhyl.

Our Artist has depicted the exterior of Rhuddlan Castle from the St. Asaph side of the bridge. The western towers are shown, with the Union Jack suspended on the summit in honour of the Eisteddvod. The castle, or rather the ruins, square in form, with six towers. The original founder was Prince Llewelyn ap Seisyllt, in 1020; but the interesting portion of history connected with the castle is not so much in reference to the battles prior to the reign of Edward I., as in the events connected with it that Edward's residence there during the spring and Christmas in 1281-82-83. In 1283 Queen Eleanor was confined at Rhuddlan Castle, of a Princess. The statutes of Rhuddlan were passed in that year, for the administration of the government of the Principality. The return of Eleanor's winter journey from Rhuddlan to Caernarvon, in order to secure the Welsh allegiance by the birth of a Prince of Wales, and the presentation of the Royal infant to the Chieftains with the words Eich dyn—(or corruptly Eich dyn—as in your man)—is, of course, well known. The Castle ruins cover about two acres and a half; and the lofty western walls, covered with moss and ivy, have a very picturesque aspect. Our Artist has omitted the picturesque in the south-eastern entrance. Over the ditch a wooden bridge has been erected for the visitor. Booths and tents for refreshments have been erected around the ancient moat on all sides.

The arrivals to-day have been numerous. A cheap special train from London brought down a great many visitors, and Chester, Liverpool, Manchester, &c., have also contributed a good quota. The prices asked at Rhuddlan and Rhyl for rooms have been quite absurd, and the exaction has taken place, owing to the moderation of the hotel and innkeepers.

RHUDDLAN, Tuesday.

The first question on the opening morning of a festival is as to the weather. The appearance of the rangs of hills indicated either rain or extreme heat. At eight o'clock ai. threatening signs disappeared, and a warm sunny day was the drained dawn of the Eisteddvod. Before nine o'clock the roads leading to Rhuddlan from various towns within a circle of twenty miles, of all classes, were making their way to Rhuddlan, and every description of carriage, from the four-horse barouche down to the humblest dog cart, was put in requisition. From an isolation were divided into companies of carts, mules, and donkeys; minstrels, as of old, with their harps slung on their backs, trudged on, with a heavy load but with a light heart. Omnibusses were loaded to a degree that indicated no existence of a cruelty to animals association; "flys" had their six-a-ris crammed; and here and there were Irish cars equally well-freighted. From Rhyl and St. Asaph were the main streams of visitors. Pengwern, the ancient seat of Lord Mostyn, gave early promise of Eisteddvod excitement. The spacious and picturesque park, from which an exquisite view of Rhuddlan Castle may be found, was studded with peasantry; and the rooks, astonished at the bringing of a dissent brass band, took leave to keep up an obligato accompaniment, which the players industriously emulated in their impromptu tonality. The music—we mean of the band—emanated from two friendly societies of St. Asaph, who had banners indicative of the benefactive nature of their union, wended through the wooded avenue to the grand entrance of Lord Mostyn's edifice. This was at nine o'clock, and the venerable Peer descended to the lawn, to receive the congratulations of the societies, whose hearty cheering proved that his Lordship's popularity, and whose loyalty was also perfectly demonstrated by the aforesaid brass and percussion orchestra playing the National Anthem in divers keys, with unaccountable modulations, more startling than critically correct. The village of Rhuddlan was in great commotion every window had its occupant, and groups surrounded the antique houses, whilst walls were clustered thickly. At half-past nine the interior of the Castle was filling fast; but at ten o'clock, when the procession of the Rev. Mr. Wynne Edwards to invite the company present to join the procession, to escort the President into the Castle, caused an immediate rush to the exterior.

It is now the moment to refer to the decorations of the interior of the Castle, for the week's proceedings. The Castle-yard area, a space of 146 feet by 129 feet, was roofed over in three compartments with light timber framing, and lighted by canvas (waterproof), with three spacious ventilators, and lighted by thirty skylights. The form of the Hall is amphitheatrical. At the north wall was a raised gallery for reserved seats, and immediately below this gallery was the platform for the President (Lord Mostyn), with a chair of state in the centre, and two chairs to the right and left for the two Vice-Presidents, the Earl of Powis and Lord Viscount Fielding. Over this northern compartment were the Royal Arms in the centre, surmounted by the plume and coronet of the Prince of Wales, with the motto "Ich dien." Below the Royal Arms, "God save the Queen" was inscribed in black letters; and above, in Welsh. "Duw Gadwo'r Frenhines." On the right and left of the orchestra wall were suspended the arms of Lord Mostyn, Lord Dinorben, the Earl of Powis, Viscount Fielding, the Bishop of St. Asaph, Sir Watkin Williams Wynne; Sir John Williams, Bart., of Gwydyddan; Hon. Mr. Douglas Pennant; Lady Erskine, Mrs. Lloyd, of Cefn; and John Heaton, Esq., of Plas Heaton, near St. Asaph. All these arms, with their respective mottoes, were painted by Mr. Atkins, the coadjutor of Mr. Wyon, to his successful efforts in the Castle, and adds those of a painter; and who with truly artistic enthusiasm supplied those [illegible] Mr. Atkins, the coadjutor of Mr. Wyon, to his successful efforts in the Castle, and adds those of a painter; and who with truly artistic enthusiasm supplied those [illegible] Sir Watkin, both the [illegible] Mr. Atkins, the coadjutor of Mr. Wyon, to his successful efforts in the Castle, and adds those of a painter; and who with truly artistic enthusiasm supplied those [illegible] Sir Watkin, both the [illegible] banners for the meeting. [illegible] south wall, of the triangular form, Clipp's large drums and cymbals on the summit. From the roof, at the junction of the two central beam, were suspended the coat of arms of W. Shipley Conwy, Esq., of Bodrhyddan, the constable of the Castle. Under these arms was the motto, "Y Gwr a Gar Gyfraith." which, translated, to use the Saxon, may be rendered thus:—"The Owner of the Roof-Tree" (the beam next to the sky). Over the orchestra was the motto, "Gorsedd Gwynedd" (North Wales Bardic Meeting). To the left of the President's chair (the eastern wall) were suspended six portraits (oil paintings) of celebrated bards, the property of John Williams, Esq., the chairman of the committee. These bards were Owain Myvyr, the father of Iaames-street, and the founder of the London Gwyneddigion Society, and collector of the "Myvyrion Archæology of Wales," who ruined himself by the publication; Gatyon Perla, Dewi Wyn, Davydd Dda, famed bards; Tomas y Nant, common, y called the Cambrian Shakspeare, a writer of dramatic interludes and farces; Ab Iecdorn, a distinguished linguist, a self-taught man, who knew some sixteen languages. Over these paintings was the motto, "Cymru fu, Cymru fydd" (Wales that was, and Wales that shall be). Below was the motto, "Os y Bydd e'r Cymraeg" (May the Welsh tongue flourish for ever). On the western wall were the mottoes, "Y Gwir Yn erbyn y Byd," and "Tra Mor tra Brython:" the latter signifying "So long as the ocean exists, so long will the Welsh be;" and the former, "Truth against the world." At the north-western angle of the hall were the mottoes "A Fynno dew dewid" and "Asserr ian diosd et pherchen" ("Whatever God pleases, let it be done"—"Let every man be master of his science"). The western and eastern walls had raised platforms for reserved seats. In the centre of the hall was an open pit or space, for standing room, like the pits in the German theatres. Here the President's throne was a table for the accommodation of the three honorary secretaries (the Rev. T. Wynne Edwards, the Rev. Ameurin Lodge, and the Rev. E. J. Lloyd), Mr. Hughes, Bard of the Eisteddvod; and the Welsh and English journalists were this day. We have published the samples of arts and manufactures to be contended for. The lighting of the hall at night was from chandeliers, with the patent diamond light.

At half-past ten the Welsh harpers struck up the air "Morfa Rhuddlan," as the President's procession entered the arena. His Lordship was met at his residence by the committee, and mounted his horse, supported by the constable of Rhuddlan Castle and Sir W. W. Wynn on horseback. The friendly societies joined the *cortège*. Shortly after eleven, the President took his seat in the hall, amidst prolonged cheering. The members of the Committee were silver leeks, and those who had the Welsh harp. Prayer was offered in the language of Wales and in English at the opening of the Eisteddvod, and by sound of trumpet, the President rose to address the assemblage, expressing his inability to do justice to the honour he had conferred upon him, and fancying might produce a yet mute and inglorious Milton, or create a genius like that of his talented friend, Gibson, the sculptor. On the scenes of the Castle he would not enter: they were those of the blessings of free institutions and the patronage of a gracious Queen, who had permitted the Prince of Wales's name to be enrolled; and he trusted that the spirit of loyalty would be preserved, and that the Welsh language, which was the tongue of our first fathers, would always be retained. His Lordship's address was followed by Joseph Williams, Esq., M.P., then called on the bards, and Idris Frechan, Eos Ian, Absalom Roberts, Cybelyn Môn, Gwylyn Bethesda, and Iwean Ionawr delivered poetic addresses, congratulatory of Lord's objects of the meeting. Mr. John Jones, of London, the architect of the hall, whose bardic name is Talhaiarn, next addressed the meeting with much eloquence, complimentary to the Royal patrons, and to the President as the lineal descendant of the ancient Welsh princes. He referred to the decay of the Assyrians, the Egyptians, the Greeks, and the Romans, and contended that the position of the Welsh, albeit a conquered nation, was a tenable one, inasmuch as they had the language they spoke 1200 years ago. Mr. [illegible] divers interest in references to the locality, cordial [illegible] visitors, and quoted a poem of Mrs. Hemans, concluding with a powerful perception. The band then struck up the spirited March, written by M Chipp, of the Royal Italian Opera orchestra, for the occasion. The subject is based on the Welsh air, "The rising of the lark," opening with a movement *andante*, and with a nicely-arranged *ivis moderato*. It was encored. After the March, the Dean of Ba[illegible]or addressed the assemblage at great length in a liberal and enlightened discourse. Without excluding [illegible] thy, the Dean argued in behalf of progress exhibited in this age in the fine arts and education generally, illustrating his theories by witty and appropriate quotations. He spoke in favour of the choral Societies, as opening to the Welsh the knowledge of the works of the greatest masters. The learned Dean was listened to with some impatience by the Welsh "purists," and was replied to with immense energy by the Rev. Ricks Owen, who was for everything Welsh and against everything English. This exhibition of nationality, or of antipathy, found responsive echoes in some portions of the auditory, but the disposition of the majority was evidently [illegible] The adjudication of the prizes began at one o'clock. [illegible] poetry and essays were disposed of. No. 1, [illegible] £25 and a gold medal, was the award of the meeting, and Evan Evans, who was then duly invested with [illegible] Mr. Evans, [illegible] as the Bard of the Eisteddvod, Mr. Morris Jones (Meuric Idris) and Mr. John Jones (Talhaiarn), amidst prolonged cheering. For the second best composition, the Rev. W. C. Williams received the premium of £5. Mr. T. Parry, of Anglesea, won the prize for the best English poem on "Rhuddlan Castle." Mr. Hughes, of Manchester, won the prize for the best set of "Penillian," to the Welsh air called "Pen Rhaw," in honour of the Prince of Wales. Prizes were also awarded for the best summary of the "History of Wales;" for the best essay on the Cultivation of Upland and the Management of Stock;" for a poem to the "Memory of Mrs Hemans," &c After votes of thanks and cheers for the President, the Vice-President, the Earl of Powis, for Sir Watkin Williams Wynne, and for the Constable of the Castle, the proceedings terminated.

THE DINNER.

In the evening nearly 300 gentlemen sat down to dinner in the hall, the tables being arranged behind the orchestra. Lord Mostyn was in the chair, supported by the Earl of Powis, General Love Parry, the Dean of Bangor, Archdeacon Williams, Sir Cardigan, Mr. Joseph M. Morgan, M.P.; Sir W. W. Wynne, Bart., M.P.; Sir Stephen R. Glynne, Bart.; E. L. Richards, Esq., County Court Judge; Hon. R. T. Rowley, W. Shipley Conwy, Esq., the Honorary Secretaries, &c. There were many excellent speeches, the tendency of the leading addresses being evidently to promote the progress of education in Wales, and the removal of the barriers of prejudice under the guise of nationality.

A "miscellaneous concert" had been announced for the evening; but, owing to some misunderstanding, there were only some glee singers, and much discontent was expressed by those who had paid to hear an organized programme.

Mr. Ellis Roberts, the Prince of Wales, was the winner, yesterday, of prize 33, for the best arrangement and execution of "Pen Rhaw," proposed by the Dowager Lady Erskine. The medal is valued at £8 10s. There were eleven competitors, amongst whom was Mr. Edmund Chipp, a pupil of eleven years of age. There could be no doubt as to the justice of the award, the harmonies of Mr. Ellis Roberts being so far superior to those of the other candidates. Yesterday and this day have been fully occupied in the adjudication of the prizes. We will give a list of the winners in our next publication. The oratory of Archdeacon Williams and of the Rev. D. Jones, and Penllion singing, were also included in the day's proceedings, the attendances to which have been large.

The second and last grand concert of vocal and instrumental music will take place this evening (Thursday); to-morrow degrees will be conferred, and Mandel's quadrille band will be performed in the grand hall in the Castle to-morrow night will terminate this interesting Eisteddvod.

RHUDDLAN, Thursday.

The first concert took place last night, the attendance being considered very good by the committee. Mr. Edmund Chipp was the leader of the orchestra of 26 players, principally members of her Majesty's private band and the Royal Italian Opera. Beethoven's "Fidelio" overture, and Weber's "Oberon," were played and Mr. Chipp's March ended the first part, and Mendelssohn's "Wedding March" the second part. Miss Lucombe and Mr. Sims Reeves made the deepest impression in the duo from Donizetti's "Lucia," "By the long tomb," which was encored rapturously. It was evident that the accomplished soprano and the tenor had touched the hearts of the Cambrians. Miss M. Williams was encored in Macfarren's ballad, "She shines before me like a star," and singing [illegible] Mr Sims Reeves electrified the audience by his "Bugle song" [illegible] Mr Williams, Mr Lockey, Mr Land, Mr Bodda, Mr Hughes, Mr Williams, Mr Lockey, Mr Land, Mr Bodda, Mr Hughes, [illegible] Mr William Rees, Mr Lockey, Mr Land, Mr Bodda, Mr Hughes, [illegible]

POOLE ELECTION.—The nomination took place on Monday, when it appeared that the somewhat lengthy list of candidates had been reduced, by various influences, into two—Mr. Savage, a Protectionist; and Mr. Seymour, a Free-trader. The speeches at the hustings were interrupted on both sides by the most disgraceful hootings, and the candidates and their friends were most plentifully pelted with rotten eggs. Potatoes, carrots, and even stones, were hurled in every direction; fights were of constant occurrence; and broken heads were in numerous. Quantities of flour were scattered over the hustings, and eventually the gentlemen on the hustings looked like a party of millers. On Tuesday, the poll opened at nine o'clock, and closed at four, when the numbers were ascertained to be—

Seymour (Free-trader)	..	..	..	188
Savage (Protectionist)	..	..	..	167
Majority for Seymour	..	..	..	21

CAMBRIDGE UNIVERSITY ELECTION.—According to the *Morning Herald*, Mr. Gowley's committee, finding the tide of public opinion running strongly against them, have withdrawn their candidate. It is, therefore, anticipated, that Mr. Wigram will be returned without opposition.

EXCURSION FETE AT ALTON TOWERS.—A *fête* of this character took place at Alton Towers, the seat of the Earl of Shrewsbury, on Monday, and was a very successful affair. From Manchester and Stockport two trains, carrying from 2000 to 3000 people, were despatched, besides trains from Macclesfield, Leek, and the Potteries, so that altogether from 5000 to 6000 people availed themselves of the Earl of Shrewsbury's permission to view his magnificent gardens and scenes of the mansion. The arrangements were under the management of Mr. Weston, professor of music at Manchester, who took with him a number of vocalists and the band of the 9th regiment of infantry. On the lawn in front of the Earl of Shrewsbury's mansion a selection of music was given, whilst the visitors were conducted through the adjacent grounds and gardens, and Mr. Weston afterwards gave a concert at the Mechanics' Institution—a building erected at the Earl's expense on the Castle hill, which drew together an audience of 200 to 300 people at 2s. admission each, the receipts being given to the funds of the institution. The whole mass of visitors appeared highly gratified with their trip, the weather being exceedingly auspicious; and, although it was midnight before some of them reached home, no accident occurred to mar the general satisfaction at the result.

HOLYHEAD, Sept. 21.—A round stern-head schooner, apparently heavily laden, was seen to go down near Cardinal's Point. All on board drowned.

POISONING BY LEAD.—Mr. Herapath, the Bristol chemist, writing "as to what quantity of lead may be taken by human beings without injurious effects," states that a river in the West of England, the water of which was immemorially used by the inhabitants of a village on its banks, became impregnated with the refuse of a lead mine, and the consequences were indigestion, loss of appetite, and pallor. On analysis, the water was found to contain only 1-500,000th part of carbonate of lead, or one grain in nine gallons.

FIRE AT MANCHESTER.—A cotton mill in Silver-street, Manchester, built 70 years ago, and one of the oldest in existence, was on Saturday partially destroyed by fire. The building is eight storeys high, and the property of Mr. W. Hill, Isle of Man, but is held on lease by Messrs. E. and H. Tootal, silk-manufacturers, who let it off with engine power to about nine or ten subtenants. About £500 worth of cotton, and from £600 to £700 worth of silk is uninsured. The total damage would be about £2000. The cause of the fire cannot be ascertained.

ALARMING ACCIDENT ON THE GREAT NORTHERN RAILWAY.—On Saturday night, an accident of a very serious character happened on this line, at the Hatfield station, which has been attended with serious consequences to personal safety. There was a train from the north, consisting of forty cattle-waggons, which reached this station when another train, also from the north, was due. The clerk did not consider it safe to allow the cattle-train to proceed, but crossed it on to the down line, having first put on the ordinary danger signal, and taken the additional precaution of sending a man on two yards south of the station, to stop any down-trains that might come. At about 8.20 P.M. the parliamentary train from the north passed, and then the clerk determined to send the cattle-train on to the down platform. The guard of this train from London, seven minutes before its time, ran past the danger signals into the station, and the collision with the cattle train was the result. The following is an epitome of the latest report received from the surgeon:—Samuel Carter, engine-driver—bowerings of the lungs, the effect of the blow: the injury is somewhat of a serious nature, but hopes are entertained of his recovery. Charles Crew, stoker—bruised. George Blow, passenger—left leg fractured, doing well. Thomas Smith, stoker—fracture of the left leg: doing well. Mrs Terry, passenger—three ribs broken, going on favourably. Two other passengers were slightly injured. Every possible attention was paid by the surgeons, Drs. Drage, of Hatfield, and Mr. Wadesworth, of London. Mr. Seymour Clarke, the general manager, took a special engine from King's-cross, and was on the spot as soon after as possible, and the result of the evidence that he collected is stated to be, that the slightest blame is attributable to any one but the unfortunate driver Carter, who is most likely to be the greatest sufferer. On Wednesday, Captain Wynn, the Government Inspector of Railways, held an inquiry into the circumstances to which this accident is attributable. The general tendency of the evidence on this occasion also went to show that every precaution had been taken to prevent an accident. Captain Wynn's report will be made, of course, to the authorities

On Saturday, a boy named George Hill, aged twelve years, died at Cheltenham from excessive smoking. His symptoms were those of a person suffering from narcotic poison.

On Monday night, Portsmouth Dockyard was placed in jeopardy by the fall of a fire-balloon, which had been inflated by some thoughtless persons

A severe storm visited Glasgow on Sunday, which lasted for more than an hour. Several accidents resulted from the lightning, two of which the escape from instant death was most miraculous. A considerable portion of the slating of Bartholomew's Mills, near Barrowfield Toll, was torn from the roof and thrown to the ground. The chimney was also demolished.

The London and North-Western Railway Company, in order to free themselves from the annoyances and litigation to which they have been lately exposed by the other companies at the joint station at Chester, are about to build a new one for their through traffic; and the Chester and Holyhead, Chester and Birkenhead Companies are to be invited in free of charge

On the subject of the extension of the South Wales Railway, the directors have been memorialised; but the answer has been to the effect that until the line between Gloucester and Chepstow be completed, they cannot take any steps for the constructing of the line from Swansea. This decision has caused great dissatisfaction in Carmarthenshire and Pembrokeshire. Proceedings have been threatened, should the directors ultimately refuse to accede to the wishes of the inhabitants.

The excursion train from Oxford and Banbury, on Monday, brought 1600 persons up to Paddington. The one out of London on Sunday took 1200, and returned with them in safety; and during the week there was a first excursion out of London to Blenheim and Woodstock, over the company's (the Great Western) newly-opened line between Oxford and Rugby.

A correspondent of the Birmingham paper complains that the usefulness of King Edward's School, in that town, is materially impaired by the number and length of the holidays. He shows that the real number of school days in a year is only 151, or, in round numbers, six months and a half of holiday to five months and a half of school instruction.

THE MARCH OF INTELLECT AT THE ANTIPODES.—On June 17th the Australian Society held its first meeting at the Royal Hotel, Sydney. The association is based on the plan of the Society of Arts, London. At the meeting were present the Governor, the Chief Justice, Mr Justice Therry, Colonel Baddeley, and about one hundred of the leading professional and mercantile gentry. The first paper read was from the pen of the Surveyor-General, Sir Thomas Mitchell, on the external structure and undeveloped resources of the county of Cumberland (N. S. W.), which is described as a learned and valued production of the author. The field of inquiry to which the Surveyor-General drew general attention and the immense resources of Cumberland are briefly enumerated in the subjoined epitome:—

> The object of the writer seemed to be to draw attention to its natural productions and capabilities, as it is now the most cultivated, and, in fact, comprises about a fifth part of the metropolitan county. It is stated, nevertheless, "to contain thousands of acres of rich land, unincumbered with wood, at convenient favourable to the cultivation of wheat, rivers of the purest water, estuaries abounding in fish, lofty rivers full of oysters of a large size and peculiarly fine quality, swarms of birds in almost every hollow tree, patches of forest still the resort of kangaroo: taken covered with dense, plants producing a fibre of superior strength for cordage, mats, &c. &c. &c. The geological district in the rocky mountains between Bulgora River and the Illawarra was stated to be of very limited extent. Besides Maldon it [illegible] several localities were mentioned distinguished by [illegible] with of forests. These were Bargo forest, Little Forest, Darky Forest, and Dr. Townson's forest at Mount [illegible] facing on shape-trees, white, and the rich vegetation which distinguishes the Illawarra. [illegible] the soil in the sea-coast of the country described; and being found at two points [illegible] the writer deduced from them the depth at which it might be [illegible] to be found at other [illegible] the two points that were seen, namely, at the spot [illegible] 400 feet above the sea, and, secondly, on the sea-coast, at the coal cliff, distant from the first point six miles, and supposed certain to be the same formation, and consisting of the same strata of limestone, marl, coal, &c. &c. &c. [illegible] would pass through Port Hacking as fifteen miles, and South Head, Port Jackson, at thirty miles.

A number of new and valuable wool dyes were exhibited, especially the fixed black dye from the bark of the emu, which was procurable in abundance at £3 10s. per ton, and well adapted for tweed manufactures. Arrangements were in contemplation to introduce the alpaca goat into the colony, which animal, it was thought, would thrive in districts where sheep cannot exist.

THE PRESS IN THE PACIFIC.—Mr. George Arden, who for many years was connected with the Port Phillip (Australian) press, has been appointed Printer and Secretary to the Minister for Foreign Relations at the Court of the Sovereign of the Sandwich Islands, on a salary of £200 per annum.

VALUE OF LABOUR IN AUSTRALIA.—In the current year, the price and value of labour has fallen considerably: compared with 1848, the rate of wages of labourers has decreased 15 per cent., and that of women servants at least 25 per cent.

ORPHANS IN AUSTRALIA.—The Rev. Michael Stephens, the second Roman Catholic pastor of Melbourne, and late parish priest of Portland, has resigned his mission, and purchased from his private fortune a tract of land in the western district, upon which he purposes founding an industrial farm school, for the education, clothing, and apprenticing of destitute male and female orphans.

CHESS.

TO CORRESPONDENTS.

W B, High-street, Exeter.—You will readily obtain what you require by application to the Secretary of the Brighton Chess Club, Chain Pier, Brighton

DAVID Forbes.—We reply impartially to all communications *which reach us*. Those you refer to must have miscarried

R D M. There is no mistake of any kind in the clever Enigma 596. Try it again

MEDICO.—Captain Evans, the author of the celebrated "Evans' Gambit," we regret to say, has recently taken his departure from England for a residence of some years, at least, in the Cape Verd Islands

JUGO.—Your No 4 is neat, but far from difficult Of the previous ones, No. 1 is incorrect, and No 2 solvable in seven, instead of eight moves

T H T B.—A player with his King in check cannot Castle to escape from it

J B, Worcester.—Your guess is very wide of the mark

R T C, St Albans.—Problem No 347 *cannot* be solved in less than the stipulated number of moves. If the solution is one of our own problems, and you will forward the date when it appeared, we will give you the Solution

J N.—Such Problems to be perfect in construction should admit but of one solution

A H.—Thanks, but they are much too simple for our columns

W T, Guildford.—Under the circumstances mentioned in your former letter, your opponents are bound to Castle, since they sent "Castles" as their moves; but we apprehend that by mere do so still on which side they choose

D W K.—Of your Problems, No. 1 can be solved *in three moves*; No 2 in many different ways; No. 3 in three moves, and the rest are too obvious for publication

G S, Conway.—Correct: a pretty little mate to occur in actual contest

BREWER.—In the study Number 349 you are not required to find checkmate, but such a mode of play as gives to White a winning game

BELLAH.—It shall have an early place

J N.—Good King's College.—We have marked the game for publication, when we are a little less pressed for space

C F S.—Very acceptable at all times. The most interesting, among which we may particularize the last with Mr Court, shall appear shortly

CONSILIARIUS.—Mr Cochrane is still at the Calcutta bar; and we are rejoiced to learn, amid the clashes of a lucrative appointment which he has obtained, finds frequent leisure for the enjoyment of his favourite game

G S, Conway.—Correct: a pretty little mate to occur in actual contest

BREWER.—In the study Number 349 you are not required to find checkmate, but such a mode of play as gives to White a winning game

BELLAH.—It shall have an early place

J N.—Good King's College.—We have marked the game for publication, when we are a little less pressed for space

C F S.—Very acceptable at all times. The most interesting, among which we may particularize the last with Mr Court, shall appear shortly

CONSILIARIUS.—Mr Cochrane is still at the Calcutta bar; and we are rejoiced to learn, amid the clashes of a lucrative appointment which he has obtained, finds frequent leisure for the enjoyment of his favourite game

BOTARGUS.—In the battle match between Messrs. C B Smith and Craddock, wherein the former gave the odds of the Pawn and two moves, Mr Smith has come off victorious, having won the whole five games which were played according to agreement. A slight success appears to have been attended to the latter's head, for in the first game of the contest with the certificate [illegible] he actually [illegible] from the diversion "Professor" to a stand-still

LEWIS EATHORNE.—If admissible at all, at least two solutions. Give a few months' study to the best masters in this branch of Chess before you attempt the composition of Problems again

CTA.—If you want a *fighting* leather board, there is none equal to the one designed by Lieutenant, of Dorsetshire, to accompany the Rev. Mr. Mac—'s [illegible] of your treasures what is called a book board, then get one of those called the "Terrace Chess-board." Just brought out by Messrs. of Londonbridge-street

F H D, Brugge.—A private communication was forwarded some days ago

A P M.—One of the main objects of the projected Congress next year is to get up a grand match, or series of matches, between the finest players in Europe For this purpose considerable funds will be demanded, as the prizes ought to be commensurate with the occasion, and with the honours which is likely to be engaged in the competition For further particulars apply to the Editor of the *Chess-Player's Chronicle*, King William-street, Charing-cross

*** We have to a knowledge the receipt of several highly interesting games lately played by Captain Kennedy with various members of the St George's Club, and an invaluable book of game played in the Calcutta Chess Club between Mr Cockrane and a Brahmin of great skill in Chess named Mohi schunder Bonnerjee The whole of these are being prepared for press, and will appear in our columns forthwith

SOLUTIONS of No 348, by PUNCH; J A R, of the Royal Artillery; J G R, of Clatham, HEN RICHS JOHANNES, St EDMUNDS, B A, Hereford; M E R, J M, Forres are correct

*** We are again obliged, from lack of space, to postpone the replies to numerous Correspondents until next week.

SOLUTION OF PROBLEM No. 348.

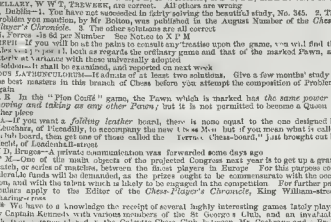
WHITE.	BLACK.	WHITE.	BLACK.
1. B to Q R 6th	P takes Kt (best)*	3. Kt to K 4th (ch)	K moves, or B takes Kt
2. P takes P (ch)	K to Q 3d	4. B takes K P.—Mating.	

* If otherwise, White would mate next move

PROBLEM No. 349.

By R. B. WORMALD, of Oxford.

BLACK.



WHITE.

White to play, and mate in three moves.

CHESS ENIGMAS.

No. 609.—By "AN AMATEUR."

White: K at his 6th, B at Q sq, Kts at K 7th and Q B 7th; Ps at K Kt 3d, K B 6th, and Q B 4th.

Black: K at his B sq, Ps at K Kt 5th and Q B 4th

White, playing first, mates in four moves.

No. 610.—By R. B. WORMALD, of Oxford.

White: K at Q Kt 6th, Q at K Kt 6th, Kt at Q 3d; Ps at Q B 3d, Q Kt 2d, and Q R 5th.

Black: K at Q 4th, Ps at Q Kt 2d and Q R 3d.

White to play, and mate in four moves.

No. 611.—By A. M.

White: K at K Kt 2d, Q at Ler 4th, R at K B 3d, Kt at K B 4th

Black: K at Kt sq, Q at Q Kt sq, R at Kt Q B sq., Ps at K Kt 3d and K R 2d.

White, playing first, mates in three moves.

No. 612.—By the Rev. J. Bullar, of Southampton.

White: K at Q R sq, Rs at Q 2d and Q 4th, B at K R 5th, Kt at Q 6th, Ps at Q B 2d and Q Kt 4th.

Black: K at K 6th; Ps at K 3d, Q 4th, and Q B 6th.

White to play, and mate in four moves.

DONCASTER RACES.—The receipts at the Grand Stand on the two first days of the races were £2800, being £800 more than in 1849, and £400 more than in 1848.

VISCOUNT PALMERSTON.—An admirable bust of Lord Palmerston has just been completed by Mr. E. Stephens, of Upper Belgrave-place. It not only depicts the features and expression of his Lordship's countenance with spirit and fidelity, but it is a *chef-d'œuvre* of art, and a remarkable triumph of the sculptor's genius.

ROYAL TRIUMPHAL ARCH.—An arch projected at Dundee in 1844, to commemorate the Queen's visit in that year, is almost completed. It is of solid masonry, with stairs leading to the summit; the style Saxon, with ornaments emblematic of the interior. The structure forms an imposing gateway to the principal docks. It is, we believe, the only permanent memorial yet erected to commemorate Queen Victoria's Scottish progress.

THE ROYAL YACHT CLUB.—The new schooner yacht, the Rear-Commodore's Challenge Cup, with 20 guineas added, is to take place on the 30th instant. The *Gem* steam-packet has been engaged by the Club to accompany the match. The Cup may be inspected at Mr. Neale's, 18, Edgeware-road.

TESTIMONIAL.—On Monday a deputation of the licensed victuallers and other connexions in trade of Arthur Manners, Esq., of the King's Arms Brewery, Wateraleet, presented him with a beautifully wrought silver epergne, as a testimonial of their high respect for him. The epergne has been manufactured by Messrs. Elkington and Mason, and consists of three graceful figures holding instruments of music, and dancing round a vine; the pedestal bearing a suitable inscription.

EMIGRATION TO AUSTRALIA.—FAMILY COLONIZATION LOAN SOCIETY.

In the latter part of 1848 a line of packets to Australia was established, on the improved principles of accommodation on ship-board for emigrants, which had been laid down by Mrs. Chisholm. Since that period, and under the new system, fourteen vessels, fitted up expressly for passengers, with enclosed cabins—each family or married couple having a separate cabin—have sailed for Australia with emigrants. These vessels were intended for the advantage of respectable persons who were unable or unwilling to incur the expense of a chief-cabin passage, and, at the same time, did not wished to be ranked as intermediate or steerage passengers; and, therefore, neither of those classes were carried; but the accommodations on board were adapted for one class only, and they had the full range of the ships The rate of passage is twenty guineas for each adult, including provisions, bedding, and mess utensils. Letters and testimonials have been received by Messrs. Hall Brothers, by Mr. T. B. Mallet, and others connected with the undertaking, and published in their prospectus, expressing "their appreciation of the good faith kept, and the excellent quality of the provisions that had been provided for them"

The Family Colonisation Loan Society was originated by Mrs. Chisholm, and the principle is thus described by herself:—

> Parties contribute towards their own passage half or more of their passage money, according to eligibility and circumstances, the balance being lent to them by the society, such parties agreeing to refund the amount to the society through agents appointed in the colonies within two years from the date of their arrival in Australia. Sums thus repaid will in like manner be lent to others, thus rebuilding the fund for the privilege as nominated for a passage their own relatives or friends.

The *Sheila Castle*, a vessel belonging to Messrs. Wigram, of Blackwall (class A 1, 904 tons register, 768 burthen), is now lying in the East India Export Docks, and is under process of fitting out under the management of Messrs. Hall Brothers, for the reception of the first party of emigrants to be sent out to Australia on Mrs. Chisholm's new system of "Family Groups." The passengers are all to be embarked by twelve o'clock on the morning of the 28th of the present month, in order that they may be inspected by the Government officer; and the ship is to sail from Gravesend on Monday next, the 30th instant.

Mrs. Chisholm, during the past week, was on board every day, Sunday excepted, up to the 27th inst., from eleven till two o'clock, to give information to persons who were desirous of emigrating. This most benevolent and clever lady was there to be seen daily engaged in active and evidently very efficient personal superintendence of the arrangements that were going on, even to the smallest details. The anxious desire she expressed, and which she has fully testified by her admirable conduct, was to provide not for the physical comforts only of the emigrants, but also for their moral advantage by the provisions to be made for a proper classification, or separation according to sex, and the confinement of being married or single. The number of persons at both ends about to proceed by this vessel amounts to 191. There are 41 families, 34 single men, and 42 single women, the difference forming the total being constituted by children

Mrs. Chisholm's explanation of the details of her excellent system is most satisfactory, and leaves one in doubt whether to admire most her enlightened benevolence or her inventive genius. She says:—

> These family groups consist chiefly of families who have most relatives before them in the colonies, the society being particularly anxious to promote the reunion of families. There are now going, or about to proceed, by the second ship of the society, twenty-one parents who have children before them in the colonies, with ready-prepared homes. Forty-eight brothers and sisters will thus be re-united. The wives, with their children, are about leaving to join their husbands in Australia. In all, 310 souls are now preparing, through the auspices of the society, to join their relations in these colonies, besides numerous families and individuals of the humbler classes who are anxious to emigrate in order to better their circumstances

> For single women, this ship have been so arranged that each family will be provided with an inclosed cabin, so that the objections in system hitherto adopted in the separation of the working classes, of men, women, and children having to dress and undress in the same compartment will be done away with. Single berths are furnished, with enclosed berths, no more than six sleeping in one cabin, and similar arrangements will be adhered to as far as practicable in the single men's accommodation of the single men. At the same time the range of the quarter-deck and poop is open, which hitherto used to be reserved for the poop, will afford to those parties the means of taking exercise, only the emigrants must comply with such regulations with respect to the liberty of walking on the poop as the captain commanding may suggest and the society approve of

> The single females and young men are placed under the guardianship of the families, who have pledged themselves to afford them protection, for instance, one father of a family brings his four grown-up daughters: these girls will be placed with the single young men in two or three cabins, thus the man and his wife affording a sort of parental protection to the girls. In like manner, the sons of parents on board will be messed and associated with friendless youth.

For the moral improvement and rational amusement of the emigrants, it is proposed to establish a library on board, and for which contributions are respectfully requested. These books will be afterwards applied to the formation of shepherds' libraries, in the Bush of Australia.

We may add that some of the single young men are going out to join their betrothed, who are already with their families in the colony; and also that this ship will be the first to have taken passage in it a bishop and his party for the holy bands of matrimony before their embarkation.

THE IRISH AMELIORATION SOCIETY.

MANUFACTURE OF PEAT CHARCOAL.

(From our own Correspondent.)

DERRYMULLEN.

It rarely happens in this country, that a young Association, starting with the same professed object as that of the Irish Amelioration Society, affords such cheering evidence of the vast amount of useful ness which is certain to arise from its future operations We can scarcely believe that one out of every ten persons who visited the station and works in the Bog of Allen came with other expectations than that of seeing the same amount of misery and wretchedness that is to be seen in every other bog than this in Ireland; and proud indeed must have been Mr. Rogers, C.E., to witness the vast assembly which his energy and industry, over a space of six years, had brought together Aided by an influential court of Directors, Mr. Rogers obtained a Royal charter for the conversion of peat fuel into charcoal for sanitary and other purposes, as also for the reclamation of the peat bogs in this country. He at once commenced operations at Derrymullen, a short distance from Robertstown, in the county of Kildare; where no sooner was a station erected, than it was besieged by the then miserable and half-starved spectres who inhabited this dreary waste—thereby proving, that where employment is to be had, the peasantry of this country are able and willing to work. For many reasons, perhaps no better spot could have been chosen to erect this, the first of the Society's stations (one out of 200 which they are bound according to their charter to build), than its lying on the brink of the Grand Canal, which is a great facility of conveying the material, when manufactured, to a ready market.

Some idea of the vast amount of this material at their command can be formed from one of the accompanying Sketches, which shows the bog stretching away as far as the eye can reach to the north; with Carbara Castle in the distance, and a well-cultivated country on either side; the works of the company on the left, and the Wicklow Hills on the right.

Thursday, the 19th inst., was the day fixed for the opening of the Derrymullen station. Having arrived at Robertstown some time before the Directors and visitors who were invited to witness the day's proceedings, we naturally turned our attention to the works

In the Sketch already named is shown the bog in its state previous to the coming of the Society to this part of the country. We next inspected the machine with which the turf is cut: two skeins are used to chop or make a long incision in the bank or bench from which the turf is taken with one forward thrust or cut; and the other having the side of it so turned up as to enable the man cutting with it to take out a perfectly square turf, measuring six by four inches: he then throws it to another man, who stands on a platform raised over the bank; and he flings it to a third, who places it on a barrow and takes away to a distant spot, where he again passes it by women and girls, who pile the pieces up, and place them on what are technical y called "short clamps."

These "clamps" consist of hurdles at equal distances from each other, so as to admit of the air passing through them, and thus causing the turf to dry in a much less time than if placed, as heretofore, on the ground. From this layer of hurdle upon hurdle the turf is next removed to the rick, where it remains until conveyed into the furnace-house. Thus much of the operations we have explained in one of the Sketches, which shows, also, the construction of the benches from which the turf is cut, its self-draining principle, and the large rick and conical stack, masking those buildings requisite in all large factories, and where the sanitary and deodorising property of the peat charcoal is so successfully applied; whilst, at the same time, from their peculiar mode of construction, the turf is kept still further dried

The buildings for this purpose are three in number, each resembling the other, and are erected of strong plank; in the centre or main building are the furnaces, thirty six in number, arranged in rows six in each, and are composed of strong sheet iron, of pyramidal form, with iron framework and hood to protect the upper portion of the building from the flame and vast amount of heat generated from the fuel used within the furnaces. Here, again, the turf is still further dried upon a framework so arranged over the furnaces and across the building, when it is thrown up from below (as shown in the sketch) by men or women; whilst others turn it about, so that all toe heat from below passes through the whole mass of turf, and is thoroughly dried, in the compact turf that can be sent into the furnace-house becomes, in the course of six or eight days, ready for the furnaces; and, when discharged from them, peat charcoal. It is then wheeled to the other end of the building, where the machinery is placed in a lofty tower, divided into lofts or storeys: the prepared charcoal being conveyed up by a shoot, within which travel a set of elevators, and it is ultimately sent down another set of shoots, ready for the market.

Having now gone through the entire works, seen the whole process, and sought to illustrate it, we arrived at the entrance outside, where we found a large assemblage of visitors from the surrounding country. Shortly after, arrived a special train from Dublin, bringing the Directors, and their friends, as well as several ladies, all of whom had left Dublin at eleven o'clock. They were received with a hearty cheer, and, upon alighting, they were shown over the works by the engineer and resident officers of the Society, and expressed their wonder and admiration.

After spending some two hours in the open air, the company re-t. d to the building, where an excellent *dejeuner* was prepared for them by the Directors. In addition to the elegant fare, it is a pleasure to state that the choicest wines and tastes displayed. In selecting the choicest flowers, lichens, mosses, heath, and fern, from the company's bags, were admirable. The chair was taken at three o'clock, by Lord De Manley, supported on his right by Archbishop Whately, and on

THE BOG OF ALLEN, FROM THE CANAL SIDE.

his left by Lord Clancarty, with other distinguished guests, to the number of three hundred.

His Lordship, in proposing the several toasts, spoke most cheeringly of the future prospects of the Society, as well as of the good thus early done to the neighbouring peasantry; to which all the other speakers bore ample support. Mr. J. W. Rogers, when called on, supplied a detailed account of the Society's proceedings since its first formation, its present state and future prospects, in a tone, and with statistics of such a healthy nature, as to have filled the hearts of all present with joy.

During the day, the scene was much enlivened by some delightful music from the band of the 40th Regiment, which had come down from Dublin for the purpose.

Shortly after six o'clock, such of the company as had to return to Dublin betook themselves again to the canal boats, when, at their departure, a most amusing scene was got up by some of the parties on board, who tossed some coin amongst the crowd, for which a violent contest took place. The leaving of the boats was followed by a long and lusty cheer from those on the banks, who continued to follow them so long as it was possible to keep up with

CUTTING TURF, AND PREPARING IT FOR THE RICK.

ONE OF THE RETORTS FOR BURNING THE TURF INTO CHARCOAL.

the horses, which quickly took them out of sight; and many were the fervent prayers offered up for their safe arrival.

The people employed in the works, to the amount of 300, were afterwards entertained at a capital dinner prepared for them in an adjoining house, and were waited on by the chairman, as well as several others of the directors who remained in town. The song and dance aided to enliven and pass away the time up to the closing of night, when all returned to their homes, filled with gratitude to those who, independent of their work, had also provided for them a day of unalloyed enjoyment.

In the evening, Mr. J. W. Rogers, whose residence, Peat House, Robertstown, was brilliantly illuminated, gave a ball and party to such of the directors and managers as remained in town.

(Three of the above Illustrations are from Sketches by our observant correspondent. The general view of the Model Station is from a drawing made by Mr W. A. Thompson).

IRISH AMELIORATION SOCIETY.—MODEL STATION AT DERRYMULLEN ON THE BOG OF ALLEN.

PARIS FASHIONS FOR OCTOBER.

We have just seen the change from the summer to winter fashions; and however fresh and graceful the light dresses may be, we do not feel any regret at the fine silk dresses taking their place. In lieu of *robes peignoures* in jaconet, Pekin, *coutil*, or Nankeen, we have silks embroidered in silk drown the front, or

DRESS CAP.

with scalloped flounces. The new embroideries are of various kinds, and seem to promise to be in the greatest vogue during the approaching season. A silk dress braided or embroidered with a small *pardessus*, entirely covered with the like braiding or embroidery, of necessity of the same colour as the dress; or the dress with only tambour embroidery, or embroidered with narrow velvet and bradings.

NEW BONNET.

The pattern which seems destined to have the preference this year for town dresses is the *redingote*. It is worn closed; and the body has an embroidered stomacher, and open sleeves ornamented with embroidery. Open sleeves are still in high fashion; but the cold season, when it comes, will produce a change in this arrangement. We leave this question to be solved by the clever dressmakers. Many dresses are also trimmed in front with seven or nine rows of silk braid or narrow velvet. From what we have seen of the fashion-costumes which have appeared, we can predict that the dresses will be ornamented with silk embroidery, braiding, velvet, or silk trimming.

The *pardessus* continues to be small, similar to the dress, wholly embroidered, fitting a little to the shape, and ornamented with a deep lace or silk guffered fringe. At this season, when the great winter shawls are not tolerable, we have

LILIUM LANCIFOLIUM RUBRUM.

PARIS FASHIONS FOR OCTOBER.

noticed plain small cachemire shawls, embroidered with silk of striking colours, and imitating the designs of Indian cachemires.

The velvet *manielets* for winter will again be wholly embroidered with braiding or trimming.

There is a striking novelty in silk braids, in the arrangement of which there are one or two thick drawn twists, by which means the braid is fulled. This ornament is much used on the bodies and the sleeves of dresses whose skirts have flounces. The flounces are generally to the extent of three, usually large, festooned, or merely scalloped.

Instead of the worsted lace which has been so much in vogue all this year, the *dentelles gutte* has just come out. It is a mixture of silk and worsted, and really approaches pure silk lace.

The *robes de chambre* are of cachemire, lined with rose taffeta; the body with rose lapels, which may be closed; the sleeves very wide at bottom, with rose cuffs.

The head-dresses which are preparing for the theatres or evening parties are in great variety: some are either in lace or blond, some trimmed with flowers, others with velvet: the mixture of flowers and velvet cannot fail to succeed; the difficulty will be to make a head-dress, and not a cap.

In the accompanying Illustrations we have a dress of Canton Brun, or white coutil; high body, [illegible] with velvet in braiding, with a like *pardessus*, short and fitted to the shape, and embroidered like the dress; wide sleeves and under-sleeves, with festoons. In all toilets the collars and the habit-shirts, which are worn with open bodies, and the dresses, are ornamented in the same manner as the sleeves: cap trimmed with Mechlin lace and Pompadour ribbons. Dress of Scotch plaid poplin, with *pardessus* of the same, having a point behind; also generally worn round, and without the point in front. Dress of grenadine, open body, and trimmed with full braiding, carried down to the bottom of the skirt, to form an apron.

For the little boy, a blouse of *coutil*, cloth, or velvet, with somewhat wide sleeves; the collar, the under sleeves, and the trousers, of cambric muslin, short, ornamented with English embroidery.

Shooting-dress, of *coutil*, cloth, velvet, or moleskin; close jacket fastened with four small lappets; close-fitting pantaloons, with gaiters similar to the dress, or of leather.

Ladies' riding habits are, as heretofore, made plain; only the body has lapels, to be open at pleasure, so as, when the weather permits, to wear habit-shirts with frills and collar of English embroidery: cap of Alencon lace, with satin ribbon, in two thick bows, fringed. A drawn silk blond bonnet, with satin ribbon, full: a blond curtain forming the entrance to the caul, with very long ribbons to tie it, is a novelty entitled to special notice.

LILIUM LANCIFOLIUM
RUBRUM, OR SPECIOSUM

THIS fine lily is one of the original varieties introduced into Europe some years since from Japan by Dr. Van Siebold, and is, without doubt, the most beautiful of this charming family. It is known by the name of *Lilium lancifolium rubrum, or speciosum*. There were two other kinds introduced by him at the same time—*Lilium lancifolium album*, and *L. lanc. punctatum*. There have since been many seedlings raised in Europe, two of which have been named—one *L. lanc. crucatum*, and the other *L. lanc. roseum*. Mr. Groom, of Clapham, has also raised many hundreds from seed, some of which have been flowering annually. Among these are many beautiful varieties, having larger flowers, deeper colour, and broader petals. This Lily is a plant of easy culture, and thrives well either in the conservatory or in the open border: it is admirably adapted for pleasure-grounds, as it produces its lovely and fragrant flowers in the autumn, when there is so great a scarcity of fine flowers. All the varieties of *Lilium lancifolium* are hardy, and do not require any protection when planted in the open borders. The lily (*Lilium*) belongs to Class *Hexandria*, and Order *Monogynia*, of Linneus; and *Tuliparee* of the Natural Order.

ANTIQUARIAN DISCOVERY AT ROCHESTER.

An iron bridge is now in course of construction across the Medway, at Rochester, and, a few days since, the workmen, in taking down some houses to form one of the approaches to the new bridge, discovered this not unpicturesque relic of a past age. It had been spared, probably, in the first place, for its antiquity,

EARLY ENGLISH ARCH, DISCOVERED AT ROCHESTER.

though it was built into one of the house walls upon what was once sacred ground; for the arch in question is a fragment of old St. Clement's Church. Of the right hand column only a portion remains; and, in order to preserve the arch something more [illegible] a piece of [illegible] brick-work has been left. The other column is to all intents as far as regards the general outline, but the capital, which was [illegible] what late date, is sadly mutilated; from its appearance, we conclude to have suffered from long exposure to the weather, although it is plain that it formed no part of the exterior of the church, which it seems likely must have remained roofless or in a very dilapidated state for a long series of years. Fisher, in his "History and Antiquities of Rochester," merely alludes to the church incidentally, and his account is, in a great measure, conjectural. He says, speaking of the time at which the parish of St. Clement was consolidated with that of St. Nicholas, at which time we may suppose that the smaller place of worship fell into disuse and decay: "Dr. Harris, in his 'History of Kent,' states it was done by act of Parliament, in the reign of Edward VI.; but, as no special law for that purpose occurs in the statute book during the reign of that Prince, it seems most probable that the junction was effected by the 37th of Henry VIII., c. 21 (A.D. 1546), by which churches might be united where any of them is not above the yearly value of six pounds, particularly in corporations, with the consent of the chief magistrate. And there is one circumstance which inclines us to believe that this [illegible] was [illegible] soon after [illegible] the [illegible] of St. [illegible] vacant in February, 1548, [illegible] son of John Hales, [illegible] rector collated to it, the parish, as appears from the Consistorial Acts, was served by different curates to 1564, but from that date no men-

tion is made of any assistant clergymen A considerable part of the walls of the church is still standing at the entrance into the lane, formerly called St. Clement's, but now Horsewash-lane: the east end, or chancel, is visible; the south wall, or part of it, is now the front of three houses almost opposite to Bridge-lane, and the north wall forms the back of these houses. The width of the church does not appear to have been above forty feet; and a row of pillars and arches extended from east to west, at about fourteen feet from the north wall."

The first edition of Fisher's work was published in 1772, and the three houses to which he alludes probably occupied the site of the two which are now taken down; and may be the identical houses of that time, then one house was a more modern erection. It should be mentioned that the columns are octagonal in shape, and that the height of the shafts, including the capitals, is about six feet, the span of the arch, which is of the Early English style, may be eight feet, or perhaps rather less.

By the time this appears in print, no doubt the whole of this interesting relic will be removed from the position which it has occupied for centuries. It is proposed, we understand, to re-erect what remains of the stone-work in a public garden, which Mr. Winch, of the Sun Inn, Chatham, is about having laid out on the banks of the river, a little to the left of Rochester Castle.

Many absurd stories have been in circulation, of valuable curiosities found amid the ruins; but they are, it appears, false—nothing particularly interesting to the archæologist having yet turned up.

H. G. A.

NATIONAL SPORTS.

The first of the October Meetings at Newmarket commences on Tuesday next, and, with three triennials, and a variety of two-year-old prizes, seems likely to be more than ordinarily attractive. It has hitherto been confined to three days, but, from the introduction of a couple of matches for Friday, may be extended a day; this, however, is doubtful. Scarborough, Painsland, and Felton Races—all minor affairs—take place on Monday; Chesterfield on Wednesday, and Monmouth on Thursday.

On Monday, the Challenge Cup of the Royal London Yacht Club will be sailed for; and on the same day there will be a Regatta or model yacht match on the Serpentine—"think of that, Master Brooks!"

The Cricketing season closes on Monday, with an All England match at Birmingham.

TATTERSALL'S.

MONDAY.—The town settling for the Doncaster races did not prevent the transaction of a fair amount of business at the following prices:

TWO-YEAR-OLD TRIENNIAL.—3 to 1 agst Aaron Smith.

THREE-YEAR-OLD TRIENNIAL.—3 to 1 agst William the Conqueror (5). 4 to 1 agst Hardiagas.

FOUR-YEAR-OLD TRIENNIAL.—Even on Vatican.

CUMBERLAND.		
8 to 1 agst Landgrave	9 to 1 agst Bellegrove	25 to 1 agst Chantrey
8 to 1 —— Rasborough	10 to 1 —— Backfister	25 to 1 —— Copenhagen
	2½ to 1 agst Miss Ann	
LANCASHIRE.		
6 to 1 agst The Italian	11 to 1 agst Turnus	17 to 1 agst Hagley
10 to 1 —— Mulgrave	14 to 1 —— Londstone	25 to 1 —— Athenus
DERBY.		
12 to 1 agst Prime Minister	33 to 1 agst Aaron Smith	40 to 1 agst Brother to Chanticleer
25 to 1 —— The Black Doctor	40 to 1 —— Eightfoot	

BEDFORD RACES. TUESDAY.

The PREPARATION STAKES of 10 sovs each, with 25 added.—Mr. Rogers's Bellissima, 1. Lord Strathmore's Magician, 2

TWO-YEAR-OLD PRODUCE STAKES of 25 sovs each.—Mr. G. Higgins's c by Minotaur out of New Year's Day, 1. Duke of Bedford's f by Sir Francis out of Taurina, 2.

BEDFORDSHIRE STAKES of 20 sovs each, with 70 added.—Mr. T. A. Macan ns Landseer, 1. Mr. Carew's Œdipus. 2

TOWN STAKES of 5 sovs each, with 25 added. Heats.—Mr. Rayner's Pulcherrima, 1 1. Mr. James's Sarah, 2 2

WEDNESDAY.

The STRATTON-PARK STAKES of 10 sovs each. with 30 guineas added Mr. Elsee's Mrs Tuft, 1 Mr G. Ongley's Bird of Paradise, 2

The WOOTTON-OLD STAKES of 10 sovs each, with 50 added Mr. G. Higgins's Theseus, 1. Mr. H Waring's Odium, 2

QUEEN'S PLATE of 100 guineas.—Mr. Charlton's KISSAWAY, 1. Mr. Salt's Sam Hood, 2

The FAREWELL STAKES of 5 sovs each, with 20 added.—Mr. Daly's Goodwood, 1. Mr James's Sarah, 2.

The HUNTERS' STAKES of 5 sovs each, with 60 added.—Mr. Bevill's Scratch, 1. Mr. Tucker's Seagull, 2.

RICHMOND RACES.—TUESDAY.

The AMATEUR STAKES. Fleur de Lis, 1. Little Queen, 2.
WRIGHT STAKES. The Cutler, 1. Red Deer, 2.
SWEEPSTAKES. Radulphus, 1. Andalusian, 2.
GOLD CUP.—Cantab, 1. Flash, 2.

MANCHESTER RACES.—THURSDAY.

The CHAMPAGNE STAKES.—Unity, 1. Madame Wharton, 2.
The CHESTERFIELD HANDICAP.—The Cocktail, 1. Woolwich, 2.

THE OCEAN STEAM-SHIPS.—The friendly rivalry which exists between the British and North American, and American lines of steam-ships, which sail between Liverpool and the United States, imparts considerable interest to the outward and homeward passages of these noble vessels. The *Atlantic*, which reached the Mersey on the morning of the 19th, was twelve days and a half on her passage between New York and Liverpool, whilst the *America*, which arrived on Sunday morning, after making the *détour* to Halifax, beat her competitor about two clear days. A moment's consideration will show that the *America* is by no means the swiftest vessel of the British fleet of steamers. The *Asia*, in her outward passage, made an unprecedented run. She was off Halifax in eight days twenty-one hours, and reached New York in just ten days one hour. Halifax, however, she have to for eleven hours Deducting this time, with six hours for the detention and *détour*, she made the run from Liverpool to New York in ten days four hours, the quickest run ever made

ONE OF ALADDIN'S JEWELS FOUND.—The *Sacramento* (California) *Transcript* notices a discovery in the Auburn dry diggings of a beautiful quartz crystal, as clear as amber, and about three inches long and five inches in circumference, of wheel. the following description is afforded:—In the centre appear the most beautiful variety of forms and shapes ever presented to the eye, cluster of green, metallic moss—an enclosed formation like an amethyst—speaks of variegated hues and colours, perfectly transparent [illegible] to the centre to the circumference of the crystal innumerable shoots [illegible] metallic substance, bearing an exact resemblance to the shining blue steel hair spring of a watch

MARRIAGE WITH A DECEASED WIFE'S SISTER.—A paragraph which has appeared in the Scottish press, to the effect that Mr. Stuart Wortley will not re-introduce into the Lower House the bill to legalise marriage with the sister of a deceased wife, has been contradicted, and it is stated that that gentleman has arranged with Lord St. Germans for its early introduction in the House of Lords. As the Lord Advocate of Scotland has expressed his opinion that these marriages are already legal there, the passing of the bill in 1851 will not extend to that country. No fewer than 107,000 persons petitioned last session in favour of these marriages, and they are still of constant occurrence.

A LARGE SUM.—It was lately stated in the Diocesan Synod of St John's, Antigua, supposed to belong to the fourth order, *Plectognathi*, genus *Cephalus*. Its description is as follows:—Body, truncated; skin, thick, hard, and spineless; partially stellated; back, dark blue; caudal fin, short; dorsal and anal fin, five inches in length, tailing with the caudal fin; mouth small and straight; no marks, resembling a G and a 7 on one side, and a 5 on the other; sides and abdomen reflecting a gold and silver metallic lustre; length, thirty inches; depth, fourteen inches; weight, thirty pounds; tail, small and round; not admitting two fingers; no teeth The fish was taken out of the water while feeding on the moss attached to the piles of Mr. Bradshaw's wharf, by a young man, without the least resistance on first observation; he struck it with a stock finding it still remain, she took it from the water. When our correspondent saw it, it had been so much injured by the crowd that he could not examine it to ascertain whether it had a swimming bladder, which this genus are said not to possess

THE FINE ARTS IN FRANCE.—The Academie des Beaux Arts of the Institute of France awarded, in its sitting of the 21st, the first great prize in architecture to M. Louis Victor Levesvet, of Paris, pupil of MM. Ri.vot and Labrouste, second great prize to M. Edouard Auguste Villain, of Paris, pupil of MM. Visl and Desjardins. The public exhibition of the great prizes of painting, of which the subject is "Zenobia found on the banks of the Arse," took place at the Ecole Nationale des Beaux Arts, Paris, on the 24th, 25th, and 27th inst., from ten o'clock to four.

MARSHAL HAYNAU.—Lord Drumlanrig has addressed the following letter to the editor of the *Morning Herald*:—" Sir,—Lord Drumlanrig encloses a copy of a letter he has sent to the *Morning Chronicle*, and requests it may also be published in the *Morning Herald*." —

TO THE EDITOR OF THE MORNING CHRONICLE

SIR,—Having for many years been in the habit of reading the *Morning Chronicle*, I shall greatly regret to find myself compelled to discontinue doing so. But, seriously speaking, if on [illegible] other three days of the week the same worn-out, tiresome, [illegible] to be forced upon my notice in the shape of letters purporting to come from indignant but *anonymous* correspondents—letters, however, which, and they can show both the signatures and addresses, must be looked upon as mere varieties from the same talented pen which inflicts the leading articles—then most unwillingly, although from sheer necessity, in self-defence, shall I find myself compelled to request your agents to discontinue forwarding me an old friend—the *Morning Chronicle*.

Of HAYNAU young—of HAYNAU old—
Of HAYNAU hot—of HAYNAU cold:
Of HAYNAU *tender*—of HAYNAU tough—
I most protest I've had enough.
Your obedient servant,

Edinburgh, Sept 21 DRUMLANRIG, M. P.

Some changes have lately taken place amongst the Government officials in Canada The retirement of Mr. Justice Rowland from the bench created a vacancy, which has been filled up by the appointment of the Attorney General. Mr. Lafontaine, who is succeeded in office by the Solicitor General, M. Drummond

NAVAL AND MILITARY INTELLIGENCE.

THE NEW COMMANDER-IN CHIEF IN INDIA.—Lieutenant-General Sir W. Gomm, K.C.B., accompanied by Lady Gomm, leave town this week for the Continent, where they will remain until the end of October, and then proceed, *viâ* Trieste and Alexandria, to Calcutta. Captain Yates, 53rd Regiment, who acted as Sir William's military secretary at the Mauritius, will proceed with him to India in the same capacity. Captain Hamilton, of the Coldstream Guards, has been appointed an *aide-de-camp* to Sir William Gomm.

GOVERNOR OF GREENWICH HOSPITAL.—The Admiralty have conferred the vacant appointment at Greenwich Hospital on Commander Thomas Colby (1814). Commander Colby is one of the senior officers of the navy, and has distinguished himself on the coast of Syria, as he is one of the most distinguished commanders on the list. He was at the battle of Camperdown, in the *Centurion*, when she beat off Linois' squadron; was a Lieutenant in Calder's action; at the defence of Gaëta; at the forcing the Dardanelles and destruction of the Turkish squadron; in the Egyptian campaign of 1807, and was senior lieutenant of the *Prince of Wales* at the reduction of Genoa, in 1814.

THE COMMAND OF THE ROYAL ENGINEERS AT DEVONPORT.—Col. R Thomson is to succeed the late Col. Holloway, C.B., as commandant at this station.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

From the opening prices of Monday, no change has to be recorded, the week having been marked by the same inactivity that characterised its predecessor On Monday, steadiness, with Consols marking the improved price of 96⅛ ⅜ for Money, and 96⅜ ½ for Account, was succeeded by the same quotations on Tuesday and Wednesday. A slight tendency to flatness for a short period, however, on Thursday, arising from speculative sales, reduced the quarter price to 96⅜ ⅝, but a favourable reaction afterwards occurred The Unfunded Debt remained without change. India Stock has quoted 263. Reduced and New Three-and-a-Quarter per Cents are the only securities of the preparations for the dividends. Prices at the close of the week are—for Consols, 96⅛; India Stock, 268; India Bonds, £1000, 86 p.; Consols for Account, 96⅝; Exchequer Bills, £1000, June, 63 p.; £500, June, 63 p.; Small, fine, 67 p.

The only topic of interest in the Foreign Market during the week has resulted from a long correspondence between the committee of bondholders, Messrs. Marsh, Manning, and Senior Payne, the Portuguese Finance Minister. It appears that Messrs. Manning and Co. have withheld a large amount, a disputed account existing with regard to the sale of the cotton licenses. The Mexican Finance Minister has, however, directed that no more remittances pass through the hands of Messrs. Manning and Co., but that the sums received, applicable to the dividends, be collected weekly and despatched monthly by the packets. A spirit of honesty and good faith marks the letters of the Finance Minister—at last! Such a spirit is much wanted. An improvement in the price of the stock has been a natural consequence: 20⅞ to 31⅛ having been registered. With regard to the Market generally, prices have been maintained, notwithstanding a very limited amount of business. Brazilian Bonds. Small, 92⅜; Equador Bonds, 3½; Mexican, 5 per Cent., 1846, ex Jan. Coupons, 31, Ditto, Small, 31⅛; Peruvian Bonds, 4½ per Cent., Account, 82⅛; Portuguese, 4 per Cent., 43⅛; Spanish, 5 per Cent., 1840, 18½; Ditto, 3 per Cent., 39⅛; Venezuela Bonds, 2½ per Cent., 32½; Belgian, 4½ per Cent., 91

A reaction has occurred in the Railway Market, which, after the sudden rise, was to be anticipated. Shares have also slackened, and prices, although much higher than a month since, are in many cases below our last quotations, as the following list will best show:—Aberdeen, Preference, 1½ dis.; Caledonian, 6⅜; Ditto, New £10, Preference, 6½; Chester and Holyhead, Preference, 10½. Eastern Counties, 6¼; Great Northern, 13; Ditto, Half, A, Deferred, 4; Ditto, Half, B, Deferred, 2½; Ditto, New per Cent., Preference, 12; Great Southern and Western (Ireland), 34⅜ x d; Great Western, 71⅜; Ditto, New, £17, 5½; Lancaster and Carlisle, 25½ x d; Lancashire and Yorkshire, 62½ x d; Ditto, Fifths, 1⅛; Ditto, Thirds, 10 x d; Ditto, New, Guaranteed Six per Cent., 12⅜; Ditto (West Rid. Union), 42 x d; Leeds and Bradford, 92½ x d; Leeds and Thirsk, 3½ dis.; London and Blackwall, 6; London, Brighton, and South Coast, 13; London and Greenwich, 11; London and North-Western, 114½; Ditto, New, Quarters, 18⅜; Ditto, Fifths, 14⅜; London and South-Western, 69½; Ditto, New, Preference, 7⅜; Manchester, Sheffield, and Lincolnshire, 17; Ditto, New, £10, Preference, 7⅜; Midland, 42⅜; Ditto, 250 Shares, 12⅜; North British, 6⅜; Ditto, Pref., 5; North Staffordsh., 6⅜; Shrewsbury and Birming., 8⅜ dis.; South-Eastern, 20⅜; Ditto, Reg., No. 4, 6⅜; South Wales, 32⅜; Wilts, Somerset, and Weymouth, 4⅜; York, Newcastle, and Berwick, 16⅜ x d; Ditto, Separate Extra, 12 x d; Ditto, D.N., Pref., 4⅜; York and North Midland, 20; Ditto, Pref., 7⅜; Northern of France, 14⅜; Boulogne and Amiens, 7⅜ x d; Namur and Liege, 7⅜; Orleans and Bordeaux, 2⅜; Rouen and Havre, 5⅜.

FRIDAY AFTERNOON. Although exceedingly little business has been transacted in Consols to-day, both for Money and Time, no change has taken place in the quotations. The Bank of England has sold £200,000 Three per Cents Reduced and Exchequer Bills, 63s to 66s pm. Foreign Bonds dull; but Railway Shares support late rates. Large dealings have taken place in Caledonians, at an advance of ⅜.

THE MARKETS.

CORN EXCHANGE (Friday).—A fair to rage quantity of English wheat, 240 quarters, has arrived for our market. The supply of foreign wheat on sale to-day is moderate, and sample was comparatively small. The attendance of both town and country buyers being on the increase, the demand for wheat of fine quality was steady, at full prices of Monday's quotations Nearly 13,000 quarters of foreign wheat have come to hand. A moderate business [illegible] to fine selected qualities, at full rates currency In the middling and inferior sorts a slow trade was doing Not less than 11,000 quarters of foreign flour have reached us. The large importation checked the demand for English parcels but we have no decline to notice. The arrivals of barley, since our last report, have been very large, both English and foreign, was small, the trade with that article was in a sluggish state, at the late decline. Malt, from 38s to 42s per quarter, for fine, was in request, and extremely scarce. Beans and peas, of good sorts were scarce, and quite as dear. Damp and inferior parcels were neglected Beans, peas, and [illegible] corn were in full request.

[illegible] Irish.
[illegible] barley 30s [illegible] 21s
[illegible] Kent, 40s to 46s; ditto, white, 42s to 48 ; Norfolk and Suffolk, 40s to 46s; ditto, white, 40s to 46s; rye, 24s to 25s; grinding barley, 21s to 22s; Scotch, 28s to 30s; ditto, potato, 28s to 30s per quarter; Tartary, 26s to 28s; grey peas, 24s to 25s; maple, 28s to 30s; boilers, 28s to 30s per quarter Town made, 35s to 40s; Suffolk, 29s to 34s; Stockton and Yorkshire, 29s to 34s per 280 lbs. *Foreign:* Dantzig red wheat, 44s to 47s; white, 44s to 47s; barley, —s to —s; oats, —s to —s; beans, —s to —s; peas, —s to —s per quarter. Flour, American, 24s to 25s per barrel; [illegible]

[illegible] per quarter, [illegible] request at full prices In Canada [illegible] have been given with [illegible] Mediterranean and Black Sea wheat, 42s to 46s; Hungarian, 39s to 39s per quarter [illegible] Mediterranean and Black Sea barley, 21s to 22s; Egyptian beans, 28s to 29s; Mediterranean and Black Sea rape-seed, new, £25 to £26 per last of ten quarters. Linseed cakes, English, £8 0s to £8 10s; ditto, foreign £6 10s to £7 5s per 1000. Rapeseed, cakes, £5 0s to £5 10s per ton. Cloves, 5s to 6s per pound. Mace, 2s per pound. Nutmegs, 5s to 5s 6d. Pepper, 5d to 5½d. [illegible] to —s extra, up to —s. Foreign, rud. —s to —s; extra, —s to —s, extra, —s to —s.

Bread The prices of wheaten bread in the metropolis are from 6½d. to 7½d. of household ditto, 5d to 6d per 4lb. loaf.

Imperial Weekly Average.—Wheat, 42s 7½; barley, 23s 3d; oats, 17s 8½; rye, 25s 4d; beans, 28s 10d; peas, 27s 7d

Aver ge. Wheat, 42s 7½; barley, 1s 0d; oats, 1s 0d; rye, 1s 0d, beans, 1s 0d; peas, 1s 0d

Teas.—Owing to the large deliveries, and the comparatively small stock on hand, our market is somewhat excited, and business cannot be purchased under 1d to 1½d per lb.

Sugar. Most kinds still command rather an active inquiry, on higher terms. Consumption is by no means large, but the public have more confidence in the future supply and prices are quoted 6d per cwt. We have more demand for crushed

Coffee. Good ordinary qualities are advanced to 54s per cwt., at which buyers are still coming forward. Plantation kinds are quite 2s dearer. Foreign, 8s higher

Spices.—Cassia and fine Ceylon is steady; but all other kinds command very little attention

Provisions.—Lard and Irish Butter are in good request, and the former commands an advance of from 2s to 4s per cwt. Carlow, 74s to 80s; Clonmel, 78s to 80s; Limerick, 78s to 78s; and Cork, 78s per cwt. English Bacon is quite out of season. Fine mild Dorset, 78s to 82s; Devon, 80s to 76s per cwt., fresh, 9s to 10s per dozen lbs. Fresh Butter, 9s to 10s higher Very little doing. Prime mild Waterford, 78s to 80s; fine, 82s to 86s per cwt. Lard firm at 50s to 52s for Waterford, [illegible]

Tallow —A large business is doing in our [illegible] rates. P Y C, on the spot, is quoted at 39s to 39s [illegible] Town Tallow, [illegible]

Oils —Yorkshire [illegible] Linseed oil [illegible] at very full prices

Spirits. Leeward Island rum is slow in sale, as is ad to 1s 4½d; and East India, is 3d per gallon good Brandy and corn spirits are a trifle firm.

Wool.—Since the conclusion of the public sales, a steady business has been doing in most kinds of wool, at the quotations current at the close.

Potatoes The supplies are not to say extensive, yet the demand rules inactive, at from 30s to 85s per ton.

Hops and Stroul Meadow hay, £2 8s to £3 16s; clover ditto, £3 to £4 8s, and straw, £1 8s to £1 9s per load.

Coals (Friday).—Tanfield Moor Hetton, 14s; Wylam, 14s 9d; Lawson, 16s; Lambton, 16s 6d, Stewart's, 17s, Whitworth, 14s 6d; Cowpen Hartley, 15s 3d per ton.

Hops (Friday).—The trade is somewhat extensively engaged, with new hops, both from Sussex and Kent, in excellent condition. The plantation accounts at hand this morning state that the produce is quite equal to the average, and of fine weight. Little alteration in business is doing, on the following terms:—New Weald of Kent pockets, 75s to 85s; Sussex ditto, 55s to 75s per cwt. The choice are fancy prices, occasionally, for extra fine. Two parcels of East Kent hops have arrived, and sold at from 95s to 126s per cwt. [illegible] cattle, £2 4 0s to £2 20 0s.

Smithfield (Friday) Nearly the whole of the beasts in to-day's market were the refuse of Monday, if we except a portion of the foreign supply. Although the attendance of buyers was small, the few good beasts on sale were disposed of at full prices. In all other kinds there was no nothing was doing, at barely late rates. There was a decided falling-off in the numbers of [illegible] Fresh up from Lincolnshire were obtained for the best half breeds The top figure for the primest Downs did not exceed 4s 4d per 8lb. The sheep were well supplied with [illegible] calves, which met a slow trade, at unaltered currencies Prime small porkers produced full previous rates. In the [illegible] 6d; second quality ditto, 3s 2d to 3s 4d; prime coarse-woolled ditto, 3s 6d to 3s 8d, prime South Downs, 3s 10d to 4s 0d large coarse calves, 3s 8d to 3s 10d; prime ditto, 3s 6d to 3s 8d, large hogs, 3s 2d to 3s 6d, neat small porkers, 3s 8d to 3s 10d suckling calves, 18s to 24s, and a score old store pigs, 16s to 22s each Total [illegible] 2792; calves, 197; sheep, 23,950; calves, 690; pigs, 330. Foreign beasts, 420; sheep, 1,400; calves, 198, pigs, 20 Scotch beasts, 7 sheep, 120

Newcastle and [illegible] [illegible] only a limited business was transacted in to-day's market, [illegible] fairly supported [illegible]

Per 8lb. [illegible] 1d to 2s 2d [illegible] 3d to 4s 2d
[illegible] 3s 10d to 4s 2d [illegible] 3d to 4s 2d
[illegible] 3s 8d to 4s 0d [illegible] 3d to 4s 2d
[illegible] 3s 10d to 4s 2d [illegible] 3d to 4s 2d

THE LONDON GAZETTE.

FRIDAY, SEPT. 20.

This night's *Gazette* contains a notification from the Speaker of the House of Commons, that at the end of fourteen days he shall issue his warrant to the Clerk of the Crown to make out a new writ for electing a member for the county of Hereford, in the room of Joseph Bailey, jun. Esq. deceased.

COMMISSIONS SIGNED BY LORDS-LIEUTENANT

NORTH-MIDDLESEX.—Lieutenant-Colonel Commandant and Newcastle Regiment of Yeomanry Cavalry: Cornet H W Fenwick to be Lieutenant, vice Atkinson; M C Woods to be Cornet, vice Fenwick.

THE LATE FIRE NEAR THE CORN-EXCHANGE.

THE LOSSES

The subjoined returns will convey an idea of the tremendous character of this fire, which we noticed last week. They are the actual amount of insurances on the buildings and warehouses consumed, and also on the contents, which had been warehoused by numerous merchants in the City.

The three warehouses belonging to Mr. Joseph Barber, in Seething-lane, burned down, are insured by Mr. Barber for £8,000 in the Phœnix—a sum inadequate to rebuild the premises. They cost [illegible] Insurance Company £20,000 to erect, and for solidity there were no buildings in the metropolis of the character. Mr. Barber was further insured to the extent of £2000 in the Alliance office on goods stored by him in the front warehouse, which he occupied, and there appear to be other insurances of parties to whom property belonged, amounting in the whole to £8000. The whole of these sums are considered by the office a total loss, making in all £36,000.

The back warehouses of Mr. Barber, which were rented by Messrs. Smith and Co., warehouse-keepers, and contained an immense store of merchandize. It was divided among the undermentioned merchants, who were insured to the extent severally detailed

Messrs. Gold and Rigg, merchants, Mark-lane; insured in the Phœnix and Alliance offices, £7,000

Messrs. [illegible] and Co., [illegible] Bucklersbury, in the Alliance office, £7000

Messrs. [illegible] and Co., [illegible] Mincing-lane, in the Alliance, £3000; Imperial, £3500; [illegible] £2,000 [illegible] £7000

Messrs. [illegible] and Co., [illegible] Mincing-lane, £3000

Mr. Samuel Samuel, Old Broad-street, in the Alliance office, for £3000

Messrs. F F Lloyd, of Aldermanbury-lane, insured in the Alliance, £13,000; and Guardian-office £3000.

Messrs. [illegible] and Co., Crosby-square, in the Phœnix-office, £7,000

Messrs. Cox, Bagsh. and [illegible] Lombard-street, in the Union, £8000; and Guardian, £1000.

Messrs. Jones, Marsh-lane, in the Phœnix, £3000

Messrs. Richard and Co., Mincing-lane, £3000, and London, £2000.

Messrs. Adler and Co., in the Phœnix £1000

Messrs. Dickinson and Co., of Mincing-lane, same office, £2000

Messrs. Spencer and Co., of Fenchurch-street, same office, £2000.

Messrs. Plumpton, Gracechurch-street, same office £1000

Mr. A Bell, Devis, of Hackthorpe, in the Sun, £2000

Mr. [illegible] Lawrence Pountney-hill, in the Sun, £1000.

Messrs. [illegible] Lime-street, in the Sun, £2000, and General, £9000

Messrs. Scott and Bell, of Alderman's-walk, in the Church of England, £3000.

Messrs. Ellers, Crutchedfriars, in same office, £2500

Messrs. Fullips and Co., Bury-square, in the Sun, £3000

In Mark-lane—Messrs. Hayter and Howell; army packers (whose warehouses were destroyed), are insured in the Sun to the extent of £25,000.

Messrs. Scott and Co., army clothiers, of Northumberland-street, Strand, on goods deposited in Messrs. Hayter's premises in Mark-lane, £1500

Messrs. Allmutts and Co., wine-merchants, of Mark-lane, premises burned down. Insured Royal Alfred, £5000 Phœnix, £5000 [illegible] The wine-cellars of this firm are pel [illegible] numerous lessees and solicitors, who demanded portions of these premises. are reported to have had various documents and papers not yet ascertained.

Very little salvage is expected to be cleared from the ruins of Messrs. Barber's warehouses. They had been given up to Mr. Tophs. son, the agent of the several offices interested, who, with another gentleman, has taken the most prompt and active measures. The progress of the flames appeared to have burned both the immense mass of rubbish; but as yet their efforts have failed, on account of the body of fire that up to Thursday last raged in various parts. Several persons who were employed to have escaped the ravages of the conflagration, to their cost find that much of their property which they left behind them is partially destroyed by the hailing water running into their cellars. Such was the intensity of the heat on Wednesday afternoon in Messrs. Cunliffe and Dobson's wine-cellars, in Seething-lane, that the thermometer rose to the height of 74 degrees. Independently of the immense stock of wines in wood, there were no fewer than 6798 bottles in racks, and, from the strong heat, it was feared that the whole would be spoiled by uprising from the cellars; however on the examination of the general report, as the fire had not then done any damage to it. During the same afternoon, whilst the firemen were actively engaged looking after an iron safe belonging to Boyman Boyman, Esq., which had been deposited in the cellars containing valuable military trophies, which, although the case containing them was completely fused, and many of the articles were run into each other, were found to consist of the trophies being bellows and officers who fell during the memorable battle under Lord Hough at Chillianwallah. The property had been taken from the persons of the officers just before their deaths, and was requested to be sent to their relations in England. They consisted of gold rings, watches, the epaulettes of the late Brigadier Pennycuick, gold lace, gold scarfs, pistols, hunting-knives, needlework, gold and silver pieces, gold ear-drops and lockets. Messrs Hayton and Howell, army packers, had charge of this valuable collection of trophies, &c. The iron safe which contained such an extensive collection of little deeds was got out of Messrs. Hayter and Howell's ruins during the evening. After cooling the iron, which was perfectly red with heat, it was found that the deed-box contained documents shrivelled up, and at the present time illegible; but it is expected that they may be rendered, under able hands, readable.

LEWES GREAT SHEEP FAIR.

This fair took place on Saturday last, and was held on a wheat stubble belonging to the Landport Farm, lying at the back of the New Goal. We have [illegible] from a diminished supply of sheep, and a somewhat numerous show of cattle, but not [illegible] other days in the week. The general [illegible] was very [illegible] the [illegible] Fewness did not exceed [illegible] sales were well supplied with [illegible] calves, which met a slow trade, at unaltered currencies Prime small porkers produced full previous rates. NEW MUSIC.

NEW SONGS.—"THE RICH MAN'S DOOR," "THE DAISIES OF WELL," "THE STRANGER'S GRAVE." Price 2s. each; post postage free.

These songs are by the author of "Wh. you love me then as now," &c. they form a series of charming compositions, and are exceedingly graceful and effective. "The Rich Man's Bride" will be an immense favourite; both words and music are of a very superior description. London: DUFF and HODGSON, 65, Oxford-street.

NEW POLKA.—The VERY LAST POLKA, composed by P. BERNARD, price 2s. 6d. (sent post free). This original and characteristic polka, performed by J. Weippert's band at her Majesty's last State Ball, June 28, at Buckingham Palace, was one of the most effective and attractive compositions of the night. It is supposed to be the last dance at the ball, and is descriptive of the clock striking [illegible] each being a safety upon another's [illegible] heart merry, &c. The polka part may be accordingly [illegible] dance to.—London: DUFF and HODGSON, 65, Oxford-street.

"I WOULDN'T, WOULD YOU?" New Song of Humour, the Music composed by ALEXANDER LEE, Esq., published in No. 31 of the FAMILY FRIEND, for October 1st. Extract:—

When a lady is seen at a party or ball,
Her eyes vainly turned in her fits of conceit,
As she goes to the [illegible] room, dancing all
Are enchanted by her charms, and would kneel at her feet—
With such company [illegible]
I wouldn't give much for her chances, would you?"

The verse are spirited, each being a safety upon another's [illegible] ding of either sex. It will supply a lively song, entirely new, for the coming winter evenings.

LEWES GREAT SHEEP FAIR.

LEWES GREAT SHEEP FAIR.

(*Continued from page 266.*)

ewes, bred by the late Mr. H. Penfold, of Annington, also fetched 38s. Mr. Boys, of Eastbourne, realised a somewhat similar price for an excellent pen of 100. 200 strong and very useful ewes, belonging to Mr Gorringe (Kingston), fetched 32s. Mr. Waters (Eastbourne) sold his ewes at 31s. Mr. H. P. Hart, at 26s 4d. Of the last named, 100 were afterwards re-sold at an advance of several shillings per head; while a lot of culls picked out of the same gentleman's flock fetched 25s. Although we have been able to give the above quotations, there were a good many ewes of moderate condition and character which fetched considerably lower rates, while various lots of very fair useful sheep were picked up at prices ranging from 22s. to 25s. and 26s.

For lambs the demand was very brisk, and, though there was a good supply, prices did not give way. Mr. James Ellman, of Beddingham, realised 23s. a head for his Mr J. Coop[illegible] Mr H. P. Hart getting 21s. for their ewe lambs; Mr. Waters (Eastbourne) obtained 21s. 6d., and Mr Catt (Bishopstone) 22s. At 19s. and 20s. many lots changed hands, the former being obtained in some instances for "second" lambs. For cull ewe lambs, however, there was not much inquiry; 15s. was about the current price, and many of these were driven away unsold.

In rams for sale and letting there appeared to be much more business than last year. The sales made by Messrs. Hampton (above named) are proof of this. Mr. Thos. Ellman had also some rams which deservedly attracted a good deal of notice, and of which he both sold and let several.

As is usual on these occasions, the report as to the general tone of the fair varied much in proportion as the estimate came from the lips of buyer or seller. As a tolerably safe criterion, we have compared the prices of Saturday with those obtained at the last September Lewes Fair. On referring to our report for that date, we find it stated 34s. was the top price for ewes. This was made by Messrs. Hampton, Lord Hastings being the buyer. £10 10s. was the top price made by the same parties for rams. By the figures above it will be seen that the same breeders made 35s. for the ewes, while one of their rams made £15 15s. Our last year's report states:—"The price of ewes varied from a guinea to 34s.; lambs from 13s. to 20s. and 22s. The Hon. J. Ashley purchased 200 lambs at 19s. 6d. Mr. Waters, of Motcombe, obtained 29s. for some excellent ewes. Mr. Verrall, of Swanborough, 37s. for six score ditto; H. P. Hart, 25s.; T. Cooper, 25s. Rams were in general a very dull sale, and at an unsatisfactory price." It will thus be seen, that, whether we take ewes, lambs, or rams, the prices of Saturday fully equalled, and in fact exceeded those of last year. And this result, be it remembered, has taken place in the teeth of a notoriously short supply of keep. Many distant buyers were kept away by this circumstance. Several of the usual Norfolk buyers were absent from this cause, the crop of turnips in that county being greatly injured by drought and other adverse influences. In Kent and in East Sussex the same thing had a similar operation; indeed, we heard of one farmer who was glad to sell his sheep with hop-bines, so badly was he off for keep. Under these circumstances, coupled with the fact of a drooping market for fat sheep, we think there is good reason to be satisfied with the general results of Saturday's sales.

The entire number of sheep penned was, we understand, about 23,0[illegible] within a couple of thousand of last year's number.

THE ILLUSTRATED LONDON NEWS.

No. 449.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, OCTOBER 5, 1850. [SIXPENCE.

THE GOVERNMENT AND THE PUBLIC HEALTH.

PROMISES and performances are not very apt to square themselves in this world. The first are generally large and splendid—the second are as generally small and mean. The one is all a rich romance—the other nothing but a poor reality. There are, however, certain classes of promises of which people expect the full realisation. When a man accepts a bill, the drawer expects twenty shillings in the pound for the sum it represents—to be punctually paid on its arrival at maturity; and, when a gentleman pledges his honour that he will perform a certain act, it is not considered credulous to believe him. In the same manner, when a Government, at the opening of a Session of Parliament, draws up a Speech for the Sovereign to deliver, and holds out in that speech an expectation that any particular question or class of questions will receive its support, the country is justified in believing that what is said is meant, and that such a Government, if it do not create, will, at all events, not neglect any opportunities of the kind which it has indicated. In the Speech from the Throne, at the opening of the last Session of Parliament, we find the following passage:—"Her Majesty has learnt with satisfaction that the measures which have been already passed for the promotion of the public health are in a course of gradual adoption; and her Majesty trusts that, both in the metropolis and in various parts of the United Kingdom, you will be enabled to make further progress in the removal of evils which affect the health and well-being of her subjects." The country, after such a declaration, had certainly a right to expect that sanatory questions would not be the least prominent of those that were to be introduced for parliamentary discussion, and that the health of the people would receive from the Government the attention which a subject of such high social importance demanded. To a certain small extent the expectation was realised. The Ministry supported a bill for the abolition of intramural interments—that great source of disease among the poorer population of towns; and, now and then, a member of the Government made a speech, in which sanatory reform was spoken of as one of the most urgent public necessities of the time. Beyond this, the nation has looked in vain for the fulfilment of the promise conveyed in the Royal Speech, and has to complain of the Government for a neglect of opportunities, and for a short-sightedness in dealing with the question at a time when circumstances placed it in their power to confer a real boon upon all classes of the people. We do not mean to allege that the Government was in reality indifferent to the subject; on the contrary, we believe that Lord John Russell, the Earl of Carlisle, the Marquis of Lansdowne, and other of its more prominent members, are really anxious that the great question should receive every possible aid and support. The real mischief is, that their good intentions are frustrated by the Chancellor of the Exchequer; and that the blundering which has signalised every financial measure which that functionary has undertaken, should have made the Government what such men never intended it to be—an impediment in the way of the health, the comfort, and the morals of the people.

When, early in March last, the Chancellor of the Exchequer found himself in possession of a surplus of £1,500,000, it was naturally expected that some taxes would be reduced, or taken off, which restricted trade, or injured the public health. Sir Charles Wood endeavoured, in the unusual circumstance of an overflowing public purse, to make himself popular in both ways; but, with a singular fatality of blundering, he missed both opportunities. His Stamp Duties Consolidation Bill, or bills—for their name was legion—were but a succession of mistakes, which created perplexity at first, and afterwards derision, rapidly succeeded by disgust. His removal of the Excise Duty on Bricks was rather more fortunate; but if it were intended, as he stated, to aid in giving the people cheaper houses, it only very partially and prospectively effected its object. Whatever the amount of the boon may be, it is confined to new buildings and to the rural districts, and has not influenced—and cannot be expected to do so to any appreciable extent—the comfort and health, or spared the pockets, of the industrious dwellers in towns. It was here that the Government missed its greatest opportunity. It sought to gain favour among the discontented agriculturists, and conferred a small boon upon them, when

PHEASANT-SHOOTING.—DRAWN BY DUNCAN.—(SEE NEXT PAGE.)

by a more comprehensive policy, and a juster appreciation of its duty and of the extent of the public wants, it might have conferred a larger benefit upon the whole people. The abolition at that time of the Window-tax would have been hailed with gratitude by every one who was thankful for the remission of the Excise duty on bricks, and by an infinitely larger class, or rather by that combination of all classes who form the industrious wealth-producing population of Great Britain.

Too many well-meaning people, and possibly the Chancellor of the Exchequer among the number, are apt to imagine that the Window-tax, however erroneous in principle it may be, and however desirable it would be to abolish it if the Government could afford the money, is not, in reality, a tax upon the poor, inasmuch as houses containing less than eight windows are not liable to it. The following statement, in connection with the great sanatory question, the improvement of the dwellings of the labouring classes, will show how erroneous is this opinion, and how this tax renders it next to impossible to provide proper dwellings for the industrious inhabitants of towns. In the rural districts, where land for building purposes is not exorbitantly dear, a capitalist, whether he be an owner of landed property anxious to promote the comfort of his tenantry, or a speculator desirous to invest his capital for the public benefit and his own, may erect cottages for the labouring population unimpeded by the Window-tax. But in towns this is impossible. The Window-tax prevents improvement. The labourer must reside near the scene of his labour, and prefers a hovel within half a mile of his work, to a comfortable house five miles beyond it. Consequently, the town labourer must reside upon land that is of enormous value; and the speculator or philanthropist who wishes to build dwellings for men of this class, cannot adopt the cottage fashion of the rural districts, and spread a group of small and comfortable houses over the surface of the ground. He must either build them in blocks or flats, one above the other, and include a multiplicity of separate tenements under one common roof, entered by one common entrance, or renounce the idea of building houses worthy of habitation by even the humblest classes of a civilised people. The following statement, which we borrow from a letter in the *Morning Chronicle*, upon the present condition of the rising town of Birkenhead, shows in what manner the tax operates against the comfort of the poor, and to what an extent it prevents sanatory improvement:

> Morpeth buildings—so named in honour of the present Earl of Carlisle—is a lofty row of houses, containing 54 separate dwellings. They are entered by eight stone staircases, each staircase being common to eight dwellings. The stairs are lighted with gas. Each dwelling contains a sitting-room and two small bed-rooms. From the sitting-room or kitchen leads a scullery and a water-closet. Each house is abundantly supplied with water. From the scullery the dirty water is removed by the sink or the water-closet, and the mistress of the family is saved the labour of removing the dirt and ashes down stairs, by the simple contrivance of a shaft, communicating from the scullery into a general receptacle, of which the periodical cleansing and emptying is provided for in the rent. The rooms are small, but the inestimable advantage of privacy and separate sleeping-rooms, besides those of an abundant supply of water for a culinary and domestic purposes, without the labour of procuring it from a pump, are so highly appreciated by the wives and families of the labourers, that Morpeth-buildings are always fully occupied. No sooner is a dwelling vacant, than an application is made for it.

As this block of buildings was erected by Mr. William Laird, of Birkenhead, with the double object of improving the dwellings of the labouring poor and of investing his money at a fair return, it becomes interesting to know in what manner his admirable success in the first object was rewarded in the second. The following, derived from the same authority, shows both the cost and the return :—

COST OF ERECTING MORPETH-BUILDINGS, BIRKENHEAD.

The ground—10713 yards of land, at 30s.					£1607	0 0
The builders' contract					5965	0 0
Extras—including the fitting of shelves, cupboards, &c.					192	0 0
Architects' commission					178	19 0
Total					7942	19 0

RENTAL OF MORPETH-BUILDINGS

Gross rental or rents, ranging between 3s. 6d. and 4s. 6d. per week, or averaging 29 lbs. per annum					£524	0 0
Deductions, paid by the landlord:						
The window-tax..				£127	0	0
Township-rates				96	0	0
Water-rates				19	4	0
Insurance				15	15	0—257 19 0
Net rental					£366	1 0

The net rental –without any allowance for the occasional non-occupation of any portion of these houses, for bad debts, or for wear and tear—was but four-and-a-half per cent.; whereas, the return on the property invested in houses for the poor, built in close and pestilential lanes and courts and alleys, without water supply, or any provision even for public decency, averages ten per cent., in London, Liverpool, Manchester, and other large towns. These miserable hovels, built back to back, and containing less than eight windows, escape the operation of the Window-tax ; but the superior dwellings erected by Mr. Laird, being built in a pile, and being considered by the Government as one house, pay £127 for the light of heaven—a sum which makes all the difference to the proprietor between a remunerative and an unremunerative speculation. A still more glaring instance of the mischievous operation of this odious impost is afforded by another and larger pile of similar buildings, in the vicinity of the same town, called the Dock Cottages :—

> They are planned to accommodate 350 families (says the letter from which we have already quoted), with separate dwellings, such as are afforded in Morpeth-buildings, with the same number of rooms in each, the same accommodation of scullery, water-closet, and dust-shaft, and the same ample supply of water. They are fire-proof, and strongly built, and cost, for land and building, no less than £50,000. The window-duty upon the Dock Cottages is £1,400 per annum. These houses are wholly unoccupied, and will continue to be so unless the owners can let the whole of them at once. If one single house be let for three or four shillings a week, the whole pile becomes liable for the whole window-duty of £600 per annum!

We agree with the writer that such a state of the law requires immediate revision. It is a positive disgrace to a Government that really has at heart the social elevation of the labouring classes, to permit every effort to improve the condition of their homes to be rendered nugatory by the grinding operation of this unhappy impost. Were it thrice as productive as it is, a truly wise and far-seeing Government would boldly forego it, and look to other sources of revenue to make up the deficiency. To talk of the removal of the Excise Duty on Bricks as one that ought to have had precedence of the removal of the Window Duty, is, in face of such a statement as the above, a palpable absurdity. The country is not ungrateful for the remission of the minor evil ; but, considering the knowledge of sanatory questions possessed by the most able and enlightened members of the Government, and the promise held out in the Royal speech, we think that, as a body, the Government is greatly to blame in having allowed their financial colleague to waste his surplus in the manner described, and to neglect the inestimable opportunity which was afforded him of relieving all classes of a great oppression, and of materially aiding the social comfort of the most helpless, but the most interesting and most numerous section of the population. It would have been a worthy achievement, if, amid all the wondrous specimens of British industry which will find a place in the Great Exhibition of 1851, we could have pointed out to the admiring gaze of the countless multitude of foreigners who will throng our streets, one specimen of our industry as noble and remunerative as that of Paris—a palace for the working classes, free from the pressure of taxation upon the fresh air, the light, the health, and the comfort of its inmates.

PHEASANT SHOOTING, NEAR TUNBRIDGE.

See ! from the brake the whirring pheasant springs,
And mounts exulting on triumphant wings.
Short is his joy, he feels the fiery wound,
Flutters in blood, and, panting, beats the ground.
Ah ! what avail his glossy, varying dyes,
His purple crest, and scarlet-circled eyes—
The vivid green his shining plumes unfold,
His painted wings, and breast that flames with gold ? – *Windsor Forest.*

How shall we treat our subject ? practically or politically ? as relates to the pastime or to the protection ? Game-preserving, if not actually an ungracious question, is one obnoxious to varieties of opinion : as a pastime, pheasant shooting is undoubtedly a class sport. Let us, then, deal with it doctrinally—that those who command its pleasant privileges may be told how best to turn them to account; and that those who live in the hope of them—should the reality ever arrive—may learn how to profit by the occasion.

This eminently aristocratic passage of field practice has its orders and degrees. At the head of these is the "*battue*." In its literal meaning this is a French *terme de chasse*—implying to beat, in order to spring or start game. In its English application it means a wholesale slaughter of such *ferce naturæ* as happen to be in season when it is enacted, and to come within range and direction of the *fusilade* then and there carried on. The only art necessary for the *battue* is a sure aim : cover your quarry, and let eye and finger act together. Next is the right in, or the *entrée* of, the well-stocked manor. Last, but not least in the seat most grateful to the sportsman, is the syvan search of autumnal wood and glade, rewarded with its two or three brace, while yet the day is young.

Pheasant shooting commences, according to law, on the 1st of October ; but may, with very good results, be postponed for a while. Seasons are rarely so forward as to furnish mature poults so early ; and over shooting is both more pleasant and more profitable when trees are at least in part stripped of their leaves. It is a most mistaken idea, the popular notion that the pheasant is an easy bird to shoot. It is slow on the wing, certainly, and, when sprung in the "open," not very difficult to hit. But it never, where chiefly it is to be met with, such obstacles as branches and thick foliage call for extreme quickness, amounting almost to what is called "snap shooting." There is a good deal of knack in it, also : for beginners, experience teaches the necessity of taking a pheasant higher than ordinary field game. Most people shoot too low. Partridges, having only the fences which divide the fields to clear, seldom rise above the level of the eye, and then take horizontal flight. But pheasants, having lofty trees to surmount, are continually on the rise and—a motion in which the hand must follow them, that desires to do execution. Cover the head of an ascending pheasant : this may serve for an excuse as relates to cover shooting, but it is by no means a rule that admits of no exception .....

Writing, as we do, "for the million," we address ourselves more especially to those who, having a taste for the trigger, are fain to content their relish for pheasant practice with the cover shooting of their own or friends' or neighbours' beat. To these we offer the following, as the most practical means of picking them up. Let the shooter rise with the lark—we were about to say with the sun—but Englishmen are proverbially late-abed, high-mounted observers. Indeed, it is worse than time lost to attempt woodland shooting without an *affaire-à-cœur* of this sort : it is only reducing the head of game, without being enabled to account for one out of that is put *hors de combat*. Moreover, when this sport is sought in an extensive cover, a strong team of spaniels, with abundance of tongue, will be found absolutely necessary. Pheasants, in such places, at all times need a rouse to induce them to take wing. The old hard birds will frequently suffer themselves to be coursed, and all but run into, before they rise. Bear in mind that they are partial to marshy soils—willow, alder, and such like aquatic shrubs, being their favourite harbour. In winter, the ordinary resorts of these birds are the turnip-fields in the vicinity of cover. Beating towards the "open" is the best way to secure favourable shots. The dog with which you beat on these occasions should quarter from the signal made by your hand, and drop at shot or to wing on the instant. This is no warns us not to venture beyond our limits. The best shot for pheasant shooting in the "open" is No. 7 ; for the chances of cover work, it is well to load the second barrel with a larger sort. Add to this a fair mare or *scene*—and we bid you good speed.....

> Devenere loca lætos, et amœna virets
> Fortunatorum nemorum, sedesque beatæ.

NATIONAL SPORTS.

The past week has not been remarkable for the number of meetings, but its "tone" has been decidedly superior, the "oldest inhabitant" never having witnessed a better or more interesting "First October." The appointments for the ensuing week are few : viz. a Small affair on Monday, at Hardwicke ; two good days at Chester (Tuesday and Wednesday), some improved racing at Upton-on-bevern, on Tuesday : and the Royal Caledonian (the Newmarket of Scotland), on Wednesday and two following days, at Perth In the same week, the coursing community will "buckle on their harness," at the gathering of the Northumberland and Durham fraternity, on Tuesday and Wednesday.

NEWMARKET FIRST OCTOBER MEETING. TUESDAY.

HANDICAP SWEEPSTAKES of 20 sovs each.—Duke of Bedford's Newport (F. Butler), 1. Mr. Mare's The White Lady (Flatman), 2

SWEEPSTAKES of 10 sovs each. Sir J. Hawley's Hazey (W. Harlock), 1. Mr J. Edwards's Hind of the Forest (Footman), 2

THE GRAND DUKE MICHAEL STAKES of 50 sovs each.—Colonel Peel's Hardinge (Footman), 1. Mr. Combe's Tomboy (S. Rogers), 2.

FIRST year of the TRIENNIAL TWO-YEAR-OLD STAKES of 10 sovs each.—Lord Enfield's Hernandez (F. Butler), 1. Sir J. Hawley's Merry Peel (J. Marson), 2.

MATCH: 200.—Duke of Bedford's Bordeaux (F. Butler), 1. Sir J. Hawley's Hippia (G. E. Sharp), 2.

THE ROKEFOLL STAKES of 40 sovs each.—Sir J. Hawley's f by Bay Middleton, out of Venus (J. Marson), 1. Duke of Richmond's Buckhound (Flatman), 2.

WEDNESDAY.

FIFTY POUNDS.—Mr. Greville's Caribou (Flatman), 1. Bullfinch (Pettit), 2

SWEEPSTAKES of 100 sovs each.—Mr. Greville's Constance (Flatman), 1 Duke of Bedford's Argo (Pettit), 2.

SWEEPSTAKES of 10 sovs each.—Mr. Gratwick's Exeter (Flatman), 1. Lord Exeter's Reindeer (Marlow), 2.

Second year of the SECOND TRIENNIAL PRODUCE STAKES of 10 sovs each. Lord Exeter's Reindeer (Marlow), 1. Duke of Richmond's Compass (S. Mann), 2.

ST. LEGER STAKES of 25 sovs each. Lord Exeter's Nutshell (Flatman), 1. Mr. Ford's Gerforth (Bartholomew), 2.

GRAND STAKES, of 20 sovs each.—Mr. Howard's Prestige (A. Day), 1. Lord Exeter's Reindeer (Marlow), 2.

THURSDAY.

THE TOWN PLATE. Dromedary colt, 1. Caribou, 2.

QUEEN'S PLATE.—St. Rosalia, 1. Little Jack, 2.

THE TRIENNIAL STAKES.—Landgrave, 1. Elthiron, 2.

RUTLAND STAKES.—Buckhound, 1. Merry Peel, 2.

ROYAL LONDON YACHT CLUB.

On Monday last the sailing-match of the season, under the auspices of this club (which is an off-shoot of the Thames Yacht Club), took place on the river, between Erith and Thames Haven. At half-past eight o'clock in the morning, the officers and many leading members of the club, with a numerous party of their friends, left Lovedays Crimping Office, Erith, in the Diamond Company's steamer, the *Gem*, which had been specially engaged for the use of the committee on the occasion

The competing yachts rode at anchor a few hundred yards above Erith landing pier, and it was arranged that they should start thence and proceed down the river about seven miles below Gravesend, where they were to round a flag buoy moored off Thames Haven, and then return to the place of starting. Six competitors, belonging to members of the club, entered, viz.:—*Alligator*, 20 tons (Hr. Henry J. Smith); *Whisper*, 19 tons (Mr. Thomas Eveleigh), *Frolic*, 12 tons (Mr. Alfred Cox); *Traveller*, 10 tons (Mr. G. H. Jackson); *Phantom*, 21 tons (Mr. Samuel Lane); and *Moor Park* (Mr. G. B. Brown)

The prize was an elegant silver challenge cup and cover, valne 35 guineas, presented by Rear-Commodore George E. Browne, Esq., with a subscription purse of 20 guineas added, the cup to become the property of the owner of any yacht winning it any two seasons ; and the purse to be awarded to the winner of the present match. It was a time match one minute per ton being allowed by all yachts exceeding ten tons to those not exceeding ten tons, and half a minute to those exceeding ten tons. The weather was beautifully fine, and a stiffish north-westerly breeze prevailing, the circumstances were most propitious for an interesting contest.

At 11 O'clock, the signal-gun having been fired, the scene of excitement immediately commenced. At first, the tiny *Traveller* took the lead, but in a very few minutes dropped astern, together with the *Moor Park* and the *Alligator* ; and it was not long before it was evident that the great struggle of the day would be between the *Whisper* and the *Phantom*, who soon put ahead of the rest of their competitors, and left them every minute further behind.

The *Frolic*, although entered, did not take any part in the match, owing to her having sprung her mast the day before. When off Gravesend the *Whisper* was considerably ahead of her rival the *Phantom*, and still continued to gain upon her until they were both off Thames Haven. Both yachts rounded the buoy in admirable style, the *Whisper* having gained a minute and nineteen seconds in the run between Gravesend and Thames Haven alone. For some time the *Whisper* maintained her advantage, but ere long the *Phantom* was seen to reduce the distance between herself and her antagonist, and soon it became evident that, although the *Whisper* might be the fastest yacht under a favourable wind, yet the merits of the *Phantom* were superior sailing to windward. The excitement of the contest was acquiring its highest pitch, when, unfortunately, the *Whisper* went aground on the Essex side, nearly opposite Greenhithe-pier. At the moment when the accident occurred the *Phantom* appeared to be getting to windward of her opponent, and it was a subject of dubious speculation whether or not, if no such accident had taken place, the *Phantom* could have gained so much upon her competitor in the remaining distance as would have enabled her to allow the minute to which the difference of tonnage entitled the *Whisper*, and after all to have beaten her. This question, however, can only be decided by renewing the contest, and this is talked of for a future year.

The result of the present match, however, was, that the *Phantom* was the winner, coming in at a quarter to four o'clock, the *Whisper* second, the *Moor Park* third, and the *Traveller* last ; the two latter arrived about fifty minutes behind.

The award having been duly made on board the *Gem*, the party returned to town highly gratified with the arrangements of the committee and the enjoyments of the day.

TATTERSALL'S.

MONDAY.—Notwithstanding the numerous departures for Newmarket, there were some animated betting transactions on this morning on the events of the current season ; the quotations varying in several instances from those last returned.

HURDLE RACE EXTRAORDINARY.—A match for £50 a side, between a mare named Miss Fanny, and Thomas, the Salopian runner, over a distance of two miles and fifty hurdles three feet six inches high, took place at Exeter on Monday. The spot chosen was a level field, of between four and five acres, immediately behind the Debtors' Ward, St. Thomas, and several hundreds assembled to witness the feat. The large quantity of rain which had fallen the previous day, and the heavy shower that was falling on the day itself, had rendered the ground damp and more than ordinarily unfavourable to the man, notwithstanding which he found many backers. Round the field, at equal distances of 70 feet, eighty-five hurdles were placed, and to complete the course and the number of jumps required six circuits and two hurdles more. At twenty minutes to four the start was made, and during the first round the horse took the lead, waiting for his opponent very leisurely. At the third jump the man caught his foot, but did not fall. During the second round the man was evidently permitted to go ahead. During the third, fourth, fifth, and sixth rounds the horse led, nearly walking, and except when the man fell, kept clear of the sixth round the horse knocked down a hurdle, and had to return and go over clear, but it was pretty evident that the man's chance was very small indeed, and the mare came in a winner by nearly two minutes. It is right to mention that the mare frequently knocked her feet in going over, but she was ridden with great judgment by her owner, Mr. W. Wilkins, of Mendip, Somersetshire, at a pace very little above a walk at any time. The whole distance was accomplished in sixteen minutes and a half. The mare took his leaps in a style pronounced beautiful by the sporting men present, and was occasionally refreshed with a draught of water. He is a young man, under thirty years of age, of spare habit, and, as may be supposed, very agile. The mare is very well, but not thoroughbred.

NAVAL AND MILITARY INTELLIGENCE.

THE NEW COMMANDER-IN-CHIEF FOR INDIA.—Sir William Gomm, accompanied by Lady Gomm, and Captain Yates, his aide-de-camp, left town on Saturday for India. He slept at Canterbury on Saturday, and crossed over to Calais on Sunday. He will remain on the Continent until the departure of the packet from Trieste, and will proceed to Suez in the *Haddington*, about the 8th of November.

ARTILLERY COMMAND AT DEVONPORT.—Lieut.-Col. Bloomfield is about to leave the command of Devonport, and proceed to the Ionian Islands, and will be succeeded by Lieut.-Col. Anderson at the former station.

NEW MILITARY KNIGHT OF WINDSOR.—Captain A. Ellison, late of the 60th Regiment, who entered the service in 1807, and retired upon half-pay in 1832, has been appointed a Military Knight of Windsor, in succession to Lieut. Nagle, deceased.

VACANT BARRACK-MASTERSHIP AT GIBRALTAR.—In consequence of the death, on the 5th ult., of Lieutenant-Colonel E. Lascelles, the Barrack-Master of the North District, this appointment is vacant.

AMOUNT AND COST OF THE ROYAL NAVAL STEAM POWER OF ENGLAND.—The total number of steam-vessels of all classes and sizes, propelled by paddle-wheels and screws, belonging to the Royal Navy of England, is 164, and the total amount of horse-power of this formidable fleet of steamers is above 44,500, of which nearly 40,500 is actually fitted, or being fitted, to the vessels. The total cost of the machinery alone may fairly be estimated at nearly three millions and a half sterling.

MILITARY AND EXPENDITURE IN THE COLONIES.—Orders have been issued from the Board of Ordnance, to the effect that in future the expense necessarily incurred for the repair of military buildings is to be defrayed out of the funds of each colonial treasury, instead, as hitherto, out of the Commissariat chest.

THE NEW CORPS FOR AFRICA.—The delay which has taken place with respect to the formation of the regiment for service in Africa has occurred at the Colonial Office. The selection of officers will be made from the half-pay and retired list, and as the effective strength of the corps will only consist of 300 men, it is suggested that the command should be given to a major

THE PENSIONED PENSIONERS.—A return has been issued from the War Office to the staff officers of pensioners, directing them to call out the men under their command for four days' exercise in the course of the ensuing month, except in the case of those who have already been out, these being required only for six days as will serve for the full year of service, which number is on no account to be exceeded during the present year

CHOLERA AT CORFU.—In consequence of the authorities at the Horse Guards having received information that the cholera is making rapid strides at the military stations in the Mediterranean, a surgeon, and two assistants, from the staff at Chatham, are under orders for immediate embarkation for Corfu, at which place the troops have been attacked with the disease.

PROPOSED SUBMARINE TELEGRAPH BETWEEN ENGLAND AND IRELAND.—Negotiations are being entered into with the Lords of the Admiralty and Government authorities, for the establishment across St. George's Channel of a submarine electric telegraph, which will be much more extensive in scale, to that now being undertaken between England and France, the promoters of which have, it is understood, after considerable interviews and treaty, come to terms on the subject with the French Government, for the exclusive concession of the proposed electric line from the French coast to Calais. Preliminary surveys have been made for this proposed oceanic communication across the Irish Channel; and the coasts on either side, combined with the submarine site, ascertained by soundings, for the sinking of the wires, are found, owing to the foundation being comparatively free from rocks and shoals, as compared with the Straits of Dover, and with feeble tides, to present of the most favourable. Notices of the intention of the promoters to apply to Parliament next session for an authorisation to lay down the line, will be given. The precise points at which the telegraph stations on the English and Irish coasts will be established will depend on the result of the Government commission now pursuing its inquiry into the best place for the establishment on the west of Ireland of a great transatlantic packet station. At present two telegraphic routes are proposed : the one of sixty-four miles across the Channel, from Holyhead to Kingston and Dublin, thence by Great Southern and Western Railway on to Cork and Galway, the other from St. David's Head on the Welch coast, and on to Wexford. Wexford, and the extreme western points of Ireland to Berehaven and Crookhaven, the latter being the last points touched at by vessels outward-bound for the Atlantic.

A PORCINE MONSTER.—The Essex local papers describe a monster lately farrowed at Mile-end. This *lusus naturæ* exhibits two perfect bodies from the tails to the forelegs, and would thus far resemble "twins," were it not that at this point it terminates from the shoulders in one head and cars. [illegible] is at present in the possession of a man named Hyam, residing at Bow, who purchased it for a sovereign, and we understand it is his intention to make it form part and parcel of the "wonderful exhibitions" that adorn our country, and amuse the curious and wonder-seeking crowd.

FOREIGN AND COLONIAL NEWS.

FRANCE.

From Paris there is scarcely any intelligence of interest this week, save the notable fact that the Government of the Republic, secure under the shield of its motto, "Liberty, Equality, Fraternity," strikes a more deadly blow at the freedom of the press than was ever attempted in the most paltry days of absolutist Legitimacy. Legal proceedings against the press under the new law are most rigidly enforced. The last journal which has fallen under the displeasure of the Government is *L'Opinion Publique*, for transferring to its columns an article from the *Corsaire*, reflecting upon Louis Napoleon. On Tuesday, the *Assemblée Nationale* published an article, to which the name of M. A. Lucchetti was affixed, stating that M. Persigny had gone to England to raise a loan for the President. The journal was immediately seized by order of the Attorney-General, and a prosecution is to be commenced both against the director of the journal and the author of the article complained of.

M. de Larochejaquelin has published another letter, in which he expresses the hope that no division of the Legitimists will take place; but at the same time he will not retract any of his former opinions.

The President of the Republic and General Changarnier are said not to be upon the best of terms, the former giving orders to the army through his side-de-camp without the acquiescence of the latter

The Nepaulese Ambassador and suite left Paris on Tuesday for Marseilles, on their return home.

Count Molé has written a letter to the *Bulletin de Paris* denying his intention of withdrawing from public life; on the contrary, he says, that as long as God gives him health and strength, which he is enjoying at present, he shall devote all his energies for the best interests of France.

ITALIAN STATES.

The quarrel between "the Church and State" in Piedmont has begun to assume a serious character. From Turin we learn that the two great champions of the independence of the Church and the maintenance of ecclesiastical privileges, the Archbishops of Cagliari and Turin, had been sentenced by the law courts to banishment from the Sardinian territories, and had, in consequence, on the night of the 28th ult., embarked for Civita Vecchia. Both prelates denied the competency of the tribunals to try them upon the charges of which they had been found guilty.

Under the despotic Government of Tuscany, the press is persecuted almost as oppressively as it is under the constitutional rule of the French Republic at Paris. The *Mazzonata* of Florence, of the 23d ult., was seized on that day, in virtue of the new decree on the press, for an article against it. So strict were the orders given to the police agents, that, in order to prevent the reproduction of the article under any shape, the printing machine was sealed for 24 hours, and the railway train retarded an hour, in order to prevent the circulation of the proscribed number.

SCHLESWIG-HOLSTEIN.

From the seat of war we learn, that, on the 29th ult., the Schlesvig-Holstein troops made a movement along the lines, and advanced against the Danes, when a battle took place, in the course of which the city of Friedrichstadt was bombarded; and though it had not surrendered, it was completely surrounded, and was hourly expected to yield. Two of the trenches had been carried by the bayonet, and fourteen pieces of artillery had also been captured from the Danes. The latter names also carried the possession of the city of Tonningen, after an engagement of two hours. Several Danes were taken prisoners.

UNITED STATES.

Advices from New York to the 17th ult., and, in addition, by telegraph, *viâ* Halifax, to the 20th ult., reached town in the early part of the week.

Washington intelligence mentions the existence, in some quarters not named, of further piratical intentions on Cuba, and that the American Government stands prepared with preventive means.

The House of Representatives have passed a bill appropriating three million and a quarter dollars prospectively, to meet instalments under the American indemnity treaty. Payment will be made by arrangements with Baring's house.

The bill for abolishing the slave-trade in Columbia had been ordered for a third reading by a majority of 32.

The bill for the delivery of fugitive slaves had passed the House by a vote of 109 to 76.

A vote had been taken in the House condemning the present *ad valorem* anti-protective tariff by a majority of 2.

The public enthusiasm for Jenny Lind continued unabated. She had given two concerts, and, it was said, had appropriated her share of the profits of the first, half at least 10,000 dollars, to several charitable institutions in New York. The whole of her receipts in America are, it is stated on "good authority," to be devoted to the establishment of free schools in Sweden and Norway.

Edwin Forrest, the tragedian, had been arrested, on the complaint of Mrs. Forrest, and held to bail in the sum of 10,000 dollars to keep the peace towards her, she having reason to fear personal violence from his hands. An injunction had also been granted by the Supreme Court of New York, restraining Mr. Forrest from conveying away his property, to the injury of the rights therein possessed by Mrs. Forrest. She has also commenced a suit in the courts of the State for divorce.

The Earl of Elgin was at New York.

WEST INDIES

We have accounts this week from Jamaica to the 7th of September.

The intelligence thus conveyed, however, is of quite an unimportant character. Since the departure of the previous steamer the Island had been visited almost incessantly by heavy rains, St. Dorothy's parish forming perhaps the only exception. There were some cases of sickness, but they were not reported to be of a very serious character. The roads have been much destroyed by the heavy weather, and the corporation of Kingston have voted a hundred pounds for the repairs of the city of Kingston alone—an amount which, it is thought, will be insufficient to put them in proper repair.

The commissioners appointed by the Assembly to consolidate the laws of the island were actively engaged, and were likely to be prepared with the condensed volume by the time the Assembly met, which was expected to be in October.

The cotton movement progressed with increased energy.

A masonic lodge had been formed by the brethren at the north side of the Island, in the town of Falmouth.

The country was quiet.

The frequent arrivals of the American steamers at Jamaica excited less interest than formerly, as the alterations in the routes of the Royal Mail Company's ships placed the island in possession of English dates in less time (with one or two exceptions) than the service has been performed by the American vessels.

ARRIVAL OF ANTIQUITIES FROM NINEVEH AND BABYLON.—The brigantine *Apprentice*, Captain John Hardy, has arrived in the St. Katharine Docks, from Bussorah, on the river Euphrates, having on board a great quantity of Assyrian and other antiquities and marbles, consigned to the Trustees of the British Museum. Among them are the Great Bull from Nineveh, with a man's head and dragon's wings, weighing twelve tons, and a Lion sculptured in the same manner, weighing nine tons. There are also several coffins, containing many curious relics of the manners and usages of Eastern countries regarding the ceremonies observed in burying their dead. This vessel was chartered by the British Museum some time since for the conveyance of these antiquities to England; they were shipped in April last at Bussorah, under the superintendence of Messrs. Stephen Lynch and Co, and great care has been taken by Captain Hardy (who was employed on a similar service two years ago) to bring them home perfect and entire. The *apprentice* was off the Cape of Good Hope during the late severe gales, when so many vessels were lost or sustained severe damage, but she providentially escaped injury, and has safely arrived with her valuable and interesting freight.

MUNIFICENT CHARITY.—Forty-five thousand pounds, in money and land, have been assigned over to trustees by Miss Howard, of York-place, for the following uses:—To erect twenty-one houses on her property at Pinner, near Harrow, in the form of a crescent, the centre house for the trustees, the other twenty houses for the use of twenty widows, who are to occupy them free of rent and taxes, and also to receive £50 a year clear of all deductions. The widows of naval men to have the preference, then those of military men, and, lastly, those of clergymen; none but persons of good character to be selected, to be chosen or dismissed for misconduct by the trustees. The deed is now enrolled in Chancery, and approved of by the Lord Chancellor. Trustees named—the Earl of Fingal, K.G., and W. A. Mackinnon, Esq., M.P.

On Wednesday, at an inquest at Newington Butts, a person summoned as a juror refused to be sworn, on the ground that he did not believe in a God or in a future state, or in "anything but what he could see." Upon this the Coroner immediately ordered him out of the room.

VALUABLES BELONGING TO THE NEPAULESE PRINCE.—On Saturday, in the Westminster County Court, an action was brought by the plaintiff, Bresden, a tailor, residing at No. 6, Wimpole-street, against the defendant, Hanson, a button-manufacturer, for trespass, by unlawfully entering the plaintiff's premises, and demanding property entrusted to his charge, of the value of £500,000, by the Nepaulese Ambassador. It appeared from the plaintiff's statement, that he had been employed by the Nepaulese Ambassador to repair a cap and belt richly studded with diamonds and other precious gems, worth £300,000; and while this valuable property was in his possession, the defendant came one day while he was absent from home, accompanied by a policeman, and demanded the cap and belt in the name of the Prince. The plaintiff's daughter, who was at home, refused to give up the property, and the defendant and the policeman waited some hours till his return. The plaintiff then went to the Prince, when he was told that no instructions had been given by him for the interference of the police. The plaintiff said he had been much injured in his business by the occurrence. The defendant stated that he was acquainted with Morrant, the Ambassador's servant, who called upon him to ascertain the plaintiff's address, in order that he might get the cap and belt for his master. He (defendant) then accompanied Morrant to the plaintiff's house, but he had taken no further part in the affair. The Judge having summed up, the jury returned a verdict for the plaintiff, damages £5, with costs. Notice of motion for a new trial was given.

THE LATE EXPLOSION AT SEAFORD. The late high tide has washed away a considerable portion of the chalk which was forced into the sea by the late explosion; and it is feared that, unless something is done to prevent further inroads of the sea upon the mound, the effect which was sought to be established is likely to be lost.

ARCTIC EXPEDITION—THE FATE OF SIR JOHN FRANKLIN.

THE *North Star*, Master-Commander James Saunders, arrived at Spithead on Saturday last, from the Arctic regions, without bringing any satisfactory tidings of Captain Sir J. Franklin or his people.

The *North Star* sailed from Greenhithe about the middle of May, 1849, laden with stores and provisions for the North-West searching-ships, and the last accounts that were received from her were brought to England by Captain Lee, in a whaler, dated the 19th of July, in that year. There has, therefore, been much fear expressed for the safety of this ship, which has happily been relieved by her safe arrival.

The *North Star* reports communications from the various expeditions which have been despatched to the Arctic Sea in quest of the lost explorers.

On the 21st of August last, at the mouth of Lancaster Sound, she fell in with, and communicated with, the *Lady Franklin*, Captain Penny, and her tender, the *Sophia*, all well. Captain Penny reported that Captain Austin's ships had got through the ice in Melville Bay, on the 15th of August, and she had left them on the 17th off Cape Dudley-Digges; that some of the vessels would proceed, if the ice would permit, through Barrow's Straits, to examine and explore Banks's Land.

On the 26th of August, the *North Star* spoke the *Felix*, Captain Sir John Ross, all well.

On the 30th of August she communicated with the *Prince Albert*, Commander Forsythe, who stated that he had been trying to get into Port Nisl and other places, but was prevented by the land ice; that he had seen Capt. Austin's ships in Wellington Channel; that Capt. Austin had gone in the *Intrepid* steamer to explore some parts of the coast, and would visit Pond's Bay: that one of the small American searching vessels was on shore near Barrow's Bay, but, as the captain had declined the assistance offered by the *Prince Albert*, it was supposed she would come off without damage.

We are sorry to state that none of the vessels with which Commander Saunders had communicated had gained the smallest reliable information respecting Sir John Franklin, although this spring has been most favourable for the exploration in Baffin's Bay, from the early breaking up of the ice.

The *North Star* finally left Pond's Bay for England on the 8th of September, and has had a good passage home, coming to the westward and southward of Ireland, and up the Channel to Spithead. She has brought letters to the Admiralty on the subject of the Expedition, from Sir John Ross, of the *Felix*, August 21; from Captain Penny, of the *Lady Franklin*, August 21; from Captain Commanday of the *Assistance*, August 18; but the tenor of the reports thus conveyed is so little of a precise character, that it is difficult to elicit an intelligible narrative from their obscure statements.

It would appear from them that on the 12th of August last, Captain Commanney, in the *Assistance*, and Sir John Ross, in the *Felix*, when off Cape York, in Baffin's Bay, having observed three male Esquimaux on the ice close by, despatched Lieutenant Cator in the *Intrepid* steamer, tender to the *Assistance*, and Commander Phillips in the whale-boat of the *Felix*, to communicate with them; and accordingly a long conversation or palaver was held between those Esquimaux and one of their nation who was in the boat of the *Felix* as a sort of interpreter, but who, understanding no European language but Danish, could not communicate the nature of the intelligence to those around him. In this difficulty the boats dropped on board the *Prince Albert*, another of the exploring vessels in the neighbourhood, and there put the interpreter, Adam Beck (as he is called) in communication with the Captain's steward, John Smith, who "understood a little of the language," as Sir John Ross says, or a "good deal," as Captain Phillips says, and who presently gave such an account of the intelligence as started every body on board. Its purport was as follows:

That in the winter of 1846, when the snow was falling, two ships were broken by the ice a good way off in the direction of the neighbouring cape, Dudley-Digges, and afterwards burned by a fierce and numerous tribe of natives; that the ships in question were not whalers, and that epaulettes were worn by some of the white men; that a part of the crews were drowned, that the remainder were some time in huts or tents, apart from the natives; that they had guns, but no balls: and that, being in a weak and exhausted condition, they were subsequently killed by the natives with darts or arrows. Thus was the form given to the Esquimaux' story by John Smith, captain's steward of the *Prince Albert*.

Impressed with the importance of these tidings, Captain Commanney and Captain Phillips immediately made their report to Captain Austin in the *Assistance*, which was then in company with the *Felix* near Cape Dudley-Digges, Captain Austin at once decided upon investigating the truth of the story, and with this view despatched a message to the *Lady Franklin*, another of the exploring ships, which lay a few miles off, and which had on board a regular Danish interpreter. This interpreter duly arrived, but proceeded forthwith to translate the story by a statement "totally at variance" with the interpretation of "the other," whom, as we are told, he called a liar, and intimidated into silence; though no sooner was the latter left to himself, than he again repeated his version of the tale, and stoutly maintained its accuracy. Meantime, an additional piece of information became known namely, that a certain ship had passed the winter safely housed in Wolstenholme Sound, a statement soon ascertained by actual investigation to be perfectly true, and since fully elucidated by the return to that country of the vessel in question, the *North Star*.

Such is the substance of those communications from the Commanders of the Expedition. With respect to the value of the intelligence, it may be observed that Captain Penny states, in his official letter of the 21st of August, that, "having offered his services, together with those of his interpreter (the Dane above-mentioned), he was happy to find the sole foundation for the tidings to be that the *North Star* had wintered in the place referred to." Captain Penny, it may be added, also mentions, that the two Esquimaux from whom the report was obtained" had been on board his ship for several hours without making any such communication, though he had been subjected to questions in abundance. The account altogether is one of little credibility, and, as a contemporary observes, with respect to the Esquimaux's story, even if understood and translated aright, it is "by no means improbable that the anxious and incessant prosecution of our inquiries in these waters may have suggested answers to the native tribes for inventing or magnifying tales likely to arrest the attention of their eager visitors."

In corroboration of the above it should be stated that the *Prince Albert*, Commander Forsyth, arrived at Aberdeen between eight and nine o'clock on Monday night (the crew all well); and it is stated on "good authority" that the division of the exploring ships under the command of Captain Austin has carefully examined that part of the coast in Baffin's Bay where the scene of the catastrophe is reported to have taken place, and has not been able to discover a single trace or relic of anything belonging to them, which could not have been the case had they perished in the manner reported.

The Bishop of Gloucester consecrated a new church at Frome last week.

Some documents have lately been found in the archives of the municipality of Leipsic, which prove that the cholera raged in that city in 1680, when 2380 persons were carried off. This number amounted to about a ninth part of the whole population, which at that period was 19,360.

NEW ACT RELATING TO MORTGAGEES AND TRUSTEES.—On the 1st of next month an act will come into force respecting mortgagees and trustees. It confers very considerable powers on the Court of Chancery, giving that court jurisdiction over trustees in a summary manner by orders, and enabling the court to seize and possess funds with the view of carrying out the trusts reposed in trustees.

NEW MACHINE FOR WEIGHING COALS.—We have just seen a new machine (invented by Messrs. Butters and Co.) by which coals may be weighed without additional labour to the workmen or inconvenience to the purchaser. According to the system at present adopted for weighing coals, obstructions are frequently caused in the public streets; whereas this new apparatus, being fixed at the back of the waggon, renders it necessary that each sack should pass over it before it reaches the ground. So useful an invention, if carried into effect, will be the means of protecting the public from false weights, and at the same time considerably expedite the delivery of coals.

VISIT TO THE GREAT WALL OF CHINA.

(By a Correspondent.)

IN June last, H.M. steamer *Reynard*, having executed the service on which she was employed at the river Peiho, weighed on the 11th, and, early on the morning of the 13th, anchored in three fathoms, about one thousand yards distant from the Great Wall.

This stupendous work of human labour has its eastern termination on the shore of the Gulf of Leotong, about 120 miles north of the Peiho, in lat. 40° 4′ N., long. 120° 2′ E. Viewed from the water, the terminus appears to consist of a fortress some 300 yards in length, having a large gateway in the south face, close outside of which, and between it and the sea, is a permanent joss-house, or temple, while the northern end is surmounted by a modern two-storied guard-house; immediately beneath the Wall projects some way.

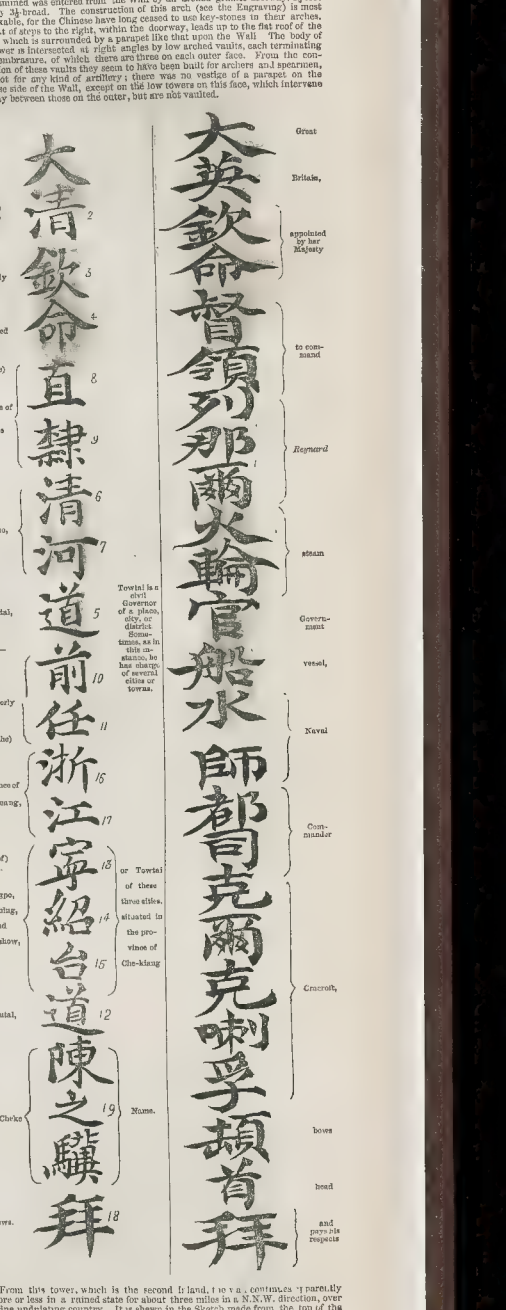
At 10 A.M. we landed a large party to the right of the joss-house on a steep sandy beach, and were civilly received by a white-buttoned mandarin and a small party of soldiers, who informed us we were perfectly at liberty to inspect the Wall at our leisure. We therefore soon ascended to it by a broad inclined plane outside the fort, and found ourselves on a rectangular platform, about sixty feet in length, paved with dark blue-coloured bricks. This portion of the structure was, in its present age and condition, meant to form the original terminus of the main wall; while, owing probably to the receding of the water, the before-mentioned lower continuation projecting seaward now a mass of ruins, and buried in the sand—appears a less durable construction, of much later date.

The first objects that arrested our attention on the platform were three monumental slabs of black marble—two standing close to the wall, the third removed from its base: a curiously-carved altar shaped pedestal lay extended on the ground. On one of the standing slabs is deeply inscribed the sentence, "Heaven created Earth and Sea;" and on the other, "Only a Spoonful." The import of this latter sentence we were at a loss to conjecture: it may have had reference to the placid waters of the Gulf of Leotong; or, perhaps, is intended as an allusion to the nothingness of this vast structure when compared with the works of Creation. The fallen monument, having a very long inscription, we left to be deciphered on our return from the survey of the Wall, which we could no longer delay.

Ascending again by a broad flight of steps from the platform to the top of the fort, we walked past the guard-house (a dilapidated building) down another shorter inclined plane, and then along the Wall, which we found, for about eight hundred yards, in a very ruinous condition, the first part of it being little better than an embankment of sand, broken at intervals by projecting masses of ruined brickwork.

At half a mile's distance from the fort, however, the Wall commences to show a better state of preservation: here we found it measure 39 feet across; the platform was covered with mould, and variegated with flowers of every hue. The Wall on the Tartar side, at this point, shows a fine well-built foundation of hewn granite, surmounted by a slanting brick facing, measuring together 35 feet in height; above this is a brick parapet, 7 feet high and 18 inches thick, 6 feet in height; above this is a brick parapet, 7 feet high and 18 inches thick, divided by small embrasures at irregular intervals, from 8 to 13 feet apart.

At intervals, varying in distance from 200 to 500 yards, the Wall is flanked, on the Tartar side, by towers of brick, 45 feet square and 32 feet high. The one we examined was entered from the Wall by an arched granite doorway, 6½ feet high by 3½ broad. The construction of this arch (see the Engraving) is most remarkable, for the Chinese have long ceased to use key-stones in their arches. A flight of steps to the right, within the doorway, leads up to the flat roof of the tower, which is surrounded by a parapet like that upon the Wall. The body of the tower is intersected at right angles by low arched vaults, each terminating in an embrasure, of which there are three on each outer face. From the convolutions of these vaults they seem to have been built for archers and spearmen, and not for any kind of artillery; there was no vestige of a parapet on the Chinese side of the Wall, except on the low towers on this face, which intervene midway between those on the outer, but are not vaulted.



From this tower, which is the second I had entered, I could continue my journey nearly more or less in a ruined state for about three miles in a S.N.W. direction, over a fine undulating country. It is shewn in the Sketch made from the top of the tower. It then takes a sudden curve to the S.W., passing near a large town called Saan-hae-wei. Thence it ascends directly up a bleak rugged range of mountains, about 3000 feet in height, creeping up the side like a gigantic serpent, and disappearing over the summit of the ridge.

The general features of the country about the Wall are very pleasing: the land, rising slowly from the sea up to the foot of the mountain range, is well wooded, and apparently densely populated on the Chinese side. On the Tartar side it undulates gently away into the distance, and appears rich and well cultivated, and dotted here and there with villages, the houses of which have roofs exactly similar in shape to those of our omnibuses at home. The only gate through the wall in this district is about three miles inland, and is called the Shan-hae-kwan. This we intended visiting, had not the mandarins prevented us. We observed, while loitering about the Wall, troops of mounted Chinese galloping out from the interior in the direction of the fort; but, supposing they were only bat-tening to have a view of us before we left, we took no further notice of them. Before, however, we had proceeded more than one mile and a half inland these mandarins overtook us, and informed us that the Tooding, or

GENERAL VIEW OF THE GREAT WALL OF CHINA, FROM THE SEA.

Tartar General in command at Shan-hae-wei, had come down to the fort, and that it was his wish we should proceed no further. We accordingly descended from the Wall, and returned through the fields to the terminus. Here we found the General and a numerous suite assembled, with a crowd of mandarins and soldiers; and the bustle and confusion occasioned by their presence unfortunately prevented our taking a copy of the inscription on the third tablet, which, there is little doubt, would have afforded much interesting information. But we were thankful to have seen as much as we did; for had the General arrived a couple of hours earlier, our landing at all would have been doubtful. We re-

MONUMENTAL SLABS AT THE EASTERN TERMINUS.

TOWER ON THE GREAT WALL.

turned to our boats, therefore, satisfied with the result of the expedition, having, perhaps, seen more of this portion of the Wall than any European before us; and, as all this part of China is still by treaty a sealed country, it may be years before another Englishman enjoys the same privilege. At three P.M. the anchor was weighed; and before dark the Great Wall of China had faded from our view.

[Appended to our Correspondent's obliging communication are two pink cards of congratulation, which passed between him and the chief mandarins. We have engraved these Chinese "hints upon etiquette."]

THE GREAT WALL, SEEN FROM THE TOP OF THE TOWER.

SCENE AT THE GRAND REVIEW AT VERSAILLES.

GRAND REVIEW AT VERSAILLES

The long-talked of review came off on Tuesday week, at Versailles, and everybody was much pleased with the spectacle. The President, attired in his Guards uniform, and his inevitable cocked hat, left Paris at nine in the morning, and proceeded to Versailles, where he and the Nepaulese Princes were entertained at a sumptuous breakfast by Lord and Lady Normanby, who have a villa at Versailles. After breakfast, the President sallied forth on horseback, accompanied by Lord Normanby, the Nepaulese Princes and the officers of their suite, and several English officers in uniform, and proceeded to the ground, near St. Cyr, where the 4th, 6th, and 57th regiments were encamped. A little to the left was posted the 62d Regiment of Foot, and the noblest regiments in France—the 1st and 3rd Carabiniers, who are second only to our Life Guards and Blues, The 1st Regiment of Lancers, 2d of Chasseurs, and two batteries of artillery, in conjunction with the Carabiniers, and the 62d Regiment, then opened a heavy fire upon the camp; and General Grouchy, at the head of the cavalry, made several charges, which were repulsed, and he effected his retreat in most admired disorder, to the infinite amusement of the Nepaulese Prince. The scene was not unlike an Easter hunt. Horses were scampering about in all directions, whilst unhorsed dragoons and lancers were rushing about after their disorderly steeds. Such a general delivery was never seen even at the Post-office. At length the erratic steeds were caught, order was restored, and the infantry formed into hollow squares, which were again unsuccessfully attacked by the cavalry. Then sounded "the tocsin of the soul, the dinner-bell." The troops stood at ease, the cavalry dismounted, and generals, lieutenants, sergeants, and corporals were entertained by the President with a cold collation, consisting of fowls, champagne, &c. (Our Artist has pourtrayed the President and Lord Normanby partaking of champange, and the Nepaulese visitors looking on.) All the private soldiery were also most hospitably regaled by the Presidential Amphitryon. The President, Lord Normanby, and the Nepaulese Princes then took up a position near the Forest of Chevreuse, and the troops filed off before them. The soldiers appeared to be of Molière's opinion, "Le vrai Amphitryon, c'est l'Amphitryon où l'on dine," for the champagne evidently awakened an enthusiasm which the nephew of the Emperor had hitherto failed to inspire: the cry of "*Vive Napoleon!*" was far more general than on any previous occasion. Talleyrand used to say that revolutions are not made with rose-water—neither are they to be made with champagne.

The jewelled foreigners excited, however, the lion's share of the public attention. Their carriage was occupied by Mdlle. Cerito, on whose arms glittered the bracelets which her *parouettes* lately wrung from the susceptible Indians. During the review, M. Horace Vernet was thrown from his horse, and the President lent him one belonging to the officers of his suite. This horse fell with M. Vernet, and severely injured him apparently, for the President galloped up and assisted him into a carriage: fortunately, however, the illustrious painter was not much damaged, for in the course of half an hour he was again by the side of the President, thanking him for his kindness.

The Nepaulese Ambassador left Paris on Tuesday last, with his brothers and suite, for Marseilles, on their way to Calcutta. The day before he gave a last sitting to MM Claudius Jacquand and Dantan for the full-length portraits which they are making of him. Before his departure the Ambassador presented M. Jacquand with 10,000 francs and M. Dantan with 8000 francs, for their services. The two works of art in question are to appear at the next exhibition at Paris, and then to be forwarded to Nepaul. One of the Ambassador's suite, who is an enamel painter, has, during his stay in Paris, taken copies of several pictures and portraits, to serve as models for works to be executed when he arrives in his native country.

EMIGRATION TO AUSTRALIA.—FAREWELL GROUP MEETING OF THE FAMILY COLONISATION LOAN SOCIETY.—(SEE NEXT PAGE.)

EMIGRATION TO AUSTRALIA.

On the evening of yesterday week, a Farewell Group Meeting of the Emigrants of the Family Colonisation Loan Society, who were to sail for Australia on the 30th ult. in the *Stag's Castle*, took place at the British Institution, Tabernacle-row, City-road.

The meeting (which was very fully attended) was distinguished by one peculiarity, viz. that there was no chairman; Mrs. Chisholm (the founder of the association), who was present, being supposed to be presiding.

Mr. W. Harding (treasurer of the Society), in opening the proceedings, explained the nature and objects of the Association, which, he said, was originated by Mrs Chisholm, in the month of October, 1849, since which period four hundred persons had enrolled themselves as members. Of these a large number were about to sail on the 30th, being the first body of emigrants leaving this country under the auspices of the Society. The number amounted in all to upwards of 200 souls, and these were divided into about fifty "families," amongst whom there were a few eligible single females, who would be placed under the care of the heads of families going out with them. The information had subscribed a sum of £1000, and of this £1400 had emanated from those who were about to emigrate in the *Stag's Castle*. A further sum, however, being necessary for the purposes of the undertaking, the Society had supplied the deficiency; and it would be the duty of the emigrants, after the lapse of a certain period, to return that money advanced to them. For their own sakes, he trusted that they would not fail to fulfil their engagement in this respect—as the success of the Society depended in a great measure upon the conduct of those who were the first to emigrate under its auspices.

Mr. Robert Lowe (formerly a member of the Legislative Council of New South Wales) proposed a resolution to the effect that the thanks of the meeting preceding to Australia in the *Stag's Castle*, and of all interested in the cause of emigration, were due to Mrs. Chisholm for her patient, disinterested, and successful efforts to establish family colonisation. Mr. Lowe stated that he knew Mrs. Chisholm during her residence in Australia, where she made it her especial business to act as the friend of the emigrants; and so keenly did she feel the necessity there was for affording them protection, that she established an office, similar to a registry-office for servants, the only difference being, that her services were performed gratuitously. Many of the emigrants having heard of the hardships to which it was probable they might be exposed in the interior of the country, were reluctant to leave the town (Sydney); and as they could not obtain such assistance as they required from the officers of the Government, they made their case known to Mrs Chisholm, who was determined that they should obtain the employment they desired. In order to carry out her benevolent intention, Mrs. Chisholm undertook to guide several caravans into the bush of Australia; and having done this, she made all necessary arrangements for the emigrants, adjusting the rate of their wages, pointing out the nature of their engagements, and entering into a proper understanding with the employers to whose care she entrusted their interests. Mr. Lowe then went on to point out the numerous advantages to be derived from the Society, and stated that, inasmuch as most valuable measure consisted in the fact that it was a self-supporting association, he trusted that it would continue to increase in usefulness and prosperity. (Cheers.)

The Right Hon. Vernon Smith seconded the resolution, and stated that he had the highest pleasure in availing himself of this opportunity of testifying to the benevolent efforts of Mrs. Chisholm in the cause of emigration. That lady had done more good by her own unaided exertions, than had often been effected by bodies of officials, with a multitude of clerks and other assistants. The right hon. gentleman then bore testimony to the excellent arrangement of the vessel in which the emigrants were about to sail, and cordially wished them success.

The motion having been carried with acclamation,

Lord Lilford proposed a resolution of thanks to the committee for the liberal and earnest manner in which they had established the Association, and had thus enabled upwards of two hundred souls to emigrate under their favourable auspices.

Mr. Sidney seconded the resolution, and detailed a variety of facts respecting the origin and progress of the society.

A gentleman who had recently returned from Australia then addressed the meeting, pointing out the beauties of the climate, the healthfulness of the soil, and the numerous advantages to be derived from a well-organised system of emigration into the country.

The resolution was carried unanimously, and Mr. F. G. Nelson, a member of the committee, returned thanks, bearing his testimony to the benevolent exertions of Mrs. Chisholm in support of the Society.

Some formal business having been disposed of, the proceedings terminated.

CALENDAR FOR THE WEEK.

Sunday, October 6.—19th Sunday after Trinity.
Monday, 7.—Zimmerman, physician and writer, died, 1795.
Tuesday, 8.—Fielding died, 1754.
Wednesday, 9.—St. Denys.
Thursday, 10.—Oxford and Cambridge Michaelmas terms begin.
Friday, 11.—Old Michaelmas Day.
Saturday, 12.—Sun rises 6h. 20m., sets 6h. 17m.

in case of need, staves and guns, and fortresses called prisons, compels obedience; but where is the law that shall compel a nation? The only real and effective arbitration is the physical force of a power stronger than either, or than both of them combined, who shall force them to submission. "*La paix à tout prix, même au prix de la guerre*," is a saying full of philosophy and wisdom, and will continue to govern the actions of the world, not only until all men love reason and justice, but until that more distant period when they shall agree upon the meaning of those words, and shall establish a general police, or army of the world, to coerce offending nations, in the same way that the law now coerces offending individuals. We would simply ask these well-meaning men, who wish to abolish war before the world has a millionth or a billionth part of the education and virtue necessary for such a result, what they would recommend, if, after Denmark and Schleswig-Holstein had agreed to submit to arbitration, and the arbitrator had been in favour of Schleswig-Holstein, Denmark should fly in the face of such a decision, and renew the war? What would be the step to be taken in such a case? A new arbitration? Or, if not, would it not be, either a return to the state of things which existed prior to the arbitration, or the entrance of some great third party, strong and well armed, into the quarrel, who would make war upon Denmark, as society does against a malefactor? Beyond this point it is impossible to go. Thus, although war is a mighty evil, it is sometimes a mighty necessity. When we can do without bolts and bars in our houses, without policemen in our streets, or constables and magistrates in our villages—when we can repose in security without being indebted to the judge, the sheriff, the policeman, and the gaoler, we may look for the abolition of war. It will, in fact, have abolished itself by that time, and the promised reign of righteousness—the Millennium of the saints—will have arrived. We do not think that time to be very near at hand; nevertheless, we heartily wish Mr. Sturge and Mr. Burrit success in their diplomacy, and shall watch with much interest the progress of their task. The reason and common sense of the world will be much greater than we now believe them to be, if these respectable gentlemen shall win the laurels for which they strive. We must confess, however, that we should have more faith in the success of a declaration signed by the principal powers of Europe, that unless Denmark and Schleswig laid down their arms immediately, the Powers would occupy the fortresses of both belligerents. *That* is a result which, as it would be a war, Mr. Sturge and Mr. Burrit would possibly not approve; but to us it seems that it would be the best and most sensible mode of putting an end to the difficulty.

METROPOLITAN NEWS.

ELECTION OF LORD MAYOR AND OTHER CIVIC OFFICERS.

On Saturday, the Livery assembled in the Guildhall, for the purpose of electing a Lord Mayor for the year ensuing. The new Sheriffs (Mr. Alderman Carden and Mr. Hodgkinson) presided in the Common Hall, and the Town Clerk officiated for the Recorder. The names of the aldermen who have not yet filled the office of Lord Mayor having been announced, Alderman Musgrove and Alderman Hunter (who is the next in seniority to Alderman Musgrove) were declared, amid loud cheers, to be elected by the Livery. The sheriffs then proceeded to the Court of Aldermen, and, upon their return, the Common-Serjeant announced that the Court of Aldermen had chosen Alderman Musgrove to be Lord Mayor for the ensuing year. (Loud cheers.)

Alderman Musgrove (the Lord Mayor elect) having been called upon to take upon himself the office of chief magistrate, said he most cordially concurred in consenting to take upon himself the performance of the functions of the high office to which he had been elected. He thanked the Livery for selecting him, and he thanked the Court of Aldermen for having chosen him unanimously. (Cheers.) Three times he had been chosen: first as Alderman, then as Sheriff, and now as Lord Mayor elect. It was an eventful year that they were approaching, and he hoped to hand down the privileges of the city to his successor in the same unsullied manner in which he now received them. (Cheers.) He would take care that the hospitality of the City—("Hear, hear," and laughter)—should be well maintained. When the foreigners came, he would endeavour to receive them with cordial welcome, and he would ask of the benevolence of his mayoralty, that it should be thought worthy of receiving their thanks for the manner in which he had conducted himself during his year of office. (Cheers.)

The thanks of the Livery to Lord Mayor Farncombe, for the hospitable manner in which he had acted during his mayoralty, and for the benevolent support which he had rendered to the various charitable institutions of the City, and a vote of thanks to the Sheriffs who had just completed their year of office, terminated the proceedings, and the Hall was dissolved.

After the election of Lord Mayor, a Court of Aldermen was held in the Council Chamber, at which the Lord Mayor elect, Mr. William Payne, of the bar, and successor for the city of London, to the office of Steward of Southwark, vacant by the death of the Hon. C. E. Law, the late Recorder of London; and the Court unanimously confirmed the nomination, upon the motion of Alderman Humphery.

INAUGURATION OF THE SHERIFFS OF LONDON.—On Monday morning, Alderman Carden and G. E. Hodgkinson, Esq., the new sheriffs, gave a public breakfast at Cutlers' Hall, whence they proceeded to the Guildhall, where a procession was formed, and, escorted by the Lord Mayor and the officers of the corporation, they went to Westminster-Hall, going on board the City barge, at Blackfriars-bridge, to be presented to the Barons of the Exchequer. At three o'clock the same afternoon, the Cursitor Baron (Mr. Banks) took his seat on the bench, in the Court of Exchequer, and shortly afterwards the Lord Mayor, accompanied by the Common Serjeant, the Sheriffs, and the Recorder, &c., entered the court, and, having taken their seats, the Common Serjeant addressed the Cursitor Baron:

My Lord, owing to the lamented death of the Hon. C. E. Law, the late Recorder, and in the absence of his learned successor, he has devolved on me of presenting to you Richard Carden, Alderman and cutler, and George Edmund Hodgkinson, citizen and cutler, Master Cutler, Alderman and Middlesex by their fellow-citizens. The father who have been elected Sheriffs of London and Middlesex by their fellow-citizens. The father of Alderman Carden was a distinguished member of the Middle Temple, whose high legal attainments were well known at the profession. Alderman Carden at an early age entered the army. This, however, he quitted for more active pursuits in the City of London, and, entering into mercantile affairs, became one of the most eminent members of the foreign and monetary affairs, became one of the most eminent members of the Stock Exchange. Mr. Hodgkinson is paternally descended from one of the first agricultural families in the county of Derby, who have for centuries cultivated their own freehold land, and maternally, from Mr. Humphrey Jones, the founder of the iron trade of Birmingham. Mr. Hodgkinson's progenitors have been for more than a century members of the Cutlers' Company, and, by his integrity and perseverance, has raised himself to eminence in the port of London, and, by his industry, to great wealth and distinction. Such is the history of the gentlemen I have present to your Lordship, and, on their behalf, I have also to present you, my Lord, a specimen of the choice made by the citizens. I have also to request you, her Majesty's representative in this city of London, and, on the part of the late sheriffs, who are present at the expiration of their year of office, to express the gratification of those gentlemen have been more than realised, both by their impressive manner in the court of Newgate, and the establishment of a third court for the trial of prisoners at the Central Criminal Court, facilitating the business with the proper and speedy administration of justice.

The Cursitor Baron, after paying a tribute to the memory of the late Recorder, and expressed her Majesty's full, gracious, and unqualified recognition of the choice made by the citizens of London. He also passed a high compliment on the late sheriffs, Alderman Lawrence and Donald Nicol, Esq. Proclamation was made for suit and service to be done by the corporation in respect of certain waste lands called the moors, and a piece of ground in the parish of St. Clement. Alderman Hunter performed the ceremony of counting five horse-shoes, 41 horse-nails, and chopping three bundles of sticks. The Cursitor Baron accepted the invitation of the sheriffs to the banquet given by them in the evening, at Cutlers' Hall. The procession returned by water.

REPAVING OF OXFORD-STREET.—The portion of this immense and important thoroughfare between South Molton-street and New Bond-streets has been chosen for the first experiment to remove the ordinary macadamized paving and replace it with granite blocks, as being more durable and also more suitable for this portion of the street, which is a rapid decline to the so-called hollow of Oxford-street, and which will now be assimilated with the lower portion of the descent, which was paved in a similar manner about a year since. The works will proceed with the dispatch requisite in a thoroughfare of such importance, and in the meantime the traffic is obliged to take a circuitous route to the place of destination.

THE ATTACK ON MR. CURETON.—In addition to the sum of £50 reward offered by Mr Cureton for the discovery and apprehension of the persons who made the murderous attack upon him, and succeeded in robbing him of a large quantity of ancient coins (as noticed last week), the Government have offered a further reward of £50 for the apprehension of the offenders. It is supposed that the robbers could not be very well acquainted with the circumstances of the house, or of the habits of Mr. Cureton, since they left behind them a considerable quantity of coin and other valuables, and only got away with them the old silver coin and other articles of lesser value, although they had the field all to themselves, after having reduced their victim to utter helplessness.

—On Wednesday, at the Mansion-house, Henry Dunham, a rough looking young man, well known to the Metropolitan and City Police as a thief, was brought before Mr Alderman Gibbs, in the custody of Michael Haydon, the officer, charged with being concerned in the attack upon, and the robbery of, Mr. Cureton, of Albion-gate-street, on the 26th of September. The evidence was not of a very strong character. Mrs. Sarah Wilson, wife of Mr. Charles Wilson, of No. 81, Albion-gate-street, the house in which the outrage was committed by three ruffians, as related last week, when asked to look round and tell whether she saw any of them present, replied "I cannot swear to the prisoner, but I believe that he was the last of the three who came into the house." He was remanded for a week.

THE PRINTERS' PENSION SOCIETY.—On Tuesday evening a meeting of the committee of management, and other friends and supporters of the above laudable institution, for the relief of aged and infirm printers and their widows, was held at the London Tavern, for general business. The report (being the 23rd of the society's existence) for the past year of the general state and progress of the society's affairs, showed that no retrograde movement had taken place during that period. The funded property at the date of the last audits amounted to £5512 17s. 3d. with the Commissioners for the Reduction of the National Debt, produced an annual income of £207 6s. 10d. The amount paid to pensioners last year was £356 16s. The income from all sources was £310 18s. 2d.; and the expenditure, £307 6s. Since the institution was founded (independent of the present number of pensioners) 163 persons had received its benefits. The report concluded with an appeal for support, it being presumed sufficient endowment had been held forth to point out the absolute necessity for unceasing exertion on the society's behalf.

CITY OF LONDON GENERAL PENSION SOCIETY.—The annual general meeting of subscribers of this society was held on Monday at the London Tavern; Jake Lance Hansard, Esq., treasurer, in the chair. The report detailed the result of the management during the past year. Two elections have taken place, at which eight new pensioners have been added to the list. There are fifty-eight annuitants now receiving relief from this charity—thirty-three men and twenty-five women. Seven pensioners died during the past year; and one a poor man, aged sixty-nine, having unhappily become insane, has been removed to his parish in the county asylum at Hanwell, his pension ceasing on his becoming a pauper. The men are receiving 27s., and the women 18s. per month. The directors, in their report, lament that the permanent income of the charity is much below the amount required to meet the payments of the pensioners. During the past year the directors, with the assistance of Mr. Benjamin Bond Cabbell, one of the vice-presidents, and the society's principal trustee, have succeeded in placing the whole of the society's permanent stock, which through deaths and other casualties had lapsed into various separate investments and appeared in separate accounts in the books of the Bank of England, into one fund, under the care of four trustees. The permanent fund of the society now amounts to £6700, Three-and-a-Quarter per Cent. Annuities. The late William Drake Broadbent, Esq., of Lawrence-lane, Cheapside, merchant, deceased, has granted to the charity a sum of £50, Three per Cent. Consols, separately invested under the terms of a deed of settlement; from which a special permanent fund of £53 10s. 6d. In addition to this there is a sum £402 6s. stock, Three-per-Cent. Consols, the interest of the dividends of which, amounting to £12 1s. 6d. annually, is available for the current expenses of the charity. The total amounts of funds now possessed by the charity is £7158 16s. 6d. The death of the Queen Dowager, who was a munificent annual contributor to the funds of this charity, and that of the Duke of Cambridge, who on two occasions presided at the half-yearly festivals, are noticed in the report. The total working expenses, including printing, stationery, advertisements, rent, salaries, and miscellaneous, have been £147 2s. 7d., being £52 less than last year, leaving a balance in the Bank of England of £257 13s. 2d. Since the charity was established, in 1818, 878 pensioners have been on the funds, and the sum of £56,314 13s. has been distributed in monthly pensions. The report was approved and adopted.

FEMALE ORPHAN ASYLUM, LAMBETH.—On Sunday morning, which was the first Thanksgiving Sunday since the lamented death of the late Royal president, the Duke of Cambridge, the chapel and the royal chair were hung with black, and the 160 orphan girls appeared in mourning. The sacred edifice was crowded to hear the Rev. John Jessoph, the morning preacher; after which the school-room was opened to the public, when the Rev. S. R. Cattley, the chaplain, most feelingly addressed the guardians and orphans, and distributed purses, containing five guineas each, to five young women, who, having been brought up at the asylum, had faithfully served in private families, and attended to receive this reward of good service. Her Majesty has lately become patroness, and the Duke of Cambridge has succeeded his Royal father as president of this institution, founded in 1758.

CITY OF LONDON CHAMBER OF COMMERCE.—At various periods within a few years attempts have been made in the city of London to form a Chamber of Commerce, which might, at the same time, become something like a court of arbitration, in order to settle disputes, and prevent the enormous sacrifices made by litigation in the courts of law; but these attempts have hitherto, however, proved abortive. Another attempt to remedy the evil is now making on a more extended scale, and a requisition to call a public meeting to consider the subject has just been presented to the Lord Mayor, signed by upwards of 200 firms in the City.

CORPORATION FOR THE RELIEF OF SEAMEN, &C., IN THE MERCHANT SERVICE.—A quarterly general court of this body was held on Tuesday, pursuant to the act of Parliament, at the London Tavern, Mr. George Lyall, Tuesday presided. The minutes of the last general court having been read and confirmed, receivers of dues were appointed for the outports of Dundalk and Bridport. After transacting some routine business, the court proceeded to the consideration of numerous applications for relief from sick and disabled seamen and widows. Pensions and temporary relief were ordered to the applicants, and the meeting then adjourned.

WESTERN MEDICAL SESSION.—The medical schools of the metropolis commenced their winter session on Tuesday, when introductory addresses were delivered by the principal lecturers attached to the institutions. The lectures in general were well attended.

SCOTTISH HOSPITAL.—A general meeting of the patrons of this charity took place on Wednesday, at the Scottish Hall, Crane-court, Fleet-street; Dr. Webster in the chair. The report states that the number of casual applicants each month was 260, and the number of patients 130. The amount distributed averaged £161 per month. The receipts, from St. Andrew's Day, November 30 last, to Michaelmas Day, amounted to £2044, independently of a balance of £367, and the expenses had amounted to £2044, leaving a balance of £85. After a short discussion on some business matters, a vote of thanks was given to the chairman, and the meeting separated.

FOUNDATION OF A NEW DISSENTING CHAPEL, AT PENTONVILLE.—On Tuesday, the first stone of a spacious new chapel, for the use of the Congregational body, was laid by D. W. Wire, Esq., in the Caledonian-road, Pentonville. The building is to be erected according to a design by Messrs. Lee & Lee. It will be in the Grecian style of architecture, and will afford accommodation for 1000 persons. The entire cost is not to exceed £2680: towards which the Congregational Chapel Building Society has voted £700—£400 as a grant, and £300 as a loan. The subscription-list amounts to upwards of £1100, leaving about £360 to be raised.

DARING ROBBERY IN ST. PAUL'S CHURCHYARD.—A robbery of a peculiarly daring character, in one of the most public thoroughfares in the City, and close to the well lighted premises of Messrs. Allan and Company, silk mercers, was committed at the early hour of seven o'clock in the evening, on Tuesday last, upon Captain Bally, R.N., of Datchet, Bucks, in Cheapside, close to Bow-church, leading from St. Paul's Churchyard into Paternoster-row. Captain Baily, who is staying at the Cathedral Coffee-house, St. Paul's, had no sooner turned out of St. Paul's Church and on that evening, to proceed through Chapter House-court, to the Coffee-house, when he was attacked and beset by three well-dressed fellows, one of whom tripped him up by the heels, by whom he was held while on the ground; the other two, in the meantime, ransacking his breeches pockets, and robbing him of his gold watch and appendages, purse and silver, which they escaped through Ivy-lane into Newgate-street, and got clear off with their booty. From the strong gaslights which were in the immediate vicinity of the spot where the robbery took place,

WESTMINSTER RAGGED-SCHOOL CHILDREN IN CLAYLON PARK.

The party, on arriving at Claydon station, were received by Sir Harry and Lady Verney, and by children of the Claydon schools, with flags waving and loud huzzas. They then formed in procession, and walked up to Clayton House, where, having assembled in the hall, they sang Bishop Heber's hymn, "From Greenland's icy mountains." They were then addressed by the Rev. W. R. Fremantle, Rector of Claydon, who bade them a hearty welcome, telling them that he himself had been a Westminster boy, and could well recollect the feelings with which, some thirty years ago, he used to regard such places as Duck-lane, Pye-street, the Little Almonry, &c., and how it was a test of the bravery of any Westminster school-boy to venture through them. He expressed his thankfulness that men of energy and piety had been found who would penetrate these haunts of poverty and sin; and he told the children present how grateful they should be to these kind friends who had searched them out, and gathered them into schools, where they might learn not only how to become respectable members of society in this world, but how to prepare for another. He exhorted them to diligence in profiting by the instructions which they received, and pressed upon them the duty of endeavouring to be of use to their companions and relations, and to communicate to them the blessed truths which they learned at school. He mentioned an instance which had come under his own observation, of a woman who owed her conversion from a life of sin to a life of holiness, and, at length, her happy death-bed, entirely to the fact of her little boy having brought home from school a card, with a verse of Scripture written on it, which proved the message of God to her conscience, and led her to the way of salvation. The reverend gentleman closed his address, by saying, that he would not detain the young party longer from the dinner which was preparing for them, and for which he could perceive they were all quite ready.

The Rev. Mr. Walton, Curate of Waddesdon, who was asked to succeed the Rev. W. R. Fremantle, made his address, for the same reason, very brief.

The children were then conducted into the next room, where they partook plentifully of meat and plum-puddings, and apple-pies. Beer was also provided for them; but a great number of them, being teetotallers, declined it, and preferred water.

As soon as the meal was concluded, and the grace had been sung, the children were let out to play—the girls upon the lawn, and the boys in the park; whilst the teachers remained behind to partake of refreshment, which they much needed after their active and fatiguing exertions in waiting upon their young charge. The children manifested the most lively interest in the natural objects by which many of them for the first time in their lives saw themselves surrounded, and took fully as much pleasure in examining these as in playing with the balls and swings which had been provided for their amusement.

By the time the teachers had finished their repast, it was needful to collect the children for their departure. They marched back to the station in procession, as they had come. The girls were at once placed in the carriages appropriated to them; but the boys remained standing by the station, and employed the time that they were kept waiting in singing "God save the Queen," and other airs. At five o'clock, the train arrived, and the whole party returned to London highly gratified by their excursion. No drawback marred the pleasure of the day; the weather, indeed, was uncertain, but the showers most propitiously fell at moments when the party found themselves under shelter. The conduct of the young people was highly creditable; and the children of Claydon, as well as many other of its inhabitants who came forward on the occasion, manifested the warmest interest in, and the kindliest feelings towards, their London visitors.

THE PARSONAGE, AT FRIMLEY

BURGLARY, AND MURDER OF A CLERGYMAN.

The quiet little village of Frimley, in Surrey, has been the scene of a frightful crime a daring burglary, which has unfortunately terminated in the violent death of a venerable and much-respected clergyman, the Rev. George Edward Hollest, who has held the perpetual curacy of this hamlet during the past seventeen years.

The village of Frimley-grove is situate about one mile and a half from the Farnborough station of the South-Western Railway, in the centre of the hop country. It consists of not more than 40 or 50 straggling houses, and the parsonage-house is at the western extremity of the hamlet. It is an old-fashioned brick residence, standing on its own grounds, but not more than 100 yards removed from other houses on either side. The Rev. Mr. Hollest was married, his household consisting of himself, his wife, a man-servant, and two maid-servants; and on Friday week his two sons, youths of fourteen and fifteen, were at home, having arrived from school the same afternoon, to pass the Michaelmas vacation with their parents. On Friday night week the family retired to rest at their usual hour, shortly before eleven o'clock—Mr. and Mrs. Hollest sleeping on the first floor, in a room overlooking the lawn; the two boys occupying an apartment on the same floor; the man-servant's sleeping apartment and that of the two maid-servants being at the top of the house.

About three o'clock in the morning, Mr. and Mrs. Hollest were awoke by the noise arising from the presence of two or three burglars in their chamber, and in their attempts to raise an alarm, a pistol or gun-shot wound was inflicted on Mr. Hollest, in the abdomen, by one of the ruffians, which resulted, after much suffering, in the death of the rev. gentleman, on Sunday evening, shortly after eight o'clock.

The details of the affair will be seen in the summary given below of the evidence which was adduced at the inquest on Tuesday last:—On examination of the premises it was ascertained that an entry had been effected at the rear, through the scullery window, the burglars having first broken a pane of glass to enable them to open the window, and then cut away the woodwork, into which an iron bar was fixed. From the scullery, the kitchen was entered by the removal of a bolt in a very business-like manner, indicating that the villains were no novices in crime. Having once gained an entry, they appear to have set open all the doors in the house, so as to afford speedy egress in case of alarm or discovery. The front door was propped open by a mat, and two or three other doors were found fixed on their hinges by the insertion of knives in the crevices.

The police apprehended, on suspicion, on Sunday evening, at the Rose and Crown beer-shop, in Guildford, three young men of bad character, two of whom at least are shown to have been at Frimley during the week, and one of them is known to have had some conversation with the deceased while endeavouring to dispose of some earthenware dishes. The reputed names of these men are Hiram Smith, James Jones, and Levi Harwood. They are all well known to the local police as very daring thieves, and each of them has been several times in custody. The grounds of suspicion which caused their apprehension on the present charge have not transpired. They were brought to Frimley on Tuesday morning and taken to the residence of the deceased, where they were severally submitted to examination before Captain Mangles, M.P., of Foyle House, Guildford, a county magistrate. The examination was conducted with closed doors, but the result is understood to have created a strong impression on their guilt. Mrs. Hollest is almost positive as to the identity of two of the parties, and evidence has been obtained which shows that two of them have been recently seen in the neighbourhood of the deceased's house. All three prisoners are very small men, and two of them are scarcely five feet high. They are, nevertheless, most determined-looking men of the roughest cast of character. At the close of the magistrates' investigation, the prisoners were remanded, instructions being given to the police to send one man to Guildford, another to Farnham, and the third to Godalming, in order to prevent the possibility of communication between them.

The Home Secretary has offered a reward of £100, to which the family of the deceased have added £50, for the discovery of the guilty parties.

At the inquest, the principal evidence was given by the widowed Mrs. Hollest, who stated: On Friday night last I retired to rest about five minutes to eleven o'clock, my husband having gone to bed previously. I was disturbed, I think, about three o'clock on Saturday morning. I heard footsteps in our bed-room. We both jumped up in bed at the same time. I saw two men at the foot of our bed. One of them put his left hand on my feet, and in his right hand he held a pistol, which appeared to be levelled at my head. One of the men was a little taller than the other. The tallest seized Mr. Hollest in the same way, and levelled a pistol at him. As nearly as I can recollect, both of them said together that "if we made any noise they would blow our brains out." That expression was repeated several times. Mr. Hollest at first thought it was our boys playing a trick upon him, and he told them to go to bed. I saw at once the terrible reality, and sprang out of bed on the left-hand side to ring a bell, the rope of which hung down at the head of the bed. On my doing so, one of the men rushed towards me, and pushed me down with so much force that the bell-rope broke in my hand. The man continued to press me down on the floor, and held a pistol close to my eyes. While in this position I heard my husband, who had also got out of bed, scuffling with another man on the other side of the room, and presently afterwards I heard the report of a pistol. I struggled hard with my assailant, in order to get round to help my husband. I think the man fancied his comrade was shot, as he gave way a little, and I at length succeeded in getting round to the fireplace, and taking hold of a large hand-bell, which I rang as loud as I could. The men at this time left the room; followed by my husband. I ran to the window, and, throwing up the sash, rang the hand-bell again. While doing so, I heard a gun fired from the lower part of the house, and at the same time observed two men run across the lawn. One of the men turned back and looked at me, and I shut down the window immediately. I only saw two myself, but Mr. Hollest told me he had seen three distinctly. After I had closed my bed-room window I went to my children's room, and on the landing I met Mr. Hollest coming up-stairs. He said to me, "The fellow has shot me," and at the same time showing his wound. The men appeared to me to be dressed in light clothes, and to have their hair stuck out at the sides of their heads for the purpose of disguise. Their faces appeared to be covered with fine linen masks, as I could see holes for their eyes. I heard no rustling of paper, and therefore I think the masks were linen. I suspect two of the men who have been placed before me for identification. I had fastened all the doors before retiring to rest, with the exception of the door leading from the kitchen to the staircase, which I had left open for two or three nights previously.

Inspector Kendall requested the coroner to ask Mrs. Hollest to explain the position of the curtains on Mr. Hollest's side of the bed.

Mrs. Hollest said they were drawn close at the head, and round the foot-post, and this might have prevented her seeing any third man in the room. She did not observe either the man who stood over her, or the one who was struggling with Mr. Hollest go to the table where her watch was lying, and as it is gone she thinks it very probable that a third party may have taken it.

Mr. Davies, surgeon, who attended the deceased, stated that from the beginning he regarded the wound as mortal. He had made a *post mortem* examination, and had found loss in the fold of the peritoneum, between the bladder and the rectum, a small marble, which he produced. Mr. Hollest had stated to him that the man fired the pistol at the time he was stooping to take the poker from the fire-place, and this would account for the direction of the wound. He had been Mr. Hollest's medical attendant. The rev. gentleman usually enjoyed good health. He had no hesitation in stating his death to have been caused by the wound in the abdomen.

Mary Gouldstone gave evidence inculpating two of the men in custody:—She stated that she was a nursemaid in the service of Mr. Mayberry; and that on the Friday night, about half-past twelve o'clock, she was looking out of her bed-room window, which was on the second floor, and faced the street, when she saw three men standing on a grass-plat nearly in front of her master's house. She took particular notice of them, as she thought one of them appeared to be tipsy. One of them wore a green felt hat, with light shooting-coat, and dark trousers. Another wore a flat cap; but she did not notice the dress of the third. The one with the felt hat was the tallest of the three, and stood in the middle. The moon was shining brightly, and enabled her to distinguish the features of two of the men. She had never seen them before nor since until that afternoon. She had just seen two of them in the tap-room, and had no difficulty in recognising them, as she had so particularly observed them on Friday night. On her oath, she was positive two of the men she had just seen in the tap-room were the same men she saw in front of her master's house on Friday night. After hearing on Saturday morning what had occurred at Mr. Hollest's, she told her mistress that she had seen three men in front of the house on the previous night, and that she suspected they were concerned in it.

The three prisoners were here introduced, and the witness immediately pointed out the two she had previously identified.

The Coroner (addressing the prisoners) said, he supposed they were aware that a very serious charge had been made against them. The last witness had declared that she had seen them in Frimley on Friday night at half-past twelve, and he wished to inform them that they were at liberty to ask her any questions, if they chose to do so.

The prisoner Smith said (sharply): What time does she say she saw me in Frimley?

Coroner: At half-past twelve.

Smith (to witness): You saw me in the tap-room of the White Hart at half-past twelve on Friday night, did you?—Coroner: Oh, no; the witness does not say so. She says that she saw you in Frimley village.

Smith: Then I can deny it. Excuse me, gentlemen all round, the witness has not spoken the truth. I can bring a respectable publican to prove that I was not in Frimley on Friday.

The Coroner (to the prisoner Jones): Do you wish to ask the witness any questions?—Jones: No more than that I can bring a witness to prove I was not in Frimley on Friday.

The prisoners having been removed, the Coroner here directed the court to be cleared of strangers, and, after a few minutes' consultation with the jury, on the doors being re-opened, it was announced that the inquiry had been adjourned for a week.

TOWN AND COUNTRY CHILDREN.—DRAWN BY GAVARNI.

CHILDREN there are in many a street
Who never press'd beneath their feet
The daisies; or on dale or down
Saw husky harvest waving brown;
Never beheld the wild rose blow,
Saw May hang out her sheeted snow,
Or heard, o'erhead, in early spring,
The lute-voiced skylark carolling;
Who share no joy, and feel no woe,
Whether the flowers come or go,
Nor to the woods go "summering."

Their playground is some building-land,
Where the last tree doth leafless stand;
Where poisonous ox-eyes mark the spot
Beside which "Rubbish may be shot."
The very nettles that grow there,
While Spring is green, are brown and sere.
And there they dig their garden ground,
With broken pots they fence it round,
Stick in the chickweed for a flower,
And so they wile away the hour,
Forgetting all their poverty.

A different change the Country brings,
Wandering on summer evenings,
When little children may be seen
[illegible] around the village-green,
Like restless insects in the air—
Without a thought, without a care
About the night or coming morrow:
They have not time to think of sorrow,
[illegible] wearied, to their pallets creep,
Dreaming of pastimes while they sleep,
And wakening up right joyously

Watch them beside the meadow-stream,
Poet, if thou dost lack a theme
A stick, a straw, a leaf, a flower,
Suffices for their naval power.
Float gently on, thou fancied barque!
Through where the one-arched bridge looms dark:
'Tis past, it comes again in sight—
Children, I share in your delight.
Now, painter, bring thy palette out;
I know thou can't not paint that shout,
But give the scene its colouring.

Paint them with cheeks as red as cherries,
And make them gathering bramble-berries;
Or seated, in fine autumn weather,
Half buried in the purple heather,
Where pimpernels like rubies glow,
And nodding hare-bells round them grow.
Throw in the golden gorse between,
And strew the bank with mosses green;
While here and there the fern hangs down,
Touched with September's russet brown,
And make the sun shine gloriously

Or in some yellow harvest field,
Where stooping reapers [illegible],
[illegible],
Half shadow'd by the flickering leaves,
With gaudy corn-flowers in their hands:
Place gleaners in the stubby lands,
And paint their costume red and blue
To break the rich corn's golden hue,
And round about the children's dress
Throw trails of pink convolvulus,
And draw one sleeping tranquilly.

Or give them many an acorn cup,
And let them seem to dine or sup
As some tiny girl presides,
And the fancied feast divides—
Calls this a custard, that a pie,
The while with blackberries they dye
Their little hands and ruby lips.
Throw briony and rosy hips
In wild festoon'd-like arbours round,
And paint them sitting on the ground
And light the picture splendid!

Or wilt thou draw them running [illegible]
And throw the sunshine on their faces,
Making their hair stream wild and free,
And blow back all their drapery
While a flock of milk-white lambs
Are hurrying, frighten'd, to their dams.
Make one child on an old gate swinging [illegible]
And one beside a clear brook singing:
A mother with her infant daughter [illegible]
A tree, all shadow'd in the water [illegible]
The blue sky broken suddenly.

When seated by some moorland wild,
How happy seems a rustic child!
While half the grey, thatch'd cot we see,
Hid by the tall oak's greenery;
Or through the churchyard as they go,
Thoughtless of those who sleep below,
Playing about the ivied porch,
Or round the grey old village church;
Making its sleeping echoes ring,
While whooping loud, and hallooing—
Reckless of frail mortality.

Watch them in fields outside a town
Blow off the dandelion's down,
And numbering, as they whiff away
Each tuft, the tell-tale hours of d[illegible]:
Or see them by the hedgerow-banks,
Where the tall nettles stand in ranks,
Aping the soldier in his glory—
Hewing down the thistles hoary,
Till through the weeds they've made a lane
And then they look upon the slain,
And march away triumphantly.

And in their games what mimicry!
Nature's best actors we then see.
Here one pretends to hop and hipple
Forsooth he must become a cripple,
Because he 'mid the daisies fell.
Another comes to make him well,
Feels his pulse and shakes his head
And says he must be put to bed.
Then on the grass they will him lay
Till up he jumps and runs away
And they all follow merrily.

Look on this picture—view this scene!
The cart half hid with trailing green,
A child around its mother twining,
The bank in golden st[illegible]
Another with delight is screeching,
And to its laughing nurse is reaching;
See how the light falls on her face—
The child within her eyes doth trace
Its little image perfectly,
And screams and laughs itself to see,
And crows aloud most lustily.—THOMAS MILLER.

THEATRICAL SEASON.

The opening of the Princess's Theatre, last Saturday, may be taken as an inauguration of the metropolitan theatrical season. That of Sadler's Wells a few weeks previous is of a suburban character; and, though of importance in a dramatic point of view, has little influence on theatrical speculation. The performances there, moreover, have been yet characterised by no new points. With the assistance of Mr. Leigh Hunt's "Legend of Florence," the revivals at that house have proceeded from the old stock, and such exception had not sufficient piquancy to make the season distinctive. Something more will be needed with the coming competition, to sustain the reputation of the Islington establishment. The company wants reinforcement, and the productions must have originality. In both respects we expect to see an improvement. At the Surrey, too, the legitimate season has commenced; and "Macbeth," with the music, has been honoured with the lead; but the cast is far from satisfactory. Whether, also, the management will pursue a steady course upon principle, is, judging from past experience, exceedingly doubtful. At the end of the season, a management should be able to answer the question, "What has been done for the drama?" with a list of results. What new work of genius added to the world's experience? what new performer brought forward for public acceptance? The season, barren in these respects, is a disgrace and a failure, however well intended, however respectably conducted.

It remains to be proved to what extent Messrs. Kean and Keeley will justify the promise of their opening. Of the theatres now in operation, the Princess' has by far the most attractive company. It consists of some of the best of the old names, with the most promising of the modern. Such actors as Harley, Meadows, and Wigan have no equals in the walks of humour; and when associated with Mr. and Mrs. Keeley, we see at once that the comic force of the company defies rivalry. In popularity no tragic actor is superior to Mr. Kean, who, with his excellent wife, enjoying and deserving the sunshine of court patronage, is qualified to support with his single name the fortunes of any stage. Other well known histrions, such as Ryder, Vining, Cathcart, and Fisher, merit the utmost respect, as efficient coadjutors filling up the subordinate parts in a very superior manner. Hitherto, these Kean and Keeley performances at the Princess' have touched the ideal point of perfection. No theatre can exceed them —no theatre, now open, can equal them. The appointments, too, have been superb, and the entire arrangements bear upon them the stamp of liberality, spirit, and the entire arrangements bear upon them the stamp of liberality, spirit, and the entire arrangements bear upon them the stamp of liberality, With such resources at his command, Mr. Kean may do whatever he pleases; and we trust he will use them equally for the improvement of the theatre and of the drama. Original productions should be his aim, rather than revivals—the latter, moreover, should show research and taste.

There are still the Haymarket and the Lyceum unopened. Mr. Webster is reported to have engaged a host of talent, in addition to Mr. Macready and Mrs. Warner, and with these forces has a fair chance of competing with the Princess'. No other theatre, judging from appearances, has the slightest chance at all. The competition between these two houses will revive those palmy days of the drama when old Drury and the Garden contended for victory. The result cannot but be highly beneficial; it will go far to revive dramatic taste, and will benefit the entire arrangements bear upon them the stamp of liberality, spirit, and the entire arrangements bear upon them the stamp of liberality, every branch of the profession. No theatre can exist, however, by itself. It needs competition. Mr. Anderson, as lessee of Drury Lane, will enter the field at Christmas; but the most considerable next season very differently from the last, to gain by it either profit or honour. Liberality and intelligence are needed to command and select the best new pieces. Expense, equally, must be incurred in getting out and mounting Mr Anderson's absurd declaration and original dramas extant, notwithstanding Mr Anderson's absurd declaration and original dramas extant, notwithstanding Mr Anderson's absurd declaration to the contrary at the end of his last season; and the manager's success will be proportionate to his encouragement of genius. If he continue in a course of personal vanity, his failure is inevitable.

The Lyceum and the Adelphi will, no doubt, proceed upon their old system of procuring new pieces of the domestic and burlesque sorts. Its operation is beneficial so far as it promotes the exercise of talent and wit. As the principle, under the direction of Mr. Farren, we expect superior dramas of all descriptions, mostly new; and, we trust, as few translations as possible.

Besides these, there remain the New Strand and the St. James's theatres: but these exist at possibilities rather than as realities. The size of both is limited; but they, nevertheless, offer means and opportunity for experiments that cannot be made elsewhere, and, in judicious hands, might be rendered available and profitable; particularly the St. James's. That May-pole-bone, too, began to find an audience which, in an untheatrical neighbourhood, it has had to create. The good work might be made to prosper by a manager of adequate resources both in mind and purse. We hope that it will not be permitted to decline.

PRINCESS'

The opening of this theatre, under the joint management of the Keans and the Keeleys, we have shown, was successful, in every sense of the word, as a great fact." The union of the comic and the tragic talent impanied in such a partnership is of high promise. The reputation which they excited on Saturday by the announcement of "Twelfth Night" was fully realised. Mr. Kean as "Viola," Mrs. Keeley as Maria, and Mr. Keeley as *Sir Andrew Aguecheek*, but Mr. Harley as *Clown*, and Mr. Meadows as *Malvolio*. In the last we, at any rate, expected a new view of the character; nor were we disappointed. For once, on the stage, we recognised Malvolio as a natural man—a disposition perverted by personal conceit, but not dishonourable; one who thinks nobly, but acts vainly; wise of purpose, but foolish and overweening in conduct. Of all this, Mr. Meadows gave the prosaic side admirably—lacking somewhat the ideal, probably, but embodying the actual only too palpably. Good as the performer is now in the part, we expect to see him better.

The *Viola* of the evening was charming. It is a part with which Mrs. Kean has identified her reputation. There are in her impersonation the archness and the poetry, the sportiveness and the pensiveness, the wondrous variety and combination of opposites, the sanciness and the modesty of the assumed boy and the real woman.

Nothing could be better than Mrs. Keeley as *Maria*, and Mr. Keeley as *Sir Andrew Aguecheek*. His sottishness and his cowardice had all the richness of caricature, without its excess. Mr. Harley, also, in the *Clown*, was both amusing and edifying; and Mr. Ryder, in *Antonio*, rough and honest. The other characters were cast as well as the state of the theatrical market at present permits; and the whole, with the magnificent scenery and dresses, passed off triumphantly. The house was exceedingly crowded.

On Monday Mr. Kean himself stood forward as a candidate for histrionic honours, in his own theatre. His choice of a part was judicious, "*Hamlet*, the Dane." Mr. Kean, even in his salad days, was celebrated for his characterisation of the reflective Prince; indeed, the performance was always highly meritorious. Mr. Kean has of late very much improved as an actor. His impulses have been chastened, and his general style artistically subdued. Many of his mannerisms have been cast aside altogether, and the facility acquired by great practice has given to his bearing on the stage a gentlemanly ease, in which he is unmistakably unrivalled. Mr. Kean is now entitled to take rank as an undisputable artist; and, in his recent improvement and most marked progress, has shown an amount of intelligence and skill which entitles him to the peculiar and highly honourable character of an intellectual one. His *Hamlet* is strikingly primitive. The scholar and the gentleman are portrayed with an intensity and force, such as indicates a special aptitude, and a decided genius for characters combining grace, intelligence, and impulse. Since Mr Farren's, no *Hamlet* has shown such minute study, such delicate shading, such polish, such subtle manipulation, and high finish as Mr. Kean's. Always rapid, forcible, and elegant, it is sometimes (and more frequently than not) the scene with *Ophelia* deserves, for the latter quality, to be especially distinguished. It more than approaches to an equality with his father's; and for power to affect the soul deeply and mysteriously, far excels any other actor's effort in the same trying situation. That one scene alone would justify us in accepting Mr. Kean as a great actor.

The performance of Hamlet was enhanced in interest by the assumption of the part of *Ophelia* by Mrs. Kean. We are glad to see the managerial vulgarity of putting the *nobody* of the establishment into this *rôle* thus repudiated. Mrs. Kean's conception of the character is beautiful and pure, abounding in pathos and effect. The episode in the fourth act was powerfully executed—a combination of idiocy and inspiration most psychologically rendered.

The subordinate characters were remarkably well filled. *Polonius* was represented by a Mr. Addison, whose humour, though not yet fully developed, is of a quaint and quiet sort. Mr. Fisher, in the *Ghost*, was not sufficiently monotonous and sepulchral in his tones: indeed, his emphasis was most abundant and marked. Mr. Wigan, in *Osric*, was an exquisite of the first water. While Mr. Harley and Mr. Meadows, in the two *Gravediggers*, were, in their humour, ignorance, and presumption, first-rate. The scenery in Elsinore is capitally painted by Day and others, under the superintendence of Mr. T. Grieve, and the appointments and mise en scene generally were duly appropriate.

The rest of the entertainments at this theatre consist of a new farce, entitled "Paton & Attachments," by Mr. Bernard; and a new ballet divertissement by Mr. Flexmore, with music by E. Rigbye. The farce was clever enough, and well supported by the Keeleys and Mr. Wigan. The former are a new married couple, occupying a suburban villa and garden, the husband being under promise to cut his old bachelor acquaintance, which pleases for a twelvemonth he has kept. At home a pattern of fidelity; in London, however, he still indulges his Platonic propensities, lending umbrellas to ladies in the rain, one of whom has forgotten to return the parasol entrusted to her. *Mr. Thistledown's equadoon* again appears soon, however, on the scene one *Tom Rawlings* (Mr. Wigan),—in pursuit of *Mrs. Thistledown*, whom, as usual, he has been persecuting with his attentions during her solitary walks. He manages to gain himself on the premises, by his knowledge of the umbrella affair, from the consequences of which, however, ultimately he manages to save the husband, when both lady and umbrella enter on the scene as old acquaintances of the wife. *Miss Ellen Meadows* (Miss Harley) is the object of *Thistledown's* flirtatious admiration. The evidence against him of the umbrella is ingeniously disposed of by *Tom's* screwing the handle of it on to his own, which happens to have engraved on its point his name and address at full. *Mrs. Thistledown's* perception that *Tom* affects his fun to some purpose; and the affair concludes with a ludicrous platitude, uttered by Mr. Keeley with becoming solemnity.

The ballet is decidedly the best representing an incursion of satyrs, led by Mr Flexmore, on a bevy of nymphs. Mdlle. Carlotta Leclercq and Mdlle. Auriol were the principal performers, and did the spiriting with remarkable grace and [illegible] of expression. Altogether, the amusements of the evening were of a superior kind. The house has been cleaned and re-gilded. All the properties are new.

SADLER'S WELLS

The tragedy of "Macbeth" has been reproduced, with all the gorgeous appointments of last season. The arrangement of the banquet scene, moreover, has been much improved, and nothing new can work better in the whole Mr. Phipps, as usual, was careful and judicious in the management. Mr. Glyn, on the contrary, has made a great start in her performance of the ambitious wife, by the introduction of some new and startling effects, as admirable in conception as they are bold and daring in execution. In grandeur and impressiveness her *Lady Macbeth* has never been exceeded. Before the end of the first act, her interviews, and particularly the final one, became not only terrible but appalling. The opening soliloquy, also, was delivered with a new point that was perfectly thrilling. The words

> And shall be
> What thou art promised,

were delivered with a prophetic vehemence and an intense emotion which foreshadowed the whole tragedy. The sleep-walking scene had, also, been restudied, and, with many new readings, it was both fine and grand. Wonderful as her acting in the part was, still more wonderful is the rapid progress of her conception, which makes on the reproduction of any character to which she has previously devoted her extraordinary energies.

SURREY.

"Macbeth," with Locke's music, was revived on Monday. Mr Creswick, in *Macbeth*, was impressive, but too didactic. Miss Cooper's *Lady Macbeth* was a good and correct reading: for the want of *physique* to embody a character of such weight, she is of course not respectable.

MUSIC.

RHUDDLAN ROYAL EISTEDDVOD.

(From our own Correspondent.)

RHYL, Sept. 30.

The proceedings of the North Wales Musical Festival were brought down to the afternoon of the 26th instant, in the ILLUSTRATED LONDON NEWS of last Saturday. Of the proceedings of the accident in the morning, the Hall was crowded to excess, the committee having made strenuous exertions to remove the painful impressions produced by the fall of the central compartment of the second gallery. The concert was for Mr. Sims Reeves, in Sir H. Bishop's ballad, "My pretty Jane;" Miss M. Williams, in "My Childhood's happy Home;" and Mr. Ellis Roberts, in his fantasia on "Codiad yr Ehdydd," on the Welsh harp. The solo players were Mr. W. Rea (flute) and Mr. Horatio Chipp (violoncello). The overtures were Rossini's "William Tell," Mozart's "Figaro," Weber's "Jubilee," and Mr. Williams's bardic overture, repeated by desire, instead of Auber's "Gustave."

The performance of Handel's "Messiah" on Friday, under the leadership of Mr. J. Chipp, was highly satisfactory. The Chorus of the Liverpool Philharmonic Society sang with remarkable spirit and precision. The band, although small, was effective; and if there had been an orchestra, the general execution would have challenged comparison with many interpretations of higher pretensions and greater numbers. The venerable President gave the signal for the overture of "Hallelujah" chorus with the same energy that he conducted it, Chipp, and M. Williams: Messrs. Sims Reeves (who was very powerful) and Machin. In the evening, in the midst of a south-wester, which made the sea on the Rhyl beach one vast sheet of foam, the Lady Jenkins, Viscountess Fielding, Hon. Mrs Lloyd, Hon. Miss Essex Lloyd, Hon. Mrs. Rowley, and Hon. Mrs. Heaton. Amongst the stewards who were most active and polite in their attentions were Lord Mostyn, Hon. R. T. Rowley, Sir Watkin W. Wynn, M.P., E. L. Richards, Esq. (the Conway), John Williams, Esq., M.P., C. W. Wyatt, Esq., &c.

The dancing was kept up till four in the morning, although not without apprehensions from the visitors, the rain penetrating through divers parts of the brick watertight roof, and the very floors were completed among the canvas covering at the north-eastern entrance, and almost smothering a "special."

It was intended to have ended the festival on the Friday with the ball; but, owing to the interruption in the proceedings on Thursday, by the accident, an extra morning was fixed for Saturday, in order to award the remainder of the prizes. The Gorsedd for conferring degrees in the most of the Castle, on Friday morning, was not uninteresting. The form of initiation and ordeal by the Druids, but omitted the ancient mode of choosing, and also the archdruid, whose enthusiasm produced always a most ludicrous burlesque. Mr. Brandreth, who demanded an investigation into his plans to exonerate him from blame for the accident, and the editor of the *Carnarvon Herald*, who asked for three cheers for the ladies of the House of Mostyn, which were heartily given, although the speech of the editor, owing to some metaphors, provoked no little risibility. The awards for the prizes were duly made for arts and manufactures, for education and for music. The aspirants for the place-seeking prizes, and the Penullion singing, reflected the highest credit on the late degree; nothing could be worse than the specimens offered to the latter. But Pennillion must not be judged by the incompetent exponents at the Eisteddvod. Any amateur party, such as that which Robert Williams, Esq., of Glynllivon, the Member for Macclesfield, could never have believed that such horrible exhibitions as those made by Saturday's candidates, were those of ready and able Pennillion singers When properly executed with wit, which, indeed, is the sine qua non of musical success, the improvisation is really agreeable. It was nearly six o'clock before the Eisteddvod terminated. The visitors to this memorable meeting did not disperse before to-day (Monday), when the truly hospitable reception given to guests and strangers by the local gentry.

Our thanks are due to the noble president, Lord Mostyn, to the committee and chairman, to the honorary secretaries, to the railway forces at the Rhyl station; and to Mr. Atkins, the conductor, for their valuable aid during the Eisteddvod: and from what we could gather to-day, the Engravings in Saturday's Numbers will be highly appreciated by the visitors. The Pennillion singers, and engraved within such a brief period, created no small astonishment; the station and visitors' office at Rhyl were quite besieged all Saturday by the applications.

The Eisteddvod has now passed away, and we may be thought of the exhibitions of individual intolerance, of bardic bigotry, of patriotic perversity, of isolated illiberality, and of national nonsense, every Englishman who attended this Eisteddvod must have felt the severest sympathy for the spirit that intended this Eisteddvod must have felt the severest sympathy for the spirit that intended this Eisteddvod must have felt the severest sympathy for the spirit that int

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

On Friday night week, the Marquis of Hastings, who is an ensign the 52nd Regiment, now stationed at Liverpool, fell into one of the docks in that place, and narrowly escaped drowning.

The Manchester subscription of working men to the national monument of Sir Robert Peel amounts to £180, subscribed by thirty-six unemployed men, besides which there are still 260 subscription lists in the hands of the canvassers, which should increase the number of subscribers to at least fifty thousand, and the subscriptions to upwards of £360.

Upwards of £500 have been subscribed towards a monument to the poet Wordsworth.

M. Jacquand, the celebrated France portrait-painter, has just finished a full-length portrait of the Nepaulese Ambassador, and a copy of it is to be placed in one of the galleries at Versailles.

The London penny savings bank has 7859 depositors, with 49,516 deposits; and the amount received since its establishment has been £3017.

Cardinal Cerra Cassano died at Rome on the 15th ult. He was created a cardinal in 1841.

The number of missionaries despatched from England at the present time are: By the Church Missionary Society, 137; Society for Converting Jews, 78; for the Propagation of the Gospel in Foreign Parts, 394; Wesleyan Society, 363; Baptist Society, 100; Missionary Society, 171; Scotch Churches, 190, various other religious bodies, 100: total, 1438.

An importation of a cereal grain, resembling Indian corn, but of a smaller and whiter description, having taken place from Jaffa, and some doubts existing as to its liability to duty, the case was submitted to the consideration of the authorities. It was decided by them, after the inspection and hearing the opinion of the trade, that the grain was admissible free of duty.

A balloon is at this time being made in the grand orangery of the Luxembourg, Paris, under the direction of MM. Barral and Bixio, in which these gentlemen intend to follow up a course of studies of the atmosphere. This balloon is 66 feet in height, and 45 in breadth, and, if filled with pure hydrogen, would be capable of carrying up about twenty persons, with carbonated hydrogen it will take up ten or twelve.

An interesting discovery has just been made near Fontenay, between Soissons and Compiegne (France). A great number of Roman antiquities having been found in digging, the workmen were instructed to continue, and soon came to the foundation of Roman buildings, covering a surface of more than 30,000 metres, and divided into more than 300 rooms or cells.

W. B. Beaumont, Esq., of Bretton Hall, has given orders to his keepers and tenants to destroy every head of game they meet with. Hitherto the game has been strictly preserved.

An otter, weighing 24 lb., was shot on Wednesday, under the Stoke Railway bridge, near Brampford Speke.

Three whales were seen in the Clyde on Wednesday week, one of which is described as of enormous size. A number of sharks and sturgeons have recently been seen in the same river.

Last week, an old man on crutches, between eighty and ninety years of age, trespassed upon the South Wales Railway, near Skewen, and was knocked down by one of the carriages, and had his leg fractured in two places. He died in the course of a few hours.

The hop-planters of Worcester and Hereford are about to join the planters of Kent and Sussex in soliciting further indulgence from the Government for the payment of the remaining moiety of the 1848 duty, which at present is required by the 18th of October.

The Austrian, Prussian, Bavarian, and Saxon governments have just entered into a convention with regard to the electric telegraphs, by which a common tariff has been adopted, reducing the expense by about one-half. This new tariff was to come into operation from the 1st inst.

A grand exposition of agricultural produce will be held at Versailles, on the 6th inst., in the grand Square in the Place d'Armes, opposite the Palace. It is expected that the show of oxen, sheep, and horses will be unusually fine.

About 600 hands in the employ of Sir Elkanah Armitage, an extensive manufacturer of ticks, nankeens, &c., have turned out, and refuse to recommence working until they are paid "according to the same rates for the same work that is given at other manufactories."

The Queen's Hotel at Cheltenham, which cost £47,000 including the land, and the original rental of which was £2100 per annum, was offered for sale by auction last week. The highest bid was £14,900, and it was bought in at £15,000.

A private of the 17th Regiment (France) has been condemned to death by a court-martial, for having surrendered his arms to the insurgents on the 13th of June, 1849.

The large printing manufactory near Thann, Haut Rhin, was destroyed by fire on the 15th ult. More than 200 workmen are thrown out of employ.

On the 1st of September the hundredth anniversary of the erection of the Spanish and Portuguese Jews' Synagogue took place in Kingston (Jamaica). On the same day a black female, who recollected the erection of the building, died at the very advanced age of 150 years.

On Monday a provision in the New Factory Act (13 and 14 Vict., cap. 54) came into operation. Power is given by the 6th section to employ young persons and females above the age of eighteen years from seven in the morning until seven in the evening from the 30th September to the 1st April, under certain regulations.

Thomas Fortescue, Esq., of Ravensdale Park, has struck off the munificent sum of £100 from this year's rent of the farm held by Mr. William Bell, of Christianstown, in consideration of the failure of his potato crop. The extent of the failure was submitted to valuation. An act like this supplies its own forcible comment.

On Saturday an half-intoxicated madman, named Williamson, threw himself from the road over the High Level Bridge at Newcastle, into the river Tyne, a height of 86 feet, and, strange to relate, he swam about apparently unhurt until picked up by a boat which put off to his rescue. How he managed to undress, and unnoticed accomplished the stupid feat, appears very singular, as the bridge is generally thronged with foot passengers.

Liverpool and Glasgow are simultaneously engaged in discussing projects for the erection of new Post-offices and the removal of old powder-magazines—rather a curious coincidence.

No definitive arrangement has been arrived at between the Town Council of Liverpool and the car proprietors of that town. The dispute, therefore, as to the amount of fares is still *in statu quo*.

John Hackway, a veteran gipsy, digger of Bideford, near Exeter, aged eighty-four, has, through blindness, relinquished his under-sextonship to his son-in-law, John Bradley. He was fifty-eight years sapper and miner to the mausoleums there, and during his operations in the churchyards he has witnessed the interment of nearly 5700 persons.

Madame Poitevin, the wife of the well-known aëronaut, a few days ago, at Paris, made a balloon ascent from the Hippodrome, on the horse which her husband employs. She was dressed in a riding habit, and, before starting, paraded round the Hippodrome. She rose slowly, amidst the applause of the spectators. Her husband and another person were seated in a car placed above her.

It is stated, that, owing to reductions in the number of hands employed, and the late strike on the Eastern Counties Railway, there are between 200 and 300 railway hands of various classes in Stratford alone without employment.—*Essex Standard*.

Workmen are at present employed in placing posts along the ostroi wall of the Left Bank of the Seine, Paris, to support the wires which are to lead from the central office to the terminus of the Orleans and Lyons Railways. On the line from Paris to Orleans and to Tours the works are so far advanced, that in a few days electrical telegraphic communications may take place between Paris and Tours.

The mansion-house and lands of Priorbank, Melrose (Scotland) were sold last week to W. Tait, Esq., late publisher of *Tait's Edinburgh Magazine* for the sum of five thousand guineas. Priorbank was purchased by General Hugh Gowdie, Commander of the Forces in India about forty years ago.

The Rev. Mackenzie Walcott, M.A., of Exeter College, Oxford, has been appointed evening lecturer and curate of St. James's, Piccadilly.

There has been another explosion at Little Usworth Colliery, in which five of the workmen have been severely burnt, but all of them at present survive.

On Sunday, two privates of the 15th Regiment were landed at Gravesend, from the ship *R. Seppings*, brought from Calcutta, as prisoners, charged with the murder of a policeman some time previous to their enlistment in their regiment. Their names are Andrew Daly and James M'Fadden.

Two fires occurred in Liverpool on Saturday night. The extensive oil-works of Messrs. Bankcroft and Co., in Upper Frederick street, were burnt to the ground, as it is stated that the stock is not insured. The other fire which was less extensive, occurred at a small inn near Dale-street, and a child, four years old, was burnt in its bed.

The Duke of Argyll's gamekeeper at Inverary Castle has a Skye terrier bitch, which along with her pups is giving suck to a young otter.

An excursion train passed through Southampton on Tuesday on their way to London from Dorchester, consisting of 78 carriages drawn by 3 engines! They were two hours behind time. 900 persons were left behind on the Dorchester line, for want of accommodation.

In the neighbourhood of Cupar (Scotland), lately, a bottle containing a quantity of beer, as an enticement to lead the insects into a snare, was hung up against a wall covered with fruit, which the wasps threatened soon to destroy, and in one day 376 wasps were drowned by this mode.

On Friday week, William Adams, aged sixty-six, an inmate of Marylebone Workhouse Infirmary, was found in one of the water-closets, his throat lanes protruding from his stomach, which he had cut across with a razor. The torture which he endured from triple strangulated hernia drove him to the commission of this dreadful act.

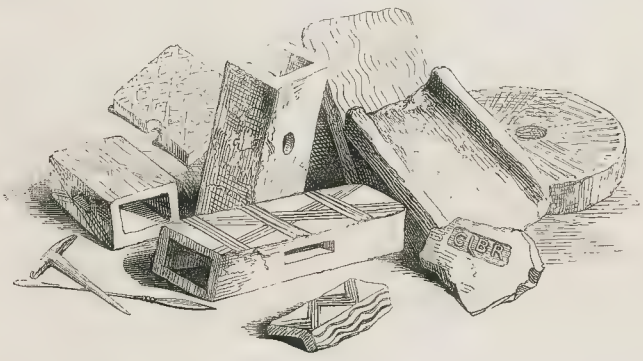
ROMAN REMAINS DISCOVERED AT LYMNE, KENT.

with the aid of the local knowledge of Mr. James Elliott, of Dymarch, and the subscriptions of some few zealous antiquaries, determined to excavate the hitherto unbroken ground of the *castrum*, and determine its ground-plan and the nature of its interior buildings. The walls were traced round three sides of the square; the east and west being perfectly straight and parallel to each other, while the north differed in a very remarkable manner from those usually seen in Roman towns; it made a circuit forming a half-octagon, with towers at its angles. The fourth side was open to the sea; the walls enclosing an area of about twelve acres.

In trenching round the walls, and particularly in digging where there was scarcely a trace of walls at all above-ground—that is, on the eastern side—the most curious features of the *castrum* developed themselves. The buried walls here presented an appearance which indicated that the place had undergone some extraordinary convulsion of nature, which fully accounted for the antique tradition of its overthrow. The ground is peculiarly liable to land-slips, and the whole portion of it on which the Roman town stood, at a very distant period, probably about the twelfth century, has sunk downwards towards the sea, breaking the wall into fragments, and thrown it out of position so thoroughly,



FLUE-TILES, QUERN, AND OTHER ROMAN ARTICLES FOUND AT LYMNE.

that in one part it appears like a pavement on the ground; but the most curious fragment is the great gateway, which stood on a platform of large squared stones, still retaining the marks of carriage-wheels, and which have been so displaced by the sinking of the ground beneath them, that they assume the appearance of a flight of steps. The two large round towers on each side of the gate have fallen—one outwardly, the other inwardly; but such has been the tenacity of the mortar with which the stones have been secured, that none are displaced, although the foundation-stones are snapped asunder by the fall.

The walls being thus traced entirely, it was determined to trench upon the rough and unbroken ground in the interior of the *castrum*, and a little to the south-west of the great gate alluded to a Roman building was discovered; and, subsequently, another of larger dimensions, exhibited in our Engraving. An extensive hypocaust ran under the floor, which was supported by columns formed of layers of large tiles at regular intervals: the walls are constructed of stone and layers of tile, and the arches in them turned with tiles, in the same manner as at Rome, and the ancient cities where the Romans held sway, such as Treves, Verona, &c. These hypocausts have been usually considered as baths, but there can be no doubt that they constituted the Roman method of warming the houses in these cold climates. The pavement was entirely gone, but upon the walls of the circular portion of the room was still remaining a thick layer of stucco, upon which might yet be traced the colour and pattern of the border of ornamental painting which had once enriched them. The walls of the outer room seen to the left of our Engraving show very distinctly, by the irregular line of tiles in it, the nature of the land-slip which destroyed the Roman town, and its effect on the walls. In excavating these houses, an abundance of broken pottery, glass, keys, fibulæ, and many minor articles were found, as well as a considerable number of coins, the larger number being those of the Constantine family, and of Carausius, the successful Roman General who usurped the British throne.

The group of remains exhibited in our second Engraving consists partly of the square hollow flue-tiles which ran up the sides of the apartments, and distributed warm air through the houses; the ornamental sides of these tiles were placed outwards, that they might rather adorn than disfigure the rooms. A quern is also exhibited made from the lava quarried at Andernach, on the Rhine, and famed in the Roman days, as well as since, for this peculiar strata. The T-shaped clamp on the ground at the other side is one of the many found bracing different parts of the walls; the ligula beside it is one of the many articles of a miscellaneous nature exhumed. The tile bearing the letters C. L. B. R. is of the rarest and most curious kind; and Mr Smith inclines to consider it the stamp of the *Classiarii* or *Classici Britannici*—the British troops trained to sea warfare.

It is to the untiring energy and perseverance of Mr. Roach Smith that we owe these discoveries; and he has been assisted in them by none of our Antiquarian Societies, but solely by the subscriptions of a few zealous friends. A meeting of these gentlemen and others interested in the cause was held on the 26th of September, when Lord Strangford and about forty other gentlemen accompanied Messrs. Smith and Elliott over the scene of their excavations, and afterwards dined together at Hythe, the evening being devoted to animated and intellectual discussions on the scenes of the day. From one of their number (Mr. F. W. Fairholt, F.S.A.) we have obtained the Sketches he then made of these relics of the Roman era in Britain, to engrave in the present page.

SHIP LAUNCH AT DUNDEE.

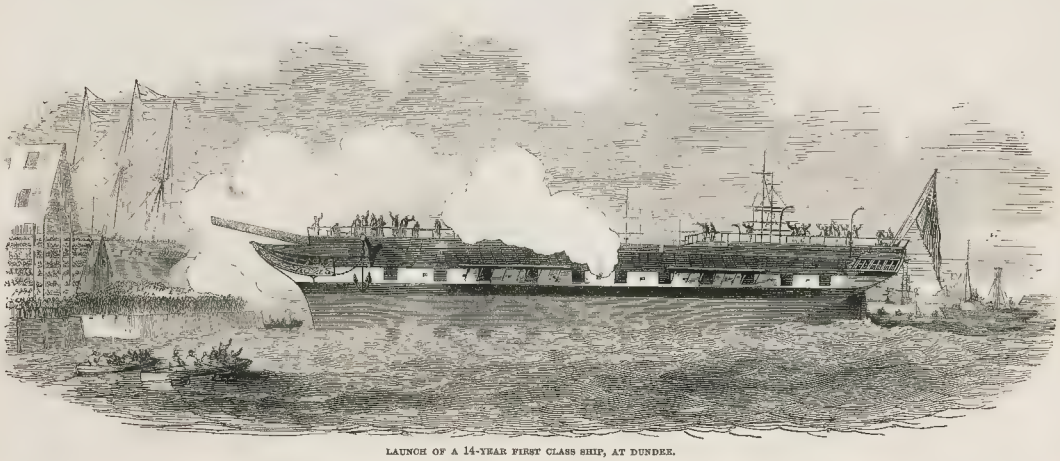
A fine ship was launched from the building-yard of Mr. A. Stephen, at Dundee, on Monday week. The launch was advertised a few days previous, when it was stated there would be platforms erected for the accommodation of the spectators, and that no charge would be made for admission; but that a collection would be taken for the benefit of the Industrial Schools, the scholars of which were marched down to the yard, and were gratified with a sight of the ceremony.

The day was fine, and there was an immense concourse of spectators. Among those present were Lord and Lady Kinnaird, the Hon. Mr. and Miss Ponsonby, Sir John Ogilvy, Bart.; Geo. Duncan, Esq., M.P.; and W. C. Lindsay, Esq., of London. The Dundee instrumental band was on board, and played several airs during the afternoon. At four o'clock, everything being in readiness, the shores were knocked away, and the vessel glided gracefully into the water, amidst the cheers of the assembled crowd, the firing of guns, and the music of the band.

The dimensions of the ship are as follows:

Length of keel	145 feet.
Length on deck, about..	150 feet.
Breadth of beam	31 feet 6 in
Depth, about	21 feet.
Registered tonnage	800 tons.

She is of the best British oak and teak, fastened throughout with copper bolts, and will class 14 years A 1. She was built under a shed, being the first vessel ever so constructed in Scotland; her finishings are in style, and reflect the highest credit on her enterprising builder, Mr. Alexander Stephen, who has another large vessel of 850 tons in course of building, for Mr. Lindsay of London.



LAUNCH OF A 14-YEAR FIRST CLASS SHIP, AT DUNDEE.

NEW CHURCH IN ALDERNEY.

The inhabitants of the Island of Alderney have long experienced the want of church accommodation. They possessed only one church, and this both small and mean, and quite unworthy of the place, which is populous and increasing in importance, not to mention that it is the seat of a little independent Government, with its executive and civil courts, and its military establishment, &c.—quite a model of a larger community. This defect has been supplied by the munificence of one individual, the Rev. John Le Mesurier, only son of the late General Le Mesurier, formerly hereditary Governor of the island. Mr. Le Mesurier is not resident in the island, but his family connexion with it, and his deep feeling for the religious improvement of the inhabitants, has led him to spend a sum not much short, probably, of £8000, in providing them with a large and dignified church on a new and greatly improved site. Such munificence deserves special record. It is not an event parallel only with the rebuilding of a church in an English village, but one which in such a place stands alone in the history of the island; whilst it possesses great interest beyond that attached to it by the natives, both of Alderney itself, and the Channel Islands generally.

The new Church is dedicated to St. Ann, and is built with stone from the island quarries, with Caen-stone finishings. It is in the early pointed style, and cruciform in plan. The extreme length within the walls is 116 feet; its width 60 feet; and from the base to the top of the spire is a height of 100 feet. The nave measures 72 feet by 25 feet; the north and south aisles, 47 feet by 12 feet 9 inches. The width inside the transepts from the nave is 25 feet by 23 feet; and the chancel, which has a circular end of a radius of 12 feet, is 32 feet by 25 feet. The Church contains 660 sittings for adults, and 183 for children, being a total of 843; 409 of which are proprietary sittings, the remainder being free. It is warmed by a hot-air apparatus erected by Messrs. Wilder and Sons, Yield Hall Foundry, Reading.

The interna. appointments are very chaste. Over the porch, on the south side, is a well-executed sculpture, representing the "Good Shepherd" bearing on his shoulders a lamb. The communion-table is of oak, richly carved. The font, which stands on the right of the western or grand entrance, is of Caen stone, with the cross, the dove, and the monogram I.H.S. sculptured on the sides and pillars. The windows are of stained glass, by Mr. Wailes, of Newcastle; they are adorned with various scriptural illustrations. Under the triple window, at the west end, are six brasses, containing memorials of the Mesurier family, and the dedication-plate, which describes the edifice to have been erected to carry out the intention of the late John Mesurier, Esq., and Martha his wife. "In fulfilment of their purpose, this Church has been erected to the glory of God, by their only surviving son, John. The first stone was laid 24th September, 1847. The Church was consecrated August 21st, 1850. 'Thine, O Lord, is the glory.'—1 Chronicles, chap. 29, ver. 11."

The main entrance to the Church is from New-street, on the right going downwards. There is also an entrance from Grosnez-street, from which a good view of the Church is afforded.

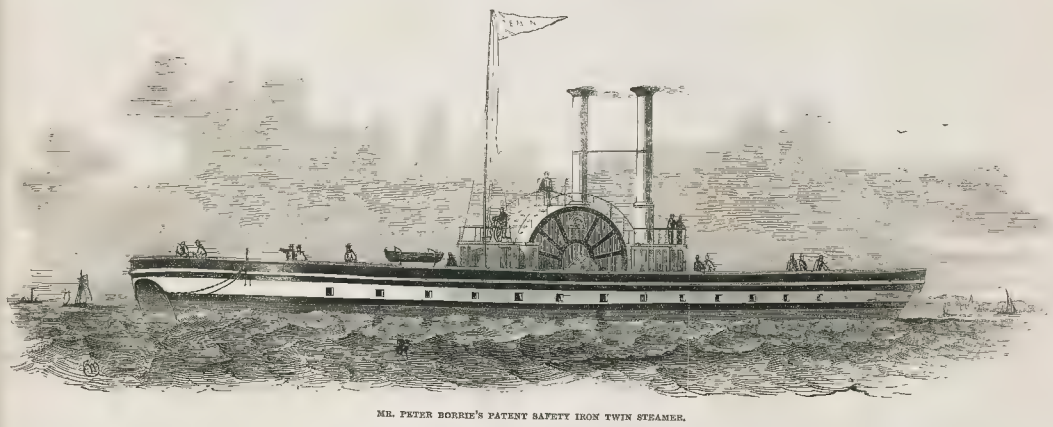
Mr. Scott, of Spring-gardens, London, was the architect of the Church, which was erected under the direction of Judge Gandion. Mr. Hunt—a young man of great promise in his profession—was the original superintendent of works, but died during the progress of the same, and now lies within the quiet churchyard of St. Michael. He was succeeded by his brother, who has had the satisfaction of witnessing the completion of an edifice that has been universally admired.

NEW CHURCH OF ST. ANN, IN THE ISLE OF ALDERNEY.

THE "GEMINI" IRON TWIN STEAMER.

In our Journal of last week we duly reported the trial trip with this new steamer, the invention of Mr. Peter Borrie. At the same time, we gave the leading dimensions and peculiarities of the vessel. She is stated to be adapted for carrying goods, passengers, cattle, and all sorts of vehicles, and either for river or ocean navigation.

This vessel, as represented, is chiefly constructed of iron, having two separate hulls placed side by side, with a space between them in which the paddle-wheel works, and strongly connected together at the deck (which passes over all), and also by a plate-iron arch and stays between the hulls. The hulls thus joined afford a great extent of deck room with a very small amount of tonnage, or of resistance from the area of the section passing through the fluid; and, as both ends are exactly similar, the vessel will sail with equal facility either way without turning.



MR. PETER BORRIE'S PATENT SAFETY IRON TWIN STEAMER.

The keels and stems are not placed in the centre of the hulls, but are situated towards the inside of them, thus making the water-lines very fine on the inside, so as to diminish the tendency of the water to gorge up between the hulls, which is found to take place in twin steamers as commonly constructed; and which gorging up of the water not only tends to separate the two hulls, but also greatly increases the resistance of the vessel in passing through the water.

The inner bilges of the two hulls are much fuller than the outer ones, and thus afford a greater degree of buoyancy on the inside, which is necessary in order to support the weight of the deck, &c., between the hulls.

The vessel represented is one adapted for river navigation, at a high degree of velocity; but a vessel required for a ferry or for sea-going purposes would be made broader in proportion to her length, according to the trade in which she was to be placed.

The steamer shown in the Engraving is 137½ ft. long, and 26½ ft. broad on deck; each hull being 8½ feet broad, with a space of 9½ feet between them. The frames are of angle iron, and are spaced, the outside plating being securely riveted to them. The keels are formed by curving the plates downwards, so as to form channels for the bilge-water inside of the hulls; but in sea-going and other vessels, where the draft of water is greater, Mr. Borrie makes the keels of iron bars, and rivets the garboard strakes upon them in the usual way. The plating is not carried to the top of the frames on the inside of the hulls, except at the space in the middle for the paddle-wheel; but is carried up to the deck, so as to form an arch between the two hulls, which are also bound together with iron stays at the springing of the arch. The deck-beams are of T-shaped iron, securely fastened at the ends to the frames, and at the middle to the top of the arch. The deck-planks are fixed to these beams by screws passing through the flanges of the beams, and are caulked and made water-tight in the usual way. Each of the hulls is divided into compartments by water-tight bulkheads, as already explained. There are also two fenders formed of angle iron, one at each end, to prevent boats, &c., from getting into the canal or space between the hulls. The deck is bounded by bulwarks, which have two large gangways on each side, hinged at the lower side to the decks, and lifted up or lowered by winches attached to the bulwarks. On each end of the paddle-box are a number of deck-houses—a cook-house, with apparatus in it for cooking by steam; a state-room, a dining-room, engineer's room, &c. On the top of the deck-houses and paddle-box is a platform, or hurricane deck, upon which the steering-wheels are placed, and this being properly railed in, may be used as a promenade for passengers.

The vessel having to sail with equal facility either way without turning, is fitted with a rudder at each end. The rudder is in the middle of the canal or space between the hulls, and is formed of an iron plate upon a shaft or spindle coming up to the deck, which shaft is not in the centre of the plate, but at about one-third of its length from the one-side, so that the pressure of the water against the rudder acts partly on both sides of its centre of motion; but when the rudder is left free it will always accommodate itself to the direction of the vessel's motion, on account of having the one end longer than the other from the centre of motion.

The steering-wheels are placed on the top of the paddle-box in the middle of the vessel, and thus the man at the wheel, from his elevated position, has a clear view of all objects in the way of the vessel, and steers her accordingly. The clear area on deck for passengers, including the hurricane deck, above the accommodations at each end of the paddle-box, is about 2600 square feet; and the area of the cabin floors is about 600 square feet; so that there is ample accommodation in the vessel to carry from 800 to 1000 passengers with ease and safety.

TENANT-RIGHT AGITATION IN IRELAND.

MEETING AT KILKENNY.

There are two circumstances in the condition of Ireland deeply to be deplored. First, the landlords have used their power most hurtfully, and pushed it to dangerous extreme. Next, the success of Mr. O'Connell and his practices has begotten a habit of agitation that has become a second nature to a great num-

GREAT TENANT-RIGHT MEETING AT KILKENNY.

ber of persons. The country is now never free from one kind of demagogical strife or another, and the one now afoot meets great support because it is directed against the unpopular landlords. Nominally, it purports to be for Tenant-right; and, if the tenants themselves had originated it, we should be disposed to regard it at least with deference, if not with favour. But it seems to have been begun by the Presbyterian clergy, and with them are now associated the Catholic priesthood. Both seem to regard the landowners as their common enemy; and they are using the tenants now, as formerly, to attain some ends of their own. At a meeting held at Enniscorthy, Wexford, on Tuesday week, the principal persons present, whose names we happen to possess, were the following, and from the list our readers may form an idea of the agitation going on:—Rev. Mr. Barry, P.P.; Rev. D. Bell, Presbyterian Minister, Ballybay; Dr. M'Knight, the editor of the *Banner of Ulster;* Rev. John Rogers, Presbyterian Minister, Comber (the three latter gentlemen composed the northern deputation); Frederic Lucas, John Shea Lalor, Charles Gavan Duffy (members of the council of the Tenant League invited to attend), Rev Mr. Parle, C.C., Rev. John Keating, Camolin; Thomas Sinnot, Enniscorthy; Rev. John Colfer, Rev. J. Hogan, C.C., Wexford; Rev. C. Kenny, C.C.; Rev. Thomas Roche, C.C., Enniscorthy; Rev. N. Walsh, C.C., Enniscorthy; Rev. James Fanning, Kilmore; Rev. William Murphy, Enniscorthy; Rev. E. Prendergast, Adamstown; Rev. P. Prendergast, Askamore; Rev. J. Scallan, Galvally; Rev. T. Connick, Ballaghkene; Rev. A. Kehoe, C.C., Ballaguiria; Rev. F. Haver, P.P.; Rev. E. Doyle, P.P., Monegorr; Rev. P. Dunne, Rathmure; Rev. Denis Doyle, Poulpeasty; Rev. Walter Lambert, C.C., Tughmon; Rev. J. O'Brien, Cranford; Rev. P. J. French, P.P., Kilrush; Rev. J. Doyle, C.C., Glenbrickeen; Rev. P. Doyle, P.P., Kilcormon; Rev. John Keating, Newbawn; Rev. Thomas Stafford, P.P., Ballygarret; Rev. J. Cullen, C.C., Moyglass; Rev. D. Kenny, Ballygarret; Rev. P. Neville, C.C., &c.

Some of the same parts took the lead at the great meeting at Kilkenny on the following day, of which we give a Sketch. Amongst the persons present were Messrs. C. G. Duffy, Lucas, Dr. M'Knight, H. J. Monaghan, Dr. Cane, the Rev. Mr. O'Shea (Callan), P. S. Bulfer, Esq., M.P., the Rev. Mr. Keeffe (Callan), Rev. Dr. Bell, Rev. Mr. Rodgers, T. S. Lalor, Esq., and George Fuller Precisely the same parties, therefore, took the lead at both places, and no "local *hide* tenant was conspicuous. To these agitators must be added Mr. Serjeant Shea, a *Wax Privat* barrister of the metropolis. He admitted that his home and the sphere of his duties were in England, but, being in Ireland, and connected with it, he lent himself to the agitation. The learned gentleman was in debate, and evidenced that the first principle of the League was the substitution for the *present exorbitant competition* rack rents, prevalent throughout the greater part of the south of Ireland, of "a fair and just rent," to be *ascertained by a fair and impartial valuation.* The second principle was *the fixity of tenure:* that was, security to the tenant, so long as he continued to pay the rent which had been fixed by valuation, that he should not be disturbed in his holding.

From the appearance at all the meetings of the same parties, we look on the Tenant-Right League as got up by professional agitators. At the same time, as there exist in Ireland all the materials for a successful agitation, and as very lamentable grounds for the landlords prevail, as the peasantry, particularly in the south, have both in the laws and customs of Ireland some just grounds of complaint, the agitation might be formidable, did not the conflicting interests and hostile feelings of the leading men, each the sphere of his duties were in England, but, being in Ireland, and connected with it, he lent himself to the agitation. The learned gentleman was in debate, and evidenced that the first principle of the League was the substitution for the editor of the *Freeman's Journal*, and his brother, have in the last week withdrawn from it, and it is threatened with dissolution. It is peculiarly the curse of Ireland, though it is also the curse of other countries, that the sufferings and wrongs of the people are always made the stalking-horse to the designs of schemers; redress is delayed, and humanity continues to suffer more from the injudicious conduct of the pretended friends, than from the tyranny of the avowed enemies of the people.

It is indispensable that the land should be owned in perfect property, untrammelled by artificial regulations. It is so in the United States. Land is, in a great measure, coming into that condition in Ireland. The Sale of Encumbered Estates Act will, of itself, do much to effect it. Under what conditions it shall be hired or let will then be, as it has generally been, and ought to be, determined by a mutual contract between the owner, if he use it not himself, and the hirer. All that can be asked of the Legislature or of the State is to enforce that contract against either of the parties to it who would violate it. Tenants must know, or ought to know, to what extent the land will be rendered more productive by their exertion than when they came in, and ought to consider that circumstance in their contracts. For unexhausted improvements all tenants are entitled to adequate remuneration. But when they have not stipulated for such remuneration, and their lease expires, they must depend for it on the landowners' generosity, or any custom that exists for the regulation of tenancy. In the north of Ireland there has long existed a custom which gave the tenantry a full right of property in their improvements, and they would sell these as the landlord sold his land. In its course, however, of the last thirty years, the great extension of the linen manufacture in the north of Ireland, though little has been said about it, for we hear much more of the misery than the prosperity of that country, has very much increased the value of land there. This great additional value has given rise to a contest between the landlords and the tenants as to who shall possess it: other parties have stepped in, and caused the dispute for their own purposes. Of course, the landlords, as the leases have fallen in, have demanded higher rents. In those they have obtained them, but in some, the tenants, founding on their customs, have refused the claimed the whole additional value as belonging to them, and have refused the landlord all share of it. We are not of those who think such a question can be settled off hand. There is a great difficulty in deciding to whom shall belong the increased value which all lands acquire by the increase of wealth, industrious population; but it is not to be settled by political agitation. Some persons have proposed that it shall belong to the State: in that we do not coincide, for all property is individual, and must belong to individuals; but it may be common and proportion, must in a great measure be determined by their own exertions and contracts. The Tenant League has no doubt on the subject. A union of Presbyterian parsons and Catholic priests demands the whole for the tenant, equally excluding the landowner and the landlord from any share. Competition, according to Mr. Serjeant Shea, speaking in the language of the Communists, is to be done away with, and for that is to be substituted the principle of "every man to his power, they called "live and let live," but which meant "enable me to live in splendour, and you may starve." Flattered by their leaders, the tenantry go in part with the agitators. The notable project of fixing rent by a valuation, and giving the benefit of all improvements to the tenant, is to be effected generally by an Act of Parliament, but the Legislature is to be constrained to pass it. Other men than the landlord or tenant, by their mutual agreements, are to "settle the fair valuation of rent." The light of *mutual bargaining* is to be denied to both parties, and the terms of leases are to be settled by Act of Parliament. When the rent of land is so settled, the wages of labour and the price of bread must be settled in like manner; and if the League be successful, we shall go back to the principles of a maximum and minimum price for all things, to be regulated by Act of Parliament. This contemptible and unjust scheme is to be carried out by threats, if not by actual violence. At the meetings we have referred to, members of Parliament are distinctly told by the clerical agitators that they must come into their scheme or resign their seats. For the first time in history, the Presbyterian clergy and the Catholic priesthood have combined, and have now combined for the purpose of spoiling the landlords and imposing restrictions on the free use of land. They take advantage of a temporary dispute between landlords and tenants, when the suspension, or the a temporary dispute between landlords and tenants, when the suspension, or the boggling of the market, would soon settle, if not interfered with to effect an unworthy object. They make a pretext of serving the long-suffering and disto [illegible] people, who will be excluded from all the benefit of the transaction. Before the farmers of Ireland can be much consolidated as they have of late years, the pretext might pass, but now the scheme would benefit only a few tenants. The proposed scheme would hamper the soil anew recently released from legal fetters, and would be equally fatal to the freedom of tenants and landlords, and to the future prosperity of Ireland.

The meeting to which our Sketch refers was held at Kilkenny on the 25th ult., in front of a building called the Thalsel. The enthusiasm of the people did not suffice to make them stand some coarse weather, and the meeting was prematurely brought to a close. It was, in other respects, like meetings of the same kind that are now being held in various parts of Ireland, at all of which the same parties adopt the same resolutions, to obtain an Act of Parliament to settle the value of the land, and to collect money for the purpose, were agreed to.

His Royal Highness the Duke of Cambridge left town on Saturday evening, for the Continent.

A marvellous story is related in the *Coleraine Chronicle*. A poor man being pressed for the amount of certain sureties, and having no money, declared that he would dig in the earth for the amount. He commenced digging in his cottage, and after digging some time turned up a pot containing many specimens of Roman coins, to the amount of upwards of two hundred pounds, which, on being washed and counted, were found to amount to more than £40

In the Cavan Infirmary, on Saturday last, it appears, by the verdict of coroner's jury, a man named James Jones died by the application of chloroform, preparatory to the operation of amputating his leg, the soporific having been applied at his own desire.

Irish Produce.—A vessel arrived in the river from Dublin, has brought 30 bags of peat charcoal as part of her cargo, the produce of the Irish soil.

Poachers' Fund.—The Mansfield poachers have become so numerous, that, to "mure themselves against emergencies, they have actually established a "protective fund."

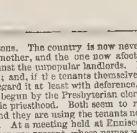
Consequences of not using the Davy-Lamp.—A collier in one of the mines at Holme Firth, Yorkshire, partshed a few days since, from an explosion of fire-damp, caused by his own folly. He had occasion to enter a draft-way which had not been lately used. Here, of course, if anywhere, was likely to be an accumulation of foul air. Although Davy-lamps were provided for the use of the miners, the rash man, with his naked candle, penetrated the recess. The place was full of fire-damp. An explosion took place, by which he was thrown down senseless, and so injured that he soon expired. Several other men had their lives endangered.

Mrs. Graham descended in her balloon last week near the Temple-mills, in Hackney-marshes, in while with several assistants she was endeavouring to discharge the car, a party of brickmakers and several rough characters assembled, and a man belonging to the party was suddenly thrown into the air, which was immediately burst by the concussion, occasioning considerable injury, which was immediately burst by the concussion, occasioning considerable injury to the sails of the length of about six yards, all which, in addition to the damage done to the net-work, will require at least £20 to repair.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

CHANDOS, LORD LEIGH.

This distinguished nobleman, whose poetic fame was achieved, and sanctioned by the leading critics of the day, when he had no lordly honours to propitiate favour, was the only son and heir of the late Jas. Henry Leigh, Esq., of Adlestrop, county Oxford, and Stoneleigh Abbey, county Warwick, by Julia Judith his wife, eldest daughter of Thomas, Lord Saye and Sele. He represented the great rich inheritance of

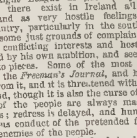


house of Leigh, of Adlestrop, and possessed, besides, the stately mansion of Stoneleigh, with its fine old mansion, its luxuriant park, and its broad and fertile acres. (*See the Engraving.*) His elevation to the Peerage dates in May, 1839.

Thus largely gifted with wealth and power, his Lordship won for himself, by the kindness and benevolence of his character, his noble patronage of literature, and his own able contributions to the poetry of his country, a fame and a reputation which few in his elevated station have attained

His Lordship was born 27th June, 1791, and married, 8th June, 1819, Margarette, daughter of the Rev. William Sheppen Wilkes, of Astrop House, co. Northampton, son of Judge Wilkes, by whom he leaves issue three sons:—1. WILLIAM HENRY, present and second Lord Leigh, born 7th January, 1824, who is married to Caroline Amelia, third daughter of the Marquis of Westminster; 2. & 3. Hon. Chandos, born 22nd December, 18-2; and, 4. James Wentworth, born 31st January, 1838; and seven daughters, of whom the eldest, Julia-Anna Eliza, is wife of Charles Bowyer Adderley, Esq., of Hams Hall, co. Warwick, M.P., and the third, Mary, of the Hon. and Rev. Henry Pitt Cholmondeley

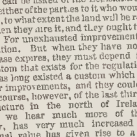
The first of the Leighs who possessed Stoneleigh was Sir Thomas Leigh, Lord Mayor of London in 1608, who obtained a patent of confirmation of the whole estate, together with the manor, in the fourth of Queen Elizabeth. This Sir Thomas derived, in a direct descent, from Sir Piers Leigh, of Lyme, who was knighted at Chester, in 1399, by order of the Duke of Lancaster, for his adherence to his royal master. In later times, the loyalty of the Leighs and of Stoneleigh was conspicuously displayed. Charles I. was entertained Sovereign shone again conspicuously. Charles II. was entertained at Stoneleigh with dutiful affection, and in after years, when the Stuart dynasty was displaced, the Lords Leigh steadily refused bearing any part in a world that had rejected the race of its predilection; nor have they ever take their that had rejected the race of its predilection; nor have they ever take their place in Parliament, but lived at Stoneleigh amidst the portraits of the Stuarts, secluded from busy life and amusing themselves with rural sports, as if they had been a new kind of lay hermits. The name of Chandos the deceased had been a new kind of lay hermits. The name of Chandos the deceased Lord Leigh died on the 27th ult., at Bonn, on the Rhine, after an illness of ten days



GUSTAVUS LAMBART, ESQ. OF BEAU PARC, CO. MEATH.

The death of this gentleman, the representative of an eminent branch of the noble house of Cavan, occurred very recently abroad. He was son of the late Charles Lambart, Esq., of Beau Parc, by Frances his wife, daughter of James Lenox Naper Dutton, Esq., of Sherborne, and grandson of Gustavus Lambart, Esq., M.P. for Lifford, whose grandfather, the Hon. Oliver Lambart, of Painstown, county Meath, M.P., was third son of Charles first Earl of Cavan

Mr. Lambart was born Sept. 16, 1772, and had consequently just completed his 78th year. He married Anna Butler, daughter of Sir John Steven son, and has left these two sons and two daughters. He was a magistrate for Meath and Westmeath, and a Deputy-Lieutenant of the former county



The Baroness Brunow [illegible] left Ashburnham House, [illegible] Viscount and Viscountess [illegible] are staying. [illegible] days.

Lloyd's Register.—It is understood that the committee for Lloyd's Register Book contemplate an amendment of [illegible] part of their rules which makes the period of launching new ships the date of their build, a change which will give general satisfaction. Hitherto ships, completed as they usually are in the month of September or October, have been kept on the stocks till the January succeeding, to enable the builders to obtain a full year's classification, in addition to the period which may be assigned to the ships as standing A 1. The effect of this practice, it has been clearly shown, has been, not only to expose the ships to deterioration during the winter months, but to prevent shipbuilders, for a time, from undertaking fresh engagements, and likewise to throw a number of people out of employment during the time the building slips are unprofitably occupied To obviate these evils, the shipbuilders at Sunderland, Leith, Aberdeen, and Dundee have laid strong memorials before the Lloyd's committee as have been deemed irresistible; and, if we are correctly informed, it has been, or will be immediately, decided that ships launched in the last quarter of a year will be allowed the date of build of the following year. This entirely removing the objections which have been so properly urged against a continuance of the existing system.

The Borough Market.—The half-yearly report of the trustees of the Borough Market was submitted on Monday to the ratepayers of St. Saviour's, Southwark, at their annual Michaelmas vestry, and showed a very prosperous result The accounts, brought down to the preceding Saturday, exhibited a gross receipt during the six months of £2604, including the balance at the banker at the commencement of the period. Trustees had paid over to banker at the commencement of the period. Trustees had paid over to the over-seers, in aid of the poor-rate, a sum of £1067 7s. 10d., and there was now a balance at their bankers' of £1117 11s., which would be applicable to the same purpose. The trustees also possessed £2841, invested in the Reduced Three per Cent. Consols The report was unanimously approved, and a resolution was passed, authorising the trustees to pay over to the over-seers, in aid of the poor-rate, the amount which stood to their credit at the bank. Mr. Richards, "the warden of the [illegible]mmn," who presided at the meeting, observed that it must be very gratifyin to the parishioners to know that such a valuable assistance to the poor-rate was undoubtedly due to those gentlemen who had been instrumental in bringing about this result, whereby the poor-rate was relieved to the amount of upwards of £2000 a year.

COUNTRY NEWS.

Representation of Windsor.—Mr. Hatchell, whose promotion to the office of Attorney-General for Ireland has been announced, will again offer himself for the representation of Windsor, and with every certainty of being re-elected.

The Queen's College, Birmingham.—On Saturday week last the Marquis of Lansdowne, the Lord President of the Committee of Council on Education, visited the Queen's College, and was received, in the absence of the Warden, by the Dean of the Faculty, Dr. D. Davies, Mr. Edward Townsend Cox, Mr. Edward Armfield, and other members of the Council. His Lordship inspected the chapel, library, and students'-rooms, and expressed himself highly pleased with the arrangements. The college has been inspected during the week by the Hon. Spencer Lyttelton, the Rev. Dr. Peel, Dean of Worcester, Mr. William Gladstone, the Rev. Boyer Adderley, the Rev. Vaughan Thomas, the Rev. J. Ellis, and other influential friends of education.

The Duke of Richmond's Sheep Sale at Gordon Castle.—The Duke of Richmond's extensive domain is studded with beautiful flocks of the finest Southdowns and Leicesters in the county of Banff (Scotland), and from the Duke's stock nearly all the breeders in the north have drawn their best blood. The Southdowns at Gordon Castle are all descended from his Goodwood stock, known to be of the highest character, and he has been in the habit of occasionally sending from England some of his best rams, in order to keep up the purity and value of the breed. As regards the Leicesters, neither pains nor expense have been spared in selecting and purchasing the best tups from the finest stocks in the south. His Grace has disposed of his surplus stock at intervals by means of public sales, and one of these, announced some time ago, took place at Gordon Castle on Thursday week. As might be expected, there was a numerous attendance of breeders belonging to this district, as well as several from a distance. The Duke was present on the ground during the day, as were also the Duchess and Lady Cecilia, with Dr. Hair, &c. The sale took place in a field adjoining the farm-steading. Mr. Cantly, Keithmore, was auctioneer and judge of the sale. The stock was generally admired, and appeared in excellent condition, doing not a little honour to the care and skill of Mr Bell, the manager of the home farm. Of the Leicester breed, 120 ewes and gimmers were exposed, and sold at 22s. to 30s. a head. Several tups were also sold, which brought from 40s. to 80s. each. Of the Southdowns, 90 ewes and gimmers were put up, also in lots, and all disposed of, at prices varying from 22s. to 37s. The prices were all considered good. At the same time two very fine short-horned bull calves were disposed of Mr. M'William, Sheriffstown, bought the one at £24 10s.; the other was purchased by Mr. Proctor Farnham at £16.

Great Sale at Yanwath Hall.—The first great sale of the Messrs. Parker's stock took place on Thursday (last week), in a field adjoining Yanwath Hall. The sale was decidedly a good one. The bidding was brisk, and Mr. Wetherell displayed energy and decision in the stroke of his hammer. The whole of the stock was acknowledged by first-rate judges to be in capital order, and the sale was conducted in the most handsome manner throughout. The result, we should suppose that the Messrs. Parker had no reason to complain of the prices. The entire were cleared off by the evening, and there was no attempt to buy in, though in one or two instances, no doubt, the proprietors would have given double the price paid. The cows averaged 22 guineas; the highest price was 53 guineas for a young bull, Pathfinder; the next was 51 guineas for Bucolet, which price was considered very cheap. Mr. Bolden bought the first, and Mr. Angus, of Bromley, the second. The sheep, which were excellent, averaged between 50s. and 55s. a head. The general price for ewes was about £3; gimmers about the same. Lambs, at about 45s. apiece. The higher-priced tups were £13. Pigs were considered very dear, one or two fetching large prices; the average was about £9 per piece. Calves were rather small, and young, and a heavy downpouring at the time they were put up evidently depressed the sale

Freemasonry.—The Right Honourable Lord Combermere, the R.W.P.G.M. of Cheshire, is understood to have fixed the 23rd instant for the assembling of the grand lodge of free and accepted masons of this province. The meeting is to be held at Birkenhead; and, after the transaction of the usual business, the brethren will attend Divine service at St. John's Church, when there will be full cathedral service, and a sermon preached by the rev. incumbent. The banquet will take place at the Monk's Ferry Hotel, at which the noble Lord will preside.

Howden (Yorkshire) Great Horse Fair.—The business of this annual horse fair, the largest in the kingdom, commenced by pre-arrangement amongst the principal dealers and purchasers on Thursday week. At no fair of late years has there been a larger show of horses or a better attendance of foreign and of home buyers. Some of the best hunters have been purchased at high prices varying from £100 to £200; carriage horses were eagerly sought for, and have gone off at from £50 to £100; good nags, £70 to £80 each. This important mart is the grand *dépôt* for the supply of the army, as the head quarters from the various cavalry regiments have been present, amongst whom were Lord Cardigan (11th Hussars), Colonel Shewell, Major Edwards and Captain Shaw, &c. Messrs. Dyson, Dickenson, and Collins, from Horncastle, Captain Shaw, &c. Messrs. Dyson, Dickenson, and Collins, from Horncastle, Partridge, Captain Shaw, &c. Messrs. Dyson, Dickenson, and Collins, from Horncastle, Partridge, Irwin

KING'S SCHOOL, SHERBORNE.—Active preparations are being made to commemorate the 305th anniversary of the foundation of the King's School in Sherborne, which was founded in the fourth year of King Edward VI., and, therefore, in the year 1550. A very influential committee has been formed for promoting the celebration, on which are the names of the warden and governors, the Earl of Eglsey, the Earl of Ilchester, the Right Hon. the Vice-Chancellor Knight Bruce, Sir W. C. Medlycott, Bart.; G. Bankes, Esq., M.P.; H. K. Seymer, Esq., M.P.; J. Floyer, Esq., M.P.; the Right Hon. Sir S. Marsh Phillips, R. Gordon, Esq.; the Rev. H. F. Yeatman, Dr. Lyon, Dr. Cox; J. Goodden, Esq.; G. Harbin, Esq.; J. Bruce Pryce, Esq., and many other distinguished gentlemen, formerly pupils at the school, or immediately interested in its welfare. The Bishop of Gloucester and Bristol, who is the visitor of the school, has been requested to preside on the occasion of the festival, and the Right Hon. the Vice-Chancellor Knight Bruce, who, with his brother, the late Dean of Llandaff, were pupils at the school at the beginning of the present century, to deliver the commemorative address. The festival is to take place on the 23rd of the present month.

THE FOURTH ANNUAL CONFERENCE OF THE EVANGELICAL ALLIANCE commenced at Liverpool on Wednesday, under the presidency of the Rev. William Withers Evans, M.A., incumbent of St. George's Church, Everton. There were about 200 ministers present (besides the general audience) including the clergymen connected with the Established Church and dissenting congregations.

THE PROPOSED PUBLIC HALL IN LEEDS.—A short time ago an effort was made to erect a public hall in Leeds, capable of holding 5000 persons, at a cost of £10 each. Last week about £8000 had been raised in shares towards £15,000, and so unfavourable were the prospects of raising the additional sum that the project was abandoned by its promoters. On Monday last, however, the subject was brought under the consideration of the Town Council by Mr. Edmund Wilson, who proposed the erection of a town hall, at a cost of £70,000, to be raised by a rate on the inhabitants. A discussion took place on the subject. No opinion was expressed against it by the members of the council, but it was thought desirable to postpone any action in the matter until after the municipal elections in November next, and on this understanding the motion was withdrawn.

Three thousand labourers are at present engaged prosecuting the works of the Birkenhead Docks.

That periodical visitor, the floating island in Derwent Lake, Keswick, made its appearance above the surface of the water in the course of last week, after having been submerged exactly twelve months.

A FAMILIAR DEFIANCE OF TRESPASSING ON LANDS IN HIS OWN OCCUPATION.—Mr. Charles Royston Wood, at the recent special sessions at Bromyard, by John James Payne, gamekeeper to William Barnaby, Esq., and others, the executors of the late John Barnaby, Esq., with having been, on the 14th September, in pursuit of game without a license, from the lands of the said William Barnaby, Esq. The defendant is a tenant upon the estate of the complainants. Mr. T. Devereux attended for defendant, and stated, that he was instructed by him to say that he (defendant) did take a dog called Rabbit and a live hare out of the traps which had been laid by the gamekeeper; the hare he set at liberty, and the rabbit he took home. Defendant was not pursuing game, but going over his farm he found the rabbit and the hare caught in the traps, and he thinks it any harm to take it home. The Bench convicted the defendant in a nominal penalty, and 10s. costs.

DESTRUCTIVE FIRE IN LEEDS.—Last Sunday night a fire occurred in Leeds, which resulted in the destruction of a scribbling mill, at New Road, belonging to Mr. David Cooper. The local fire-engines were on the spot with all possible dispatch, but their efforts to arrest the progress of the fire were almost totally unavailing. To the adjoining property (several very large and valuable mills), to which the fire several times threatened to extend, they were nevertheless of great service. The flames did not subside until after the complete consumption of all combustible materials, either in the composition of the mill itself, its machinery, or stock; in fact, only the bare walls, and those in a very skeleton form, remain. The loss amounts to several thousand pounds, which is partly covered by insurance. The origin of the fire is not known.

EXTENSIVE SEIZURE OF STOLEN JEWELLERY.—Mr. Beswick, superintendent of the Manchester police, has made an extensive seizure of jewellery in that town, the proceeds of a robbery committed several months ago in Halifax. It appears that on the 14th of July last the shop of Mr. Baierlin, Halifax, was robbed of a large amount of watches and jewellery, and from that time to the present no trace of the thieves had been obtained, but on Sunday Mr. Beswick went to a lodging-house in Ashley-lane, Manchester, and there found a box containing a large portion of the property, including 44 gold and silver watches, 31 gold pins, 6 gold and 8 silver pencil-cases, 23 gold mourning rings, some brooches, diamond rings, and various other valuables. Just after the box had been left there by a female giving the name of Ellen Moult, nine hours after, and this person he traced to Liverpool, and apprehended on Monday. He recognised Ann as an old offender, her maiden name being Cook. She was brought before the Manchester magistrates on Tuesday, and was ordered to be given over to the Halifax police. There is no doubt she had male accomplices in the robbery, but there is reason to believe they are already in custody for another more serious offence at Liverpool.

INCENDIARY FIRES.—The *Cambridge Chronicle* contains accounts of three incendiary fires in that county during the week. One took place on the premises of Mr. W. Gray, at Ellington, consisting of a cart-shed and stable, the whole premises, including the house, were destroyed, with the exception of the brewhouse and a small outhouse. The inmates of the house had great difficulty in saving themselves from the flames, which burnt with an unwonted fierceness, upwards of £1000 insured in the Sun Fire-office. Another, and still more destructive fire, took place at Stretham, which commenced in a boat stack belonging to the Hon. H. H. Baker, and resulted in a loss of property to the amount of £1000. The third fire was at Basington, which destroyed agricultural produce to the amount of £400.

SINGULAR CASE OF RESTITUTION.—On Saturday an old man called at the door of the post-office at Bridgnorth, and inquired required of Mr. Carter if he did not live in West-street, about fifty years ago, and if he had not, while living there, had a pair of boots stolen out of the shop. The inquiry, of course, startled the old gentleman, who answered in the affirmative. Certain recollection, and he replied that he remembered it, when the old man threw down half a sovereign, saying, "There, they were marked 8s. 6d., and there's the price of them, and 1s. 6d. towards the interest." Having said this, he immediately walked off, leaving Mr. Carter to ruminate on the reminiscences of bygone days.

PAUPER LABOUR.—The Sheffield papers contain a report of the proceedings of the Poor-law Guardians of that union with regard to the employment of pauper labour. Two or three years ago, they leased from the Duke of Norfolk some fifty acres of moorland about six miles from the town, and converted it into a parish farm. A substantial house, capable of accommodating 120 persons, was built with all the appurtenances, at a cost of £1700 or £1800. During the whole period in which this experiment has been in progress, upwards of 900 heads of families have found casual employment on the farm. The result of the first year of trial is the loss of £45, being a proportion of this sum to the cost that would have fallen upon the rate-payers had the relief afforded to the numbers, who had been thus furnished with labour, been given in the workhouse. It is expected that the produce of the farm, during the third or second year, will cover the cost of maintenance to those who have been employed upon the farm; and there is every prospect, judging by the results of the second, as compared with the first year, that the third and fourth years will show a considerable surplus over the entire expense of the establishment. The experiment is interesting, chiefly as evidence of the fact that pauper labour can be made remunerative

A very alarming and destructive fire broke out on Thursday night week, at the Grove, near the floating Larbour, Bristol, and, notwithstanding the efforts used to subdue it, it could not be got under until the premises occupied by Mr. Humphrey, corn merchant, Messrs. Whitwell and Lewis, ship chandlers, Messrs. Smith and Downing, provision merchants, and Mr. E. Reed, sail maker, had been gutted, and considerable damage done to a house in Queen-square, occupied by a pensioner Bayford, as a lodging and boarding house. The fire broke out on the premises of Messrs. Whitwell and Lewis. The total damage cannot be estimated at less than £6000

A bust of the late Mr. Vernon, from a few artists and admirers of Mr. Vernon's private gallery to the country, has just been placed in the entrance-hall of Marlborough House. It is the work of Mr. Behnes, who has produced a most striking and spirited likeness of the deceased gentleman, upon the present fail to be immediately recognised by all acquainted with his features. Independent of this resemblance, the bust bears to the original, is excellent regarded simply as a work of art. It stands on a square pedestal of sienglobe, whereon are inscribed the names of the contributors, and the purpose of their communal.

The Commissioners of Customs have determined that all craft used in the transhipment of foreign goods, within the port of London must, on and after the 1st of November next, be provided with the necessary accommodation to prevent the trade-waiters from the inclemency of the weather. This step has been found absolutely necessary, many of the men having been frost-bitten, and in one or two instances, during severe weather, frozen to death

The Central Committee of Denmark, for the Exhibition of 1851, have forwarded the Commissioners for her Majesty's Government a report, in this it appears that the Danes propose to exhibit printing machinery, porcelain, painted and bisque; shell-carving, bronzes, clockwork, rifles, musical instruments, furniture, lace, turnings, lithographic plates, oil, clothes, hats, wool-netting, Randers gloves with leather specimens, fur carpets, stearine candles, playing cards, white gine, and stannary.

The great project of piercing the Mont Cenis in the Alps for a monster railway is soon abandoned, and a new plan for connecting those two subsisting railroad from Genoa to Turin, is under consideration. Should it succeed (and the projectors are most sanguine on the subject), it will complete one continued line, with the aid of the Rhine navigation, from Ostend to Genoa, and give our Indian mail a certain route in case of renewed troubles in France.

There was caught at Sansel fishing-water, says the *Berwick Advertiser*, on Tuesday week, a salmon which weighed 43½ lb., and measured in length 4 feet 3 inches, and in girth 2 feet 1 inch. No improvement, it adds, has taken place in the fishing; the quantity taken at present is small, almost without a precedent; the prices consequently continue very high, salmon being 1s. 4d. per lb., grilse is. 1d., and trout 8d.

CHURCH, UNIVERSITIES, &c.

OXFORD.

Term commences on the 10th inst. The Latin sermon will be preached on the 9th inst., by the Rev. Robert Wheler Bush, M.A., of Worcester College, and Head Master of Islington Proprietary School. Many of the colleges meet on Saturday, the 12th.

PREFERMENTS AND APPOINTMENTS.—The Hon. and Rev. W. A. Bouverie, to the Archdeaconry of Norfolk. The Rev. E. Wilmot, to be an Honorary Canon of the Cathedral Church of Worcester. *Lectorer.*—The Rev. J Wilson, to Garsington, Oxford. The Rev. J Cordeux, to Hoyland, near Barnsley, Yorkshire. The Rev. W. Roberts, to Vaynor, Brecknockshire. The Rev. Henry Cleveland, to Ronald Kirk, Yorkshire. The Rev. W. K. B. Bedford, to Sutton Coldfield. *Vicarages.*—The Rev. J. B. Price, to Llanybyther, Carmarvonshire. The Rev. R. O. Hughes, to Llandyfrog and Perpetual Curacy of Blaenforth, Cardiganshire. The Rev. C. Wordsworth, to Stanford-in-the-Vale with Goosey, Berks. The Rev. H. A. Gresne, to Crowle, Worcestershire.

TESTIMONIAL.—The following clergymen have recently received testimonials of respect and esteem:—The Rev. Isaac Parrington, late Curate of Layland, near Chorley, from the teachers and scholars of the Sunday School; the Rev. E. Gease, late Curate of Stanford-in-the-Vale, Berks, from his parishioners.

FUTURE INCOMES OF THE CLERGY.—The Archdeacon of Sarum, at his late visitation, suggested to the clergy the necessity of being prepared for the reduction of their incomes, which must inevitably take place if the present prices of grain continue. Assuming that in the course of six and six following years the average price of wheat would be 40s., barley 24s., and oats 16s. per quarter, he stated that the sum which the tithe-owners would receive for each £100 of rent-charge on their appointment would be as follows:—1831, £100 1s. 8d.; 1832, £93 8s. 3½d.; 1833, £89 14s. 2½d.; 1834, £85 12s. 9½d.; 1835, £77 1s. 11d.; 1836, £74 6s. 4½d.; 1837, £73 4s. 10½d.

VACANCIES.—Bishopric of Brechin, Scotland; Right Rev. J. P. Forbes, seceded Lainston R.; value £74; patron, Sir F. H. Bathurst. Freshfole, Dunstone C., value £15; patron, St. Cross Hospita., Winchester; chaplaincy of St. Cross Hospital, Hants, diocese Winchester; Rev. W. T. Williams, deceased.

There are at present two vacancies at the Board of Ecclesiastical Commissioners for Ireland, occasioned by the deaths of the Bishops of Kildare and Meath.

ECCLESIASTICAL COURTS.—On Tuesday, a parliamentary paper was issued, from which it appears that there are 123 officers, exclusive of proctors, of ecclesiastical courts in Ireland. The fees received in the year ending the 1st of April last amounted to £15,513 9s. 4½d. In 1848 the fees were £.4,367 4s. 4d., and in 1829 they were £12,513 8s. 3d.

Two Orders in Council have been gazetted this week, one for altering the bounds of the district of Burley, in the county of York, and diocese of Ripon; and the other for making better provision for the cure of souls in the parish of Sawley, in the county of Derby, and diocese of Lichfield.

ST. MARK'S COLLEGE.—The Rev. Samuel Clark, vice-principal of this institution, has resigned on the score of protracted ill health.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The English Market opened on Monday with much firmness, Consols quoting 96⅜ ⅜ for Money, and 96⅜ ⅜ for Time. A further improvement to 96⅜ ⅝ for Money, and 96⅜ ⅝ for Account, occurred on Tuesday, arising from a considerable increase of business. On Wednesday, the Market was very active and buoyant, and continued firm until nearly the close of business, when it yielded to sales, and 96⅜ ⅜ for Money and Time became the closing prices. At the opening on Thursday the Market was heavy, and a further decline to 96⅜ ⅜ for Money, and 96⅜ ⅝ for Account, was soon after registered; but a reaction afterwards took place, Consols improving to 96⅜ ⅝ for Money and Time. The unfunded debt quotes as last week. India Bonds are 1-16th in advance. From other securities no alteration is noticed, being on several occasions dearer than for time, some scarcity appears probable, and this must affect prices as the close of the Account on the 15th approaches When the market closed, the last quotations were—Bank Stock, 204; India Bonds, under £1000, 87 p; South Sea Stock, New Annuities, 96¾; Consols for Account, 96⅝; Exchequer Bills, £1,000, June, 63 p; Small, June, 63 p.

A few trifling fluctuations in Spanish and Mexican stocks are noticed, demanding record during the week. Mexican on Monday improved on intrinsic value to 31¼, and has ranged to 31⅜ ¼ and 31⅜; Spanish has varied between 18 on Monday, and 18¾ ⅛; Russian five per Cents have advanced 1½ to 2; Brazilians are 1 to 2; dividends being in course of payment. The various Foreign Securities present no changes of public interest. At the close of the week prices are:—Brazilian Bonds, New, 1829 and 1839, 87¾ x d; Buenos Ayres, Six per Cent., 58; Chilian Bonds, Three per Cent., 65 ex. 3rd Dividend; Dutch Four-and-a-Half per Cent., 103; Mexican, Five per Cent., 1846, ex Jan. Coupons, Account, 31¼; Peruvian Bonds, Four-and-a-Half per Cent., 80¾ x d; Portuguese, Four per Cent., 40; Russian Bonds, 110½; Spanish Bonds, Five per Cent., 97¾; Spanish, Five per Cent., 1840, Account, 18⅜; Ditto, Three per Cent., 38¼; Belgian, Four-and-a-Half per Cent., 91¾.

The Share Market, during the week, and at the settlement for the past fortnight two unfortunate defaulters were announced. As the parties were *Bears* the Market rose, and although after the settlement some reaction took place, the Market, nevertheless, is generally firm, with an upward tendency. The various Railways, York and North Midlands, and South-Westerns, all being in demand. The accompanying list of last prices indicates activity of business:—Aberdeen, 9¼; Birmingham and Oxford Junction (calls duly paid), without guarantee, 20½; Caledonian, 8¼; Ditto, New, £10 Preference, 7⅜; Eastern Counties, 2¼ ⅛; Ditto, Preference, Six per Cents., 11⅜; East Union, Class A, 6¾, Ditto, Class B and C, 4¾; East Lincolnshire, guar. 6 per Cent., 99½; Edinburgh and Glasgow, 20¾; Great Northern, 13⅜; Ditto, 5 per Cent. Pref., 113 x d; Great Western, 59; and Great (Ireland), 30¾; Great Western, 79¾; Ditto, New, £17, 10; Lancaster and Carlisle, 60; Lancashire and Yorkshire, 49¾; Leeds and Thirsk, 11¾; Ditto, Pref Guar., 1845, 9¾; London and Blackwall, 6; London, Brighton, and South Coast, New, guar. 5 per cent., 138; London and Greenwich, 11; London and N. West., 115; Ditto, New Quarters, 19⅜; Ditto, Fifths, 14¾; Ditto, £10 (M. and B.) C. 1, 2, 3; London and S. West., 70¾; Manchester, Sheffield, and Lincolnshire, 18; Midland, 41⅜; Ditto, £50 shares, 13½; Ditto, Con. Bris. and Bir., 6 per Cent., 125; Norfolk, Guar. 5½ per Cent., 4¾ x d.; North Britash, 7⅜, North Staffordshire, 7⅜; Oxford, Worcester, and Wolverhampton, 12; Reading, Guildford, and Reigate, 16¾ x d.; Royston and Hitchin, 7¾; Shrewsbury and Birmingham, 54 dis; South Eastern, 21¾ x d.; South Wales, 24¾; West Yalley, 6 per Cent., Guaranteed, 94¾ x d.; York, Newcastle, and Berwick, 15¾; Ditto, Newcastle Extension, 4¾; Ditto, N. E. Preference, 4¾; York and North Midland, 22½; Ditto, Preference, 7½; Boulogne and Amiens, 8¼; Dutch Rhenish, 3¾; Namur and Liege, 7½; Orleans and Bordeaux, 2¾; Paris and Strasbourg, 7¾; Rouen and Havre, 10¾; Tours and Nantes, 2¾.

FRIDAY AFTERNOON.—The Market for Consols has ruled inactive throughout the day The Three per Cents have marked 96⅝ ⅜, with buyers at the latter figure. India Bonds, 84a, 87a, and Exchequer Bills, 64a, to 65a. premium. Foreign Bonds and Railway Shares support yesterday's quotations.

THE MARKETS.

CORN EXCHANGE, Friday.—A full average quantity of English wheat, 2990 quarters, has arrived for our market this week; foreign, by land carriage (an exception of that grain fresh up to-day were very moderate, nevertheless, the stands were well filled with samples, many of which were in excess of Monday. Owing to the heavy arrivals of wheat and flour from abroad, the demand for all kinds of wheat of home produce ruled heavy, at in some instances, 1s. per qr. less than the quotations of Monday of to-day's market is dull, and lower to purchase. The present price is 32s. per cwt. Otherwise, the trade was very dull, and almost nominal.

Spirits—about 200 puncheons Jamaica rum have changed hands, at 2s 6d to 2s 8d per 30 to 32 per cent. over proof East India kinds are a slow sale. Brandy and corn spirits firm.

Hay and Straw.—Meadow hay, £3 8s to £3 15s; clover ditto, £3 5s to £4 5s; and straw, £1 7s to £1 9s per load.

Wool.—The demand by private contract is steady, and prices are well supported.

Potatoes. The best qualities are selling steadily, at from 60s to 70s per ton, but the demand is by no means active.

Coals. Friday: Stewart's, 16s 6d; Lambton, 16s 3d; Hartpool, 16s; Tees, 16s 6d, South Durham, 16s; Hetton, 16s 6d; Old Tunfield, 17s per ton.

Hops (Friday). Notwithstanding that the show of new hops is daily on the increase, a very extensive business has been transacted in them this week, and prices are well supported. The duty is still called £210,000 to £220,000. The following are this morning's prices:

Mid and East Kent pockets, 90s to 105s; Weald of Kent ditto, 80s to 90s; Essex ditto, 65s to 75s per cwt. Yearlings and old hops are very dull, and almost nominal.

Smithfield (Friday).—Compared with that exhibited on Friday last, the supply of beasts on sale in our market to-day was extensive, and of improved quality. The fresh arrivals amounted to 600 short-horns from the north. The primest breeds were a steady sale, at Monday's extreme rates in the quotations. Otherwise the beef trade ruled inactive, and in some instances prices were the turn in favour of the butchers. The numbers of sheep were seasonably good. The demand for that description of stock was less active, nevertheless late currencies were well supported. Prime small calves were scarce, and quite as dear. Inferior qualities of veal commanded very little attention. In pigs a moderate business was transacted, at full prices. Milch cows, with their small calf, were selling at from £14 to £18 the each.

Per 8 lb to sink the offals:—Coarse and inferior beasts, 2s 4d to 2s 6d; second quality ditto, 2s 6d to 2s 8d; prime large ores, 3s 4d to 3s 6d; prime Scots, 3s 2s. 3s 10d to 4s 0d; coarse and inferior sheep, 3s 0d to 3s 2d; second quality ditto, 3s 4d to 3s 6d; prime coarse-woolled ditto, 3s 8d to 3s 10d; prime South Downs, 4s 0d to 4s 2d; large lambs, 4s 4d to 4s 6d; prime small ditto, 3s 8d to 4s 0d; large hogs, 3s 2d to 3s 6d; most small porkers, 3s 8d to 4s 2d; suckling calves, 19s to 23s; and quarter old store pigs, 12s to 24s each. Town supplies: beasts, 882 cows, 120; sheep, 9490; calves, 378; pigs, 350. Foreign beasts, 224; sheep, 3210, calves, 110; pigs, 97. Scotch beasts, 71; sheep, 42.

Newgate and Leadenhall.—A steady business was transacted here to-day, on the following terms:

Per 8 lb by the carcase:—Inferior beef, 2s 8d to 3s 2d; middling ditto, 2s 4d to 2s 6d; prime large ditto, 2s 8d to 3s 0d; prime small ditto, 3s 2d to 3s 4d. Large pork, 3s 0d to 3s 8d; infer mutton, 3s 4d to 3s 6d; middling ditto, 3s 6d to 3s 8d; prime ditto, 3s 10d to 4s 0d; large veal, 2s 8d to 3s 8d; small pork, 3s 10d to 4s 4d. ROAD REBELLET.

SCOTCH SEQUESTRATION

W M'KENZIE, Edinburgh, commission-agent.

BIRTHS

At Tregoyd, near Hay, Brecknockshire, on the 4th inst., the wife of Lieut.-Colonel Brandreth, of a son.—At Hyrning, near Milnthorpe, Westmoreland, the lady of Lieutenant-Colonel Brandreth, of a son.—At Hartsgrove, near Dorchester, the lady of Captain H Granville Layard, staff-officer of pensioners, of a daughter, still born.—At Fulwood, near Preston, the lady of Captain Ward, 84th Light Infantry, of a son. On Sunday, September 29, at her residence, Rhyl, North Wales, the wife of Ann Asaph, Mrs. L. J. H. Harris, of a son.

MARRIAGES

At Saffron Walden, Thomas Edward Scudamore Stanley, to Ellen Theodora, youngest daughter of the late Rev Nicholas Ball, LL.B, Vicar of Saffron Walden.—At, and of Islington, Cambridge, to Charlotte, youngest daughter of John Turner, Esq., of Gray's-inn, Master in Chancery.—At Bonchurch, Isle of Wight, Thomas, the Rev Digby Seymour, to Harriet Isabella, second daughter of the late Robert Berdow, Esq of the Bengal Civil Service.—At Aberdeen, Nova Scotia, Colonel Butler, of Marlock, to Edith Ann, the youngest daughter of the late Benjamin Cobb Esq, of New Romney, Kent.—At Glenmill, county of Tipperary, Major J M Gun, of the 13th Light Dragoons, to Mary Anne, youngest daughter of the late Joseph Cranfield Ramsden, of the 9th of August, by the Rev. G. J Handfield B.A., Charles Kerr Cameron, of Hill, Ordnance, eldest surviving son of the late Colonel Cheere, Royal Artillery to Matilda Augusta, youngest daughter of the late Rev. Robert Cheere, Rector of the Parish of Wickhambrook, Lackford, Suffolk. Charles Aldrich, Esq., of London and Norwich, to Ann, fourth daughter of Henry Roper, Esq.

DEATHS

On the 12th of June, at Agra, Bengal, Lieutenant-Colonel Hamilton, of apoplexy, Mr Francis Morgan Wasker, surgeon, late of Chesterfield, Derbyshire.—At Heam, on the 8 inst, the Right Hon Llandaff, Lord Leigh, in the 69th year of his age.—At the Rectory Woodham, George Alfred, the infant son of the Rev A H Barker.—Frederick-street, Aberdeen, Jane Dean Nooth, Esq eldest son of Lieutenant-Colonel Nooth, Beaumont House, Stoke, Devonport.—On September 28th, aged 68, Elizabeth Maria, wife of Joseph James Scholey, Esq., of Pall Mall.—In the city of Bristol, surgeon and daughter of the late Chas. Fraser Bristow, Esq., of Kingston, county Limerick, aged 20.—At his residence, Ashton, near Bridgwater, Mr. Wm. Bailey, in his Seventy-fifth year.—At Bath, Wilhelmina Sophia Wilkinson, Esq., deeply regretted by his numerous friends.—On the 4th inst., at Bath, Mrs. Hannah Bradley, aged 84 years, deeply regretted by her family and friends.—At Bath, on the 4th inst., Mrs. Bradley, wife of Bernard Bradley, after a severe attack of paralysis, which she bore with the utmost resignation of an affectionate parent and kind friend in the short space of a very few days.

JENNY LIND IN NEW YORK.

ENTHUSIASM the most unbounded prevailed in New York on the evening of Jenny Lind's first concert at Castle Garden. Full six thousand persons assembled on the interesting occasion in the large saloon, and the applause on the entrance of the Swedish Nightingale was so tremendous and overwhelming, that for some minutes her feelings overcame her, and emotion was evident in the singing of her first piece, "Casta Diva." As the concert progressed, Jenny recovered her full powers, and never her vocal sweetness, expression, and pathos more triumphantly displayed. The concert concluded by her singing the prize song, for which Mr. Barnum had offered a premium of 200 dollars. This was adjudged by the committee appointed to decide, in favour of Bayard Taylor. Thus:

GRELTING TO AMERICA

WORDS BY BAYARD TAYLOR.—MUSIC BY JULES BENEDICT

I greet, with a full heart, the land of the West,
Where banner of freedom is proudly unrolled!
Whose empire o'ershadows Atlantic a wide breast,
And casts its dear mantle o'er realms of gold!
The land of the mountain, the land of the oak,
And where the bald eagle is lord of the air,
Where the souls of the mighty from slumber awake,
And hallow the sea, for where freedom lies dead!

Thus Credit of Empire! though wide be the foam
That severs the land of my fathers and thee,
I hear, from the ocean, the welcome to come,
For Song has a home in the heart of the free!
And long as our waters wash the rocks of the sun,
And long as thy harvests shall wave their sears,
Be the bonds of thy children united as one,
Be the love of the land of the Stars!

It is somewhat singular, however, that the committee are said to have arrived at their decision not so much from the intrinsic merits of the song as because Mr Barnum thought it could be better set to music than any of the others. Otherwise, it is understood that a majority of the committee favoured the following, from the pen of Mr. Epes Sargent, editor of the *Boston Transcript*:—

SALUTATION TO AMERICA

Land of the beautiful, land of the free,
Since her true votaries are slave and
Where no heart had room, but for thee,
Often had mountain, lake, torrent, and
Gleam'd on my waking thought, crowded my
Dream!
Now thou receivest me from the broad sea,
Land of the beautiful, land of the free.

Sculptors for the shall immortalise Form,
Painting illumine, and Poetry warm;
Music for ever all her powers divine
To a heart-service at Liberty's shrine—
Till all thy gifts dearly proclaim shall be,
Land of the beautiful, land of the free.

Hail, then, Republic of Washington, hail!
Never may star of thy Union wane pale!
Hope of the world, may each crown of ill
Fade in the light of thy destiny still—
True may her increase and bounds be,
Land of the beautiful, land of the free.

But if Jenny Lind's wonderful vocalisation astonished and delighted, now more than ever, the munificence rise which Mr. Barnum announced his noble munificence to the charities and other public institutions of New York. At the conclusion of the concert Mr. Barnum came forward, brushing heaps of bouquets before him, for the platform was literally covered with these floral tributes, and spoke as follows:

Ladies and Gentlemen, I have but one favour to ask of you, and that is, that in the pre-

WRECK OF THE "SUPERB," AS SEEN THROUGH A TELESCOPE, FROM JERSEY.

sence of that angel (pointing to the door where Jenny had just passed out). I may be allowed to sink where I really belong into utter insignificance. If there has ever been a moment when I aspired to have the question generally asked, "Where is Barnum?" that time has passed by for ever. I acknowledge frankly, that after such a display as we have had to-night, Barnum is nowhere. But, my friends, I beg to tell you where Jenny Lind is. I shall not speak of her musical talents; you know what they are better than I can tell you: you have shown by your unpreceden applause to-night that you appreciate her incomprehensible and indescribable vocal abilities; but I must announce a circumstance regarding her which I cannot allow you to leave without knowing. She begged me not to do it. On ordinary occasions I would obey her every wish, but I feel it is due to you to state the fact I allude to. Under the contract between Jenny Lind and myself, she is entitled to one-half the net proceeds of every concert given under our agreement. On this occasion the expenses being more for the first concert than will usually be the case, her portion of the profits will be in the neighbourhood of 16,000 dollars. I received a message from her this morning, in which she declared that she would not receive one penny of the proceeds of this concert, but will devote every farthing of it to-morrow morning for charitable purposes. It will be disposed of as follows:—

To the Fire Department, 3000 dols; Musical Fund Society, 3000 dols; Home for the Friendless, 500 dols.; Society for the Relief of Indigent Females, 500 dols.; Dramatic Fund Association, 500 dols.; Home for Coloured and Aged Persons, 500 dols; Coloured and Orphan Asylum, 500 dols.; Lying-in Asylum for Destitute Females, 500 dols.; New York Orphan Asylum, 500 dols; Protestant Half Orphan Asylum, 500 dols.; Roman Catholic Half Orphan Asylum, 500 dols; Old Ladies' Asylum, 500 dols. Total, 10,000 dols.

In case the money coming to her shall exceed this sum, she will hereafter designate the charity to which it shall be appropriated.

The deafening shouts that followed the above speech were absolutely indescribable—many, even among the male portion of the audience, weeping with emotion—and at midnight Jenny Lind was again serenaded by the New York Musical Fund Society. The entire amount received for tickets to the first concert is not exactly known, but it is said to be somewhere from 30,000 dollars to 40,000 dollars. The extravagant price of 225 dollars given for a ticket by Genin, the hatter, was partly, perhaps, by way of an advertisement, and some persons fancy from friendship to Barnum, whose tenant he is.

The following epigram upon the subject is from the *New York Evening Post*:—

> Fair Jenny came across the sea,
> Republicans to flatter;
> Gave up the smiles of Royalty,
> To advertise a hatter!

Jenny's second concert was quite as well attended as the first. The Mayor and other authorities of New York, the Turkish Envoy, who had just arrived, and many other *distingués* were present; and at both there were crowds of citizens from Philadelphia and Boston. The tickets for the second concert sold at from three dollars to six dollars each, and the amount received exceeded 20,000 dollars. Jenny Lind, it is announced, intends devoting the profits of her visit to America to the foundation of schools in her native country, Sweden. At her request, Mr. Barnum was in future to charge only two dollars each for tickets to the seats in the saloon, and one dollar each for what are called promenade tickets.

The third concert had not taken place at the departure of the steamer, but the rush for seats (we are told by the New York papers) on the previous Sunday and Saturday was constant, and the tickets were sold at little less than the former auction prices.

Before the rehearsal for the third concert commenced, Mr. George Loder, on behalf of the Musical Fund Society, presented to Mdlle. Lind a series of resolutions adopted at a special meeting of the society, thanking her for her generous donation, and making her an honorary life member. The resolutions were engrossed upon vellum.

WRECK OF THE "SUPERB."

We regret to find that the loss of life consequent on this most extraordinary casualty is far greater than has yet been stated. Upon a comparison of the passenger list of the vessel, with the names of those saved, it has been ascertained that at least seventeen persons have been lost; and from enquiries which have been made, it is feared that, in addition to these, there were four other sufferers.

The *Superb*, which was left high and dry on the rocks by the receding tide, after the accident, has now disappeared, having sunk in deep water.

A contemporary states that this catastrophe is mainly attributable to the culpable acquiescence of Captain Prianlx in the desire of some of the passengers to pass close to the wreck of the *Folka*. It is also asserted that if the Captain had remained on board and used his authority for the maintenance of order, no one need have had even a wet foot; but that, instead of endeavouring to control the panic, which almost invariably follows such an occurrence, he was one of the first to originate it.

On the arrival of the *Collier* at St. Helier's, with the rescued passengers of the *Superb*, several gentlemen who had witnessed the energy and promptitude with which Captain Asko had acted throughout this lamentable affair, presented to him a handsome silver cup, which was subscribed for and purchased during the progress of his vessel to and from the wreck. They accompanied the gift with an expression of their admiration of the disinterested conduct and devotedness of himself, his mates and crew, to whom, it is understood, similar testimonials will be given.

The carpenter of the *Superb* had a most providential escape, having been floating about for three hours on a grating, when the *Collier's* boat picked him up. Painfully interesting indeed are some of the attendant circumstances o this catastrophe. The two children of Mr. Jackson, who had been rescued from the *Folka* the week before, on first seeing the rocks, inquired what their name was. The reply was "The Minquiers;" but the poor father added, "I think they ought to be called the Folka rocks!" Scarcely had the words been uttered when the vessel struck, and the inquirers were precipitated by the shock into the water and were seen no more.

The accompanying Engraving is from a sketch (by a correspondent) of the *Superb*, as seen through a telescope from the shore at St. Clement's, Jersey, about eight miles distant.

CASTLE GARDEN, NEW YORK.

THE TATE TESTIMONIAL, RICHMOND, YORKSHIRE.

The Grammar School of Richmond, Yorkshire, has long been ranked as one of the first schools of classical learning in England, and is celebrated fo the many

THE TATE TESTIMONIAL, RICHMOND, YORKSHIRE.

finished scholars and good men which it has sent out into the world, especially during the period while it was conducted by the late Rev. James Tate. This gentleman was elected Head Master of the school in September, 1796, and for thirty-seven years had the most distinguished success with his scholars, especially at Cambridge, where they gained more honours than the pupils of any other master. Mr. Tate was appointed, in 1833, a canon of St. Paul's Cathedral, and was succeeded in the School by his son, the Rev. James Tate, a worthy successor of his highly endowed father.

After the death of Mr. Canon Tate, in 1843, his pupils and friends for some time wished that a testimonial, such as they considered due to his eminent services, should exist; and, in 1848, it was proposed to build a school to be called the "Tate Testimonial," and to be used as the Free Grammar School of the borough of Richmond, the old school being in a very dilapidated state. This proposal met with general approbation; and, a committee being formed at Richmond, with the Earl of Zetland as chairman, subscriptions amounting to upwards of £1100 were received from the pupils and friends of the late Canon Tate, including the Archbishop of York, the Earl of Zetland, the Dean of Ely, the Archdeacons of Bristol and Halifax, with many other distinguished names. Mr. Andrews, of York, was selected as architect; and under the superintendence of Leonard Cooke, Esq., the local secretary, the School was completed.

It being thought proper to celebrate the opening of the School with some degree of solemnity, the subscribers were invited to be present and join in the proceedings of the day, which were to terminate with a collation in the large room of the School. The 27th of September (Friday last) was chosen, it being the anniversary of the election of the late Mr. Tate.

The proceedings of the day commenced with a cricket match between the old pupils of the School, and those at present studying there, in which the juniors were victorious in one innings. At half-past two the subscribers and members of the Corporation assembled in the Town-hall, when the Mayor (Robert Robson, Esq.), in presence of the subscribers and a brilliant assemblage of ladies, presented a congratulatory address to his Grace the Archbishop of York, on his re-visiting the scenes of his school days. After this, the Earl of Zetland, as chairman of the committee, placed in the hands of the Mayor a deed transferring the structure to the Corporation, as trustees of the Free Grammar School; and his Worship afterwards put into the hands of the Rev. James Tate the key of the New School. All those who had tickets for the collation now formed in procession, headed by the Archbishop of York, the Earl of Zetland, the Bishop of Ripon, the High Sheriff, the Mayor, &c., and entered the school-room, which was very tastefully decorated with appropriate banners, flowers, and evergreens. The company consisted of his Grace the Archbishop of York, the High Sheriff of the county, the Lord-Lieutenant of the county, the Earl of Zetland, the Bishop of Ripon, the Mayor of Richmond; H. Rich, Esq., M.P.; T. Headlam, Esq., M.P., the Venerable Archdeacon Churton, and eighty clergymen and gentlemen, pupils or friends of the late Canon Tate.

After the collation, several toasts, some having, of course, particular reference to the occasion, were proposed and supported in most excellent speeches by the noble chairman, his Grace the Archbishop, the Lord Bishop of Ripon, the High Sheriff, the Rev. G. Macfarlan, the Mayor of Richmond, Henry Rich, Esq., M.P.; and Leonard Cooke, Esq. The general enjoyment may be conceived when we consider that many old school-fellows met for the first time after an interval of some score of years. After the company had retired, the scholars sa down and enjoyed a feast as only schoolboys can enjoy one.

The following inscription is over the porch of the new school, explaining the circumstances of its erection:—

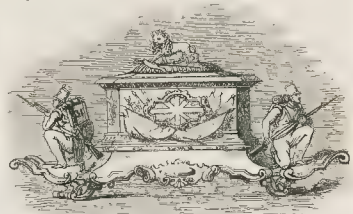
In memoriam Jacobi Tate, A.M., Scholæ Richmondiensis per annos XXXVII summa cum laude Præsidis, postea Eccles. Cin Pauli sp. Londinensis Canonici Residentiarii, hoc ædificium juventuti studiosæ dedicandum discipuli et amici venerationis ergo struendum curaverunt, anno sacro M.DCCC XLIX

On the Monday morning following, the school was opened for use, the Head Master first having read a selection from the morning prayers of the Church.

SILVER INKSTAND.

PRESENTED TO LIEUTENANT-COLONEL SPENCE, C.B.

This elegant Testimonial is from the establishment of Messrs. Hunt and Roskell (late Storr and Mortimer), of New Bond-street; it bears the following inscription:—



Presented to
LIEUTENANT-COLONEL SPENCE, C.B.,
By Lieutenant-Colonel Staunton and Officers of the 31st Regiment,
As a token of their esteem and attachment
On his leaving the Regiment, in which he had served for a period of forty-one years,
With high distinction to himself and honour to his country

London: Printed and published at the Office, 198, Strand, in the Parish of St Clement Danes, in the County of Middlesex, by William Little, 198, Strand, aforesaid.—Saturday, October 5, 1850.

THE ILLUSTRATED LONDON NEWS.

No. 450.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, OCTOBER 12, 1850. [SIXPENCE.

THE ANONYMOUS IN PUBLIC WRITING.

CONSIDERABLE interest is at this moment excited in France and in England by the difficulties into which the French Government has plunged in its attempts to abolish the practice of anonymous writing. The majority of the French Legislative Chamber—jealous of the powers exercised by the journals of the capital, and never reflecting that this power was but the concentration of public opinion, in accordance with, although possibly in advance of it—made a blind effort to destroy the influence of the press, by passing a law that every article in a newspaper should be signed with the name of its writer. Hence their present difficulty, which we, on this side of the Channel, are happily in a position both to be amused at and to profit by.

The question of the anonymous in public writing has often been mooted in this country—and there are not wanting many persons who, with a jealousy akin to that of the French Assembly, or a sensitiveness which cannot tolerate adverse criticism upon their acts or character, would willingly insist that every article in a newspaper should be signed with the name of its writer. The consideration of what has occurred in France will possibly induce many of these to change their opinion, and to be contented with the practice which time and the common-sense of the people of this country have established amongst us.

One of two things, or perhaps both combined, must or may be sought by those who desire a responsible name at the foot of every paragraph or article in a journal. The first is the protection of private character against the slanders of anonymous assailants; the second is the protection of public men from adverse criticism. If it be the first of these two objects, there is no necessity, at least in this country, and none that we are aware of, in France, for the name of the writer. The newspaper in every country has a responsible printer or proprietor, who may be punished for any attack upon private character. In England, where the anonymous in public writing is the rule, attacks upon private character are exceedingly rare; and, when committed, are tried by the ordinary tribunals of the country. We cannot see that the name of "John Snooks" or "John Smith," appended to articles in the *Times* or *Morning Chronicle*, would be a better security that in those articles no man's character was maligned, than the highly respectable names which appear every day as their responsible printers and proprietors. Indeed, it is more than likely that, in such a case, the printer, and not John Smith or John Snooks, would be the person whom the aggrieved party would prefer as defendant in any action at law that he might institute in defence of his outraged honour or reputation. Plaintiffs in such actions prefer men of tangible substance and property to men of straw. If so—and we presume there can be no doubt upon the subject—we may well ask those who wish the names of Smith or Jones to be continually thrust before us, *Cui bono?*

If, on the other hand, the object be not the protection of private character—already sufficiently protected—but the prevention of adverse criticism upon the acts of public men, and the general affairs of the Government, we must first of all enquire whether it could by any possibility answer the end in view; and if it could, whether it would be for the public interest and the interests of civilisation, so intimately bound up with the rights of free discussion, that such should be the result?

It is by this time tolerably well known, that an enlightened public will not tolerate an unenlightened press. The mind of the journalist must keep pace with the mind of the public, or be in advance of it, which it most commonly is; or the literary wares which he offers to his readers will not suit. His journal will not

GREAT EXHIBITION OF 1851.—PROGRESS OF THE BUILDING IN HYDE PARK.

THE progress of the Crystal Palace for the Great Exhibition, next year, is sufficiently advanced to enable us to commence a series of Illustrations by which we hope to inform our readers of the general character and details of the structure, and also of the various ingenious modes and contrivances adopted by the contractors for executing the works with the greatest certainty and rapidity.

Our View exhibits the commencement of the erection of the central avenue, which will present a corridor, uninterrupted, 1848 feet in length, extending from the east to the west end of the building. The most difficult and complicated part of the work is that which is to cover in the old elm trees, more than 90 feet high; and the contractors have wisely determined to execute this part in the first instance. Our View is close to this spot. Semicircular ribs, which will cover the trees, will rest upon columns placed in three tiers, one above the other. The View represents the first series of these tiers, connected together by light cast-iron girders, making squares of 24 feet, or an area of 576 superficial feet. These girders will also support a gallery extending down the whole length of the building, on both sides of the central passage. Underneath this gallery, the squares will form excellent spaces for the exhibition of decorated ceilings of all kinds; and we understand that the Executive Committee are about to announce that these spaces will be placed at the disposal of decorators who may wish to use them for this purpose.

On a future occasion we shall give views both of the ingenious hydraulic press by which the strength of every one of these girders is tested as soon as it reaches the ground, and of the enormous ribs, 72 feet in span—all of which will be completed and ready for fitting this week. There will be sixteen of them, and the last was being finished when we visited the ground.

The foundations of the columns are made of concrete, formed of Dorking lime, and the gravel which is obtained in digging them. Upon the concrete is laid the base of the column, and forming part of it; the lower portion is a hollow pipe, purposed to carry off the rain-water, which will flow down through the columns themselves. Nearly the whole of these foundation vases, to the number of about 1500, will be fixed in their places this week; and thus one of the most important operations will have been safely and conveniently performed in fine and dry weather. Considerably more than half of the whole materials are already on the ground, and every description of the various portions of the building are actively constructing. Upwards of 500 men may be seen busily at work; and, as more castings are supplied, the numbers will be considerably increased.

pay, and there will be an end of him as a public instructor. The History of Europe for the last half-century shows very clearly, that the more enlightened and civilised the people have become, the more enlightened and able is the public press, which reports events and criticises the acts of the Government, and the opinions of the leading men of the state. The press, both in England and in France, however much it may occasionally annoy the over-sensitive, the vain, and the mischievous, and however erroneous at times may be the views which it expresses, is, in the main, the friend of liberty and virtue, the guardian of the public morals, and the vindicator of the public rights. That it could be a better or more powerful friend of liberty and virtue—a more jealous guardian of public morality—a more eloquent, a more pure, and a more successful vindicator of the public rights, if its columns were studded with the names of its reporters, contributors, editors, and correspondents, we cannot imagine. We believe, on the contrary, that it would be much less useful, honest, and respectable, if all these names appeared from day to day, than it is at present. We believe so, because, in this age of publicity, and of constant struggles for fame and notoriety, its independence would be exposed to a continual process of sapping and undermining. The anonymous is the guarantee for the independence of criticism. When a work of art is presented to the public—whether it be a statue or a picture—a poem, a romance, or a history—the name is a portion of the public satisfaction. The public likes to know the creators of such works; and the creators or authors themselves are not generally very much inclined to shroud themselves in the anonymous. But, as regards criticism upon works of art, or upon public events, the name of the critic is of no imaginable interest to the public, while its concealment is in a very high degree of service to prevent the public ear from being abused by the praises of incompetency or of mediocrity. "Dare to say that I have written a bad book, or painted a bad picture, or made a rambling and irrelevant or foolish speech," might be the exclamation of the fifth-rate author or painter, or of the mischievous member of Parliament, to the Smith, the Jones, the Brown, or the Robinson whose name would appear day after day in the columns of the newspapers, "and I will use all the means that society places at my disposal to annoy you in return. I will tell everybody that Jones's father was a costermonger—that Smith has not paid his tailor's bill—that Brown lives on bad terms with his wife—and I will black-ball Robinson, whose name has been put up at my club." But if Jones, Brown, Smith, and Robinson would praise the bad book, the wretched picture, and the illiberal speech, machinery of a different kind would be put into operation, and bribery, direct or indirect, would be employed to render all criticism a farce, if not a nuisance. A great newspaper, as conducted in England, is proof against such threats on the one hand, and such bribery on the other; and art is all the purer, and public opinion all the more enlightened, in consequence. We are, for these reasons, quite sure, that, for the sake of a few thin-skinned people who are never satisfied unless they are lauded as demi-gods, society in this country will never consent to abolish the wholesome practice of anonymous writing. For its abuses there are plenty of remedies: there needs no law in addition to those already in existence. We should be sorry, for the sake of art, for the sake of literature, and for the sake of public liberty, to see the day when English journalism should be shackled with such chains as have been stupidly imposed upon the Parisian journals by the spiteful and unthinking majority of the French Legislative Assembly.

The daily papers during the last week have given many amusing instances of the difficulty of comprehending the law which has been imposed, and of the impossibility of enforcing it. A very simple paragraphs of news are required to be signed by the Parisian penny-a-liners, if they contain the slightest approach to an opinion, but the very jokes and puns of the *Charivari* must not be presented to the world without legal affiliation and proof of paternity. One of the articles of the law requires that every article, "whatever be its extent," shall be signed by the writer; and as the meaning of the word "article" has yet to be defined, our Parisian contemporaries are obliged, if they wish to escape the crushing penalties decreed against infraction of the law, to have a signature to every paragraph of news, to the reports of cases before the tribunals, and to the quotations at the Bourse, as well as to the political lucubrations of their sorely bewildered editors. But in the last-mentioned case, the law, stringent as it may appear, has been evaded. A minister of state, a man high in office, a rich merchant, or a President of the Republic, if he do not wish to appear as the writer of a leading article, has only to speak the leading article in the proper cars, and he may indulge his political predilections, or forward his political views in the newspapers, notwithstanding all the penalties which the law decrees. There will always be abundance of men of straw, who will gladly earn their "penny fee" by writing to the prompting or the dictation of the superior men who wish to remain concealed. In short, even if it were desirable to abolish the practice of anonymous public writing, it is practically impossible to do so. The French law authorities have already made this discovery, and we may, therefore, speedily expect to hear that this notable law has gone to the limbo of all the vanities. A law that is both ridiculous and oppressive in small matters, and that can easily be evaded in matters of larger moment, cannot stand; for if it do not fall amid the public execration, it cannot fail to dwindle into disuetude amid the public contempt. We are, however, not sorry that the French have made the experiment. It is a warning to us, as well as a lesson to them.

THE "PRINCESS MARY" STEAMER.

A passenger who was on board the Boulogne steamer, the *Princess Mary*, has favoured us with the following account of the disasters which recently befel that vessel.

As we steamed out of Boulogne harbour on Sunday night, the wind whistled shrill through the rigging; and when the little steamer plunged headlong into the gargite waste of the Channel, we found old Boreas sadly boisterous. We steamed along through the wild and whirling waters until we arrived about mid-Channel, when we stopped a sea which swept the decks and sent the moistened passengers below, crying with supplications to the steward. At length we arrived off Folkestone, shortly before midnight, and suddenly we were greeted with the inhospitable signal that it would be dangerous to enter the harbour. We then bore away for Dover, when, amidst the howling of the tempest, we saw the Calais mail-boat gallantly enter the harbour; but our Captain, determined that he was not enter Dover harbour, and, to our dismay, gave directions for us to steam along the coast to Margate Roads

The majority of the passengers, like Don Juan during the shipwreck, were "barricadated with ratching," and would have accepted with indifference any fate that awaited them; but when this announcement was pealed into the cabin, some of them raised their heads languidly from their basins and growled terrer anathemas against the Captain. As the men kept heaving the lead, we heard the ominous words, "Two fathoms, sir," and suddenly we struck hard and fast on a rock

The scene which followed baffles all description; but when day began to dawn we found ourselves high and dry on a bit of rock called the "Rest," about three miles from Margate, and connected at low water with the mainland. As it was evident that unless the storm abated the vessel would go to pieces, we determined upon putting the ladies into the boat, and lowering them by the rope on to the rock; the men then followed and we unslipped all the seats round the vessel, and threw them on the rocks; a wooden causeway was thus formed, along which Mrs. Pack and Mr. Lloyd Clayton led the way; also Mr. W. B. Clarke and the remainder of the passengers On arriving at of the causway, the men fetched away the remaining seats, and placed them again before us, and by this tedious process being repeated, the shipwrecked party, headed by the enterprising Mrs Pack, reached the shore in safety.

The luggage was carried across the rocks to a lugger, which lay in deep water, outside the reef, and was taken in the course of the day, to the Custom House And thus we were all saved, and the baggage arrived unimpared. Our escape was absolutely providential.

On Saturday last, about 1 o'clock p.m., Bedford and neighbourhood felt the shock. Its wave extended for [illegible] miles. At Lake Mr. [illegible] sustained [illegible] Mr. [illegible] [illegible] farmers, market-gardeners, [illegible] and labourers, with their wives and [illegible].

THE ILLUSTRATED LONDON NEWS.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Parisians, and the small section of the community that forms "the governing class" in France, never seem at ease except when (paradoxical though it may appear) they have something real or imaginary in the shape of a grievance to trouble them; and at present, for want of better, they have taken it into their heads that the sour wine and sandwiches which Louis Napoleon has given to the troops at the various military reviews which he has held lately, and where he has shown himself so fond of strutting about a mimic monarch 'mid all the glare and pageantry of mighty armaments, are intended to corrupt the army, with a view to their aiding a *coup d'état* which should place him on the throne of France with the title of Emperor

That Louis Napoleon aims at acquiring popularity with the army, there can be little doubt; but that he is so silly as to expect that he can convert the great and the chivalrous army of France into a tool of his ambition by such means, is too monstrous a supposition to entertain for a moment; nor does the Parliamentary Committee, which, during the recess, watches over the public safety, believe such a thing in the least likely; but they wish to make Louis Napoleon feel that he is not a King; and that his acts, however harmless in themselves, may be cavilled at by them, or any other persons in power; that, in fact, they may "snub" him with impunity. Accordingly, on Monday, they had a meeting specially to canvass the subject of his military pic-nics. The meeting was presided over by M. Dupin, the President of the Assembly. General d'Hautpoul, the Minister of War, who had been previously summoned to give explanations with respect to the seditious cries made use of by the troops at the recent reviews, was also present. The cry which had particularly attracted the attention of the committee, and which was the cause that led to the summons of General d'Hautpoul, was that of "*Vive l'Empereur!*" At the commencement of the proceedings several members of the committee complained that the Minister of War should have allowed an unconstitutional manifestation to be made in his presence during the clashing of the cymbals; they asked him what measures he intended to take to prevent the recurrence of such scandalous scenes.

The Minister of War replied, that these alarms did not appear to be deserving the serious consideration of the committee. "Similar questions," he added, "are put to-day in the Assembly. They are there in their proper place, and you ought to leave them there."

This answer drew forth a severe rebuke, both from M. Odillon Barrot and M. Dupin. The latter said, "Monsieur le Ministre, la légèreté de vos paroles n'est pas faite pour nous rassurer." (The levity of your answer is not calculated to restore our confidence.)

General d'Hautpoul then assured the committee that no seditious cry had been uttered in his presence.

The President of the Assembly asked General d'Hautpoul, if he did not think that the cry of "*Vive l'Empereur!*" was a seditious cry, and whether, in the event of its being uttered by the soldiers, he would not only not tolerate it, but would take the most severe measure to enforce respect for discipline and for the Constitution? If that was the case—and he could not doubt it—the cry of "*Vive l'Empereur!*" was fully as seditious as that of "*A bas le President!*"

The Minister of War replied that he had not heard the cry of "*Vive l'Empereur!*" that, besides that, he thoroughly disapproved of any such cry, and that he could not imagine that the committee could suppose that he had authorised any cry of the kind. Addressing himself to General Changarnier, the Minister added: "Let the Commander-in-Chief of the army of Paris be asked the question if he (General Changarnier) gave any such permission or authority?"

General Changarnier begged General d'Hautpoul to observe, that, in his quality of Commander-in-Chief of the army of Paris, it was not before the committee of prorogation that he was bound to give explanations to the Minister of War; and that, in his quality of representative and of member of the committee, the Minister had no right to put any such question to him.

General Lamoricière then addressed the meeting, and demanded of the Minister of War what he intended to do as respected the future. In his opinion, an order of the day forbidding the troops to make use of unconstitutional cries appeared to be the most convenient and efficacious measure.

The Minister of War, in his reply, refused to publish any such order of the day, which he would consider, he said, a diminution of the executive power, in opposition to the legislative power

M. Jules de Lasteyrie said that the Minister of War has just stated that he disapproved of the cry of "*Vive l'Empereur!*" In merely reminding the troops of the necessity of respecting discipline and the law by an order of the day, the executive power would in no way be in contravention. It would make no sacrifice to the legislative power. It would simply announce publicly its union with the Assembly; and this testimony of the harmony and good understanding existing could have no other effect except that of giving confidence to all good citizens.

Notwithstanding these observations the Minister persisted in his refusal with respect to the order of the day. The meeting was then engaged in drawing up resolutions that he blamed the cry which created so much uneasiness and susceptibility, and he promised that no seditious clamours should henceforth be uttered by the soldiers, or tolerated by him.

On the same day the committee sent a deputation to the President of the Republic, urging upon him the necessity of withdrawing his commands for the final review appointed for the 10th inst. The President declined to comply with this request, but assured the deputies that nothing would take place upon that occasion which could create the smallest disquietude. During the day the matter was freely discussed in the *Salle des Conférences* between several representatives and the ministers, and the reflections which were cast in the course of those conversations upon Louis Napoleon's conduct at the recent reviews are said to have given him great offence, at which he has not been slow in expressing his displeasure.

The prosecutions against the journals under the new restrictive press law still continue.

The *Univers* is to be prosecuted for a violation of the new regulations. This makes the ninth journal that the Attorney-General has proceeded against for an infraction of the law. The authors of the articles summoned appeared before the Court of Correctional Police, on Wednesday, and denied the competency of that tribunal to hear the matter. The Court, however, overruled the objection, and the cases are to be immediately tried upon their merits.

The director and editor of *Le Peuple* have been found guilty, the one of publishing and the other of writing an article exciting to civil war. They have been sentenced to three years' imprisonment each, and 6000f. fine.

The *Constitutionnel* stands almost alone in favour of a prolongation of the President's power.

HESSE-CASSEL

We have news from this quarter to the 6th inst., by which we learn that the army has pronounced against M. Hassenpflug. On the 4th inst. there was a grand review in Fredrick-square, but no one went to it except those who were compelled. General Haynau (not the Austrian of that name), addressing the officers, said, "Gentlemen, let those among you who would rather protect the criminal scum of the opposite party than the rights of the Elector, step aside their uniform, and put on a blouse." The officers were so indignant, that it was respect for discipline alone which prevented them from protesting. When the General passed along the ranks the troops only faintly cried the tanee hurrahs required by the regulations of the service. General Haynau afterwards declared the National Guard to be dissolved, but the latter refused to give up their arms. The General ordered the troops to proceed to disarming them; but the officers declared to him in their turn that they would not execute his decrees. General Haynau then caused the editor of the *New Hesse Gazette* to be arrested; ordered councils of war to immediately commence proceedings; caused the members of the Permanent Committee to be shut up in the Palace of the States, where they had assembled, and had one of them thrown into prison. The councils of war met, but not a single auditor could be found to commence the proceedings; on the contrary, the Auditor-General proposed to have General Haynau impeached for excess of power, and this proposition was voted. Thus abandoned by his troops, General Haynau pledged himself not to exercise his command, or perform any acting until the arrival of an officer sent for instructions to the seat of Government at Wilhelmsbad. The Minister of Finance had ordered the tax department to proceed within forty-eight hours to levy the taxes, under pain of a fine of forty-five rix dollars for the director, and thirty rix dollars for each member. In case of refusal the fines were to be increased. But the authorities cared not for such measures as these, as there was no one to get in the fines.

Subsequently, we find that General Haynau was placed under arrest in his own house. He threatened violent proceedings against those who should keep him under restraint, but all to no purpose, the officers refusing to restore him to liberty. The General afterwards became more reconciled to his situation, and promised not to break his arrest. The imprisonment of the editor of the *New Gazette of Hesse* has been declared illegal by the Superior Tribunal, and his liberation has been ordered. Lieutenant Bamy who seized the editor alluded to by order of General Haynau, has in turn been arrested.

UNITED STATES.

Accounts to the 25th ult. from New York state that the political measures of the session of Congress—certainly one of the most eventful in the history of American legislation—are drawing to a close.

The bill to suppress the slave trade in the district of Columbia has passed by a majority of 33 to 19 in the Senate, and of 124 to 47 in the Lower House. This completes the compromise measures proposed by Mr. Clay and the Committee of Thirteen.

The bill for the settlement of the slavery question. A bill has passed the House prohibiting the sale in the naval service of the United States, and abolishing the use of ardent spirits, except on board ship.

On the 24th ult., a bill passed the House of Representatives authorising the Secretary of the Treasury to permit vessels from the British North American provinces to load and unload in ports of the United States, provided similar privileges be extended to vessels of the United States in those provinces. This is the first step to perfect reciprocity of trade between the two countries

Another attempt was made on the same day to take up the tariff question in the House, but without success.

The bill authorising the payment of the indemnity money to Mexico was passed by the Senate in the form in which it came from the House

The bill relating to the Californian gold mines before the House, allows persons to work the mines to be granted to persons from Europe who have declared their intention to become citizens of the United States, and who can produce certificates of good character.

Letters from Pittsburgh of the 24th ult. represent great excitement as prevailing in that vicinity among the coloured population, in consequence of the passage of the Fugitive Slave Bill by Congress. A party of seventeen negroes, who had formerly been slaves, are said to have started for Canada on the 21st, armed to the teeth with pistols, bowie-knives, &c., and small parties were leaving daily.

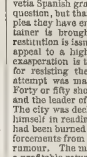
The "Lind mania" continues to rage. Her sixth concert took place upon the evening of the 24th ult., in the Castle Garden. This, as all others, was fully attended.

CALIFORNIA.

Intelligence to the 15th of August has been received from San Francisco. The most important feature of the news is a serious collision between the "squatters," so called, and the "landholders," at Sacramento city, on account of conflicting claims to lands. A large portion of the ground on which the city is built is held by grants from Captain Sutter, who claims under the New Helvetia Spanish grants. The settlers say this grant does not cover the territory in question, but that it belongs to the Government of the United States. On this plea they have entered, and erected buildings; a suit for forcible entry and detainer is brought against them; decided in the plaintiffs' favour; a writ of restitution is issued, the officer is resisted in his attempt to execute it; an appeal to a higher court is presented; this is set aside; and a state of great exasperation is the consequence. A party of six or eight persons were arrested for resisting the law, and two, in default of bail, committed to prison. An attempt was made to release them. This brought on a sanguinary conflict. Forty or fifty shots were fired between the combatants; the mayor of the city and the leader of the settlers were killed, and a number of persons wounded. The city was declared under martial law, and every citizen required to hold himself in readiness for military duty. It was reported that Sacramento city had been burned to the ground, and that the "squatters" were receiving reinforcements from the mines. Little credit is attached to the first part of this rumour. The mining operations are advancing with zeal and energy, and yield a profitable return. The miners are beginning to make use of machinery, and to extract from the depths of the earth and the mountains their hidden treasures. Business generally on the Pacific coast is improving. San Francisco has in a great measure recovered from the late conflagration, and the streets present their usual activity.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

JOHN FANE, ESQ., OF WORMESLEY, COUNTY OXFORD.



THE Fanes of Wormesley are a distinguished branch of the noble house of Westmoreland, settled in Oxfordshire by Henry Fane, Esq. M.P. for Lyme Regis, who was younger brother of Thomas, the eighth Earl, and who inherited the estate of Wormesley, in right of his mother, Anne, eldest co-heiress of John Scrope, Esq. This Mr. Fane's first wife was the only daughter of Nicholas Rowe, the poet; his last, the daughter and co-heiress of Richard Luther, Esq., of Myless, in Essex. By her he was father of John Fane, Esq., of Wormesley, LL.D., M.P. for Oxfordshire, and Richard Luther Hurlet, who wedded Lady Elizabeth Parker, daughter of Thomas Earl of Macclesfield, and died in 1824, leaving a son and heir, John Fane, Esq., of Wormesley, the gentleman whose death we now record

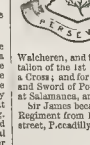
Mr. Fane was born 9th July, 1775, and married, 6th June, 1802, Elizabeth, daughter of William Lowndes Stone, Esq., of Brightwell Park, and had by her three sons and three daughters. The eldest of the former, the present John William Fane, Esq., of Wormesley, has been thrice married; 1st, to Catherine, daughter of Sir Benjamin Hobhouse, Bart.; 2ndly, to Lady Ellen Catherine Parker; and, 3dly, to Charlotte, youngest daughter of Theodore Henry Broadhead, Esq.

SIR WILLIAM PILKINGTON, BART.

THIS gentleman died at his seat, Chevet Park, near Wakefield, in Yorkshire, on the 1st inst., after a protracted illness. The family from which he sprang is one of the oldest in England. Fuller says that the Pilkingtons, originally of Rivington, county Lancaster, were "a right ancient family," and that they were gentlemen of repute in the shire before the Conquest, at which time the chief of the house, being wroth after by the Norman soldiery, was fain to disguise himself as a thrasher in a barn; from which circumstance, partly alluding to the head of the foil falling sometimes on one side and sometimes on the other, and occasionally on himself, he took for the motto of his arms "Now thus, now thus!" and for his crest, "a thrasher ppr."

Sir William succeeded to the baronetcy of Nova Scotia, conferred on Sir Arthur Pilkington in 1635, at the decease of his brother the late Sir Thomas Pilkington, in 1811. He married, in 1823, Mary, second daughter and co-heir of the late Thomas Swinnerton, Esq., of Butterton Hall, county Stafford, and leaves, with other issue, a son and heir, the present Sir Thomas Pilkington.

SIR HENRY THOMAS OAKES, BART.



THE death of this Baronet occurred on the 30th ult., at Londonderry, in Ireland.

Sir Henry was son and successor of the late Lieut.-General Sir Henry Oakes, Bart, and nephew of the gallant military commander, Sir Hildebrand Oakes, G.C.B., on whom the Baronetcy was conferred with special limitation.

He was born 4th July, 1795, and formerly held a commission in the 92nd Light Infantry. He married, in 1817, Frances-Jane, fifth daughter of William Douglas, Esq., of Sloane-street, and leaves several children, the eldest son being the present Sir Henry Frederick Oakes, Bart., born in 1818, who is married to Miss Mary Dudley Ward.

LIEUT.-GEN. SIR JAMES STEVENSON BARNS, K.C.B., COLONEL OF THE 29TH REGIMENT

THIS gallant and distinguished officer entered the army as Ensign, in 1792, and served at Gibraltar, Toulon, Corsica, in Holland, Egypt, the West Indies, Walcheren, and the Peninsula. For his services as Lieut.-Colonel of the third battalion of the 1st Foot at Busaco, Fuentes d'Onor, and Nivo, he received a Cross; and for his conduct in general was nominated a Knight of the Tower and Sword of Portugal, and a Knight Commander of the Bath. He was wounded at Salamanca, and at Alkmaar in Holland.

Sir James became Lieut.-General in 1837, and held the Colonelcy of the 29th Regiment from 1842. His death occurred on the 6th instant, at 33, Clarges-street, Piccadilly.

CHARITABLE BEQUESTS.

To the British and Foreign Bible Society, £100; Hibernian Bible Society, £100; Church Educational Society in Ireland, £50; London Irish Society for Promoting Schools and Scripture Readers, £50. These legacies are bequeathed by Mrs. Guest, formerly of Cheltenham, but late of Clifton, where death occurred in July last.

£2000 is bequeathed to the South Staffordshire General Dispensary, by Mr. W. Mellor, of Wednesbury, lately deceased, who has also left £1000 to the Blue Coat School at Wolverhampton, the interest to be applied solely in clothing for the institution; £10 to each of the Sunday schools connected with St. George's and St. James's, Wednesbury; £20 to the Dispensary at Aberystwith, North Wales; and £50 to be divided by his executors amongst those employed by him in his business of a brassfounder.

To the Society for the Propagation of the Gospel in Foreign Parts there is bequeathed a legacy of £50 by the late Hon. J. W. Stratford; also £30 to be distributed among the poor of Addington; and he has directed that a suit of mourning should be given to each poor man and woman of that parish and his executors are requested to each labourer employed on his estate there be given one week's full pay.

THE SUBMARINE ELECTRIC TELEGRAPH.—Mr. J. J. Lake, of the Ordnance Office, Plymouth, proposes, in order to prevent injury to the telegraph wires from the nature of the bottom, to suspend them by corks placed at intervals, and to secure them to the anchors, or to lead weights, at certain but greater distances. "By this means," he says, "the distance from the bottom could be regulated at pleasure. The suspension of the wires would render them more easy of access for at each anchor, or weight, a small buoy with a flag could be secured, which would indicate exactly their locality; and in the event of accident, they could readily be found. Had this plan been adopted, the injury to the wires off Cape Grinez could not have occurred, as no part of the wire would have touched the bottom. Very little inconvenience and injury would also result to fishermen and mariners; for the line of flags or beacons would point out the neighbourhood of the wires, and but a comparatively small space of ground would have to be left untouched by them."

An otter of huge dimensions, weighing 48 lb., and measuring 4 feet 6 inches in length, was killed a few days ago at Roxborough, in the county of Galway, the property of Mr. Persse, by a dog, just before he took a desperate revenge on his canine and human assailants—for he killed two dogs in the water, and wounded three others to the extent that they died in a few hours; and of the men who attacked him, he also wounded several, leaving one of them *minus* his great toe, and at last was only overcome by powder and ball

William Williamson, Esq., of Sedgefield (brother of Sir Hedworth and brother-in-law of Earl Zetland), having won a considerable sum of money at Doncaster, by backing Voltigeur for the Leger, sent £20 to the Rev. Mr. Baker and Mr. T. E. Harrison, of Whitburn, for distribution among those who were formerly in the service of the Williamson family, or who could at all claim the privilege of old acquaintance.

COUNTRY NEWS.

BRITISH AND FOREIGN BIBLE SOCIETY.—The annual meeting of the Manchester Auxiliary of the British and Foreign Bible Society was held on Tuesday evening, in the Corn Exchange, Hanging Ditch, Manchester. Mr. C. Kershaw, M.P., occupied the chair. Among the gentlemen upon the platform (including ministers of many denominations) were the Revs. P. Kent and W. Marsland, (chaplain to the Lord Mayor of London), deputations from the parent society; Revs. Dr. Carpenter, J. Bardsley, A. W. Archer, T. Bennett, W. Doyle, &c. The Chairman, in the course of his address, introducing the business of the meeting, urged that the constitution of the society was one of the most catholic description, and that its operations were as extensive and as universal as its means enabled it to accomplish. Although the history of the society had been a series of splendid triumphs in the most sacred objects and although it had existed nearly fifty years—he thought it was as necessary now as when it was first established; and he was glad to express his opinion that the society was now more dear to the hearts of the people of this country than at any former period. The secretary read a long report as to the state and operations of the auxiliary during the year. The issues had been 24,040, being an increase of 9056 copies of the Scriptures compared with the previous year. Branch societies had been formed in Ancoats, Manchester; Greengate, Salford; Hulme, Ashton, Sale, Hollingworth, and Patricroft; and branch societies and associations at Padiham, Bacup, Longdendale, and New Mills. The *colporteur* system had been extended during the year, and great good had resulted therefrom; if fully carried out, it promised to bring a blessing upon all the surrounding population. Mr. Hill had been now engaged for 18 months, during which time he had made 34,151 calls, and sold 7492 copies of the Bible (of which 570 had been disposed of to the schools), producing £242 17s. 7d. Since Mr. Hill's appointment, two fellow-labourers had been appointed to aid him; but these had been supported by the voluntary contributions of private individuals. Within 18 months 1660 families had been found destitute of the Scriptures in Macclesfield, 1070 in Wigan, and 116 in Bury. 1062 copies had been supplied to these neighbourhoods. Thirty-six coal-pits and railways had been visited, and partially supplied; and 93 factories in Macclesfield and the vicinity had been provided with 1552 copies of the Scriptures, yielding by their sale an amount of £65 6s. 3d. In nine factories in Wigan, 447 copies, producing £16 12s., had been sold; and to private families 793, producing £29 7s. 3d. Encouraged by these results. Mr. Taylor had conceived the idea of extending the *colporteur* system, so as to embrace the entire neighbourhood of this large industrial population. The treasurer's report contained the following amongst: Balance carried forward from last year, £15 14s. 6d.: proceeds of the annual meeting, £59 17s. 1d.; annual subscriptions, £554 9s. 8d.; donations, £12 6s. 4d.; donations from societies (Lancaster, £10), £377 16s. 7d.; sale of Bibles and Testaments, £1926 19s. 8½d. Total receipts, £2451 1s. 8d. Paid to the parent society for Bibles and Testaments, at cost price, £1365 10s. 9d.; cash remitted as a free contribution, £420; expenses of the depository, £100; balance in hand, £565 9s. 8½d.

THE NEW PRESBYTERIAN CHURCH, WOOLWICH.—The members of the new Presbyterian church, Woolwich, unanimously elected the Rev. William Mitchell, A.M., to be minister of the said church. The gentleman preached his first or introductory sermon on Sunday last, the 6th inst., to a large congregation.

THE YORKSHIRE UNION HUNT.—The members of this, one of the most "crack" hunts, gave their annual ball at the Assembly Rooms, York, on Thursday evening, the 3rd inst. The *réunion* was most fashionably attended, more so than it has been for many years past. Amongst the residents of the West Riding and their friends we may enumerate the following as being amongst those who were present at the gay enlivening scene: The Earl Fitzwilliam and the Ladies Dorothy and Albreda Wentworth Fitzwilliam, Lord and Lady Wenlock, the Hon. Francis Lawley, Lord and Lady Wharncliffe, the Earl de Grey, the Earl of Harewood and the Ladies Louisa and Blanche Lascelles, Viscount and Lady Elizabeth Lascelles, Lord Dunkellin, the Earl and Countess of Zetland, Sir William and Lady Milner and the Misses Milner, Mr. Milner, M.P., Mr. Smyth, M.P., Sir Charles Slingsby, Colonel Campbell, of the 2nd Dragoons; Sir John Gerard, Bart., Lord Stourton, Mr. Mark Milbank and Lady Augusta Milbank, Mr. T. Hutton, Clifton Castle; Colonel Tempest, Colonel and Miss Hall, Mr. S. W. Lane Fox, M.P., the Duke of Leeds and Miss Jane Fox, Sir William and Lady Ingolby, Sir Maxwell and Lady Wallace, Mr. Dent, of Hepstone Park; Mr. Lawson, M.P., Boroughbridge; Lord and Lady Downe, the Lord Mayor and Lady Mayoress, Mr. and Mrs. Swan, Mr. and Mrs. J. Meek, Mr. and Mrs. Barston and family, Mr. and Mrs. Drake, of Mowbray Hall; Mr. and Mrs. Hague and Miss Hague, Mr. and Misses Hackett, Mr. and Mrs. Clough, Mr. and Mrs. Jonas Hunt, Mr. and Mrs Currer, Lord and Lady Allan Gordon, Mr. and Mrs Dooker, Major and Mrs. Kay, Major and the Misses Dickson, the Hon. and Rev. D. Erskine, the Hon. H. Duncombe, Lord Cardross, the Hon. Adolphus Liddell, Lord and Countess of Malgrave, Lord Henry Bentinck, &c.

GREAT WESTERN EXCURSION TRAINS.—On Tuesday a meeting of the inhabitants of Bath and its vicinity, opposed to the running of excursion trains on Sunday, was held at the Assembly-Rooms. The chair was taken by W. Hunt, Esq., and numerously attended. It was stated that the Great Western railway directors, in respect to Sunday excursion trains, had practically denied the obligation of keeping the Sabbath-day holy, and had openly invited the multitudes of London, and other localities in the kingdom, to act on an erroneous and revolting conclusion. Three Sunday excursion trains had already visited Bath, and the first brought 1200 passengers. This train came in three distinct detachments, so that nearly the entire Sunday was occupied in bringing the excursionists into Bath, and sending away the city on their return. A memorial was presented all the appearance of a general holiday. Then in the evening there were 2000 persons rushing through the streets to the station. From the beginning to the end Sunday there was no observance of it. After some time, observations from Mr. C. Bayley, Mr. J. Cotterill, the late E. Tottenham, the Rev. Mr. Scarth, and other rev. gentlemen, it was proposed to present a memorial to the directors of the Great Western Railway Company on the above subject, requesting them to discontinue the running of trains on the Lord's day.

GREAT WESTERN RAILWAY.—The line between Westbury and Frome, on the Wilts, Somerset, and Weymouth Branch, was opened on Monday. The portion between Frome and Yeovil is six miles and three-quarters in length, and as yet only one set of rails has been laid down. Four trains run daily each way; and a considerable traffic is expected from the manufactories of Frome to the grand line. No public demonstration took place on the occasion, with the exception of a dinner at the Crown Hotel in the evening, at which Henry Miller and C. E. Olive, Esqrs., officiated as chairman and vice-chairman.

DESTRUCTION OF THE WORKS AT THE HARBOUR OF REFUGE, at Dover.—[illegible] commenced [illegible] the whole of [illegible] Saturday last, [illegible] the [illegible] and [illegible] midnight. About [illegible] the [illegible] height, and completely flooded the quays and promenades. The works which were being carried on for the construction of the harbour of refuge were completely destroyed. Enormous blocks of concrete, inches square, snapped asunder, and everything upon them overthrown. Three large diving-bells, which were used in the construction of the works, were carried away into the sea. At daybreak the harbour was strewn with the fragments of the machinery, timber, &c., and the whole place appeared a perfect wreck. The works had been entirely suspended, and, since the catastrophe, the exertions of the men have been devoted to the recovery of the materials. They have succeeded in finding one of the diving-bells. It is estimated that the damage done amounts to several thousand pounds, as, besides the materials, the air-pumps, traversers, cranes, and other machinery have all been destroyed or lost.

THE SALE AT LIVERPOOL.—During the heavy gale which prevailed at the mouth of the Mersey, on Monday last, an artificial embankment, raised several years ago by the Corporation, opposite to Leasowe, at the mouth of the Wallasey Pool, gave way. The water rushed in, and has done considerable damage, inundating the whole of the low lands. The cost of repair will be considerable.

FIRE IN LIVERPOOL.—During the prevalence of the gale on Monday night, a fire broke out in the windmill in Gradwick-street, Liverpool. It soon became evident that nothing could save the building. The extensive mill and adjacent warehouses were totally destroyed within a short space of time.

FIRE-DAMP EXPLOSION.—On Saturday last, the men engaged at the Coed Pigwen Coal Pits went down to their work as usual, and becoming conscious of the presence of fire-damp they immediately endeavoured to effect their escape; before this could be accomplished an explosion took place. Three men were killed, and two others so dreadfully burnt as to [illegible].

FATAL OCCURRENCE.—On last Sunday morning, a party of eleven persons left Bristol in a substantial sloop-rigged vessel, with an orlop deck, on a trip down the Channel, the wind blowing stiff from the S.S.W., and a heavy sea on. On getting well into the Channel, the weather was found to be very boisterous; but they proceeded in safety as far as the Holmes, a distance of about twenty miles, when they were round, and ran back for the light-ship. On passing this vessel a heavy sea broke over her fairly, swamping the boat, and her snapped about a ton of water. To their utter dismay, they now found that the pumps would not work, and they accordingly put the boat before the wind, and bore up for the mouth of the river, arriving at that dangerous point of navigation as "The Swash," their steersman unfortunately luffed up into the eye of the wind, and, as they had very injudiciously, in such a gale, every stitch of canvas set, they heeled over, capsized, and went down stern foremost. Happily, the sloop *Anne* was passing at the time, and lowered her boat, and a Custom-house boat, which was also passing, went to their rescue. By these means, seven of the unfortunate passengers were saved, but the remaining four unfortunately were drowned. The boat belonged to a Mr. Luff. The survivors were taken to Pill, where prompt medical assistance was immediately rendered them; but three of them, from the excitement created by the lamentable fate of their companions, are still in a very precarious condition. The following are the names of the deceased:—Evan Jefferies,—Rich, George Parker, and William Lodge.

EXTENSIVE ROBBERY OF WATCHES AND JEWELLERY.—The dreadful murder at Frimley has been followed by an extensive robbery of jewellery, &c., at the town of Wokingham, which is situated about midway between Reading and Frimley. The robbery took place on the premises of Mr. Porter, a highly respectable watchmaker, living in the Market-place, on the evening of Sunday last, during the absence of himself and other inmates of the house at Divine service. Some time after their return, Mr. Porter went into the shop, and at once discovered that upwards of 40 gold and silver watches had been carried off, gold rings, brooches, and pins, the loss in the whole amounting to between £200 and £300. The thieves entered through the shop door by means of skeleton keys.

CHURCH, UNIVERSITIES, &c.

OXFORD.

NOMINATION OF VICE-CHANCELLOR.—On Tuesday a Convocation was holden, at twelve o'clock, at which the Vice-Chancellor resigned his office, making a Latin speech on the occasion. The letters of nomination were read by the Senior Proctor, and were approved by the house. The Vice-Chancellor took the usual oaths, and was inaugurated for the third year, and appointed the following heads of houses Pro-Vice-Chancellors, who officiate in power in case of his illness or necessary absence from the University:—The President of St. John's College, the Warden of Wadham College, the Rector of Exeter College, and the Provost of Worcester College. The office of Vice-Chancellor is generally holden for four years, by annual nominations.

ROYAL COMMISSIONS.—The commission appointed by the Government to inquire into the state, discipline, and studies of the University of Oxford, will commence its sittings in London on Monday next, the 14th inst. The commissioners are the Bishop of Norwich (Dr. Hinds), Dr. Tait, Dean of Carlisle; Dr. Jeune, Master of Pembroke College, Oxford; Mr. Liddell, Head Master of Westminster School; Professor Jowett, Regius Professor of Mr. Dampier, barrister, and Mr. G. H. S. Johnson, of Oxford. Many distinguished members of the University will be examined by the commissioners; amongst others, the Right Hon. W. E. Gladstone, M.P., the Bishop of Oxford, Dr. Pusey, the Head Master of Rugby School (Dr. Goulburn), Mr. Roundell Palmer, M.P., and the Bishop of Chichester

The Cambridge commission has not yet fixed its day of sitting.

THE BISHOP DESIGNATE OF LYTTLETON, NEW ZEALAND.—We have just seen an excellent Daguerréotype of the Rev. Mr. Jackson, taken by Mr. Griffiths, of Mile-end-road, who went to Plymouth expressly to secure the requisite sitting. The rev. gentleman sailed from the same port on Saturday, in the *Castle Aden*; but, owing to the storm of Sunday, the vessel was compelled to put back, and finally sailed on Tuesday. The above Daguerréotype will shortly be lithographed, and will, doubtless, be highly acceptable to the very numerous friends and admirers of the Bishop Designate.

WHITEHALL PREACHER.—The Rev. Edward Stokes, student and tutor of Christ Church, has been appointed Whitehall Preacher, in the room of the Rev. W. Sewell, Fellow of Exeter College, whose term of office expires at the end of the present month.

The Lord Mayor's carriage will contain the following arms:—Balance carried forward from last year, £15 14s. 6d.: proceeds of the annual meeting, £59 17s. 1d.; annual subscriptions, £554 9s. 8d.; donations, £12 6s. 4d.; donations from societies (Lancaster, £10), £377 16s. 7d.; sale of Bibles and Testaments, £1926 19s. 8½d. Total receipts, £2451 1s. 8d. Paid to the parent society for Bibles and Testaments, at cost price, £1365 10s. 9d.; cash remitted as a free contribution, £420; expenses of the depository, £100; balance in hand, £565 9s. 8½d.

THE NEW PRESBYTERIAN CHURCH, WOOLWICH.—The members of the new Presbyterian church, Woolwich, unanimously elected the Rev. William Mitchell, A.M., to be minister of the said church. The gentleman preached his first or introductory sermon on Sunday last, the 6th inst., to a large congregation.

The thieves entered through the shop door by means of skeleton keys.

IRELAND.

MIXED EDUCATION.—Dr. Slattery, the Roman Catholic Archbishop of Cashel, has addressed the following letter to the *Freeman's Journal*, in reference to several newspaper attacks recently made against him, and to the letter of Mr. Corballis on the Queen's Colleges:

Sir, It appears that my humble name has been dragged before the public during the course of this week in the pages of some of your contemporaries, for what purpose I am at a loss to conceive, unless it were to draw me into a newspaper controversy on a vile or important question upon which the highest authority in the Catholic Church has already pronounced. If such was the object these parties had in view, they will find themselves grievously disappointed, for neither the taunts of Mr. Corballis, or of his opponent in the *Post*, nor his truthful assertions of the Archbishop of Tuam, are from the course which I have marked out for myself in reference to that question. Let others act as they may in this respect: for my part I will not lose the dignity of the high station which I so unworthily occupy. I may be taunted, I may be sneered at and insulted, but no attack that can be made upon me shall ever induce me to forget for a moment the respect I owe to my own character as a prelate and as a gentleman. I pray you to excuse this trespass on your columns, and I have the honour to remain, your obliged and faithful servant, M. SLATTERY

* A "rose not" a Star of Trinity College," *I sees not* "fed and educated there gratuitously," a "*sour nut*" taught astronomy by Dr. Magee," nor "Greek by Dr Graves," nor "history by Dr. Miller"

This note refers to a statement put forth by the *Dublin Evening Mail* relative to Dr. Slattery's antecedents.

PREPARATIONS OF ELAN.—In several of the most heavily-burdened of the electoral divisions in Ireland, it has been decided to form a voluntary rate, to be managed by a committee, composed of the principal owners of property in the locality, to be called the Industrial Committee. The functions of the committee are directed to the best means of reducing the burdens of the poor-rates, by affording profitable employment to the poor people. After mature consideration, several of the committees have decided that the only source of employment within their reach was the preparation of flax for the market. The spinning of the fabric was generally given up, as it was found that the women could not earn more than 1½d. per day. Until very recently, the growth of flax has been all but given up in several parts of the county of York; but, as from £7 to £8 per acre has been in many cases offered to the farmer if they would grow the plant, it is intended to sow a much larger breadth of land with flax than formerly. The secretary of one of the industrial committees alluded to states, that, if they could find employment for the winter, which would enable them to given even so small a sum as 4d. to a man, 3d. to a woman, and 2d. to a child per day, they would think themselves in a most happy state.

O'CONNELL'S GRAVE.—A short time ago there appeared in a Cork paper a Conservative politics a plausibly told tourist's anecdote about O'Connell's grave at Glasnevin, which has since been made the text for sundry moralizings on human vicissitudes and Irish ingratitude, both in Irish and English Journals. The story was by "an excursionist" from Cork, and was to the effect that the guide at Glasnevin told him that O'Connell's coffin, which is placed in that cemetery, was actually in pawn for the money paid for bringing it from Genoa; and that until that money was paid no other monument would be raised to the great patriot, nor his coffin be allowed away. It turns out, however, as might have been expected, that the story, as far as the only point in it goes, is utterly untrue. The guide in question, who happens to be the superintendent of the Glasnevin works, and has been in the employment of the Glasnevin Cemetery Company, from its origin, under O'Connell, some twenty years ago, denies in the most explicit terms that he has ever made any such statement, or that any human being meaning could be deduced; and, in fact, that he could not have done so, seeing that he was well aware that it was not true. It is an ill wind, however, that blows no good; and the idle story, with the comments made on it will have, no doubt, of giving an impulse to the committee of the O'Connell monument, who were talking for some time past of erecting. The *Freeman* states that the monument committee, after a year or more of languor, has at length become business-like and active, and that George Petrie, an eminent Irish artist, having been commissioned to furnish the design, has completed the drawings.

LACE MANUFACTURE.—A new branch of industry (the manufacture of lace) is about to be introduced in Limerick in connexion with two religious institutions in that city, the Convent of the Sisters of Mercy and that of the Good Shepherd. The latter have already commenced the work in the pauper schools in connexion with their establishment. A ready manufactured has been of a texture to afford unqualified satisfaction to Mr. Russell, upon whose recommendation and order the manufacture has been undertaken. A lady connected with the sisterhood has been brought over from Belgium to instruct the pauper children

GREAT SALE OF ARTICLES OF VERTU AND ART.

The great sale, by Messrs. Farebrother, Clark, and Lye, which commenced this week at Colehy, in Lincolnshire, and is to extend over twenty-four days, is exciting a far-and-wide spread of public interest in that part of the country [illegible] the collection of rare and elegant plate, &c., there are many exquisitely wrought articles, and some fine antique silver-gilt rose-water dishes, while a few watches which formed part of the Strawberry Hill collection, one having in the centre a fine medallion of Henry VIII., and the other a medallion of the ill-fated Anne Boleyn. The jewellery, &c., comprises a magnificent brooch, necklaces, necklaces, &c., and various ancient rings, including one found at Rieshome, another near the Lincoln West Common, another in Newport, another at Woodhall Spa, and another in the Castle-dyke, besides a variety of other rings and sword arms[illegible] his attention and awaken a passing reflection, which is put to flight by some such object as a ring worn by the adherents of Charles I., containing an enamelled portrait of the unfortunate monarch, or a ring of the Lady of Lamotte, or the miniature of the old Chevalier; and of antique watches, snuff-boxes, pistols, &c., there is a profusion

Among the objects of coins, medals, and monastic seals is rather extensive: there are 180 Lincolnshire tradesmen's tokens, sets of Greek and Roman gold coins, rare coins of Stephen and Henry I., a penny of Edward the Confessor, a quarter noble of Edward III., a rose noble of Edward IV., a penny of Edward VI., and the gold coins arranged in reigns, curious monastic seals, and splendid coronation medals.

Amongst the paintings are fine ancient portraits of Luther, Erasmus, Melancthon, Wycliffe, and Calvin; Vandyck's portrait of Cardinal Bentivoglio; a family portrait of Sir R. Kaye, Dean of Lincoln, by Sir Joshua Reynolds; a portrait of the Earl of Strafford, by Vandyck; a portrait of Lord Burghley, by the same painter; a portrait of the Princess (afterwards Queen) Elizabeth, by Holbein; besides a variety of pictures by the ancient and modern masters

[illegible] numbers 10,000 volumes, and, as naturally to be expected, so extensive a collection must contain much of little value; but the rich branches of literature the collection is rich in, and many of the works are extremely rare and costly: it is seldom, indeed, that a library of so diverse a character comes to the hammer. The MSS. comprises numerous volumes in the handwriting of Sir R. Kaye, a Roman missal, and various other beautiful illuminated pages, collections of monastic charters and deeds, several ancient documents relating to Lincolnshire, and a curious diary of Dr. Kaye, a physician in the time of William III.; the account of many prescriptions, and there is little doubt that it was from this ancestral record that Lady Kaye, the mother of the late Mr. Mainwaring, obtained the medical knowledge which enabled her to render extensive service to the neighbourhood. Of Lady Kaye's "Lincolnshire Tonic" and "Cough mixture" is very popular—the prescription having been given to the druggists, and carried from one shop to another, till scarcely a druggist of the county in general is without it. Amongst the manuscripts, music, literary works, and architectural engravings, there is a very extensive and fine collection

There is also an assortment of curious and valuable clocks, silver chiselings illustrative of ancient costume, and relics of religious subjects, miniatures of the ancient nobility, enamel portraits of the Napoleon family, and almost endless varieties of antique and Oriental articles. The library contains several magnificent specimens of bronzes, clocks, statuettes, and bronzes

The vestibule contains, amongst many rare things, a series of marble busts, and an ancient Egyptian statue of the Pharaoh Memphis. The park and gardens are ornamented with full-sized statues, part of which once belonged to the palace of Frederick August, King of Poland. The dining-room and drawing-rooms abound with gems. In the reception-room are the splendidly carved chairs, altar-table, &c., intended by Mr. Mainwaring for Hackthorn church; four fine drawing-room chairs, exceedingly handsome, and six sofas, representing Marsyas bound to a tree, after his defeat by Apollo, Pan, Hercules, and a gladiator. These four figures alone cost Mr. Mainwaring £700. In addition to these, there are some fine Etruscan vases, Egyptian monumental figures, &c.

The cellars are rich in wines, spirits, and ale; and not the least attractive part of the sale (odd as the reference seems after a glance at the rarities referred to) will be the celebrated Colehy breed of pigs, on which Mr. Mainwaring justly prided himself. The suction is held in a large building erected for the purpose on the lawn. The mansion itself presents no attractive features; most of the rooms are exceedingly low, and it is understood that Sir Charles Tempest, to whom the property belongs, purposes pulling down and rebuilding nearly the whole, and to make it his own residence.

The demand for catalogues has been very great, and many thousand persons have flocked to view the property

TESTIMONIAL TO THE AUTHOR OF THE "NAVAL BIOGRAPHY."—It is truly gratifying to perceive the manner in which the service has responded to the invitation of a few of its seniors to present Mr. O'Byrne, [illegible] enumerated compiler of the "Naval Biography," with some substantial acknowledgment of the great and important services he has rendered the profession Mr. O'Byrne may well be proud of the list of contributions, not so much on account of the sterling value of the various amounts subscribed, as of the array of high, gallant, and distinguished names that compose the list. We truly hope to see, in addition to what has already appeared, the names of other gallant men [illegible] service, whose deeds Mr. O'Byrne has impartially recorded.—*United Service Gazette*

Dr. Townsend, the newly appointed Bishop of Meath, is the son of Thomas Townsend, Esq., barrister, who was several years the proprietor and editor of a newspaper called *The Correspondent*, now merged in the *Dublin Evening Packet*, and son-in-law of a gentleman named Speed, of Limerick, who, before his death, had been long the land agent of the Marquis of Lansdowne.

Agreeably to annual practice, the plate, or quality of the silver plate assayed and marked at the Edinburgh Assay of Pix, during the year 1849-50, was, on Monday last, tried by the Assay Master of the Incorporation of Goldsmiths, in presence of the Court of Wardens, and the same was found to be of the standard appointed by the act of Parliament. The letter for next year was directed to be changed to T, old English.

DANISH ARTILLERY AND INFANTRY.

SEAT OF THE WAR.

SCHLESWIG-HOLSTEIN.

The news from the seat of war this week is replete with disaster to the cause of the Duchies. The attack on the extreme western point of the Danish position, Friedrichstadt, has failed more signally even than the assault a few weeks ago on the extreme eastern point, Missunde, and with far greater loss than in that case. The moral discouragement and depression resulting from such repeated failures, though natural enough under such circumstances, augur badly for the future of the Duchy cause.

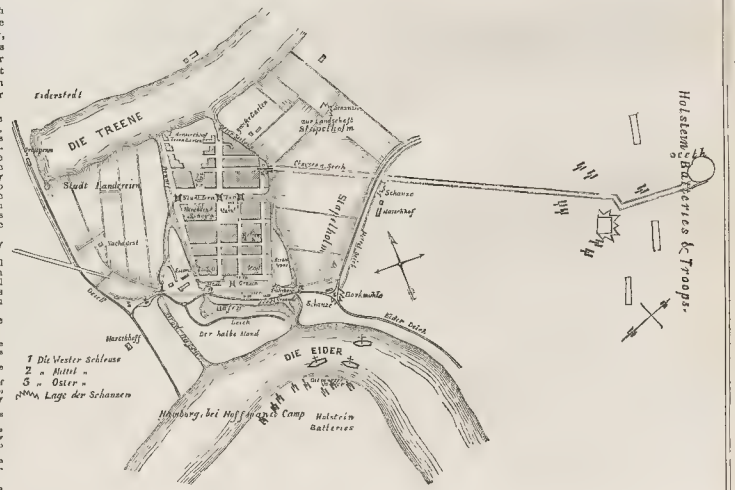
We briefly noticed last week the commencement of the operations against Friedrichstadt, which the Duchy troops, after some measures directed during the four preceding days against the town, were at last ordered to storm. In the afternoon of the 4th inst., after a cannonade, which lasted the whole day, the troops forming the storming parties were ordered to advance. They did so in three columns, one by the *chaussée* that crosses the marshy level from the town to Seeth, a second along the Treene-dyke, and the third by the Eyder-dyke. On all three points the attack failed. The 6th battalion of Holsteiners acted most bravely, but the Danes poured forth such a murderous fire as almost to annihilate it. All the captains were left killed or wounded on the spot a circumstance but seldom recorded in the annals of military warfare.

This fact is admitted in General Willisen's own official report. The General estimates his total loss to have been about 200 or 300 killed and wounded, but more impartial accounts consider it to have been 1000 to 1500. The loss of the Danes was calculated at about 400, among whom were many officers.

The States held a sitting at Kiel on the 5th, when the following resolutions were agreed to:—

1. The Staathalterschaft is authorised to increase the number of the army above its present force, and to obtain that increase as rapidly as possible.
2. A sum of 3 292,687 marks is placed at its disposal to defray the cost of the above increase.
3. The sum required by the War Department for the second half of the year 1850, commencing (exclusive of the above stated sum) to 11,251,896 marks is voted: this amount is entirely at the discretionary disposal of the Department of War.
4. That the sum of 1,250,000 marks be issued in notes of 2½ marks (one-third per premium) each.
5. That, to cover the increased expenditure voted, a forced loan be levied on both property and income, according to the terms of the law already existing, of one per cent. The Government is empowered to levy an additional half per cent, if the amount realised is not sufficient for the purpose. The loan bears 4½ per cent interest. Income and property below a fixed amount are exempted from the contribution.

The President, in closing the sitting, said:—"We have adopted measures that, for the time, will impose heavy sacrifices on the country. We will pay, we will arm, we will fight, if an honourable peace is not obtained. Firm as



PLAN OF FRIEDRICHSTADT.

BURNING OF THE LESSER CAMP, AT KOCHENDORF.

the German oak—firm as the Schleswig-Holstein beech—is the confidence of the Duchies in Germany. The last intelligence from the army is not favourable, but it shall not depress us. Schleswig-Holstein for ever!"

The Chamber separated with a *hoch* for the "Fatherland."

THE ILLUSTRATIONS.

The large Engraving shows a portion of the Danish Artillery; with Infantry, on the left of the view.

Next is a plan of the Seat of War; and then, a Plan of Friedrichstadt:—No. 1. Die Wester Schlense. 2. Mittel. 3. Oster. The difficulty of storming the place will be seen, from there being only the one road marked below, across the marshy ground. It is now all under water in front of the town.

GENERAL KROGH, COMMANDER-IN-CHIEF OF THE DANISH TROOPS.

Friedrichstadt, it may be stated, is a town containing about 2400 inhabitants. It is built wholly in the neat Dutch style, and is, indeed, of Dutch origin. It was, in 1620, a Friesland village, called Seebul. Duke Frederick III., of Schleswig-Holstein, being applied to by a number of fugitives from Holland, persecuted Arminians, or remonstrants, permitted them to settle in this village, with full liberty to retain their own religious faith and forms. They reclaimed the neighbouring lands from the river by large dykes and sluices in the Dutch manner, and gave the town its present appearance. The place prospered, and the people, out of gratitude to their protector, changed its name to Friedrichstadt. It contains a Lutheran, a Mennonite, and an Arminian Church; in the last service is still performed in the Dutch language. There is also a Roman Catholic Chapel and a Jews' Synagogue. The Lutheran Church has, it is said, been set on fire by the bombardment, and was burning when the last accounts left.

The Portrait of General Krogh, Commander-in-Chief of the Danish forces, is from an accredited print.

It will be remembered that a short time since, the Emperor of Russia granted to the Danish General a decoration, which was accompanied by the following letter from the Czar:—"We have admired the bravery and prudence manifested by you on the 24th and 25th of July, at the battle of Istedt, where the valiant Danish troops worthily defended, under your orders, the rights of their Sovereign, our ally and friend. Wishing to give you a proof of our gratitude, we name you Chevalier of the Order of St. Anne of the first class, and we send you the insignia of the order in diamonds.—NICOLAS, Peterhof, August 7, 1850.

Next is an Engraving of the Burning of the Lesser Camp at Kochendorf, already described, with the attack on Eckernförde.

Lastly, is the Porte at Rendsburg, a picturesque scene, with its gabled an half-timbered houses, its pretty inn, &c, though the peaceful aspect of the place s broken by the appearance of the soldiery

NAVAL AND MILITARY INTELLIGENCE.

NEW SCALE OF PAY AND PROVISIONS IN THE NAVY.

A circular has just been issued from the Admiralty to all captains and commanders of Queen's ships in commission, stating that her Majesty has been graciously pleased, with the view of improving the condition of the petty officers, seamen, and marines of the fleet, to direct that the following alterations should be made in the scale of the victualling and pay of the Royal navy, viz:—

1. The allowance of salt meat to be increased from three-quarters of a pound to a pound per man per day.

2. The allowance of sugar to be likewise increased; and mustard and pepper to be substituted for a certain portion of oatmeal and vinegar.

3. The allowance of spirits to be reduced, and a compensation in money to be granted for such reduction, as shown in the annexed scale.

4. The pay of the navy to be recast at a daily rate, and the compensation above mentioned to be blended with, and form part of, the pay

5. The calendar to be substituted for the lunar month in the pay of the wages.

With respect to the allowance of grog and compensation-money, the following orders are issued:—

1. Admirals, captains, lieutenants, and ward-room officers.—Half present allowance; no compensation allowance.

2. Mates, assistant surgeons, second masters, and clerks.—Half present allowance: savings price for half allowance, blended with pay.

3. Midshipmen, masters' assistant, clerks assistant, and boys of First Class:—Half present allowance at the discretion of the captain. savings blended with pay

4. Cadets and boys of Second Class.—No allowance; savings price for whole, blended with pay.

5. Assistant engineers, warrant officers, petty officers, able seamen, and others of that class, ordinary seamen, non-commissioned officers, and privates of Royal Marines.—Half present allowance; compensation, 3s 6d. per man per calendar month.

6. Second Class ordinary seamen, landsmen, and others of that class.—Half present allowance; compensation, 2s. 6d. per man per calendar month.

The allowance of grog is to be served out at dinner-time only, the evening serving being discontinued; and all sale, barter, loan, or transfer of grog is strictly prohibited. No raw spirits to be issued to any one, unless by the special directions of the captain. In case of persisting drunkenness, the captains or commanding officers of her Majesty's ships are authorised to charge against the pay of the person so offending a sum not exceeding the amount of compensation money, such mulct or abatement to be charged against the party on the ship's book, and to be reported in the quarterly returns of punishments. No grog to be allowed to naval cadets, or boys of the 2nd class. The allowance of grog to midshipmen, master's assistants, clerk's assistants, and boys of the 1st class, to be issued only by the special written directions of the captain, and when not issued is to be paid for as savings. If any man should not wish to take up his allowance of grog, he will be paid the savings price for it; or he may, if he prefer it, be allowed to take up in lieu 4 oz. of tea, and 1 oz. of sugar, in addition to the established allowance of those articles The savings price on tea is to be in future 1s. per pound, and that on sugar 3d. per pound. In cases where salt meat shall have lost more than half its weight in boiling, the captain or commanding officer is, on satisfying himself of the correctness of the fact, to authorise the paymaster and purser to issue an additional portion of raw salt meat, equal to half the original allowance. The fat or skimmings of the coppers which may not be required for the use of the ship is to be saved, and put into casks, and to be delivered into the charge of the paymaster and purser of the ship, who is to return it into store at any of her Majesty's *depôts*; but, in the event of his not being able to comply with this regulation, he is to obtain a written order from his Captain to dispose of the same at the most favourable price for the Government, taking credit for the same in his account, and debiting himself with the proceeds of sale. On the delivery of the above fat or skimmings into the charge of the paymaster and purser, he is to apply to the Captain for authority to pay to the cook of the ship one-half of the value of the fat (out of which sum one-fourth is to be divided among the cook's mates, the remaining three-fourths to belong to the cook); the other half is to be appropriated to the use, and for the benefit, of the ship's company, in the manner which may be deemed most advisable by the Captain. The savings price of the fat for carrying out the above arrangement is to be £1 per cwt.

INGENIOUS INVENTION.—A very ingenious and highly interesting article of great utility has been introduced at Margate, having for its object the preservation of lives from shipwreck or other disasters at sea. It can hardly be called a boat, although it is intended to be used as such, when emergency demands; it is composed of 80 cylinders, each capable of holding one person, who is to remain in an upright position, the whole of which is confined in a distant

RENDSBURG.

casing of wood, the interstices and sides stuffed with cork, which makes it exceedingly buoyant, and, as far as an experiment made on Thursday last, on the Margate Sands, went to prove, cannot be upset or seriously damaged by any rough usage it may meet with by being unceremoniously cast over the ship's side. It is to be subjected to further and more severe tests, as the state of the weather and opportunity may offer; if then its qualifications are fully established, it is to be removed to the Great Exhibition in Hyde Park.

Captain Domasywiski, a distinguished Russian officer, is now visiting the Royal dockyards by Admiralty permission, and orders have been issued by their Lordships for every attention to be paid to him.

MILITARY EDUCATION.—Major-General Lord Frederick Fitzclarence is about to establish a district military school at Portsmouth, for soldiers to undergo a course of military instruction in engineering and tactics.

THE PENNY POSTAGE IN THE NAVY.—The Admiralty have ordered that in the event of the paymaster of any ship about to proceed on foreign stations not having sufficient money in hand to purchase the necessary number of postage stamps for seamen's letters, he is to draw a bill on the Accountant-General for the amount required.

IRON SHIPS OF WAR.—An important experiment took place on Wednesday, at Portsmouth, under the direction of the Lords of the Admiralty and the immediate superintendence of Captain Chads, to test the efficiency of the kamptulicon as a lining for iron ships of war. Four 32-lb. shots were fired from the battery of the Victory, with a charge of 10 lb. of powder and a range of about 500 yards, against a large iron target lined with kamptulicon: the shots struck the target with nearly the same results as those described to have taken place at Woolwich in 1846, in which instance the shots were fired from the Gordance guns. The previous experiments at Portsmouth were to test the efficiency of timber as a lining between the angle irons, when it was found that the effect was to add wooden splints rather than to diminish those of iron. From the properties of the kamptulicon it cannot splinter, and the pieces of it which are blown out by the force of the shot are pronounced to be harmless, whilst the greater portion of the substance would, it is asserted, be retained. It appears that the views of Mr. Walter (the gentleman at whose instance the experiment was tried) are not confined to iron ships. He says that the composition, being a non-conductor, would remove the difficulty which exists with regard to the frequent derangement of the compass. The question of its adoption, of course, rests with the Admiralty

FURLOUGHS IN THE ARMY.—The usual general order, regulating regimental furloughs during the winter months, has been issued. One field officer, half the captains, and half the subalterns, are to be always present with their regiments, and no more than ten men per troop or company are to be on leave at the same time. The order does not apply to *depôts* of regiments on foreign service.

A SURVIVOR FROM THE "ROYAL GEORGE."—The *Gloucester Journal* records the death, on the 3rd instant, of James Ingram, who was a native of the county, and had for a long period been a pensioner from public-house, called the Fox, on the top of Woodford Hill, about midway between Gloucester and Bristol. He entered the navy as an early age, and was on board the *Royal George*, of 108 guns, when she sank off Spithead, 29th August, 1782. About 300 brave fellows were saved, among whom was Ingram, who had been on board the ill-fated vessel from the time of her being put into commission.

CALENDAR FOR THE WEEK.

SUNDAY, October 13.—Twentieth Sunday after Trinity.
MONDAY, 14.—Battle of Hastings, 1066.
TUESDAY, 15.—Last day of the year.
WEDNESDAY, 16.—Houses of Parliament burnt, 1834.
THURSDAY, 17.—St. Etheldreda.
FRIDAY, 18.—St. Luke the Evangelist.
SATURDAY, 19.—Leigh Hunt born, 1784.

HER MAJESTY'S THEATRE.—The GRAND NATIONAL CONCERTS

The Executive Committee, Directors, and Managers of "The Grand National Concerts" have the honour to announce that the First Series will commence on TUESDAY, the 15th of October next.

The Committee have the utmost pride and satisfaction in announcing that, by the gracious permission of his Majesty the King of Prussia, they have been enabled to secure the entire Chorus of the Berlin Choral Royal, consisting of fifty voices, under the direction of Herr Kapelmaister Neidhardt. The extraordinary perfection of the chorus is well known to foreign visitors to every artiste and amateur in Europe, by the opportunity of hearing them in our town or country except their own have hitherto been afforded. During their engagement several pieces entirely new to this country, and composed expressly for the Royal Chapel by Meidhardt, Neidhardt, &c., will be performed. In addition to the selections from the choral works of Bach, Handel, Marcello, together with the celebrated "Battle Chorus," which has created so extraordinary a sensation in Germany, a complete Chorale for English Music has been selected with the greatest care from the principal Lyric establishments, and will be under the direction of Herr Gansz, Chorus Master of Her Majesty's Theatre. The arrangement of the Operatic Selections, &c., will be confided to Sig. Negri

The Concerts will commence at Eight, and terminate usually about Eleven. The Theatre has been entirely re-decorated for these entertainments

In addition to the following list, numerous engagements are pending with other Vocal and Instrumental Artistes, particulars of which will be announced as soon as possible

VOCALISTS.—Mademoiselle Angri, Miss Poole, Miss Messent, Mrs. Alexander Newton, and Madame Biscaccianti, Signor Calzolari, M. Hohler, Herr Reichardt, and Herr Staudigl.

INSTRUMENTAL SOLO PERFORMERS.—Pianoforte: Miss Goddard, M. Charles Hallé, Master Reinrich Werner, and M. Thalberg. Violin: MM. Molique, Henry Blagrove, Henry Cooper, and Sainton. An engagement is pending with a celebrated violoncellist of high Soveri. Tenor: Mr Hill. Violoncello: MM Piatti, Hausmann, Hancock, and Rousselot Double Bass: MM Anciola, Howland, and Herr Müller. Harp: Mr Ap Thomas and Mr H Hunt. Concertina: Mr C Blagrove Flute: Mr Richardson, Reichardt, and Nicholl Horn: Mr Barrett and Nicholson. Clarionet: M Mayseck. An engagement has also been effected for Cavaliere, the renowned artiste of La Scala Milan. Bassoon: Mr Baumann Horn: M Stegelich. Cornet-à-pistons: M Arban. Ophecleide: M Prospere. Trombone: M Winderstein

MUSICAL DIRECTOR, COMPOSER AND CONDUCTOR.—M Balfe

The ORCHESTRA, numbering nearly 100 performers, is composed of the principal instrumentalists of Her Majesty's Theatre and the Royal Italian Opera.

PRINCIPAL COMPOSERS: MM Balfe, G Macfarren, Edward Loder, and Howard Glover

ARRANGER OF OPERATIC SELECTIONS.—Sig. Negri. | DEPUTY CHORAL MASTER: Mr Frederick Oborne Williams
CHORUS MASTER: Herr Gansz | ORGANIST: Mr Willing

* * The Music of the Scenestas will be published under Messrs. Cramer, Beale, and Co.

SALERNA.—The celebrated White Horse may be seen from the Great Western Railway, on the steep escarpment of Uffington Down. It is a rude figure, representing a horse at full gallop, formed by removing the thin layer of turf and exposing the white surface of the chalk. The figure is about 360 feet long, is said to cover an acre of ground, and in particular directions may be seen at ten or twelve miles distance; it is of early, and probably of Saxon date. It has been a sacred, though not authority, to have been carved on the coins of Wessex, and to commemorate the victory of the men of that kingdom, under Alfred and Ethelred, over the Danes, in 871. The figure gives to this part of the district the name of the Vale of White Horse
A WELSHMAN.—Mr Sims Reeves was born at Woolwich in 1821
A SEMPSTRESS.—We cannot undertake to recommend music masters. The time to make a singer will depend on the genius and aptitude of the student. A lady of twenty-two, with a fine organ, will require more time than a child of eight years, and a delicate girl two hours in the day for five
A CONSTANT READER.—Modern history dates from the age of Charlemagne, about A.D. 800. See Chatfield on the "Darker Ages"
M. A.—All inquiries respecting the Great Exhibition of 1851 should be addressed to the secretaries, 1, New Palace-yard
W.—The "British Museum Returns" may be had at the Parliamentary Paper-office, 1, New Palace-yard, Westminster, price 1s. 6d. each, or 6s. 6d. the set of 5. "Parliamentary Reports"
R. P.—The arms of Waterhouse, of London, are—"Or, a pile engrailed sa. *Crest:* A demi-eagle displayed, gu. nidificated, paleways, sa. and arg. head, sa." The label on the arms of the Duke of Cumberland is of three points, charged with a cross and on the other nine two bezants in pile gu.
R. J. M.—An application, either personally or by letter, to the Officers in Waiting, Heralds' Office, Doctors'-commons, will enable you to obtain the copies you require of arms registered there. The fee is, we believe, five shillings in each case. The same enquiries are borne by the Somersetshire family of Hippisley, which bears Ermine, Fretty Azure, and Sable a fesse Or
E. H.—There are several families of Barton entitled to arms, quite different in their [illegible] colour. An "Esquire" assumes no right to bear arms, which belong [illegible]
J. W. The arms of Wilson, of Edinburgh, are—"Arg. a cross between three mullets gu. [illegible] A talbot's head erased ppr. *Motto:* Semper vigilans." We do not know that the Lord Berners bears any crest
TRITON.—1. The appointment of Deputy-Lieutenant does not cease at the death of the Lord-Lieutenant. 2. The daughter of a knight married to a baronet is a lady. 3. Deputy-Lieutenant is entitled to use a coach for his family
INCERTUS, being unable to ascertain his own paternal arms, is clearly not entitled to make [illegible]
AN OLD SUBSCRIBER.—A family of Leigh, of Staffordshire and Shropshire, bore "Gu. a cross [illegible]"
ACMON.—We know of no arms to the name of Wingod
J. J.—The Rev John Jamieson, D.D, author of the "Scottish Dictionary," was grandson, through his mother, of Rachel Chisholm, who was elder daughter of the Rev Alexander Bruce, of Garlleti, second son of Robert Bruce, of Kennet, living in 1648. From this Alexander's son, James Bruce, Esq., Chief Judge of Barbadoes, descended the Bruces of that island, now represented by Samuel Barwick Bruce, M.D. of Ilfpon
REGINA FILIUS.—A student in either University, who can show a descent from Royalty through a mother, the daughter of a Peer, may take a degree without the usual examination
AMICUS.—Hughes of Bodrhyddan, which quarters Trevor, bears "Gu. a chevron between three griffins' heads, erased or, three mullets as. *Crest:* A demi-griffin or." And so, also, do the Hughes of Wexford, who likewise beat a Campbell crest
GODELART.—A clergyman is entitled to a crest when a correct legal right exists in him either by descent or grant; and not otherwise
AN OLD READER.—The arms of Pitcher are "Or, a bend gu. surmounted by another as." *Crest:* A demi-man, in a military habit, as in the Burgh Museum, ppr."
NAMILA.—Mr Chilton, Q.C. recovered damages from a railway company 2 Yes: the bylaws of railway companies have the force of law when they are not contrary to the laws of the land, or inconsistent with, or beyond the power given by the particular statute which permits them to be made
DELTA.—The fault correct as stated with regard to the amount of the window tax. The correct is the expression "one house," which should have been "one pile." The context shows that one "pile" is intended to be expressed as a house with its separate roof, entrances, and, therefore, as forming eight houses. The window-tax for each would, therefore, be £15 12s. 8d., supposing the number of windows to be 248 each, and not 1098, as stated by our Correspondent. The same explanation applies to the other instance. Read "pile of houses" instead of "house"
C. B. C.—See Mr Simms's "Elements of Electro-metallurgy"
FIDES.—The ILLUSTRATED LONDON NEWS, No. 371, contains Mr. Albert Smith's narrative of his ballon ascension, with a view of Mont Blanc
A CORRESPONDENT.—The pamphlet on Gutta Percha, referred to lately, is by Mr. W Dalton, and contains a variety of information on the plant and the gum company, well arranged. The Gutta Percha may be seen growing in the Royal Botanic Gardens at Kew, which contain one of the finest plants in the known world. The Victoria Regia is now blooming profusely
[illegible] The arms of Harrison, of Yorks., are "As. three demi-lions rampt. or."
[illegible] answered by our correspondent
R. P. [illegible] invariable rule, within the last 70 years, to knight the Attorney and Solicitors General; but there are instances to the contrary, as in the case of Sir Edward Spencer Perceval, who held the office of Attorney-General in 1802 to 1806, never received knighthood
J. H. T. Rochdale.—The usage of a crest on a seal or ring will subject the bearer to the tax on armorial bearings. Apply to Messrs. Hume
O. J.—Application should be made at the East India House, Leadenhall-street
HAMPSHIRE.—The name of the applicant for a commission can be on the Commander-in-[illegible] some considerable time before an opportunity will occur to purchase one. Influential interest at the Horse Guards is very important. Furnival and Parker, the military booksellers, will doubtless be able to supply what our Correspondent wishes
BOUVERIE.—A lady is not entitled to use a crest either on a seal or on plate
C. B. Globe Tavern.—Answers to the questions on the plant and its [illegible] given in Burke's "Landed Gentry"
TED.—The arms of Bengh are "As. three fleurs-de-lis erm. within a bordure or. *Crest:* A lion sejant collared and lined or."
DUBLIN.—There are several crests to the different families of the name in question. In what [illegible] inquiries to be directed
QUERIST.—The expense of obtaining a grant of armorial bearings is about seventy-five guineas [illegible] application to be made
CONSTANT READER.—The arms submitted do not appear to us to have ever been registered. [illegible] by Lord Lyon, before any such application is made to office will be necessary
BOUVERIE.—A lady is not entitled to use a crest either on a seal or on plate
C. B. Globe Tavern.—Answers to the questions on the plant and its [illegible] given in Burke's "Landed Gentry"

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, OCTOBER 12, 1850.

THE policy pursued by the King of Prussia in furtherance of his ambitious and personal designs for the aggrandisement of his territories and the elevation of the Prussian Kingship into the Emperorship of United Germany, has led him into many difficulties, and will, to all appearance, lead him into many more. Not the least of them is his position with regard to the fratricidal war in Schleswig-Holstein. It was in his interest, or in the interest of that party of which he claims to be the head, which desires to round off United Germany with Schleswig-Holstein, that the dispute between Denmark and the Duchies was aggravated into a war. It is Prussian influence that prevents, at the present time, its satisfactory termination.

The negotiations of Messrs. Sturge and Burritt, of which we gave the particulars last week, as every one knew they would, have failed to prevent the obstinate Schleswigers from attacking the Danes. The war rages with intensity; and Friedrichstadt, after suffering a barbarous siege, has been almost burned to the ground. What can arbitration do in such a case? Arbitration is as useless as it would be between two mad dogs or two mad men, unless it should take the shape of a policeman with his truncheon. By superior force of arms, and by his arbitrary and irresistible authority, the policeman might restore peace by cracking the heads of both dogs, or by marching off both the belligerents to the station-house; but what could the pure reason of all the Sturges and all the Burritts in the world do, to put an end to either spectacle? So it is in the case of this deplorable war in Denmark. There will be no end to it until one of the combatants shall have so crippled the resources of the other as to render prolonged resistance impossible, or until the greater powers, acting as the general police of Europe, shall make war upon both, and coerce them into quietness. The quarrel, from first to last, is a disgrace to civilisation. Prussia, of course, will not move in the matter; but we see it stated that Great Britain, Russia, and Austria have undertaken to settle the difficulty. Although the statement needs confirmation, we have little doubt that such a consummation, or one very like it, will sooner or later take place. An army of occupation would be the best arbitrator; but as this would not suit Prussian purposes, it is likely that a new difficulty will arise in that quarter.

In Hesse-Cassel the position assumed by this protean power is strangely at variance with her recent acts in her own territory. The position of affairs in that small state continues to arrest the attention of all admirers of rational and constitutional freedom. The people are as quiet as if nothing had occurred. They make no tumults, hold no public meetings, and give vent to no anger or even impatience. They meet illegality by legality, and tyranny by passive resistance. The Elector has issued an ordinance declaring that the courses of law have no jurisdiction whatever in regard to past, present, or future ordinances that have issued or shall issue from himself. The whole country is placed under martial law, and the dictatorship of General Haynau—not he of Hungarian and Bankside notoriety, but another soldier of the same ill-omened name. Attempts have been made to dissolve the Burgher Guard, for persisting to take its command from the civil authority, as heretofore, and not from Haynau and the Elector. The Standing Committee of Legislature has issued a calm and energetic protest against these ordinances and the policy of the Elector; the Burgher Guard have refused to give up their arms; and the regular troops, having manifested a disposition not to compel them to do so, have not been asked to perform the unpopular service. And what does Prussia do, under the circumstances? Prussia, that dissolved her own National Guard—that placed her capital under martial law—that established a Dictatorship, under General Von Wrangel and whose King, with professions of liberality on his lips, enacted the despot with as hearty a good-will as was ever displayed in history? Prussia takes part with the people of Hesse-Cassel; encourages them in their resistance to the Elector, and announces, with a view of checkmating the Emperor of Austria, that no intervention by the authority of the Central Diet shall be permitted, and declares that such an intervention would amount to a *casus belli*. Had the King of Prussia been an honest and disinterested politician—a true friend to that cause of sound constitutional liberty, of which at one time he could speak so learnedly—and a man who cared a little less for dynastic aggrandisement, and a little more for the eternal principles of truth and justice, he might have been able at this, as well as at former periods of his career, to have been of essential service to the whole German people. But at present he stands alone—mistrusted by everybody. Austria, as representative of the Conservative principle, is in avowed opposition to his projects; his own subjects have no confidence in him, and suffer from a despotism which they will only endure until they are strong enough and wise enough to settle satisfactorily the future relationship between themselves and their Sovereign; and the Liberal party in Hesse, and in every other German state, considers him—whatever he may pretend, or whatever position he may temporarily assume—as its worst foe. In the meantime, the Hessians accept his aid without being grateful for it; and the affairs of Central Europe remain in a state of very considerable perplexity, if not of danger. The King of Prussia plays fast and loose with principles; and whatever may be the result of the great struggle that is now going on throughout Germany, and which develops itself in such different ways in Schleswig and in Hesse—in Saxony and in Schwartzenburg—in Austria Proper and Venetia—he chances seem to grow daily less in favour of King Frederick William. The cause of constitutional freedom, under a limited form of monarchy, of which he might have been the champion, loses ground, and the issue narrows itself to a military despotism, under the leadership of Austria, as one result—or to a confederation of republics as the other. There can be no doubt that King Frederick William has played a cunning game; but it is the fatality of cunning to overreach itself; and his present position, among the multiform complexities of German politics, teaches the world that fact, if it teach nothing else.

Railway communication will be given between Frome and London in the course of a few days by the opening of the line from Westbury to Frome. Captain Laffan, the Government Inspector, went over the line on Friday week. Its cost has been about £100,000. The clothing traders and colliers in and around Frome are expected to make this part of the line most remunerative.

The total amount disbursed by the General Board of Health for inspection expenses, to the 31st of March last, was £3084 6s. 9d., no part of which has yet been repaid from local funds. The travelling and personal expenses of the Commissioners in Lunacy (seven in number), for the year ended the 31st of July, 1849, was £2355 11s. 11.

The Rev. F. W. Trenow, Curate of Bartley green, Northfield, was received into the Roman Catholic Church on Saturday se'nnight, at the Roman Catholic cathedral in Birmingham, by the Rev. Dr. Ullathorne; and on Saturday 1st, Henry Alban Arden, Esq., of Dorchester, a relative by marriage of the above rev. gentleman, who also received into the same church, at Lulworth, by Father Montardier

ROYAL MAIL STEAM-PACKET COMPANY.—The half-yearly general meeting of the directors and shareholders of this company was held on Thursday, at the London Tavern; Mr. T. Baring, M.P., presided. The report showed an increase on the receipts of £11,715 4s. 4d., and a decrease in the expenditure of £5,515 11s. 11d. It also stated that the directors had effected a new arrangement with her Majesty's Government for the conveyance of the mails to the Brazils and the River Plate, at a contract of £270,000 per annum. This announcement was received with great acclamation by the shareholders. The directors, in their report, recommended a dividend of £2 per share on the paid up capital—a suggestion which was unanimously agreed to. A vote of thanks to the chairman closed the proceedings.

POSTSCRIPT.

THE REVENUE.

The Revenue accounts for the quarter and the year ending Thursday, the 10th instant, have been published, and from them we find that, though there is a small decrease upon the last quarter's revenue, as compared with that ending October 10, 1849, there is, upon the whole year, a considerable increase.

The items of comparative increase and decrease are as follows:—

DECREASE ON THE QUARTER ENDING OCT. 10, 1850.

Customs	£1,389
Excise	141,731
Stamps	174,719
Taxes	14,444
Property Tax	95,642
	£427,928

INCREASE ON THE QUARTER.

Post-office	£3,000
Miscellaneous	6,825
Total ordinary Revenue	9,825
Imprest and other Monies	1,481
Repayments of Advances	127,614
	138,920
Net Decrease on the Quarter	£289,008

INCREASE ON THE YEAR ENDING OCT. 10, 1850.

Customs	£81,242
Excise	1,185
Taxes	8,185
Property Tax	30,502
Crown Lands	30,000
Miscellaneous	4,032
	£585,141

DECREASE ON THE YEAR.

Stamps	£182,433
Post-office	32,000
	£214,433
Net Increase on the Year	£470,708

LATEST FOREIGN NEWS.

FRANCE

In our accounts of yesterday (Friday), from Paris, the event of importance is the grand review which took place on the preceding day as appointed, on the plains of Satory, near Versailles. The numbers present to view the scene were immense. Louis Napoleon arrived on the ground at eleven o'clock, and was well received both by the troops and by the spectators. At three o'clock the military evolutions were brought to a close, and both soldiers and bystanders withdrew in perfect order.

The municipal elections at Campan, Hautes Pyrénées, and at St. Etienne, Loire, have terminated in favour of the Conservative party.

SCHLESWIG-HOLSTEIN

Advices from Hamburgh of the 8th inst. mention that the repeated defeats of the Holsteiners before Friedrichstadt had induced them to abandon all further attempts against the place, and to withdraw to their encampments. The heavy guns had been taken back to Rendsburg. The two armies were again in the same position they occupied before the 29th of September

HESSE-CASSEL.

The accounts from this quarter are to the 7th instant. They state that the deputation from the Supreme Court of Appeal had had an interview with the Elector at Wilhelmsbad, but that they could not induce him to acknowledge his error, or promise any favourable consideration of their claims. On the contrary, he had refused to hold further conversation with them. The deputation bowed and retired.

MOROCCO.

We have accounts, viâ Madrid, of the 5th instant, from Ceuta, announcing serious disturbances in the Moorish empire. The Pacha of Fez had fled, and the people had taken possession of the gates of Tetuan. The cause of this insurrection is said to be owing to a decree issued by the Emperor, demanding that the hides of all slaughtered animals should henceforward be considered his exclusive property

METROPOLITAN NEWS.

EXTENSIVE SEIZURE OF STOLEN PLATE.

The apprehension by the police, at the close of last week, of Mr. Thomas Charles Sirrell, an extensive and old-established dealer in gold, silver, and jewellery, carrying on business at 53 and 54, Barbican, in the City, caused great astonishment to all acquainted with the parties.

The circumstances which led to it were as follows:—For some time past, burglaries of a very daring character have been continually taking place in the outskirts of Liverpool and the neighbouring towns, and every stratagem was resorted to with a view of detecting the thieves, but without avail. A few weeks ago, however, a daring burglary was committed at the residence of the priests attached to St. Anthony's Roman Catholic Chapel, in Scotland-road, when not only was a lot of plate belonging to the sacred edifice carried off, but also the whole of the vestments, a large amount, which had been used on the previous day in aid of the chapel funds. This was followed by a robbery of a more daring and extensive character. The mansion of the Rev. Mr. Fisher, of the Roman Catholic Chapel at Little Crosby, was entered, the sacristy broken open, and the whole of the massive silver vessels used for sacramental purposes purloined, besides a quantity of other description of plate. At the time not the least trace could be obtained of the burglars or of the spoil, but last week the Liverpool detective obtained possession of a letter addressed to Mr. Sirrell. The contents offered to him for sale a certain description of plate, and the circumstance of its answering the character of that stolen from the chapel aroused suspicion. Having satisfied themselves as to the authors of the letter, they re-sealed it, and forwarded it through the post to Mr. Sirrell, in Barbican, having previously arranged the security of the answer, should one be forwarded. Mr. Sirrell duly replied. The letter was sent by the police, and afterwards delivered to the parties to whom it was addressed. On that same evening two boxes were sent by the London and North-western Railway from Liverpool, directed to Mr. Sirrell, 54, Barbican. Within a short time after the departure of the boxes, two men of rather respectable appearance, named Martin M'Gure and William M'Auley, were arrested in the vicinity of the town, and Mr. Kehoe, an expert member of the detective force, also took the necessary steps in the matter. On reaching the metropolis, Kehoe obtained the aid of Inspector Lund and Sergeants Whicher and Shaw, of the London detective force, who accompanied him to Mr. Sirrell's house. After some hesitation Mr. Sirrell, at the commencement of the inquiry that they were the parties they represented themselves to be) they were admitted, and in the shop were found the two boxes which had just arrived by railway. On their being opened there was found a quantity of large ornamental vessels, and in the other box was a quantity of smelted silver, with M'Guire's name written upon a piece of paper. It should be stated that Mr. Sirrell had admitted that he had received a letter from Liverpool in respect to the purchasing of some plate, and on a file in the counting-house was a letter from M'Auley relative to the sacramental vessels. Mr. Sirrell was then informed that he must consider himself in custody on suspicion of receiving stolen goods; and, a telegraphic message having been forwarded to Mr. Dowling, the superintendent of the Liverpool force, arrangements were made for Mr. Sirrell's immediate removal to Liverpool.

During this proceeding, the detectives made a careful examination of the stock on Mr. Sirrell's premises, and from a variety of circumstances they felt justified in removing it to Scotland-yard. It comprised plate and jewellery of every description, consisting of manufactured silver and silver in bar, gold and silver watch-cases, rings, brooches, and other articles of as costly a character, the whole amounting to a value of little less than from £80,000 to £90,000. The seizure appears likely to bring to light robberies of an important character in London and elsewhere. Already two owners of purloined articles have identified their property among the stock of Mr. Sirrell. Mr. Argent, of the Rainbow Tavern, Fleet-street, has recognized plate belonging to himself from which the mark had been almost obliterated. Mr. Lovegrove, of the London Coffee-house, has also claimed some spoons and forks, and the proprietor of Dolly's Chop-house, in Paternoster-row, has communicated with on the subject of some articles supposed to have been stolen from his coffee-room.

Mr. Sirrell was one of the largest purchasers of silver and jewellery in the metropolis, probably in the kingdom, and it is said the house was well known in the trade as giving the best price. He never attended public sales, but bought very largely of small dealers who did, and it was well known amongst them that at they could with confidence send their plate to him, and depend upon getting the highest value it could produce in the market. Since his apprehension the shop has been closed

On Tuesday, M'Auley, Maguire, and Sirrell were brought before the magistrates at Liverpool, when the stolen property was produced and was recognised by the Rev. Mr. Fisher, his servant, and another person. The accused were remanded to Tuesday next, both on the charge of robbing Mr. Fisher's house and that of Mrs. Finley, of Toxteth-park.

ROYAL FREE HOSPITAL.—A quarterly meeting of the governors of the Royal Free Hospital was held on Wednesday, in the board room of the institution (Gaunt Rookwrgh in the chair), when the report from the weekly board stated that 6591 patients had been under treatment during the last quarter, that the expenditure had exceeded the income by £227, but that the committee felt the strongest hope that, through the benevolence of the public, there would be no necessity for diminishing their sphere of usefulness.

CHURCH-RATES.

CLERKENWELL.—On Wednesday evening a public meeting was held at the Crown Tavern, Clerkenwell-green, to devise means of resisting a new church-rate made by the trustees of the parish on the 18th ult. The chair was taken by Mr. G. Cruchley, overseer and trustee. Mr. Mason, a poor-law guardian, proposed a resolution expressing surprise and indignation at the intolerant conduct of the trustee board, in attempting to levy another obnoxious rate for church purposes, and characterising the act as unnecessary as well as illegal, and calculated to create prejudice and to foster animosities and dissensions among the parishioners. He said it was to be regretted that men in office should set public opinion at defiance. Though the rate now about to be enforced was only one penny in the pound, yet the principle involved was of great importance. The pretence for levying this new rate was the repairs recently made in Pentonville Chapel; but in truth, while the amount expended there was about £200, the amount sought to be raised was £750, or more; as three times what was required. The parties to this unjust impost had been invited to attend, and to be called upon them to defend the course pursued. Notwithstanding the improvement which had taken place recently in some branches of trade, there was still so much distress in the parish as to render the levying of the proposed rate as oppressive as it was unjust. Mr. Bidel, a tenant, said that in board he had paid that the repairs of Pentonville Chapel had cost about £250. Then there was £30 a year for the beadle's salary, and some further expenditure might be required for the suppression of bad houses. He had put the question whether a halfpenny rate would be sufficient, and the reply was in the negative. In signing the authority for the rate, he conscientiously believed that he was taking a proper step. Even the chairman of the meeting declared that he would support a rate of one halfpenny. The resolution was carried unanimously. On the motion of Mr. Bennett, seconded by Mr. Moore, the meeting pledged itself to aid by every means in its power a determined opposition to the rate.

ST. JOHN'S, SOUTHWARK.—On Wednesday, the long-protracted struggle on the question of the imposition of a rate for the repairs, &c., of the parish church of St. John's, Southwark, was brought to a final termination, and the fourpenny rate, in opposition to a motion for a six months' adjournment of the vestry in order that in the meantime the present wardens should be out of office, was carried by a majority of 82. The announcement was received with loud cheers by the church party, who directed a merry peal to be rung in celebration of their triumph.

SITTINGS OF THE INSOLVENT DEBTORS COURT.—The Court sat for business at Portugal-street, Lincoln's-inn-fields. The several Courts will be soon open for the [illegible] of insolvent debtors. For [illegible] the 24th of September, when the three commissioners, excluding Mr. Commissioner Harris, absent from indisposition; but it has been suspended, in the expectation that Mr. Harris, who has not sat for some months, would discharge his duties as a Commissioner in Court.

THE LATE BARONESS DE ROTHSCHILD.—At a public meeting of members of the Jewish persuasion, held on Wednesday evening, at the Sussex Hall, Leadenhall-street, an address of condolence to Baron de Rothschild, M.P., and family, on the loss they had sustained by the death of the Baroness de Rothschild, and the establishment in the Jewish schools of a scholarship, to be called the "Hannah Rothschild Scholarship," were resolved on, and a subscription was commenced for the latter purpose

GREAT CHESS MATCH.—Arrangements are in progress for a great chess match, to be played by "amateurs of the Chess Divan," during the Exhibition of 1851. The idea originated with Mr. Staunton, the first known player in the world; and the first to respond to it was a player at Calcutta, who has forwarded a handsome subscription. It is proposed to have a number of "chess tournaments." The entries to be £5 each, and the first prize £500. Another suggestion is, that the English chess clubs shall each send a champion player, with a moderate sum as entrance money, and the winner of the match to receive the prize, in the form of a handsome trophy, in silver.

THE SERPENTINE.—Mr. Lilwall, honorary secretary to the "Serpentine Purifying Association," having addressed Lord Seymour on the subject of additional water supplies to the Serpentine, received a letter from his Lordship in reply, informing him that the water in question is largely supplied from the Chelsea water-works and the Orange-street works, and that steps are now being taken to make an accurate measurement of the whole supply. With reference to Mr. Lilwall's proposal to have water conveyed from the Exhibition Building to the Serpentine, Lord Seymour states that he considers such a plan objectionable.

WESTMINSTER REGISTRATION.—On Wednesday, J. F. M'Queen, Esq., the Revising Barrister, held a Court, in the Duke's Chamber's Court, Westminster, for the revision of the list of voters for the city and liberty of Westminster. There were 32 new claims and no objections. The proceedings presented no feature of interest

EAST GREENWICH RAGGED SCHOOLS.—The annual meeting of the friends and supporters of this institution took place on Wednesday evening, at the Literary Institution, Blackheath. Captain Bowley, R.N., presided; and there was a numerous attendance of the ladies and gentlemen of the neighbourhood. The chairman, in introducing the business, stated in proof of his conviction that a large amount of good had been effected already, notwithstanding the short period during which the schools had been in operation, that, to his knowledge, one of the boys taught in the ragged school, having found a sovereign, instead of applying it to his own use, took pains to discover the party who had lost it, and restored it forthwith. (Loud cheers.) The report stated that the East Greenwich Ragged Schools were commenced in 1847; they were situated in Norfolk-place, to the east of Greenwich Hospital, in the midst of a population of 15,000 inhabitants, and were conveniently placed in the vicinity of London The establishment consisted of two working divisions. First, an Evening Ragged School, which met thrice a week, and in which all the teachers, including the superintendent, were Infant Schools, were voluntary. The average attendance for the past six months had been about eighty. Secondly, an Infant Ragged School, which was superintended by a committee of ladies, who took it in turn to attend daily, and also undertook to collect the funds necessary for its management, about £70 per annum. The moneys received were distributed in the Scriptures, reading, writing, arithmetic, &c.; and great care was taken to exclude those from other schools, or whose parents could afford to pay for instruction elsewhere. The average attendance for the past year was 120 boys and 80 girls and seventy girls, and the progress was most satisfactory. The buildings for the schools were now completed; and about £70 was required to defray their expense, and place the schools in an effective working condition. The treasurer's account showed a gross receipt of £302, of which £23 has been paid for rent and taxes up to 1849, £100 for the lease of Norfolk-place, £66 to Mr. Trafford, the builder (leaving £30 due), and the remainder had been disbursed in the management of the schools.

ROYAL FREE HOSPITAL, GRAY'S-INN ROAD.—The weekly board thankfully acknowledge the receipt of a Bank of England note for £50, No. T 0 [illegible], dated May 9th, 1846, found in the subscription-box at the gates of the Hospital. Oct 9th, 1850.

ENTOMOLOGICAL SOCIETY.—The usual monthly meeting of this society was held on Monday evening; G. R. Waterhouse, Esq., president, in the chair. Mr. Guyon and Mr Potter were elected subscribers to the society. Mr. M. S. Stevens exhibited some beautiful new *Lepidoptera* he had received from Mr Bates, from *Ega*, on the Upper Amazon; Mr. Shepherd exhibited specimens of *Papilio Aristolochia* from Dover; Mr. Bond called attention to specimens of *Cupa*, and a curious variety of *Sphinx Ligustri*. Mr. Westwood exhibited a *Cucullia asteris-punctata* and a lepidopterous larva impaled on the thorns of furze bushes, which had been found in Scotland by Mr. Gray, of Dundee, and which he supposed to have been so impaled by shrikes, as these birds are not known to occur so far north. An extremely interesting paper by Mr. Newman, "on the various ways different species of bees have of abstracting honey from snapdragons," was then read.

THE ROYAL AGRICULTURAL SOCIETY OF ENGLAND AND THE EXHIBITION OF 1851.—In accordance with the proposal made by the council at the last annual meeting of the Royal Agricultural Society of England, the next great show will be held in Hyde Park, contemporaneously with the Exhibition of the works of all nations. It is, however, to be exclusively confined to the show of cattle, the agricultural implements and machinery of the exhibition being under the superintendence of the commissioners. His Grace the Duke of Richmond, as president of the society, having submitted the proposal to the Commissioners of the Woods and Forests, it was promptly adopted. The cattle show will be held in the north-west angle of the Park, called the "Battery," extending from the boundary wall of Kensington Gardens to the Serpentine River; giving a clear space of nearly 40 acres of ground, which will be surrounded with temporary buildings, and the interior fitted up with cattle sheds. The approaches are to be from the Bayswater side of the Park, so as not to interfere with the Exhibition. The council have determined to offer the same premiums and prizes for stock that have been customarily allotted, as an additional inducement to competition. The commissioners of the Exhibition having provided for the implement department, the sum thereby set apart by the society for that purpose, amounting generally to about £400, becomes available.

THE HUNGARIAN REVOLUTION.—On Wednesday afternoon a meeting of the Hungarian refugees now resident in London was held at the Hanover-square Rooms, on commemoration of the late struggle for the independence of their native country. There were a good many ladies present, and some English gentlemen who sympathise in the cause. The meeting was not conducted in the usual way that Hungarian meetings are. The movement appears to have originated with some six or eight patriotic Hungarian gentlemen, who successively delivered orations in reference to the subject, with great animation, and which were enthusiastically applauded by the audience. With one exception, these addresses were in the German language, and were therefore not generally understood. It was understood that it is the intention of the committee to draw up an address to the Hungarian nation in reference to the massacre of Count Batthyany and others who fell in the late conflicts.

FATAL ACCIDENT AT WOOLWICH.—On Tuesday, about half-past twelve o'clock, a boat belonging to the *Dolphin*, revenue cutter, containing five men, one a Custom-house officer, and four rowers, when leaving a brig they had boarded opposite Woolwich Dockyard, cast off at the moment the *Sylph*, Woolwich Company's steam packet, was approaching; and before the boat could get out of the way and the steamer eased, it was cut in two, and the whole of the men went under the wheel of the steamer. Four of the men were saved with the assistance of the boat belonging to her Majesty's dockyard lighter the *Area*, and taken on board the *Lightning* steam-vessel. One of the men, named Manning, was drowned, and another severely hurt. There is no blame whatever attached to the *Sylph*, as her cat fish and crow did all in their power, under the circumstances, to avert the melancholy accident. The drowned man has left a wife and three children to lament his loss, and the body has not yet been found.

CAUTION TO STEAM-BOAT PASSENGERS.—On Tuesday evening, Mrs. Anne Coleman, of 30, Queen-street, Horsleydown, Southwark, was landing at the London-bridge Steam-packet Wharf, from a steamer, when, in her anxiety to get ashore before the vessel was properly secured, she slipped overboard between the vessel and dummy, and, owing to the darkness, sank, and was drowned. She has left a numerous family to regret her untimely end.

FOREIGN GRAPES.—The annual importations of the fine description of grapes known as the Black Hamburgh grape have just commenced taking place in considerable quantities. They are this season of large size and fine quality.

BIRTHS AND DEATHS.—The births registered in the week ending October 5, in the metropolitan districts, were—Males, 680; females, 722; total, 1402. Deaths during the same period: Males, 468; females, 435; total, 893. In the corresponding weeks of ten years (1840-9) the average was 1170, which, if a certain proportion be added for supposed increase of population, becomes 1038; the present rate of mortality, therefore, continues unusually low, and the decrease of last week amounts to 145 deaths. The class of zymotic or epidemic diseases exhibits in this return 195 fatal cases. This is a lower number than in any corresponding week since that of 1846, when there were 179; in those of the three following years the deaths from epidemic diseases were respectively 318, 430, and 608. Last week small-pox was fatal in 10 cases; measles in only 7; hooping-cough in 27; scarlatina in 31. A death from the last-mentioned disease occurred in Mill-street, St. James's, Bermondsey; and Mr. Martin, the registrar, observes that, out of ten deaths which he registered during the week, six, arising from various diseases, occurred within a few yards of the blind asylum, Asylum-road, "yet the infectious influence remains unabated." The mortality from diarrhœa and dysentery continues to decline; the deaths, which in a week of August rose to 155, have now fallen to 47. It is worthy of note that 13 deaths occurred in the workhouse, Whitechapel (North Mid-dlesex), all with one exception, between the 27th of September and the 4th of October; and, of these, 7 were caused by diarrhœa, 2 by fever, and the remaining 4 by various causes. Seven deaths from cholera (6 of which were among children) were registered last week, a number which is rather more than has been usual lately. The following are the cases in detail:—In St. Mary Paddington, at 7, Hall-place, on the 30th of September, a grainer, aged 9 years, "cholera spasmodica (48 hours), subsequent fever (3 days)." In All Saints, Marylebone, at 38, Union-street, on the 1st of October, the son of a brickayer (deceased), aged 3 years, "bilious cholera (2 days), convulsions (8 hours)." The child was healthy up to the time of attack, which suddenly commenced with bilious vomiting. In the same sub-district, at 39, Ivory-street, on the 1st of October, a coachmaker, aged 44, "rheumatic fever, aggravated diarrhœa, cholera." In Somers Town, at 61, Brill-row, on the 24th of September, the son of a plasterer, aged 20 months, "English cholera" (*post mortem*—inquest). In Islington West, at No 6, Payne-street, on the 27th of September, the daughter of a brickayer, aged 15 months, "cholera infantum (one day)." In St. Mary, Strand, at No. 2, White Lion-street, St. Clement Danes, on the 2d of October, the son of a blacksmith, aged 6 years, "cholera infantum, English cholera (36 hours), subsequent fever (3 days)." In All Saints, Marylebone, at 38, Union-street, on the 1st of October, the son of a brickayer (deceased), aged 3 years, "bilious cholera (2 days), convulsions (8 hours)." The child was healthy up to the time of attack, which suddenly commenced with bilious vomiting. In the same sub-district, at 39, Ivory-street, on the 1st of October, a coachmaker, aged 44, "rheumatic fever, aggravated diarrhœa, cholera." In Somers Town, at 61, Brill-row, on the 24th of September, the son of a plasterer, aged 20 months, "English cholera" (*post mortem*—inquest). In Islington West, at No 6, Payne-street, on the 27th of September, the daughter of a brickayer, aged 15 months, "cholera infantum (one day)." In St. Mary, Strand, at No. 2, White Lion-street, St. Clement Danes, on the 2d of October, the son of a blacksmith, aged 6 years, "cholera spasmodica

BREAKFAST-ROOM AT HOLYROOD.

HOLYROOD PALACE.

This historically interesting seat of Royalty has just acquired additional interest by the recent sojourn of her Majesty within its walls, when upon her route to, and returning from, Balmoral.

It will be recollected that certain of the apartments in Holyrood have been refitted for her Majesty's stay, and we are now enabled to present to our readers the accompanying Views of the two rooms.

The Breakfast-room is a nice, snug-looking room, partly wainscoted, and partly papered. The wainscoting in this, as in the other rooms forming her Majesty's suite of apartments, has been cleansed from the paint of other days, and has a beautifully rich appearance. The fireplace is of very bold and effective design and execution. The ceiling is coved and deeply coffered, forming a circular panel, surrounded by a very freely wrought wreath border. The coving has the arms of Scotland at the two ends of the room, and figures holding shields bearing the monagram of Charles I. at the sides. In the spandrils of the ceiling are groups of military weapons, flags, armour, &c. All the furniture is modern.

Mary Queen of Scots' Bedroom is one of the suite of apartments in the north wing of the Palace. It is more interesting than the other rooms, not only from the tragedy of which it has been the scene—the murder of David Rizzio—but from its extremely antiquated character. The ceiling, as far as the moulded compartments are concerned, is in its original character; but the painted enrichments within them are of later date, and are quite at variance with the tales of the old lady who shows the apartments, and who instils into the minds of all who visit the rooms, that every thing is in the state it was in when Mary left Holyrood. The compartments of the ceiling are of diamond and hexagonal form, the diamond spaces containing circles, whence issue four sceptres, the circles having "J. R." and "M. R." in them alternately. The hexagons are ornamented by painted borders, with the St. Andrew's Cross, St. George's Cross, the portcullis, the harp, the rose, and the crests of England and Scotland. On the walls are some old tapestry, representing the story of Phaëton and his sisters. The bedstead, covered with red damask, is of the date of the middle of the 17th century; but the chairs are not much earlier than William III.'s time. These, and a tripod, placed near the foot of the bed, but omitted in our representation, are stated to have been Queen Mary's. The doorway having portion of the tapestry drawn on one side, leads into the little room in which Mary sat with Rizzio at supper, when Darnley, Douglas, and the armed confederates seized the unhappy man and assassinated him. The door of the secret stair by which they entered is close to the angle of the room, and is left dark in the Engraving; it is partially covered by the tapestry. The pictorial embellishments of the room are merely old prints, in bad condition, in dingy black frames. The fire-place contains its old grate, a rude piece of iron-work of Charles's time. In fact, despite the assurance of the cicerone, there is no doubt the general decorations are those made for Charles on his visit to Holyrood. Within the little chamber where Mary sat, a very small apartment indeed, having no other decoration than some dingy tattered tapestry, are some vile bits of common trooper's armour and jack-boots of James the Second's time, foisted on the stranger as relics of Lord Darnley! A long staff, like a very long handle to a broom, is said to be that of Darnley's spear! It might have belonged to the scullion or stable-keeper, perhaps, but never Darnley.

MARY QUEEN OF SCOTS' ROOM.

The sitting-room newly fitted for Queen Victoria is a very handsome apartment, the ceiling being particularly fine. The walls of the room are wainscoted with dark oak, which, having very recently been cleansed from the obnoxious paint of the last century, imparts a rich appearance to the room. The ceiling is deeply coffered and paneled, and the coffering excessively enriched with pendant festoons of flowers, modelled with wonderful spirit; the ceiling within being painted a negative greenish tint and ornamented with a beautiful monogram of Victoria and Albert, roses, thistles, shamrocks, and fleurs-de-lis in gold. The panels at the corners of the room have on them wreaths, crowned, supported by boys issuing from scroll-work, and holding emblems of regal power. Within the wreaths are the monogram, "C. R.," as it was in the reign of Charles the First that this and several other ceilings in the state apartments were put up. We should also mention that these ceilings were executed by a company of foreign artists, who travelled through Scotland in the seventeenth century, and who did many similar works in the mansions of the nobility. The entablature and architrave to the room are very highly enriched, every flower being of different design. The fire-place is of oak, and very handsome; part of the walls, we should have observed, are covered with very old and somewhat faded tapestry. Of the furniture in the sitting-room, there is not any older than William the Third or Queen

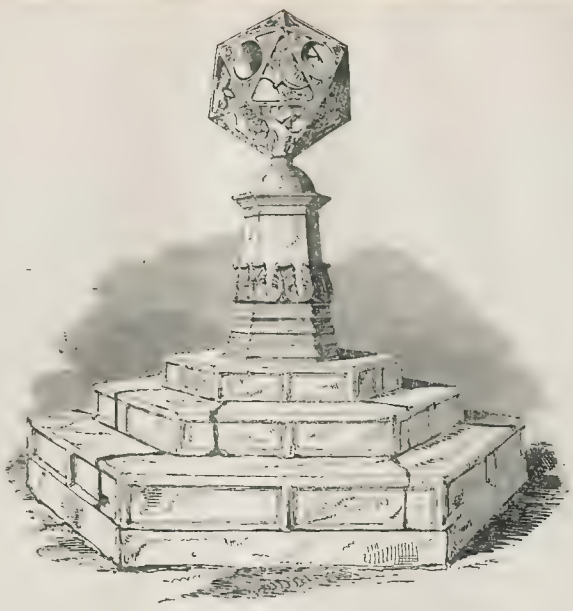
Anne's time, the old furniture consisting of some fire-screens, chairs, and a settee; they are covered with old needlework, representing various mythological subjects. Some of the new furniture is of a very beautiful description, particularly a cabinet of walnut wood. The doors at either side of the room, near the windows, lead to the bed and dressing-rooms, all elegantly fitted up.

We annex a brief history of the Palace:—

Early in the twelfth century, the pious magnificence of David I. raised a splendid church and abbey on this spot. Afterwards, it became the frequent resort of the Scottish monarchs; but we have no means of ascertaining at what period buildings were erected constituting it a palace and distinct residence of the Sovereign. The oldest parts of the present structure are the remains of the tower at the north-east corner, erected by James V. in 1528, containing Queen Mary's apartments. In the minority of Queen Mary, a considerable part of the old palace was burned by the English; but it was soon after repaired and enlarged, and then contained five courts. The west, or outermost court, was larger than the others. It was bounded on the east by the front of the Palace, which occupied the same space with its present front, and also extended farther south The three remaining sides of the outer court were bounded by walls; and at the north-west corner there was a gate, or Gothic porch, arched inside, with two round towers on each side of the entrance. This was also the gate of the adjoining abbey, and was taken down in 1755. The next court occupied the same space as the central court of the present palace, and was surrounded with buildings. On the south there were two smaller courts, also surrounded with buildings; and on the east there was another court, which was bounded on the north by the Chapel Royal, on the west by a line of buildings, occupying the same ground as the east side of the present palace; on the south by a row of buildings, which are now demolished; and on the north by a wall, which divided it from St. Ann's Yards.

The soldiers of Oliver Cromwell made great havoc of the Palace, burning the greater part of it. At the Restoration, Charles II. ordered it to be rebuilt, after a plan by Sir William Bruce, in 1671. The walls of the eastern side, and other parts, have been of late years renewed and repaired, and the grounds immediately contiguous have been cleared and railed in.

The Palace is of a quadrangular form, with a court in the centre, surrounded by piazzas. The grand front consists of two large circular turretted towers at each end. A lower gallery, with a flat roof, extends from each of these, in the middle of which is the entrance gate, supported by four pillars, and bearing the royal arms; above which rises a cupola, supporting an imperial crown. The front walls of the interior quadrangles are ornamented with numerous Doric pilasters; and the whole square presents a very noble aspect. In the corner of the north quadrangle are Queen Mary's apartments, preserved in nearly the original state in which she left them.



SUN-DIAL, AT HOLYROOD.

On the same side of the Palace is a large hall, called the picture-gallery, disfigured by a number of wretched daubs, purporting to be a series of the Scottish kings. On the south side is another large apartment, where George IV. held his levees in 1822. The only ornament here is an excellent full-length portrait of that monarch in the Highland costume, by Sir David Wilkie.

The Duke of Hamilton, who is hereditary keeper of the Palace, has apartments here. Prince Charles Edward took up his temporary abode in Holyrood in 1745, and for a brief space the Palace was the gay scene of mimic royalty. For a long time it remained deserted, till in 1793 the French revolution drove the Count De Artois to seek an asylum in it. He again returned in 1830 as the deposed Charles X., and lived here with his exiled court for about twelve months. The Earl of Haddington, who was hereditary keeper of the adjoining King's Park, has now ceded his privilege to her Majesty; and the Royal demesne has of late been considerably improved.

The Sun-Dial, which we have engraved, is one of the most interesting memorials of Queen Mary at Holyrood.

It is placed in the centre of the garden attached to the Palace; it is still in excellent preservation, and it is usually denominated "Queen Mary's Dial." It is the apex of a richly-ornamented pedestal, which rests upon a hexagonal base, consisting of three steps. The form of the lodge is multangular; for, though its principal sections are pentagonal, yet, from their terminating in pyramidal points, and being diametrically opposed to each other, again connected by triangular spaces, it presents no fewer than twenty sides, on which are placed twenty-two dials, inserted into circular, semi-circular, and triangular cavities. Between the dials are the Royal arms of Scotland, with the initials M. R. (Maria Regina), St. Andrew, St. George, *fleurs-de-lis*, and numerous other emblems. This interesting memorial carries us back nearly three centuries, when Holyrood was a palace—

Where the rich viol answer'd to the lute,
And maidens flung the flowers from their hair
Till the halls swam with perfume: here the dames
Kept time with light harps, and with lighter feet:
And here "Mary of Scotland" kept her Court,
Where sighs and smiles made her regality,
And dream'd not of the long and many years,
When the heart was to waste itself away,
In hope, whose anxiousness was a curse;
Here, Royal in her beauty and her power,
The prison and the scaffold could they be
But things whose very name was not for her?

L. E. L.

HER MAJESTY'S APARTMENT AT HOLYROOD.

COURT AND HAUT TON.

RETURN OF HER MAJESTY FROM THE NORTH.

Her Majesty the Queen and his Royal Highness Prince Albert, accompanied by the youthful Princes and Princesses, and attended by the Ladies and Gentlemen of the Court, left their Highland home of Balmoral on Thursday morning, *en route* for the south.

The Royal party travelled post from Balmoral to Stonehaven, where her Majesty took the Scottish Midland Railway to Perth. The Queen and the Prince arrived at the St. Margaret's station about six o'clock on Thursday evening, and immediately proceeded, amid the acclamations of the people, to the ancient Royal Palace of Holyrood, where it had been arranged her Majesty should pass the night. The arrival of the Royal party in Edinburgh was celebrated by a grand illumination of the heights overhanging the city.

Her Majesty and the Prince Consort left Holyrood at eight o'clock on Friday morning, and arrived at Buckingham Palace at twenty-five minutes before eight last night.

The last few days at Balmoral were acutely enjoyed by the Queen and the Prince.

On Saturday, her Majesty and his Royal Highness, accompanied by the Prince of Wales, went to Mar Lodge to witness a drive for deer in Mar Forest. The Duke and Duchess of Leeds received her Majesty and his Royal Highness on their arrival. The Viscountess Jocelyn was in attendance upon her Majesty. At Balmoral, the same day, the dinner-party included her Royal Highness the Duchess of Kent, Lady Augusta Bruce, Baroness Speth, and Sir George Couper. In the evening her Majesty gave a ball to the tenantry in the neighourhood.

On Sunday, the Queen and the Prince attended divine service in the parish church of Crathie. The service was performed by the Rt. Rev. Archibald Anderson. The ladies and gentlemen of the household were in attendance upon her Majesty and his Royal Highness.

On Monday her Majesty and his Royal Highness Prince Albert drove out in an open carriage. The woods of Balmoral were afterwards driven for deer.

The Marchioness of Douro has been relieved as Lady in Waiting on her Majesty by Viscountess Jocelyn.

Sir George Grey attended her Majesty as Secretary of State in her progress from Scotland.

THE QUEEN OF THE BELGIANS.

We regret to announce that very alarming accounts of the health of her Majesty the Queen of the Belgians have reached England within the last few days. The ex-Queen of the French, mother of her Majesty, with the Princes and Princesses of the Orleans family, have left Claremont for Ostend, to be in attendance on the august patient.

On Saturday last the following bulletin was issued:

"The great weakness that has manifested itself in the state of the Queen during the last few days was increased last night by an attack of fever. Towards morning a slight improvement took place.

"SIR ROBERT CARSWELL, M.D.
"F. JANSENS, M.D."

"Ostend, October 5, nine o'clock, A.M."

On Sunday the symptoms were not more favourable, and the state of the patient was thus described by her medical attendants:

"The great weakness of the Queen continues. Her Majesty has passed a quiet night, but no improvement in the general condition of the august patient has taken place.

"SIR ROBERT CARSWELL, M.D.
"F. JANSENS, M.D."

"Ostend, Oct. 6th, Nine A.M."

The *Monsteur* of Tuesday, published at Brussels, contained no bulletin of her Majesty's health: the reason assigned being that the latest news from Ostend describes no change to have taken place.

The ex-Queen of the French brought with her from England her own physician in ordinary, Dr. Gueneau de Mussy, who has been the medical attendant of the Orleans family since their arrival in England. Dr. Mussy has had frequent conferences with Dr. Chomel, and appears to act in concert with the Queen's usual medical attendants. Sir Robert Carswell and Dr. Janssens.

A letter from Ostend, dated Tuesday night, says, "Queen Amelie, with her family, has many times the palace during the day to see her Majesty, who is exceedingly weak. M. de Coninck, the elder and primary *curé* of the Church of St Michel and Gudule, has been closeted with the Queen for some time." The King is constantly in attendance upon her Majesty.

A supplement of the *Monteur*, dated "Brussels, ten o'clock," contains the following:—

"We have only received this morning the following bulletin issued yesterday at Ostend:—

"'No important change has taken place since last night in the state of the Queen. The fever was, however, not so violent last night, and the weakness is consequently less this morning.

"'SIR ROBERT CARSWELL, D.M.
"'F. JANSENS, D.M.
"'H. GUENEAU DE MUSSY, D.M.P.'"

At noon a second supplement of the *Monsteur* was issued, bearing news up to the midnight preceding. It states that during the night her Majesty was less calm than in the course of the day. The pulse was weak and frequent.

Her Royal Highness the Duchess of Kent has arrived in town from Abergeldie House. Her Royal Highness paid a visit *en route* to the Earl of Morton, at Dalmahoy House.

His Royal Highness the Duke of Cambridge has arrived at Hanover, on a visit to the King of Hanover.

The Marquis and Marchioness of Douglas (*née* Princess Marie of Baden) are expected shortly in town for her Ladyship's *accouchement*.

The Marquis of Headfort and the Ladies Taylor have gone on a continental tour, and intend to pass the winter in Italy.

The Marquis of Northampton and Lady Margaret Compton have arrived at Ashridge Park, near Berkhampstead, on a visit to Viscount and Lady Marian Alford.

Viscount and Viscountess Palmerston have been entertaining a select circle of the nobility, during the past week, at Broadlands.

Viscount Strangford has left town, on a visit to his Majesty the King of Hanover.

We are happy to announce the safe *accouchement* of the Lady Georgiana Codrington. Her Ladyship gave birth to a son and heir on Wednesday, and, with the infant, is going on well.

Lord Brougham arrived in town from Brougham Hall last week, and has since left for Germany.

The remains of the late Lord Leigh reached London on Saturday last, from Bonn, in Germany, and were subsequently removed to Stoneleigh Abbey, Warwickshire, for interment. The funeral took place on Tuesday.

THE THEATRES.

SADLER'S WELLS.

The union of tragic and comic powers in one and the same performer is a rare incident in theatrical history. The experiment, however, tried with considerable success at this house on Friday week, and has since been triumphantly repeated. Shakspeare's comedy of "Much ado about Nothing" has been revived, with Miss Glyn in the part of *Beatrice*. The early scenes of *Benedick and Julia* had already convinced the best judges that there was a vein of genuine Doric *mixed* and comic wit in this intelligent actress, but none were prepared for the decided extent and finish of her powers in this respect. Miss Glyn's *Beatrice* is, in fact, a first-rate comic assumption—elegant, hilarious; replete, indeed, with spirit and badinage, under the control of a fine taste, and subdued by the judgment. Thoroughly Shaksperian in spirit and form, combining a delicate conception of character with outrageous humour and free from mere stageiness, yet exciting mirth in the most intelligent. We were forcibly reminded by it of Madame Vestris in her best days, and are prepared to welcome it as a genuine bit of comic nature full of auspicious omen.

The house was well attended, and the audience expressed their surprise and admiration by repeated plaudits

STRAND.

Mr. Butler Wentworth, a gentleman of considerable dramatic pretensions, put to the test at this theatre, on Wednesday night, his claims as a performer of the highest class. *Othello* was the rôle selected for the experiment. The first scenes promised well; but the remarkable success at this house on Friday week, and has since been triumphantly repeated. Shakspeare's comedy of "Much ado about Nothing" has been revived, with Miss Glyn in the part of *Beatrice*. The early scenes of *Benedick and Julia* had already convinced the best judges that there was a vein of genuine Doric *mixed* and comic wit in this intelligent actress, but none were prepared for the decided extent and finish of her powers in this respect. Miss Glyn's *Beatrice* is, in fact, a first-rate comic assumption—elegant, hilarious; replete, indeed, with spirit and badinage, under the control of a fine taste, and subdued by the judgment. Thoroughly Shaksperian in spirit and form, combining a delicate conception of character with outrageous humour and free from mere stageiness, yet exciting mirth in the most intelligent. We were forcibly reminded by it of Madame Vestris in her best days, and are prepared to welcome it as a genuine bit of comic nature full of auspicious omen.

Thoroughly Shaksperian in spirit and form, combining a delicate conception of character with outrageous humour and free from mere stageiness, yet exciting mirth in the most intelligent. We were forcibly reminded by it of Madame Vestris in her best days, and are prepared to welcome it as a genuine bit of comic nature full of auspicious omen.

The house was well attended, and the audience expressed their surprise and admiration by repeated plaudits

On Thursday, a new ballet, entitled "The Sultan's Dream," was produced at the OLYMPIC; and a new afterpiece, with the quaint title of "Lyttel Rodde Rydynge Hoode," by Douglas Jerrold.

The ST. JAMES'S THEATRE re-opens on Monday. The company has been strengthened by the addition of Mr. James W. Wallack, from America, Mr. Davenport, and Mr. Henry Bedford. Mrs. Warner and Mr. Hunter have also been re-engaged.

Webster's "Duchess of Malfi," adapted to the stage by Mr R. H. Horne, has been read at SADLER'S WELLS Theatre. It will be produced without delay.

A play by a Mr. Sloss, entitled "The Templar," has been accepted at the PRINCESS', and is now, we believe, in rehearsal.

EXTRAORDINARY GOOD FORTUNE.—A gentleman, while canvassing at the late election for the Hon. Edward Stanley, in Chester, was called in by an extreme old client, and told him to purchase the interest he had in some freehold property, by allowing him an annuity for his life. The gentleman entered into his views, and agreed to allow him the sum of one guinea per week as long as he lived. Before the expiration of the second week, the gentleman was again sent for to make the will of the annuitant, wherein he made him sole devisee and executor. The next day the old man died, leaving, among other property, a foreign letter, which he had received a day or two previous to his death. This subsequently proved to be the will of the old man's brother, who died abroad, written in Spanish, leaving all his property to his brother, the annuitant. The executor, therefore, by this dispensation, finds himself unexpectedly put in possession of property amounting to thousands of pounds, in addition to an extensive collection of books and paintings of great value.

MUSIC.

THE MUSICAL SEASON.

The operatic and concert campaign of 1850-51 in novelty, speculation, and extent of operations, bids fair to surpass any season on record. Independently of the influx of all the celebrated soloists of the age, there are undertakings in progress of unusual magnitude and importance, such as the importation of entire orchestras and singing societies from France and Germany. Our local institutions, alive to the rivalry which these advantages will no doubt excite, are preparing for the struggle with the novel enterprises at home, and with the opposition from abroad. The coming competition, whatever may be the result to the bold speculators, will be a gain for the public, and art and artists will be benefitted. It is not usual that the labours of the metropolitan critic are put in requisition during the month of October—the provincial musical festivals in September generally ending the London season, which counts ten months in the year; but there is to be no respite now; and on Tuesday next, the opening of the Grand National Concerts at Her Majesty's Theatre is the inauguration of the season 1850-51. Jullien's Promenade Concerts, at Drury-Lane Theatre, follow immediately; and in the commencement of November the Sacred Harmonic Society will enter the field. The prospectus of the last-mentioned spirited body of amateurs is before us. It describes many vast alterations and improvements in Exeter-Hall, on which it is not necessary now to dwell; but it is still of our Artists will in all probability be exercised when the changes are completed, to present what may be termed an entirely new Music Hall, thus removing a standing reproach, that our capital is without a capacious concert-room. It is evident that advantages will be taken of the three-days' break of the organ several feet, so as to render that instrument more effective. It is the announced intention of the committee "to bring forward some of the great classical works which have not hitherto been performed by the society, as well as others which have been paid subscribed for some time." It may be presumed from this pledge, that some of the grand productions of Bach will be included in the schemes. "The excellence and consequent unprecedented success," adds the prospectus, "which the society's performances have attained under the conductorship of Mr. Costa, lead to the hope that, under the same distinguished guidance, combined with the improvements in the building and the organ, and increased energy on the part of the members of the orchestra, a still further advance towards perfection may be attained in the coming season." The former exertions of the committee have enabled them to the confidence of amateurs, and their doings during the past year of peace and Exhibition will doubtless not fall short of the deserved reputation of the society.

The programme of the Grand National Concerts combines the distinctive features of the defunct Ancient Concerts, of the Philharmonic Society, of the Sacred Harmonic Society, of the London Wednesday Concerts, of Jullien's entertainments, and of the Vocal Concerts of former times. The undertaking is vast, the pledges are extensive, the engagements numerous and influential, and the prices are low. It is declared that no emolument is sought for on the part of the executive committee and managers, and it is to be hoped that the extensive plans will not be attended with a loss to the patriotic speculators. Music of every school and nation will be admitted to the list of performances. The "National Concerts" not being employed in an exclusive spirit, although it is proposed to afford native talent an equal chance of profit and distinction with foreign composers. Thus, while the name of Spohr is specified for new works, he is associated with Balfe, Macfarren, Edward Loder, and Howard Glover. It is added that arrangements are pending with other English composers, including C. E. Bishop, John Barnett, Vincent Wallace, Sterndale Bennett, &c. Dance music is to be included in the concerts—by no means a politic resolution, as one of the chief objections on the part of classic amateurs to Jullien's system was the odd mixture of serious and light music in the programme of one evening. The choral and orchestral forces are very powerful. The importation of the fifty male voices of the Berlin Chapel Royal will prove a hit. The orchestra numbers 86 players, namely, 16 first violins, 16 second violins, 10 violas, 10 violoncellos, 11 double basses, and 2 harps—in all, 64 stringed instruments; whilst the wood, brass, and percussion count 24 executants. Of these artists are from Costa's Sacred Harmonic Society, and 40 from that of Her Majesty's Theatre. The solo instrumentalists include Thalberg and his gifted pupil, Miss Goddard, of whose talents the ILLUSTRATED LONDON NEWS was the first to write; Mr. Charles Halle and Master Hedworth Werner, a panoche phenomenon; Molique, Sainton, H. Blagrove and Cooper (violin), Hill (viola), Piatti, Hausmann, Hancock, and Rousselot (violoncello), Angiolo, Howland, and Stiller (double bass), R. Blagrove (concertina), Richardson, Clinton, Remusat, and Briccialdi (flute), Barret and Nicholson (oboe), Baumann (bassoon), Arban (cornet à pistons), Prospère (ophicleide), Winterbotton (trombone), &c. Here is a wide field of ability. Mr. Balfe, Signor Negri, and Costa will be the conductors of the various classical, operatic, and dance selections. The interior of the theatre has been entirely re-arranged and decorated for these concerts. The principal vocalists will be Mdlle. Angri, Miss Dolby, Signor Calzolari, and Mr. Sims Reeves, besides the *prima donna* from Milan, Madame Biscaccianti. The prospectus is altogether more novel and varied in its intentions and promises than any concert announcement that has ever yet been issued in this country. As the lawyer's brief is generally suited apparently, and every party conciliated. If there be unity of purpose in the multiplied direction, a series of very fine performances may be anticipated.

M. Jullien's programme has also been issued, but it is rumoured that he has some startling surprises in store, and that he is not at all dismayed by any rivalry. It has been supposed, that, as many members of his old band have quitted, he would have a difficulty in procuring executants; but this is not by a mistake—he has the resource of at least one half of the Royal Italian band at his command, and Paris and Brussels are now too near London to admit of the slightest difficulty in engaging first-rate performers.

Here we must pause: there is a busy time enough before Christmas in what we have already recorded above, to justify us to postpone till a future period a notice of the after arrangements.

MUSICAL EVENTS.—The secretaryship of the Philharmonic Society, vacant by the death of Mr. George Budd, has been filled up by the appointment of Mr. George Hogarth, the musical historian.——We are requested to state, that the collection at the Hereford meeting, in 1846, was £903, instead of £833, as we mentioned in our notice of the late Gloucester gathering.——On Tuesday night at Liverpool, on Wednesday at Manchester, and on Thursday at Newcastle-on-Tyne, concerts were given, at which Miss Catherine Hayes, Madame Macfarren, Signor Bordas, and Herr Formes were the vocalists, with Mr. Lavenu as conductor. On the 11th and 12th (to-day) the same party will at Glasgow and Edinburgh; and again in the London capital on the 14th; at Lancaster, on the 15th; at Nottingham, on the 16th; Newcastle-under-Lyme, on the 17th; Wolverhampton, on the 18th; and on the 21st inst., Miss Catherine Hayes will appear in Italian opera in Dublin, previous to her departure for the engagement at Bruges. We hear with pleasure that the concert at the Town Hall, Birmingham, for the benefit of the widow and family of the late Mr. Joseph Stevens, the indefatigable secretary of the Musical Festival Committee of the General Hospital, was extremely well attended. Mr. Balfe, Mr. Bagshaw, the Mayor, the Town and County Members (Lord Wrottesley and Lord Guernsey), the Musical Festival Committee, &c. warmly patronising the undertaking; the principal singers were Miss Catherine Hayes, Miss Lucombe, Miss M. Williams, Messrs. Sims Reeves, Lockey, Poole, and Machin, with Mr. Mundon as conductor, and Mr. Alfred Mellon first violin.——Madame Thillon is in town, preparatory to her concert-tour in the provinces. She will have the co-operation of Mr. Hudson, the comedian.——Mdme. Grisi, who was unable, from the state of her health, to go to St. Petersburgh the season, is sojourning at Brighton, with her sister.——Accounts from Italy announce the great success of Mr Augustus Braham, son of the patriarch tenor, on his *début* at concerts. Mr. Augustus Braham is a tenor, like his brother Charles. This makes the third son of Braham who has entered the profession, but it is expected that Augustus will prove the most successful. Against this decree, protests have been issued on the part of Ronconi's advocates. He is now singing in Madrid, and it is denied that he is unable to carry on the theatre. The National Assembly voted a grant to Ronconi last session, and it is contended that this cannot be withdrawn. The Parisian journals have a controversy on this matter, but it is believed that Mr. Lumley will enter on the functions of director, as he has the authority and the property in his hands.——Mdme. Alboni

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The coroner's inquest on the murder of the Rev. G. E. Hollest, of Tewkesbury, was resumed on Tuesday and again adjourned to the 22nd inst. Nothing material was elicited on the occasion to throw light on the perpetrators of the crime. The police are still actively engaged in their inquiries; Sergeant Kendal on the spot, Inspector Hollington at Guildford, and Inspector Biddlecombe between the two places.

One of the clerks of the New Ross Bank (Ireland) has been held to bail on a charge of embezzling a sum of £34.

We have much pleasure in stating, that, in order to avoid the necessity of two collections of the hop duty, viz. on the 15th inst. and on the 15th November, the Chancellor of the Exchequer has directed that the collection of the moiety of the duty of 1848 and of the moiety of the duty of 1849 shall take place on the 15th November next, and instructions have been issued accordingly to the proper officers of Inland Revenue.

At the County Court held at Tewkesbury, before James Francklen, Esq., the district judge, on the 3rd inst., William Woodward, a poor stocking-maker, obtained a verdict against Mr. Feargus O'Connor, M.P., for £2 10s., with immediate execution. It appeared from the evidence of the plaintiff that he was one of the contributors to the land scheme, and had paid the sum sought to be recovered.

The new Chancery Act has already come into operation in Ireland, and proceedings under it have in a few days been brought to a point in a case of a mortgage that under the old system would have taken a year at least to accomplish.

The Marquis of Ormonde has ordered a reduction in the rents of his tenantry (Ireland), on a graduated scale ranging from 10 to 25 per cent, according to the regularity with which they pay up the rates falling due before the 1st of August next.

The Metropolitan Interments Act provides that no lands for new cemeteries shall be purchased until six weeks after advertisements, notifying the intention of the General Board of Health to purchase land, had been issued. These six weeks have expired, and during the last week the inspectors of the board, Messrs Austin, Rawlinson, and Creecy, were engaged in the examination of various proposed sites. Several were visited and examined by members of the board themselves.

The Lord Chancellor has appointed Mr. Isaac Nicholson, of Gordon-street, the Gordon-square, to the Court of Bankruptcy, in the room of Mr. Nicholson was formerly an extensive woollen merchant in King's Arms-yard.

The marriage of the Emperor of Austria with the Princess Sophia of Saxe is positively arranged to take place immediately, if we are to believe the *Northern Gazette* of Germany.

At a debating meeting in Indiana, one of the speakers made the following practical comparison :—"A smoky chimney is no more to be compared to a scolding wife than a little nigger to a dark night."

The long delayed bill upon "the laws respecting the Protection of Women," for which the Associate Institution for Improving and Enforcing the Laws for the Protection of Women has offered 100 guineas, is to be historical, theoretical, and practical. The Bishop of Oxford, Mr. Page Wood, M.P., and Mr. Roundell Palmer, M.P., have consented to act as adjudicators.

The new planet Victoria, discovered by Mr. Hind, has had its proposed name and laurel symbol accepted by the astronomers of England, Prussia, and Denmark. Its period of revolution, Mr. Hind states, will probably be nearly the same as that of Iris, perhaps a little longer.

Messrs Coutts and Parkinson, the *Newcastle Chronicle* states, have received another order for a large iron East Indiaman, to be about 1000 tons register. This vessel will be the largest iron sailing vessel ever constructed at this or any other port.

Searles, the pedestrian, is still prosecuting his herculean labours at Tranmere (Cheshire), and at present with every prospect of a successful termination. He enjoys excellent health, and performs his hourly journeys with ease. The undertaking will be completed on Monday, the 14th inst. He eats well, drinks only a small portion of sherry daily, and is 4lb. heavier since he commenced walking than he was before.

A fatal sailing-boat accident happened on lately the Thames. The Messrs. John and William Montford, of Islay House, Brompton, and Mr. W. Farley, of Swanbridge, Brompton, were beating up Wolwich Reach in their yacht, the *Fairy Queen*, when a sudden squall of wind upset the boat. Mr. W. Montford and Mr. Farley saved themselves by clambering up the keel, but Mr. John Montford was drowned.

The total expenses of the Poor-law Inspectors for the year ended the 31st of March, 1850, was £8878; viz. £3789 personal, and £5088 13s. 2d. travelling and other charges.

The revenue authorities have granted permission for tin, in blocks, ingots, bars, or slabs, to be added to the list of articles allowed to be landed at the first-class sufferance wharves on the river side on importation into the port of London from foreign ports.

It is rumoured that a line of steam-ships is to be established between Liverpool and Quebec, with the object of promoting the interests of the Canadian provinces, and the comfort of emigrants and passengers to the settlements of the far west, Canada, and the United States.

The navigation of the Eyder has been prohibited by the Danish government. Neutral merchant vessels coming from the Baltic will, however, be allowed another quarter's grace for their departure. The port of Copenhagen not being closed, masters of vessels coming from the North Sea may discharge their cargoes there, should they not prefer pursuing their voyage by the Sound.

The whole of the persons (upwards of three hundred) employed by Mr. Humphrey Brown, M.P. of Tewkesbury, have subscribed a penny each to the Peel Testimonial.

The late Mrs. Ann Goodman, of Islington, has bequeathed a legacy of £100 to University College Hospital.

According to a Sunderland paper, the Tyne brig *Mary Florence* has been lost on the coast of Africa, and the Captain (Christopher Short), his wife, and six of the crew seized by the natives. They are said to be still in captivity.

It is stated in late papers from Hobart Town, Van Diemen's Land, that John Frost, the Chartist convict, formerly of Newport, has been lecturing in the former place on the evidences of Christianity.

A bazaar in aid of the York ragged schools, of an extended character, has been held in the Guildhall of the city of York during the past week, under the presidentship of the Earl of Carlisle. The amount for admissions, and of the sale of fancy goods, presided over by the Lady Mayoress and her fair friends, realised upwards of £900.

A medical gentleman in Plymouth has adopted the excellent plan of fixing a gutta percha mouth-piece by the side of his bell-hand, as at the street door, attached to which is a long gutta percha tubing, which reaches to his bed. In the night, when the bell is rung, the tube, which hangs suspended by the bedside, is immediately resorted to, and a conversation is carried on, without the necessity of the doctor even rising from his pillow. This is a very great convenience.

The Great Northern Railway company are about to erect a large locomotive *dépôt* at Peterborough, similar to those at Wolverton and Swindon. There will be between 1000 and 2000 persons employed.

The heavy gale of wind which sprang up on Sunday evening, blew from S. to W.S.W., down the Thames, and a very low tide was the result. The numerous tiers of vessels in the Pool were aground, and for a time all navigation was stopped, even the small steamers that ply above-bridge touching the bottom at places. A more shallow channel has not been known for years in the Thames for some time. Several casualties took place during the gale, but we have not heard of any thing of a serious character.

The aggregate amount of traffic on railways in the United Kingdom, during the current year, shows a very considerable increase over the corresponding period of 1849. The published total receipts from the 1st January to the 29th September, 1850, amounted to £29,525,707; corresponding period of 1849, to £26,275,919: showing an increase of £1,250,788 for that period.

Mr. Patrick Somers, M.P., was arrested last week by a sub-inspector of police, at Ballymote, in the county of Sligo, on his way from Dublin, to fulfil a hustings engagement with a Mr. Verdon, the proprietor of the *Sligo Champion* newspaper.

The Earl of Mount Edgecumbe fell overboard on Friday week, at Plymouth, while in the act of landing from his yacht in Barnpool. His Lordship used a boat generally employed, of two punts lashed together at the stern, described as forming a convenient gig. By some casualty the punts parted, and his Lordship was unexpectedly precipitated into the water. One of the punts speedily rescued him, and we are happy to state that he received no injury

Lord Northland has issued an address of thanks to his constituents or Dungannon, dated at Madeira, where his Lordship is at present, for their second return of him as their representative in Parliament, and expresses some hope of being able in the next session to attend his duties in their service.

It is said that the recent movement of the tailors against the slop system has not been entirely fruitless. The tailors of Liverpool, to the number of some 700 or 800, have combined, and are about to erect a public hall. We are told that they intend to take in work, and execute orders on the co-operative principle.

According to the Liverpool papers, a new description of food—the *dari*—is being introduced into this country. It is a grain or pulse, something between the lentil and Indian corn, and is described as excellently adapted for mixing with flour, which it very much improves both in taste and colour. In Ireland it has already been imported.

A favourite magpie had been accustomed to receive dainty bits from the mouth of its mistress. The other day it perched, as usual, on her shoulder, and inserted its beak between her lips, not, as it proved, to receive, for, as one good turn deserves another, the grateful bird dropped an immense green fat caterpillar into the lady's mouth

A country bumpkin, says the *Macclesfield Courier*, whose habitation is not far from this immediate locality, was called upon a short time ago by a neighbour to inform him of a domestic calamity, the loss of his mother. The bereavement was found at his breakfast, when the following dialogue took place: —"Hal bin thee, Jim, olve gotten sad news for thee—thy mother's dead." "Hed,' mon, didst say? Well, wait a bit, till I finish my porridge, and I'll mak thee a pretty bleat."

CHESS.

TO CORRESPONDENTS.

ALAGE—You must stipulate that the game be played according to the acknowledged rules in this country. All other terms are matter of arrangement

R D M—Young, and, we doubt not, beautiful also

M D—The "Philedorian" Chess-room is in Agar-street, near Charing Cross Hospital

EKONESKE—1. Is is correct, but we may for us. 2. Is it ludicrous. Address, Islington, Canonbury-street

J A W—1. It shall be given among our Chess Enigmas shortly. 2 The key move is—1. Q to her 2nd

C M J—Is it a case of real occurrence, or, as we suspect, a merely supposititious situation devised to provoke discussion on the taking en passant question?

Q E B—It would indeed be well if your solution were correct

NAVADE—You will find a highly interesting letter on the subject of Mr Cochrane's play with the Brahmin in the current number of the *Chess-player's Chronicle*. Some of the best of their games we hope to give next week

J J R—As you remark, the palpable mistake of Black at his eighth move destroys all interest in the subsequent play

C M J—The defence is deplorable, and renders the game quite valueless

W G Berwick—They shall be examined shortly

M T S, Clonmel—Subscriptions for the forthcoming work on End-games, by Messrs Kling and Horwitz, are payable to Mr. H Mott, 21, King William-street, Strand

ALBERTAL—A distinction only, without a difference

ELEPHANTES—You are both wrong. Try it once more

CHESS IN INDIA.

For the following interesting game, which was played a few months since in the Chess Club of Calcutta, we are indebted to a promising member of that institution in remarks :—"The Calcutta Chess Club now numbers some forty members, and boasts the honour of having Mr. Cochrane for its president. The only player here who has any chance whatever with Mr. Cochrane upon even terms is a Brahmin, of the name of Moheschunder Bomberjee. Of this worthy, Mr. Cochrane has himself remarked that he possesses as great a natural talent for Chess as any player he ever met with, without one single exception! This is high praise, but not at all extravagant, when all circumstances are known and considered. Until the early part of last year, Moheschunder had never been twenty miles from his native village in the Mofussal, as the interior of India is designated. He had never played with a really good player, and was scarcely acquainted with all of the European rules of the game. From long-continued and uninterrupted success he had become desperately self-sufficient, and obstinately addicted to certain faulty styles of opening, of which, indeed, he is not even now cured.

"The introduction of Moheschunder was in this wise :—A member of the Calcutta Chess Club, during a Mofussil pilgrimage in the autumn of 1848, heard of the fame of this local Philidor, and learning further that the Mofussil champion had 'never been known,' he rejoiced exceedingly in the prospect of beating him soundly. This expectation was not destined to be fulfilled, for our Brahmin triumphed. The discomfited club-man thereupon brought him down to Calcutta, and requested Mr. Cochrane to take him in hand. Now Moheschunder had never even heard of Cochrane, nor, for that matter, of Ruy Lopez, Philidor, Le Bourdonnais, Macdonnell, or Staunton. At this time, in truth, Moheschunder was under a very strong impression that some Mookerjee or Chatterjee resident in the district of Berhampore or Burdwan was incomparably the best player in the known world next to himself. It was not until he had been well beaten six games or so, off hand, that the idea began to dawn upon him that he might possibly be mistaken, and at last he solemnly pronounced his successful opponent to be 'Shatan' himself and no other. Since that period Moheschunder has been appointed a paid *attaché* of the Club. He is much improved, and frequently wins of Mr. Cochrane when playing on even terms. His 'sight' of the board is extraordinary; he plays with marvellous rapidity, and rarely makes an oversight or mistake."

Game between the celebrated European amateur, Mr. John Cochrane, and Moheschunder Bonnerjee, a native player of high repute.

(Irregular Opening.)

WHITE (Mr. Cochrane).	BLACK (Moheschunder).	WHITE (Mr. Cochrane).	BLACK (Moheschunder).

17. Q to K R 4th	P to K Kt 3d	and Black resigned.	
18. P to R 6th	K R to K sq		

(a) It is rarely good play to attempt to sustain the doubled Pawn in positions like the present.

(b) This is quite a la Cochrane

(c) K B to his sq seems equal y good, for suppose—

WHITE.	BLACK	WHITE	BLACK
20. Kt to B 6th (ch)	K B to his sq	21 Q takes R (ch)	K takes Q
and Black must win a Pawn	Q takes Kt	22. P takes Q	B to Q 4th

(d) This is still an and enterprising, but we are afraid not sound.

(e) If we mistake not, Black might have won here by taking the Q P with his Rook for example—

WHITE.	BLACK	
29. Q R takes R	Kt takes R	
30. R to K B 7th (ch)	Q takes R	(f) Well played

If White now check with his Kt, the Q takes the Kt, if he check with the Rook, the Q takes the Kt in next move, perhaps, therefore

VIOLENT STORM AND LOSS OF LIFE.

On Sunday and Monday last a most violent storm of wind visited our shores; causing vast loss of property and of life, both afloat and on land. The packet that left Boulogne at ten o'clock on Sunday night for Folkestone encountered so severe a gale in the Channel, that, instead of making the harbour at the latter port, she was forced round to Margate, where she was run ashore on Monday morning at seven o'clock. All her passengers landed in safety, and started for London by railway. At Nottingham, Liverpool, and other places, the storm caused a great number of accidents, such as the upsetting of chimneys, walls, trees, &c.

NOTTINGHAM.—About one o'clock in the afternoon of Monday, the chimney of Messrs. Hopkinson and Welsh, grocers, Market-place, was blown over, falling on the cart, which it forced off, and carried with it the cornice of the house. At the time there were at least fifty persons near the spot, it being a very public thoroughfare. Upwards of a dozen persons were buried in the ruins. A servant maid child belonging to Mr. Unthank, surgeon, were the first extricated. The former was discovered to be severely injured, but, strange to say, the infant escaped unhurt, having been shielded by the girl's clothes. In a short time a boy named William Morrell, who had been seen a moment before the accident occurred standing with his father and brother near the spot, was dug out of the ru ns quite dead. The father and brother were very little injured. How they escaped is almost miraculous, as they were totally encircled with stones, tiles, &c. Further search was made, and a woman named Ellis, a resident of Bulwell, who came from that town in the morning to Nottingham goose fair, was taken out of the ruins shockingly hurt. She has since died. A man named Ingle Morris, a woolstapler, of Gedling, Carrum, a village seven miles from the town, was taken out much injured, and with his right shoulder fractured. A number of other persons were also much injured. The whole of the unfortunates were immediately conveyed to the General Hospital, and are under the care of the house surgeon. In the market-place business was quite at a stand, although it was the grand annual fair.

LIVERPOOL.—From Liverpool we learn that the violence of the storm there was very great, but no serious accidents of any consequence are reported ashore. Afloat, however, several disasters occurred, accompanied with great loss of life. The ship *Providence*, Captain Moyse, for Africa, which left Liverpool on Sunday, encountered the full force of the gale on Sunday and Monday, and was driven back amongst the banks, where she was observed about noon, and steps were taken to rescue the crew from their perilous situation. Unfortunately, however, out of a crew of thirty-six, including the pilot, twenty-three perished. As soon as this intelligence was received, the crew of the *Magazine* life-boat put off to render assistance, and was taken in tow by the steam-tug *Albert*. The work was attended with great labour and danger, for the storm was at its height, and, after considerable difficulty, they had the satisfaction of rescuing eleven who remained upon the wreck. The following is the list of persons saved:—Robert Moyse, master; Samuel Davis, trader; William Boyes, chief mate; John Harris, boatswain; Wm. Parry, pilot, of No. 4; D. Smithurst, cook; John C. Berry and Hugh Vemeny, seamen; George Smith, cooper; George Dale, carpenter's mate; Archibald Cowan, carpenter; John Austin and John Thompson. The second casualty was the *Arcturus*, Lidstrow, from Ibrail to Liverpool, which was driven on shore at Crosby Point, where she became a complete wreck; the pilot and first mate drowned, the rest saved in the ship's boats. The *Aurora*, from Cardiff to Liverpool, was also totally lost near Holyhead, on Monday morning, during the gale, all hands were fortunately saved. The *Catherine Jenner*, for Ciudad Bolivar, which sailed on Sunday, put back with main mast sprung, and other damage. The *Celina Lucille*, for Mar-cules, was also wrecked off Carmel Point; crew saved. The *Alice*, of Runcorn, from Liverpool to Llanelly, sank in Holyhead Bay during the gale on Monday; crew saved. At Southport, the *Helena Zilles*, from Liverpool for Ostend, was totally wrecked; only one man was saved. The sloops *Freedom*, of Salcombe, and the *Commerce*, of Jersey, were also driven on shore at Southport. The flat *Industry*, of Liverpool, laden with salt, sank in Llandudno Bay; crew saved. At several points all round the coast similar disasters are reported.

THE DOWNS.—In the neighbourhood of the Downs, throughout the whole of Sunday night, the gale was very alarming. It continued till an advanced hour on Monday, causing much damage to the fleet of vessels usually riding about this part of the Channel. Many succeeded in running into Ramsgate harbour for safety, but even some of these lost spars and portions of rigging, and the *Intrepid*, from London, bound to Ulverstone, had one of the crew blown overboard, and the poor fellow perished. In the course of the night, the *Free Trader*, bound to Coquimbo, came into collision, near Beachy Head, with the *Avenger*, a brigantine, bound to London. Mr. Pitts, the master of the latter vessel, and five or six of his crew, succeeded in getting on board the *Free Trader*, but the remainder, six, it is thought, were driven away with their vessel by the gale, and eventually lost sight of. The fate of the poor fellows excites much interest. The *Free Trader*, after some difficulty, got back to the Downs, and landed those belonging to the missing ship. The casualties that happened in this part of the coast were numerous; vessels being disabled by collisions and the fury of the gale.

NEW ROMNEY.—The *Jugrow Jantje*, Dutch galliot, Beer, from Cardiff to Denmark, was wrecked in the East Bay of Dungeness; one man saved.

HERNE-BAY.—The *Eliza*, polacca brig, driven on shore on Morte Sands.

ABERDEEN. The *Dornbro' Castle*, schooner, of Bo'ness, from Thurso to Perth, driven ashore in the Bay crew saved.

LOWESTOFFE.—The *Juno*, M'Bean, from Shields to Faversham, driven into this harbour with loss of anchor and chain. The *Pershing*, Schroeder, from Königsberg to London, assisted in here, with loss of both anchors and several sails spat. The *Apollo*, Rickman, from Pillau to London, with loss of sails; and the *Elizabeth Ialds*, Liddle, with loss of an anchor and chain, assisted in here. Several vessels passed with loss of anchors and chains. The gale from the northward was as severe, and the shipping in the coal-trade have been heavy sufferers.

WALES.—The storm appears to have been very formidable on the Welsh coast. In some parts it was accompanied by thunder and lightning. Off Pwllheli the accounts speak of its being very destructive. Two wrecks had occurred; and, from the awful state of the weather, more were anticipated. Near Carnarvon it was also very violent, and two vessels had been cast ashore.

NEW ORPHAN HOUSE, ASHLEY DOWN.

AMONGST the many excellent charitable institutions of Bristol and its vicinity, perhaps there is none more remarkable than the "*New Orphan House*" at Ashley Down. The object of the Charity is thus stated in the founder's last report :—

"The Orphan House forms but a part of a benevolent design entered upon by Mr. Muller, in March, 1834, for which, up to the present time, £44,000 has been received, expended, and consequently accounted for; out of which sum, £33,868 11s. 1d. has been expended exclusively on the above establishment, which was opened June 18th, 1849."

In regard to the nature of the institution, Mr. Müller says

"Without any sectarian distinction whatever, and without favour or partiality, orphans are received. There is no election whatever required to secure the admission of a child, nor is it expected that a certain sum should be paid with the orphans. Three things only are requisite: that the children should have been born in lawful wedlock, that they should be bereaved of *both* parents; and that they should be in destitute circumstances. Regarding these three points strict investigation is made, and it is expected that each of them be proved by proper documents; but, that being done, children may be admitted from any place or any country, provided that they speak English, and that there is nothing peculiar in the case that would make them unsuitable inmates for the establishment. Particularly request that persons would kindly refrain from applying for such children who are only virtually orphans, not bereaved of *both* parents, whom, without any exception, I could not receive, since this establishment has been from the beginning only for destitute children who have neither *father nor mother*.

"The New Orphan House has been placed in the hands of eleven trustees chosen by me, and the requisite deeds have been enrolled in Chancery The establishment has been opened for the accommodation of one hundred and forty orphan girls above seven years of age, eighty orphan boys above seven years, and eighty male and female orphans from their earliest days till they are eight years of age. The infants, after having passed the age of seven or eight years, are removed into the different departments for older boys and girls." "And," adds Mr. Müller, "without any one having been personally applied to for anything by me, the sum of £33,868 11s. 1d. has been given to me for the orphans, as the result of prayer to God, since the commencement of the work."

The Orphan House, we should add, is open to visitors every Wednesday afternoon.

Respecting this extraordinary establishment, we find the following statement communicated to the *Athenæum*, September 7 :

"In the county of Somerset there has lately sprung up a new religious sect, known by the name of benevolent and undenominational. Many Christ-Millerites, whose prime article of belief is the power of prayer. Whatever they require, these people simply demand it of God, and, as they allege, it is bestowed on them. The sect, 'ask, and it shall be given unto you,' they adopt in its literal sense, and with a result which is marvellous, if a tithe of what they assert can be accepted in their own literal spirit. The sect of the waiters on Providence is likely to spread, if they can establish their precepts. Not to mention other matters, some time ago, Herr Müller and his followers took it upon their consciences to build a magnificent Orphan House. Their design was beneficent; the institution was greatly needed in the district; but, instead of adopting the ordinary machinery of charity by appeals in the rich and benevolent, they simply fell on their knees and appealed to Heaven. The response came in from every corner of England, from many cities on the Continent and in America, and in a variety of form. From one contributor came a gift of money, from another, a boot-jack; from a third, an ancient coin. The farmer forwarded a cart of manure; the merchant, a hogshead of sugar; the landowner, the produce of the sale of a tree cut down for the purpose. Women sent in their golden trinkets—men their clothes. Tables, chairs, sacks of flour, fitches of bacon, sides of beef, beds, toothpicks, coats, hats, shoes, washhand-stands, and so forth, came pouring in. The money contributions were half-pence, shillings, pounds—the latter by hundreds and in thousands. All these things came. It is said, as the levies of faith. What is certain is, the building is there, on Ashley Down in arrangement, proportion, completeness of design and detail, it is one of the noblest fabrics in the country. It is already occupied by three hundred children; and the same means by which it was erected in the first instance, and

THE WORCESTER DIOCESAN TRAINING-SCHOOL, AT SALTLEY, NEAR BIRMINGHAM.

s now maintained, are about to be employed for its further enlargement. No one is personally applied to for a farthing: the whole is left to the secret influences of the spirit. Yet, according to Herr Müller's statement, strangers, whom he has never seen, to whom he has not made known his case, have given him for his orphans not less than £33,868 11s. 1½d., in answer to his secret prayers. These are strange facts to record among the materials for the history of the times."

The accompanying View is [taken from the north-east side of the Orphan House, looking towards Clifton.

WORCESTER DIOCESAN TRAINING SCHOOL.

The foundation-stone of this new establishment was laid on Thursday, by Sir John Pakington, Bart., M.P., as proxy for Lord Lyttleton, who was prevented attending by the death of his Lordship's sister. The site of the building is at Saltley, near Birmingham, upon land partly given by C. B. Addarley, Esq., M.P. The design is by Mr. B. Ferrey, architect; and is in the style of domestic architecture of Edward III.'s time. The plan embraces two distinct institutions; and, although combined in a quadrangular arrangement of connected buildings, each establishment has its distinct offices.

The entrance to the quadrangle is on the north side, and the Training School department is contained in this north division of the building, and consists of school-room, dining-room, class-rooms, masters' dwellings, and every necessary apartment; on the first and second floors are dormitories for 60 students. The housekeeper's residence is at the north-west angle, and communicates directly both with this and the middle class school. The school room, dining-room, class-rooms, &c., for this institution are contained in the west and south sides of the quadrangle, where there is accommodation for 100 students, together with residences for the masters and attendants.

The Principal's house occupies the south-east angle of the court; and the Principal is able to pass through the several apartments of the eastern establishment without entering the open air. The main staircases are situated at each angle of the court, and form important features of the design.

There is an outer kitchen court and offices, with separate entrance from the west. The scheme has much of a collegiate arrangement; but the architect has avoided the pretensions of such an establishment, and adapted a simpler style of architecture than is usually employed in the learned universities; considering it desirable to give the building a distinctive expression only, that might mark it as one united with many others to carry out an educational scheme peculiar to the present day.

It is intended to build a Chapel, to complete the design. The estimated cost of the entire building is about £10,000. The builders are Messrs. Winsland and Holland, of Duke-street, Bloomsbury.

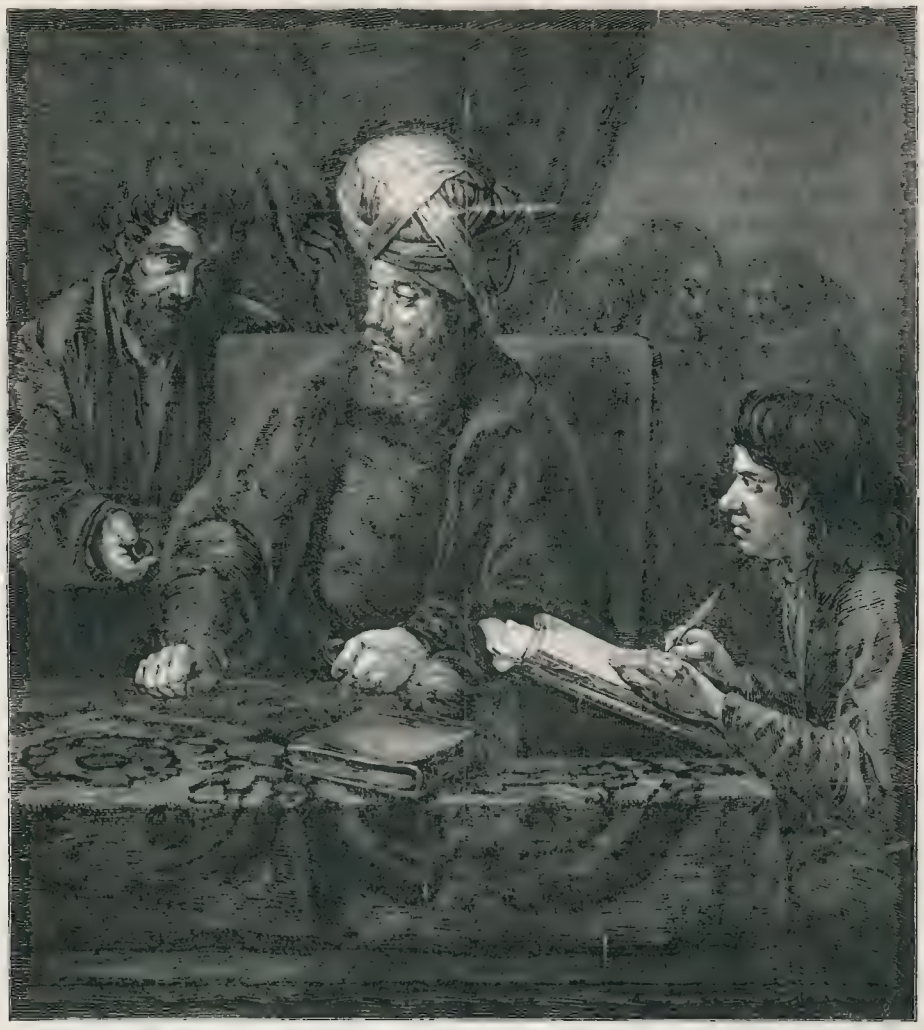
ORPHAN-HOUSE, ASHLEY DOWN, NEAR BRISTOL.

MINSTER LOVEL, OXON.

We have already detailed the sale, at Oxford, of this portion of Mr. Feargus O'Connor's celebrated land scheme, consisting of 297 acres of land and eighty-two cottages. (See the Illustrated London News, September 7, 1850.) We now engrave a view of the estate taken from the Oxford and Cheltenham road, at the west end of the crescent which parts the same, commanding a view of the schools in the right-hand crescent. At the other extremity, to the right, are cottages flanking a road leading from Minster to Brigenorton; the houses being at equal distances on their respective allotments, nearly reaching the aforesaid village, turning another angle to the left, at the extremity of the straight line. The property is situated upon a hill, commanding a picturesque view of the ancient village of Minster, and the Lovel Ruins below to the left.

We understand that two or three of the allottees on the Minster Lovel estate are travelling the country soliciting subscriptions, in order to take proceedings in Chancery, to avert the threatened evictions next month. They have also published a memorial, showing that they have been induced by the representations of Feargus O'Connor, Esq., to take shares in the National Land Company, "and have had their allotments in accordance with the rules of the society, and others have given large sums of money as bonuses for allotments. That the occupants have, therefore, broken up their homes, left their respective callings, and travelled, at great expense, from distant parts of the country. That such allotments were, by the rules of the said company, to be conveyed to each occupant as freehold property, subject to the payment of four per cent. per annum on such portion of the original cost of each allotment as should remain unpaid. That the soil of such allotments, when given into their possession, was so exceedingly foul and exhausted, that your memorialists have laboriously and incessantly toiled, and have not been able to obtain therefrom a sufficiency of the commonest necessaries of subsistence. That the said Feargus O'Connor, Esq., has demanded an enormous rent of your memorialists in his own name, as landlord, thus attempting to make them his tenants at will, and the property his own, having had it conveyed to himself individually, instead of in trust for the company, with whose money the estate was purchased. That your memorialists have refused to pay such rents, but have offered to pay interest on the capital expended on their respective allotments, and remaining unpaid; declining, however, to become tenants to F. O'Connor, Esq., who has, in consequence thereof, commenced proceedings in ejectment against your memorialists in the names of the trustees of the mortgagee. That your memorialists have resisted such ejectments, gone to trial, and had judgment given against them in the Court of Queen's Bench, and, in November next, will be turned out of possession, and thereby be deprived of their capital and labour employed in the improvement of their holdings. That your memorialists have, therefore, consulted equity barristers, whose opinion is, that your memorialists have an efficient plea in, and are, consequently, advised to make an application to, the Court of Chancery for redress against such injustice; but that the costs of such proceedings in Chancery are too expensive for your memorialists, who have already exhausted all their available means in defending the aforesaid suit in ejectment. That your memorialists, therefore, respectfully solicit the assistance of the charitable and benevolent, in order to enable your memorialists to take the necessary proceedings in the Court of Chancery for their protection against the cruel and unjust proceedings of Feargus O'Connor, Esq. And your memorialists" &c.

MINSTER LOVEL, OXON.



"THE OWNER OF THE VINEYARD PAYING HIS LABOURERS."—PAINTED BY REMBRANDT.—FROM THE GALLERY OF THE LATE KING OF HOLLAND, AT THE HAGUE.

FINE ARTS.

GALLERY OF THE LATE KING OF HOLLAND, AT THE HAGUE.

We have this week engraved one of the finest pictures from the above famed collection "The Owner of the Vineyard paying his Labourers," (in Catalogue, Lot 90), purchased by Dr. Van Cleef, of Utrecht, for 4000 florins.

The subject, we need scarcely add, is the Parable of the Labourers, from St. Matthew, xx. The lord of the vineyard is seated at the table, and one of the first labourers murmurs at the payment, which is no more than that paid to the "eleventh hour" labourers. On the opposite side is seated a young man, who enters the payments; and in the distance is a group of labourers.

This picture is one of Rembrandt's noblest compositions; and a few observations upon its distinguishing excellences may not be unacceptable.

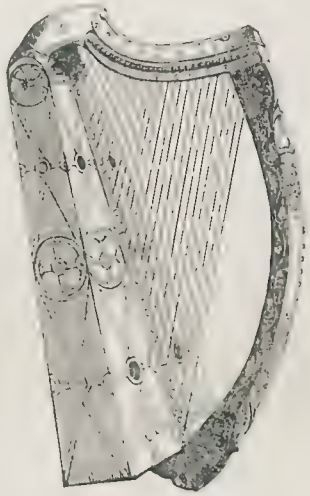
Sir Joshua Reynolds, in his Eighth Discourse, speaking of the annoyance the mind feels at the display of too much variety and contrast, proceeds to say:

"In a composition where the objects are scattered and divided into many equal parts, the eye is perplexed and fatigued, from not knowing where to find the principal action or which is the principal figure; for where all are making equal pretensions to notice, all are in equal danger of neglect. The expression which is very often used on these occasions is, the piece wants repose—a word which perfectly expresses a relief of the mind from that state of hurry and anxiety which it suffers when looking at a work of this character. On the other hand, absolute unity, that is, a large work consisting of one group or mass of light only, would be as defective as an heroic poem without episode, or any collateral incidents to recreate the mind with that variety which it requires. * * * *

Rembrandt's manner is absolute unity: he often has but one group, and exhibits but little more than one spot of light in the midst of a large quantity of shadow; if he has a second mass, that second bears no proportion to the principal." Sir Joshua considers this treatment a reprehensible extreme, equally distant from the demands of nature and the purposes of art.

"This unity," says Mr. Burnet, in his lately published quarto, "is observable in the composition of Rembrandt: even where a multiplicity of figures are employed, they are so grouped that the masses of light and shade are interrupted as little as possible; and it is only in his earlier works, such as those now in the Munich Gallery, where this isolated light is carried to extravagance. In many of his later pictures, we have not only subordinate groups, but a repetition of the principal lights, also, a greater breadth of half tint. 'Composition,' says Reynolds, 'which is the principal part of the invention of a painter, is by far the greatest difficulty he has to encounter. Every man that can paint at all, can execute individual parts; but, to keep these parts in due subordination, as relative to a whole, requires a comprehensive view of the art, that more strongly implies genius than perhaps any other quality whatever.' Now, Rembrandt possessed this power in an eminent degree."—*Rembrandt and his Works.*

Fuseli pays the following eloquent tribute:—"Rembrandt was, in my opinion, a genius of the first class, in whatever relates not to form. In spite of the most portentous deformity, and without considering the spell of his *chiaroscuro*, such were his powers of nature, such the grandeur, pathos, or sublimity of his composition, from the most elevated or extensive arrangement to the meanest and most homely, that the best-cultivated eye, the purest sensibility, and the most refined taste dwell on them equally enthralled. Shakspeare alone excepted, no one combined with so much transcendent excellence, so many and other most unpardonable faults, and reconciled us to them. He possessed the full empire of light and shade, and of all the tints that float between them; he tinged his pencil with equal success in the cool of dawn, in the noon-day ray, in the livid flash, in evanescent twilight, and rendered darkness visible. Though made to bend a steadfast eye on the bolder phenomena of nature, yet he knew how to follow her into her calmest abodes, gave interest to stupidity and baldness, and plucked a flower in every desert. None ever, like Rembrandt, knew how to improve an accident into a beauty, or give importance to a trifle. If ever he had a master, he had no followers; Holland was not made to comprehend his power."



HARP OF MARY QUEEN OF SCOTS.

The magnificent picture we have engraved is signed Rembrandt, 1630, and is one of his early works.

CURIOSITIES.

QUEEN MARY'S HARP.

(From a Correspondent.)

The following anecdotic record seems worthy of notice at this particular moment, seeing that it is founded upon an interesting event in the life of the unfortunate Mary of Scotland, the scene the neighbourhood of Balmoral, and the heroine the wife of Findla More, the ancestor of the chieftain of the district a second time honoured with the presence of Royalty. There may be some anachronisms in the story; but the main incidents are correct, and it may be especially interesting now that the forests of Aberdeenshire are again ringing with the horns of Royal huntsmen, her halls again brilliant with the great and noble of the land; and, although not now in the "style of the old Gaelic poets,' the banquetting and the strains of another Royal Harp are again rife in the northern highlands.

In the younger and happier days of Queen Mary, her subjects seem to have delighted in doing honour to their beautiful monarch; and there exists a tradition in the family of General Robertson, of Leeds, in the highlands of Perthshire, that, on the occasion of a magnificent Royal hunt and banquet given to her Majesty by the Earl of Athol, an ancestor of his had the distinguished honour to be presented with the Royal Harp, still preserved in his family, and of which Gunn, in his "Historical Enquiry," has given a plate and description.

Of the truly Caledonian hunt referred to, an account has come down to us, written by Barclay, an eye-witness, which sinks our modern *battues* into insignificance. Among other details, he describes 2000 Highlanders being employed to sweep the game from the woods and hills of the country about Athol, Badenoch, Mar, Murray, &c., which ended in the slaughter of 360 deer, with 5 wolves, and some dogs.

The banquet which followed was sumptuous, and no less in the style of the old Gaelic poets: "the ale went round, the bards sang, and the soft hands of virgins trembled on the strings of the harp." It was then, we can imagine, that, rivalling the Royal minstrels, her Majesty (an enthusiastic lover of the music and poetry of her country) became transported with the superior strains of the Mountain Maid, and, in the rapture of the moment, proclaimed "BEATRIX GARDYN" the Queen of Song, and alone worthy to possess the Royal Harp.

This distinguished lady was a daughter of George Gardyn, of that ilk, and Banchory, Aberdeenshire, whose family is now represented by the Gardens, of Troup. By Miss Gardyn's subsequent marriage with Findla More, a name implying gigantic size and strength of body, both the families of Leede and Farquharson of Invercauld, have descended.

The following is Gunn's description of the Harp, alluding to the plate which accompanies it in his work:—"It had in front of the upper arm the Queen's portrait and the arms of Scotland, both in gold. On the right side, which is the view given in the annexed plate, in the circular space, near the upper end of the fore-arm, was placed a jewel of considerable value, and on the opposite side, in a similar circular space, was fixed another precious stone, of all which it was despoiled in the Rebellion, 1745, either by the persons to whose care the Harp had been at that time confided, or, as those people asserted, had been taken away by the soldiers during the existence of these troubles."—Gunn's "Historical Enquiry respecting the Performance of the Harp." 4to, Edinburgh, 1807.

NATIONAL SPORTS.

The racing movements in the ensuing week will be confined to Newmarket, Wrexham, and Southport, and, except in the first mentioned locality, will have little to excite the public appetite. The grand feature there will be the Cesarewitch, the whereabout, since the withdrawal of the annual grant from the Russian treasury, being supplied by the owners of horses in the shape of a nomination fee of two sovereigns—an exaction scarcely consistent with the term "Free Handicap," applied to the stake. Looking at the result of the four-year old Triennial, at last year's meeting, the usually prize mania destined to go into Sussex; still there will be a large field, and as "the race is not always to the swift," the chapter of accidents may yet turn up a trump-card for the "poor distressed" operatives at the Corner. The meeting, apart from the staple events, promises to be a busy one. The Border and Newcastle Club are the only coursing fixtures, and the steeple-chase calendar is blank.

TATTERSALL'S

MONDAY.—Landgrave has so completely para.ysed the ring, that "round-betting" seems out of the question. It was not without some difficulty that we made out the following quotation :—

CESAREWITCH	
6 to 4 agst Landgrave	20 to 1 agst Beluncrake
10 to 1 —— Escalaria	20 to 1 —— Lady Eden
CAMBRIDGESHIRE.	
4 to 1 agst Landgrave	10 to 1 agst Turnia (c)
400 to 50 agst Landgrave winning the two events	
DERBY.	
13 to 1 agst Prime Minister	20 to 1 agst Teddington
OAKS.—7 to 1 agst Aphrodite	

TUESDAY.—The betting was so extremely languid this afternoon, that it was with some difficulty we made out the following short list of prices :—

CESAREWITCH.	
Even on Prime Minister	4 to 1 agst Confidence
CESAREWITCH.	
6 to 4 agst Landgrave	20 to 1 agst Wanton
12 to 1 —— Escalaria (c)	20 to 1 —— Bellingbroke
14 to 1 —— Bankdove	20 to 1 —— Legerdemain
20 to 1 —— Lady Eden	
CAMBRIDGESHIRE.	
9 to 2 agst Landgrave	10 to 1 agst The Indian
DERBY.	
20 to 1 agst Hernandez	33 to 1 agst Arioste
	33 to 1 agst Bonnie Dundee

CHESTER AUTUMN MEETING.—TUESDAY.

The AUTUMN TRIAL STAKES of 5 sovs each, and 30 added.—Mr. Hadley nd the Black Docter, 1. Mr. Jones nd. Spot, 2.

The FREE HANDICAP of 10 sovs, h ft., and 50 added.—Mr Smith's Master Downes, 1. Mr W. E. Hobson's Gladiole, 2.

The MOSTYN STAKES of 10 sovs each, h ft., and 30 added.—Mr. E. Herbert's Sir Robert, 1. Mr. Wilkins nd. Aristos, 2.

MATCH. 50 sovs.—Mr Bates's Rosencrantz, 1. Mr. Jackson's Mountain Maid, 2.

The CHESTER CUP'S HEAD HANDICAP of 5 sovs each, with 3d added.—Mr. T. Dawson's Cossack, 1. Mr Lawson's Kelesheu, 2.

The SELLING STAKES of 5 sovs each, and 30 added.—Mr. Montgomery's Cantab, 1. Mr. Hewlitt's Snowdrift, 2.

WEDNESDAY.

GRAND STAND PLATE of £50, added to a Sweepstakes of 3 sovs each.—Mr. Dawson's Tarvagie, 1. Mr. Montgomery's Cantab, 2.

GRAND STAND STAKES (handicap) of 10 sovs each.—Mr. J. Osborne's Black Doctor walked over.

CHESTER HANDICAP of 15 sovs each, 10 ft, and 100 added. Mr. Osbaldeston's Fugleman, 1. Mr. Dawson's Cocktail, 2

LEVIATHAN STAKES of 10 sovs each.—Mr. Dawson's Mark Tapley, 1. Mr. J. Fowler's Jack Briggs, 2.

WELTER CUP of £50, added to a handicap of 10 sovs each.—Mr. Kemp's General Sale, 1. Mr. Oakes's Half-and-Half, 2.

SCRAMBLE SELLING STAKES. Mr. J. Osborne's Emily, 1. Mr. Merone's Cauliflower, 2

EXTRAORDINARY PEDESTRIAN FEAT.—A remarkable pedestrian feat has just been accomplished by Robert Pugh, one of the mountain guides at Dolgelly, in Merionethshire, who performed the task of walking from that town to the top of Cader Iris and back four times in 12½ hours. The distance to the summit of the mountain is six miles, and the road is very steep and craggy, and, perhaps, one of the roughest and most toilsome in North Wales. Pugh started at five o'clock in the morning, and concluded his task at half-past six in the evening, having thus accomplished the four journeys within 2½ hours of the stipulated time—the wager, which was for the sum of £10, being that he could not walk the distance in 16 hours. The weather was very wet and cloudy, yet, notwithstanding this drawback, and the arduous nature of the four ascents, the cutide did not appear in the least fatigued. The complet on of the task was announced by a peal of bells.

The largest specimen of gold ore yet received in England has recently arrived from California : it was taken out of the Bank of England on Wednesday, and weighs 26 lb. 9 oz., and is valued at about £700. The mass contains probably 15 lb. pure gold. The present owner proposes to forward it to the great Exhibition. In shape it resembles the lump we recently engraved, and we hear £730 have been refused for it.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Steadiness of price, with rather an upward tendency, has been the prevailing tone of the English Market during the past week. Consols on Monday opened 96¾ ¾, remaining at the same quotation on Tuesday, until nearly the close of business, when an advance of ⅛ was registered. On Wednesday, 96⅞ ⅜ was the price of the day, improving, however, on Thursday to 96⅞ ½ for Money and Account. Exchequer Bills continue to range at about past quotations, with a slight tendency downward. Money being in greater demand, an advance of about ½ per cent. in the rate of discount has been generally submitted to. India Bonds and Stock are about last week's prices ; the other Stock little has been done. At the close of business for the week prices were :—Consols, 96⅝ ; India Bonds, £1000, 89 pm ; Ditto under £1000, 85 pm ; Bank Stock for Account, 213½ ; Consols for Account, 96⅝ ; Exchequer Bills, £1000, June, 68 pm ; Ditto, £500, June, 68 pm ; Ditto, Small, June, 68 pm.

Mexican Stock has been the only security in which any animation has occurred during the week. On Monday, the quotations rose, upon a brisk demand, from 31¼ to 31⅝ ⅜ 32 ; afterwards receding to 31⅜ ⅛. The market, however, became weaker on Tuesday, from realising, but without any decline in quotations until Wednesday, when, sales continuing, 31⅜ to 31⅝ became the quotation ; since which it is still flatter. Russian and Danish quote firmly. In Spanish very little business has been done. The market was rather inanimate ; at the close of the week prices quoting—Buenos Ayres Bonds, Six per Cent , 57½ ; Danish Bonds, 1825, 3 per Cent., 76 ; Do., 5 per Cent., 100 ; Mexican, 5 per Cent., 1846, Ac., 31⅜ ; Peruvian Bonds, Four-and-a-Half per Cent., Account, 79½ ; Portuguese Four per Cents, 33½ ; Russian Bonds, 110½ ; Spanish, Passive, 5⅜ ; Ditto, Three per Cent. Account, 38½ ; Dutch Two-and-a-Half per Cent., 57½ ; Ditto, Account, 57½ ; Ditto, Four per Cent. Certificates, 88⅜ x d.

Shares have rather receded as the Account-day approaches, notwithstanding the revenue returns display an increase of traffic. A rise so sudden as that recently, is usually followed by some reaction. Prices are :—Ambergate, Nottingham, Boston, and Eastern Junction, 2½ ; Bristol and Exeter, 68½ ; Caledonian, 6½ ; Chester and Holyhead, 9½ ; East Anglian, 2⅝ ; Eastern Co. let and L. and D., 2½ ; Do., £3 10s., Pref., ½ ; Eastern Counties, 6⅞ ; Do., do., No. 2, 3⅝ ; East Union, Class A (late E. U. Shares), 6⅞ ; Do., Class B and C, 4⅜ ; Do., Scrip (⅝ per cent.), 1½ ; East Lancashire, 9½ ; East Lincolnshire, par ; 6 per Cents., 80 ; Great Northern, 13⅜ ; Ditto, Half, A, Deferred, 4⅜ ; Ditto, Five per Cent. Pref., 11⅜ x ; Great Southern and Western (Ireland), 35½ ; Ditto, Eighths, 3⅛ ; Great Western, 70¾ ; Ditto, New, £17, 9½ ; Hull and Selby, 97 ; Ditto, Half Shares, 48½ ; Lancashire and Yorkshire, 69¾ ; Ditto, Fifths, 2⅝ ; London and Blackwall, 6¾ ; London, Brighton, and South Coast, 83½ ; London and North-Western, 116 ; Ditto, New Quarters, 19⅜ ; Ditto, Fifths, 1⅝ ; London and South-Western, 68½ ; Manchester, Buxton, and Matlock, 1½ ; Manch., Sheffield, and Lincolnsh., 19½ ; Midland, 44⅝ ; Ditto, £50 Shares, 13⅜ ; Ditto. Consolidated ; Bristol and Birmingham, Six per Cent., 122½ ; North British, 7¾ ; North Staffordshire, 7¾ ; Oxford, Worcester, and Wolverhampton, 11¾ ; Reading, Guildford, and Reigate, 18¾ x d ; Royston and Hitchin, 7¾ ; Scottish Central, 12⅜ ; Shrewsbury and Birmingham, 5 ds ; Ditto, ditto, Class B., 6¾ ds ; Shropshire Union, 2⅜ x ; South Devon, 3⅛ ; South-Eastern, 20¾ x d ; South Wales, 24¾ ; South Yorkshire, Doncaster, and Goole, 10⅜ ; Wilts, Somerset, and Weymouth, 43⅜ ; York, Newcastle, and Berwick, 16⅜ ; Ditto, G.N.E. Preference, 4⅜ ; York and North Midland, 24⅜ ; Ditto Preference, 8 ; Boulogne and Amiens, 6¾ ; Dutch Rhenish, 3½ ; East Indian, 9½ ; Luxemburg, 1⅜ ; Namur and Liege, 8 ; Paris and Rouen, 24⅜ ; Paris and Strasbourg, 7⅜ ; Sambre and Meuse, 3.

SATURDAY MORNING.—The English Market was very buoyant yesterday, Consols opening the improved price of 96⅞ ⅞ for Money and Account. Foreign Stocks were languid, without any change worthy of notice. The Share Market was flatter.

THE MARKETS.

CORN-EXCHANGE (Friday).—The supply of English wheat in to-day's market is very limited, but left over from Monday's good, and of fair average quality. The attendance of buyers on the arrival's, however, have announced to-day quarters. The attendance of both town and country buyers has been limited, the demand for all kinds of wheat from produce was a very sluggish state. Selected qualities were held at full prices, but the middling and inferior qualities were nominal at lower rates. A total clearance was effected. From abroad 11,240 quarters of wheat have arrived this week. That grain is met a very slow inquiry in prices have not, we have no change to report. The few samples of fo offer sold at full currencies, but the on stainables had a downward tendency. The inquiry for malt was wholly in retail, at previous quotations. There was a fair business doing in oats, and late rates were well supported. Beans, peas, and Indian corn were neglected. Flour, both English and foreign, moved off slowly, at Monday's prices.

ARRIVALS.—English : wheat, 2590 ; barley, 810 ; malt, 850 ; oats, 1140 ; flour, 690. Irish : oats, 5770. Foreign : wheat, 11,240 ; barley, 2050 ; oats, 1710 ; flour, 3500

English.—Wheat, Essex and Kent, red, 37s to 42s ; ditto, white, 38s to 43s ; Norfolk and Suffolk, red, 35s to 41s ; ditto, white, 37s to 42s ; rye, 28s to 30s ; grinding barley, 21s to 23s ; distilling ditto, 25s to 27s ; malting ditto, 28s to 29s ; [illegible] and Yorkshire and Lincolnshire ditto, 43s to 49s ; Kingston and Ware, 45s to 52s ; Chevalier, 52s to 55s ; Yorkshire and Lincolnshire, red seeds, 16s to 17s ; potato ditto, 18s to 20s ; coogleal and Cork, black, 15s to 17s ; ditto, white, 18s to 17s ; tick beans, new, 20s to 27s ; ditto, old, 28s to 30s ; grey peas, 30s to 33s ; maple, 30s to 32s : white, 26s to 31s, boilers, 30s to 32s ; Suffolk, 28s to 34s, Stockton and Yorkshire, 29s to 34s per 20½ lbs. *Foreign :* Danzig red wheat, —s to —s ; white, —s—s ; barley,—s—s ; oats, —s—s ; beans, —s —s ; peas, —s—s per quarter. *American flour*, 21s to 23s per barrel; Canada,—s to —s per barrel.

The Seed Market.—Canary is still declining in value, but linseed and rapeseed are quite as dear as last week. All other articles are very dull.

Linseed. English, sowing, 56s to 58s ; ditto, crushing, 38s to 44s ; Mediterranean and Odessa, 42s to 46s ; hempseed, 32s to 35s per quarter; coriander, 18s to 24s ; brown mustard-seed, new, 5s to 10s ; white ditto, 6s 0d to 7s ; rapeseed, 22s to 24s per last ; English tares, new, £2s to £27 per last ; linseed cakes, English, £8 to £9 ; ditto, foreign, £6 5s to £7 10s per 1260 ; rapeseed cakes, £4 0s to £5 0s per ton ; and canary, 52s to 61s per quarter. English clover-seed, red, —s to —s ; extra, —s to —s ; white, —s to —s ; extra, up to —s. Foreign, red, —s to —s ; extra, —s to —s ; white, —s to —s ; extra, —s per cwt.

Beef. The prices of meat in the leading cuts in the metropolis are from 7d to 7½d ; of household ditto, 5d to 6 d per 4lb loaf.

Imperial Weekly Average.—Wheat, 42s 2d ; barley, 24s 8d ; oats, 16s 8d ; rye, 26s 7d ; beans, 29s 6d ; peas, 31s 3d.

The Six Weeks' Average.—Wheat, 42s 10d ; barley, 23s 10d ; oats, 17s 3d ; rye, 25s 10d ; beans 29s 9d ; peas, 29s.

Duties.—Wheat, is ; barley, 1s ; oats, 1s ; rye, 1s ; beans, 1s ; peas, 1s

Tea.—About 4000 packages of tea have changed hands at public sale, at very full prices. Privately, a good business is doing.

Sugar. All kinds of raw sugar are in good request, at a further advance in the quotations of 6d per cwt. Foreign sugars are mostly held for more money. Refined goods steady, and brown lumps are worth 42s to 42s per cwt.

Coffee. In public sales, Ceylon is a slow sale, at 54s to 55s per cwt In other kinds of coffee very little doing.

Provisions.—Irish butter is in good request, at fully previous rates :—Carlow, Clonmel, and Kilkenny, 80s to 84s ; Cork, 81s to 82s ; and Limerick, 75s to 79s per cwt. Higher currencies have been realized for English Devon, 78s to 80s per cwt.; fresh, 9s to 12s per dozen lbs. Dutch Butter is in per cwt. demand, and fresh lands worth 90s per cwt. Bacon supplies have been having come to hand, the value of that article has given way 2s per cwt. Prime sizeable Waterford may be had at 56s to 58s per cwt. In other articles we have no change to notice.

Tallow. Our market is steady, at a boat stationary prices. P.Y.C on the spot is selling at 36s 3d to 37s for new ; and 37s 3d to 38s 3d for old.

Oils.—For export scarcely any business is doing, but for home consumption the general demand is firm, and prices are well supported

Hay and Straw.—Meadow hay, £3 10s to £3 15s ; clover ditto, £3 0s to £4 5s ; and straw, £1 1s to £1 6s per load.

Spirits. We have a dull inquiry for rum, yet prices are mostly supported. Demerara, 34 to 37 per cent over proof, is selling at 2s 1d to 2s 3d per gallon. Brandy and nom spirits are in moderate request.

Wool. The private current trade is steady, especially for English qualities.

Potatoes.—All kinds move off freely, at an advance in the quotations of 5s per ton; the best qualities being worth 70s.

Coals.—Whitwell, 14s ; Stewart's, 17s, Pemberton, 15s 3d ; Tanfield Moor, 12s ; Berwick and Co., 15s 6d ; Carr's Hartley, 16s ; Tees, 15s 6d per ton.

Hops (Friday).—Very large supplies of new hops are on sale in our market ; nevertheless the amount of business done is extensive, and prices are well supported : in old hops scarcely any sales have taken place. Duty, £315,000 to £320,000 The following are factors' currencies :—

New East Kent pockets, £4 15s to £7 0s ; New Mid Kent ditto, £4 5s to £6 6s ; Weald of Kent ditto, £3 12s to £4 0s. Sussex, £3 3s to £4 5s. Upwards of 700 pockets, damaged by the late fire in Mark-lane, have been disposed of by public sale, at very low prices.

Smithfield (Friday).—The supply in this day has been moderately well supplied with beasts as to number, but their general quality was inferior. The primest breeds were in moderate request, at full prices. Otherwise the beef trade ruled exceedingly heavy, at barely late rates. Notwithstanding that the supply of sheep was only moderate, the primest Downs on Friday last, the mutton trade, owing to the large receipts of country-killed meat up to Newgate an. Leadenhall-market, ruled heavy at barely last Monday's currencies. Lambs were in steady request, at about stationary prices. Prime small pigs moved off steadily, at fully Monday's currencies, but large lots were unsaleable. Milch cows ruled heavy, at from £14 to £18 the each, including their small calf.

Per 8 lb to sink the offal.—Inferior beef, 2s 6d to 2s 8d ; middling ditto, 2s 8d to 2s 10d ; prime large ditto, 2s 8d to 3s 0d ; prime small ditto, 3s 0d to 3s 4d ; large pork, 2s 0d to 2s 8d ; inferior mutton, 2s 8d to 3s 2d., middling ditto, 3s 4d to 3s 6d ; prime ditto, 3s 8d to 3s 10d ; veal, 3s 10d to 3s 8d ; small pork, 3s 10d to 4s 4d.

BIRTHS.

On the 4th inst, at 14, Queen Ann street, Cavendish-square, the wife of Alexander Halley, Esq, M.D., of a daughter.—At Maidstone, the wife of Captain Dublin, the lady of the Hon James Talbot, of a daughter.—At Plaxtone, the Lady Methuen, of a daughter.—At the Seagrave of Lee, Mr. Herbert Lemuel Campbell, late of the 1st Bengal Fusiliers, of a daughter.—On saturday, the 5th instant, at No 6, Cheyne-walk, Chelsea, the wife of Thomas Butler, Esq, of a daughter.

MARRIAGES.

On the 21st of September, by special license, at his residence, Vaxsham, St Heller's, Jersey, by the Rev J Bird, D.C.L, P.R.S, Edward Hamilton Stirling, Esq, F.R.S, late of the Bengal Civil Service, son of the late Andrew Stirling, Esq, of Drumpellier, Lanarkshire, to Annie Isabella, youngest daughter of the late Captain William Augustus Glasscock, Royal Navy.—At Hampstead, Surrey, George Frederick Pownall, George Dowbiggin, Esq, B.M, second son of the late Captain Drury, R N and grandson of the late General Sir Valapree, to Sarah youngest daughter of the late Henry Ogden Lay, of New Inn, Bryanstone-square.—At St James's Church, Paddington, Mr Octave Delapierre, Secretary to the Belgian Legation, and Consul of his Majesty the King of the Belgians, to Miss [illegible] Jane, youngest daughter of the late Samuel Bevan, Esq, of Bevan's-court, in the city of London.—At Wakefield Meade Waldo, Esq, of Shrewsbury, to Mary Anne, youngest daughter of the late Richard Meade Waldo, Esq, of Dublin.—At Stoke Damerel, Devonport, Mr Thomas Wilson, Assistant Master attendant of her Majesty's Dockyard, Devonport, to Mary Ann, youngest daughter of the late William Harris, youngest daughter of the late William Harris, of Trowbridge, Wilts.

DEATHS.

Henrietta the wife of [illegible] Trafford Leigh, of Dunham Hall, in the county of Chester, and third daughter of the late Rev Sir Thomas Delves Broughton, of Doddington Hall, in the county of Chester, Bart, aged 41.—At Edinburgh, Colonel Holman Custance.—At Lahore, East Indies Lieutenant-Colonel George Augustus Mee, in command of the 65th Regiment N.I., aged forty-five.—At Hanwer, Flintshire, in the sixty-seventh year of his age, the Rev [illegible] M A for upwards of forty years vicar of that place.—At Worthington Rectory, Mildenhall, Suffolk, the Rev James Gibson, in the sixty-sixth year of his age.—At [illegible] aged sixty-four [illegible] Chief secretary to the Lord Lieutenant of Ireland, and one of the [illegible] Privy Council.—At [illegible] Lieutenant-Colonel Thomas Lowther Pin No 21 Foot, the Royal [illegible] Major of Brigade, and Aide-de-camp to the Governor of the city of Oxford.—In the Isle of Wight, Lieutenant-General Sir Edward Parry, Knight H. [illegible] It is with much regret we have to announce the death of Lieutenant-Colonel Hart, of [illegible] Hart, M.P. for Armagh county Ireland, aged seventy years. William Stewart, Esq, late Lieutenant-Colonel of the Royal Tyrone Militia, and for many years representative of that county in Parliament.

THE ARCTIC VOYAGE OF THE "PRINCE ALBERT"

IN SEARCH OF SIR JOHN FRANKLIN.

SOME faint gleams of hopeful light have at last been thrown upon the gloom of uncertainty which hangs over the fate of Sir John Franklin and his companions. We referred last week to the arrival of the *Prince Albert*, Commander Forsyth, at Aberdeen. At Cape Riley, near the western entrance of Barrow's Straits, he found marks of five tents that had been pitched—many remains of birds, beef, and pork—and, most valuable evidence of all, a piece of rope, with the well-known Admiralty mark of the yellow strand, and with the smell of tar about it so strong as to prove that it could not have been many years exposed. Captain Ommaney, who had commanded the search in 1845, took notice that he had met with the same signs on Beechey Island. As no man-of-war has landed at Cape Riley since 1824, unless the *Erebus* and *Terror* did so, it is reasonable to identify the vestiges we have described with those vessels. It seems strange, however, that they should have left so little behind them in the course of their progress.

On Monday morning, Captain Forsyth attended at the Admiralty, and brought with him the several bones (roof, pork, &c.) which were found at Cape Riley, together with a piece of rope about 6 feet in length, and a small piece of canvas with the Queen's mark upon it, both in an excellent state of preservation, placing it almost beyond a doubt even that they were left on that spot by the expedition under Sir John Franklin

The voyage performed by the *Prince Albert* has thus been the means of keeping alive our hopes, and of informing us, up to a certain point, of the movements of our Government Expeditions ; of which we might have been left in a state of utter ignorance till about this time next year, if the *Prince Albert* had not been sent out. Everything connected with the navigation of the Arctic Seas is a *chance*, coupled, of course, with skill and looking at this voyage performed by Lady Franklin's little vessel, it must be obvious to every one that Captain Forsyth had the *chance* of an open season, and the *skill* to make use of it.

Captain Forsyth's voyage, performed in the summer months of 1850, will be handed down to posterity as one of the most remarkable, if not *the* most remarkable that has ever been accomplished in the Arctic Seas : the Expedition consisting of one solitary vessel, the *Prince Albert*, of 89 tons! The main object of the voyage, it is true, has not been accomplished ; but, as all the harbours in Prince Regent's Inlet were frozen up, and it was not possible to cut through four or five miles of ice to get the ship to an anchorage, Captain Forsyth had no alternative but to return.

The piece of rope brought home as above has been examined by Mr. Burton, and an official report forwarded to the Admiralty, by Captain Superintendent Richards. The master rope-maker states it to be a piece of common rope, and not whale-line ; and, further, it appears by the books of the yard that the yellow worsted mark, the distinguishing mark of Chatham rope yards, fixes the date of manufacture subsequent to 1824, as the order assigning different coloured worsteds to each yard bears date April 26, 1824, and which white worsted was in use at Chatham, and most probably throughout the service, having been introduced in July, 1814, as a substitute for the rogues' yarn.

"Supplies of rope of many sizes, including twelve coils of 1¼-inch common rope, were sent to Woolwich in November, 1844 ; and 41 coils of the same description between January and April, 1845. During the latter period, a supply of Arctic stores was sent from Chatham to Woolwich, expressly for the *Erebus* and *Terror*."

Mr. Burton, the master-ropemaker, is of opinion that the rope was manufactured from Hungarian hemp, tarred with Mr. Bayley's compound tar ; but he cannot ascertain correctly the date of the manufacture.

A Correspondent of the *Times* writes, whose name, if mentioned, "would insure the utmost attention to any opinion he expressed," states there now to be "no doubt that Sir John Franklin has passed up Wellington Inlet ; that his ships are probably frozen in there ; and that the encampment at Point Riley was, probably, formed by a detachment sent to be on the outlook for vessels, who returned to their ships when their provisions were exhausted, or when the winter set in."

From Captain Forsyth's report it is obvious that all parties engaged in the search were convinced that they were on the traces of Sir John Franklin, and that the captains and crews of all the vessels were pushing on in emulation, each anxious to be the first to reach him

By report of Mr. Snow, the officer who landed at Cape Riley from the *Prince Albert*, on Aug. 25, we are enabled to engrave the accompanying plan, together with a view of the Cape, with the American brig *Advance* nearly among icebergs aground, and the *Prince Albert* to the right In the horizon is the first and second signal staff, bearing N.W. ½ W. (compass), distant about two miles and a half.

Appended is an extract from Mr. Snow's private journal :—

"Cape Riley It was clear that some party, as Captain Ommaney expressed, belonging to her Majesty's ships had been there ; and as there was no one from your vessel who had landed here since the time when Sir Edward Parry sent an officer on shore to make observations, in 1819, I could not but reasonably infer that it was Sir John Franklin's expedition that had encamped here and on Beechey Island. The mere fact that this was really the case, gave to the otherwise barren spot new interest in mine eyes. I surveyed it narrowly It was, as I have before observed, a high, bluff headland, with a low projecting tongue, and point of land running from it into the sea almost at right angles to the base of the underclift. This tongue was sufficiently broad to have accommodated a tolerably large party ; but it afforded very poor shelter from the winds or sea, coming from any quarter but that of the N.E. The high rock which formed the boundary to the north-west [illegible] [illegible] [illegible]

(*Continued from page* 298.)

the rock, and succeeded in shooting her. Her weight, when dead, was estimated at 1900 lb., and her skin proved to be one of the finest ever taken in that country. Upon searching her lair, three young cubs were discovered, so young, indeed, that they could scarcely see. These fell to the lot of Mr. Pacton, who fills the office of Judge in one of the gold districts, and were by him carried down to San Francisco, and thence by way of Chagres and Panama, by steamer, to this country. In their transport across the Isthmus, the box in which they were conveyed was carried on men's shoulders, and at particular points of the road its passage was only effected with the greatest difficulty. Originally destined for New York, but arriving too late for the July steamer, they accompanied Mr. Pacton to England, for it appears, that, as the history of the hippopotamus was then the newest European topic of conversation at Panama, that gentleman made up his mind to take the animals with him, and to transfer them to the collection of the Zoological Society. Among the riches of that ever-expanding "treasury of knowledge," the young bears were accordingly deposited the day after their disembarkation at Southampton, and within four months of their birth in the far western solitudes of the Rocky Mountains

Of the vast majesty of the Grisly Bear, it is not to be expected that these younglings can yet exhibit much indication; but every one will hope that the fortunate management which has already overcome so many difficulties in similar matters, will, in a few years, develop out of these elements such a group of animals as would excite the thirst of an Indian connoisseurs of those *recherché* necklaces, strung from the claws of the Grisly Bear (of which our readers may have seen specimens in Mr. Catlin's collection), abound among the wild warriors of the West; and they have so perseveringly sought for these trophies, that the bears are rapidly diminishing in number. When we add to this the great changes which a very brief period will effect in the particular region from which these animals have been brought to the Society, it is not very probable that another opportunity will occur of obtaining a beast so wild in its habits, and affecting a range of country so remote from the more ordinary and facile means of transport. The Grisly Bear is distinguished above all its congeners by its enormous weight, power, and ferocity. It attains very mature age, for the fine example formerly presented to the Society by King George the Fourth was said to have lived thirty years in the Tower Menagerie before it was removed to the Gardens.

After the death of that animal, the Society acquired two young ones from Mr. Catlin, who either captured them himself or obtained them in one of the many Indian encampments in which he was a sojourner. These animals lived but a few months after their arrival in this country the present specimens will, therefore, to a vast proportion of the visitors, be entirely new. And while we have our hand upon bears, it will not be amiss to draw attention to another interesting species, in a neighbouring division of the Terrace, which is now exhibiting for the first time in Europe. This is the Isabelline Bear of the Himalaya. It is easily distinguishable by the large and shaggy character of its ears, which are perfectly different from those of the European bear, as well as by the expression of its head. The Isabelline bear, in the high regions of the Himalaya, varies exceedingly in colour, frequently becoming so pale as to have given rise to a notion which is current among some of the Indian sportsmen, that an ice-bear exists in the snowy mountains of Asia, as well as in the Arctic Sea. And here, were it not too endless a story to recount the acquisitions of this most popular and most rational menagerie, another word might be said upon the true ice-bear, of which a gigantic male has just been obtained from Greenland, in addition to the beautiful female, who attracts so considerable a share of public attention; notwithstanding her vicinity to lions, tigers, jaguars, pumas, cheetahs, leopards, tiger-wolves, and all the other destructives which are dearest to people who make holiday. We rejoice to perceive by the most recent tablets affixed to the Terrace, that her Majesty the Queen of Portugal has distinguished the Society by an approving mark of her appreciation of their labours, and has presented to them a beautiful young honeas, from Mozambique.

GRISLY BEARS, IN THE GARDENS OF THE ZOOLOGICAL SOCIETY, REGENT'S PARK.

M. HASSENPFLUG, THE HESSIAN PREMIER.

M. Hassenpflug is the Minister of Justice and Finance of the Electorate of Hesse-Cassel, the affairs of which state are at present in deplorable confusion, in a great measure owing to this Minister's misconduct.

The *Neue Hessische Zeitung* states that the flight of the Elector from Cassel was the result of one of M. Hassenpflug's intrigues, who assured his master that a mutiny had broken out in the barracks, and that nothing but a precipitate flight could save his life. This statement is borne out by the fact that the Elector, on reaching the Hanoverian frontier, informed an officer that "Cassel was in open revolution, and that his beautiful castle was by this time a heap of ruins."

M. Hassenpflug is a Professor of the Prussian University of Griefswald, and owes his seat in the Hessian cabinet to the high and arbitrary views of government, which he has frequently, and somewhat obtrusively, pronounced; in this respect, however, he supported the will of the Elector, respecting the legality of whose measures a difference of opinion has long existed in the cabinet. M. Hassenpflug's elevation from the chair of a small university to the presidency of a small German state, came just in time to save him from the consequences of a forgery, of which the Court of Appeal at Griefswald found him guilty; the advancement to the Premiership of a Government of such a man was felt by the people of Hesse as a national disgrace, and as an earnest of their Prince's intentions, and his determination to carry them out, no matter at what risk. The Hessian Diet recorded their want of confidence in a Cabinet with such a head, and the Diet was consequently dissolved. An attempt was then made to obtain an injunction from the High Court of Appeal on the Ministerial measures, when M. Hassenpflug secured the Elector's signature to a decree which imposed upon the Electorate of Hesse the burthen of martial law. It is recorded that the proclamation of this last extreme measure was considered by M. Hassenpflug as a signal triumph, while some of his colleagues were of a different opinion. In a Cabinet Council held on the day of the proclamation, he said, with great glee, "Now, gentlemen, the thing is done, after all I'd like to see the man who would do the like." And he was rather startled by one of the councillors present replying, "I'm sure nobody would;" while the rest were silent and gloomy.

The tables were, however, soon turned upon the Premier; for the public prosecutor, when applied to by the Committee of the Diet, preferred an impeachment against M. Hassenpflug, and issued a warrant for his attachment; and although the execution of that warrant was impeded by some technical irregularities, it was easy to foresee that these objections would be removed, and that M. Hassenpflug would, in all probability, be compelled to take his trial on the charges of malpractices and treason.

M. HASSENPFLUG, MINISTER OF JUSTICE AND FINANCE OF THE ELECTORATE OF HESSE-CASSEL.

Opposed by the people, by the courts of law, by the civic magistrates, and retaining but a weak hold on the soldiery, the Elector and his Premier knew that they could expect no help from any of the other German States. Prussia had pronounced against any intervention in Hesse.

The Elector, accompanied by two of his Ministers, left Cassel on the 13th ult., and arrived at Hanover in the evening.

"M. Hassenpflug (says the *Times* Correspondent), who was not invited to accompany his master, arrived at Rheda in Westphalia on the 14th instant, and on the following morning he took the train to Cologne. He was pale, and his features were distorted with fear and the fatigues of his journey. He informed his fellow-travellers that he was proceeding to Coblentz, but it was generally supposed that he intended to escape into Belgium. His presence in the train having become known, it was soon whispered at all the stations that the 'Hessen fluch' (Hessen's curse) was a passenger in a certain carriage, and everywhere public opinion vented itself in groans and execrations. On the arrival of the train in Düsseldorf, the *gendarmes* on duty were informed of the presence of Hassenpflug, the convicted forger of Griefswald. He was there arrested, and taken to the police-station, but he was subsequently allowed to proceed by post to Langenfeld, where he intended to wait for the Elector's arrival."

The Court of Appeal has since quashed the charge of embezzlement against the unpopular Minister. He appears to have been accused wrongfully, and unfairly treated. The facts are these: he was attached to a Prussian law court at Griefswald, and, as such, had an official residence, a small sum was allotted for repairs, which were prescribed: instead of using it all for one purpose, he expended part for another—mended a ceiling with it, instead of patching a floor! The money all went upon the official house, and none into his own pocket. An English jury would scarcely have entertained the charge for a moment.

Still, M. Hassenpflug is a harsh, arbitrary, ill-disposed man; he quitted the Prussian judicial service to be Minister of Hesse, about a year ago; and, having been placed over the heads of many officials, is, of course, no favourite with them. Altogether he has betrayed great unfitness for his office. So unpopular is he at Cassel, that his portrait (an excellent likeness, whence our Engraving is copied) was published a few days since, with the following emblems at the corners:—A monk cutting off the eighth commandment, a thieving bird; a gibbet (with two occupants); and a plundered chest. Such is the liberty of illustration in the troubled Electorate of Hesse-Cassel.

A NEW REFORM MOVEMENT.

THE "New Reform Movement" of the politicians languishes for want of support. Sir Joshua Walmesley aspires in vain to occupy a position like that held forty years ago by another more doughty champion of the people, who not only kept Westminster, but the whole kingdom, in an uproar, and went to the Tower an easy martyr for his opinions. Mr. Feargus O'Connor, of whom Sir Joshua would do well to disembarrass himself at the earliest opportunity, considers Financial Reform a matter of so little consequence, that he would not say "Thank you" to the Chancellor of the Exchequer, if he swept off ten millions of taxation at one magnificent swoop. Ten millions would not, he says, provide his "children" with a pot of beer per month; and all, in his polite phraseology, are "geese" who hold a contrary opinion. The very word "Reform" is out of fashion; and those who, in spite of the fashion, persist in calling and in thinking themselves Reformers, cannot find a question or a principle of agreement, but dispute amongst each other, with most unteachable pertinacity. Yet amid this disposition, or indisposition, of the public mind to Reform questions, a matter of real social reform has been unexpectedly mooted, which, instead of throwing disunion into the thick ranks of the democracy, has rallied around it people of all ranks, classes, and orders. The cry is, "Reform our hats. Take off our funnels; and in this age of 'progress' and of intellectual refinement, let our heads be surmounted with something more shapely than a chimney-pot. Let civilisation, which has improved our heads, improve our hats also, and let us walk abroad in a costume that is not utterly repugnant to all sense of beauty, and all feeling of comfort." This is the rallying cry. It has been responded to with enthusiasm. From the lord of one hundred thousand acres to the hard-worker for his daily bread—from the Duke to the dustman—from the ultra-Conservative to the ultra-destructive—from the High Churchman to the No-Churchman—from the Puseyite to the Presbyterian—from the gentleman down to the veriest "gent" that saunters in Regent-street, this new question of Reform has drawn unanimous adhesion. In fact, the attempted revolution in our head-gear, more fortunate than any of the Continental revolutions in 1848, promises to be successful.

The ladies are as unanimous as the gentlemen on the subject, and give the potent assistance of their voices to the movement, and wonder how it is that men, who have generally so keen a sense of the beautiful, should have been so long blinded to the ugliness imposed upon their lordly foreheads by the hat-makers. A few of the most conservative of these hat-makers are the only persons who venture a word in defence of the ancient barbarism which it is the object of the revolutionists to remove. Now and then a hater of all novelties, whether of hats or of ideas, will venture to come to the aid of the hat-makers, and to ask if any one can suggest a better head "accoutrement" than the old familiar hat which it is attempted to scout out of society with such hasty ignominy. But, if hatters and the hat conservatives are closely pressed to tell us what recommendation the article has, they are obliged to give up the argument in despair—to entrench themselves in the old fortress of such reasoners, and to defend what is, merely because it is. They would stand on the old ways, were they knee-deep in slush; and they would wear the old hat, were it not only of the shape, but of the material and the colour of a chimney-pot.

Everybody who has worn a hat, has perceived it to be a nuisance, although he may never have said anything on the subject till the present cry was raised. As soon as a man gets out of the streets of the capital, or of his own accustomed provincial town, and sets foot in a railway carriage or on board of a steamboat, his first care is to make himself comfortable by disembarrassing his aching temples of his hat. The funnel is put away, and a cap, more ornamental and a thousand times more easy, is elevated to the place of honour, to the great satisfaction of the wearer. Who ever wears a hat at the sea-side? One might as well go to bed in a hat, as wear one out of the purlieus of the town. At the sea-side, or in travelling, or sporting, or rambling over the hills, the ordinary hat is utterly out of the ques-

THE LATE QUEEN OF THE BELGIANS, FROM A DRAWING BY M. BAUGNIET.—(SEE NEXT PAGE.)

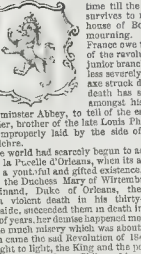
tion. Not only is the hat unsightly, expensive, and incommodious;—not only does it offend those "esthetic" notions which are so fashionable in our time, but it may safely be alleged that it is hostile to all mental effort. Did any man ever make an eloquent speech with a hat on? Could a painter paint a good picture, if he had a hat on his head whilst engaged at the easel? Could a mathematician solve a problem? could a musician compose a melody or arrange a harmony? could a poet write a song, or a novelist a novel, or a journalist a leading article, with a hat upon his temples? The thing is impossible. Would any man who respected himself, or the feelings of his family and friends, consent to have his portrait painted with the offensive article upon his cranium? It would be almost a proof of insanity, both in the sitter who should insist upon, and the artist who should lend himself to, the perpetration of such an atrocity. We have but to fancy one out of the thousand statues of bronze or marble which it is proposed to erect to the memory of Sir Robert Peel in our great towns and cities, surmounted with a hat of marble or of bronze, to see, at a glance, the absurdity of the thing, and the reasonableness of the demand for a change. There is a very good bust of Chaucer, with a cap on, and there is a still more excellent bust of Lorenzo de Medici, which has also a cap; but we put the question to the most Conservative of hatters, and to the greatest stickler for the *status quo* in head attire, whether he would tolerate the marble or bronze portraiture of either of those worthies with the modern hat upon its head? The idea is so preposterous, that, if fairly considered, it would make converts of the most obstinate sticklers for the hat of the nineteenth century.

Seriously speaking, the suggestion for the reform of this article of costume is entitled to the utmost respect. Already Englishmen, when they throw off the trammels of ceremony, and wish to be at their ease, substitute for the stiff, uncomfortable, and inelegant hat, such other articles as the taste and enterprise of the hat and cap manufacturers have provided; and in France and Germany the hat has, for the last six or seven years, been gradually altering its form and substance until it bids fair to be restored, at no distant day, to the more sensible and picturesque shape which it had a couple of centuries ago. So much unanimity has been expressed on the desirability of a change, so much sober truth has been uttered under the thin veil of jest on this matter, and so keenly felt are the inconveniences—to say nothing of the inelegance—of the tube which has usurped and maintained a place upon our heads for so long a period, that there can be no doubt the time is ripe for the introduction of an article of male head-dress more worthy of an educated, civilized, and sensible people. The Turks, under the influence of that great reformer, Sultan Mahmoud, and his worthy successor, Abdul Medjid, have been for some time assimilating themselves in dress to the other inhabitants of Europe. They have adopted our coats, our trousers, our vests, our boots. They have got steam-boats and newspapers - but Sultan Mahmoud stopped short at the hat. With all his *penchant* for imitating the "Giaours," he could not bring himself to recommend the hat to a people whom he was desirous to civilize. Any man of taste and enterprise, who would take advantage of the present feeling on the subject to manufacture a hat or cap of a more picturesque form, would confer a public benefit, and would not lack encouragement for his wares. An article which would protect the face from the sun, which the present "funnel" does not—which should be light, which the hat is not—which should be elegant, and no offence to the eye of taste if painted in a portrait or sculptured in a statue, which the hat is not—and which should meet the requirements of health, as well as those of comfort and appearance, which the hat is very far from doing would, all jest and *persiflage* apart, be a boon to the people of this generation. It needs but example to effect the change, for the feeling is so strong and universal that a good substitute would meet with certain popularity. We have no doubt that, sooner or later, this reform will be made; and that the historian, writing fifty years hence, will note it in his book as a remarkable circumstance, and a proof of the pertinacity with which men cling to all which habit and custom have rendered familiar—that for three-quarters of a century, if not longer, a piece of attire so repugnant to the eye of taste, and so deficient in any quality which should recommend it to sensible people, should have been not only tolerated, but admired. In all seriousness, we hope that the days of the tubular hat are numbered, and that in this instance philosophy in sport will become reformation in earnest.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

THE QUEEN OF THE BELGIANS.

AMONG the many misfortunes which have fallen upon the Princes of the blood Royal of France, the frequent visitation of death amongst them is particularly remarkable; coming, as it has often done, in shapes the most terrible, or at periods the most premature From the time when Louis XIV., in the midst of his power, had to mournfully acknowledge the mortality in his greatness in the almost daily demise of some of his numerous children and descendants, from that time till the present, when a pestilence from the marshes to represent the line, the elder branch of the house of Bourbon has scarcely ever been long out of mourning. In later years, indeed, the Bourbons of France may claim their all but utter extermination to the axe of the revolution and the dagger of the assassin. The junior branch of this unfortunate race has been scarcely less severely tried by fate. Since the sword-revolutionary axe struck down the fifth Duke of Orleans, death after death has suddenly and often prematurely happened among his progeny. A superb tomb stands in Westminster Abbey, to tell of the early demise, in exile, of the Duke of Montpensier, brother of the late Louis Phillipe, whose own remains might have been not improperly laid by the side of his princely relative, in that beautiful sepulchre.



The world had scarcely begun to admire that exquisite creation in marble of Joan la Pucelle d'Orleans, when its author, a Princess of Orleans, passed away from a youthful and gifted existence, full of harmless and virtuous. This Princess, the Duchess Mary of Wirtemburg, died in 1839. In 1842, her brother, Ferdinand, Duke of Orleans, the hope of the French nation, perished by a violent death in his thirty-third year. Their aunt, the Princess Adelaide, succeeded them in death in 1847, and though she departed in the fullness of years, her demise happened most inopportunely, and seemed to be a prelude to the much misery which was about to fall upon her family and her country. Then came the sad Revolution of 1848, when, as it is every day more clearly brought to light, the King and the people mistook each other. Nearly within two more years, Louis Philippe himself—that child of so many vicissitudes—was borne to his grave. Clouds lad lowered on his house Singularly enough he expired in a residence which had been lent him by the husband of his daughter who was so soon to follow him to the world of shadows Thus, through a long funereal catalogue, do we arrive at the subject of this memoir.

LOUISA MARIA THERESA CHARLOTTE ISABELLA, the eldest daughter of Louis Philippe, King of the French, by his consort Maria Amelia [illegible] of Ferdinand I., King of the Two Sicilies, was born at Palermo, the 3rd April, 1812. Her sister, the Princess Mary, the accomplished sculptor, was her junior by just one year. They grew up together in the closest affection, which was only severed by death. The care of their education was entrusted to Madame de Malet, who, under the superintendence of their admirable mother, provided, for the different branches of their instruction, the most distinguished professors of the time. They both derived the utmost profit from these advantages. The talent of the Princess is stamped with lasting fame. The worth of the Princess Louisa, though not so dazzling, was no less solid. In her the worldly wisdom of her father and the Christian perfections of her mother appeared to combine. She was her grandfather's child of Louis Philippe, and he often listened to, and acknowledged the benefit of, her counsels. In 1832 the Princess Louisa became, at the Château de Compegne, on the 9th of August, the bride of Leopold, King of the Belgians, the sovereign of the people's choice, and of their never-varying approval. The continued and sterling popularity of this Monarch is, no doubt, owing, not only to his own upright public conduct, but also to those private virtues in the practice of which his consort and he passed so many happy years. The recent disturbances in Europe afforded obvious proof of this; for, amid the shock of insurrections and revolutions, there were two royal seats against which treason dared not breathe. The thrones of the Queen of England and the Queen of Belgium were based upon that popular affection which suits invariably from the contemplation of domestic virtue, and which is the most powerful of all protection. Queen Victoria and Queen Louisa were dear and intimate friends; they were frequently together, and, when absent from each other, corresponded. It is said that Queen Victoria wrote in French, that she might have the opportunity of addressing her friend with the "*tu*" and "*toi*," and other graceful familiarities of that language. They were both in some measure sharers in the inheritance of the Prince's Charlotte, and both have done much to lighten the deep grief and regrets occasioned by that Princess' untimely death. After a union of fourteen years, so beneficial to the country and his people, the Queen of the Belgians, still young, and the doating mother of a youthful family, has with calm fortitude and resignation received the awful summons to lay down her earthly crown and has departed a kind many princes, and the tears and heartfelt sorrow of a people to whom she was loved so well. Queen Louisa leaves three surviving children, [illegible] LEOPOLD LOUIS PHILIPPE, Prince Royal, Duke of Brabant and heir apparent of the Belgian throne, born the 9th April, 1833; PHILIPPE EUGENE FERDINAND, Count of Flanders, born the 24th March, 1837; and a Princess, CHARLOTTE, born the 7th June, 1840.

The Queen of the Belgians died of phthisis, at Ostend, on the 11th inst. On the night of the 9th her Majesty had a few hours of rest; but at six o'clock next morning a crisis ensued, in consequence of which her Majesty fell into a state of general and fatal prostration. After a short time, however, she rallied, and regained a sufficient strength to converse with her Confessor long enough calmness to the last degree, she retained possession of all her mental faculties, and at two o'clock on the afternoon of the 10th she received the Communion and the Extreme Unction. She met her fate with heroic resignation; and, though a prey to the most excruciating pain, her strength of mind prevailed so far that she could console her deeply-afflicted husband. She had previously taken farewell of all the members of her family, and, just before expiring, she affectionately kissed the hand of her Royal Consort which grasped her own until life was no more.

The body of the deceased Queen was embalmed on Sunday, and at seven o'clock the same evening was removed to the coffin. During the day masses were performed at Ostend for the repose of the soul of the deceased Queen, at which the ex-Queen of the French and the Princes and the Princesses of the House of Orleans were present. As the early mass (nine o'clock in the morning), her late Majesty's children, the Duc de Brabant, the Comte de Flandres, and the Princess Charlotte, accompanied by the Countess of Merode, were also present. The church was entirely covered with black. The King and the Princess of Orleans attended divine service in the English Protestant Chapel, at Ostend, and shortly after eight o'clock in the evening the latter lady left Belgium for London.

On Monday, at twelve o'clock, his Majesty King Leopold, the ex-Queen of the French, and the whole of the members of the two Royal families, arrived at Brussels by special train from Ostend, having left that place shortly after nine o'clock, and immediately proceeded in their carriages to the Palace at Laeken, the people *en route* receiving them with every mark of respect in solemn silence. The troops of the line and the civic and municipal guards and authorities, with the black crape on their arms, their standards in a state of their swords, and musical instruments being enveloped in black, received the body at the railway station in Brussels at four o'clock, on the arrival from Ostend of the melancholy *cortège*, which consisted of four carriages and the funeral car. The whole of the train, including the engine, was covered entirely with black cloth, ornamented with mortuary devices. The car was covered with a black velvet pall, at the head were two silver lions, and at the foot two angels in a supplicating posture. The procession to the chapel of the Palace at Laeken was immediately formed in the following order:—

A detachment of Gendarmes
The Commandant and Etat Ma. or of the troops in Brussels.
A Squadron of Cavalry.
The Officers of the Royal Ordnance
The Clergy
The Funeral Car, attended by the Marshal of the Court, the Adjutant-General as [illegible]
Camp of the King, and the Aides-de-Camp of his Royal Highness the Duc de Brabant in the
horse of the pall covering being carried by the President of the Senate during the last
session, the President of the Chamber of Representatives, the Minister of the Interior, the
Minister of Justice, the Minister of War, and the Burgomaster of the civic guards, in
The Ministers of the Government and the members of the Legislative Chambers at present in
Brussels
The Magistrates and civic authorities of Brussels and other towns in Belgium, with the Etat
Ma. ors of the Civic Guards and troops of the line.
A detachment of the Infantry of the Line.
A squadron of Cavalry.

The procession was closed with eight mourning coaches and an immense concourse of private carriages.

On either side of the funeral car were twelve officers of the civic guard and troops of the line. The procession moved from Brussels to Laeken the roads were lined by spectators, who received the procession with silent respect, almost every head being uncovered as it passed. Upon the arrival of the procession at Laeken, at five o'clock, it was received with military honours by the various detachments of municipal guards and troops of the line, which occupied the approaches to the Church, where also the body of the deceased Queen was met by the members of the Belgian and Orleans Royal Families in grand nave of the Church was exclusively reserved for the persons composing the *cortège*, the civic guard and troops of the line forming themselves in column in the streets. The coffin was canopied by a black velvet pall, surmounted by an imperial crown, with a cross at the head, on the sides, and at the foot, escutcheons and chaplets of flowers

Having been placed in the nave, in front of the altar, a solemn service was performed by the Archbishop, assisted by the Canons of Malines and the Cure of Laeken, at the close of which the King and Princes returned to the Palace. All the diplomatic representatives of the various countries resident at Brussels attended the funeral, with the exception of Lord Howard de Walden, the representative of Great Britain, who expressed to the Ministers his deep regret that severe indisposition, confining him to his room, prevented his attending The guard which is to receive the remains

COUNTRY NEWS.

THE LIVERPOOL PLATE ROBBERIES.

On Tuesday the parties charged with the plate robberies, which we noticed last week, viz. Will am M'Aulay, a watchmaker, of Liverpool; Martin Maguire, a publican, of the same town; and Thomas Charles Sirrell, an extensive gold and silver refiner, of Barbican, London, were brought up on remand at the Central Police Station, Liverpool, before a full bench of county and borough magistrates. Two charges had been previously gone into, the first affecting all whom will, the two former with a robbery of plate from a Roman Catholic Chapel, at Little Crosby, a few miles from Liverpool, and the latter with receiving the same. The second charge affected only Maguire and Sirrel., and related to a quantity of plate which had been stolen from the house of Mr. Tinley, Peel-street in the borough of Liverpool.

Mr. Dowling, head constable of the borough, appeared to conduct the prosecution on the part of the Crown. Mr. Simon, barrister, of Liverpool, watched the case for M'Aulay; and Mr. Lewis, solicitor, of London, attended on behalf of Sirrell.

M'Aulay and Sirrell were first ordered to stand up, when the clerk to the magistrates read over the depositions previously taken in connexion with the Crosby robbery, after which Mr. Dowling called some witnesses, who deposed to further details relating to the same robbery, but they contained nothing new.

A new case against Sirrell only, viz. one of receiving, was also opened, as follows — William Carr said he was servant to the Rev. Mr. Gardner, of West Derby, near Liverpool. On the 17th of July last, at a quarter past one in the day, he placed some silver spoons and other plate on the dinner-table in the dining-room. The bottom part of one of the windows was partially open He left the room for a few minutes, and when he returned he missed two tablespoons and one gravy-spoon. The window was open much wider when he returned into the room.—The Rev. T. Gardner, incumbent of Stanley, in the parish of West Derby, stated, that he was informed by his servant of the robbery. He had since seen one of the spoons in the hands of Kehoe, the detective officer. The spoons were marked with S. H. and a cipher. The one produced was one of the stolen spoons — Kehoe, the detective, said, that he found a spoon in question, on the 2nd instant, amongst the stock in Sirrell's shop. The crest upon this spoon was perfect. The spoon was broken in two. He also saw a great many other broken spoons with and without crests amongst the old silver. Some of the crests were defaced, and others partially filed off. This spoon was the only part of the seized plate as yet found to belong to parties residing in this neighbourhood. The plate only arrived from London on the previous day, and was the whole of the case, and the magistrates decided on committing Sirrell and M'Aulay for trial, refusing bail. The charge against Maguire was not then proceeded with, the robbery in which he is supposed to have been concerned having taken place in the borough, and consequently coming only within the cognizance of the borough magistrates. Maguire was accordingly remanded, to be brought up before Mr. Rushton, the stipendiary magistrate. Sirrell will, also, be again brought up. M'Aulay was the only one finally committed on Tuesday.

THE STOLEN PLATE On Monday, the plate which had been brought to Liverpool by the London officers, being supposed to be the fruit of many robberies in that town and neighbourhood of late, was exhibited at the Central Police-office there, for examination and identification. It covered the whole of a large table and the magistrates' desk, and included every variety of pattern, some of the articles evidently of foreign manufacture. The room was crowded at intervals from ten o'clock in the morning to five in the afternoon. All Liverpool seemed to have been robbed, and there were few who had not lost a spoon. One old gentleman who had been deprived many years ago of his silver snuff-box presented himself, and would fain have identified one in the hands of the officers, but, on opening it, it was found to contain a mixture somewhat more pungent than the would-be claimant was in the habit of taking. The majority of the articles had their initials; and as there were a great variety of these in gold and silver cases, it was found necessary to make a list, with their names and numbers, in order to facilitate identification. There were upwards of 200 sets of works also. The collection of plate included spoons, forks, tankards, fish-knives, ladles, tea-pots, cream jugs, salt-cellars, pepper-castors, snuff-boxes, and other articles too numerous for enumeration. Amongst other things were the following, which may probably be recognised:—A silver tankard, splendidly embossed. A shield on each side of the vessel has been engraved, but an attempt has been made to obliterate the names. As far as it can be made out, the inscription reads thus: "W. G., Liverpool, to G. Darrill, 1847. A small token of respect for faithful and kind services rendered." Also, a half-pint cup, barrel shape, engraved "Sidney Knott, the gift of Captain Amos." A silver mug, with an inscription on the bottom, "Ann Witherston M'Dermid, born July, 1847." Another mug, presented by her godmother, Mrs Elizabeth Forogden, on the day of her christening, the 25th October 1847—A silver tea-caddy, with a crest (a stag's head), and the initials "A.R."—A Medal of the value of silver, engraved "No. 4 Lodge of Odd Fellows, commenced March 6th, 1811;" and on the other side is a Prince of Wales' plume: "Francis Fowler, September 25, 1847." There are also several other ornaments belonging to Odd Fellows. The tankards and spoons included nearly almost every combination of initials, and the crests are numerous. However, a great deal of the silver is old, and such as might have been disposed of on that account by the rightful owners There are comparatively few articles of modern pattern. As yet, nothing has been identified in Liverpool. The article spoken to in London, and which indicate Sirrell, to have been in his possession, was also identified by the proprietor of Polly's chop-house, Fleet-street, engraved upon the handle. The proprietor of Polly's chop-house, The slice is a very weighty one, and has the name of "Dolly" engraved upon the handle. A spoon stolen from the Rainbow Tavern, with "Rainbow Tavern, Fleet-street," engraved along the handle. A spoon stolen from Mr. Meister, 30, Fleet-street, with Meister-street, Soho, engraved on it; and a spoon from the London Coffee-house, Fleet-street, with the name of the house conspicuously engraved.

MAIL ROBBERY.—On Wednesday evening week, the cart which conveys the mail *en route* from Wolverhampton to Birmingham was robbed of one of the mail bags. The bags had been safely delivered to the driver at the arrival of the cart at Birmingham, on taking the bags belonging to Wolverhampton and the intermediate towns into the office, the guard found a charge found that the one he had received at Bilston was missing. It was at once apparent that the missing bag had been cut away from another bag to which it had been strapped. The police were immediately informed of the robbery, but nothing has since been heard of the bag, or the person who stole it, although a reward is offered. The loss is made a very serious one, by the circumstance that something like £3000 in bills, &c., belonging to Jones and Co. and Foster and Baldwin, bankers, of Bilston, formed a portion of the contents of the bag. The losses of other parties make the amount somewhere about £5000 Mr. Tennant, the contractor for the conveyance of the mail, is the contractor for the conveyance of the mail. Notices of the numbers of the notes stolen had been transmitted to every quarter where they are likely to be presented for payment, but no one has as yet offered any one of them

BURGLARY AND EXTENSIVE ROBBERY AT PELSENHALL RECTORY, REDFORDSHIRE. On Monday, information was received by electric telegraph at the order police station, Great Scotland-yard, that at a late hour on Sunday night, and early Monday morning, the rectory at Pelsenhall, Redfordshire, the residence of the Rev. William Maddox, had been broken into, and property valued at upwards of £200 stolen therefrom. On Tuesday further information was received, together with a list of the property stolen, which consisted of a silver ladle, tea-spoons, sugar-tongs, a silver teapot, with a crest on one side; a silver cream-jug, marked with the initial "M." a silver cake dish, marked "W. R. M;" a quantity of silver spoons, of all sizes, marked "W. R. M." and "W. M." also eight silver dessert knives and forks, some of which were plated on the outer stands, a missionary box full of money, and two bottles of wine, with which the thieves regaled themselves.

THE NEW COUNTY LUNATIC ASYLUM, COLNEY HATCH.—This well-conducted and admirably-designed establishment, which has been in the course of erection since the spring of 1849, is so nearly completed as to leave no doubt that in a few days it will be fit for the reception of inmates The grand inauguration will, however, be under good auspices, and be surrounded by the pomp and circumstance of hills, presents a most beautifully picturesque appearance. It is in the Italian style of architecture with stone quoins and dressings, from a design by S. Dankes, Esq., and from its vast extent—being in length 1861 feet 8 inches, and depth 650 feet 6 inches (35 feet longer and 250 feet deeper than the building for the Exhibition of 1851, in Hyde Park); the whole with the grounds occupying 118 acres, surrounded by a substantial wall—it has the semblance of a town; the offices, &c., being sheltered by the numerous campanile towers with which it is adorned. Nearly 1400 men have been constantly engaged on the building, and it is rendered perfectly fire-proof. The total number of rooms, including the chapel, infirmaries, and other offices, are 1000, and of wards 1087. The corridors and other portions are paved with Orsi and Armani's patent metallic lava; the centre colonnade with the same material, ornamented like encaustic pavement; and in some places, to relieve the monotony usually produced by the ordinary brown asphalte, a pure white kind has been introduced The roofing of the terraces and flats is also covered with the metallic lava, which is perfectly impervious to moisture For the supply of water an Artesian well has been sunk to the depth of 350 feet, and arrangements are making for manufacturing gas on the premises for the supply of the building and the neighbouring railway. The builder is Mr. Nowell, who is also the erecting surveyor of Lincoln and Ely Cathedrals in Essex. "Among the principal apartments may be mentioned an elegant corridor, thirty feet by twenty, which, like the Hôtel de Ville in Paris, the palaces of the Queen of Spain, Versailles, &c., has the walls covered with modern Venetian stucco, manufactured by Orsi and Armani, coloured and most beautifully polished, to represent Carrara marble borders, panels, and the ceiling divided into compartments, which will present a chaste and elegant appearance. The largest room, 112 feet long and 36 feet 6 inches in width, is fitted with an orchestra, and is to be appropriated for balls, concerts, and other amusements for the unfortunate inmates, and will bear the name of the entertainment-room." Mr. Roteh, Esq., chairman of the committee, and several county magistrates have paid frequent visits to the works, and expressed unqualified approval of the mode in which they have been conducted.

A HAPPY BOROUGH.—At Sunderland, Mr. Matthews, the revising barrister, found neither objections nor claims made by either of the political parties.

SUSSEX AND SURREY POLICE.—THE FRIMLEY MURDER.

At the Quarter Sessions for the eastern division of Sussex, held at the Court-House, Lewes, on Monday, the Right Hon. the Earl of Chichester in the chair: Earl Waldegrave, Sir H. Shiffner, Bart., &c., being present; the report of the chief constable (Captain Mackay), in which the following statement appeared, was taken into consideration, with a view to increase the local police force:—

During the past year several burglaries have been committed in this county and, although many of the offenders were ultimately apprehended by the police, convictions and transported yet, owing to the wide districts assigned to each constable, they were frequently on their depredations for a long period with success. Some of the burglaries took place in the neighbourhood of Hailsham, which has been the scene of another grave crime, the murder of a man (the Rev Mr. Yuill's, Arlington), who was treated with violence, and considerable property carried off; and though in this case the same tragic result did not take place at Burwash the offenders been resisted, there is reason to apprehend that murder might have ensued. There is an inspector stationed at Hailsham, and the nearest constables to him are stationed at Heathfield, Uckfield, Ringmer, Westham, Eastbourne, and Alfriston, distant 7, 11, 10, 6, and 8 miles respectively.

Memorials from eight boards of guardians—two-thirds of the whole were presented against any increase. Several of these were agreed to, however, some time back

Colonel Elwood moved that ten additional constables be employed. Their chief officer's returns showed that since 1845 felonies had nearly doubled in East Sussex. In his own immediate neighbourhood two burglars had been rescued from the police under circumstances of great violence. If ten men were not sufficient, they might take further steps, but he would move that that number be added at once to the force

The noble chairman concurred in Colonel Rowan's opinion, that a rural police was rather for the purpose of preventing offences than to prevent it by their actual presence in every village. The latter course, indeed, the expense rendered impracticable.

Earl Waldegrave said, the additional men would only involve a county rate of 1d. in the pound. He quite felt that no person who lived at a distance from a village could be secure at the present moment.

The motion was carried unanimously.

At the General Quarter Sessions for the county of Surrey, held on Tuesday at Kingston, the want of a proper protection for life and property in some portions of the county formed the subject of considerable discussion by a very full bench of magistrates, amongst whom were Mr. E. Penrhyn (as chairman), Lord Lovaine, Lord Vaux; Mr. Alcock, M.P.; Mr Evelyn, M.P.; Mr. Freshfield, the High Sheriff, &c. Mr. Austin moved that a committee be appointed to consider and report upon a plan for the adoption of a rural police force in that portion of the county of Surrey which lies beyond the radius of the metropolitan police, in order that there might be some better protection for life and property in those districts than was presently afforded from recent occurrences they were fully aware of. (Hear, hear.) It would be difficult to describe the state of fear and alarm that prevailed in the county in consequence of the dreadful event that had recently taken place at Frimley, and to which he would not further allude, agree with him that it was absolutely necessary for some steps to be taken to remedy the existing evils. After some discussion, the committee, consisting of the Lord-Lieutenant, the members of the county, the chairman of the different quarter sessions, and other magistrates, was at once appointed, with instructions to make their report at the next Epiphany session.

EXTRAORDINARY ATTEMPT TO ROB AND MURDER BY MEANS OF CHLOROFORM.—An attempt was made on Sunday night, by a man who had secreted himself under a bed, in Shaw's Temperance Hotel, Kendal, to rob and murder a gentleman lodging in the house by the name of Holford. According to the evidence given before the magistrates on Monday, it appears that the Rev. Lachlan M'Intosh, a gentleman who had been preaching at the Presbyterian Chapel in behalf of the Irish Home Missionary Society for Scotland, is taken up his quarters on Sunday night at Shaw's Temperance Hotel. Mr. M'Intosh, who had retired to bed about nine o'clock, was awoke about twelve by a fellow attempting to suffocate him by means of a rag steeped in chloroform Mr. M'Intosh, who is an elderly man, struggled desperately with his assailant; but, either from the fumes of the chloroform or the terrible disadvantage at which he was been by his midnight assailant, he felt himself fast failing, when his cries of "Help! murder!" roused the house. Mr. Shaw, master of the hotel, made his way into the room, the intended victim was almost powerless, and the assassin, or robber, was lying upon the bedding, which had fallen from the floor in the scuffle, apparently sound asleep (or being cunningly feigned, the latter professed that he had long been a sleep walker, and appeared to be astonished to find himself where he was. A policeman was, however, sent for, and the pretended somnambule was taken into custody. It was then a strong smell of chloroform was perceived by the parties who entered the room upon the alarm being given, and the next morning a bottle containing chloroform was found under Mr M'Intosh's bed, and also the carpet-bag of the prisoner, who had been at the Temperance Hotel since Saturday evening. The reverend gentleman's face bore strong marks of the desperate opportunity of his nocturnal assailant, and, upon the landlord and landlady entering the room his night dress was found to be covered with blood. There had been no key in the lock of his room, and he had placed a chair between the door and his bed previously to retiring to rest. This chair the people who entered the room on the alarm being given found to be thrown on one side. It was very probability is the ruffian had secreted himself under the bed. The prisoner had retired to bed about half-an-hour before Mr M'Intosh In the course of Sunday evening he had taken occasion to ask the people of the house if he was a sleep-walker, and on one occasion he said he had walked four miles in his sleep To the policeman who took him into custody he said he was a traveller, but refused to say for what purpose or in what business he was engaged. He attended the Methodist chapel twice on the day the attempt was made, and had also been once at church. On being asked what he was doing in the room of Mr. M'Intosh, he declared he had been a member of a Methodist church in Ireland, that he was a sleep-walker, and knew nothing of any evil intention. He was fully committed for trial The prisoner is a young man of pallid features and a forbidding expression of countenance.

BURGLARY AND DESPERATE ATTEMPT AT MURDER.—At Birmingham, on Saturday last, Christopher Heely, William Wallace, George Green, Henry Jones, and Henry Thompson, supposed to belong to a gang of London thieves, were brought before the magistrates, charged with breaking into the premises of, and attempting to murder, Mr. Thomas Marston, gold and silver dealer, of Great Hampton-street, in that town. The circumstances attending this audacious outrage were nearly attended with the most fatal result recently recurred at Frimley. About four o'clock on the previous Monday morning, Mr. Marston was roused from his sleep by a strange noise in the house, which induced him to get up and go below, and on entering the parlour he saw three men in the act of emptying the sideboard of the plate, &c., and a large heap of spoil was lying on the floor. He instantly attempted to run back to get his pistols, but the burglars made an attack on him with heavy bludgeons before he had ascended many stairs Mr. Marston turned upon the villains, and with a wooden rail he tore from the bannisters he defended himself for some time, when he was at length attacked with an iron poker. Numerous blows were inflicted over his head and legs until the blood gushed forth, and he fell insensible on the stairs, but even then they kicked and struck him over the forehead. Thinking they had deprived him of life, and hearing other persons moving up stairs, they made their escape by the same way they had entered namely, through the ceiling of Mr. Marston's warehouse. One of Mr. Marston's daughters called loudly for the police to render assistance, but from some cause or another they refused to break into the premises to assist the unfortunate gentleman. Ultimately the door was opened from the inside, when the officers were inflicted over the head and legs until the blood gushed forth, and he fell insensible on the stairs, but even then they kicked and struck him over the forehead. Thinking they had deprived him of life, and hearing other persons moving up stairs, they made their escape by the same way they had entered namely, through the ceiling of Mr. Marston's warehouse. One of Mr. Marston's daughters called loudly for the police to render assistance, but from some cause or another they refused to break into the premises to assist the unfortunate gentleman. Ultimately the door was opened from the inside, when the officers found that the thick wall intervened, another part of the ceiling was cut away, and a hole large enough to admit one man at a time was made. The burglars' possession of a hat which had been dropped by one of the burglars, as well as the poker, which was much bent, and covered with hair and blood. Having a description of the guilty parties, he placed a number of officers in plain clothes on the day in a lodging-house in Carey's-court, Moor-street, and before night the five prisoners were apprehended. They are well known to the local police as having lately come from London, and taken up their abode in Birmingham. The prisoners were remanded

THE GRAND BANQUET AT YORK.—The following noblemen and gentlemen have received invitations to the grand banquet to be given at York on the 30th inst., by the Lord Mayor of that city to the Lord Mayor of London in return for the grand banquet at which his Lordship entertained, in March last, his Royal Highness Prince Albert and the mayors and chief municipal officers of the kingdom, in the numerous campanile towers with which it is adorned. Nearly 1400 men have been constantly engaged on the building, and it is rendered perfectly fire-proof. The total number of rooms, including the chapel, infirmaries, and other offices, are 1000, and of wards 1087. The corridors and other portions are paved with Orsi and Armani's patent metallic lava; the centre colonnade with the same material, ornamented like encaustic pavement; and in some places, to relieve the monotony usually produced by the ordinary brown asphalte, a pure white kind has been introduced The roofing of the terraces and flats is also covered with the metallic lava, which is perfectly impervious to moisture For the supply of water an Artesian well has been sunk to the depth of 350 feet, and arrangements are making for manufacturing gas on the premises for the supply of the building and the neighbouring railway. The builder is Mr. Nowell, who is also the erecting surveyor of Lincoln and Ely Cathedrals in Essex. "Among the principal apartments may be mentioned an elegant corridor, thirty feet by twenty, which, like the Hôtel de Ville in Paris, the palaces of the Queen of Spain, Versailles, &c., has the walls covered with modern Venetian stucco, manufactured by Orsi and Armani, coloured and most beautifully polished, to represent Carrara marble borders, panels, and the ceiling divided into compartments, which will present a chaste and elegant appearance. The largest room, 112 feet long and 36 feet 6 inches in width, is fitted with an orchestra, and is to be appropriated for balls, concerts, and other amusements for the unfortunate inmates, and will bear the name of the entertainment-room." Mr. Roteh, Esq., chairman of the committee, and several county magistrates have paid frequent visits to the works, and expressed unqualified approval of the mode in which they have been conducted.

A HAPPY BOROUGH.—At Sunderland, Mr. Matthews, the revising barrister, found neither objections nor claims made by either of the political parties.

BURGLARY.—A ROBBER SHOT.

On Monday, at two o'clock, William Dyson was placed at the bar of Marlebone Police office, before Mr. Broughton, on the charge stated in the following evidence.

James Paul said, I am butler to Mr. Holford, residing in a mansion close to the regent's Park, who is now in America. Between ten and eleven last night, I saw everything safe; and at twenty minutes to two this morning, I was awoke from my sleep by a noise proceeding from the banqueting-room. I sprang out of bed and looked out of window, and saw the shadow of a man on the lawn I saw the window open. I felt satisfied that there was something wrong, and I went to my master's room, and called up two servants. I descended to the banqueting-room floor, and saw a glaring light, and I went to the stable and aroused the coachman, to one of whom I gave a loaded gun, and the other took up a pitchfork. I sent them to the south side of the house, I sent three men on another direction, a double-barrelled pistol, loaded, with a bayonet attached. The groom and footman had also been called out, and one of them was armed with a drawn sword. They and I took up our station at the north front of the mansion. Presently I heard the report of a gun, and on stepping to the spot I saw a man running from the window of the banqueting room. I followed him, and snapped one of the locks of my pistol, but it missed fire. I directly afterwards heard a shot fired at him, at which period he had himself behind a bush, having previously ejaculated, "For God's sake, don't shoot me." I left the spot to assist my fellow-servants, who were crying out lustily; and I heard that other man who had been in the banqueting-room had made their escape, and I found that the prisoner was secured by one of the coachmen, who was holding him securely down. I called "Police," when, in addition to the other servants, the gardener came; but we did not then find either of the other parties by whom the mansion had been entered.

In answer to Mr. Broughton, as to what had become of the man who was shot at in the house, witness explained an opinion that he thought he must be dead from the charge of shot which he had received.

George Bennet (the head coachman): On being called up, I armed myself with a pitchfork, and went to the park-side of the house, with one of my fellow-servants. I saw three men coming out of the banqueting-room facing the park. I heard the firing of a gun, and, seeing a man run, I followed, and on overtaking him I knocked him down by a blow with my pitchfork.

Mr. Broughton: Can you recognise the prisoner?—Witness: Yes; he is the man whom I knocked down, as I have stated.

Mr. Broughton: After you had knocked the prisoner down with the pitchfork, as you have stated, did he say anything?—Witness: He cried out, "Oh, God, I'm dead!"

John Hall (the under coachman): Mr. Paul, the butler, gave to me a loaded gun, telling me that there was a man in the house. I saw three men coming out of the dining-room window, and I fired. I heard one cry out "Oh, God!" I saw the coachman knock down the prisoner, who said he was killed, and begged for mercy. He was bleeding from the head, and for several minutes I held him.

Collins, 11 S, said: Hearing the report of fire-arms, and the cry of police, I went to the premises of Mr. Holford, and saw the prisoner lying down, two persons having hold of him. He was bleeding profusely. I left him in charge with Paul, the butler, proceeded in quest of the other parties, who had effected an entry into the premises. We examined the bush at which the butler fired, but saw no one there. I, however, found a hat in the bush, and made an arrangement at a public-house at Battle-bridge to meet at the house of Mr. Holford at a certain time, and that each was to take a separate road. Witness had traced blood over some distance, over which the man that was shot must either have carried or been carried by his companions.

Mr. Broughton: When you saw the traces of blood, as you have stated, how far was it from Mr. Holford's premises?—Witness: About 150 yards from the outer gate of the park.

Some pieces of candle and a crowbar, which had been picked up close to where the prisoner was found, were produced, as was also part of an omnibus ornament of considerable value; it had been broken off a figure under a plateau in the lanquetting apartment.

Drage, 3 D, produced a hat, in which were some seven or eight holes through which the shot had passed. It was the hat found in the bush on a direct line from the park, but outside the premises, very near to the bush at which the butler fired. There was blood inside the hat

Young, 15, produced a sling which he picked up at a short distance from where the prisoner was taken. The sling was formed by a large stone being placed at the bottom of a handkerchief, the ends of which, being tied in a knot, formed the sling. It would make three quarters a circle.

Lockey, 180 S, had examined the mansion, and found that one of the windows leading to the banqueting-room had been forced open. On the sill of the window was blood, made by a bloody hand, such a one as must have been forward. Observed blood on the window. At the spot where the butler fired at the man there were marks of blood, and there was a quantity of blood leading to the railings. In a shed in the Zoological Gardens witness had found, in the grass paddock, upon some sacking, marks of blood as if a man had crawled in.

Mr. Broughton (to the prisoner): Do you wish to say anything?—Prisoner: No, only this—I made no resistance. I was knocked down with a pitchfork, and a man, who came by, gave me a gun, struck me with it more than once. I was almost senseless; and I recollect that a man stood over me with a sword, and swore he would run it through me

Additional remarks were made by parties interested in the case; and the general impression was, that the man shot by Paul, the butler, had been carried off by his companions, and thrown by them into the Regent's Canal.

Mr. Broughton, after having commented upon the many disturbances recently committed, advised Paul to offer a reward for the apprehension of the other parties concerned in the daring entry of Mr. Holford's premises. He had better communicate at once with his (Mr. Holford's) agent.

The prisoner was remanded till Monday next.

THE FRIMLEY MURDER—CONFESSION OF ONE OF THE MURDERERS.

On Saturday last, the prisoners charged with the recent murder and robbery at Frimley-grove Rectory, viz Levi Harwood, James Burbage (calling himself James Jones), Hiram Trower (calling himself Hiram Smith), and Samuel Harwood, were brought up before the Surrey magistrates at a secret sitting at Guildford, with a view to completing the evidence against them, but the only tangible point of consequence established, connecting them with the commission of the murder, was the identification by Mrs Holest of a peculiar old George the Third penny token, which she had had in her possession previously to the robbery, and which was subsequently found on one of the burglars. It is described as a remarkable-looking coin, which, besides its peculiarity of design, bears marks which might easily insure its identification by any person who had once examined it with any degree of attention; on the obverse is a profile of George III., encircled with a wreath, and on the reverse a figure of Britannia, surrounded by the words "One penny token," the word penny being contracted. It appeared that this token formed on a recent occasion the weekly payment of one of the little school girls to a provident fund for purchasing clothes, deposited in Frimley by Mrs. Holest. The token was paid to Miss Dalpin, the schoolmistress, by a little girl, and handed over a few hours subsequently to Mrs. Holest, with the remark that it was a very old-looking penny, and that it would rather suit the fancy of a collector. Mrs. Holest, however, expressed her belief that it would, and, showing it to Mr. Holest, remarked that "had not" paid much respect to poor King George's nose," that feature being much battered on the coin. Mrs Holest then put the token with other copper coin into a purse, in which she usually kept the "clothes fund," and there it remained up to the night of the murder.

All testimony of a conjectural or circumstantial character, however, has been rendered almost unnecessary by the confession of one of the guilty parties. On Monday afternoon Hiram Trower, *alias* Hiram Trowler, one of the four men in custody, having expressed a desire to see Mr. W. Keene, the Governor of Guildford Gaol, the latter went to him in his cell, and the prisoner made a statement, which was taken down in writing, of all the circumstances connected with the dreadful affair, stating that the burglary was planned by himself and the other three men in custody, and that the fatal shot was fired by Levi Harwood; that, after the murder, they all came to Kingston together, and Harwood went to London to dispose of the stolen property; and, when he came back, he gave him £5. as his share. The prisoner corroborated minutely into the details of the outrage, but stated that the party was only intended to terrify the inmates of the house into submission, and that there was no intention originally to commit any violence. It appears, although the facts that have since been set on foot for the statement of the accomplice can be confirmed, in many material points, by independent testimony; and, if this should be correct, the case will be quite complete. The prisoners are to undergo another examination.

MUNIFICENT CHARITABLE BEQUESTS.—The will of William John Frodsham, Esq., late of Stoke Newington, and formerly of Change-alley, chronometer-maker, who died last June, has just been sworn to, and his property proved under £140,000, amongst the legacies are the following charitable bequests:—To the Worshipful Company of Clockmakers, £1000; to the Charity School of Langbourne Ward, London, £250; to the Infant Orphan School, Wanstead, Essex, £250; to the British Orphan School, £250; to the London Orphan Asylum, £250; to St. Ann's Society, Dalston, £250; to the Shipwrecked Mariners' Society, £250; to the Seamen's Hospital Society, £250; to the Royal Free Hospital, £200; to the Lock Hospital, £200; to the Lying-in Hospital, £200; to the Lower Hospital, £200; to King's College Hospital, £200; and to the Benevolent Institution for the Relief of Aged Necessitous Workmen of good character in the several branches of the watch-making trade, £250.

DIVISIONS OF THE HOUSE OF COMMONS.—Mr. Brotherton's return of the divisions of the House of Commons in the late session has been issued There were 329 divisions of the House, of which number there were on public matters 242 before midnight and 73 after midnight, whilst on private business there were (all before midnight) 14 divisions, making the total

COINCIDENCE.—It is a somewhat remarkable coincidence that within a fortnight three sons of the nobility, two of whom are peers of the realm, fell into the water, and narrowly escaped drowning—viz. the Marquis of Hastings at Liverpool, the Earl of Mount Edgecumbe at Plymouth, and Viscount Fielding at Oban

SAN FRANCISCO.—GENERAL VIEW.

CALIFORNIA.

SAN FRANCISCO AND SACRAMENTO.

The existence of California has, at length, become a "great fact" the day. For nearly two years Europe was stupified with the strange exaggerations and contradictory tales which were received from this unknown and mysterious Dorado, but which she feared to believe. The doubt is, however, now solved; she has seen, she has touched, and even used the gold from the productive mines, the existence of which, not long since, she altogether discarded. The gold-seekers have quitted her shores in poverty, and returned laden with wealth, and accounts of its discovery, the veracity of which is incontestible, have been published in various languages. The most incredulous sceptics are at last convinced; several of the localities have been Daguerréotyped; and rom a set of these views taken in the first month of the present year at San Francisco and Sacramento City, we have selected the originals of the accompanying Illustrations. To refuse the evidence of the Daguerréotype is to deny the existence of the "prime-cheerer" light, and the Sun and his works. To relate the true history of California is not, however, so easy a matter as to picture its realities: everything is yet in a state of transition, to say nothing of the conflagrations which destroy in a day towns rebuilt in weeks, again to fall a prey to the flames; for no sooner have we heard of one "destructive fire" than intelligence is received of another.

There are at present two leading routes from Europe to California. The longest and least expensive, that of Cape Horn, requires six months, or somewhat less. The shortest and most expensive route is that by the Isthmus of Panama, which occupies but two months. Or, the emigrant may proceed directly to New York, and there secure a berth in an American steamer for the Pacific; but, without this precaution, he will be at the risk of detention for months at Panama. (*See page* 271.) We have not space for further details of this class; but imagine ourselves to have arrived, through various perils, privations, and sufferances, but without serious accident, within sight of this California, the object of so many hopes and illusions.

We need not, however, repeat, that a channel five miles long, bearing the pompous name of the Golden Gate, forms the entrance to the Bay of San Francisco; but it is of difficult navigation, on account of the winds, and fogs, and adverse currents, as well as from the rocks with which it is beset. It is proposed to build here two forts, so as to command the mouth of the channel. The depth of water is sufficient to float a large navy. At its extremity is San Francisco, the capital of Upper California, facing, not a harbour or a lake, but a "Mediterranean" in miniature: the Bay of San Francisco, according to a French authority, will easily contain all the fleets of the world. Its northern extremity communicates with another bay, that of San Pablo, which, in its

BLAY-PLACE, SAN FRANCISCO.

POLITICAL MEETING AT SAN FRANCISCO.

turn, leads to the Strait of Carquinas, upon the banks of which rises Benicia, the rival of San Francisco, on a third and last bay, that of Suisun, or Shisum. The latter joins the rivers of Sacramento and San Joachim—the first of which rises in the north, and the second in the south of Upper California. By several persons these three bays are called the Bay of San Francisco, which is a kind of inland sea, twenty-three leagues in length.

On the 18th of September last, when M. A. Haussman anchored in this bay, there were between three and four hundred ships moored here, presenting a forest of masts, from which floated the flags of every country of the globe. Here lay the Chinese junk, with its streaked pennant and its fantastic form, next the three-masted American liner, with its stars and stripes. But the silence which reigned on board these ships made them one vast solitude: they seemed like so many bodies without souls. An epidemic more redoubtable than cholera appeared to rage over these enormous floating masses, and a power stronger than ship's discipline ruled their sailors. The mineral yellow-fever, say the Americans, has struck all the world; the irresistible love of Sacramento gold has attracted a host of frail structures, and a vast centure of tents. The town is built upon a hill, the houses reaching nearly to its summit: here are immense encampments in the environs, and the tent is here the advanced guard in the great work of civilisation, marking the future progress of the city, outstripping the carpenter and the mason, and indicating the best points for their first steps and earliest efforts. You land without difficulty upon a temporary pier, at the foot of the old Spanish fort. There is no custom-house officer to search your pockets, or, sword in hand, to examine your luggage.

But two years since, says the same authority, San Francisco was a hamlet of rude cabins: to-day it is a large town, a camp, or rather a caravansera, of from 50,000 to 100,000 souls. The number of its population, however, varies incessantly. M. Patrick Dillon, ex-Consul of France at the Sandwich Islands, and now Consul at San Francisco, estimates at 2000 per day the number of emigrants who arrive by sea at California; and there is a continued movement towards the mines from all sides, landward. In winter, hordes of miners are driven by heavy rain and snows to seek refuge in San Francisco; and, returning in the summer they add to the fresh arrivals.

The streets of San Francisco, parallel with the Bay, are very wide, straight, and level; but some of the streets are so steep as to render the passage of carriages impossible. The Californian sewer has to be made; the streets are just as if formed by chance, the shovel and broom are rarely used, and all kinds of filth is left to accumulate in the streets. In summer the stench is intolerable: in winter, when heavy rains fall, the streets resemble swamps, in which the foot passengers and the mules sink deeply at each step; and it is even said that persons have been lost in such quagmires before any assistance could be rendered them. The climate is, perhaps, the most capricious in the world: from nine in the morning until noon, the heat is overwhelming; from noon till seven o'clock, an intolerable wind raises thick hurricanes of dust; heavy fogs come with evening; and intense cold is the close

SACRAMENTO.—GENERAL VIEW

SCENE OF THE ACCIDENT TO THE "PACIFIC" STEAM-SHIP, ON LEAVING NEW YORK.

of the varied cycle. Thus, we have in the same day the climates of Algiers and Avignon, of London and of Stockholm. The water is thick and unwholesome, and it occasions internal complaints to those who imprudently drink it unmixed. Hence, medical men are in constant practice; and most of them demand a fee of from half an ounce to an ounce of gold.

The houses are sometimes built of stone, but more frequently of wood from the basement to the roof; and many of them consist of only a ground-floor. Bedsteads are rare, and beds still rarer. The hotels are much frequented, though we read of a dining-room in one of them resembling a cellar—doors that cannot be shut, and the cold rushing in at numberless crannies.

The principal streets of San Francisco are San Pacifico-street, at one entrance to which is situated the Golden Ball Hotel; and the great street leading to the square, where is erected a lofty gibbet, which has already been used!

The two smaller Views will, however, convey a better idea of the interior of the town of San Francisco than would a column of description. One of these shows Blay-place, with its shops and stores; the other, an open-air political meeting in favour of annexation to the United States—the stripes and stars floating over the hustings. The large lower view shows the town of Sacramento, now in course of construction.

The *Times* of the 30th ult. contained two letters, very fully entitled the "Dark side of California." The writer of the first, dated San Francisco, July 31, says:—"Some few have made much money at the mines, but I know many who have lost hundreds of dollars by going there. The hardships there are very great, and the risk of life and property more so. Lately twenty-seven people have been murdered at the Stockton mines by the Mexicans and Sonorians. The country here, at present, may be considered healthy, generally speaking. It is generally believed that next year the diggings will greatly fall off in their produce of gold, as nearly the whole of the gold-digging country is now taken up by upwards of 100,000 diggers, who will find all that is to be found before November next, which is the commencement of the wet season. This place lately has increased greatly in size; in fact, a great part of the town is built on the water upon piles. For six hours in the day the sand blows about to that degree that you could not observe a friend across the street; it is far worse than driving to Ascot or Epsom to the races on a very dusty day, just behind a lot of omnibuses. Nearly the whole city of San Francisco is built upon loose sand. It is not the diggings of gold that has made this place, but it has been made by the ruin of thousands of British, French, United States, &c., merchants, who have sent their goods here never to be accounted for. Whenever a fire takes place hundreds take advantage of it, and close consignments in consequence, whether they are burnt out or not. Those days are now drawing to an end, and, unless gold dust is sent home in sufficient quantities to pay the exporter, which cannot be the case if the digging fails, San Francisco will fall more rapidly than it has risen, as there is nothing in the country to export in any quantity, but there is little doubt that the country around, more especially Oregon, will be a fine field for agriculture. Those diggers who have been fortunate enough in collecting their pile, as it is termed, seldom winter here, but clear out immediately from the country. Many of the merchants here live expensively; but, in reality, upon other people's property. Meat is from 6d. to 1s. per lb.; flour, £22 per ton; potatoes, 1½d. per lb.—they have been since I have been (two months ago) 1s. per lb.; and onions have been 5s. 6d. per lb., and now 1s. 3d. to 1s. 9d.; fish not numerous, but about double the value of meat. Labour, five dollars a day, but rather scarce on account of the immense daily arrivals of emigrants, they not being able to go to the mines on account of the enormous tax of twenty dollars a month. Board and lodging is from 50s. to 80s. a week. House-rent from 500 dollars to 8000 dollars a month, according to the house and situation. Gambling is carried on to an enormous extent, but latterly, I am happy to say, it has been discontinued on Sundays, which was the grand day of days in the week. This place has been partly burnt down three times, but been on fire several times. I saw parties actually building the same day of the fire on the same ground that their houses stood upon, before the hot embers were cleared of the ground. I never saw such go-ahead people in my life. This city may fairly be called hell upon earth. The worst characters from all parts of the globe are here, and all the known vices are carried out to the greatest extent. You may with truth write against people coming here from Old England. Great distress and disturbances are anticipated here in the wet season, when the miners come down from the mines; a day's work may be done then for a loaf of bread, and perhaps less. They have just commenced to pave the streets here with 3-inch planks all over. The mud last winter was in some of the streets six feet deep. The city is about 500,000 dollars in debt, and no one will lend them any money, so that many intended improvements are only half finished. Colonial people are looked very closely after, especially those from Sidney. Ships are not so numerous as they were. A large number have gone to New South Wales for coals. There are about sixty steamers belonging to this place and the rivers inside the heads of this harbour.

"The quickest news from England has been fifty-one days, which was up to June 5. Money bears an interest of ten per cent. per month on good security; six weeks ago it was fifteen per cent. Nothing is much done without money; those who have money are making large fortunes."

The writer of the second letter, writing from Ring Gold, El Dorado county, Aug. 1, says:—"I have tried the mines in all parts of California, but as I was never used to hard work I must give it up, perfectly satisfied that I cannot make money in the mines. I worked five weeks steadily in a creek, and averaged five dollars of dust per day, the highest ever I made at mining was 10 dollars in one day, working six hours per day three hours after sunrise, and three hours before sunset. Up to the beginning of July, with heavy expenses in knocking about, I may say I made nothing over my expenses; however, during the last month, I have cleared above 200 dollars—that is, £40 English money—and upon this small capital I intend speculating in various things, and make all the money I ever shall get in California in that manner. I have raised the 200 dollars by painting signs. I am a first-rate painter for California, and by easy work can make 25 dollars per day, that is £5 English. Our log house is situated a mile above Ring Gold, in Pleasant Valley, in the woods, just at the foot of the Sierra Nevada mountains, and the first house which the overland emigrant comes to on the Pacific side of the eternal snow-covered mountains. It would grieve you to the heart to see the poor starved emigrants arriving across those mountains from the States, thousands of them every day; their sufferings through hunger are indescribable. Now, however, stores of provisions are sent out across the mountains to meet the starving emigrants, and their sufferings are alleviated. I thought I suffered coming round the Horn, but that was a pleasure trip to what the overland emigrants endure, and will endure, until October, when the mountains will again be impassable. thousands of them must die, and those who do arrive in this unhealthy country are unfit for work until they rest awhile. Many who have the means go right back home again by sea.

"I have dug in some hundreds of places throughout the gold regions—in ravines, creeks, and on the banks of rivers, and occasionally in the sides of mountains, and I never washed a pan of dirt without finding in it some specks of gold dust, more or less; but the difficulty is to get more than will pay expenses in such an expensive place. Some make fortunes in a short time, but these 'some' are few; hundreds of others barely pay their expenses. Some sort of machinery must be invented to work the gold dust wholesale. Now, so long as gold is found, this country will flourish—which may be for ages, as the gold seems to be inexhaustible.

"There is no pleasure in this country. In our house we have mice, rats, snakes, lizards, centipedes, scorpions, toads and frogs, and insects of all sorts, from musquitos to flying beetles and poisonous spiders. I sleep with my pistols (loaded) under my head and rifle by my side; sometimes they are necessary. I live in the midst of Indians

"Before the overland emigration came in this year there was only one woman amongst a population of 3000 about Ring Gold. She made me a present of a handsome paint-box, for making her a drawing of the town."

ACCIDENT TO THE "PACIFIC" STEAM-SHIP.

The United States mail-steamer *Pacific*, arrived in the Mersey on Thursday, the 10th instant, at 20 minutes before 12 o'clock, having left New York at half-past ten o'clock on the morning of Sunday, the 29th ult., being a day after the time she was advertised to sail. The delay was caused by the *Pacific* coming in contact with a large shed erected on the quay, when leaving New York; and the result was that the shed was carried away, and one man killed, and fourteen or fifteen severely injured. The *Pacific* sustained some slight damage to her paddles by the collision. It will be seen by this that this splendid vessel has performed the voyage in ten days and twenty hours, notwithstanding that the passage was an extremely rough one throughout. She brought 85 passengers, a large consignment of flour, and £44,000 in specie.

We find in a New York paper, dated September 23, the following statement as to the speed of the *Pacific*:—"The *Pacific* made the passage from wharf to wharf in ten days and four and three-quarter hours. This beats the greatest passage of the *Asia*—the quickest ever made by a Cunard steamer—by thirteen hours, after making the proper allowance for the detention of the latter at Halifax. It also surpasses relatively the quickest trip made by the Cunarders between Liverpool and Boston."

Terrible Calamity.—The *Reichs Zeitung* (Austrian paper) gives a terrible picture of a recent catastrophe at the place of pilgrimage called Herrgott, on the Wels, near Purgstal, in Austria. At one of the public-houses the pilgrims (of whom 3000 were assembled at Herrgott), spent the night in eating and drinking. While baking the fish the oven took fire. Behind the inn were a number of stables and barns, in which hundreds of the pilgrims were reposing and almost all perished in the flames, which rose so rapidly through the thatched roofs, fanned by a strong wind, that there was no possibility of raising ladders to attempt to rescue a single person. Many threw themselves from the lofts, and with broken limbs, half consumed with fire, reached hither and thither with the most piteous cries Not a single engine was in the place, and we are assured by an eye witness, that the fearful calamity at Leopoldstadt, in October, 1848, fades into nothing by the side of this fearful calamity. Scarcely half the pilgrims were saved, and those who have survived have for the most part been much injured. The bodies of the dead were found burnt to a cinder.

Consignment of Fallow-Deer to Louis Napoleon.—On Wednesday week, Mr. Herring, of the New-road, Regent's-park, animal dealer to her Majesty, received orders from Prince Louis Napoleon for fifty English fallow-deer, for the park of St. Cloud. Mr. Herring, accordingly, obtained fifty fine animals from — Fuller, Esq., M.P., of Rose-hill Park, near Hastings, and proceeded with them directly to Paris, where Mr. Herring arrived on Friday morning, just as the President was about to proceed to the grand review of the troops. The deer were much praised by the President and his generals, and, by orders received from the former, Mr. Herring took them to St. Cloud, where they were liberated in the park, among a number purchased by the Prince last year.

The Hon. Edward Bligh, brother of the Earl of Darnley, is appointed unpaid Attaché to the British Embassy at Hanover; and Charles Mann, Esq., is appointed Crown Solicitor in South Australia.

THE SCHLESWIG-HOLSTEIN WAR.

The accompanying scene represents a spirited incident in the late attack upon Friederichstadt, and at the same time gives a glimpse of the country. The circumstances were briefly these:—Two of a Holstein patrol advanced too far, and had no way of getting back but by making a dash past a detachment of Danes, who fired at them as they galloped close in front of them; but, as the soldier's proverb goes, "there's more room to miss than to hit," and the patrol escaped unhurt. The chances were, however, eight to two.

The following mishap is related in the *Times* letter of Tuesday:—"A Danish patrol has made prisoner, in the neighbourhood of Kropp, an unfortunate painter, who was wandering about, sketch-book in hand, in hope of stumbling somewhere on a battle that he might transfer to canvas He describes himself as coming from the little state of Reuss. He is in a very awkward position, as all persons found within the debatable ground between the two lines, provided with the means of drawing and sketching, are liable to be treated as spies of the most dangerous class. He was sent forthwith to Flensburg."

SURPRISE OF HOLSTEIN PATROL.

CALENDAR FOR THE WEEK.

SUNDAY, October 20.—Twenty-first Sunday after Trinity.
MONDAY, 21.—Nelson fell at Trafalgar, 1805.
TUESDAY, 22.—296th day of the year.
WEDNESDAY, 23.—Twilight ends 6h. 42m.
THURSDAY, 24.—Rev. W. Burkitt died, 1709.
FRIDAY, 25.—St. Crispin.
SATURDAY, 26.—Sun rises 6h. 44m., sets 4h. 43m.

TIMES OF HIGH WATER AT LONDON BRIDGE,
FOR THE WEEK ENDING OCTOBER 26.

Each view half-an-hour before each representation.—Descriptive Catalogues may be had at the Gallery.

ROYAL POLYTECHNIC INSTITUTION.—LECTURE on the BALLAD MUSIC of ENGLAND, by Mr George Barker. Lecture on the Hydro-Electric Machine, by Dr Bachhoffner. Lecture on Chemistry, by J. H. Pepper, Esq. Dissolving Views. Diver and Diving-Bell, &c. Admission, 1s.; Schools, Half price. Open daily from Eleven till Five o'Clock; and every Evening (except Saturday) from Seven till Half-past Ten.

ROYAL SEA-BATHING INFIRMARY. The Fifty-Fifth ANNIVERSARY DINNER of this Charity will take place at the LONDON COFFEE-HOUSE, LUDGATE-HILL, on THURSDAY, the 31st OCTOBER instant; the Right Worshipful the Lord Mayor in the chair.

STEWARDS

Sir Moses Montefiore, Bart., V.P.

Edward Candler, Esq.	William Nottidge, Esq.
John Lane, Esq.	Thomas Watkins, Esq.
John Ilderton Lowes, Esq.	T. Wilson Hall, Esq.
Edward Southwell, Esq.	Edward Paynter, Esq.
Thomas Loudoun, Esq.	William Woodward, Esq.

Dinner on table at Six o'Clock precisely. Tickets, One Guinea each, may be had of the Stewards, at the bar of the Tavern, and of

30, Cannon-street, 17th Oct., 1850. JOHN PAUL, Secretary.

ROYAL FREE HOSPITAL, GRAY'S-INN-ROAD.—The Weekly Board at this time most earnestly entreat the ASSISTANCE of the benevolent, as they are seriously alarmed lest a deficiency of funds for the continuance of their system of weekly payments at 7 the current expenses, should compel them again to close the fourth ward, which they felt so much pleasure in re-opening to the afflicted poor about six months ago. They would the more deeply regret this, as the cases of distress are exceedingly pressing, and likely to become far more so as the winter approaches.

Contributions received by the Treasurer, John Masterman, Esq., M.P., Nicholas-lane, also by Messrs. Coutts and Co.; Drummond and Co.; Herries and Co.; Ransom and Co.; Prescott, Grote, and Co.; Smith, Payne, and Co.; Glyn and Co.; Jones, Lloyd and Co.; Barclay and Co., Lombard-street; Williams, Deacon, and Co.; Overend, Gurney, and Co.; Nisbet and Co., Berners-street; Masterman and Co.; and at the Hospital. By Order of the Weekly Board,

EDWARD RICE, D.D., Chairman.

The Weekly Board meet every Wednesday at Four o'Clock.
Cast-off apparel, male and female, also old linen rags, will be gratefully acknowledged.

With the PRESENT NUMBER of
THE ILLUSTRATED LONDON NEWS
IS PUBLISHED
A SUPPLEMENT, GRATIS.

TO CORRESPONDENTS.

HEARTSEASE.—The present Duke of Richmond is a direct descendant of Charles Lennox, fil gitimate son of King Charles II., by Louise de Querouaille, Duchess of Portsmouth. His Grace's arms are "Quarterly first and fourth, England and Scotland quarterly; second, Scotland; third, Ireland, all within a bordure compony ang. and gu. charged with eight roses of the second, barbed and seeded, ppr." The present Duke of Somerset as heir male and representative of the great house of Seymour, which claims descent from the St. Maurs of Normandy. His Grace's arms—"Quarterly first and fourth, or on a pile gu. between six fleurs-de-lis az. three lions of England (being the coat of augmentation granted by Henry VIII., on his marriage with Lady Jane Seymour); second and third gu. two wings conjoined in fess, the tips downwards, or, for Seymour."

LV de WARSAW.—The arms of Redbeard are "Arg. three martlets sa.; a chief az. *Crest:* An eagle's head az." Of Nightingale, "Arg. a fesse gu. between three lions' heads, erased or, ten ogresses. barbed vert, a crescent for difference. *Crest:* A greyhound courant erm., charged with a crescent for difference."

A CONSTANT READER.—Charlemagne and the Emperors of Germany, his successors, were looked upon as having restored the Western Empire in opposition to the pretended claims of the Greek Empire of the East. They consequently assumed direct dominion over Rome, and were hailed as Emperors of the Romans, which continued to be their most favourite appellation. See the subject very eloquently treated by Gibbon—"Decline and Fall," chapters 49—53.

AN EGOTISTICAL SUBSCRIBER.—See the small treatise on "Photography," published by Knight and sons, Foster-lane.

ONE EVIL.—The anecdote of a marriage by the electric telegraph is of United States origin.

We cannot answer for the truth of the story.

INQUIAT.—Rosin is an epithet applied to the letters and language of the ancient Goths, from rasus, signifying mysterious.

R. W. We question whether any locomotive engine upon the Great Western Railway cost £9000

L. Sheffield.—The singular of dice is die.

A LOVER OF THE Isle of Wight.—All books received are acknowledged.

ALBERT DURER.—See the Italian Handbook of Painting.

W. G. M.—Type-founding has been effected by machinery.

J. Reading.—We should apply to the editor of Sporting Magazine.

W. H. is thanked, but we have not room for the lines.

Y. V. Bath.—The sovereign was struck in gold at the mint in Glasgow.

J. E. D. Abingdon, should send his notes, free of expense, to Mr. Webster, 17, Great Russell-street, Bloomsbury-square, and inclose stamps for their return.

ESTE, Bognor.—Such ill-shod ankles as these we have not seen elsewhere.

G. D. P., Rotherhithe.—William, and Mary's half-crown, 1689, is worth from 3s upwards; half-crown of 1708, 2s 6d.

C. N. and [illegible]—We [illegible] Sir W. Molesworth.

W. Wilson.—[illegible] Dr. L. Reid, secretary Edinburgh Royal Society, is the correspondent to whom to write.

J. L. F.—Thanks; but the Sketch was [illegible]-fide-tinct

DUNFERMLINE, Dalsey.—Address S. New Burlington-street

AN ENGLISHMAN ABROAD.—Queen Bradlaugh's Transportation-street.

PHILO.—See Low's "Counties of London. Just published. The map prefixed to the "London Post-office Directory" is a capital one

J. L. F.—Thanks; but the Sketch was indistinct

W. G.—See Low's "Counties of London. Just published. The map prefixed to the "London Post-office Directory" is a capital one

A P F.—Dr. Jenner was the discoverer of Vaccination, or Cow-pox, to insure security from small-pox, see his life by Dr. Baron, of Gloucester.

A B C.—We must be excused giving the recommendation

S N D.—The obtaining of Government situations by such means as you state would be illegal

PAGET and A W B, Blandford.—See the list of Missionary Societies, in Low's "Charities of London."

C E, Durham, Co., and M G.—We cannot inform you.

I M P.—Lord Rosse's telescope, is described in No. 71 of the ILLUSTRATED LONDON NEWS

J J.—An Engraving of the Victoria lily appeared in No. 326 of our Journal

A CORRESPONDENT.—The words from Blair's "Grave" are—

"In visits,
Like those of angels, short and far between."

Thus altered by Campbell, in his "Pleasures of Hope"—

"Like angels' visits, few and far between."

ROSALIE.—We regret that we have not space for such matters.

ÆSLAS.—Refer to the "History of the Scottish Clans"

J S, Hythe.—The arms are "Gu. on a chev. between two lions' heads, erased or, ten ogresses. *Crest:* A snake wreathed about a marble pillar ppr., garnished or"

N B.—Captain Sir John Ross, the Arctic navigator, entered the Royal Navy October 11, 1786, as first class volunteer on board the *Fearl*, 20, Captain the Hon Seymour Finch. The only action we can trace as used by the Rosses are "Erm. three lions rampt."

MODERN ATHENS.—It is necessary that the Prime Minister and the Secretaries of State should be members of one or other House of Parliament

BLANCHE.—We believe that General Webb was of the same family, though distantly connected, as Sir John Webb, father of Lady Dawnay-taker

C A B.—The arms we inserted in reply to "R T" are those borne by Colonel Dalgairns, of Balgavies, Fifeshire

AN ARMIGER.—The crest is "A holly stump, leaved and fruited ppr."

ARMIGER.—A letter addressed to the authorities at Salisbury, will obtain the desired information

A SUBSCRIBER.—The arms of Quinn are, "Arg. a galley of three masts, her sails furled and oars in action sa. flags gu. within a bordure az. on a chief of the third a bear's head of the first, muzzled of the second, between two mullets of the field. *Crest:* A dexter hand wielding a sword ppr. *Motto:* Ad exitum"

D. W. Knowle.—[illegible] D. Reid, secretary Edinburgh Royal Society, is the correspondent to whom to write.

EDA.—The officers of the mounary are entitled to the use of the cockade in their servants' hats

ISABELLA.—The matters of the Elizabeth's are "Dieu le accroist" and "Dimmensatis honoribus"

W M T P.—The "lion rampant, charged with a cross moline," is too indefinite a description to identify the crest

SURSCRIBER, Dalkeith.—George Drummond, Duc de Melfort, who lays claim to the earldom of Perth, is son of the late Leon Maurice Drummond, by his wife Lucie Elizabeth de Longueuarre

A SUBSCRIBER AND READER.—The descendants of a lady who is the heiress of her family have a right to quarter her arms with the paternal coat

ANNE.—See cross of Hilts "Per pale vair or and az., a galley of the first between a hand couped erasewise, holding a dagger in the pale, and in the dexter canton a cross crosslet fitchée, all within a border gu. *Crest:* A cat couchant ppr. *Motto:* Touch not the cat but the glove"

A WEST OF IRELAND FARMER.—Apply at the Colonial Emigration Office, Park-street, Westminster

FAIR HEAD, Ballycastle.—The Pedometer may be depended on

A LADY.—The work entitled "Real Life in India" contains much practical information which may be relied on: its price is 5s

STELLA.—The planets Jupiter, Mars, Herschel, Pallas, Juno, Vesta, Hygeia, Parthenope, and Victoria, are all situated between those of Mars and Jupiter. The known asteroids are now twelve in number. For the want of space, we cannot give their relative positions or magnitudes

HERCULES.—A farthing of Charles II. is very common, and of no numismatic value

ROSA.—"God tempers the wind to the shorn lamb" is from a French proverb

ROSA.—We do not know the translation of M. Turpot's works

F L, Winslow.—Apply to Mr James Hare, Arundel-street, Strand

RANDOLPH, A.T., and AGRICOLA.—We believe not

T H N, Brandon.—Curious as the subjects is, we have not room for it

A LADY SUBSCRIBER.—We regret that we are not in possession of either address

SYLVANUS.—The mark on a tree does not accord with its growth.—(See London's "Arboretum

A P.—See Godfrey Higgins's "Celtic Druids," 4to.; the Rev. W. Duke's

A PHILOLOGIST.—We cannot entertain the suggestion

JONSEE IL ROSSO.—See Thomas Jones's "Welsh and English Dictionary"

A CONSTANT SUBSCRIBER.—See William Mason, "Art of Carving in Wood." There are no published receipts for making Papier Mache, except in the specifications of patents

JUVENILE ARCHITECTS.—See Mr Weale's "Rudiments of Architecture"

A E R.—The closing price of Consols on the 19th of July, 1848, was 88; the 7th of December, 1846, 87; and Hudwood, on the 7th of December, 1846, 86.

G H C.—We do not know

MEMESTO.—The sentence is correct

CURIEUX.—Yes, it is correct

S D, Mortyn.—Certainly not

[BEAU DE ISELE.—See the "Life of Jenni"

G. Burton-on-Trent.—Received

INTERMEDIA.—Illegible.—The London Directory

ARGUS.—The seal has come to us too indistinct

DISPLAYING THE PROGRESS OF
THE GREAT BUILDING IN HYDE PARK
FOR THE
INTERNATIONAL EXHIBITION OF 1851.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, OCTOBER 19, 1850.

THE Irish emigration still continues to flow into the United States. The Liverpool and New York packets are daily thronged with the Irish peasantry; and it is estimated that from the 1st of January to the 1st of October, in the present year, at least 140,000 Irish of all ages and of all conditions, except the highest, have quitted the shores of the old country to seek subsistence, if not fortune, in the new. Hitherto this emigration has conducted itself, and has not been organised upon any plan or system. The peasant or the small farmer, finding himself miserable at home, has resolved to try his fortune in the wilds of America, and for this purpose has either hoarded his money, or received remittances from his friends or relatives in the United States to help him over. The result has been the extraordinary and constant efflux of the Celtic race from Europe to America which has been taking place since 1847, and which seems in the first nine months of this year to have far exceeded the amount of all previous emigration. There has hitherto been no attempt at colonisation, and no effort on the part of the Government to direct the great stream into any of the possessions of the British Crown. The only Irish colony that has ever been organised upon system, has taken its departure during the present week, and the first detachment of the body is now in Liverpool, awaiting its conveyance across the Atlantic. The event is too remarkable in itself, and too suggestive of the true policy which the nation has neglected, to be passed over without notice. This new swarm numbers about 400 families, or 1200 persons, almost all of whom are small farmers. They are said to take out with them a sum of upwards of £16,000 and large quantities of agricultural implements. A portion of them are of Saxon blood, from the barony of Forth, county of Wexford, descendants of the English who settled in that remote corner of Ireland as early as the 12th century. The high terms charged by the landlords in that district having, as it is said, rendered it impossible for these people to meet their engagements without trenching upon the savings of former years, they have determined to leave the country in a body. Their place of destination is in the state of Arkansas, whither they are to be accompanied by their parish priest, the Rev. Thomas Hoare, who has given up his benefice in order that he may not be separated from his flock. The colony has thus an aggregate character; and such men can scarcely fail to increase its resources and improve the social condition of the new and thinly settled state which they have favoured with their selection. But why, we would ask, should the English people look quietly on while such events are taking place, without an effort to persuade similar swarms of industrious men to select our colonies as their future homes, instead of the alien, and at some future time, as it may prove, the hostile States of the Great American Union? In June, 1847, Lord Lincoln moved an address to the Queen, praying her Majesty to take into consideration the means by which systematic Colonization might be rendered subsidiary to other measures for the improvement of the social condition of Ireland, as well as of our noble colonies, remaining uncultivated for want of labour. The motion was ably supported by the lamented statesman whose untimely fate the country will long deplore. Sir Robert Peel, upon that occasion, expressed strongly in favour of a more systematic attempt to direct the tide of emigration into our colonies, on the principle of ancient times, by men of capital taking out whole villages or communities, accompanied by their spiritual directors. But, notwithstanding the valuable aid which he offered, the Government was at that time too weak, and too much embarrassed both [illegible] by the extra responsibility thrown upon it by the famine—requiring more immediate exertion—to undertake a task of such delicacy and magnitude as the one suggested. Lord Lincoln's proposition was, therefore, opposed by Mr. Hawes, then Under-Secretary for the Colonies, and the part of the Government; and the subject of Colonisation received no other advantage than that of publicity. The Canterbury colonists have since that time taken their departure to a British colony; but nothing has been done for our magnificent possessions in British America. There are lands as fertile and as cheap in Canada as there are in Arkansas. New Brunswick and Nova Scotia would as well repay the toil of the emigrant as the "Far West;" and Canada, New Brunswick, and Nova Scotia would be more grateful for the influx of our superabundant millions than the United States;—and yet the immigration from this country into its North American Colonies is scarcely a fifth of that which takes place into the Union. It is useless to blame the Government for not originating schemes of Colonisation, for the reasons we have already stated, on more than one occasion, that such schemes, if undertaken by the Government, not only require immense sums of money, and may lead to jobbery and corruption, but are very likely to be rejected by the Parliament and the country. But the Government might perhaps direct, if it could not compel the stream. The Irish people know little or nothing of the resources of our Colonies, and the vast body of the emigrating classes in England are in a similar state of ignorance. A little knowledge of the subject, systematically disseminated, would not cost much, and could not but be productive of good. It would prepare the way for the efforts of those men of capital and energy who might organise, hereafter, such schemes as those of the Canterbury Association. We cannot but think that there has been a great deal too much supineness on this important question, and that the day will come when the Government and the people will have reason to lament their mutual short-sightedness.

THE *laissez-faire* principle both of general and local government is the dearly-beloved principle of some politicians; and they carry it so far, that they would not only have every man his own law-giver, but every man his own policeman. The metropolitan county of Surrey offers at this moment a remarkable instance of the advantages and disadvantages of this system as applied to local government. The Constabulary Act of 1839 gives permission to county magistrates to establish a county constabulary, or rural police, if they choose to pay the cost of it. The Surrey magistrates, dreading a rate of 2½d in the pound, have not chosen to avail themselves of the permission; and although there are nearly adjoins the metropolis, and has, in fact, yielded up a section of its territory to form a portion of mighty London, it has hitherto remained without a police. The magistrates of the *laissez-faire* school, have uniformly resisted all attempts to introduce a constabulary force for the protection of life and property, exposed in that county to peculiar hazards from its proximity to London; and in Surrey every man has been as much his own policeman as if he had lived in Texas, California, New Zealand, or any other half-civilised or wholly barbarous region. One magistrate has declared, that for years past he has never gone to bed at night without placing "a six-barrelled revolver" under his pillow; and while the rich have thus defended themselves, the poorer classes, who still have something to lose, have been left without any protection.

The advantages of the system, in addition to the affirmation of the great principle of *laissez-faire*, have been confined, as far as we can discover, to the saving of a rate of 2½d. in the pound upon the property of Surrey. The disadvantages have been a constant feeling of insecurity—a succession of alarming burglaries—and the barbarous murder of an estimable clergyman by a gang of desperadoes. It appears that these Frimley ruffians speculated upon the impunity to be afforded by the twopenny-halfpenny economists of the county. For our parts, we cannot see why a county should, in this respect, differ from a borough; and why any discretion should, in such a matter, be left to a body of amateur justices. At the last moment—and *after* a murder has been committed—the *laissez-faire* principle is to be reconsidered. The magistrates have agreed to think on the matter, and to report progress after Christmas. Let us hope that, to expedite their decision, no more burglaries and murders will be committed within their jurisdiction during the interval.

IMPERIAL PARLIAMENT.

On Tuesday, the day to which Parliament stood prorogued, her Majesty's Commission was issued for the purpose of a further prorogation, *pro formâ*, until Thursday, the 14th of the ensuing month.

Shortly after two o'clock, the Royal Commissioners, consisting of the Lord Chancellor, the Marquis of Clanricarde, and Earl Granville, took their seats in front of the throne, in the House of Lords, in their robes, when Mr. Pulman, the Deputy Usher of the Black Rod, was directed to summon the Commons to hear the commission read.

Mr. William Ley, the second clerk at the table, representing the Speaker, accompanied by the hon. members Mr. Aglionby, Mr. Bellew, and Mr. Raphael, shortly afterwards appeared at the bar, attended by officers of the House, when J. G. Shaw Lefevre, Esq., C.B., the Assistant Clerk of the Parliaments, read the commission at the table, after which the Lord Chancellor, on behalf of her Majesty, declared that Parliament stood further prorogued until the day above named. The Commons then withdrew, and the Commissioners left the House.

The throne, and the Royal chairs of Prince Albert and the Prince of Wales, were uncovered, as is usual on such occasions, as were also some of the Peers' seats, for the accommodation of ladies who attended to witness the ceremony.

THE HOUSE OF LORDS.—The only addition observable, on Tuesday, on the occasion of the *pro formâ* prorogation, in the House of Lords, since the rising of Parliament, is the erection of a light, ornamented metal railing across the throne, in front of the throne, for the purpose of keeping those who have the privilege of occupying that portion of the house—the sons of Peers and others—during the debates, within the strict limits assigned to them—an arrangement which has become absolutely necessary, in consequence of inconveniences which have resulted from the space between the throne and the woolsack having been hitherto an open one. The gallery leading from the vestibule, or hall, to the new House of Commons from the House of Lords remains in the same state as at the close of the session.

Mr. C. S. Grey, one of the Private Secretaries of Lord John Russell, who had served for a long time in the Treasury, has received the appointment of Paymaster of Civil Services in Ireland, lately held by Mr. Kennedy, one of the Commissioners of Woods and Forests.

Sir Charles McGregor has resigned his appointment to the Medical Staff of the Army.

FRANCE.—CIVIL FUNCTIONARIES.—The Ministerial departments are nine, and the number of Civil Functionaries belonging to them, of all ranks, are as follow:

Justice	11,100
Foreign Affairs	632
Public Instruction	50,000
Interior	344,000
Agriculture	
Public Works	10,000
War	30,000
Navy	13,633
Finances	76,000
Total	535,365

In the 11,000 persons of the Ministry of Justice, 18,000 agents and legionaries paid by the budget of the Legion of Honour, are not included. The number of persons paid by the Communes is 300,000, included under the 344,000 of the Interior. In the 10,000 persons employed on the Public Works, 15,000 roadmakers are not included. This information is taken from a report made by M. Cordier, of Calvados, of the Legislative Assembly, on a motion of M. Raudot, Senator of Loire, who wished to have the Christian and surname of every public functionaries, and his emoluments, published. The motion was not complied with, because it was calculated that to print and publish it, the names would cost 572,000 francs (£22,480), and require twenty-five quarto volumes. If to the civil functionaries, 535,365, we add the military, 377,128, and the marine, [illegible] we shall have a total [illegible] of [illegible] about one male in every 7½ of the whole population is in the pay of the Government.

POSTSCRIPT.

THE FRIMLEY MURDER.

CONFESSION OF ONE OF THE PRISONERS.

Greyhound, Friday Night
Holles[t]

The four pr[isoners], charged with the murder of [Mr.] Hollest, were brought up for re-examination, this afternoon, before th[e] magistrates at the gaol. Neither of the three prisoners ha[d] been made acquainted with the confession of the fourth up to the period of their being so addressed; and even then a great deal of evidence was taken before the fact was allowed to escape. At length, all the witnesses in attendance [ha]ving been examined, the following confession, dictated to the governor of the gaol by Hiram Smith, was read by the clerk, Mr. W. Haydon Smallpiece:

"On the 27th of September last, being Friday last, myself, with other persons now in custody, named James Jones, Levi Harwood, and Samuel Harwood, was at Frimley, and broke into Mr. Hollest's house, by taking out a bar. I opened the first, and Levi Harwood second. With a worm, Levi Harwood bored two holes in the frame of the door leading to the kitchen, and pushed back the bolt with his knife, and then myself, Jones, and Levi Harwood went in and there looked about. Levi Harwood then opened a work-box, and took two shillings from it. We then, all three of us, went into the sitting-room, and Levi Harwood and Jones searched while I held the candle, and there found a silver hunting watch, and a small old-fashioned gold one. We then went into another room, and I don't know what was taken from there. They then went down into the pantry, while I stood in the passage. It was then about half-past two o'clock. I then went out and fetched Samuel Harwood in. Three of us then went up-stairs. Myself, Jones, and Levi Harwood went into Mr. Hollest's room, and removed three ladies' dresses—one out of the drawers, and one from the bedstead. There was no one sleeping in that bed-room. We then came down-stairs, and put on the masks. Myself and Jones put on the green ones which were produced last Monday, and Levi Harwood put on a white one, and a white Guernsey over his waistcoat. Jones put on a large cloak which was hanging up in the passage, and I put on one likewise. The cloaks belonged to the house. We then all four of us proceeded up-stairs. Jones went first, with a pistol in his right hand; Levi Harwood second, with a pistol in his right hand, while he held the candle in the left; myself third, with a bludgeon with marbles. Jones first, Levi Harwood second, and myself third, now entered Mr. Hollest's room, while Samuel Harwood stood at the bed-room door, with a screw-driver in his hand. Levi Harwood then said, 'Lay still, my good woman, or else I will blow your brains out.' He was standing at the foot of the bed at this time. Mrs. Hollest instantly got from her bed, and Jones being on her side of the bed, Levi Harwood at the foot of the bed, and myself against Mr. Hollest's side of the bed. When Mrs. Hollest got out of the bed, Jones took hold of her and pushed her up in the corner of the room, on her own side of the bed. Mr. Hollest jumped out of the bed and went to take hold of Levi Harwood, when Levi Harwood immediately fired the pistol at Mr. Hollest, and I took the gold watch from off the stand in the room, and we all four then ran down stairs. We were in the room for about five minutes. Jones and Samuel Harwood then went for Guildford. After we had run about a quarter across the commons about five miles, Levi Harwood and myself then parted from them, and we went to Kingston together. There I left him to go to London, he having the charge with him that had been taken from Mr. Hollest. I returned to Guildford. We arranged on the Tuesday previous to commit the robbery. On the Friday evening Sam'el Harwood and Levi Harwood went first, and myself and Jones met them on the top of the hill about two o'clock from Frimley. It was then about nine o'clock, and there the pistols were loaded by Levi Harwood. We all four went on to the canal bridge and there parted. Levi Harwood and Jones went first, and myself and Samuel Harwood followed them in about five minutes, and then joined them on the green near Mr. Hollest's house."

A dreadful scene took place after this document had been read. The man Smith protested that it was true to the letter; while all the other prisoners declared it was utterly false. Jones said, as usual Smith would be sole sufferer for concocting such falsehoods. Ultimately, the prisoners were remanded until Saturday next, when they will be fore ally committed for trial.

THE LATE QUEEN OF THE BELGIANS.—COURT MOURNING.—The following, dated Lord Chamberlain's Office, Oct. 18, appeared in the *Gazette* of yesterday (Friday) evening:—Orders for the Court's going into Mourning, on Sunday next, for her late Majesty the Queen of the Belgians, are as follow, viz.:—The Ladies to wear black silk, fringed or plain linen, white gloves, necklaces and ear rings, black or white shoes, fans and tippets. The Gentlemen to wear black full trimmed, fringed or plain linen, black sword belts and buckles. The Court to change the mourning on Sunday, the 3d of November next, viz.: The ladies to wear black silk or velvet coloured ribbons, coloured or plain white, or white silks and gauze, or white and crape stuffs, with black ribbons. The gentlemen to wear black coats, and black or plain white, or white and gold, or white and silver stuff waistcoats, full trimmed, coloured swords and buckles. And on Sunday, the 10th of November next, the Court to go out of mourning

CLUB FOR ALL NATIONS.—On Thursday afternoon, a preliminary meeting of foreign merchants and shippers of the port of London was held at the London Tavern, Bishopsgate-street, for the purpose of considering the removal of the commercial and shipping restrictions, and the Great Exhibition of 1851, would naturally bring an immense number of foreign merchants to the metropolis, and it was thought the means of facilitating their intercourse with each other and with the gentlemen of London, that a club of all nations should be established in London, to be provided, in addition to the usual club accommodations, with interpreters of the English and the languages of the East, and with secretaries, clerks, and commissioners, and departments for information. A committee of gentlemen, merchants of London, was elected to carry out the undertaking.

FATAL STEAMBOAT ACCIDENT ON THE RIVER.—On Thursday morning, about nine minutes before seven o'clock, a heavy and fatal accident took place on the river, in Limehouse Reach, whereby the lives of four men were sacrificed. The *Duke of Cambridge*, Irish steamer, having left Alderman's Wharf, on its passage Eastwards, and another Limehouse, where several steamers passing caused a heavy surf, was met there suddenly by a skiff, in which were four men and a boy belonging to the Patent Fuel Works, Deptford. The captain and others on the look-out called and used every possible exertion to warn the parties of the danger, but before the men in the skiff could get out of the way, the steamer came right upon it, immediately smashing the four men and the boy. The men were got rose, but the boy clung to the fender near the paddle-wheel, from which perilous situation he was released and taken on board the steam-boat, where he received every attention. The drags were brought to the scene of the sad disaster, but nothing could be discovered until yesterday morning at half-past seven o'clock, when a watergerman, named Tomlinson, brought the body of one of the unfortunate men ashore at Rotherhithe, having found it off Cuckold's Point.

LATEST FOREIGN NEWS.

FRANCE.

According to our accounts of yesterday (Friday) from Paris, the hostility manifested by the authorities of the Repu.lic to the press does not abate in the slightest. Several periodicals, which have lately contained severe comments upon the President of the Republic, have, by an order just issued, been interdicted admission into the military depots

The *Gazette de France* announces the serious indisposition of the Marquis Charles de Foresdorff (Don Carlos), now on a visit to the Count de Chambord. Frolsdorff. The same journal also mentions the departure of a courier to the French Ambassador at Denmark, with a view to the speedy settlement of the dispute between the Danish Cabinet and the Duchies.

UNITED STATES AND CALIFORNIA.

The *Franklin*, United States Mail steamer, reached Cowes this morning, after a passage of twelve days, with accounts from New York of the 5th inst.

The operation of the Fugitive Slave Bill continues to excite alarm and exasperation amongst the coloured population. An order had been issued to seize, as a fugitive slave, one Douglas, a negro, and had caused much agitation among the coloured here in England against slavery and the slave trade, but it was thought he had fled to Canada, where he would be safe from all arrest.

The steamer *Southerner*, and the barque *Isaac Mead*, had come into collision, when the latter sank, and 34 persons found a watery grave. An alarming fire had broken out in Buffalo, but the extent of damage we are not yet acquainted with.

Two weeks' later intelligence had been received at New York from California. Accounts from the gold region are very encouraging, and the restoration of peace and tranquillity will be hailed with pleasure. The city had been much agitated here in England against slavery and the slave trade, but it was thought he had fled to Canada, where he would be safe from all arrest.

The steamer *Southerner*, and the barque *Isaac Mead*, had come into collision, when the latter sank, and 34 persons found a watery grave. An alarming fire had broken out in Buffalo, but the extent of damage we are not yet acquainted with.

SAINT HUBERT, PAINTED BY ALBERT DURER.

FINE ARTS

PICTURES FROM THE LATE KING OF HOLLAND'S COLLECTION.

We have already noticed the important sale, which commenced on the 12th of August, and continued through the eight following days. We now engrave four [illegible] work.

[illegible], painted by Annibal Carracci; sold for 192*l.*, to F. Roos. It [illegible] me composition, St. Hubert, the patron of huntsmen, is praying to the [illegible] gious consolation to the [illegible] gives him the keys of heaven [illegible] or grandeur of design, correctne[illegible]

The *Art Journal* for the present month contains an in[illegible]sting report of the sale, [illegible]ying such pictures as realised something approaching to a [illegible]

[illegible] The first day's sale [illegible]sisted of forty-six pictures of the ancient Dutch, Flema[illegible] French schools, with one by Albert Durer. The [illegible] a Garden, by Van der H[illegible] [illegible] f Van der Helst, by the p[illegible] [illegible] black costume [illegible]

[illegible] himself, 312*l.* (N[illegible] [illegible] s Owner of the Vineyard [illegible] t, 293*l.* (Von Cleef, of [illegible]

[illegible] [illegible] es, &c., a very fine work by J. [illegible] he Museum at Brussels); A. [illegible] picture of the highest class, with figures by A. Van der [illegible] the Museum at Brussels); A [illegible] Velde, 209*l.* (Roos [illegible]

[illegible] La Fête des Rois, Jam[illegible]

[illegible] attributed to Claude, 206*l.* (Brondgeest).

[illegible] [illegible] of a Co[illegible] Herb Mar[illegible] The Abdication o[illegible] of Amsterdam [illegible]

[illegible] [illegible] ts of Senef, N. de Keyser, 625*l.* [illegible] N. de Keyser, 183*l.* (G. de [illegible] [illegible] 408*l.* (Brond[illegible]

[illegible] [illegible] formers, by Labou[illegible]

The third day's sale included seventy-two pictures of the ancient Flemish and Spanish schools. Of these the most [illegible] Annunciation of the Virgin, Van Eyck, 448*l.* (Brunn[illegible] e agent, it was understood, of the Emperor of R[illegible] ge de Luques, Van Eyck, [illegible] 166*l.* (Brunnit); two subjects, the Bust of Christ and the Bust of the Virgin, Q. Matsys, 196*l.* (De Vries); four subjects from the Life of Job, and [illegible] by B. Van Orley, 534*l.* (Roos); [illegible] Magi, L. de Leyden, 370*l.* (Roos); The [illegible] Cross, L. de Leyden, 583*l.* (Brunnit); [illegible] of Quality, Holbein, 416*l.* (He[illegible]

[illegible] The Assumption [illegible] e large sum of [illegible] [illegible] [illegible] r subject at[illegible] [illegible] cest); two ex[illegible] [illegible] p IV. of Spain, and The Duke d'Olivarez, were knocked down to M Brunnit for the Emperor of Russia, for 3240*l.*; and The Holy Family, by Spagnoletto, was bought by M. Roos at the price of 708*l.*

The [illegible] [illegible] [illegible] by Mo[illegible]renhout, 107*l.* (A. Lamme); The Cannon-shot, by W. J. J. Nuyen, a clever young painter of the Hague, who died in [illegible]

On the fifth day were sold fifty-four pictures by the old Italian masters, nineteen of the old F[illegible] [illegible] thres of the D[illegible] [illegible] The Virgin under a Palm-tree, [illegible] Roos); A Son of Cosmo de M[illegible] [illegible] (Pleschanoff, of St. Petersburgh); [illegible] (O. de Vries); the companion, 160*l.* (O. de Vries); St. Luke, [illegible] [illegible]

early master [illegible] was bought by M. Van Cuyk for the Gal[illegible]

DEAD CHRIST, PAINTED BY CARACCI.

[illegible] ory of the Louvre in Paris. The Holy Family, Jacopo Palma, called Il Vecchio, 316*l.* (O. de Vries); Portrait of a Lady of the Family of the Medicis, Seb. del[illegible] [illegible] same painter, 246*l.* (N. Brondgeest); Portrait of J. F. Penni, ascribed to Raffaelo, 25[illegible] [illegible] was presumed); Portrait of Salésar, Raffaelle, 1338*l.* (Brunnit); The Holy Family, Andreo del Sarto, 708*l.* (N Brondgeest) [illegible] dreo del Sarto, after a contest of upwards of an hour, was knocked down to Mr. Mawson, for the Marquis of Hertford, at [illegible] [illegible] (N. Brondgeest); a pair of pictures, The Triumph of Galatea and the Triumph of Solomon Christ [illegible] da Vinci, to M. Brunnit, the agent of the Emperor of Russia, at the enormous sum of 40,000 florins, about 3333*l.* sterling, the largest [illegible] [illegible] [illegible]

THE DEATH OF THE VIRGIN.—PAINTED BY MARTIN SCHON.

CHRIST GIVING THE KEYS TO ST. PETER.—PAINTED BY RUBENS.

PARLIAMENTARY PORTRAITS.

ROBERT STEPHENSON, ESQ., F.R.S., M.P. FOR WHITBY.

THE subject of our memoir, only son of the late George Stephenson, of Tapton House, Derbyshire, was born at Wilmington, near Newcastle-upon-Tyne, November 16, 1803. At ten years of age he was sent to the academy of Mr. John Bruce, of Newcastle, which he left when about sixteen; and having for a short time received private instruction in mathematics from Mr. Riddell (now headmaster of the Royal Naval School at Greenwich), he was appreticed as a coal-viewer to Mr. Nicholas Wood. With him Robert Stephenson served at his underground occupation for three years. George Stephenson was then beginning to become known as an engineer; and, looking to better prospects for his son, sent him to the University at Edinburgh, where he entered in 1821, and for a session studied Natural Philosophy under Professor (afterwards Sir John) Leslie; Chemistry, under Dr. Hope; and Geology and Mineralogy, under Professor Jamieson. There was no more diligent student at the University. He knew the value of knowledge, and had gone there determined to work and learn. His studies were to his taste: every hour was made use of. His father could afford him only a single session. There was need he should be at the profession he was to live by; but the one session, so earnestly did he labour, not only taught him as much as is usually learnt in three, but taught him how to

ROBERT STEPHENSON, ESQ., M.P. FOR WHITBY.

teach himself. In 1822 he returned from Edinburgh, and commenced his apprenticeship to engineering under his father, who had just established a steam-engine manufactory at Newcastle. After two years of laborious application to the study and practice of his profession, his failing health gave evidence of overwork. Just then, Messrs. Herring, Graham, Poles, and others had on foot an expedition to explore the silver and gold mines of Venezuela, New Grenada, and Columbia, the charge of which they offered him; and the value of the voyage and change of climate to his health being strongly urged by Dr. Headlam, of Newcastle, his father consented to his acceptance of the appointment, and in 1824 he set out for South America. He remained for nearly four years in Columbia, and this little expedition of adventurers ultimately became the nucleus of the Columbian Mining Association.

On his way home, in 1828, he sailed from Carthagena round Cape Horn to New York, travelled through that state and through Upper and Lower Canada, and finally took ship from Quebec for England. At the period of the departure of Robert Stephenson on this mining expedition, the railways in England, with one exception, were private ones, from coal, lead, copper, and iron mines, to places of shipment upon sea, rivers, and canals. The Surrey Iron Railway, which obtained a first Act of Parliament in 1801, and a second in 1803, and which, reaching from the quarries at Merstham and Reigate to Croydon and the Thames, at Wandsworth, was twenty-one miles in length, was the one exception—the sole public railway of the kingdom, and, as a commercial speculation, its total failure had barred the extension of such lines of road. In locomotives, however, some progress had been made, several patents for locomotives upon common roads and railways, beginning with that of Messrs. Trevethick and Vivian, in 1802, had been taken out, the idea of which was probably suggested by the description of a model for the application of an expansive engine to the moving of wheel-carriages in Watts's patent, dated 1784, and the hint as to which he himself had received, so early as 1759, from a fellow student of the name of Robinson, in the University of Glasgow. This plan of locomotion, however, failed upon the Merthyr Tydvil Railroad, the mode of applying the power causing the wheel to slip round instead of turning upon the rail. To get rid of this difficulty, Mr. Blenkinsop, of Leeds, had patented, in 1811, a rack-rail, to be run upon with cogged-wheels, and which was worked at the Middleton Colliery for years.

Messrs. William and Edmund Chapman, in 1812, had taken out a patent for a fixed engine, with a chain to wind the carriages along the road, which failed, from the excessive wear and tear; and, in 1813, Mr. Brunton had patented a very ingenious locomotive, with a kind of moveable legs and feet to press upon the rails and enable the power to push the engine forward. But the use of this invention was superseded by the double-cylindered locomotive, constructed by Mr. George Stephenson, and first tried upon the Killingworth Colliery Railroad, in the July of 1814, in which the power was so applied as to prevent the slip of the wheel. Steam and subsequent improvements were introduced, to obviate the necessity of cogged-wheels in transmitting the power of the engine to the wheels upon the rail. After this came improvements of various kinds, by Messrs. Losh and Stephenson, in the construction of locomotives, rails, and railway-chairs, specified in one of the most comprehensive and useful patents upon record, sealed September 30, 1816. Up to 1824, the period of Robert Stephenson's departure for South America, there were not above a dozen locomotives in use, and those were upon colliery-trams: the steam-horse, however, had, in some sort, proved his power, and was waiting for the road; and the Stratford and Moreton Railway, the first line opened for the carriage of goods and passengers, as well as minerals, and the Stockton and Darlington, were the one all but completed, and the other far advanced in construction.

During the absence of Robert Stephenson a new era may be said to have commenced in England. In the April of 1825, his old master, Nicholas Wood, published his well-known "Practical Treatise on Railroads," the first complete work upon the subject; and in that year of wildest speculation, general attention was first turned to railroads, and the idea of iron highways and swift travelling by steam first seized upon the public mind. The panic and commercial disasters of the next few years left people without means or energy for effort; but still the Liverpool and Manchester Line was commenced in 1826; and, on his return, in 1828, Robert Stephenson found that great work far towards completion, under the unconquerable energies of his father, and his earnest and able assistant, Mr. Joseph Locke, now M.P. for Honiton—a memoir of whom appeared in our Journal of Saturday, March 16, 1850.

George Stephenson's engine manufactory, at Newcastle, had, by force of the local growth of railways previous to 1825, the sudden impulse given to their construction in that year, and his several patents in connexion with them, become exclusively a locomotive manufactory; and to it at once, and for the ensuing three years, Robert Stephenson devoted by far the greater part of his time and attention; but worked also, however, as an engineer—executing, in 1829, the Warrington and Newton, and Leicester and Swannington lines. The motive power to be used upon the Manchester and Liverpool Railway was not yet determined upon. George Stephenson favoured locomotives; other high authorities, fixed engines. Messrs. Walker and Rastrick, appointed by the directors to visit Darlington and the neighbourhood of Newcastle, where both systems were to be found at work, reported in favour of fixed engines. Their conclusions were hotly controverted in a pamphlet, the joint production of Robert Stephenson and Joseph Locke. The careful reasonings of this pamphlet strengthened the directors in their desire to decide for locomotives, and, at the suggestion of Mr. Harrison, one of their number, they offered, on the 20th of April, 1829, a premium of £500 for the best locomotive, which must consume its own smoke, must not, with its complement of water in the boiler, exceed six tons in weight, and must be capable of drawing after it, on the level of a well-constructed railway, a train of carriages, weighing twenty tons, at the rate of ten miles an hour. Thus moderate were the hopes of power and speed on railways upon the eve o

the opening of the Manchester and Liverpool Line. If the engine could be made of less than six tons weight, so much the better; it need then only draw three times its own weight of carriages; and the winning engine must, in any case, be sold to the company for not more than £2500.

The 6th of October, 1829, was fixed upon for the trial. Robert Stephenson, in conjunction with Mr. Henry Booth, then secretary of the Liverpool and Manchester road, now of the London and North western, and who from the first had [illegible] went to work at once, resolved to outstrip the conditions, [illegible] rather doubt as to their superiority. Four engines were entered for the [illegible] only three appeared upon the trials; and of these the Rocket, of Robert Stephenson, weighing 4 tons 3 cwt., and which therefore, in accordance with the fixed terms, drew 12 tons 15 cwt., carried off the prize, put an end to the battle of locomotives and stationaries, and beyond measure raised the spirits of the directors by accomplishing an average of 14 miles an hour, and attaining a maximum speed on one trip of 20 miles.

This was the deciding point—to all practical purposes the beginning of our present system of railways.

Encouraged by this success, Robert Stephenson, with renewed earnestness, devoted his attention to locomotives, and accomplished numerous improvements, has 1841 for a small iron bridge over the river Lea, in the town of Ware, re occurred to him, giving the idea of a suspended wrought-iron tube through which the trains might pass. After long consideration, this suspension tube presented itself to his view as a beam laid across the girders; the chains, which had hitherto been looked upon as the main source of strength, came to be viewed as auxiliaries that it might even be possible to dispense with. The best shape for the hollow beam was then brought under review—the elliptical resolved upon—and, upon the 13th and 14th of March, 1845, instructions were given by Robert Stephenson to his assistants, Messrs. Berkley and Marshall, to prepare [illegible] a reduced model of compound tubes, top and bottom [illegible] plans for the deviations of the line had been deposited in November, 1844 [illegible] session had already commenced a strenuous opposition was [illegible] very mass of evidence and every line of the plan. There was no [illegible] experiments. Mr. John Laird, the iron ship builder, then a member [illegible] Chester and Holyhead board, at once took up the idea of the wrought-iron tubular bridge expressed confidence in its strength, and declared that his own vessels, when stranded, uninjured. In corroboration of this, there was the case of the *Prince of Wales* iron steamer, which, by a slip in launching, was brought with her bows resting upon the top of a wall at Blackwall, and which, to have 110 feet of her keel unsupported, without suffering any injury worth mention. These and similar facts mentioned by Mr. Fairbairn, who stated that he was ready to prop an iron vessel with her machinery, and that would sink from 100 to 150 feet in the centre, without support from end to end, and the approval of the plan by his father, were the [illegible] amount of evidence and in support of his but just invented bridge with [illegible] sanguine expectations before the Parliamentary Committees in the beginning of May, 1845. He was able, at all events, to convince the committee of the completeness of his own task in the plan; one question and answer, even in our brief notice, deserves to be recorded. In the course of the examination, Mr. Stephenson, the great spirit will give ample security to the public?" *"Oh, I am quite sure of it."* The bill received the Royal assent on the 30th of June, and, with the consent of the directors, a price, elaborate and costly experiments in the strength of wrought-iron tubes, and to determine the form and construction of greatest strength, were set on foot. For an account of these experiments, resulting in the cellular double top and bottomed tubes, mentioned by Messrs. Fairbairn, Professor Hodgkinson, and Mr. Edwin Clark, for the most part under the suggestion and advice of Robert Stephenson, and which abound in ingenuity and interest, and for the minute details of the construction of every portion of the tubes, and every proceeding connected with their floating and final fixture in position, we must refer our readers to the elaborate volumes, with diagrams and drawings, of Mr Edwin Clark, the resident engineer of the works, recently published by Day and Son, Lincoln's-Inn-fields, and Weale, High Holborn; or to the pamphlet by Mr. Latimer Clark, Chapman and Hall, strand.

The recent rapid march of discovery, the vast works completed, the projected unprecedented, and accomplished, done much in the way of caution to impercdibly, but still there were wondrous wise head shakings at mention of this bridge. People almost sneered at the idea of a bridge 1513 feet in length, through across the line of rail, and that of an iron tube without support from end to end, at a height of 100 feet, was laughed at as sheer madness. Tolerably plenty of people who knew that its own weight would break it; those [illegible] would see the whole work burnt down before they went. The work, however, went on. The tube, or wrought-iron box bridge, being determined upon for the Menai, was adopted also for Conway. On the 15th of June, 1846, the first stone of the tubular bridge on the Welsh side of the Conway was hoisted on the 6th of March, 1847; raised and let down upon its piers on the 16th of April; and on the 1st of May it was in use for traffic; and by the end of October, 1848, the second tube was also completed in readiness for the opening on the 1st of November, 1848, and was ready for use, and of doubt. True, the tube was but 400 feet clear in length, and each tube of the Britannia would be 460. It was but 15 feet above the water, and the Britannia was to be 100 feet above high water mark. Still, the principle of the bridge was practically solved, its strength tested; it was a covered highway, through which the trains crossed that 400 feet on as firm a road as when the rails were laid on level ground. At the Menai, too, the work went serenely on. The first stone of the tube on the Britannia Tower was laid without ceremony of any kind, on the 21st of Sept., 1846. There are stones in the tower 29 feet in length, some that weigh 12 and 14 tons; it contains 2,000 of masonry, weighing 30,000 tons. The tops of the stone and girders, there are 387 tons of cast iron built into it. Speaking of it, and the towers on land and other buildings, when placing the last stone of the Britannia Tower, on the 22nd of June, 1849, Robert Stephenson said, "By the time the tower is twice as high as it now is, and when only this, that there was a combination of the priest-ridden of all factions. (Cheers.) Those who held Europe in darkness when they had the power sent their representatives to oppose his bill. The Cardinal Archbishop of Westminster (applause) sent his representative, so did the Puseyite section of the Church of England, and so did the bigoted and intolerant of all sects. These circumstances, however, only increased his determination to work out the question. (Cheers.) He was determined to see to the question of whether the people had not the right, and whether it was not their interest, to have education uncontrolled by priest or Government. (Cheers.) He would not present his bill in exactly the same form; for he would take care that Lord J. Russell's complaint, that too much power would be placed in the hands of the Privy Council, should be removed.

After some observations from Mr. Hume, Lord Dudley Stuart, Colonel Thompson, and Mr. F. O'Connor,

The resolution was put and carried, amidst much cheering.

The next resolution, which had reference to the necessity of prompt attention being paid to the establishment of cheap postage, was carried in like manner.

Addresses from Mr. Nicolay, Mr. J. Williams, M.P., Mr. H. Vincent, and Mr. Ingham (introduced as a working man), closed the proceedings, which lasted four hours.

CONFLAGRATION AT SEA.—Much anxiety has been evinced in the City respecting the loss of a first-class steam-ship in the Atlantic, which is reported to have been totally destroyed by fire. The following details were furnished by Mr. Barras, captain of the *William*, from Quebec, who communicated the loss to the authorities at Lloyd's. The *William* left Great Matis, in the Gulf of St. Lawrence, on the 4th ult., and on the morning of the 12th a large steamer, with three masts, was observed in lat. 46 deg. 14 min. N., lon. 56 deg. 27 min. W., steering to the north west. The mention of this circumstance is the more necessary, in order that this ship might not be confounded with the one that was subsequently seen on fire, as she was proceeding in quite a different direction. Towards dusk on the following day a strong wind blew, and about fifteen miles to the southward of their course, said Mr. Barras, concluding that it was caused by some unfortunate ship in flames, very promptly bore down towards her, with a view of picking up the crew. He directed a good look-out to be kept, it being thought that those on board had left in the boats, and were knocking about in the vicinity of the wreck. During the period the *William* was making for the blazing ship, the wind blowing from the N.E., the flames raged with terrific violence, and, to use an expression of one of the crew, "it looked more like a mountain of fire than a ship." The vessel was described to have been one of awful grandeur, both ocean and sky being illuminated as far as the eye could reach. In the course of two or three hours the *William* got within a quarter of a mile of the flaming wreck. Not a soul was discerned from stem to stern, and her hull light build and a quantity of ironwork, it was apparent that she was a steamer, and that of a large class. She was burned within a foot of the water's edge. Mr. Barras states that he saw the platform between the paddle-boxes, the iron work of the deck, and all the upper works of the vessel, as well as what had been the engine-room, fore and aft, quite clear of the deck of the vessel, and nothing could be seen of the crew or the passengers. It being supposed that they had left the ship in the boats, a step was taken by one of the many vessels that take the track at this period of the year, the *William*, after continuing in the vicinity of the wreck, was held to her course on the wind, a bright light being kept up, and a good look-out maintained all night. A sail was observed in the south, steering N.W., and it is thought she might have succeeded in getting those belonging to the steamer on board. At daybreak hands were sent up to look round on all points for the boats, but none were to be seen. A craft was noticed in the N.E. steering W., but nothing else. Mr. Barras can give no opinion as to where the unfortunate vessel was from, or where she was bound, but she is considered she was a steamer. The spot of her destruction was about four days' run from Halifax, but not being in the usual course to that port, will account for the American mail not bringing tidings of the conflagration. It is the impression of those belonging to the *William*, that the crew and passengers had escaped. When they got down to her she had apparently been burning six or eight hours, and as the weather had been very fair, the moon being up, they concluded that all had got away in the boats, and had been picked up.

SELFISHNESS.—We regret to learn that the Duke of Rutland's keepers have received instructions to prevent persons from visiting the celebrated Druidical remains, historically named "the Druids' Pulpit," situate near Stanedge Pole, Yorkshire, on the plea that they would disturb the birds. This celebrated spot has been the resort of visitors, naturalists, and artists for ages; yet now, forsooth, they are to be warned off, lest they should cause a few grouse to take wing. Several parties on their way to the place have been stopped during the last few days.

ARTICLES OF UTILITY FROM HOME-GROWN PRODUCE.—We pay to the foreigner about half a million annually for silk plush employed in the manufacture of very "shiny" and still very dark, whilst our own flax fields would afford us a much more agreeable and cool material, and one more closely resembling beaver. The flax, for this purpose, should be prepared without steeping; retaining, by this omission, all the natural gloss and silkiness of the fibre, and rendering it a more pliable article of texture, and free from that dye which at all injuring its appearance. In the other essentials economy, flexibility, and lightness—to other material, animal or vegetable, can excel plush made from fine flax; and, if upon a similar foundation, the hat may be folded into any shape without breaking it

POTATO FLOUR.—An importation having taken place from abroad of a quantity of farina or potato flour, the importer requested that it might be recorded in the same manner as wheaten flour, and delivered at the duty of [illegible] but [illegible] as the article appears to be not only serviceable for food [illegible] also as an important material in a manufacturing process, it was decided to be [illegible] the *ad valorem* duty [illegible] a manufactured article, and ordered to be charged accordingly.

The opening of the Liverpool Line. If the engine could be made of less than six tons weight, so much the better; it need then only draw three times its own weight of carriages; and the winning engine must, in any case, be sold to the company for not more than £2500.

The 6th of October, 1829, was fixed upon for the trial. Robert Stephenson, in conjunction with Mr. Henry Booth, then secretary of the Liverpool and Manchester road, now of the London and North western, and who from the first had [illegible] went to work at once, resolved to outstrip the conditions, [illegible] rather doubt as to their superiority. Four engines were entered for the [illegible] only three appeared upon the trials; and of these the Rocket, of Robert Stephenson, weighing 4 tons 3 cwt., and which therefore, in accordance with the fixed terms, drew 12 tons 15 cwt., carried off the prize, put an end to the battle of locomotives and stationaries, and beyond measure raised the spirits of the directors by accomplishing an average of 14 miles an hour, and attaining a maximum speed on one trip of 20 miles.

This was the deciding point—to all practical purposes the beginning of our present system of railways.

Encouraged by this success, Robert Stephenson, with renewed earnestness, devoted his attention to locomotives, and accomplished numerous improvements, has 1841 for a small iron bridge over the river Lea, in the town of Ware, re occurred to him, giving the idea of a suspended wrought-iron tube through which the trains might pass. After long consideration, this suspension tube presented itself to his view as a beam laid across the girders; the chains, which had hitherto been looked upon as the main source of strength, came to be viewed as auxiliaries that it might even be possible to dispense with. The best shape for the hollow beam was then brought under review—the elliptical resolved upon—and, upon the 13th and 14th of March, 1845, instructions were given by Robert Stephenson to his assistants, Messrs. Berkley and Marshall, to prepare [illegible] a reduced model of compound tubes, top and bottom [illegible] plans for the deviations of the line had been deposited in November, 1844 [illegible] session had already commenced a strenuous opposition was [illegible] very mass of evidence and every line of the plan. There was no [illegible] experiments. Mr. John Laird, the iron ship builder, then a member [illegible] Chester and Holyhead board, at once took up the idea of the wrought-iron tubular bridge expressed confidence in its strength, and declared that his own vessels, when stranded, uninjured. In corroboration of this, there was the case of the *Prince of Wales* iron steamer, which, by a slip in launching, was brought with her bows resting upon the top of a wall at Blackwall, and which have 110 feet of her keel unsupported, without suffering any injury worth mention. These and similar facts mentioned by Mr. Fairbairn, who stated that he was ready to prop an iron vessel with her machinery, and that would sink from 100 to 150 feet in the centre, without support from end to end, and the approval of the plan by his father, were the [illegible] amount of evidence and in support of his but just invented bridge with [illegible] sanguine expectations before the Parliamentary Committees in the beginning of May, 1845. He was able, at all events, to convince the committee of the completeness of his own task in the plan; one question and answer, even in our brief notice, deserves to be recorded. In the course of the examination, Mr. Stephenson, the great spirit will give ample security to the public?" *"Oh, I am quite sure of it."* The bill received the Royal assent on the 30th of June, and, with the consent of the directors, a price, elaborate and costly experiments in the strength of wrought-iron tubes, and to determine the form and construction of greatest strength, were set on foot. For an account of these experiments, resulting in the cellular double top and bottomed tubes, mentioned by Messrs. Fairbairn, Professor Hodgkinson, and Mr. Edwin Clark, for the most part under the suggestion and advice of Robert Stephenson, and which abound in ingenuity and interest, and for the minute details of the construction of every portion of the tubes, and every proceeding connected with their floating and final fixture in position, we must refer our readers to the elaborate volumes, with diagrams and drawings, of Mr Edwin Clark, the resident engineer of the works, recently published by Day and Son, Lincoln's-Inn-fields, and Weale, High Holborn; or to the pamphlet by Mr. Latimer Clark, Chapman and Hall, strand.

The recent rapid march of discovery, the vast works completed, the projected unprecedented, and accomplished, done much in the way of caution to imperceptibly, but still there were wondrous wise head shakings at mention of this bridge. People almost sneered at the idea of a bridge 1513 feet in length, through across the line of rail, and that of an iron tube without support from end to end, at a height of 100 feet, was laughed at as sheer madness. Tolerably plenty of people who knew that its own weight would break it; thousands would see the whole work burnt down before they went. The work, however, went on. The tube, or wrought-iron box bridge, being determined upon for the Menai, was adopted also for Conway. On the 15th of June, 1846, the first stone of the tubular bridge on the Welsh side of the Conway was hoisted on the 6th of March, 1847; raised and let down upon its piers on the 16th of April; and on the 1st of May it was in use for traffic; and by the end of October, 1848, the second tube was also completed in readiness for the opening on the 1st of November, 1848, and was ready for use, and of doubt. True, the tube was but 400 feet clear in length, and each tube of the Britannia would be 460. It was but 15 feet above the water, and the Britannia was to be 100 feet above high water mark. Still, the principle of the bridge was practically solved, its strength tested; it was a covered highway, through which the trains crossed that 400 feet on as firm a road as when the rails were laid on level ground. At the Menai, too, the work went serenely on. The first stone of the tube on the Britannia Tower was laid without ceremony of any kind, on the 21st of Sept., 1846. There are stones in the tower 29 feet in length, some that weigh 12 and 14 tons; it contains 2,000 of masonry, weighing 30,000 tons. The tops of the stone and girders, there are 387 tons of cast iron built into it. Speaking of it, and the towers on land and other buildings, when placing the last stone of the Britannia Tower, on the 22nd of June, 1849, Robert Stephenson said, "By the time the tower is twice as high as it now is, and when only this last stone is left possible that there was a body of masonry could have been constructed within so short a period. The contractors had spared no expense, wisely judging that early liberality was finally economy. No less than two millions of the 3,000,000 of cubic feet of masonry had been constructed, though three years had not elapsed since the laying of the first stone. The height of the work averaged 150 feet: the tower upon which they stood, perfect and finished, was 240 feet. The work had gone on with that perseverance that three cubic feet had been accomplished a minute since the commencement, allowing 12 working hours to the day, and six working days to the week."

The first rivet of the Britannia tubes was driven on the 10th of August, 1847. The first tube (which, set on end, would stretch 107 feet above the top of the cross of St. Paul's) was floated on the 20th of June, 1849. Messrs. Locke and Brunel, eager for this triumph of their constructive skill, were there to guide it. Its pierce of ten thousand people, to its place at the base of the towers. On the 10th of August the hydraulic presses commenced heaving up the mighty weight, heavy as "thirty thousand men," which was finally laid in its position on the 9th of November. The second tube was floated on the 4th of December—let down upon its bed on the 7th of February, 1850. On the 3rd of March the Carnarvon and-side was passed, the first engine passed through the tubes, and this last [illegible] of the conquests had of the Welsh side driven by Robert Stephenson on the 5th, and the single line was opened for public traffic on the 18th—of which, with a drawing of the bridge, an illustration was given in our Number of March 23 On the 19th of July last, the 20th day last, the first express train passed without interruption from the Chester and Holyhead Railway,

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

At a recent meeting of the corporation of Derby the Mayor stated that the chair he then had the honour to wear was the one worn by the late Lord Chief Justice of England, and that it had been obtained from Lord Denman by the corporation for all future chief magistrates of the borough. We understand the corporation obtained the chair upon the same terms as it would have been transferred to Lord Campbell, if his Lordship had taken it from his noble predecessor

The Duke of Northumberland, accompanied by Commodore Sir Thomas Herbert and Captain Purdo, R.N., made a survey of the river Tyne, a few days ago, from Newcastle to the Bar, and after remaining at the entrance of the harbour for a considerable space of time, the party returned in the steamer to Newcastle.

About £70,000 has been paid by the government of Spain for the American mail steam-ships *Iberna* and *Caledonia*. Mr. Penn, the eminent Thames engineer, has been engaged at Liverpool in surveying these vessels, with the view of determining their approximate value

On Thursday night week a fire broke out in the mill of Mr. Rogers, Rochdale, supposed to have been occasioned by the heating by friction of one of the shafting in the scratching-room. Nearly £5000 worth of damage was done

Lord Ossulston killed with his own gun, over two brace of pointers, forty-four brace of partridges, one snipe, one rabbit, between the hours of twelve and five o'clock, one day last week, on a farm belonging to the Earl of Tankerville, at Doddington, near Wooler.

Mr. Herbert Watkyn Williams Wynn has been elected, without opposition, as a knight of the shire to serve in Parliament for the county of Montgomery, in the room of the Right Hon. Charles Watkyn Will ams Wynn, deceased.

A medical man at Preston has discovered a method of producing fire without smoke. His plan is called "the atmopyre," or solid gas fire.

The *Newcastle Journal* states that "an experiment is making by the Midland Railway company to carry first-class passengers at a penny per mile, and the second-class at a halfpenny. So far it has proved satisfactory, and if it continues, it will be tried between Derby and Nottingham.

All operations connected with the submarine telegraph between England and France are now suspended till the spring. The interval will be employed in manufacturing the wire cables and other apparatus, so that the electric line may be completed by May.

A Preston contemporary gives an account of a man being gored to death by a bull on its way to an agricultural meeting, and adds, in a tone of congratulation to the inhabitants of Preston, "The beast was sold on Thursday to two of our town butchers, and in all probability his carcass will form part of the beef stock of to-day's market."

Captain Kennedy, of the *Erin-go-bragh* steamer, who saved the *Ocean Queen*, value £5700, from wreck, off the southern coast of Ireland, some time ago, has been awarded the munificent salvage of £30 for his exertions and humanity on the occasion.

The Senate of the United States has refused to strike out of the Naval Appropriation Bill the proviso that flogging in the navy should be no longer inflicted or endured. The Senate have also provided that no ging should cease in commercial as well as naval vessels.

A railway of three miles and a half, at a cost of £50,000, is proposed from Brentford to Wormwood Scrubbs, to unite the South-Western, Great Western, and London and North-Western.

The Vale of Neath and South Wales Brewery liabilities are estimated by Mr. Norris, the official manager, at £128,000.

The accounts from the wine-growing districts of the south of France and elsewhere represent the prospects of a good harvest as being very doubtful The general expectation seems to be that the produce will be under average, as regards quantity and quality

Accounts from Pittsburgh (United States) state, that on the passage of the Fugitive Slave Bill, hundreds of fugitive slaves started off suddenly for Canada, leaving the principal hotels and private residences almost entirely destitute of servants.

The *Emma Eugenia*, hired convict ship, is now at moorings opposite the Royal Arsenal, Woolwich, taking on board female convicts to the number of 170, for conveyance to Hobart Town. She is in charge of Mr. Davies, a master of 1849, with Mr. John Bower, M.D., surgeon of .841.

According to the *Exeter Gazette*, the Rev. G. C. Gorham is seriously ill, at Brampford Speke, and his medical advisers are in constant daily attendance.

The Birmingham committee of the Peel statue have decided on making application to the Commissioners of the Street Act to grant permission for the erection of the statue, when completed, at the junction of the various streets opposite Christ Church, and where the pillar sustaining a gas lamp now stands in that town.

A steam communication is projected between Gallicia, in Austrian Poland, and Dantzic by means of small steamers on the Vistula and the river Saw. The preliminary negotiations have already been made.

Accounts from Mexico to the 24th of August state that the Indians still continue their ravages, but the Commander-in-General of the state of Durango was making great preparations to put an end to their incursions.

The deaths by cholera in the city of Mexico, from May 17 to August 12, were 7810 out of 16,606 cases. The disease has disappeared at Puebla, and is declining at Vera Cruz, but is on the increase at Orizaba.

A vessel arrived at New York on the 30th ult., with seven of the Contoy prisoners, who had been liberated by the Governor-General of Cuba.

The Railway Commissioners have remitted the tax upon excursion trains when they carry passengers at less than 1d per mile.

The call of £120, made by the Master in Chancery Brougham to pay off the liabilities of the Wolverhampton, Chester, and Birkenhead Railway Company, has been paid in full, by the members of the provisional committee.

The Lord Mayor and Lady Mayoress have just issued cards of invitation for a ball, to be given in the Egyptian Hall, on Tuesday, the 29th inst.

The salmon fishing in the Tweed closed on Tuesday last; the season is generally allowed to be the most unfruitful on record.

Mr. Betts, the chairman of the Eastern Counties Railway Company, on Friday week, was riding through his grounds at Preston Hall, near Maidstone, when his horse, a very spirited one, shied He was thrown on the neck of the animal, and the end of his riding whip, which was of the kind used by huntsmen, perforated through his spectacle into his left eye. Several pieces of the glass also got into the eye, all of which the medical gentlemen have not as yet been successful in extracting. Mr. Betts's sufferings are very severe, and it is doubtful whether the eye can be saved.

Thomas Lamb, who was awaiting his trial for an assault upon Mrs. Cannon, of Garth-hall, near Brough, has escaped from Selby Gaol. This he accomplished by picking a hole, making a bold push past some people who stood in his way, and dropping through a window.

The Rev. Dr. Bull, Canon Residentiary of Exeter Cathedral and Prebendary of York, has subscribed the sum of £300, being the amount required to complete the tower of All-hallows Church in Exeter—a beautiful structure, but which had long been a disgrace to the churchmen of Exeter, in consequence of its unfinished state.

A child, at Broomhill, near Sheffield, died on Wednesday week, from eating privet berries

On Thursday week, the Hon. W. E. Duncombe, eldest son of Lord Feversham, had been engaged in a day's hunting in the neighbourhood of Bramby (Yorkshire), and in returning to the residence of his noble parent in the evening the horse on which he was riding suddenly shied, and setting off at full speed, ran near a large tree, and Mr Duncombe was struck on the head with considerable violence by one of the overhanging branches. Several teeth were removed, and other injury on the head resulted from the blow.

As the three o'clock down train from the Bristol and Exeter Railway, on Sunday afternoon, was passing over the line near Rew, a fine fox attempted to cross, was caught by the wheel of the locomotive, and completely gut.otined on the spot.

Sophia Qubbs, an elderly woman, while crossing the railway in South Shields, a short time since, was struck by an engine, and thrown upon her back between the rails, when 33 waggons passed over her without inflicting the slightest injury!

On Saturday night, about eleven o'clock, a destructive fire broke out on the farm of Mr. James Alder, West-end, Esher Engines were procured from Claremont and Esher-place, but, notwithstanding every exertion, no fewer than eleven ricks of wheat, barley, &c., were destroyed. Two large barns and stables were also consumed. Some valuable horses were saved with difficulty Strong suspicions exist that the fire was occasioned by an incendiary. It is stated that Mr. Alder is insured.

It is stated by the *Newcastle Journal* that Mr. Trotter, of Bishop Middleton, has sold his prize bull, "Sussex," to an agent of Baron Rothschild, at a great price. The bull left Ferryhill station yesterday week, *en route* for Germany

The project of the junction of the Strasbourg Railway with the Chemin de Fer du Nord (France) is decided upon. The point of junction will be at La Chapelle. The works are to commence forthwith; and, when these are finished, goods and merchandize will be transferred from one railway to the other without any change of carriage.

The subscription on behalf of the expelled Wesleyan ministers, Messrs. Everett, Dunn, and Griffith, having reached the sum of £3300, each of these gentlemen has been presented with a cheque for £1100. The warfare between the Conference party and the reformers and the Wesleyans t hroughout the connexion continues, and numerous expulsions have taken place at Manchester, Exeter, Newcastle-upon-Tyne, and Bristol.

The import of the foreign grain, wheat, &c., into Liverpool, for the fortnight ending 8th October, 1850, was 193,439 bushels wheat, 189 bags ditto, 69,650 bushels flour, 10,429 bags ditto, 109 bags potato flour, 26,824 bushels Indian corn, 30,776 bushels barley, 30 bags ditto, 19,936 bushels beans, 1880 bushels peas, 5480 bushels oats, 33 bags ditto.

Messrs. Fox and Henderson, the contractors for completing the Cork and Bandon railway, have got the contract for making the wire rope to be used in the inclined plane to be laid down between Dover and Calais for a saloon fare one-fourth commutation.

CHESS.

TO CORRESPONDENTS.

CHESS.—It is not fair to ask us, especially, one with such a crowd of pieces, there is so much confusion, that no writer could work out the diagram fairly.

J Jones.—You have almost succeeded in solving "Who is the study" No 345. Actual mate is not required

ARGUS.—The "Caissa" over a Text Book" can only be got of Longmans, 39, Paternoster Row, price 6s.

J. Newport, Mere.—We shall give the solution of Mr Mayhew's problem in the next No. No 345 is a very easy problem for 3. An illegible word, consists of three or four letters, is wanted to complete the position

BATAVIA.—Your proposed forgiveness is erroneous by three moves. If you put the diagram together, one will standing for the Black squares, and merely give the initials of the men, as W K for White King, B Q R Black Queen, &c.

A CASTLE.—Your solution of problem 346 is right, but you do not find out the best move. Where is the Black man to go?

R W S WATERS.—Thanks for your communication.

S S ROCHESTER.—In the position you ordered in check by a Piece, which, if moved, would cause your own king to be in check.

C. C.—Will it answer as a problem that mate is to be given in six moves, they imply that White is only to make six moves. The other side, of course, would make but five, because he would be forced to do so.

J B—W. Is not your proposed forgiveness erroneous by three moves?

C W R—Try the following—1. K to his 5th 2 K to K 6th; 3. B to Q B 2d. 4 B mates

AN INVALID.—Study the first move in each of Lord—games in the column "Handsome and Elegant Lessons." You can get it at any bookseller through Williams and Norgate, the foreign booksellers. It is not at Simms's, or Ingram's.

R B W.—Your mate by P to Q 4th for the first move, how do you proceed?

G B P. Dundee.—Your problem is received, but not yet examined.

G S.—The first three appear as an Irregular when we are less pressed for room

JUVENIS is thanked for informing us that the contest between Messrs Bird and Lowe has terminated in the defeat of the latter. Mr Bird having come off a winner of seven games to four We were sorry to hear that Mr B is directing his attention to a match, accepting odds from some player of acknowledged skill. In one such struggle he would gain more honour and more improvement, than in fifty contests like his last

JUDY.—We have got no partial, we are ashamed to say, with the alterations and exchanges of our fair friend's pretty diagrams, that we hardly know by which is which. Perhaps she will be good enough to compassionate us, and single out those she has *thoroughly* established, and we will then report on them *seriatim*.

J H S 16 is not allowable to Castle when your King is in check

MORA Problem No 350 cannot be solved as you propose

E E S and C F S are thanked for their selections of recently played games, many of which are well deserving publicity

NEWCOMB CHESS-CLUB.—The best and handsomest boards for club use are Mochi's "Terrace Chess-boards," with the carved oak frame. 2. You will get the new Chessmen at the Polytechnic Institution.

F. of Grahm's Town—They are all correct, including Enigma 610, in *three* moves

M P—You will find an excellent catalogue of Chess authors at the end of Walker's "Art of Chess Play

*** A Scotch Clergyman is desirous of playing a game or match of Chess, by correspondence, against a Clergyman of the Church of England Address to Gamma, 31, King Williamstreet, Strand.

*** Private communications have been forwarded to Herr Anderssen, of Breslau Herr Nathan, of Berlin. Major Jaenisch, of St Petersburgh; and Mr Stanley, of New York.

*** DIEU, THETA, EUTHYPS, and R P L, next week

J H D We fully appreciate, and thank you for your exertions to promote the great meeting in this year Full particulars will be announced in due time

BETA The review in question appeared only in the country edition, all of which was sold off It was reprinted afterwards, however, in the September Number of the *Chess-player's Chronicle* which you can get through your bookseller

A W TYLER, Q to Q B 2, The rest are well and all easily enough

SOLUTIONS of No. 349, by LITTLE KIT, J A, of Hamilton H T P, of Carlisle; J R W, F G W B, A D T, am correct. All others are wrong

SOLUTIONS of No. 350, by J M, of Forres; J S W, JUDY, ST EDMUND, are correct All others are wrong

SOLUTIONS of No. 351, by K, of Yarmouth; J A W, M P, S L K, DERETON, ST EDMUND, are correct All others are wrong.

SOLUTION OF PROBLEM No. 350.

WHITE.	BLACK.	WHITE.	BLACK.
1. R to K 6th (dblech.)	K to Q 3d, or (*a*)	5. R to Q B 6th (disc ch)	Anything
2. B to K 6th (ch)	K to B 3d		
3. Q takes P (ch)	K to B sq	6. Q mates	
4. B takes P	R to Q B 2d (dis ch)		

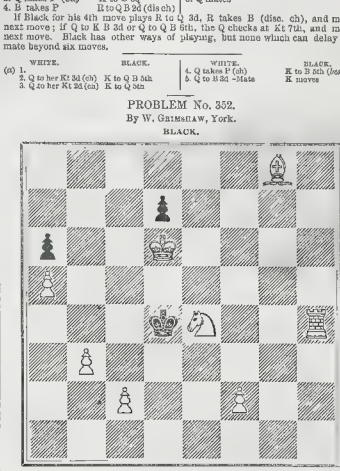
If Black for his 4th move plays R to Q 3d, R takes B (disc. ch), and mates next move; if Q to K B 3d or Q to Q B 6th, the Q checks at K 7th, and mates next move. Black has other ways of playing, but none which can delay the mate beyond six moves.

WHITE.	BLACK.	WHITE.	BLACK.
(*a*) 1.		4. Q takes P (ch)	K to B 5th (best)
2. Q to her Kt 3d (ch)	K to Q B 5th	5. Q to B 3d -Mate	K moves
3. Q to her Kt 2d (ch)	K to Q 6th		

PROBLEM No. 352.

By W. GRIMSHAW, York.

BLACK.



WHITE.

White to move, and checkmate in five moves.

CHESS IN INDIA.

Another game between Mr. Cochrane and the Brahmin, Moheschunder Bonnerjee.

(*King's Kt's opening.*)

BLACK (Moheschunder).	WHITE (Mr. Cochrane).	BLACK (Moheschunder).	WHITE (Mr. Cochrane).
1. P to K 4th	P to K 4th	21. P takes R	P takes B
2. K Kt to B 3d	P to Q 3d (*a*)	22. Kt takes P	B to K B 6th

Black: K at Q 4th, B at Q Kt 5th, Ps at K 4th and Q B 5th.

White, playing first, mates in three moves.

CHURCH OF ST. LAWRENCE, BARTON.

ON Wednesday, the 9th inst, the Lord Bishop of Manchester consecrated his twenty-seventh church (little more than two years having elapsed since his elevation to the see); and, as there are some remarkable circumstances connected with the structure, the following brief account, together with a Sketch of the Church, is offered to the readers of the ILLUSTRATED LONDON NEWS

St. Lawrence Chapel, in Barton, in the parish of Preston, Lancashire, was, to the time of consecration, a strictly private Chapel, or domestic, on the estate of Mr. Jacson, of Barton, and was wholly supported by him, as by his predecessors, for the benefit of the residents on his property and in the adjacent townships, but chiefly in the township of Myerscough, which, being Duchy property, and in the parish of Lancaster, is more than fifteen miles distant from its parish church. The Chapel was in existence before the Reformation, and there are some curious stones connected with its foundation, the mythical character of which identifies their origin with the time of the Crusades. The edifice afterwards underwent many dilapidations and alterations, the last of which happened in 1845, when the late proprietor, George Jacson, Esq., considerably enlarged and put it into a state of complete repair, leaving it, however, at his death in 1846, in the same position as to its privileges as before, on account of difficulties which stood in the way of obtaining a district which he wished to have assigned to it.

These difficulties having been at length overcome, a burial-ground having been annexed, and the requisites for consecration provided, the Oratory was converted into the district church; the private chapel, convertible at the caprice of the owner even to secular purposes, was submitted to the authority of the Bishop; and the edifice hitherto used for Sunday worship only became the centre of parochial ministration for a population of about 1060 souls, most of whom had, up to that day, been dependent for their spiritual wants on the spontaneous benevolence of the neighbouring clergy.

ST. LAWRENCE CHURCH, BARTON.

It so happens that the district assigned embraces the extremities of all the parishes which are to be removed to be effectually served by their mother-churches, and on this respect the consecration of this Church forms an important link in the chain of the church's ministrations in an important district in north Lancashire

The endowment provided for the Church is the interest of £1500, and a tithe rent charge of £50 per annum, together with the pew rents, and arrangements have been made for commencing a parsonage-house. The incumbent is the Rev. Thomas Dodd.

On the left hand of the Church is the cottage of a Memorial School erected to the memory of the late George Jacson, Esq., at the expense of his widow

Both edifices are built of brick, and roughcast. The Chancel is furnished with pews made of the Norway pitch pine—a wood capable of being brought to great beauty by the application of raw linseed oil and varnish. The alterations and enlargement were conducted by Mr. Latham, architect, of Preston. The chancel contains a chaste heraldic window, and at the west end there is a window of ancient glass

The chancel was assigned under the 1st and 2nd Will. 4., c. 38; and C. B. Jacson, Esq., and G. Marston, Esq., are the alternate patrons.

CHURCH, UNIVERSITIES, &c.

CAMBRIDGE.

THE VOLUNTARY THEOLOGICAL.—Upwards of two hundred students are now sitting for the above-mentioned examination, which is conducted by the Regius Professor of Divinity (Professor Jeremie) and the Lady Margaret Professor of Divinity (Professor Blunt). The names of the successful candidates will be published at its conclusion.

CURACY OF SELBY.—The presentation to the Perpetual Curacy of Selby, now vacant, has lapsed to the University, in consequence of the disqualification of the patron, who is a Roman Catholic. The election of a clerk for presentation thereto will consequently take place on Tuesday, the 29th instant, at ten o'clock in the forenoon.

OXFORD ROYAL COMMISSION.—The Commission appointed by the Government to inquire into the state, discipline, and studies of the University of Oxford commenced its sittings in London on Monday. The commissioners are—the Bishop of Norwich (Dr. Hinds); Dr. Lushington, Dean of Carlisle; Dr. Jenner, Master of Pembroke College, Oxford; Mr. Liddell, Head Master of Westminster School; Professor Powell, of Oxford; Mr. Dampier, barrister, and Mr. G. H. S. Johnson, of Oxford. It is announced that many distinguished members of the University will be examined by the commissioners, amongst others, the Right Hon. W. E. Gladstone, M.P.; the Bishop of Oxford, Dr. Pusey, the Head Master of Rugby School (Dr. Goulburn), Mr. Roundell Palmer, M.P., and the Bishop of Chichester.

PREFERMENTS AND APPOINTMENTS.—*Honorary Canonries:* The Rev. George Dugard, in the Cathedral Church of Durham; the Rev. W. Hornby, in the Cathedral Church of Manchester. *Rectories:* The Rev. Richard Henry Foord, to Foxholes, Yorkshire. the Rev. Charles Steers Peel, to Syresham, Northamptonshire; the Rev. John Haynes, to Gaby, Leicestershire; the Rev. J. C. Blumfield, to Launton, Oxon. *Vicarages:* The Rev. G. B. Blenkin, to Beston; the Rev. Thomas Phipps Amtan Champneys, to Owston, Yorkshire; the Rev E. N. Bree, to All Saints, Hereford; the Rev. Thomas Blencowe, to Marston St Lawrance with Warkworth, Northamptonshire; the Rev. W. Spranger White, to St. Just in Penrith, Cornwall.

VACANCIES.—*Rectories:* Earl's Croome, county and diocese Worcester; value £200, with residence; patrons, the representatives of the late rector, the Rev. C. Dunne, deceased. Kirk-Bramwith, county and diocese York; value £517, with residence; patron, Chancellor of the Duchy of Lancaster; Rev. H. W. B Daubeney, deceased.—*Vicarage:* Eldersfield, county and diocese Worcester; value £250; patron, Sir A. Lechmere; Rev. C. Dunne, deceased.

TESTIMONIALS.—The following clergymen have lately received testimonials of affection and esteem:—The Rev. George Meade Gibbs, late Curate of Bere Ferrers, Devon, on his coming on a living; the Rev. C. W. Simons, late Curate of Darlaston, from the communicants; the Rev. J. Fenwick from his present and former scholars, upon his vacating the head mastership of Queen Elizabeth's Grammar School, Ipswich; the Rev. Henry Dike, from the children of the National School, Salisbury; the Rev. William Strong Hore, late Curate of Al. Saints, Norwich, from the parishioners on Monday last; the Rev. G. Hills, incumbent of Great Yarmouth (a silver inkstand), from a few candidates for the late ordination, the Rev. J. M. Ware, on leaving the curacy of St. George's, Birmingham, a beautiful silver pocket communion service

The Convocation of the Bishops and clergy of the province of Canterbury was on Wednesday, the 16th instant, opened by the Archbishop of Canterbury in person. His Grace, accompanied by his registrar, J. H. Dyke, Esq., having attended at Jerusalem Chamber, Westminster Abbey, for that purpose, where her Majesty's Writ of Prorogation, and that of his Grace were read, prorogating the Convocation to Friday, the 15th of November next.

Mr. Stephenson, the engineer, has just examined the eastern and southern valleys of Switzerland, preparatory to forming a railway. He says the Rhône presents the only one that the best line would be one having a tunnel, following the courses of the Orbe, passing by a tunnel through the Mormont at Lutrerwes to the valley of Venoge, and following that valley to the end.

CHURCH OF THE HOLY TRINITY, HAVERSTOCK-HILL, CONSECRATED ON TUESDAY LAST.

CHURCH OF THE HOLY TRINITY,

HARTLAND-ROAD, HAVERSTOCK-HILL.

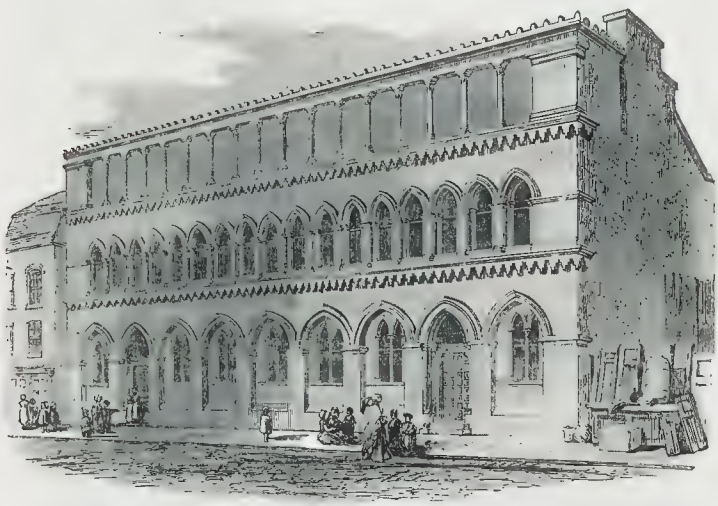
This Church, situated in the parish of St. Pancras, was consecrated on Tuesday last by the Lord Bishop of London, in the presence of a very large assemblage of people. It is situated in the parish of St. Pancras, and is the *third* of the twenty district churches which its present esteemed rector, the Rev. Mr. Dale, hopes to see erected in his present overgrown parish. This Church is constructed to accommodate 1426 persons, of which 856 will be in free and unappropriated seats. The district assigned to it has a population of 10,000 persons (most of whom are poor). The claims of this vast number of persons urged on the earliest possible provision of church and school accommodation. The Vicar (the Rev. David Laing), and a local committee, succeeded in securing contiguous sites, both for Church and Schools, in the very centre of the district. To save time (each day still seeing souls passing into eternity), a contract was at once taken for the School-building, to be immediately raised *in shell*, and used temporarily as a chapel for six hundred persons, whilst the funds were raising for the permanent Church. This was done; the Chapel was speedily filled, and has ever since been used as a temporary church. And now the end seems to be in view; a house of prayer is now consecrated, and ready to receive nearly 7500 souls. The means of sound teaching are prepared for 800 children; and Visiting, Provident, and Maternity Societies have been established; but the Vicar and committee, in order to accomplish these objects, have been obliged to incur a debt, which, after the payment of the grants and subscriptions promised, will not be less than £4000, and for which they have made themselves personally responsible. It is much to be hoped that their fellow Christians will not let them suffer for their zeal.

The Church is dedicated to the "Holy Trinity," and is built with Swanage stone and Bath stone dressings. It is of "middle pointed" character, and consists of a western tower, nave, north and south aisles, chancel, and south porch. The extreme length within the walls is 124 feet, the breadth 66 feet, and the height, to the top of the spire, 160 feet. The Church is of admirable character in design, and the interior is particularly effective. The open roof is stained to imitate oak, as are also the seats, the galleries, &c. These latter are set back from the pillars separating the nave from the aisles, and the general appearance of the nave is thus not interfered with. The chancel, as may be seen by our Illustration, is of charming and novel design, the numerous arches producing, to use an artistic phrase, a pleasing and elegant play of lines. From the great deficiency of funds the fittings are of the simplest character, the pulpit being the one actually used in the school, or temporary church. It is to be hoped, however, that the liberality of individuals will soon enable the committee to replace them by others more suited to the size and importance of the Church. As a commencement, Mr. Gibbs, of Harmood-place, has presented the centre compartment of the five light east window of painted glass, of a rich and appropriate design and in excellent taste. The architects have given the font.

CHANCEL OF TRINITY CHURCH, HAVERSTOCK-HILL.

The organ, placed on one side of the chancel, is of very sweet and powerful tone. It was erected by Messrs. Bevington and Sons, of Greek-street, Soho.

Messrs. Wyatt and Brandon are the architects of this fine Church; and Messrs. T. and W. Piper, the builders. The total outlay, including site and enclosures, will be upwards of £10,000.



ST. MARTIN'S NORTHERN SCHOOLS, CASTLE-STREET, LONG-ACRE, OPENED ON THURSDAY LAST.

ST. MARTIN'S NORTHERN SCHOOLS.

A sermon was preached on Thursday, by the Bishop of London, in St. Martin's Church, for the purpose of inaugurating the St. Martin's Northern Schools. These have been erected in Castle-street, Long-acre; the architect being Mr. James William Wild, and the builders Messrs. Haward and Nixon, at the expense of £2433. The accommodation will include 400 boys and girls, and a large school-room for infants; with master's and mistress's separate residences. There is a covered playground at the top of the building a novel feature, which extends the whole length of it (100 feet). The additional height and colonnade required for the purpose add much to the effect. The Schools are intended to be self-supporting, though hitherto established by funds which have in fact been collected by subscriptions.

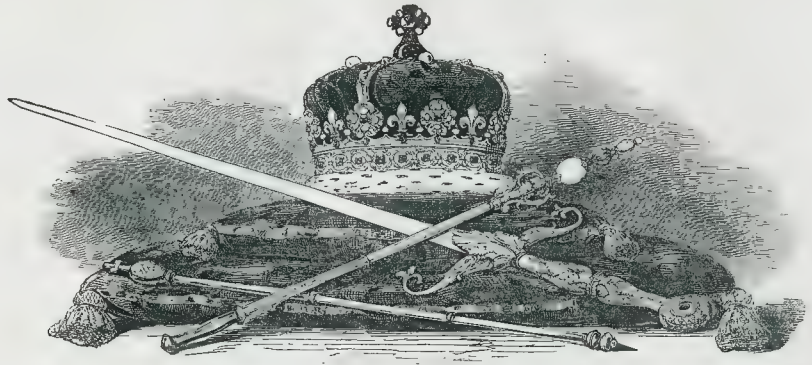
The Bishop of London took for his text on the present occasion Mark x., verse 14:—"Suffer little children to come unto me, and forbid them not, for of such is the kingdom of heaven." The right rev. prelate commenced by observing that those who brought their children to the Saviour to be healed, perhaps also extended their care to their moral welfare; nevertheless, the disciples murmured and incurred the rebuke of their Master, who commanded the children to be brought to him a fact referred to in the baptismal service of the Church. "We act," continued his Grace, "in the spirit of that institution, in providing instruction for the infant mind, and thereby assist sponsors and parents in their duties. It is the province of the Church to deal with man as a spiritual being, responsible to God, and a probationer for eternity. But, unfortunately, the theory and practice of the case do not exactly agree. The province of education, in fact, cannot be restricted. It must combine many things which have no direct reference to religion. But his Lordship considered this an advantage, as interested motives might be brought to bear upon and to aid the great object in view. Long life and riches are equally the results of learning and religion, properly applied—wherefore the former may be used to corroborate the latter. But, on account of the opposition of the natural man, spiritual truths and motives must be the more emphatically enforced—'line upon line, and precept upon precept.' Intellectual cultivation is not alone sufficient—it must be sanctified by the influences of the Gospel. The revolutionists of society are mostly instructed men; but, being without religion, they are only the more degraded on that account. Nevertheless, the wrongs and sorrows of the poor are entitled to redress. Their condition, which makes them the victims of infidelity and treason, demands improvement. Increased exertions on the part of the Church are required, particularly in giving a religious character to education, and this mainly for the purpose of preventing the encroachments of Puritanism on the one hand, and Popery on the other. As to the last, there was great need of diligence; the Pope having recently offered an insult to the Church of England. Protestant education, therefore, should be the aim; an education, however, general in its character, and comprehending whatever it is useful to know and to apply. Man is born the heir of both time and immortality, and secular instruction must accordingly be largely promoted. Nevertheless, it should always be accompanied with Church instruction. Additional churches were needed, as well as additional schools."

The sermon concluded with the advocacy of the cause of the New Northern Schools, and solicited funds in aid of their institution. A wealthy parish, at the West-end of the town, like St. Martin's, should set an example to poorer and less privileged localities.

After the sermon, the children walked in procession to the building, in Castle-street, Long-acre, where a magnificent breakfast awaited the subscribers, in order to inaugurate the Schools. In the absence of the Bishop of London, who was compelled to retire from indisposition, the Rev. Henry Mackenzie presided, who announced subscriptions received from her Majesty and Prince Albert, Baroness Wood and Parndon, and from the Duke of Northumberland, of £[illegible]. After descanting upon the example of domestic virtue in the high places of the land, set by her Majesty, Mr. Mackenzie proposed the health of the Queen. In proposing that of the Bishop of the diocese, Mr. Mackenzie, authorized by the Bishop's sermon, ventured a digression on the conduct of the Pope, in appointing an Archbishop of Westminster, and censured much the unseemly interference of a foreign potentate; nay, what he would call the insolent presumption of a foreign bishop. The crown in this country was the fountain of honour, both ecclesiastical and political, and not the Vatican. In the words of our great bard, he would say, that "No Italian priest should tithe or toll in our dominions." Latimer's candle still burned in undiminished radiance throughout England. The heart of England was still sound, and beat in behalf of Church and State united.

In the course of the toasts and the speeches, it was remarked that the founding and first establishment of the schools was due to the Rev. Sir Henry R. Dukinfield, Bart., the late vicar of the parish.

Sir Henry replied in an appropriate speech. The health of the churchwardens having been given with others, including that of William Cotton, Esq., late Governor of the Bank of England, the meeting separated. The company amounted to about 250 persons.



REGALIA OF SCOTLAND: CROWN SCEPTRE, SWORD, AND LORD TREASURER'S ROD.

REGALIA OF SCOTLAND—HOLYROOD PALACE AND ABBEY.

JEWEL OF ST. ANDREW.

During our Artist's recent visit to Edinburgh, he availed himself of the opportunity of inspecting the Regalia of Scotland, with the object of presenting to our readers a correct illustration of these very interesting "symbols of the ancient Independence of Scotland." They are kept in the "Crown Room" in the Castle at Edinburgh, immediately under the square tower, where they were deposited in 1707. Here they were long hidden from view, and were, indeed, suspected to have been conveyed away. The circumstances of their being again brought to light are thus detailed in Mr. Grant's very interesting "Memorials of the Castle of Edinburgh," recently published:—

"A semi-octagon tower, of considerable height, gives access to the dark and vaulted room where the Scottish Regalia were so long hidden from view. By a letter from Duncan Forbes of Culloden, printed so early as 1747, there appears to have existed a tradition, that several records of parliament lay in the Castle, locked up in the room where the Crown was deposited at the Union; and on the 5th November, 1794, it was opened by the Lieutenant-Governor, and other commissioners, warranted to search for these documents. The room was dark, and filled with foul air; the dust of nearly a century lay on the floor, and on the old oak chest with its ponderous locks; the ashes of the last fire still remained in the rusty grate, and the place seemed grim and desolate.

"Major Drummond, an officer on duty, repeatedly shook the chest, which the Commissioners supposed to be empty; for there was a belief abroad that the Government, by a wicked policy, had destroyed its contents. Upon it lay a box lined with velvet, which was supposed to have held the crown. The lid had been wrenched off by violence, and carelessly thrown to the other end of the apartment, where it lay among the thick dust. The Commissioners, who had no authority to proceed further, retired, and again the Regalia were consigned to oblivion.

"Now, they are exhibited daily to visitors, who average nearly four thousand weekly, during the summer months. The room was greatly improved in 1848, when the ceiling was groined with massive oak panelling, having shields in bold relief. Enclosed by an iron cage, and shown by four dim sepulchral lamps, the crown, sword, and sceptre are laid on a white marble table, together with four other memorials of the House of Stuart—the jewels of the venerable Cardinal York, which were deposited there in 1830, by order of William IV. These are the golden collar of the Garter, presented by Elizabeth to James VI., with its appendage the George; the order of St. Andrew, cut on an onyx, set with diamonds, and having on the reverse the badge of the thistle, which opens with a secret spring, revealing a beautiful miniature of Anne of Denmark; and, lastly, the ancient ruby ring studded with diamonds, and worn by the ancient Scottish kings at their coronation. It was last placed on the finger of the unhappy Charles I., and, after all its wanderings with his descendants, is now in its old receptacle with

> 'The other insegnyes,
> That fell to Kings on onywise,
> Both *sceptre, sword*, and *ring*.—*Wintoun's Cronikil*.'

We add a few additional details:—

"The form of the crown is remarkably elegant. The lower part consists of two circles, the undermost much broader than that which rises over it: both are composed of the purest gold, and the uppermost is surmounted or relieved by a range of *fleurs-de-lis*, interchanged with *crosses fleurées*, and with knobs or pinnacles of gold, topped with large pearls, which produces a very rich effect. The under and broader circle is adorned with twenty-two precious stones, betwixt each of which is interposed an oriental pearl: the stones are topazes, amethysts, emeralds, rubies, and jacinths: they are not polished by the lapidary, or cut into facets, according to the more modern fashion, but are set plain, in the ancient style of jeweller's work. The smaller circle, which surmounts this under one, is adorned with small diamonds and sapphires alternately, and its upper verge terminates in the range of the crosses, *fleurs-de-lis*, and knobs topped with pearls, which we have described. These two circles, thus ornamented, seem to have formed the original Diadem or Crown of Scotland, until the reign of James V., who added two imperial arches, rising from the circle and crossing each other, and closing at the top in a mound of gold, which again is surmounted by a large cross *pâtée*, ornamented with pearls, and bearing the characters of J. R. V. These additional arches are attached to the original Crown by tacks of gold, and there is some inferiority in the quality of the metal.

"The bonnet or tiara worn under the Crown was anciently of purple, but is now of crimson velvet, turned up with ermine—a change first adopted in the year 1695. The tiara is adorned with four superb pearls set in gold, and fastened in the velvet, which appears between the arches. The Crown measures about nine inches in diameter, twenty-seven inches in circumference, and about six inches and a half in height from the bottom of the lower circle to the top of the cross. The whole appearance of this ancient type of sovereignty does great credit to the skill and taste of the age in which it was formed.

"At the same time that he altered the form of the Crown, James V. caused the present Sceptre to be made. It is a slender and elegant rod of silver, about thirty-nine inches in length, the stalk being of a hexagon form, divided by three ornamental rings, and surrounded by an antique capital of embossed leaves, supporting three small figures, representing the Virgin Mary, Saint Andrew, and Saint James. The ornamented niches, in which these small figures are placed, are again surmounted by a crystal globe of two inches and a quarter in diameter, and yet again by a small oval globe topped with an oriental pearl. Under the figures are placed the characters 'J. R. V.' It is probable that James V. had the sceptre made, as well as the crown altered, when he was in France, in 1536; at least the workmanship greatly excels what we should have expected in Scotland during that period.

"The Sword of State had been presented a good many years before to James IV. of Scotland, by Pope Julius II., along with a purple hat, flowered with gold. The workmanship of the sword is of a fanciful and elegant description, resembling the style of Benvenuto Cellini, and belongs to the period when the art of sculpture was reviving in Rome. The whole sword is about five feet long, of which the handle and pummel occupy fifteen inches. They are formed of silver gilded, highly carved and ornamented. The cross of the sword is represented by two dolphins, whose heads join at the handle. The scabbard is of a crimson velvet, covered with filigree work and silver; the prevailing ornament being oak-leaves and acorns, which was the emblem of Julius II."

THE GEORGE.

HOLYROOD.

The accompanying View shows a portion of the Palace, with some fine remains of the Abbey buildings; these are the north side, and the principal entrance to the Church, with one of the towns, at the western extremity.

Holyrood Abbey was founded in 1128, by David II. In 1332, it was completely plundered by the army of Edward III., and in 1335 burnt by that of Richard II. But the greatest destruction took place in 1544, during the naval irruption of the Earl of Hertford, when the choir and transept of the Church were entirely demolished, and nothing was left standing but the nave, the portion which now exists as a ruin.

At the Reformation, the church was stripped of its ornaments, and converted into the parish church of the Canongate. On the restoration, however, it underwent a thorough repair, and was set apart as a chapel Royal. A throne was erected for the Sovereign, and twelve stalls for the Knights of the Order of the Thistle; the floor was paved with marble, and an organ put up. In the brief reign of James VII., mass was celebrated in it, to the no small indignation of the people; and immediately on the abdication of that Monarch, the populace again demolished this remnant of the hated religion, by reducing the chapel to ruins.

It remained in a neglected state till 1758, when the attention of the Barons of Exchequer was directed to it by the Duke of Hamilton, the Hereditary Keeper of the Palace. A sum was granted to renew the roof, and otherwise repair the chapel; but, from an error of judgment of the architect, large heavy flag-stones were put upon the roof; the consequence of which was, that, in ten years afterwards, the roof fell in, and brought down large portions of the walls and pillars. The rubbish, containing much of the ornamental work, was afterwards cleared away; but the chapel has been allowed to remain in a ruinous state to the present time.

The ruin, as already stated, formed the nave of the original church, and is 148 feet in length by 66 feet in breadth. The style is of the middle period of Gothic

PART OF HOLYROOD PALACE AND ABBEY.

architecture; and this remaining portion affords sufficient proof that, when entire, the church must have been a magnificent structure. In the south-east corner of the nave is the Royal vault, where were buried David II., James II., James V., and Henry Lord Darnley.

The precincts of this abbey and the King's Park, first inclosed by James V., still retain the ancient privilege of being a sanctuary for insolvent debtors. The Bailie of Holyrood is appointed by commission from the Duke of Hamilton, and the protection of the sanctuary is obtained by petition to this functionary, and the payment of £2 2s. in name of fees. The average annual number who avail themselves of this privilege for the ten years previous to 1834, was 55. The boundaries comprise the king's Park, Salisbury Crags, and the greater part of Arthur's Seat.

In our account of her Majesty's recent visit to Holyrood Palace, we omitted to state that the whole of the alterations at Holyrood have been carried out under the superintendence of Mr. R. Matheson, chief officer of H.M. Woods and Works in Scotland; Mr. D. R. Hay being the decorative artist, and Mr. Trotter the upholsterer to her Majesty.

MUSIC.

THE GRAND NATIONAL CONCERTS

The largest assemblage ever collected within the walls of Her Majesty's Theatre was that of Tuesday night, at the opening entertainment of the "Grand National Concerts." It was stated that upwards of 2000 paid to the "Promenade" alone; and, making an allowance for the remainder of the audience in the private boxes, box and gallery stalls, and the gallery, there could not have been less than 3000 persons in the theatre. The classification of the seats is suggestive of some remarks, as the present arrangement is singularly defective, and is calculated to lead to much imposition. The general organisation of the house is the same, as regards the stage and pit, as that at Jullien's Promenade Concerts, that is to say, the pit is boarded over for a considerable distance, and, gradually rising, arrives from the pit towards the back of the stage; but, instead of being a level from the *façade* of the boxes to the rear of the stage, the pit platform has been raised at such an acute angle as completely to shut out the occupants of the pit boxes from a view of the orchestra, the heads, or rather hats, of the dense mass of standing visitors being elevated nearly to the central compartment of the grand tier. Nor is this the only inconvenience. On each side of the orchestra there is a flight of steps leading to the stage, and the struggles of two opposing streams at these staircases caused much confusion. The barrier at the back of the two pit staircases was also the scene of frequent strife, which, it was said, on the part of a body of the police to prevent any persons from the pit passing to the boxes on the night operated in a safety valve, for if there had been more room, the belligerents might have done more damage to themselves. The way to and fro in the pit was crowded to a multitude in the promenade, during the singing of the National Anthem, between the parts, was a strange scene—an admixture of ruffianism and good humour, perhaps to witness in any other country, but which, in the last act of self-government in the popular assemblages, is attended only with crushing and squeezing. Leaving the promenade, and ascending the box stairs, the individual dissatisfaction of seat was here referred to. In the second tier, the first and great tier of boxes are retained as in the opera season, and the extreme private boxes on the upper tiers; on the "one and two pair and half circle," the private boxes, with their yellow draperies, have been entirely removed, and rows of benches, as a crescent, put in their room; the private boxes or places of any kind for the amateur who has not previously engaged a stall; and the *employés*, at their pleasure and profit, can exclude every person who has not a voucher. To those who are present on the evening's performance, this novel and peculiar exclusion from any seat in the house was, of course, a most serious inconvenience, and their disagreeable position was not relieved by the arbitrary of the stallan keeper in constantly changing the number of stall in office, the politest of the functionaries of Her Majesty's Theatre, and to him, and not to the foresight and attention of the "Executive Committee, Directors, and Managers," were the journals indebted for any kind of accommodation "not certainly, the best calculated for the due performance of their duties; but, of all events, preferable to being compelled to "go to the promenade," as kindly told by the surly stall-keepers.

The decorative portion of the house, if not exhibiting the highest and most costly school of art, was showy. Over the stage were the vast pink and white striped folds of a tent; against the background of which were suspended tinsel pieces of crowns, the rose, thistle, shamrock, and fleur-de-lis, for the Prince of Wales. Over the stands for refreshments were mirrors, and, here and there, antique casts. The embroidered gauze curtains, in imitation of lace, over the pink calico draperies, with festoons, forming the new hangings of the boxes, rendered the aspect of the house sufficiently light and pretty, the eye being subjected to no fatigue from over elaboration or ingenuity of design, or ultra refinement of taste.

As regards the programme and its performance, if judged by the pledges of the prospectus, neither one nor the other would stand the test of adverse criticism; but, if this entertainment had been given without preparatory flourishes, it might pass muster, as amusing, if not intellectual, and as indicative of a mixed species of musical excitement, being neither "fish, flesh, nor fowl" in individuality. The scheme was clearly not classical—nor was it a *sorte demanstic*. The whole is rendered up to the public as a jollification, and, therefore, the "monumental productions" having the slightest possible proportion in the concoction. Whether this kind of programme be really the "great national requirement," the public will not decide; we protest against the assumption that there is not a really musical public prepared for the highest order of composition and the more refined style of executive skill. We appeal to the manner of the audience during the performance of the first and last movement of Beethoven's pianoforte concerto in E flat, by M. Charles Hallé—to the breathless silence during the superb performance of Sainton of his new violin fantasia—to the rapturous encore on the "Pilgrim's Chorus" in the overture of Rossini, and to the enthusiastic encores awarded to Mdlle. Angri in her two airs from Rossini's "Semiramide" and Meyerbeer's "Huguenots," as undeniable evidence of the taste and discrimination of the multitude. The public, no "public" displayed any lack of intelligent appreciation of certain vocal and instrumental displays of mediocrity in Tuesday's programme? This cry of a want of taste and knowledge on the part of the "sibilling" amateurs, is most absurd and unjust; and, even if it were founded, is it not due to the public that executive committee, directors, and managers," who have announced themselves as the promoters of high art, to educate and enlighten the public by presenting them with really intellectual entertainments? Where was the noble orchestra as that engaged at the Grand National Concerts, a low purpose should be exhibited, and the parts of the programme properly classified. Let us have, in the first act, the symphonic compositions of the great masters, with the classical violin and pianoforte concertos, and the dramatic overtures; and then, for the second part, the specimens of the lighter operatic, ballet, and dance schools would be really acceptable. And in dance music, there should be introduced the rich and varied compositions of Strauss and Lanner, of whom so little is known in this country.

Besides the pieces we have referred to above, there was a MS. overture, by Balfe. The subject, an Irish air, was treated by the composer with a vivid impression of the Weberian forms; but the whole seemed to want individuality and power, leaving no definite impression on the mind beyond that of certain research for the mere display of the skill of the writer. In Signor Negri's operatic selection from Donizetti's "Figlia del Reggimento," there was occasion to admire an exquisite violin solo of Molique the delightful Scottish melodies of Bagnani; and the surprising execution, but rather coarse tone, of Arban, on the cornet-à-piston. Mr. Richardson's flute solo (Drouet's variations in "Rule Britannia") was another singularly weak display of mere mechanism in passage playing. Halfd played Liszt's "Lucia" fantasia in the second part; but he was more at home in the classical than in the romantic school of playing, wanting the Thalberg and Liszt powers of dramatic expression for the latter.

Since the above was penned there have been three concerts, but the scheme exhibits no material change in the character of the selections. Beethoven's "Eroica" symphony was played on Wednesday, at the opening and at the end of the first part, the movements being interrupted by gleaming of all kinds. Master Henrich Werner, the pianist prodigy, has made his *début* in Liszt's "Norma" fantasia; Mr Cooper has played Mendelssohn's violin concerto; Mr. Gustavus Geary, the Irish tenor, and Madame Bascecourt, the Italian *prima donna*, have sung; but we must postpone our notice of these *artistes* until next week.

THE GRAND BOSTON ORGAN

A performance on the grand organ, built by Gray and Davison for the Centenary Chapel, at Boston, Lincolnshire, by Mr. George Cooper, deputy-organist of St. Paul's and the Chapel Royal, and organist of St. Sepulchre and Christ's Hospital, took place last Monday evening, at the organ manufactory in the New-road. As is usual on such occasions, the factory was filled with well-known professors and amateurs.

The new instrument is one of the largest in this country. There are 49 stops and 2490 pipes; in the colossal Birmingham organ there are 4962 pipes and 78 stops: so that the Boston organ may claim a position after the leviathan of instruments. The dimensions of the case are—height 36½, 23 feet wide, and 16 feet deep. There are two bellows—one for the manuals, the other for the pedal organ; and four compression pedals for changing the stops; also, the new sforzando pedal, by these manuals. Great Organ: Double open diapason 16ft., open diapason 8 feet, stopped diapason 8 feet, quint C, octave 4, flute 4, octave quint 3, super-octave 2, fifteenth 2, sesquialtra 3 ranks, furniture 3 ranks, posaune 8 feet, and clarion 4 feet. Choir Organ: Open diapason 8 feet, gamba 8 feet, keraulophon (this stop was introduced for the first time in the great organ of St. Paul's Church, Knightsbridge, by Gray and Davison) 8 feet, stopped diapason bass 8 feet, clarionet flute 8 feet, octave 4 feet, flute 4 feet, gemshorn 4 feet, super-octave 2 feet, fifteenth 2 feet, sesquialtra 3 ranks, and corno di bassetto 8 feet. Swell Organ: Bourdon 16 feet, open diapason 8 feet, stopped diapason 8 feet, octave 4 feet, super-octave 2 feet, sesquialtre 3 ranks, contra fagotto 16 feet, cornopean 8 feet, oboe 8 feet, and clarion 4 feet. Couplers: Swell to great manuals, choir to great manuals, swell manual to pedals, great manual to pedals, choir manual to pedals and sforzando.

Mr. G. Cooper's selections and playing were eminently calculated to develop the varied powers of the new organ, and the general impression was, that a remarkably fine-toned instrument, equal and brilliant throughout its register, will be the future boast of Boston. Mr. G. Cooper played two preludes and two fugues, by J. S. Bach; Handel's choruses, "Fixed is his everlasting seat" and "He rebuked the Red Sea," an adagio and largheito, from Kalkwoda's First and Second Symphonies; Hummel's gradnale, "Quod in orbe;" the air of *Polyphemus*, from Handel's "Acis and Galatea," "Oh, rudder than the cherry;" a MS. aria, by Mozart; and Mr. C. E. Horsley's air, "The Lord is my Shepherd," from his oratorio "David." The style of the performer was shown off in the most advantageous manner the numerous solo stops, and he accomplished his task with great tact and taste. His pedal-playing is remarkable for clearness and precision. The chorus "Fixed is his everlasting seat" was entered the *sforzando* stop being well exhibited in this chorus, as in Hummel's gradnale. The contra fagotto, in Mr. Horsley's graceful and melodious air, and the deep pedal trombone, in Ile air "Oh, rudder," were also much admired.

MUSICAL EVENTS.—The Italian Opera, in Paris, will be opened early in November, under the direction of Mr. Lumley and M. Leconte, with Bellini's "Sonnambula" and Donizetti's "Elisire sustained by Grisi, Sontag and Signor Calzolari.——M. Charlot, the pupil of Carafa and Zimmerman, has gained the first grand prize for composition at the "Académie des Beaux Arts."——There are to be new operas to be produced at the Grand Opera in Paris—the five act work of Auber, "L'Enfant Prodigue," Rosenhan's "Demon de la Nuit," and M. Gounod's "Sappho," for Madame Viardot. M. Gounod is as yet, unknown; but was a pupil of Reicha, Lesueur, and Halévy. At the age of nineteen he won the second grand prize at the Conservatoire; and at twenty-one (1839), the first grand prize. Subsequently he studied in Italy and Germany.——The concerts of the Paris Philharmonic Society, under Berlioz's direction, will recommence on the 22d instant.——Scribe and Halévy's new opera, "La Dame de Pique," is in rehearsal at the Opéra Comique.——Mr. Carte, the flautist, gave a concert as the theatre Royal Newcastle-on-Tyne, on the 10th instant, at which Miss Catherine Hayes, Madame Macfarren, Signor Bordas, and Herr Formes sang, with Lavenu as conductor.——On the 17th and 18th inst., at the Music Hall, in Edinburgh. Mr. Wood gave two concerts, with Miss Dolby, Miss Messent, Miss Saltonstall, Signor Bordas, Herr Formes, Mr. Carte, and Mr. Lavenu as the *Artistes*. On Tuesday, the same party were at Lancaster, on Wednesday at Nottingham, Thursday at Newcastle-under-Lyme, and yesterday (the 18th) at Wolverhampton.——Miss Lucombe and Mr. Sims Reeves have been singing with great success in the northern provincial towns.——Mr. W. Brandon gave an evening concert last Saturday, at the Royal Polytechnic Institution, to afford pupils an opportunity of singing in public.——The second of the cheap and excellent Monday Evening Musical Entertainments took place at the National Hall, Holborn, last Monday night: the performers were Mr. Sample, Miss Felton, Mrs. W. Wilson, Messrs. W. Wilson, Genge, G. Ford, F. Smith, and William Isaac.——Miss Lizzy Stuart gave an evening concert at the Manor House, Hackney, last Tuesday night, assisted by Mrs. A. Newton, Mr. Bridge Frodsham, and Mr. F. Smith; Miss Julia Wood (piano), and Master John Ward (concertina).

THE THEATRES.

HAYMARKET

This theatre re-opened on Monday, with its regular company, "The Serious Family" being the piece for inaugurating the season. Mr. Webster was honoured with the vehement cheering of a numerous audience. The house has been cleaned, re-gilded, and re-papered, and in relation to her Majesty's box somewhat altered, which was formerly on a level with the dress-circle. The ante-room, too, has been entirely re-constructed and re-decorated. Light Pompeian pilasters, forming panels all round, support wreaths of flowers, trailing over a pencil of blue mirrors let into the walls. Each panel contains a view of some scene associated with her Majesty's history—Windsor Castle, Osborne House, Prince Albert's residence at Saxe-Gotha, are among the number. A ceiling of Pompeian blue, enriched with bands of different plumage, surmounts the whole. The pattern is repeated in the box, an oval wreath of flowers adorning the centre. These decorations have been executed by Mr. Sang, but projected, it is stated, by Mr. Webster.

OLYMPIC.

"My Wife's Daughter" is the title of a new comedy, in two acts, by Mr. Stirling Coyne, produced on Monday. It is a translation from the French, but is executed with a freedom which impresses it with the stamp of English manners. "La Femme de Quarante Ans" is the title of the French piece, and the lady of forty is Mrs. Compton of the Olympic, who is married and secretly wedded to a young husband, she is desirous of keeping from his observation her daughter *Clara*, whom, though seventeen, she still maintains at boarding-school. But the last runs away, and finds a protector in the very person of her mother's husband; who, also, previously, had been solicited by some old acquaintance to gain her parent's consent to the girl's marriage with a college chum. This is a matter to be delicately managed; and *Clara* is accordingly concealed in the Hermitage. The mystification is excited by the circumstance, and the lady of forty becomes jealous. All, however, is cleared up, when the daughter appears instead of the rival. The lady was most artistically interpreted by Mrs. Warren, who performed an old man with a young wife, and Mr. Compton a supercilious valet. The house was well attended, and the comedy proved decidedly successful.

SADLER'S WELLS

Miss Lyons, who lately performed *Juliet* at the Olympic, appeared here for the first time on Monday in *Desdemona*. Her performance was marked with the characteristics of her previous efforts. We think, but it was not to-day interesting and engaging. The youthful innocence of her appearance was of itself a charm that created much sympathy.

PRINCESS'.

On Wednesday, the performances at this theatre were varied with that of "The Wife's Secret."

LYCEUM

This most elegant of the metropolitan theatres re-opened for the season on Wednesday, with two new pieces, and a revival. Both the former seem to be adaptations from the French—one by Mr. Morris Barnett, and the other by Planché. "Serve Him Right" was the title of the first. The hero, a *Mr. Bellamy* (Mr. C. Mathews), flourishes both as a bachelor and a married man. An act is devoted to him in either capacity. While single he conceives a passion for the wife of another, and thus inspired, performs romantic acts of generosity, which his friend, *Mr. Greenfinch* (Mr. Roxby), ascribes to the purest motives. His eyes are somewhat opened by *Bellamy's* boasting of his spirit of intrigue, and the ingenuous devices by which he had conveyed his *billets d'assignation* to the fair objects of his admiration. *Greenfinch* hopes. In the ardour of conversation, that retributive justice may overtake *Bellamy* when married, and that he may then feel the jealousy which he now causes to others. And so it happens. To escape from the suspicion of having attempted the virtue of *Mrs. Shuttleworth* (Mrs Kenwarthy), *Bellamy* is compelled to accept the hand of *Julia*, her sister. As a married man, he becomes the victim of innumerable annoyances, which he brings into Court by cards and books for documentary proofs. A boor, who comes sneaking after the housekeeper, is the source of infinite misunderstanding and amusement. The curtain fell with great applause.

The second piece is entitled "My Heart's Idol." The hero here is also entrapped into a marriage through his libertine propensities. But he deserts his wife immediately after the honeymoon, and becomes a lieutenant in the Empire of Austria. He is, however, pursued to Amsterdam by his wife and her friend, who brings about a reconciliation, as she had formerly brought about the marriage. In this piece, Mr. Mathews had important parts; in this, however, Mr. G. Vining was the principal.

The burlesque of "Olympic Devils" closed the amusements of the evening. The house was thoroughly filled, and the performances went off with great spirit.

SURREY.

A new nautical piece has been produced here, entitled "Love's Anchor;" and, as a melodrama of its class, is not without merit. Its success appears to have placed the legitimate drama on the shelf again.

The will of Mrs. William Clifford has been proved in Doctors' Commons, and by it that lady bequeaths to her daughter, Miss Harrison (late Miss Ellen Clifford), wife of the well-known tenor singer, the interest of all her property for life, and at her decease the principal to be equally divided between the three children of Mrs. Harrison.

THE CITIES OF LONDON AND PARIS COMPARED.—The report of M. Darcy, divisional inspector of the Ponts et Chaussées, who has been to England to obtain information relative to the macadamized roads, has just been published. In this work we find the following particulars relative to the population, extent of the streets, &c., in Paris and London:—The total surface of London is 210,000,000 of square metres; its population, 1,924,000; number of houses, 360,000; extent of streets, 1,296,000 metres; extent of the streets, not including the foot pavement, 6,000,000 mètres; extent of the sewers, 639,000 mètres. The total surface of Paris is 84,379,016 square metres; population, 1,053,878; number of houses, 30,000; extent of streets, 485,000 metres; surface of the streets, exclusive of the foot pavement, 3,600,000 square metres; length of the sewers, 135,000 metres; surface of the foot-pavement, 883,000 metres. Thus, in London, every inhabitant corresponds to a surface of 100 metres; in Paris, to a surface of 80 metres. In London each person for each house is 74; at Paris, 34. At London, the average length for each house corresponds to 40 metres 40 centimetres; at Paris to length of street of 16 metres. These details establish a very great difference between the two cities, from which it appears that there is in London a great extent of surface not built over; that the houses are not very high, and that almost every family has its own. The two-thirds of Paris is the part where the greatest traffic takes place, and the following are the results of the observations of M. Darcy on the subject:—On the Boulevard des Capucines there pass every twenty-four hours 5070 horses drawing carriages; Boulevard des Italiens, 10,780; Boulevard Poissonnière, 7720; Boulevard St. Denis, 9609; Boulevard des Filles du Calvaire, 5858, general average of the above, 8600. Rue des Faubourg St. Antoine, 4360; Avenue des Champs Elysées, 6939. At London, in Pall Mall, opposite Her Majesty's Theatre, there pass at least 800 carriages every hour. On London-bridge not less than 13,000 every hour. On Westminster-bridge the annual traffic amounts to not less than 8,000,000 horses. By this it will be seen that the traffic in Paris does not come up to one-half of what it is in the macadamized streets of London.

SONGS AND HYMNS OF LIFE. No. I.

A TRAVELLER through a dusty road
Strewed acorns on the lea,
And one took root, and sprouted up,
And grew into a tree.
Love sought its shade at evening time,
To hear the its early vows,
And Age was pleased, in heats of noon,
To bask beneath its boughs:
The dormouse lov'd its dangling twigs,
The birds sweet music bore,
It stood a glory in its place,
A blessing evermore!

A little spot had it to stay
And it grew and grew,
A passing stranger scoop'd a well,
Where weary men might turn;
He wall'd it in, and hung with care
A ladle at the brink—
He thought he ought of the deed he did,
But jung'd that toll might drink,
He passed again—and lo! the well,
By summers never dried,
Had cooled ten thousand parching tongues,
And saved a life beside!

A dreamer dropp'd a random thought;
'Twas old, and yet was new—
A simple fancy of the brain,
But strong in being true;
It shone upon a genial mind,
And lo! its light became
A lamp of life, a beacon ray,
A monitory flame.
The thought was small—its issue great:
A watch fire on the hill,
It sheds its radiance far adown,
And cheers the valley still!

A nameless man, amid a crowd
That throng'd the daily mart,
Let fall a word of Hope and Love,
Unstudied, from the heart;
A whisper on the tumult thrown—
A transitory breath—
It raised a brother from the dust,
It saved a soul from death.
O germ! O fount! O word of love!
O thought at random cast!
Ye were but little at the first,
But mighty at the last!

CHARLES MACKAY.

THE EXHIBITION OF 1851.

THE CATALOGUE.—In consequence of the returns pouring in so fast from the various local committees in town and country, the executive have determined on beginning at once to compile their catalogue forthwith; and, as the returns are received, they are copied, referred to their appropriate department, and entered accordingly. By this means all the confusion will be avoided which would necessarily have arisen from the attempt to catalogue the vast mass of articles, after the decision of the Royal Commissioners on the matter of selection, as the task will be comparatively easy to expunge the rejected articles. A large and elegant model of the Exhibition building, in wood and pasteboard, has been provided, for the convenience of the executive committees, in assigning their places to the various articles. It is divided everywhere into squares of about an inch, which represent a space of eight feet in the building, and as the various articles are allotted to the several parts of the building, the spaces representing those parts will be filled up in the model; for this purpose the roof of the model is left uncovered, and it will thus be seen at a glance what is the amount of space which the committee have at any time at their disposal. Up to the 1st of October, demands for space had been received from 131 local committees, and the returns from the same bodies showed that 2019 persons proposed to become exhibitors. Of the applications for space, there were 51 in respect of articles comprised in section 1, "raw materials and produce," 96 in section 2, "machinery," 87 in section 3, "manufactures;" and 50 in section 4, "sculpture, models and the plastic art." From the rate at which the returns continue to be received, there is little doubt that the number of proposing exhibitors will be swelled to 4000 by the end of the month. In every case, the local committees have required an estimate of the space likely to be occupied to accompany the notification of each article; and the Executive Committee are thus enabled to judge, not only of the total amount of space which will be demanded, but also of the relative bulk of each department of the Exhibition. Judging from the returns hitherto received, it is evident that manufactures will occupy by far the largest space—about two-thirds of the whole; manufactured articles are next in bulk, but do not cover more than half the space which has been claimed for machinery; while the other two sections, viz., raw materials and the fine arts, are each comprised within comparatively small dimensions.

PROTECTION AGAINST PIRACY AT THE EXHIBITION. The question of affording protection from piracy to the exhibitors of articles has recently been much pressed on the attention of the Royal Commissioners. Owing to the unsatisfactory state in which the law was left by the abortive attempt at legislation at last session, many manufacturers are almost afraid sending to the Exhibition the most recent products of their skill and ingenuity, for which they have not yet obtained patents; and representations have been received from a great number of local committees, urging the Commissioners to take some steps whereby an adequate protection may be obtained either by application to the Privy Council, or by obtaining a short act of Parliament as soon as the Legislature assembles. It is generally thought that the latter course will have to be resorted to.

MEMORANDUM ON THE DECORATIONS FOR THE BUILDING. Several applications have already been made by intending exhibitors to the Executive Committee on the privilege of displaying carpets, paperhangers' works, floorings, ceilings, and other similar objects in preparation for the Exhibition, as parts of the decorations of the building. The arrangements are now sufficiently matured to enable the Executive Committee to give the necessary information to parties who seek this privilege, and generally to consider any proposals of this kind which exhibitors may be desirous of submitting to them. The Executive Committee will be prepared, from time to time, make known the progress of the works, and the class of decorations for which they will be prepared to grant the privilege of adaptation. At the present time, the Executive Committee beg leave to announce that they are prepared to receive offers from any intending exhibitors, whether native or foreign, for the decoration of their allotted spaces, and interior iron railings, ornamental fountains, decorative works in scagliola, coloured cements, and other materials for walls, &c. Wood carvers, modellers, decorators, &c., capable of executing ornamental pendentives, ceilings, either in wood-work, plaster, papier-maché, or flat coloured decoration, are informed that, generally speaking, the spaces to be appropriated to ceilings will be surfaces of 24 feet square, or 576 superficial feet, which will be seen at a station of about 19 feet from the ground. The spaces which may be filled with scagliola, cement, and other wall decorations, will be 14 feet high, with semicircular heads, and 8 feet wide. The height, width, and nature of the ornamental fountains proposed for exhibition should be specified by the parties wishing to send them. Parties wishing to exhibit decorated railings may obtain the necessary information on applying to the Executive Committee. Any spaces allotted to exhibitors for these classes of objects will not be included in the allotments of space which may be made to them by any local committee. Before the Executive Committee can make an absolute guarantee of space in these classes, they would be glad to receive communications from the parties themselves proposing to execute such works, stating the details of their character, accompanied with sketches sufficiently descriptive. All proposals must be forthwith submitted to the Executive Committee.

The first contribution from the Continent has arrived in this country. It consists of a consignment of 83 packages by the *Neptune* steamer from St. Petersburg, and was addressed to Gabriel Andreae, Esq., the agent of the Russian Government, who has appointed Messrs J. and R. M'Cracken, of No. 7, Old Jewry, one of the houses recommended by the Royal Commission, to transact the necessary Custom-house business connected with the consignments from this country. It has been arranged that the goods shall for the present be deposited in the bonded warehouses of the St. Katharine Dock Company for security, until the building in Hyde-park shall be ready to receive them. This consignment will speedily be followed by at least another of equal importance.

HUDSON'S BAY PRODUCE.—The first arrival for the season of skins, furs, &c., from the possessions of the Hudson's Bay Company in North America, as taken place by the *Prince of Wales*, arrived in the docks from Hudson's Bay, with 196 bales 13 bases and 130 other packages of skins and furs; and the *Prince Rupert* has since arrived with 249 bales of skins and furs, and other products of that northern region.

Amongst the property destroyed at the fire in Mark lane, were a great many Burmese idols, upwards of 2000 years old, intended for the British Museum. Unfortunately they have all been completely calcined by the action of the flames. So great has been the heat ever since the morning of the fire that a quantity of wheat which fell from the Corn Exchange having dropped upon the top of the bins formed by the melted guns, the whole has taken root, and the blade has sprung up several inches.

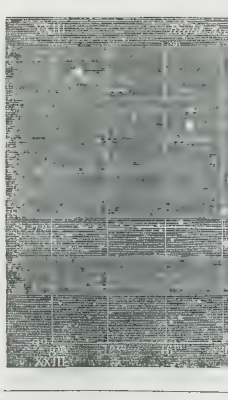
DARING BALLOON ASCENT.—On Sunday, an ascent, which exceeded in boldness anything that has hitherto been attempted, took place from the Hippodrome in Paris. The Comte Jean de Lipowski, belonging to M. Poterin, rose in the air, carrying, in addition to the aëronaut, three young women below it to that establishment, who were suspended from the car. The ascent was effected without accident, and appeared a day of fête in the air. There seems was hailed with shouts by the immense concourse of persons assembled, but a feeling of terror seemed to predominate at some the women suspended in mid-air. The aëronaut descended in safety after having shot an hour in the air, the intrepid aëronauts alighted in safety on a plain near Villejuif.

A robbery was perpetrated at St. Bride's church at mid-day on Friday week. Divine service had been performed in the morning, and it is surmised that the thief secreted himself in the organ loft on the occasion. Between two and three o'clock in the afternoon a waggon load of coke or coal was being delivered at the church, when the sexton discovered that the poor-box had been broken open, and the contents carried away; and that the cushions at the altar had been stripped of their velvet covering, and other depredations had been committed. The sacramental plate had not been removed.

Last week an inquest was held at Bristol on the body of William Chapple, an old man, who, having been knocked down violently by a footservant, a much younger man, his head struck the stones, and produced concussion of the brain. The evidence showed that the old man had used threatening language, but that he had not struck a blow. The jury returned a verdict of "Justifiable homicide."

PATH OF THE NEW PLANET VICTORIA AMONGST THE STARS.

Most of the stars laid down on this chart are of the fifth and ninth magnitudes, and are consequently *telescopic* stars. Several of the brighter stars of the fourth and fifth magnitudes are marked by asterisks, and will serve as starting points in a search for the planet with telescopes not mounted *equatorially*, like those of regular observatories. The epoch of the map, or time to which the Right Ascensions and Declinations refer, is the year 1850. The planet shares at present as a star of the ninth magnitude, and will be recognised on comparing the map with the heavens by its position relative to the surrounding fixed stars marked at points. The places laid down for the various dates are for noon, mean time at Greenwich. The elements of the orbit are not yet accurately known, and hence it is possible that the later places may deviate slightly from those laid down; but there will be little difficulty in identifying the planet with the assistance of the map, which contains all the stars of the same or higher magnitude as that part of the heavens.



The planet was found by Mr. Hind, on the 13th of last month, and is now under observation at most of the European observatories.

In the course of the present month the Bishop of Manchester will consecrate no fewer than three new churches within his diocese; one at Barton, near Preston; another at Healey, near Rochdale; and a third at Ramsbottom, near Bury.

The Rev. William C. A. Maclaurin, Elgin, Dean of the united diocese of Moray and Ross, has forsaken the Scottish Episcopal Church for the Church of Rome. On Sunday last the Dean announced his "conversion" to his congregation at Elgin. The event was not unexpected, and it has, of course, given to rise much speculation. Mr. Maclaurin has a wife and family; consequently cannot become a priest.

Mr. Gorham's son has gained the prize for the best English Essay at Trinity College, Cambridge.

NATIONAL SPORTS.

There is now every prospect of the racing campaign being extended into the winter months, several "autumnal" meetings having been determined on; at which, by a liberal use of the ways and means, and a judicious blending of flat and steeple racing, plenty of excellent sport may be anticipated. These "autumnal" gatherings are at present confined to Epsom, Liverpool, Warwick, Aberystwith, Hereford, and Worcester—commencing in the ensuing week, and going into December: that they will stop here, is doubtful. The appointments for next week embrace flat racing at Leek, on Monday and Tuesday; ditto, on Tuesday and Wednesday, at Brighton Downs; and on Thursday and Friday, at Northallerton; and flat and steeple-racing on the same days, at Hereford.

The Coursing fixtures include Newmarket, Wiltshire Champion, Market Weighton—all great meetings—and Middleton, each commencing on Tuesday, and the Wiltshire occupying five days; Derby on Wednesday, and the South Lancashire (somewhere) on Thursday.

The Hereford, already referred to, will be the only Steeple-chase Meeting.

NEWMARKET SECOND OCTOBER MEETING.—MONDAY.

FIFTY POUNDS.—Mr. Jacques's Mildew (Flatman), 1. Mr. H. Hill's Prideful (Maton), 2.

SWEEPSTAKES of 10 sovs each.—Lord Exeter's Preslaw (Flatman) 1. Mr. Pitcher's Hazy (Harlock), 2.

HANDICAP SWEEPSTAKES of 20 sovs each.—Mr. Eddison's Eliza Middleton (W. Sharpe), 1. Duke of Richmond's Ploughboy (Flatman), 2.

FIFTY POUNDS (Second Class) for two-year-olds.—Mr. Howard's Prestige (A. Day), 1. Mr. Stephenson's Dromedary colt (F. Butler), 2.

FIFTY POUNDS (First Class) for two-year-olds.—Mr. J. Higgins's Thesaus (Rogers), 1. Lord Exeter's Cain (Flatman), 2.

SWEEPSTAKES of 200 sovs each.—Mr. Padley's Old Dan Tucker (A. Day), 1. Sir J. Hall's Abraham (Templeman), 2.

SWEEPSTAKES of 200 sovs each.—Duke of Bedford's Bordeaux (F. Butler), walked over.

TUESDAY.

HANDICAP SWEEPSTAKES of 15 sovs each.—Mr. Etwall's Antigone (W. Abdale), 1. Lord Enfield's Den John filly (Flatman), 2.

CLEARWELL STAKES of 30 sovs each.—Mr. Halford's The Prime Minister (J. Marlow), 1. Mr. Johnson's Conscience (F. Butler), 2.

ROYAL STAKES of 200 sovs each.—Mr. Combe's Tomboy (S. Rogers), 1. Sir J. Hawley's Cranberry (J. Marson), 2.

CESAREWITCH (Handicap) of 25 sovs each, 15 ft, with 300 added.—Mr. Payne's Glauca (Chapple), 1. Sir R. Pigot's Essedarius (A. Day), 2.

The Emperor was sold this morning for 600 guineas.

WEDNESDAY.

The cheap special train brought down a host of pickpockets, who pursued their calling with great success, Lord Airlie, who was relieved of some £300, being their principal victim.

THE TOWN PLATE of £50.—Duke of Bedford's Westow (F. Butler), 1. Lord Exeter's Nuttneg (J. Mann), 2.

MATCH, 900. Lord Stanley's Canezou (F. Butler), 1. Lord Exeter's Gardenia (Flatman), 2.

MATCH, 100. Duke of Bedford's Mahratta (F. Butler), 1. Lord Glasgow's c. by Bay Middleton, out of Canada (Flatman), 2.

SWEEPSTAKES of 10 sovs each.—Mr. Merry's Bullfinch (Pettit), 1. Mr. C. Pitcher's Hazy (G. E. Sharp), 2.

HANDICAP SWEEPSTAKES of 15 sovs each.—Colonel Peel's Black Sea (Flatman), 1. Mr. Nash's Knight of the Thistle (W. Abdale), 2.

THE BEDFORD STAKES of 50 sovs each.—Mr. Greville's Constance (Flatman), 1. Lord Exeter's Madias (Norman), 2.

THURSDAY.

CALEDONIAN HUNT MEETING AT PERTH FRIDAY, OCT. 11.

HER MAJESTY'S PLATE of 100 guineas.—Mr. J. Brown's Harcot (G. Oates) walked over.

THE FORCED HANDICAP of 5 sovs each.—Mr. Dodd's Cybele (Thrift), 1. Mr. Thrift's John Dory (H. Robertson), 2

THE HUNTER STAKES of 5 sovs each.—Mr. Cunninghame's Celt (Owner), 1. Mr. Jolly's Heir-at-Law (Mr. Taylor), 2.

COMPLETION OF THE ONE THOUSAND MILES MATCH.—The feat undertaken by the pedestrian Searles, to walk a thousand miles in a thousand successive hours, has, we believe, been very generally believed to be the same as that performed by the celebrated Captain Barclay. There is this difference, however, between the two undertakings. Captain Barclay performed his first mile in the last quarter of the hour, and his last in the first of the following hour; thus allowing himself an hour and a half of uninterrupted rest out of each two hours. Searles on the other hand performed his mile at the commencement of each hour having never more than three-quarters of an hour for rest. This extraordinary match was completed on Monday morning, at seven o'clock, amidst a very numerous concourse of spectators. The last mile of his extraordinary feat Searles accomplished in seven minutes and forty-one seconds; and he subsequently ran a quarter of a mile very gallantly. He is still staying at the Tranmere Hotel, where he is likely to reside for a week or two more, in order to bring himself by degrees into the proper condition of a man to who some additional flesh, and the accession of excellent appetite and spirits, but says that he feels very much disposed to sleep. His eye is bright, and his countenance full of life and vigour. When he commenced his arduous task he had been in severe training, and lost nearly a stone and a half of flesh. Five or six pounds of this he regained during the first fortnight, but he has lost it towards the close of his exertions. He offers to take £100 to £400, and to perform the same feat in four months from this time, the money to be staked at once. Searles is an unassuming, modest man, about 30 years of age, and height about five feet four to five inches. From what we can gather there can be no doubt whatever as to the perfect fairness with which the feat has been accomplished.

NAVAL AND MILITARY INTELLIGENCE.

THE HONG-KONG COMMAND.—The command of the troops in this colony is said to be going begging. The general officers have declined the appointment, and others have been applied to on the subject.

STAFF IN INDIA.—Captain Napylton, of the 13th Light Infantry, has been appointed one of the aides-de-camp to General Sir William Gomm, and has proceeded by the overland route to Calcutta.

BOMBAY COMMAND-IN-CHIEF.—Some time since we stated, that, in all probability, Major-General Sir John Grey, K.C.B., would be appointed to the command of the troops stationed in the Bombay Presidency, and we now have great pleasure in confirming the report. This gallant officer will receive the local rank of Lieutenant-General.

THE VACANCY ON THE FULL PAY RETIRED LIST, caused by the death of the late Lieutenant Colonel J. Cross, K.H., will be given to Lieutenant-Colonel F. Brandas, now commanding the 47th Regiment, in which corps he has served uninterruptedly for 47 years. Colonel Dundas's removal to the full-pay retired list promotes Major Gordon to the Lieutenant-Coloneley, an officer of upwards of 30 years' service, and who was twice wounded on service with the 78th in Ava. Lieutenant and Captain Smooth, an officer of well known zeal and ability, succeeds to the company, and Ensign Pilkington to the Lieutenancy.

A detachment of the Foot Guards will, in future, from this week, take the duty at Deptford Dockyard. The arrangement has been made in consequence of there not being a sufficient number of men at the head-quarters of the Woolwich division of Royal Marines to do the duty at Woolwich and Deptford Dockyards.

THE CHOLERA AND SIR W. PARKER'S FLEET.—By private letters from Vice-Admiral Sir William Parker's fleet, at Port Mahon, we have the gratifying intelli ence that the cholera had totally subsided on board at the ships.

SAILORS' HOMES.—A movement has been commenced in Plymouth, with the view of establishing, on an enlarged scale, a sat ors' home in that port. The parties feeling interested in this matter have waited upon Admiral Sir W. Hall Gage, the Commander-in-Chief, at Devonport, and he has undertaken to call a meeting for the purpose. Smouts, an officer of well known zeal and ability, succeeds to the company, and Ensign Pilkington to the Lieutenancy.

A detachment of the Foot Guards will, in future, from this week, take the duty at Deptford Dockyard. The arrangement has been made in consequence of there not being a sufficient number of men at the head-quarters of the Woo.wich division of Royal Marines to do the duty at Woolwich and Deptford Dockyards.

On the opening of the courts of Masters in Chancery, the various lists of allottees that were settled before Vacation in cases of the Winding-up of Railway and Joint Stock Companies will have to be revised and disposed of conformity with the new law laid down by the House of Lords; and there will be 120 lists of this description in the cases of as many companies to be revised.

FLOGGING IN THE AMERICAN NAVY.—2201 lashes were administered on board the United States sloop of war *Albany*, which lately arrived at Boston, after a cruise of about 21 months. She was commanded by Victory M. Randolph.—*New York Tribune.*

THE HIRE BURGLARY AT NEWHOUSE, NEAR NORTHFLEET, KENT.—A reward of £100 has been offered for the apprehension of the persons concerned in the above-mentioned daring burglary, and her Majesty has been pleased to extend her most gracious pardon to any accomplice who may give the required information.

BURGLARY.—FEMALE HEROISM.—A daring burglary was committed at Walton College, situated about a quarter of a mile from Abbotskerwell, Devon, on Monday evening last, at which time no one was absent, and had left the care of the house to his three daugaters, who had just retired to bed when they heard a noise below, as of some persons breaking into the house. The eldest of them, about fourteen years of age, jumped out of bed, struck a light which she gave to her sisters and arming herself with two pistols, walked down over the stairs, followed by her sisters. On entering the parlour they found everything in confusion, papers lying about, and the desk rifled. The burglars fled on the entrance of the girls, and the young lady with the pistols jumped from the parlour window on to the lawn and fired both after them. The thieves had stolen some money, papers, and plate; but were eager to get off, they dropped some plate on the lawn, which was recovered in the morning. Two suspicious-looking fellows were bogging at the house in the morning, but they have not yet been apprehended.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

The books for the transfer of Bank Stock, Reduced New Three-and-a-Quarter per Cents, Long Annuities, and Annuities, 1859, are now open, having been closed since September the 12th.

Notwithstanding the deficiency in the quarter's revenue, a rise of ¼ per cent. in Consols has been registered during the past week, making one per cent. since tuesday the 8th. The Government have announced themselves buyers of Stock to the extent of £2,000,000, being one-third of the balance of receipts over expenditure during the past year. This has naturally given an impetus to prices, and that quarter's deficiency being so readily accounted for, no countervailing effect upon the market was produced. Money is also in good demand, leading, perhaps, in some measure, from the Bank of England loans on Stock, during the shutting, falling due on Wednesday and Thursday, as well as the closing of the Consol account on Tuesday, the "carrying over" price being about 2 per cent. The amount of Stock delivered was comparatively small, it having been a very limited account. During the week Consols have ranged between Monday's price of 97½ and 97⅝, reacting a fraction towards the close of the week. Exchequer Bills have advanced a few shillings; also India Bonds which is usually the case upon the payment of the dividends. Business was rather limited towards the close of the week, the price of the various securities being as follows: Bank Stock, 210⅝; Reduced Annuities, Closed; Consols, 97⅝; New 3½ per Cent. Annuities, 99; Long Annuities, to expire Jan., 1860, 7 13-16; India Stock, 266; India Bonds, £1000, 98 p.; Ditto, under £1000, 98 p.; South Sea Stock, 91; New Annuities, 97⅛; Consols for Account, 97⅛; Exchequer Bills, £1000, June, 70 p.

The Foreign Market has displayed considerable buoyancy this week, prices generally having improved. Peruvians Deferred quoting an advance of four per cent, and fully maintaining the quotation. Mexican has been dealt in, but without any marked variation in price. The Grenada compromise will be a source of great inconvenience and ultimate loss to all the small creditors of that state, as they will be under the necessity of resorting to the market for the sale of their coupons, where the amount falling due does not amount to £15 sterling. This, with the difficulty of negotiating the Treasury note, will be attained, will, doubtless, prove a losing transaction to many private holders. Some buoyancy at the close of business last press as follows: Brazilian Bonds, 90½, Mexican, Five per Cents., 1846, ex. Jan Coupons, Account, 31½; Peruvian Bonds, Four-and-a-Half per Cent., 92½; Ditto, Account, 82½; Ditto, Deferred, 37½; Russian Bonds, 110½; Ditto, Four-and-a-Half per Cent., 97½; Dutch, Small, 97½; Spanish, Five per Cent., 1842, 19¾; Ditto, Passive, 2½; Ditto, Three per Cent., 36½; Ditto, Account, 36¼; Portuguese, 25½ 25¾; Ditto, Two-and-a-Half per Cent., 12 Guild., 7⅛.

A good business has been done in the share Market, the setting passing off quietly, although a high price was demanded for continuations. Upon the Account being closed, prices advanced, and continue firm, as the following list will show:—Aberdare, Preference, 2 dis; Birmingham and Oxford Junction, calls day paid, or with a guarantee, 20¾; Caledonian, 8¾; Chester and Holyhead, 10½; East Anglian, £20, ¾; Eastern Counties, 6⅝; Ditto, Extension, 5 per Cent., No. 1, ⅝ premium; Ditto, ditto, No. 2, ⅛ premium; Ditto, Northern and Eastern, 5 per Cent, 57⅛; Eastern Union, Class A (late E. U. Shares), 7; Ditto, Scrip (6 per Cent.), 10¾; Edinburgh and Glasgow, 26; Great Northern, 14½; Ditto, ½ A Deferred, 4⅝; Ditto, ½ B, 5 per Cent, 5⅝, Great Southern and Western (Ireland), 35½; Ditto, Eighths, 3¾; Great Western, 71⅛; Ditto, New, £17, 10; Hull and Selby Half Shares, 48½; Lancashire and Yorkshire, 70⅜; Ditto, Fifths, 9⅜; Leeds and Bradford, 94; London and Blackwall, 6⅛; London, Brighton, and South Coast, 84; Ditto, New, guaranteed 6 per Cent., 136⅜; London and North Western, 1.6⅛; Ditto, New Quarters, 19⅛; Ditto, Fifths, 14⅛; Ditto, 2.0 (M. and B.), 23; London and South-Western, 70⅛; Ditto, New Preference, 7½; Midland, 44⅛; Ditto, £50 Shares, 13⅛; Norfolk, 17⅜; North British, 7⅛; Oxford, Worcester, and Wolverhampton, 24; Scottish Central, 11⅛; Shrewsbury and Chester (Coventry), 8; South-Staffordshire, 14; South-Eastern, 21; South Wales, 23½; Waterford and Kilkenny, 4; York, Newcastle, and Berwick, 18; Ditto, Newcastle Extension, 12¾; Ditto, G.N.E. Preference, 5; York and North Midland, 24½; Bonnigne and Amiens, 8; Dutch Rhenish, 3½; Namur and Liege, 8; Northern of France, 14½; Paris and Bordeaux, 28; Paris and Strasburg, 7⅝.

FRIDAY AFTERNOON.—The Consol Market has been somewhat more in-day, and prices have advanced one quarter per cent. The Three per Cents are 97⅞; India Bonds, 30s; and Exchequer Bills, 70s premium. Foreign Bonds and Railway Shares steady.

THE MARKETS.

CORN EXCHANGE (Friday).—The quantity of English wheat brought forward fresh up to our market to-day was comparatively small, but 2230 quarters have reached us coastwise, chiefly from Essex and Kent. The show of samples of both red and white was limited. Fine qualities of wheat were in full request, at prices quite equal to those obtained on Monday. In the middling and inferior kinds only a limited amount business was transacted, at late rates. Upwards of 12,000 quarters of foreign wheat have arrived this week, chiefly from the Baltic. We had a moderate inquiry for ready fine parcels, but dearer and inferior qualities were much neglected, yet we cannot call them lower. A very large quantity of foreign barley was brought forward. Malting samples sold slowly at late rates, but grinding and distilling sorts were in pur quarter lower. Malt, the supply of which was large, was dull in sale, at barely stationary prices. We had a very inactive inquiry for oats owing to increased arrivals, and low foreign were somewhat easier. Beans, peas, flour, and seeds, and flour dull at Monday's currency.

ARRIVALS.—English wheat, 2230; barley, 1490; malt, 6990; oats, 1340; flour, 2360. Irish: oats, 4320. Foreign: wheat, 17,200; barley, 13,240; malt, —; oats, 29,660; flour, 25,260 quarters.

English. Wheat, Essex and Kent red, 47s to 48s; ditto, white, 50s to 52s. Norfolk and Suffolk, red, 45s to 48s; ditto, white, 47s to 48s; rye, 36s to 37s; grinding barley, 21s to 22s; distilling ditto, 23s to 27s; malting ditto, 28s to 30s; Lincoln and Norfolk malt, 46s to 48s; Ware ditto, 42s to 46s; Kingston and Ware, 45s to 52s; Chevalier, 52s to 54s; Yorkshire and Lincolnshire feed oats, 16s to 17s; potato ditto, 18s to 20s; Youghal and Cork, black, 16s to 17s; ditto, white, 18s to 17s; tick beans, new, 28s to 32s; ditto, old, 32s to 36s; pigeon ditto, new, 32s to 34s; ditto, old, 36s to 38s; harrow ditto, new, 30s to 32s; ditto, old, 34s to 36s; grey peas, new, 30s to 32s; maple ditto, new, 32s to 34s; white ditto, new, 32s to 34s per quarter. Town-made flour, 42s to 44s per sack; Essex and Suffolk ditto, 40s to 42s per sack.

The Seed Market.—Canary is still very dull in sale, and quite 2s per quarter lower. Linseed and rapeseed are quite as dear as last week. All other articles dull in sale.

Linseed, English, sowing, 5s to 56s. Baltic, crushing, 36s to 44s. Mediterranean and Odessa, 42s to 46s; Bombay, 32s to 36s per quarter, coriander, 16s to 24s, brown, 8s to 10s; canary, seed, 50s to 54s; white ditto, 9s to 12s, and tares, 5s to 6s per bushel. English rapeseed, £26 to £27 per last; linseed cakes, English, £8 to £9, foreign ditto, £6 5s to £7 5s per 1000, rapeseed, £4 to £5 5s per ton; canary, 40s to 42s per quarter.

Bread.—The prices of wheaten bread in the metropolis are from 7d to 7½d; of household ditto, 6d to 6½d per 4 lb. loaf.

Imperial Weekly Average. Wheat, 41s 2d; barley, 24s 2d; oats, 17s 1d; rye, 28s 2d; beans, 29s 6d; peas, 27s 7d.

The Six Weeks Average. Wheat, 42s 3d; barley, 24s 2d; oats, 17s 1d; rye, 28s 2d; beans, 29s 4d; peas, 27s 6d.

Duties.—Wheat, 1s; barley, 1s; oats, 1s; rye, 1s; beans, 1s, peas, 1s.

Tea.—The demand for all descriptions is still active, and prices have an upward tendency. Common congou is worth 1s 9d to 1s 10d, and fine ditto, 2s 2d to 2s 3d per lb.

Sugar.—Our market has ruled very firm the week, at an advance in the quotations of fully 6d per cwt. The refiners are now asking to hard consumo. Prime clayed, Mauritius, 32s to 32s 6d; steady, and brown lumps are worth 30s 6d to 31s per cwt. In standard very little is doing; first quality refining sugar, 42s to 42s per cwt. Extensive business has been done in this article, and prices have risen 4s to 5s per cwt. 10,000 bags of good ordinary native Cuba have been sold per cwt.

Coffee.—The article is a dull sale, and 3d per cwt. lower. Bengal has changed hands at 38s to 42s 6d per cwt.

Provisions.—We have a steady demand for Irish butter, at fully the late advance in the quotations. Carlow, Clonmel, and Kilkenny, 78s to 80s. Cork, 81s to 83s; Limerick, 76s to 78s. Tralee, 72s to 74s; and Sligo, 70s to 76s per cwt. English butter is in good request. Town-made, 90s to 96s; ditto, 84s to 90s; inferior, 68s to 76s, fine Devon, 80s to 84s per cwt. Irene, 70s to 76s per dozen pounds. Foreign qualities are held at very full prices. There is more doing in Irish bacon, the value of which has risen 1s per cwt. Prime singed Waterford, 52s to 53s; and Limerick, 48s to 51s per cwt. Lard is 2s to 3s dearer. Waterford, landed, 50s to 52s; fitting, 48s to 50s per cwt.

Tallow.—Our market is steady, at last week's prices. P Y C, on the spot, is selling at 38s 6d to 38s 9d per cwt. Town tallow, 38s 3d to 38s 6d, nc. cash.

Oils.—There is more doing in this market, and, in some instances, the quotations have an upward tendency.

Hay and Straw.—Meadow hay, £2 12s to £3 15s; clover ditto, £3 3s to £4 4s, and straw, £1 1s to £1 8s per load.

Wool.—The London Sale Trade is in good request, at 1s 6d to 1s 4½d. Leewards somewhat dearer, with an improved demand. 200 puncheons have sold at 1s 5d to 1s 6d proof. Brandy and Rums steady.

Wool.—Our market continues steady, but the demand runs chiefly upon English qualities. Foreign qualities are now coming to hand constantly.

Potatoes.—Selected samples command a ready sale, at higher rates, viz. from 70s to 80s per ton; ordinary qualities are now coming to hand constantly.

Coals (Friday).—Newcastle, 13s 6d to 14s 6d; Sunderland, 13s; Hetton, 16s 9d; Cassop, 16s; Wylam, 14s 6d; Seghill Tees, 13s 6d; Tees, 13s 9d per ton.

Hops (Friday).—The present year's growth of hops is now ascertained to be an unusually large one. The duty has, therefore, advanced to £300,000 and upwards. For most new hops the demand is steady, at our quotations; but yearling and old qualities are a shade lower. The following are latest prices:

New East Kent pockets, 75s to 105s; New Mid Kent ditto, 98s to 126s; New Weald of Kent ditto, 72s to 95s; New Sussex ditto, 65s to 85s per cwt.

WOOL (Friday).—The supply of wools in Tuesday's market being on the increase, and the attendance of buyers limited, the beef trade ruled exceedingly inactive at prices barely equal to those noted on Monday, and at which a clearance was not effected. The inferior and quality of the stock was inferior. Although the number of sheep exhibited a falling off, generally, those of Kent and Sussex were in fair condition, but from other descriptions of stock was scanty, and no actual decline took place in the quotations. We were well supplied with both English and foreign calves, which sold slowly, at a fall in value of 2d per stone. The highest figure was 5s 8d per 8lbs. The supply of pigs was far from abundant, at late rates. Milch cows were dull, at from £14 to £18 each, including their small calf.

Per lb to sink the offals.—Coarse and inferior beasts, 3s 4d to 3s 6d, second quality ditto, 3s 8d to 3s 10d; prime large oxen, 3s 2d to 3s 4d; prime seots, &c., 3s 6d to 3s 10d; coarse and inferior sheep, 3s 4d to 3s 6d; second quality ditto, 3s 8d to 4s 0d; prime coarse woolled ditto, 4s 2d to 4s 4d; prime small ditto, 3s 6d to 3s 8d; prime South Downs, 4s 0d to 4s 2d; large coarse calves, 3s 8d to 3s 6d; prime small ditto, 3s 6d to 3s 8d; large hogs, 3s 2d to 3s 8d; neat small porkers, 3s 8d to 4s 0d; suckling calves, 13s to 18s, and quarter old store pigs, 18s to 24s each. Total supply: beasts, 1093; cows, 168; sheep, 6660; calves, 333; pigs, 310. Foreign: beasts, 208; sheep, 1503; calves, 121; pigs, 63. Scotch: beasts, 16, sheep, 30.

Newgate and Leadenhall Markets.—These markets were well supplied to-day, what the general demand for meat is generally satisfactory prices.

Per 8 lb by the carcase.—Inferior beef, 2s 8d to 3s 2d, middling ditto, 3s 4d to 3s 6d, prime large ditto, 3s 8d to 3s 10d; prime small ditto, 3s 8d to 3s 4d; large pork, 3s 4d to 3s 6d; inferior mutton, 2s 6d to 2s 10d; middling ditto, 3s 2d to 3s 6d; prime ditto, 3s 8d to 3s 10d, veal, 2s 8d to 3s 6d; small pork, 3s 10d to 4s 6d.

ROBERT HERBERT.

THE LONDON GAZETTE.

TUESDAY, OCTOBER 15.

THE ILLUSTRATED LONDON NEWS.

VOL. XVII.] SUPPLEMENT.—SATURDAY, OCTOBER 19, 1850. [GRATIS.

BATH AND CLIFTON.

THE Railway Excursion system has, at length, familiarised the public with the vast amount of attraction presented by the Great Western line—lying through a country rich in picturesque scenery and antiquities, almost beyond comparison with any other portion of England.

One of the most prominent of these points of attraction is the handsome city of Bath, long noted for the beauty of its buildings, which consist almost entirely of stone, and present a finer appearance than any other city in England. It lies in a valley divided by the river Avon, which has been made navigable as far as Bristol.

The celebrity of Bath is very ancient, for the luxurious Romans had a station

BATH.

here which they named *Aquæ Calidæ*, and they are proved to have erected baths here A.D. 43. The roads of these mighty civilizers of the world have been traced in and near Bath; coins, vases, and sepulchral remains of the same period have been found here in abundance; and tessellated pavements to this day attest the magnificence of the Roman colonists. In the city of Bath itself the remains of a large temple have been found, as well as of the baths in which the Romans were wont to lave their recreant limbs. Altars, with inscriptions, ornamented brick urns, vases, lachrymatories, fibulæ, coins, &c., have been turned up; but none of the inscriptions throw any light upon the history of the place. No city in England can produce such a collection of local Roman remains as is now deposited in the Bath Literary and Scientific Institution: there is nothing like it in the kingdom, except at New-

CLIFTON, FROM THE FERRY

castle-upon-Tyne, where the collection is from the whole of the northern field The new town is many feet above its ancient level; in some places more than twenty. The walls, as they existed until a late period, are presumed to have been built, to a great extent, upon the base of the Roman walls. There are accounts and engravings of Roman inscriptions and sculptures incorporated in the walls, none of which now exist

The beautiful modern city has a host of remarkable objects for sight-seekers. Its best buildings, such as the Upper Rooms, the north side of Queen's-square, the Crescent, and Circus, were built about the middle of the last century, from designs of the two Woods. The Abbey Church, or Cathedral, was originally an example of the Pointed style at the latest period in which it prevailed, and was completed with great simplicity and taste, but in 1834 its whole design and character were materially changed, and its most peculiar features destroyed. In the east end of the church, Prior Bird's chapel presents a beautiful specimen of tracery. Among the numerous monuments are those of Sir William Waller, the Parliamentary General; Quin, the actor; Beau Nash, once the *Arbiter Elegantiarum* of Bath, &c.

The "ever memorable" John Halas, of Eton, was born in St. James's parish, Bath; and Benjamin Robins, said to have been the actual writer of Anson's "Voyage round the World," was a native of this city; which also claims Adelardus de Bathonia, who lived in the reign of Henry I.

The Guildhall, in the High-street, is a noble building. There are twenty-four churches and chapels belonging the Established Church, and sixteen Dissenting chapels. There are several hospitals, almshouses, and charity-schools.

The resort to Bath, for its natural hot springs, still retains its fashion, though not precisely of the same character as in the Roman celebrity, some eighteen centuries since. The principal springs are the King's and the Queen's: the temperature of the coolest is 97°, of the warmest, 117° of Fahrenheit; and the daily quantity of water discharged into these basins is 184,320 gallons. Taken Internally, the water acts as a stimulant: its use is most successful in palsy, rheumatism, gout, leprosy, cutaneous disease, and especially in cases of scrofula affecting the joints, such as the knee, elbow, hip.

Seneca, of old, justly remarked: "Dum ego scatebant aquarum calentium venæ, ibi nova diversoria luxuriæ excitabuntur "—" Wherever warm springs abound, new places of amusement are sure to rise up." Bath has fully exemplified the adage, though its gaieties have declined with the last thirty years.

Its public buildings and large hotels provide splendid accommodation; the Assembly Rooms are among the finest in the kingdom; and the theatre, one of the best of its size, is a sort of school for the metropolitan stage.

Our Artist has shown the city at the most picturesque point, with its crescents and churches, and the soft-flowing Avon, and the distant Somerset hills.

CLIFTON,

At a mile from Bristol, and the most aristocratic portion of that city, is another of the Great Western Railway attractions. A brief notice of the place appeared in the ILLUSTRATED LONDON NEWS for August 17 last, accompanying a view from Leigh Wood. We now engrave this beautiful resort from another point, the Percy, where the crescent of houses in the well wooded heights are shown to advantage.

BRITISH AGRICULTURE.

BY THOMAS ROWLANDSON.

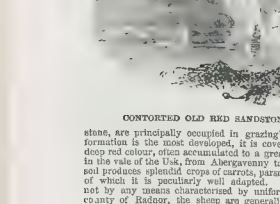
PART IV.—SOUTH WALES.

Area .. .. 2,707,840 acres. | Population .. 495,483 persons

On crossing the Bristol Channel from the county of Somerset to the opposite coast of South Wales, the same intermixture of has, mountain limestone, magnesian conglomerate, &c., is found. The soils now under notice are about the most fertile in South Wales, occasionally, they rank in the finest race in Britain. In this district there are beautiful vales capable of yielding rich crops of arable and pastoral produce under proper cultivation, which is, however, the exception rather than the rule. The vales of Neath and Glamorgan possess great natural facilities for carrying on a perfect and excellent system of agriculture; unfortunately, these natural capabilities are almost entirely neglected, the rule being to scourge the land to the utmost without making any return.

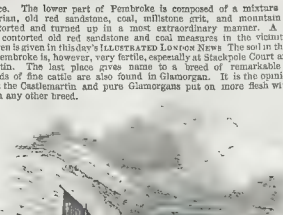
In no part of the United Kingdom has such a remarkable difference in the value of agricultural produce taken place, during the last fifty years, as in the iron and coal districts of South Wales.

It might have been supposed that such a state of things would have given an impetus to agricultural improvement: this has not, however, been the case, for a more wretched system than that pursued in the coal and iron district of South Wales cannot be imagined: lea broken up for oats, followed by potatoes manured, wheat succeeding, followed by a crop, and oftentimes three or four crops of oats, the succeeding crops seeds being also more or less as possible, in which state the land is left to recruit itself as well as it can, under pasturage for five or six years, to be eventually broken up, and undergo the same scourging process again. As the manure made is of indifferent quality, and not laid on at a greater rate than 10 to 12 tons per acre, it may easily be conceived that the crops are only indifferent. potatoes averaging little more than 180 bushe s, wheat 19 to 20 bushels, and oats, after wheat, seldom more than 98 bushels per acre, oats on the lea, 32 to 36 bushels. Some of the rich vale lands produce more; but averaging the old red sandstone, the upper and lower silurian, and a large part of the coal formation, the preceding amounts are not exceeded. The effects of "long-continued" cropping, Carmarthen, Cardigan, and Radnor, rearing black cattle forms the principal part of the farmer's occupation; they are grazed on the hills, without being housed, or winter provision provided for them, which no manure is ever known to be made, and consequently no arable husbandry can be carried on. On arable farms having convenient access to the manufacturing towns and villages, which have sprung up during the last half-century, the mixed cropping system prevails. As potatoes, for the local consumption of these places, fetch high prices, they are wholly sold off the land. Hay and straw commonly obtaining £5 per ton, tempts the farmer to dispose of all that he grows; in fact, so general is this practice, that a hay or corn stack is rarely to be seen after Christmas on a farm in the vicinity of an iron or copper establishment. A large number of small farmers are almost wholly occupied in hording boats on canals, and drawing waggons of coal and iron ore on tram-roads. With the exception of butter, the price of general agricultural produce is as high as is to be found in any part of the kingdom, whilst the rents and charges on the farmer are much lower. From these facts, the reader will be prepared to believe the assertion, that there does not exist in the United Kingdom a finer and more profitable field for an enterprising and talented agriculturist. The high lands of the millstone grit and limestone, together with the extensive district occupied by the old red sand-



CONTORTED OLD RED SANDSTONE, NEAR BROADHAVEN.

stone, are principally occupied in grazing sheep; in Brecknock, where this formation is the most developed, it is covered with a light, sandy soil, of a deep red colour, often accumulated to a great depth in the vales, particularly in the vale of the Usk, from Abergavenny to Brecknock. When drained, this soil produces splendid crops of carrots, parsnips, and Swedes, for the cultivation of which it is peculiarly well adapted. The sheep are usually small, but not by any means characterised by uniformity of character. In the small county of Radnor, the sheep are generally of a distinctive class, known as the Radnor breed; these are supposed to be a cross between the polled mountain sheep and the Forest of Cun sheep; they are fuller fleeced than most breeds, being muffled up with wool to their noses, their legs also being well covered, having bushy tufts standing beavers'. The wool has fewer kemps than any other mountain breed. The features of these sheep are uncouth, but few turn out more profitable when grazed on barren hills; they are not so restless and mischievous as ordinary hill sheep, and probably collect inside fat beyond any other breed, 10 lb. and 12 lb. of rough fat not being an unusual produce, which, for an animal not averaging 9 lb. per quarter, is a large amount. In consequence of their great hardihood, it has been stated that a nice agent to be devoted to them in the temple of Famine. The Cardigan sheep are also a small mountain breed, occupying the extensive range of hills stretching from Pimlimmon on the north to below the Preseli Ridge on the south, and from the sea to the centre of Brecon, including a large portion of the N.W. of Carmarthen. The sheep occupying these hills have generally white faces and legs, the wool being of varied quality according to soil—being short and fine on dry pastures, and coarser and longer on damp clay districts, and rough, open, and kempy on the swampy turbaries of Pimlimmon and the adjacent mountains. Average weight, 8 lb. to 10 lb. per quarter, and wool 1½ lb. to 2½ lb. per fleece. The lower part of Pembroke is composed of a mixture of igneous, silurian, old red sandstone, coal, millstone grit, and mountain limestone, contorted and turned up in a most extraordinary manner. A drawing of the contorted old red sandstone and coal measures in the vicinity of Broad Haven is given in thisday's ILLUSTRATED LONDON NEWS The soil in the lower part of Pembroke is, however, very fertile, especially at Stackpole Court and at Castle Martin. The best place can name to a breed of remarkable excellence. Herds of fine cattle are also found in Glamorgan. It is the opinion of many that the Castlemartin and pure Glamorgans put on more flesh with less food than any other breed.



CONTORTED COAL-MEASURES, NEAR BROADHAVEN.

Until a late period, a considerable number of lean or store cattle were exported; in consequence, however, of the increased demand for meat in South Wales, cattle in only store condition are now eagerly bought by the local butchers: this is one cause why the number of lean cattle supplied to the midland grazing districts has latterly diminished. Towns like Merthyr Tidvil are very scantily supplied with milk during the winter months. Some extensive vales of fertile land border many of the rivers of South Wales: the beautiful Vale of Towy, in Carmarthenshire, extends twenty miles in length by three in breadth. Dyer's description of this vale, as seen from Grongar Hill, must be familiar to many

In South Wales a practice termed fogging is pursued, which consists in shutting up pasture land from May to November, or December, neither mowing nor depasturing during this period, consuming the grass during the remaining months of the year. A crop of winter or spring fogg is considered as valuable as a crop of hay. The practice is confined to parts of Cardigan and Pembroke; and notwithstanding we have met with several strong advocates for the practice, we never viewed it in any other light than as a piece of bad husbandry, pardonable in a rude state of agriculture, but not to be tolerated since the introduction of green crops.

Property is variously divided in South Wales: in the counties of Glamorgan and Caermarthen, it is generally in large masses; whilst in other districts, such as Radnor, properties are small, as may be conceived from the following verse:—

There's ne'er a park, nor ne'er a deer,
Nor ne'er a lord, in Radnorshire;
Nor ne'er a Squire worth five hundred a year,
But the great Mr. Fowler, of Abbey Cwm Hir

PART V.—NORTH WALES.

Area .. .. 9,044,160 acres. | Population .. 416,120 persons.

As Anglesea is a detached portion of North Wales, we will take it first into consideration. Few places in the United Kingdom present such a great variety of rocks within so small a compass as is to be found in this island, the soil generally being a moderately fertile loam, sometimes strong, in which are frequently met projecting rocks and large boulders. The cattle and sheep in this island are esteemed the best in North Wales.

The climate of Anglesea is exceedingly mild, and consequently produces early spring vegetation.

If we draw a line from the point where the Forest of Radnor adjoins the Plinlimmon range of mountains, through Bala Lake to the Great Orme's Head, in the Irish Sea, there will be found lying to the westward the principal mountains of North Wales. With trifling exceptions, the whole of this district belongs to the slate formation, a large part of which forms the debateable ground with geologists, whether it ought to be called the Cambrian or Silurian formation. Some fine vales of land are to be found in this district, such as those on the banks of the Conway and Mawddach; but the general features are those of stern and sterile grandeur. Considerable numbers of useful, hardy, black cattle are reared, together with some sheep—the latter of a very miserable description. On the hills, or rather mountains, in the vicinity of Arran Mowddy, great numbers of small Welsh ponies are bred, locally known as Merlins. The Berwyn range of mountains commence at Bala Lake, from which they take an eastern direction for some miles, consisting generally of sterile moor, mixed with a thin stratum of peat, covering rhetoric rocks. The range is extensive; many of the highest points attain a considerable elevation the most elevated peak, Cader Ferwyn, being 2593 feet above the level of the sea. As they approach Llangollen, the rocks composing them are of a more argillaceous character and less a tendency giving rise to several fertile vales and hills, the Vale of Clwrk being one of the most fruitful and beautiful in Wales. A considerable district of high barren land is found on the Holyhead mail coach road, passing from Corwen through Cerrig y Drudion to near Llanrwst; it is almost wholly occupied in sheep husbandry.

The country to the east of the Berwins and the Clwydian range of hills, in the county of Flint, is generally composed of a rich stiff loam or clay, adapted to any course of pastoral or arable husbandry, some excellent dairies of *Cheshire cheese* being made in this district. The Cwydian range of mountains, that separates the counties of Flint and Denbigh, have every variety of soil. The celebrated Vale of Clwyd is said to have given Dr. Johnson the idea of "Rasselas and the Happy Valley;" be that the case or not, the view of this vale is strikingly beautiful from many points: the soil is of a rich argillaceous character near the sea, gradually becoming lighter towards the head of the vale, until it finally terminates in a very light red sand, of a similar character to the light red sands of Devon. This vale is placed on the new red sandstone.

We have left the consideration of the county of Montgomery until the last, as its general features and agriculture vary from the great part of North Wales, assimilating, in most respects, to that of the adjoining English counties. The aspect of this county is particularly beautiful, the farms in many instances being of considerable extent; added to which is the circumstance of a large part of the land being in the occupation of a resident landed proprietary: these things conduce to a superior system of farming. A considerable number of good cart horses are reared, which are principally sold to parties who take them to Liverpool, Manchester, and other large towns in Lancashire.

Many of the shales obtained from the coal after undergoing spontaneous decomposition might be advantageously used as a dressing for land, as many of the beds contain a not inconsiderable amount of the remains of fishes: we have remarked this particularly in some shales obtained from Messrs. Eyton's coal pits at Hunt. From the same shales sulphate of magnesia has also been obtained, after undergoing spontaneous decomposition. Shales containing phosphate of lime, sulphate of magnesia, and potash, could not fail of being a valuable dressing to any crop, but particularly to clovers or soils that are clover-sick

Gorse or furze is occasionally used as fodder in Wales. We may mention that at the base of Moel Famma, near Ruthyn, we observed a very beautiful clipped hedge, composed of furze, the clippings of which would form excellent forage. The practice of making furze hedges, and keeping them well clipped, using the clippings as forage, might be extended with advantage, as a mode of making fences where thorns would only grow indifferently.

GREENWICH HOSPITAL IMPROVEMENTS.—Among the public acts of the late session, was one to enable the commissioners of Greenwich Hospital to improve that establishment, and to enlarge and improve the immediate neighbourhood. The commissioners are authorised by the statute, which contains 19 sections and a long schedule, to stop up Fisher's-lane, to enclose certain docks, and, for the accommodation of the public, to enlarge, widen, and improve Billingsgate-dock, which will in future be used by the public as a landing-place, where alterations will be made "as may afford adequate accommodation to watermen and other persons resorting to and using the same." The commissioners are further empowered to widen Billingsgate-street, and to form footpaths to the pier They may purchase houses and other property to make those improvements. The schedule contains a list of the premises which may be purchased by the commissioners, so that the intended alterations at Greenwich may be expected to be made during the minority of the act.

SCOTT'S "WAVERLEY."—A correspondent of *Notes and Queries* writes: —Some years ago, a gentleman of my acquaintance, now residing in foreign parts, told me the following story:—"Once upon a time," the great unknown being engaged in a shooting-match near his dwelling, it came to pass that all the gunwadding was spent, so that he was obliged to fetch paper instead. After Sir Walter had come back, his fellow-shooter chanced to look at the succedaneum, and was not a little astonished to see in it formed part of a tale written by his entertainer's hand. By his friend's urgent inquiries, the Scotch romancer was compelled to acknowledge himself the author, and to save the well-nigh destroyed manuscript of *Waverley*. I do not know whether Sir Walter Scott was induced by this incident to publish the first of his tales or not; perhaps it occurred after several of his novels had been printed. Now, if anybody acquainted with the anecdote I relate should perchance lift upon my endeavour to give it an English garb, he would do me a pleasure by noting down the particulars I might have omitted or mis-stated. I never saw the fact recorded.

THE POET ROGERS.—Mr. Samuel Rogers is among our recent arrivals We are happy to say that the venerable poet is in good health, although suffering from the effects of his late accident. *Brighton Gazett*

IMPROVEMENT OF IRELAND.

(From a Correspondent.)

The very duration of the calamities of Ireland, when considered in connexion with the aggravated intensity which they recently displayed, would, if there were no better reason, countenance the opinion that the end of such miseries is approaching. In the moral and the physical world alike the rule is well known. In a battle which has lasted long, a sudden and fiercer effort denotes and indeed brings, the close. A fire may smoulder for a great while but, if it suddenly blaze up, what burns fiercely will soon burn out. The last burst of a storm is often the most violent, and the last hour of the night, the darkest. So is it very frequently with afflictions. But there are better reasons for the pleasing hope that Ireland has seen her darkest day. Disease has done its worst, famine has done its worst, and panic has done its worst. And now the population is in a greater state of health, the poorhouses are less full, and confidence is more prevalent, than for three years past has been the case. The negative symptoms are yet more cheering than the positive. The Inspector-General of Irish Constabulary recently declared to the Earl of Clarendon, "that since he had assumed the command of that force he had never known a time when crime was at so low an ebb as the present;" a declaration in perfect conformity with the charges of the several judges on circuit in every part of Ireland. We have not endeavoured to make the crimes committed in that country appear more frequent and more enormous than they were, by giving a malignant prominence to every account of them; nor have we forgotten that they occurred among a people made dizzy by incessant agitation and maddened by peculiar griefs. We rejoice in the testimony of the Inspector-General, which was quoted by the Lord-Lieutenant. That nation is not dead, but full of the best life, which has within it the principle of moral improvement. For its material improvement other causes are at work. Attention is now drawn with new and powerful earnestness to the natural resources of Ireland, hitherto so inadequately developed; her inexhaustible richness of soil, her vast water-power for manufacturing purposes, her rich mines, her fisheries, her noble harbours, and the peculiar advantages of her geographical situation. It is likely that her western shores, so silent now, will soon resound with the noise of populous cities, and the roll of an incessant traffic flowing to and fro between the Old and the New Worlds. Europe and America are artificially nearer than they were. It would be for the interest, and it is the hope, of both, and it will be the endeavour of both hemispheres, of their great capitalists, and of their indefatigable populations, to make the distance narrower still. Ireland will keep her old situation when the value of that situation will be new.

If her western shore be great in promise, her eastern shore is great in performance. We have wealthier and more prosperous commercial cities in the empire than Belfast; but we have in the empire no commercial city, which, during the last twenty years, has made such *progress* in wealth and in prosperity. It was in the year 1829 that the first spinning factory was established in that town. At present it gives work to four hundred thousand spindles, and has twenty millions sterling invested in the machinery of its various factories. Its population has been more than tripled within the term of one generation. Within the term of two generations its shipping has been multiplied fifteen-fold, and within one year has increased by sixty thousand tons. Within one year, also, its exports and imports have become greater by a million sterling. To all this is to be added the array of its various thriving institutions of charity, art, science, and general utility.

Nor is the material condition of the whole of Ireland at this moment such as to render it hopeless that the possession of an immense mart, of the kind to which Belfast promises at no distant day to belong, will diffuse amidst the general misery. The expenses of the administration of the Poor-law for the first eight months of this year have been seven hundred thousand pounds less than in the corresponding months of 1849. Such is the country and such the time in which Belfast is rising with unexampled rapidity into eminence.

Few sights are more delightful or more suggestive than that of a mighty city seated on the sea-shore, adorned with variety, echoing with the hum of many languages, and enriched with the productions of every clime. The importance of the greatest island capitals must ever be of a different kind and degree, their history less animating, and, when one is fulfilled, and they have passed away, the remembrance of them less enduring among the nations. Such capitals have generally been but the effect, the expression, and the monument of a greatness which existed already. But first-rate maritime cities have often been the cause of that of which it has been even the effect. They have more than once been the origin of the rise of the country to which they have belonged, scattering, as from an abounding fountain, civilization and prosperity and greatness far and near around them. Alexandria was a state, Athens was a nation, Carthage was an empire, and Venice was a power. They were the intellectual as well as the material productions which flourished in remote climes, and which never could have otherwise decorated or enriched their own. They furnished the means of cultivating every indigenous excellence which otherwise might have perished. They collected in one spot the scattered advantages of a thousand lands. To the enlightenment which existed at home they added the education of travel. By liberality, by enlargement of the sphere of thought, by the inexhaustible accumulation of means, and the vast diversity of intellectual resources, they conferred wide-spread dominion on spots provincially insignificant. By the polish and amenity which spring from superior endowments and from the sense of that strength which, because it is irresistible, needs not to be rude, they made their sway as beneficial, and sometimes as acceptable, to their distant dependencies, as it was glorious to themselves. Nor, when they fell, did either their memory or the effects of their greatness fall with them. The Phœnicians wrote more indelible characters on water, than Sesostris ever inscribed on bronze medals or on monuments of stone. Some things, that are frail in their time, have a generative perpetuity of reproduction and transmission; and some things, that seem long to defy change, fall at last, and leave no trace but a barren ruin, which will also gradually moulder until it entirely disappears. Such, on the one side, is the hard and uncommunicative greatness of inland, untravelled, and comparatively tradeless empires; and such also, on the other, is the still rejuvenescent vitality of a maritime people. The marriage of Venice with the sea typified that her greatness was to have many successive lives; and, indeed, it was long before they were ended.

If it be (as it is) evident from history that such cities have often been the parents of empires, it is a fact, of which we ourselves are witness, that England is the parent of many such cities. And no one, who watches the progress of the country with an understanding eye, can deem it a rashness or an uninteresting circumstance, that a new place promises, by its rapidly growing importance, to claim soon to be numbered among our first-rate emporiums.

This becomes a still more interesting fact, if it refer to a part of our dominions where terrible visitations have, not far from the site of the rising mart, afforded a melancholy opportunity for its beneficial action and so laid waste the land, that it cries out for the hand of its renovator. And, at last, the renovator is, we do believe, not far At last the signal is made!

THE GREAT FIRE IN MARK-LANE.—RECOVERY OF A LARGE AMOUNT OF PROPERTY.—A great body of flame remains in various parts of the ruins, and in some places the fire is still not yet subdued. Thirty men have been daily employed in removing salvage from the ruins. Up to last night they had recovered about 6 tons of Italian hemp, nearly 20 tons of iron-work, and soldiers' muskets and sabres. They also recovered about 5 tons weight of buffalo horns, 300 bags of turmeric, 2 tons of madder, 1 ton of chicory, 20 tons of jute 2 tons of horsehair, about £1000 worth of pigs' bristles, and an immense quantity of cloth and soldiers' clothing. It is expected that it will take at the least another fortnight to get the remainder of the salvage out. The arms and contrivances that have been extricated are near y all destroyed; and the splendid Oriental vases sent as presents by Indian officers to their friends in England have all been melted. There are still known to be 160 pipes of oil in the ruins, besides cases of castor oil, and 6 tons of loaf sugar. The bristles in the premises where the fire occurred were worth £20,000. The surveyors to the fire-offices anticipate getting about three times as much property from the ruins as they have recovered.

ON SYMMETRIC PROPORTION;

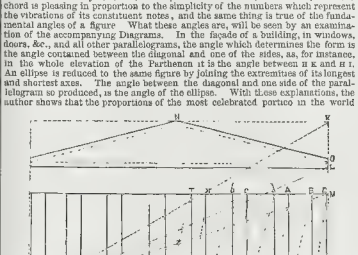
BEING THE SUBSTANCE OF A PAPER READ TO THE BRITISH ASSOCIATION AT EDINBURGH

BY D. R. HAY, ESQ., F R S.E.

(Communicated by the Rev. Professor Relland and Professor Goodsir, of Edinburgh University.)

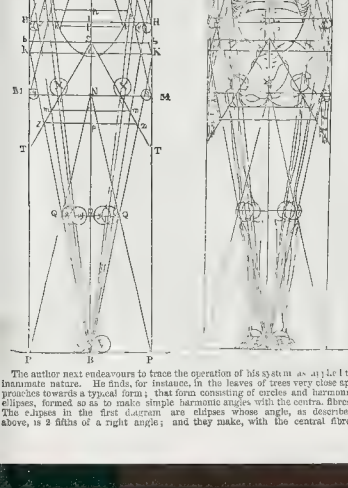
The basis of harmony in music is the fact that the ear is pleased with a mixture of sounds, when the vibrations which constitute them severally recur with a frequency expressed by some very simple arithmetical relations. Thus, when the notes C and G are struck together, a pleasing sensation is experienced, arising from the circumstance that the string which produces the one note makes two vibrations whilst the other makes three. On the other hand, if the notes C and C sharp, which vibrate nearly in the relative rapidity of 40 to 41, are struck together, the combination is exceedingly disagreeable, even to the most uneducated ear. The first position laid down by Mr. Hay is that the eye is influenced in its estimation of spaces by a simplicity of proportion similar to that which guides the ear in its appreciation of sounds. It may at first appear that this analogy between sight and hearing is not strict, inasmuch as the eye judges of effects by passing from point to point, whilst the ear judges of them only by receiving them all at the same moment. This difficulty is obviated by two simple considerations: the ear, which will appear more clearly by-and-by, that the standard of comparison is always present to the eye in ordinary cases, which is equivalent to the key note of an harmony being constantly ringing in the ear; the other, that all the faculties of man are from his birth under the influences of education, in voluntary or constained, so that the ear is continually advancing towards a power of estimating by succession, although from want of attention it may never reach the mark. Few persons are acquainted with the extent to which their faculties are capable of cult.vation. In early life, necessity teaches us their simpler uses. The child is learning to judge by muscular action of distances and positions. In hand soon finds its way to its mouth, and by degrees it can at once touch any part of the body, even in the dark, and there its education ceases. The blind fiddler, having heard none but the most simple performances, never ventures to quit the easiest portion of his instrument, from ignorance of his possessing that sense of distance, which, with a little cultivation, would enable him to trace his way to any part of the string. The appearance of a great *executant*, such as Paganini, proves to others that their faculties may be taught beyond what they have been accustomed to; and, although none may have his genius, many acquire his art. And the same is true of our other faculties. The ear, perhaps, receives less involuntary education than any other faculty, but that it is capable of cultivation, so as to be able, not merely to estimate sounds in succession, but with extreme accuracy to judge even of independent sounds, is well known to every musician. This being admitted, the analogy between the ear and the eye relative to this matter is complete. It will strengthen the argument, to remark that the eye is by no means naturally accurate in its estimation of spaces. The education of an artist enables him to detect errors in the proportions of a figure, which quite escape an uneducated eye. The next position laid down by Mr. Hay is, that the eye is guided in its estimate by direction rather than by distance, just as the ear is guided by number of vibrations, rather than by magnitude. The architect well knows that one elevation of a simple building is more agreeable than another, but, on the application of numerical ratios to their measurement, he finds them to fail altogether. Artists, from the time of Albert Durer downwards, have measured the relative proportions of the human figure, but neither architects nor artists have, as yet, arrived at anything beyond the most vague and unsatisfactory inferences. This has arisen from their having taken length, and not direction, as their standard of comparison—from their having endeavoured to apply simplicity of linear, not of angular proportion. A picture frame, in which one side is half the other, is not of nearly so pleasing a shape as another in which one side is half the diagonal, or the angle which the diagonal makes with one side is half that which it makes with the other

The basis, then, of Mr. Hay's theory is this, that a figure is pleasing to the eye in the same degree as its fundamental angles bear to each other the same proportions that the vibrations bear to one another in the common chord of music. Now, in music, the simplest divisions are by 2, 4, &c., which produce tonics; the next are divisions by 3, 6, &c., which produce dominants, and so on; and the chord is pleasing in proportion to the simplicity of the numbers which represent the vibrations of its constituent notes, and the same thing is true of the fundamental angles of a figure What these angles are, will be seen by an examination of the accompanying Diagrams. In the facade of a building, in windows, doors, &c., and all other parallelograms, the angle which determines the form is the angle contained between the diagonal and one of the sides, as, for instance, in the whole elevation of the Parthenon it is the angle between A K and A I. An ellipse is reduced to the same figure by joining the extremities of its longest and shortest axes. The angle between the diagonal and one side of the parallelogram so produced, is the angle of the ellipse. With these explanations, the author shows that the proportions of the most celebrated portico in the world



are derived from the following seven harmonic angles—1-3rd, 1-4th, 1-5th, 1-6th, 1-7th, 1-8th, and 1-9th of a right angle. These angles, seen in the Diagram, are E H I (1-3rd), L H I (1-4th), M H I (1-5th), C Z P (1-6th), K N O (1-7th), A C B (1-8th), Y Y X (1-9th), and no ang es different from these.

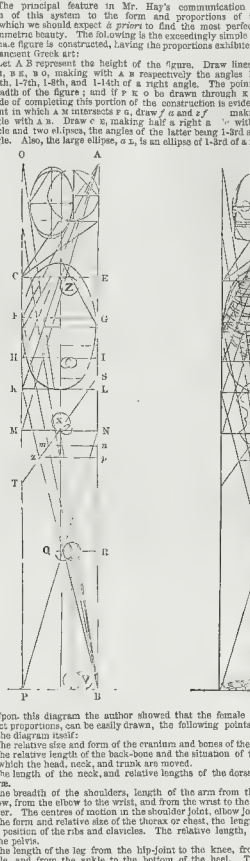
A large diagram was exhibited to the meeting, which seemed to agree with the pa.tes given in Stuart's "Athens."



The author next endeavours to trace the operation of his system as applied to inanimate nature. He finds, for instance, in the leaves of trees very close approaches towards a spiral form; that circles and parabolas and various other ellipses, formed so as to make simple harmonic angles with the centra. fibres. The ellipses in the first diagram are ellipses whose angle, as described above, is 2 fifths of a right angle; and they make, with the central fibre, angles of 1-5th. In the other two diagrams, both the angles of the ellipses and the angles which the ellipses make with the central fibre, are one-third of a right angle.

The principal feature in Mr. Hay's communication was the application of this system to the form and proportions of the human figure, in which we should expect *à priori* to find the most perfect development of symmetric beauty. The following is the exceedingly simple process by which a female figure is constructed, having the proportions exhibited in the best works of ancient Greek art:

Let A B represent the height of the figure. Draw lines A C, A P, A H, A K, A M, B E, B O, making with A B respectively the angles 1-3rd, 1-4th, 1-5th, 1-6th, 1-7th, 1-8th, and 1-9th of a right angle. The point K determines the breadth of the figure; and if P R o be drawn through K parallel to A B, the mode of completing this portion of the construction is evident. Through *f*, the point in which a M intersects P R, draw *f g* and *e f* making 3rd of a right angle with A B. Draw C E, making half a right angle with A B. As A are a circle and two ellipses, the angles of the latter being 1-3rd and 1-8th of a right angle. Also, the large ellipse, O L, is an ellipse of 1-3rd of a right angle.



Upon this diagram the author showed that the female figure, in its most exact proportions, can be easily drawn, the following points being determined by the diagram itself:

The relative size and form of the cranium and bones of the face.

The relative length of the back bone and the situation of the principal points by which the head, neck, and trunk are moved.

The length of the neck, and relative lengths of the dorsal and lumbar vertebræ.

The breadth of the shoulders, length of the arm from the shoulder to the elbow, from the elbow to the wrist, and from the wrist to the point of the longest finger. The centres of motion in the shoulder joint, elbow joint, and wrist joint.

The form and relative size of the thorax or chest, the length of the sternum, and position of the ribs and clavicles. The relative length, breadth, and depth of the pelvis.

The length of the leg from the hip-joint to the knee, from the knee to the ankle, and from the ankle to the bottom of the heel. The direction of the thigh bones. The centres of motion and position of the hip-joint, knee-joint, and ancle-joint. In short, the proportion of all the parts which characterise the general form, and the centres of motion in all the joints by which every change of attitude is performed.

To make the diagram suitable to the construction of the skeleton of the male form, it is only requisite to increase the fundamental angle, and divide it precisely in the same manner as for the female form. Diagrams and drawings of the skeletons of the female and male forms, full the size of life, were exhibited.

WONDER OF PENMANSHIP.—We have just been much pleased with the inspection of a marvel of miniature writing, which has scarcely a parallel. It may be characterised as a loyal tribute of national emblems: it is written upon a piece of vellum, 14 in. by 18 in., and consists of the following insignia and devices, each containing a prayer for the Royal Family, the crown being written in Hebrew; the rose in English; the thistle in Scotch; the shamrock in old Irish (Gaelic); the leek in Welsh; the oak-branch in German; and the lily in French. These are tastefully grouped; and beneath them are the three following emblems containing the Seventy-second Psalm:—Palm, in Hebrew (East Indies); laurel, Latin (West Indies); and the olive-tree, Greek (Peace). The whole is the work of Mr. Lewis Falkson, of Falmouth, who commenced this extraordinary labour two years since, at the age of seventy-eight years, and completed it within the present year. The performance is, of course, very minute; but it is equally clear and legible. A short time since it was shown to her Majesty and Prince Albert, and left a few days at Buckingham Palace for Royal inspection, when the Queen and Prince expressed themselves highly gratified with the wonderful work, accomplished by the writer at so advanced an age. It will be submitted to the committee for the Great Exhibition of 1851. Meanwhile, it may be seen by application to Mr Willey, 275, Albany-road, Camberwell.

SCULPTURE IN FRONT INCLOSURE OF BRITISH MUSEUM.—The statues to be set up on the four pedestals in the line of the inclosure will be those of Newton, Shakspeare, Milton, and Bacon: models have already been made for them by Sir Richard Westmacott, who, it seems, whether justly or not, considering how few opportunities the sculptor has in England, is to execute them all. The pedestals are in hand. A portion of the sculpture for the tympanum of the pediment is now on the premises. This is also by Sir Richard Westmacott, and represents the progress of man from a time when "wild in woods the noble savage ran," up to the hi hest state of intellectual advancement. The part already there executed is a broad, bold style, in Portland stone, and promises to be effective in its place. This sculpture, the antæfixæ, and the intended groups at foot of the central portico, may be expected to give to that the edifice at present very much warts externally—life and movement.—*The Builder.*

THE NEW COUNTY COURTS ACT.—The following list of business which may be transacted in the county courts, under the new County Courts Act, has been drawn up by Mr. Serjeant Dowling with great care:—Actions may be brought in the County Court to recover debts of every description not exceeding £50 (or that amount of a larger debt, the excess being abandoned) Damages (not exceeding £50) for assault, trespass, breach of contract, expressed or implied (as)—for non-performance of award, for not accepting or not delivering goods sold, or for breach of warranty thereof, for dilapidations, for breach of guarantee of all kinds, for breach of warranty of horses and other cattle, for breach of indemnity expressed or implied, for negligence by servant or other person, for breach of by-laws. Against agents for not accounting, not using due care, &c., apothecaries and surgeons for unskilfulness, apprentices for misconduct, articles, bailees of every kind, builders for breach of agreement as to buildings, &c.; carriers for losing or damaging property, refusing to carry it, or not carrying it within reasonable time; landlords for breach of contract, expressed or implied; tenants for ditto, agents for ditto, servants for ditto, schoolmasters for ditto. And for all other damages except damages arising from—malicious prosecution, libel or slander, criminal conversation, seduction, breach of promise of marriage. Actions for replevin—for recovering possession of houses or land, where the yearly rent does not exceed £50, for an unliquidated balance of partnership account, for a distributive share under an intestacy, for a legacy. And by the written consent of both parties (to be filed with the clerk on the entry of the plaint) to recover debts or damages of any amount, except damages for malicious prosecution, libel or slander, criminal conversation, seduction, or breach of promise of marriage. And by the like consent actions in which the title to land, tithe, toll, market, fair, or other franchise is in question.—Where the amount of debt or damage, and the conditions of payment can be agreed upon between plaintiff and defendant, such agreement being made before the clerk or assistant-clerk, or an attorney, judgment may be entered accordingly, at the office of the clerk, and the attendance of either party on the court-day will be unnecessary. Executors and administrators may sue and be sued as if they were parties in their own right.

REMAINS OF ROMAN ART DISCOVERED IN CIRENCESTER.

(To the Editor of the ILLUSTRATED LONDON NEWS *)*

In the *Times* of September 9th was published a letter from Mr. Thomas Wright upon the subject of the excavations at Lymne, in Kent. These investigations into the details of the early condition of this country being, as Mr. Wright very justly observes, "really of national importance," from the assistance they render to history, perhaps you will allow me to offer a few remarks upon the results of our various excavations in this town—the *Corinium* of the Romans, and also upon what remains yet to be done; for, although we cannot claim the honour which is due to Mr. Roach Smith and his coadjutor, Mr. Elliott, of having made "a deliberate attempt to uncover a Roman town," yet, in the course of our ordinary operations of house-building, &c., we have gone far—farther indeed than any other town in the kingdom towards accomplishing the same end

It will be fresh in the recollection of your readers, that, about this time last year, the workmen employed in making a drain down the principal street of this town were the means of bringing to light one of the finest tesselated floors ever found in this country. The excavations were continued for some weeks, and ended in the discovery of several other rooms, having their floors, hypocausts, pilæ, and flues all complete. The side of one of the rooms still retained its coloured stucco mural paintings. The best two of the floors were successfully raised, and are now waiting the erection of a museum, in which they are intended to be re-laid.

Besides those just mentioned, no less than *thirteen* other tesselated pavements have been found, at different times, in various parts of the town; some of which have been preserved *in situ*, whilst others have, unfortunately, been destroyed.

We have also found portions—though as yet, I am sorry to say, they are only *portions*—of richly carved capitals, of large dimensions, which must have belonged to some noble building. Bases of columns, too, are frequently found. Of works in metal and glass, pottery, and coins, we have, as might be expected, from the extent of our excavations, a great variety; whilst the monumental stones that have been discovered here are familiar to all archæologists.

Although a writer in the *Gentleman's Magazine* for last month has expressed a doubt upon the subject (from his own personal recollection of a visit to this place), we have ascertained, by examination of sections through the wall and mound in various places, that *Corinium* was fenced by a thick wall, supported on the inner side by a sloping bank of earth. You will see, by the map which I inclose, and distinct traces of this wall exist round more than two-thirds of the whole camp. For some distance on the south-east side it is to this day about fifteen feet high. The river Churn has been diverted from its natural course and now flows through the old Roman fosse.

On the west side of the town we have an Amphitheatre.

Having thus briefly stated what has already been done, I now proceed to suggest what remains yet further to do.

Cirencester occupies little more than a fourth of the site of Corinium. The area of the whole *castrum* is about 240 acres, of which, perhaps, 70 are occupied by the buildings of the town; leaving 170 acres of meadow and garden ground, in any part of which excavations might advantageously be pursued, without meeting with the obstruction of houses, which prevented our doing more last year. Running close up to the Roman wall, and within it, on the east side, we have an open space of nearly 100 acres, the surface of which has never yet been broken, but which immediately adjoins the part where so many pavements have been found, and close to the Lauses Gardens, already so well known for their rich and beautiful tesselated pavements.

At the south end of this open space, but on the other side of the Roman wall, is the site where the monumental stones were found; and it is of this spot that Dr. Conrad Leemans said, "It would be highly desirable, that, under proper direction, regular scientific excavations should be instituted in this place, for they would undoubtedly lead to discoveries which would throw new light on the early state of this country, and furnish many interesting hints for its history during the time of the Romans." Here, also, our operations might conveniently be pursued, and I have no doubt with success; in fact, I may say that I have received intelligence of another monumental stone, and also of two other tesselated pavements. The site upon which the portions of capitals were found has also yet to be properly explored.

During the summer of 1851, the Archæological Institute will hold their annual meeting at Bristol, from which place, I believe, they propose to make an excursion to Cirencester; and it appears to me a favourable opportunity for us to avail ourselves of the advantage of having so many of the persons who are best informed on such matters to assist us in forming the conclusions to be drawn from such investigations.

The day has long since gone by when the antiquary was a mere "collector of curiosities." We now no longer collect mere remains to a museum, but "fragmentary remains which tell of the past, and by a stern induction wring from them a portion at least of the secrets which lie hid within the mists of ages." (Journal Arch. Inst., Vol. 5, Intr.) The value of these remains of the past consists, then, not so much in their intrinsic worth, as in the amount they contribute to our knowledge of the condition of the people who occupied this country at a period of which history has told us a little; and as much depends upon the ability with which such conclusions are drawn, it seems to me important that our works should be going on when we have the largest amount of knowledge brought to bear upon them.

That there is much to be done here, there is no doubt; but we now come to the important question of "ways and means." Government has, of course, as Mr. Smith soon learnt, "no money for such purposes." The work must be done by private enterprise; but, although we are quite willing, and anxious, to do our share towards it, yet the operations which I should wish to see carried on are far too expensive for the amount of funds that we could reasonably expect to be contributed by the comparatively few persons who, in any one place, would take an interest in such matters. To enable us to do much we must have the assistance of the public, and I can only say that, in proportion to the amount of such assistance, so will be the benefit derived. From operations upon the small scale that we could manage amongst ourselves, little would result beyond the discovery and preservation of a tesselated pavement or two; but, from work executed by the public, I am convinced that some really important results would arise, which would throw some additional light upon the history of the Roman occupation of Britain, and the social condition of its inhabitants.

I am, sir, your obedient servant,

CHARLES H. NEWMARCH,

Hon. Secretary of Gloucestershire Archæological Society.

Cirencester, October 12th, 1850.

P.S. The pavements above referred to, as having been discovered last autumn, were illustrated, with a full account of their excavation, in the ILLUSTRATED LONDON NEWS of September 8th and November 17th, 1849.

DEATH OF MISS BIFFIN.—On Wednesday week, Miss Sarah Biffin, the celebrated miniature-painter, who was born without hands or arms, died at her lodgings in Duke-street, in this town, at the age of sixty-six. The deceased was born at East Quantoxhead, near Bridgewater, Somersetshire, in the year 1784. She manifested in early life the talent for drawing and painting which she afterwards cultivated to so extraordinary an extent; and she was instructed in the first rudiments of the art by a Mr Dukes, to whom she bound herself by a written agreement, to give the whole of her time and exertions, and for that purpose to remain for a term of years in his house. Some time after the engagement had been contracted, the late Earl of Morton became acquainted with, and so much interested in, Miss Biffin, that he caused her to be further instructed by Mr. Craig, a gentleman of great eminence in his profession as a miniature-painter. Under his skilful tuition, she attained to an almost miraculous degree of perfection. She remained with Mr. Dukes for nearly sixteen years, during the whole of this time residing with Mr and Mrs. Dukes, as one of their family, and was treated by them with uniform kindness; but it will scarcely be believed, although such is undoubtedly the fact, that in consideration for this exclusive sacrifice of the best years of her life, Miss Biffin, at no time, received from Mr. Dukes, in money, more than £5 per annum. Miss Biffin was patronised by their late Majesties George the Third, George the Fourth, William the Fourth; by the late Queen Dowager, by her present Majesty, by Prince Albert, and by a host of the nobility, and other distinguished persons. For many years she supported herself by miniature painting; but after the death of her noble benefactor and ever kind friend, the Earl of Morton, there was no one, like him, ready to assist her in obtaining orders for pictures, or in disposing of such as she was enabled to complete when not otherwise employed; and as age grew upon her she became much reduced in circumstance. A few years ago she came to Liverpool, where she made an ineffectual attempt to support herself. Our benevolent townsman, Mr. Richard Rathbone, took a great interest in her welfare, and it was principally by his exertions that, a short time ago, a small annuity was purchased for her by subscription.—*Liverpool Mercury.*

MEDIÆVAL BRICKWORK.

OUR Illustrations represent various interesting examples of the skill of our ancestors in the manufacture of moulded bricks, and are good studies for our modern workers in the fictile arts. The old Manor House at Cressingham, in Norfolk, which we have selected as a specimen of the class of ornamented brick-fronted houses, is peculiarly handsome in its appearance.

For the sketch of Cressingham Manor-house, and the following particulars, we are indebted to a correspondent:—

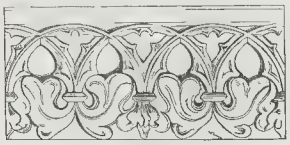
"This house, which is situated about five miles from Swaffham, in Norfolk, is remarkable for the fact that its exterior is entirely coated with tracery formed in whitish terra cotta. It was probably constructed at the latter end of the fifteenth century, when the family of the Jopsons were the possessors of the place. Blomfield, in his History of Norfolk, mentions the arms of this family as being in the hall in his time; probably, they are still there. The ornament which divides the upper and lower stories has rather a German appearance, but the tracery is decidedly English. A few years ago, a most elaborate ceiling, and, as far as I could ascertain, coeval with the hall, was discovered, but has been unfortunately covered up again with a ceiling. The front windows are modern and of wood. The whole edifice, no doubt, anciently was surmounted by a battlement and parapet; this has entirely disappeared, but I was shown a portion of a Tudor pinnacle dug up within these few years, which confirms the fact of its existence.

"There are traces of a moat, which formerly surrounded the whole edifice, but which is now quite dry. The church is about a mile distant, and possesses a

CRESSINGHAM MANOR-HOUSE.

good roof, and the lower part of a rood screen, in which the foliage has a decided German character—an occurrence which is more common in Norfolk and Suffolk than elsewhere; probably the trade of these counties with Flanders during the middle ages may account for the peculiarity."

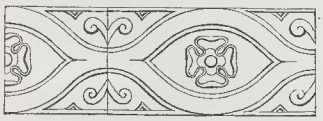
In Fig. 1 we have represented a portion of the frieze between the ground-story and first-floor of Cressingham; its character is extremely good.

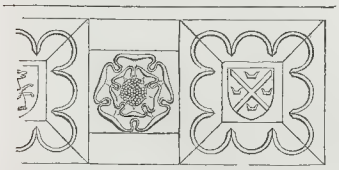


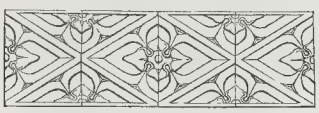
MEDIÆVAL BRICKWORK.

Figs. 2, 3, 4, 5, 6 are ornamented bricks from Wolterton House, in the parish of East Barsham, Norfolk—a house celebrated for the variety and richness of its architectural mouldings in brickwork.

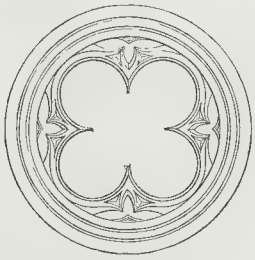
Fig. 5 is copied from an engraving in Vol. 5 of the *Archæological Journal*. It is a quatrefoil, elegantly moulded, and burnt to a bright red colour. This is

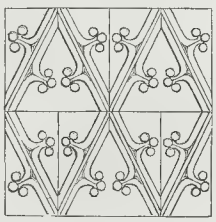






an extremely clever and interesting example. It is from the inside of the north wall of the chancel of Frittenden Church, in Kent.





THE HANDLEY TESTIMONIAL AT SLEAFORD.

THE first stone of this monumental cross to the memory of the late Henry Handley, Esq., was laid in June last, and the structure is fast progressing. In outline, the memorial bears some resemblance to those gems of mediæval art, the crosses at Waltham and Northampton, erected by Edward I. to the memory of his beloved Queen Eleanor: in detail, however, the design is very dissimilar, and claims to be originality. The figure of Mr. Handley will be executed in Caen stone, by Mr Thomas, of London, and occupies a central position, at an elevation of seventeen feet from the ground, standing on a pedestal under crocketed arcades, which support the superstructure. Up to the cornice above the figure of Mr Handley, it is rectangular in form, with a buttress at each angle; the next course is octagonal, with canopied niches on each face, ornamented with richly-carved crockets, containing appropriate figures; and above the cornice which terminates this course it again returns to the square, placed on the angle, each face having figures on pedestals under canopied niches, something like the lower portion. A battlemented cornice, with the ball flower in moulding; and the whole is terminated in a crocketed spire empanelled with richly flowing tracery. The design is of middle pointed character, about Edward I. and II's time. The entire height will be about seventy feet. The architect is Mr. Boyle, of London.

Immediately after the laying of the foundation-stone, Mr. Foster, who had performed that ceremony, addressed the company in an appropriate speech, in which he took occasion to refer to the birth of Mr. Handley in the town of Sleaford, fifty-three years ago, and to his early habits and character. He then drew a rapid sketch of his career at Eton, and afterwards at Oxford. He alluded to his becoming the representative of the now disfranchised borough of Heytesbury, of finding himself in the House of Commons of that day among several of his former college companions—of the indication he then gave of aptitude for public business, and talents in debate, greatly assisted by manners of a popular character. He referred to his zealous pursuit of the science of agriculture, at that time but imperfectly understood, and to his celebrated letter to his friend the late Earl Spencer, which led to the formation of the Royal Agricultural Association of England, of which, four years after it was established, he had the honour to occupy the presidential chair at the great meeting at Bristol in 1842. Allusion was then made to the circumstances under which he became a candidate for the representation of South Lincolnshire, after the county had been divided by the Reform Act, and to the long canvas of the division during the summer and autumn of 1832, when he was opposed by Mr. Heathcote and Sir John Trollope, two most formidable competitors, whether considered with reference to the large amount of support derived from many of the great landed proprietors, or to their own personal abilities and high character; and to his ultimate success in the three successive elections for South Lincolnshire. Reference was next made to Mr. Handley's valuable services in the House of Commons in resisting attacks upon the agricultural interest, and in obtaining the repeal of several obnoxious imposts to which the members of that body were subject—to his subsequent loss of the election of 1841, and to the causes which led to that result, attributing Mr. Handley's defeat mainly to the unfortunate advice which he (Mr. Forster) had given him to withdraw from the representation for a time. In conclusion, Mr. Forster said, "Such was the man to whose memory the splendid cross is now about to be erected in this place. It will serve for generations yet to come, as an incentive to others who may aspire to the same distinction, to follow in his steps, and to emulate his bright example; and it will remain a lasting monument to his great name and fame. Honourable as it will be to him, it will scarcely be less so to those by whose gratitude it has been raised. It will prove that in these our days the yeomanry of South Lancashire were not insensible to the merits of a public servant, and that their gratitude to the man did not terminate with his valuable life. His name, the name of Henry Handley, will be held in veneration, in affection, by the people of this town and county, so long as honour, virtue, talents, charity, and benevolence are held in respect among Englishmen!"

THE HANDLEY TESTIMONIAL AT SLEAFORD.—ELEVATION.

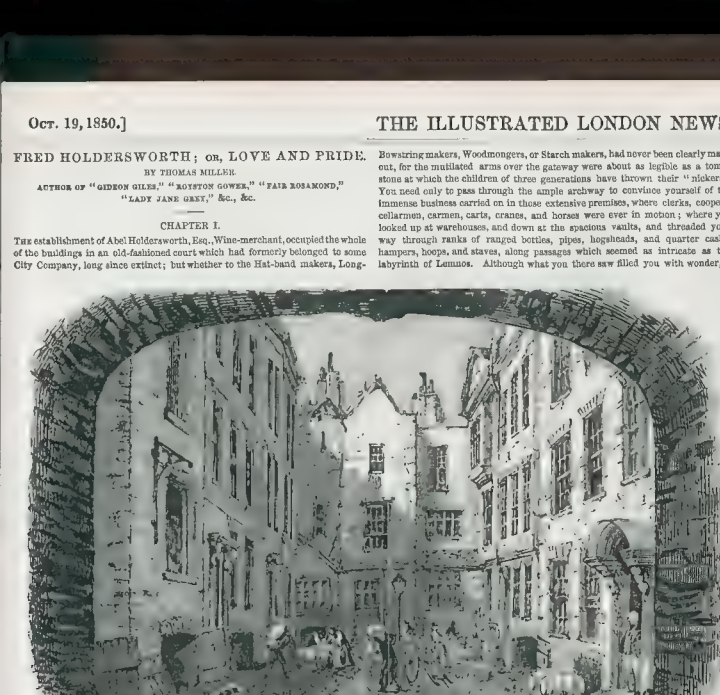
FRED HOLDERSWORTH; OR, LOVE AND PRIDE.

BY THOMAS MILLER.

AUTHOR OF "GIDEON GILES," "ROYSTON GOWER," "FAIR ROSAMOND," "LADY JANE GREY," &c., &c.

CHAPTER I.

THE establishment of Abel Holdersworth, Esq., Wine-merchant, occupied the whole of the buildings in an old-fashioned court which had formerly belonged to some City Company, long since extinct; but whether to the Hat-band makers, Long-Bowstring makers, Woodmongers, or Starch makers, had never been clearly made out, for the mutilated arms over the gateway were about as legible as a tombstone at which the children of three generations have thrown their "nickers." You need only to pass through the ample archway to convince yourself of the immense business carried on in those extensive premises, where clerks, coopers, cellarmen, carmen, carts, cranes, and horses were ever in motion; where you looked up at warehouses, and down at the spacious vaults, and threaded your way through ranks of ranged bottles, pipes, hogsheads, and quarter casks, hampers, hoops, and staves, along passages which seemed as intricate as the labyrinth of Lemnos. Although what you there saw filled you with wonder, it



was said to be nothing in comparison to the bonded stock, for the cellarmen declared that Abel Holdersworth

> Had pipes enough, they knew,
> Placed side by side to reach to Kew,
> And which, if placed end to end,
> Almost to Windsor would extend. DR. WALCOTT.

As for his wines! if they were to be believed, there were no such wines in the world. Had you sworn that you had drunk of the vintage Noah first planted, we do verily believe that they would have asserted that Abel had a few bottles stowed away somewhere, which were older than the deluge. If you boasted of having tasted five old port full of beeswing, they talked of wines he possessed which had passed that stage before they were born, and which, at double and and treble compound interest, came to so much a bottle, that it almost took your breath away when you heard the amount, and recalled the costly pearl Cleopatra dissolved in her goblet and swallowed. You could not name a wine-growing country, but what they said he did business with; and one old clerk, who knew but little of geography, and drew the "long-bow" tremendously, talked about an agent for cooling sherbet in the Arctic regions, and hinted that our Northern Voyagers did business for their establishment—over the extent of which they all delighted to throw the marvellous.

Still, with all his wealth, the great wine-merchant was in certain things a near man, for at times he stood like a barometer, at hot, cold, change, and even down to the freezing point, for so was he occasionally generous to a princely extent, then close-handed again as a miser, and occasionally "mean to meanness." He had been known in his younger days to sit for an hour together unravelling and unknotting pieces of string with his fingers and teeth, as he said, to set his men an example and save a penny; yet if he were in one of his sunshiny moods, he would throw aside his profitless employment, and sign a check for fifty guineas to be given to some benevolent institution: indeed there was but seldom a list of charitable subscribers but what contained his name, and yet with all that,

> In the way of a bargain
> He'd cavil on the ninth part of a hair. SHAKSPEARE.

He had a great objection to single men possessing more money than they really needed, and allowed his servants handsome interest on all they left in his hands, thus encouraging them, as he said, to save early out of their salaries. When they were married he considered they had a right to become their own masters. Even to his nephew, to whom everybody believed he would leave all his wealth, Abel only allowed fifty guineas per annum, which was considerably less than he would have received as a salary in any other house, considering the responsibility of the situation he held; but he boarded and lodged with his uncle; and had he wanted a thousand pounds for any reasonable purpose, nobody doubted but what his wealthy relative would have given it to him; this, however, the young man had never tried. Beside his wife, Dame Holdersworth, as her husband always called her, he had a brother, an old gentleman who had seen some service, and who now lived on his half-pay. Some said the old officer was a little cracked, others that he was only odd in his ways, while a few asserted that they had the old soldier's knowledge. Dame Holdersworth was almost always talking about the great people she had seen, and what they said to her, and what she said to them: she dearly doated on a Duke, the society of an Earl was to her enchanting, and a Lord and upwards above all things, and always felt, as she said, at her ease in such society. Abel used to say they were all very well in their way, but that many of them required dancing long credit. These, with the exception of a niece on the wife's side, who had for some time been staying with a distant relative in the country, were all the "humanities," as Abel jocularly called them, which befelt bound to provide for.

"Fred, my boy," said the uncle, addressing his nephew in an unusually familiar manner, after having closed the door of his own counting-house, on which was written "MR. HOLDERSWORTH, PRIVATE," "the painters, paper-hangers, and I know not who besides, are coming in to-morrow, after we have started to Margate. You know how much I should like you to go with us; but that's impossible, as in my absence you are my representative. Fred, that is, I leave all important matters to you and my old confidential clerk, John. As it is a fine day," added he, looking up, and he had to look a good height to see the sky at all in that old square court-yard, surrounded as it was with high buildings, "I have been thinking a walk will do you good, and that you might look out for a couple of nice clean-looking rooms, somewhere within an hour's ride by the omnibus, and take them for two or three months, while the painting and cleaning and such like are going on—in short for the whole summer: I have fancied you have looked a little paler lately."

"I feel in excellent health, thank you, uncle," answered the nephew, "but, for all that, shall be glad to go to Peckham Rye, or Forest Hill, or anywhere in that neighbourhood, if I can be spared, for I prefer the fresh air to smoke."

"Ten in the morning is quite as early as you need to be here," answered the uncle; "and you can generally leave about four in the afternoon. As some of the servants will have to remain, you will of course dine just the same; and should any of my intimate friends call, you will invite them to luncheon and such like, just as if we were at home." All this Fred promised to do, and to make every one as comfortable as he possibly could.

"You will want a little extra money said" the uncle, "for apartments, breakfasts, and such like; I had better give you twenty pounds. And be sure and be careful in getting up and down those omnibuses, for I know how partial you are to a cigar, and conclude that you will ride a good deal outside. Don't deny it, Fred, some one has called it 'an innocent vice,' and I blame my brother more than you, my boy, but do not carry it to excess."

The nephew looked a little confused at this charge, but it did not prevent him from lighting his havannah the instant he had seated himself outside a Peckham omnibus in Gracechurch-street.

Fred Holdersworth was not a young gentleman to feel proud because he had got four new crisp five-pound notes in his pocket-book, besides a few loose sovereigns in his purse, for he had never known the want of money. What he felt proud at was being loosed for the first time from the leading-strings, and left to select his own apartments, and set up, as it were, gentleman for himself. When he alighted from the omnibus, he looked as if all Peckham Rye belonged to him, and the neighbourhood of Forest Hill besides. He raised his gold eye-glass and surveyed the Common and the surrounding hills, exclaiming to himself, "Beautiful prospect! Secluded, very." Fred prided himself in his admiration of nature, which was, no doubt, chiefly owing to his so seldom looking upon it beyond the walled world in which he dwelt.

But it was not nature alone in the out-of-door world, amid her fields and flowers, which the young man admired; he also sought for it in character. "Give me a wife," said Fred, "when I do marry, that is a child of nature—one whom I can train to love me in my own way; who has never been spoilt in a finishing academy, taught to curtsey by the card, and smile according to the most approved rules. No, I will have none of that; give me pure, simple, unsophisticated nature, it even it comes from the humble wayside cottages. I hate appearances."

And, as some such thoughts as these passed through the young man's mind, he adjusted his neat shirt collar, pulled his wristbands a little lower, ran his fingers through his hair, looked down to see that his gold guard chain was properly arranged, then, giving his silver-headed cane a peculiar twist, walked on, internally condemning the folly of mere appearance, while he was thus most carefully adhering to it. For, thought Fred, "I should like them to see that the apartments I want are for a gentleman."

We will not follow him in and out through some half-dozen houses, at one of which he promised to call again, if he met with nothing that suited him better. He now struck into that pretty bit of road which leads to Goose-green, or, turning off midway, over the fields, and out by that old picturesque road-side inn, the Plough, takes the pedestrian through green fields to Dulwich; along ancient footpaths, which Shakspeare himself has, perhaps, traversed in the company of Allcyn and Burbage, when the "player" first purchased the property on which Dulwich College now stands. The old pollard oaks by the thick aged hedgerows, and the deeply wooded banks,dues by the watercourses, that wind along beside these well-worn footpaths, proclaim their antiquity.

But we are carrying our readers far beyond the place where the young man's eye was first arrested by a paper placed on the stem of a beautiful acacia (the tree having now shaken off its golden pendents), announcing "Apartments to Let." It was not, however, the beautiful tree alone, nor the high thick privet hedge, nor the neat rustic gate, that arrested Fred's attention, but the name which did it:—THE COTTAGE OF CONTENT

"Charming, delightful! This is a snug retreat for one that has so long been buried in yonder busy city. I hope this is no cottage of gentility," as Porson calls it in "The Devil's Walk."

And Fred opened the gate gently to take a closer survey; looking up again at the board on which the name was painted, and muttering to himself, "May I find it here, I have long been looking for it." He meant Content, for he fancied he had many troubles for a young man of one-and-twenty. He wanted "nature," as he said.

Much as he was struck by the green seclusion of the spot, he was not at all prepared for the startling picture within the garden. "It struck him all of a heap," to use an expressive phrase; but he saw everything through the eye of nature. The vision that startled Fred so much would, to the eye of a common observer, have looked like a very pretty young woman tying up a woodbine to the latticed porch of the cottage. To his eye she appeared a Peri trailing roses round the gates of Paradise; the sunshine that fell upon her, a glory in which she was clothed.

"We must have old John the gardener to cut it again," said she to her mother, without observing Fred, who was gazing on her with all "his might and main;" "for I cannot train it as I wish, do all I can." This was spoken in a rather pleasing voice; but to Fred's ear, it excelled the music of all the nightingales that ever sang since the first pair built in the tree under which long-haired Eve slept in the Garden of Eden. "Beautiful being!" and the young simpleton to himself; "can she be mortal?" Had he seen the quantity of brown bread and butter she had eaten that morning at breakfast, he would neither have doubted her mortality nor her appetite. He, poor fellow, thought such lips could only feed "where the bee sucked;" nay, if any one had sworn that she was devouring honey from the woodbine she was tying up, love-stricken Fred would almost have believed it

He saw in the colour of her really fair countenance roses and white lilies blended together; in her teeth, which were very white, he beheld ranged Maybuds; and in the lips, heaven knows what—such a mass of roses, rubies, cherries, strawberries, and all sorts of flowers, gems, and sweet, ripe fruit came across his fancy, that it was fairly smothered beneath them. Her chin he compared to the graceful curve of the silver moon when she has waned into something like the shape of a harvest sickle. Her hazel eyes were in his eyes brighter than the brightest stars, seas of light, diamonds, anything glittering the reader can picture; and then it will only bring a faint conception of what Fred imagined them to be. They were soft, bright, modest eyes enough; but we have seen eyes as beautiful hundreds of times. Fred fancied he had never looked on such before. Her hair, which was done up neatly, he fancied resembled that of a Grecian nymph's, which he had seen in marble in the British Museum. But her neck—here he again found something to admire, wreathing, then upon, especially in the shadow of a vagrant ringlet which had fallen loose, and flickered to and fro as she moved. Flowers in streams, the shadow of a rosebud sleeping in the sunshine, a jasmine spray mirrored on a window in the moonlight, were as nothing compared to the string of images which Fred put together while looking at the shifting shadow made by that stray ringlet. Poor fellow! he was in love, deeper than he probably would have been had he courted her three months. In his eye she would ever look the same; always be attending flowers, or doing some such "gentle spiriting" as he had read about in old stories. Had you told Fred that those hands washed, ironed, threw up the cinders, cleaned the hearth, dusted the hobs, washed the dishes, we question very much if he would at that time have believed you. No; she ever dwelt in his eye among roses and posies, bowers and flowers—birds, bees, and butterflies were her companions. Had you told him that nasty earwigs, and long-bodied wireworms, with legs almost as numerous as the figures in a ready-reckoner, and ants that bit dreadfully, and black slugs whose trail was anything but silvery, went biting and burrowing about the garden which "her beauty haunted," Fred would hardly have believed that Nature could have been guilty of such impropriety where she was present. Close confinement in his uncle's office, reading novels and love-sick poetry, had prepared Fred as nicely for falling into love at first sight (if any pretty face presented itself), as getting into a steaming perspiration prepares a man for catching a nice, comfortable cold, if, while in that state, he selects a spot to sit in, where there is a chilling Wenham-lake sort of a draught.

To do her justice, and look at her without falling in love as he did, she certainly appeared very pretty, standing under the chequered shadows made by the trellis-work, and the waving trails of the woodbine, all strongly thrown out by the brightness of a July sun, which gave a tinge of golden green to her tight-fitting cotton-dress, that in Fred's eyes no doubt looked richer than satin.

Her mother, too, would have looked well in a picture, sitting as she did in a garden-chair, her dark dress relieved by some white garment she was repairing. Beyond her fluttered apparel of all hues on a long clothes-line, making a nice contrast against the green leaves, an array from the costly materials of some of the garments, showing that they neither changed to herself nor her daughter; but the proprietor of this little paradise as ed considered it, and into which he had ventured, was a Laundress.

After another pull at his collar, and a drag at his shirt-wristband, a touch or two at his side hair, he approached as upright as he had swallowed a poker for the occasion, until having reached just such a distance as he had seen the walking gentleman do in a similar scene on the stage, he took off his hat, made a bow as near the gentlemanly angle as possible, gave a "hem" to clear his throat, and, having twice or thrice studied what he should say, though "Fair angel" "Beautiful spirit" &c., had presented themselves and been rejected, as not half good enough having, we say, made all preliminary arrangements, and being in the act of making an ass of himself by his opening address, he was fortunately saved by the daughter exclaiming before he spoke, "Mother, here's a gentleman come and see what he wants;" and throwing the stray ringlet aside with her little hard-working hand, she entered the cottage and put a large piece of most unpoetical fat bacon into a pot which was standing over the fire, and which together with the shelled beans that stood in a dish, proclaimed, as plain as could be, that this, to Fred, beautiful spirit of the flowers, was preparing dinner.

To speak the truth, the young woman was very modest, and did not much like the grimaces and antics of the young citizen, as he stood with his hat in one hand, and the other on his heart, as if he had either got the cramp, or was making love in dumb show, or come round for a subscription: she was a pretty and a sensible girl, and nothing more; and not used to seeing pantomimes.

As to her mother, she came to the point at once, and said, "Well, young gentleman, what is your business?"

The last word made "Richard himself again"—it was so like his uncle, when some poor fellow wanted his acceptance renewing, or a further supply of wine on credit—and so rapid, in good unmistakeable English, "I have come to look at the apartments you have to let. I want a couple of rooms for two or three months."

"Any family?" and the plain-speaking laundress.

"Have not the happiness of being married," replied Fred, with a really good-natured smile; "nor engaged, if that is any further recommendation. Here is my card," added he, taking out a rather gaudy card-case; "the address is the London Literary Institution, where, upon enquiry, you will find that I am respectably connected:" and he drew himself up somewhat haughtily as he uttered the last sentence. The laundress curtsied as she received the card, and had just time enough about her to say, "Your appearance is sufficient to prove that, sir;" at which Fred smiled, and made a very gentlemanly bow.

The young man was very fond of referring to the London Literary Institution, for he knew not only one, but the whole of the committee, officers and all, would guarantee his respectability, without entering into minute details as to who or what he was. Price the Pawterer, of Portsoken Ward, for instance, had

Matilda, in a few modest words, assured him that it would be their study to please him; to which he replied, that he should give them but little trouble, and that he was sure nothing but pleasure could be found where one so amiable presided; at which the young woman curtsied and blushed, and Fred thought he had never seen anything so beautiful in his life as her modest confusion

He next learnt from the mother that a lady had rented the apartments every summer for the last seven years, but that, by the advice of her physician, she had now removed to a milder climate, and that he was the first "gentleman" to whom they had ever let lodgings, all of which information was delightful to Fred, as he thought it a perfect providence to alight on such a piece of Nature, concluding, of course, that Matilda had never had a lover

When asked by the daughter if he was fond of flowers, Fred went into raptures. "They are," said he, "the most beautiful objects in creation, except beauty herself. I have stood for hours contemplating them in Covent-garden Market, and often, for a change of air, and to see the green leaves wave, I have wandered round Finsbury-square, in the moonlight, listening to the rustling of the foliage, at the intervals when vehicles were not passing."

After this outburst, he began to praise the beauty of a rose which Matilda had stuck into the hand of her coquettish little apron, declaring that he had never seen a lovelier one: to which Matilda replied, that, as he admired it so much, perhaps he would do her the favour of accepting it; which, of course, he did, and returned thanks in another speech full of flourishes, the purport of which was lost on the laundress' daughter. She, however, offered to gather him a nosegay, to take back to town with him; and, according to an old fashion of her mother's, who was a countrywoman, she formed the bedge-mustard, a large cabbage-leaf, and a little parsley into one big enough to fill a gallon jug, not sparing even the southern-wood or "lad-love-lass," as she called it, while recommending it on account of possessing so powerful a smell.

With many more compliments, and promises as to the hour he should arrive on the following day, and a little advice from the laundress about bringing his tea and coffee and such like things from the City, as they were so much better there, Fred took his departure, though not until he had turned back twice or thrice to shake hands with Matilda, and even then he stood raising his hat no end of times at the rustic gate, and, it is very probable, would have continued to do so much longer, had not the laundress and her daughter, who wanted their dinners, again entered the cottage. Not making above a dozen mistakes in the half-dozen lines he repeated, Fred went along, waving one arm, and exclaiming:—

> If changing cheek and scorching vein,
> Lips taught to writhe, but not complain;
> If burning heart, and throbbing brain,
> And all that I have felt, and feel,
> Betoken love—that love is mine. BYRON

And, as a proof of it, he gave himself such a slap on his left breast as made his fingers tingle again, as he repeated "that love is mine." Except his aunt and cousin, Fred had seen but little of female society.

CHAPTER II.

After strolling about the neighbourhood for some time, and pronouncing it the most delightful spot around London, Fred again mounted the outside of an omnibus to return to town. He was, of course, very happy and very talkative; and, having taken his seat beside the driver, and given him one of his best havannahs as a propitiatory offering, he began to expatiate upon the beauty of the scenery around Peckham Rye.

"It must be very healthy," said Fred, "when the wind blows over from the coast of Kent; why it's almost like living by the sea-side, for you are no great distance from the sea?"

"It's all werry well, sir, when it comes from that 'ere quarter," replied the red faced omnibus driver; "but see it when it comes from the City, and brings a Norwester fog with it; then it gives you a'most a mind to stand."

"But do you not consider it very rural?" continued Fred. "Why, I saw them making hay in a field by Forest Hill. What could you see more rural, if you went a hundred miles out?"

"If I may be allowed to venture my opinion, sir," answered the driver, "I thinks it a good deal more 'rurale' about six or seven miles on t'other side of Sevenoaks. Fine land there, sir."

"I have seen the hop-gardens near Gravesend," said Fred, "and was greatly struck by their appearance, they seemed so ready and artful."

"Law bless you, sir," said the driver, who now began to "smoke" his passenger, "I've seen woods wi' trees so high that they were forced to crop the tops every two or three years, to keep the country from being flooded."

"From being flooded!" exclaimed Fred; "what had the trees to do with the water?"

"Catched the clouds, you see, as they went over," answered the driver, "and brought all the rain down. Not a drop would fall for miles round, if them 'ere trees wasn't cropped."

"Oh, I see," replied Fred. "It struck me that agriculture seemed pretty forward in these districts."

"It's a deal forwarder over the hill, sir," said the other. "Gorse is out in flower, and nettles look healthier—never saw chick-weed finer."

Perfectly unconscious that the crafty driver was quizzing him, Fred showed him the flowers, and remarked that it must be fine air where those were grown.

An outlet-looking man now got up beside the driver, and, as his conversation was more interesting to him than Fred's, the latter was left to smoke his cigar the rest of the journey in silence

Before going home to dinner, Fred called on his bosom friend; for he had an acquaintance whom he trusted with all his secrets. Most young ladies and gentlemen have one such friend. He knew it was about the time when Tollerton left the banking-house, and he waited outside to see him.

"Ah, Fred!" said Tollerton, whose appearance was "much of a muchness" with his friend's, "What news?"

"Found such a priceless gem to-day," said Fred, raising his eyes; "an inestimable jewel!"

"Have you got it with you?" inquired Tollerton.

"Would that I had," answered Fred; "would that I could wear it in my bosom for ever."

"If it's so valuable it might be stolen," said Tollerton. "You'll advertise it, of course"

"Your thoughts are running on paltry gold and gems," answered Fred, releasing his friend's arm. "I am speaking of a nymph—a goddess—an angel!"

"Oh, I see," said the matter-of-fact banker's son, comprehending him at last, "you mean some girl."

"Girl, sir!" exclaimed Fred; "I tell you she's an angel—an houri—a grace—a rose—a peri."

"Of course she's a lady. When I said a girl, I meant that. Very pretty?" inquired Tollerton.

"Pretty!" echoed Fred; "celestial—heavenly—angelic! And oh, Tollerton, my friend, what I never expected to find, she's a child of nature—that nature which you and I, with a hundred others, have so often talked about and looked for in vain. I'm in love, and shall marry her."

"Have you known her long?" inquired Tollerton

"Long enough to love, so adore her," replied Fred. "Such a heart as you know mine to be, can receive but one impression. That impression it has received to-day: her image is stamped here," added he, striking his breast. "May I prove worthy of her!" And Fred raised his eyes as he spoke.

"Of course she talks, draws, loves music, and all that sort of thing," said Tollerton.

"Listen, my friend," said Fred, now becoming almost eloquent; "I question if her education extends beyond mere reading and writing. Dancing, drawing, and music, she probably knows nothing of; yet, in my eyes, she is ten thousand times more captivating in her ignorant simplicity than all your accomplished ladies, as they are called, even after hundreds have been spent upon them to destroy all the natural charms they possessed. She is a child of Nature, Fred not one trained, like many of those you and I have met occasionally at city balls, to captivate young men by their artificial accomplishments; such as might have been seen in the vale of Arcadia watching their flocks."

Fred was fond of pastoral poetry: anything about nymphs, fauns, and dryads delighted him; moreover, he was earnest for the time in whatever he did.

Tollerton looked on the present for a moment thoughtfully, then said, "Of course, you'll consult your uncle before you make the lady an offer?"

"Not a living soul, saving yourself," replied Fred. "My uncle is a man of the world, and would oppose my union. My secret is safe with you, I know."

"That you well know," answered the banker's son. "You have proposed, then."

"She does not even know that I love her," replied Fred; "have never seen her before to-day." He then told his friend how he had taken apartments at Peckham, and other matters which our readers already know.

To which Tollerton replied that he was "rather puckish," having had nothing but a biscuit since he breakfasted; and so the young men separated, after Fred had again sworn him to inviolable secrecy

Fred Holdersworth was one of those young men who obtain a smattering of everything, yet understand few things thoroughly, what our plain-spoken forefathers called "Jack-of-all-trades and master of none." He could get up and make a speech at the Literary Institution, "all sound and fury"—words, words, nothing but words; would argue for the mere love of talking, and take whatever words came first. He had been known to speak, young as he was, for an hour together; but few remembered a single sentence he had uttered five minutes after he had sat down. He seemed to be very clever in a general kind of fun, and blinded by his own conceit and the flattery of his little-minded friends—young men who, when they could bring no reason to bear upon what they said, would end with "That is my sincere opinion, and every one has his opinion." He belonged to a class who are all clamorous to be heard, few wise enough to sit down humbly to listen and learn. He boasted that he had no pride, but that he hated it—this the "coming events" in our story will prove: that all accomplishments were unnatural, affected, deceitful, and that Nature did not require us to be able to do more than read, write, and count (the proof of this was nearer than we dreamed of); that the man who married a woman for anything but love was mercenary; that all were made equal, and there would never be any true happiness so long as society made a distinction between rich and poor, and that appearance was all nonsense (he changed his tailor three times in one year, because his trousers did not sit so well as Tollerton's). Nature! nature! was ever his cry; give him nature—he wanted nothing more! He tried all he could to deceive himself; he looked on the world (or pretended to do) as he wished to see it, not as it is. He would have been a sensible and clever young man, had he not tried to stifle the voice within him to silence his own common-sense. As it was, take him out of his uncle's business, and in the ways of the world he was very ignorant, though somewhat of a sensible young man after all.

When he reached home he was greatly surprised to meet his pretty cousin, and to find that she had come to spend a few weeks with his uncle and aunt, at Margate. Any other young man but Fred would have been "over head and ears in love" with so pretty a cousin; she had such a sweet-tempered countenance, and such a pair of laughing eyes, that it made anybody happy only to look at her. Fred had not been long enough in love with Matilda that news was not a bit of true nature in her. "Art, all art," he would say to Tollerton; "made up by the dancing-master and her governess." They had not met for a length of time, and, filled as Fred was with young Lovegrove's praises of the laundress's daughter, he could not help acknowledging how greatly she had improved.

She was in the dining-room, alone, when he entered, and came with open arms to meet him, as a dear old always does; for in their childish days they had been brought up like brother and sister, had scratched and fought each other; had had many a squabble and many a kiss; and, though in their way rather fond of one another, they differed so far from Dr. Watts as to believe that—

> Their little hearts were not made
> To bear each other's frowns

Their quarrels often arose from such causes as those which broke the peace of Nancy Lake and her brother Jack; for, when she had offended Fred, he went to Lor drawer,

> Took out the doll, and oh, my stars!
> He'd poke her head between the bars,
> And make off half her nose.

Forgetting all these childish tiffs, and delighted to see her cousin again, the beautiful girl threw her arms around his neck and kissed him, as she had done hundreds of times before. Just then the aunt chanced to look into the room, and thinking, no doubt, what a check her presence would be to their happiness at such a moment, when all to appearance was as she had long wished it, she stepped aside. Had she waited another second or two, she would have seen how rudely the nephew repaid the affectionate caress, as he exclaimed—

"I would not for a thousand pounds that had happened, cousin; I shall never forgive you."

The pretty cousin stood speechless, wondering what she could have done to cause him to shrink from her in the way he did; when seeing him look on the floor, she also glanced downward, and found that she was standing with one foot on the nosegay which he had tossed from the laundress's garden, and which she in her eager delight to meet him had by some means or other knocked out of his hands. She stooped down, picked it up, and presenting it to him, said—

"I was too glad to see you to think about the flowers. I am very sorry, cousin, but they are not much worse for the fall."

Fred was really so kind-hearted a young man as ever lived, though he had many faults, and he began to make the best apology he could for what he had said. But his pretty cousin was not to be deceived; she knew that he was in earnest when he spoke so cross to her—she also saw something in his manner different from what she had ever before seen in him, so went and sat down in silence by the window; and, had Fred been close enough, he might have seen two large tears trickling slowly over the damask roses of her cheeks. He, however, hurried off to prepare himself for dinner, and quite his unfortunate flowers in water. What amuse he played while he kissed the flowers, and raised his eyes to the ceiling, and pressed the rose Matilda had given him to his heart, we shall not recount, premising that all young men, when they are overtaken for the first time by love or drink, always play such tricks

Compared with its usual appearance, there was something cold and uncomfortable in the look of the dining-room in which the dinner was served up, in the furniture which was covered up with holland, in the want of the ornaments and pictures which were removed, together with other alterations which took away that air of "coziness" which gives such a home-look to an apartment that one is used to. All this was necessary to make room for the workmen who were coming in on the morrow, and to preserve the costly furniture. This Fred knew, but he could not help contrasting it with the laundress's neat, but humble parlour, and the quaint-looking cottage of Content.

Dinner, which was always a grand set-out at the wealthy wine-merchant's, on that day consisted of lamb-chops, and cutlets et cetera, which were either cold, or had been dressed previously, for the plate and china and glass and cham had been packed up; and there was not the usual splendour about it which there generally was. This was not much felt by Fred, who was pining for the presence of the pretty laundress, to whom his thoughts wandered during dinner. The aunt, who was delighted at the discovery she fancied she had made in the progress of love, apologised to her niece for the scanty meal that was prepared, and promised to make it up when they reached Margate, next day But the wine was too much hurt at Fred's treatment to think or care about what she ate or drank, for she was almost as deeply in love with her cousin as he was with the laundress's daughter. She had always liked Fred, which was rather strange, considering that she had in confidence been told by her aunt to look upon him as her intended husband—a hint generally sufficient to set two young people together by the ears, no matter how kindly they have felt towards each other before. She ate but little, and that little pleased the aunt rather than otherwise; for she flattered herself that she knew the state of her feelings, after such a confession as Fred must have made: she had dim, dreamy glimpses of scarcely taking any dinner herself for the next year or two, when a bell from the area released how much he loved her, in her father's sitting-room. Mrs. Holdersworth prided herself on her penetration, and had even communicated to her husband what she had just witnessed. Ladies have such discernment in matters of the heart!

The two brothers were present at the dinner; for the old officer lived there, although his tastes were so dissimilar to his brother's as it is possible for any man's to be who lives in the habits of friendly intercourse with another. The Captain, as he was generally called, had seen some service in his younger days, when Death was busy, and promotion quick; but he quitted it early, on account of a severe wound he received in the left arm, that now lived on the only limb he wore for his service being a scar from a deep sabre-cut, which had laid open his cheek and upper lip, and which, when he lost his temper, turned as red as fire the day when he first shaved. It is the best side-face I've had a gash dis for business, and believed that the only profession a gentleman could follow with honour was that of a soldier. There was a fine military air about the old man, in his upright figure, prominent chest, and stiff stock he always wore. He was, however, tender-hearted as a woman, and—except his military knowledge—in the ways of the world simple as a child. The wine-merchant was a fine portly gentleman, who always wore silk stockings and gold knee-buckles, and a bunch of seals and lengthy gold chain dangling before him, as if to mark as prominently as he could his dislike of the new "waistcoat-pocket fashion," as he called it, of wearing watches. They were both gentlemen by birth: their grandfather had possessed a beautiful estate, and sat in Parliament; but by some sort of mismanagement, which at times can no more be accounted for in families than the breaking out of a fire, things fell into a state of decay; the old ancestral estate was sold, and he got linked with a merchant in the wine-trade, and finally retrieved in some measure his lost fortune in that business.

There was a certain grandness at times about the wine-merchant which made him as pompous as a peacock on parade, with all his train expanded, and all its hundred eyes fixed upon you at once. This was especially the case when any one came to consult him respecting the raising of some loan; he would on such occasions plant his hands behind his coat-tails, and talk about our alliance with other countries as if he had been the Secretary of State.

Dinner proceeded along with the following conversation between the two brothers.

"Position in life, brother," said the wine-merchant in his usual pompous manner, "is either what a man inherits by birth, obtains by circumstances, or gains by dint of sheer perseverance. Once obtained, a man cannot afford to descend; he must continue to ascend."

"All that I grant, brother," replied the old soldier; "but he who has escaped without a wound in the battle is no true soldier if he leaves his less fortunate comrades to fight the march; and I still think you did wrong in refusing to become security for poor Pettygrew; all they wanted was a guarantee of his honesty to fulfil the situation which you know he is well adapted for, and you also know he is honest."

"No man can be honest, brother, who has been a bankrupt," said the wine-merchant, who was then in one of his iron moods; "he ought to have known the state of his affairs, and stopped while he was able to pay twenty shillings in the pound. Do you think, brother, I should have attained the high position I now hold in the City had I ever been bankrupt, or insolvent, or even privately compounded with my creditors? No, brother, there is no middle path between honour and dishonour. An English merchant must stand above all suspicion." And after this severe speech the great man sipped his wine, and felt that he had supported these high principles to his own satisfaction.

"You take a hard one-sided view of the matter, brother," said the kind-hearted soldier, "and make no allowance for the havoc the enemy may have made. Your ships might be lost, or Pettygrew's mere, a fire break out and burn down your warehouses, as it did his, and the office fail in which he had effected an insurance. These were the unforseen calamities which drove him through the Court of Bankruptcy, and I am sorry to say that your firm has had it not pleased Providence that it should be otherwise. But I will be security for him so far as my half-pay goes. I would were the amount a million, and I possessed it."

"No, brother, I will be his security," said the wine-merchant, holding out his hand, which the old officer grasped affectionately; "I was talking about the principle not about persons." Then, to change the conversation, he said, "Brother, a glass of wine with you. Fred, you will join us."

"With pleasure, angel," said Fred, whose thoughts had wandered to the laundress's cottage, where he was holding an imaginary conversation with the daughter, at the moment his uncle spoke.

There was a laugh round the table, which made Fred blush up to the ears, while his aunt was delighted, for she (penetrating woman!) concluded that he was so deeply in love with her niece, as to have made the mistake while thinking of her; and, as the wine-merchant also arrived at the same conclusion, they were very merry at Fred's expense. Even the pretty cousin regained her composure, and looked at Fred archly; but when she dropped her eyes again, it was only to give vent to a long-drawn sigh.

"Have you found a place to suit you, Fred?" said the uncle.

"A perfect little paradise," replied Fred, "at the low rent of ten shillings a week."

"You will come down to see us?" said the aunt. "You can leave by the last boat on Saturday, and return by the first on Monday. Can he not?" and she looked up at her husband.

"Of course he can, my dear," replied Abel; "that is, unless we have any important business, which he well understands, for I trust all to Fred."

The cousin watched the young man's countenance narrowly, as he stammered forth a reply of how happy he should be to go down, and such like, if he could be spared. But she, through having long studied the expression of his face, most clearly saw he would rather stay away, and a cloud again overshadowed her beautiful brow.

"We ought to be present at the ball," said Mrs. Holdersworth, "and introduce Mary to some of our aristocratical acquaintance. Ah, my dear, you have no conception how familiar these great people are with us," added she, looking condescendingly on her niece. Then, raising her eyes, and addressing the old soldier, she said, "Do you know, I felt really to faint when his Grace offered me his arm the other evening, as we went to pass to the supper-room!"

"I felt a little overpowered myself," answered the plain-speaking soldier, "but attributed it to the quantity of scent used by the ladies. And I do think, brother, that a committee ought to be appointed—a kind of Board of Health—to sit in one of the ante-rooms, and see that the ladies are limited in the use of perfumes, allowing each so much according to the size of the apartment and the state of ventilation."

"Ah!" thought Fred, "how different with the rose I have discovered; the aroma of Eden ever floats around her." Fred had never been in the kitchen, when his sweet Sultana was enveloped in smoke and steam, on a washing-day.

"Come, come, Abel," you, young and single—have you nothing to say in defence of the ladies?" said the wine-merchant

"You know how much I prefer nature to art," answered the nephew; "and that the simpler a lady is in her dress, the more I admire her."

"Ah! Fred would be most at home among the Indians," answered the uncle, "making love according to the primitive fashion, in a wigwam."

"A few such love adventures as you have met with abroad would soon cure him of nature," said the wine merchant.

"They would, indeed," said the old soldier, smiling; "especially if he had to marry for the sake of an old Indian squaw, as I was once compelled to do when taken prisoner, to save my life. I forget how many scalps she had taken with her own hand; but I well remember, in her loving moods, she was fond of showing me them, and brandishing her husband's tomahawk, sometimes bringing the edge to within an inch of my nose."

"Married, brother!" exclaimed the wine-merchant's wife; "I was not aware that you had ever been married."

"No with a ring and a license in a Christian church, sister," answered the captain. "The ceremony consisted in jumping round and through a fire as fast as ever we could, one after the other, whooping and yelling like mad; until I perceived a moment behind, or deemed such the case, that followed only half a second, I received a knock on the head with a war hatchet. It was warm work, I can tell you. My black bride was very fond of pricking me with a spear, as if to see how high she could make me jump."

"How very shocking!" exclaimed the lady. "Was she tolerably neat in her dress?"

"Dress! God bless you, sister! that was much after the fashion of dressing a salad," replied the brother; "she rubbed herself with oil on rare occasions."

Ah! Fred, my boy, you would have had nature unadorned if you had had her!"

"I am afraid he would not be so easily pleased as you were, brother," said the wine-merchant. "What is your opinion, niece?"

"I always considered him very good-natured until to-day," answered the cousin, glancing aside at Fred.

"And to-day he has been rather naughty. Is it not so?" said the aunt. Clever woman! "still harping on my daughter," and thinking that she alone understood her niece's allusions.

In the evening Fred went to the Literary Institution, to look at the magazines and papers, as usual; but he scarcely understood a line of what he read, so much was his mind occupied with the sudden change. Her face seemed ever to be peeping between him and the page he in vain attempted to peruse—now with her beautiful head aside, as when she stood tying up the woodbine—then, with that blushing modesty which mantled her cheeks when she presented him with the rose. Ah! he had it still; and putting down the paper, he took the flower out of his button-hole, and first looking, and then smelling of it, passed an hour in that delicious reverie which lovers only know.

By the time Fred's fate love is a strange commodity! and those who imbibe it seem possessed of the power of the chameleon, and are able at times to live on sighs and air. We have often been puzzled to find out where those hide it after marriage, when it is not "coz" occasionally—at breakfast—dinner, and supper, now and then, without exchanging so much as one endearing word. Fond mammas musky it at times, and sheep and shake their "blessed babbies" as if they were terriers, and the little dears mats. As for dear brothers and sisters, they now and then maul one another awfully: and we question very much whether

> Birds in their little nests agree

always; or we think we have seen them very spiteful occasionally, and giving one another nasty pokes with their little beaks, before they were well fledged, or able to peck

But we must leave Fred to his dreams, and the uncles, and aunt, and cousin to their rest; neither shall we follow them in the morning, with all their weight of luggage to the steamer: our present business is with the nephew and the occupants of the Cottage of Content.

(To be continued.)

MR. PAXTON'S HISTORY OF THE BUILDING FOR THE GREAT EXHIBITION OF 1851.

At the anniversary meeting of the Derby Mechanics' Institution, held on Tuesday week, Mr Paxton gave the following very interesting account of "the Crystal Palace" now building in Hyde-park:—

He would commence, then, by saying, that, gigantic as the building was, it was conceived and framed by him in a small space of time. He need not, however, remind them that it was not done without a great deal of forethought, aided by the experience he had in constructing other great buildings When the six eminent architects and engineers were selected as a committee to choose a design, he (Mr. Paxton) had no intention of offering one, for he took it for granted that something worthy of the occasion, and of the nation, would be selected by them. When the time approached for the production of plans, there was a discussion in the newspapers as to the design best adapted, and he must say that the first sketch he saw in a number of the *Builder* did not inspire him with any very exalted notions, or raise any very splendid expectations of the result. It was not until one morning, when he was present with his friend Mr. Ellis at an early sitting in the House of Commons, that the idea of sending in a design occurred to him. A conversation took place between them with reference to the construction of the new House of Commons, in the course of which he (Mr. Paxton) observed that he was afraid they would also commit a blunder in the building for the Industrial Exhibition, adding, that he had a notion in his head, and that if he (Mr. Ellis) would accompany him to the Board of Trade, he would ascertain whether it was too late to send in a design. He asked the executive committee whether they were so far committed to the plans as to be precluded from receiving another; the reply was, "Certainly not; the specifications will be out in a fortnight, but there is no reason why a clause should not be introduced allowing of the reception of another design." He (Mr. P.) said, "Well, if you will introduce such a clause, I will go home, and in nine days hence I will bring you my plans all complete." No doubt the executive thought him a conceited fellow, and that what he said was meant as a mere bounce than to convey sense. Well, this was on Friday, the 11th of June. From London he went to the Menai Straits to see the third tube of the Britannia Bridge placed; and on his return to Derby he had to attend to some business connected with the Horticultural Society, his whole mind was devoted to his project; and whilst the business proceeded, he sketched his design on a large sheet of blotting-paper. (Applause.) He was sorry he had not the original sketch with him, but the fact was, Mrs. Paxton had taken possession of it, and, if they were at all anxious to see it, the only possible way of gratifying their desire was by sending for her to the meeting. (Laughter and applause.) Well, having sketched his design on blotting-paper, he sat up all night until he had worked it out to his own satisfaction; and on the next day, the 16th, he was enabled to complete the whole of the plans by the Saturday following, on which day he left Rowsley for London. On arriving at the Derby station, he met Mr. Robert Stephenson, a member of the building committee, who was also on his way to the metropolis. Mr. Stephenson minutely examined the plans, and became thoroughly engrossed with them, until at length he exclaimed that the design was just the thing, and he only wished it had been submitted to the committee in time. Mr. Stephenson, however, laid the plans before the committee, and at first the idea was treated with ridicule; but his genius gradually grew in favour; and by publishing the design in the ILLUSTRATED LONDON NEWS, and showing the advantages of such an erection over one composed of fifteen millions of bricks, and other materials, which would have to be removed at a great loss, the committee did in the end reject the abortion of a child of their own, and unanimously recommended its banning. (Applause.) He was bound to say that a great deal of credit was due to Mr. Brunel, as at first so wedded to his own plan, that he would hardly look at his. Mr. Brunel was, however, a gentleman and a man of fairness, and listened with every attention to all that could be urged in favour of his (Mr. Paxton's) plans. As an instance of his gentlemanly and very creditable conduct, he (Mr. P.) would mention that a difficulty presented itself to the committee as to what was to be done with the large trees, and it was gravely suggested that they should be sawed in. He (Mr. P.) remarked that he could cover the trees without any difficulty; when Mr Brunel asked, "Do you know their height?" He (Mr. Paxton) acknowledged that he did not. On the following morning Mr. Brunel called at the Horticultural House and gave him the measurement of the trees, which he had taken early that morning; adding, "Although I mean to try to win with my own plan, I will give you all the information I can." (Applause.) Having given this preliminary explanation of the origin and execution of his design, he would, as beseemed him, pass over the question of merit, leaving that to be discussed and decided by others, when the works should have been completed. With regard to the progress of the works, he was happy to inform them that everything was proceeding to his entire satisfaction He was on the ground last Saturday, and saw two columns (eighteen feet high) and three girders put up by two men in sixteen minutes. (Applause.) That would give them some idea of the rapidity with which the work was progressing, and it must be pleasing to them to know that such things could be done at the present day. But when he told them that the whole of the columns were fitted together like the joints of a telescope, all

formed in the same mould, and put in sockets ready to receive them, and then fastened with bolts, their surprise at the huge design would give place to astonishment at the simplicity of detail, and the admirable nicety with which one part was made to tally with the other. The town of Derby must feel proud that it had produced a man like Mr. Charles Fox, the contractor for the erection of this building. (Applause.) Without the aid of a man of equal energy and talent, it was almost impossible that it could be completed in time. The systematic manner in which Mr. Fox's establishment was conducted, combined with that gentleman's personal superintendence of the erection of the structure, rendered him (Mr. Paxton) completely confident that everything would be right. The other day Mr. Fox was upon the ground from seven o'clock in the morning until ten at night, and he expressed his belief that he would continue to devote almost the same number of hours daily until the works of the exhibition was done. In short, the manner in which Mr. Fox was carrying out the details of his (Mr. Fox's) plan was in the highest degree satisfactory; and it afforded him infinite pleasure in doing justice to Mr. Fox on this public occasion. (Applause.)

Mr. Paxton then proceeded to exhibit a number of plans and sections of the proposed building, all beautifully drawn. He also exhibited a fine perspective drawing in water colours, painted by Mr. E. Walker, of London, and which he had had executed at considerable expense for the occasion. This drawing gave an admirable idea of the magnitude of the building, and the figures in the foreground, attired in the costumes of all nations, are very cleverly grouped. Mr. Paxton next proceeded to read a statement of the dimensions of the building, which he had prepared with great care, and which would give the most authentic particulars up to the present time, at which all the details had been finally arranged. We subjoin the statement:—The dimensions are 1848 feet long, by 456 feet wide in the broadest part, exclusive of the machinery room. The height of the principal centre roof is 64 feet, the adjacent side portions 44 feet, the outer sides 24 feet, and the transept which will enclose some of the large timber trees 108 feet. The space occupied on the ground-floor is 753,832 superficial feet, and the space provided on galleries is 109,536 feet. The total quantity of exhibiting surface is about 21 acres; but if additional space is required, an increase to the extent of 20,433 feet of gallery can be obtained. The total cubic contents of the building is 33,000,000 feet. The quantity of glass required is about 900,000 superficial feet, and weighing upwards of 400 tons. All round the lower tier of the galleries will be boarded, but will in every respect resemble glass. There are 3300 cast and wrought-iron columns, varying from 14 feet 6 inches to 20 feet in length; 2224 cast-iron girders; and 1128 wrought-iron girders for supporting the floors of galleries. The supporters are found, after repeated experiments, to be capable of sustaining five times the weight ever likely to be required. There are 34 miles of gutter for the water, and in no part of the building will the roof have to run more than 48 feet before it is delivered into the hollow columns, but the greater part will not have to run half that distance. The length of sash bar required is 33 miles. The building will be exceedingly light, but the brightness will be tempered and subdued by canvas or calico covering on the outside of the roof, and a.t the south side of the structure. This covering affords several advantages. It protects the glass from injury by hail. It subdues the light, and keeps the building cooler than if placed in the inside; and it affords facilities for lowering or increasing the internal temperature at pleasure. A copious ventilation is provided, four feet around the whole of the basement part of the building being made of laffer boards, and at the top of each sash bar. On a similar provision is made, and a very copious supply in the centre aisle; these will all open and shut in the easiest possible manner by a very simple machinery. The transept is 72 feet wide, and 108 feet in height, with a circular roof and semicircular ends. The large elm trees opposite Prince's Gate. Mr. Paxton explained, that since the first statement as to the quantity of glass to be used had been published, it had been decided by the building committee to substitute wood roofing in lieu of glass, but should the building remain, as he trusted it would—(cheers)—the wood might readily be replaced with glass. He also stated, that the foundation of the building would be started by the end of this week, and the whole of the ironwork for the columns be shortly in their places; and the progress Mr. Fox talked of making in the course of the next fortnight was almost incredible. As the ground plan showed, several small plantations would be enclosed in the building, and the transept was for the accommodation of the large trees that are to remain undisturbed.

Having given the details, Mr. Paxton adverted briefly to the uses to which such sort of buildings may be applied. The exceeding cheapness of iron and glass will give an impetus to the erection of similar buildings, though perhaps on a smaller scale; but there is hardly any purpose of ordinary covering to which the same plan may not be adapted with advantage. He had already been consulted by various parties—by Yorkshire manufacturers as well as other persons—with reference to the application of the principle in covering large spaces Mr. Batty, the equestrian, of London, wishes Mr. Paxton to build him such a circus to be erected near the Park during the Exhibition; and a friend had suggested what to him (Mr. Paxton) appeared an excellent idea, namely, the covering over of Shakspere's tomb-place at Stratford, to protect it from the weather. Most of his hearers were aware that *Mr. Punch* had made a special application to him to build glass houses of parliament, but, as he had not yet received her Majesty's command to commence the erection, he feared they could not be ready in time for the spring meeting. (Laughter.) And he must avail himself of the present opportunity of stating that all the space provided in the Exhibition building has already been agreed for; so that if there are any more applications from the present time—and it is certain there will be many, probably among the most numerous—double the space provided—selections will of course have to be made or the accommodation increased. And now that they must allow him to say a few words upon the object of the proposed Exhibition. He had been originally induced to turn his attention to the subject, and to take the matter up, at the time when the idea was first proposed, and he was happy to say that it met with feelings of the greatest possible delight. He thought at the time, now we have arrived at a grand period in our history, when a Prince consort of the Throne is engaged in the noble work of the age to foster the arts of peace, instead of lending his name, and the bad example of his influence, in fomenting petty distractions and stirring up passions which tend to the perpetuation of strife and the shedding of the precious blood of human life. (Loud cheers.) To foster the arts, to promote the extension of industry and commerce, to knit nation and nation in the bonds of universal brotherhood —that, indeed, was a noble object for Prince Albert to be engaged in; and he (Mr. Paxton) wished it that full measure of success to which he now believed it was certain to attain [illegible] encouragement in some quarters to which its merits fully entitled it. [illegible] to be regretted on many accounts, for, depend upon it, no means were so beneficial in the cause of humanity as those which brought men in contact with each other, thus rubbing off the rust of prejudice and ill-will, and cementing them together by feelings of amity and mutual consideration for each other's good and happiness. (Cheers.) If that was good as between man and man, how infinitely greater the benefit as between nation and nation. (Loud cheers.) Fancy a brotherhood of nations. (Cheers.) And he sincerely believed the project, in conjunction with the appliances of steam and the wonder-working powers of the electric telegraph, would tend more to annul each other's interests in a different light than hitherto, and demonstrate that the true happiness and welfare of all was bound up in the reciprocation of mutual good offices, kindly feelings, and the right principles of free trade in all countries. (Cheers.) The Exhibition would attract the people and products of all nations, and we should all assemble on neutral ground. It would be felt by other countries that on no occasion has England displayed more magnanimity and liberty than in the projection of this Exhibition; and the inhabitants of these countries were preparing with zeal and alacrity to meet us next year. He was sorry to say that the manufacturers of this country had not come forward on this as on other occasions when the great interests of this country were at stake. He trusted that they would yet put their shoulders together, and meet the occasion with spirit, energy, and confidence. (Cheers.) He hoped Englishmen were not afraid of being beaten; if they were they deserved to be beaten good. He believed it was a good thing to have the conceit taken out of one. (Laughter.) He had often had it taken out of him; but the next morning he started again with new vigour, and a greater determination to succeed. He had no doubt that the Exhibition of 1851 would not be the last exhibition of the kind in England, for the more closely they watched the signs of the times, and saw the steady knowledge was making, the more they became convinced must they be that they had entered upon a new era of the world's history, pregnant with great changes for the better in the social condition of the people. (Cheers.) He confessed he had been puzzled at the apathy shown by the great manufacturers, and not a little surprised at the ignorance displayed by many persons in reference to the Exhibition. When in Ireland, the other day, he met in person with those noblemen generously very liberal, and who, after conversing about the building, expressed fears that the large importation of foreigners would be attended with great danger to our institutions, and result in an attempt to create a disturbance. (Laughter.) That was the most extraordinary idea he had ever heard promulgated; but he endeavoured to dispel the fears of his friend by saying, that, however numerous, they would be but a drop in a bucket; and rather than endanger, would add very great y to their business. He had only one other objection to answer, and that was as regarded the products of foreign workmen injuring the products of our artisans. He would state a fact within his own knowledge. Frenchmen were celebrated for ornamenting glass. The establishment of Messrs. Chance, of Birmingham, employed a number of Frenchmen for a particular branch of the trade, the making of glass shades. By degrees the English workmen in the establishment became as proficient in the art as the French, and about a fortnight ago a trial of skill took place before the establishment, when they executed orders for an enormous glass shade. The Frenchman tried his skill and failed; and the Englishman, who, previous to the importation of the French, was unacquainted with the art, then made an effort to accomplish the task, and succeeded at the first attempt. (Cheers.) These shades would be made for all parts of the world, and as well as they could be made by Frenchmen, and this fact showed how little they had to fear competition. (Hear.) In conclusion, he expressed a hope that the members of the institution would pay every attention to the address of their excellent president, who had pointed out the advantages to be derived from Mechanics' Institutions when properly conducted, and who had also remarked the progress of this institution, which was a credit to the town of Derby. He (Sir P.) was glad that it had been so far successful. He knew places where such institutions had failed, but he hoped and believed that this would be fostered and encouraged, not only by mechanics, but by all who had the power to aid them—but more especially by mechanics, for he, as a practical mechanic, could tell them what great things may be accomplished by every man who will make up his mind to go zealously and ardently to work. (Cheers.) They had before them an example in the career of his friend the late Mr. George Stephenson—a man who conferred incalculable benefits on his country, who added to the comforts of the poor man by cheapening coal and bringing it to every man's door, who gave scope to mechanical power, and opened up a rapid communication to all parts of the kingdom. In fact, the facilities of intercourse between country and country thus opened up by the genius of Mr. Stephenson, are the pioneers to the onward progress of events, which will terminate in a dispensation of blessings to all mankind. (Cheers.) It is the intention of many friends to erect a monument in memory of the late Mr. Stephenson, something creditable to the country and worthy of the genius and fame of the man. He asked them to contribute their mite towards its erection, remembering that Mr. Stephenson not only sprang from the ranks and attained to eminence by his own industry and unblemished character, but that he has done more in his time to promote mechanical improvement than any man that preceded him, and that he has also earned the lasting remembrance and gratitude of his countrymen. (Loud cheers.)

FISHING EXCURSIONS UP THE THAMES.

EXCURSION III.—WEYBRIDGE AND SHEPPERTON.—THE WEY.

In proceeding with our "Fishing Excursions up the Thames," it must be understood that, although we wish to point out all the noticeable spots in the order in which they occur, we by no means intend to accompany the reader personally to every station, much less to devote a day's fishing to each. It will be sufficient if we give the general results of our excursions to various localities, quarters on our noble river, and at the same time suggest the pleasantest routes to adopt, according to the time at the disposal of the excursionist, and his devotion to the sport. In our two former excursions we took the reader bodily to Richmond and Hampton Court, and made remarks upon the waters within the limits of a day's fishing from those places respectively. Both these excursions were such as could be made in a single day; and pleasant enough they were, and the fishing pretty successful, thanks to the above-named friends, who did the best part of the work for us. The angler who has passed his first degree in the gentle craft, however, will learn to despise this style of thing, and kick against the confinement and restrictions of punt fishing; he will begin to discover also that the broad day-time is the very worst of the whole four-and-twenty hours for his sport, and that, if he would be successful, he should commence at earliest dawn, and (devoting the mid-day to his creature comforts, and rewarding himself by the luxury of his tackle) resume towards evening, continuing it long after sunset. With this object in view, therefore, we now propose to go further afield, and to take up our quarters at some convenient spot, where, after recomforting the water overnight, we may have a wholesome shake-down, and then by with the lark to spoil the deep. Merely repeating, therefore, that Sunbury and Walton afford excellent quarters, and are moderate in charges and distance from Hampton Court (the head-quarters of our last excursion), we shall beg our fishing companion to put his nightcap (if he wears such a thing) in his pocket, and proceed onward to either of Weybridge or Shepperton, at one of which places we will pitch our tent for a day or two. The former place is nineteen miles from town, on the main line of the South Western Railway—the latter is a little further, and may be reached by either of two routes—by omnibus direct, which runs once or twice a day, according to the season, or by South-Western Railway (Windsor Branch) as far as Ashford station, where an omnibus meets the 5.30 down, and the 9 up-train daily. At Weybridge the fisherman will find several good houses, and either at the King's Arms or the Ship he cannot fail to make himself comfortable. At Shepperton he cannot do better than put up at Hunt's (who drives the omnibus last mentioned), and who is a most civil, obliging fellow, with a fine feeling of veneration for any vagrancy, the mysteries of angling. In the season, the top of his vehicle is generally graced with the presence of many a good man and true, whose rods and tackle, poking out in all directions, present a somewhat formidable appearance.

Having promised thus much of our wherabouts, we shall set forth at once, rod in hand, discoursing freely by the way for the edification of our friends, only observing *en parenthese* that we shall not consent to be tied down by any rule, law of logic or order, in our sayings or doings. We shall go whithersoever we please, and say what comes uppermost in our minds; and if any one of the party to follow us or lag behind, just as their fancy dictates, and to listen to as much of our small talk as they think worth attending to.

And, by the way, here it should be mentioned, that at this point the little river Wey empties itself into the Thames—whence the name Weybridge; and, in sooth, before proceeding further up the main stream, we will explore this pleasant tributary, which presents many features of interest.

Starting from Shepperton (supposing that to be our head-quarters), there is a ferry to the meads skirting Oatlands Park, for those who do not wish to go round by Weybridge. Oatlands is now chiefly among the associations of Royalty, and splendour, and nick-nackery, and verse-spinning as was reached on the much celebrated "show-place." Those who remember it in its high and palmy days, when, with becoming sorrow that it is no longer what it used to be—that its glories are passed away never to return, and reached on the other, the burial-ground of the Duchess of York's dogs, epitaphs and all, still remain; the park has fallen a victim to the little taste and smaller sentiment of a puerile age, but cut up into small allotments, whereon plebeian dwellings of various sizes, and with more or less distant claims to architectural order, rear their brick heads in every direction; whilst in the very middle of the scene there is a public-house! As for the park gates, they have long since been removed, affording free ingress and egress to all comers. The lodges, however, still remain, looking in solemn mockery of their former state. The mansion itself is also, still, the well-known artificial piece of water, which was so formed as to appear like an armlet from the Thames, and which many actually mistook it for it indeed. This was a conceit of Brown, the celebrated ornamental gardener (who also built the neighbouring palace of Claremont, when the former building, by Vanbrugh, was pulled down), who, by a skilful arrangement of the water and foliage, made it appear from the windows of the mansion, and the principal points of the park, as if the river Thames actually flowed through the grounds, its bosom undisturbed by the passage of vulgar barges, which were all the while, making their silent way along the real Thames, at some half mile or more distance. This end piece of water abounded at one time with the coarser kinds of fish, roach, dace, &c., and, during the time of the Duchess of York, several pike of enormous size were brought alive and thrown into it. The have those monsters created, however, amongst the smaller fry, was such, that they were soon ordered to be caught again, and sent away, lest the sport of dainty fishermen, who delighted in frequent nibbles and repeated "takes," should be altogether destroyed.

The Wey, which rises at or near Alton (celebrated for its ale), passes by Basingstoke, Farnham, Godalming, Guildford, Woking, &c., and falls into the Thames not far from Walton Bridge, and nearly opposite Coway Stakes, where Cæsar is said to have crossed the Thames on his second expedition. None of these stakes, however, we believe, now remain. But it is to the lower portion of the river that we shall not confine our attention. Above Weybridge it is a slightly stream (like its next-door neighbour, the Mole), abounding in deep holes, but with very few "scours" or shallows. The consequence is, that, although there are a great many of fish in it, they are scattered over a comparatively wide surface, and with the single exception of the shoals of roach and dace, which are to be found in favourite "deeps" of the Thames. The fishing, in a word, requires more observation, and greater patience than in the latter, and the reward of success is proportionably greater. Although, to a certain extent, the same flies will answer in this river in its natural state, there is little room to doubt that a liberal course of experimenting at particular spots for a few weeks previous to fishing, would be repaid with considerable sport. Many of the stakes and piles which project along the banks, ther branches frequently drooping into the water; and it is a question with many experienced and observant fishermen, but one upon which we have not to enter at present, whether these stakes do not, to some extent, affect the health and voracity of the fish, by the impregnation of the water with some chemical principle derived from so considerable a mass of foliage. This, however, is merely thrown out *en passant*, as a suggestion, to which, on some future occasion, we may recur.

As far up as Byfleet the river is private property, and is preserved with more than usual strictness and jealousy, as Lord Lovelace, the present owner of the soil, is a devoted admirer of this gentleman's keepers, there can be no doubt that the water is poached to a great extent. The loop and wire is the device most commonly used, and is one most likely to be the spawning season to jack, who get up the ditches and shallows, their otherwise keen sight being at this time somewhat obscured. Barbel and chub likewise fall a prey in great numbers to this assassin-like warfare. Another device, the "fire," a peculiarly formed net with pockets, employed round holes into which the fish have previously been driven by means of poles, is also much used and with killing success. And here, perhaps, we may be allowed to say a few words as to the philosophy and utility of this system of preserving, particularly when carried on so strictly. That the water is poached to a great extent. The loop and wire is the device most commonly used, and is one most likely to be the spawning season to jack, who get up the ditches and shallows, their otherwise keen sight being at this time somewhat obscured. Barbel and chub likewise fall a prey in great numbers to this assassin-like warfare. Another device, the "fire," a peculiarly formed net with pockets, employed round holes into which the fish have previously been driven by means of poles, is also much used and with killing success. And here, perhaps, we may be allowed to say a few words as to the philosophy and utility of this system of preserving, particularly when carried on so strictly. That the water is poached to a great extent is admitted to practise their legitimate art upon private waters, would operate to a most zealous and efficient force, detective and protective, and would more than compensate for the trifling favour accorded to them. But we must "keep moving"—bowed to by a few words as to the philosophy and utility of this system of preserving, particularly when carried on so strictly. That the water is poached to a great extent.

Above Byfleet and as far as Send, Lockeleaze mills the private property, as we believe, belongs to Lord Lovelace, and this part of the stream is far better for angling than that below, of which we have just spoken, particularly for trolling. Here, from there being occasional spots of "common" water, anglers are occasioned to resort; whilst Mr. Holroyd, the owner of Byfleet Mills, is most liberal in granting permission to fish to any one who presents a fair claim to take a privilege. And here, therefore, the pedestrian may pass and sweet-smelling cowslips, occasion- peeps into whose interiors afford abundant evidence of cleanliness and comfort. The nearest hostelry is that of our honest friend, Cooke, who combines the office of butcher with the purveyance of other "combustibles"—good beds, good breakfasts, cleanliness, civility; and those who like society will rarely fail to meet here with some brother of the craft solacing himself after his day's work, and preparing for that of the morrow. And, talking of the morrow, let us not omit to add that our worthy host makes most capital ground-baits; so, before taking your own supper, good fisherman, just go and feed the fish you intend catching in the morning.

Amongst the fish for which the Wey is noticeable are very heavy bream; which, indeed, may be said of the Mole, and, indeed, of most sluggish waters. There are a good many jack, also, but they do not generally feed freely, and want a good deal of looking after. Perch also abound, and are taken in some quantities during the season (March and April). Of barbel and dace there are very few

Return we now to the Thames, at the point whence we started. The fishing at about Weybridge and Shepperton is very good. The river is very pretty at this part, particularly at Shepperton, where it winds a good deal, and is skirted in many places with the lawns of gentlemen's houses coming down to the water's edge. Here there are capital roach and barbel swims, the former of which are just coming on to feed; and, if there should but be a little rain shortly (as we have had none for these five weeks or more, and the water is very low), there will be excellent sport with them. Many readers, perhaps, will be surprised, and perhaps a little disconcerted, to find that the real fishing season is only just beginning. Your butterfly fisherman, who likes to idle away his forenoon beneath a broiling hot sun, decked out for the occasion (most improper costume, by the by, for the sport) in blue hat, bright blue neck-tie, and nankeen or light plaid jacket, and continuations to match, smoking his eyes out, and solacing himself between the nibbles with copious draughts of bottled stout, pale ale, or brandy-and-water, will chuckle, perhaps, at the very thought of standing for hours on a bank, rod in hand, on a bleak November afternoon, at Christmas time. Yet the fact is, and one known to all experienced hands, that the heaviest roach are taken when the snow is on the ground. A friend at our elbow says, he recollects very well, some years ago, before our fine salmon stream was improved, by weirs and sewage into a vast Venetian canal (not after Stanfield!)—recollects, saith he, an old Chelsea pensioner, who, as soon as the snow made its appearance, was sure to be seen fishing off the low flight of steps at Battersea Mills, at Lombard Wall, and used to take more fish, heavy roach, with his rude tackle, but quick hand and eye, than a whole punt-load of amateurs on the brightest day in August.

And here, once more, let us indulge in a few more parting words of denunciation against that lazy, unambitious, stupifying practice of punt fishing. Let the man who puts himself in a punt remember that he is no longer his own master, to go where he liketh, or to fish as he pleaseth. He must obey his commanding officer—Mr. Puntman—guided by the will of the majority of those who form the party. If he gets tired of the punt, he must perforce sit where he is, nailed to his couch, till the others have done; and sit quiet too lest he should disturb the water, or topple into it. Sometimes the mere monotony of a recess to the green shore have been temporarily relieved by an invitation to bale out the well, accompanied by a wager that he will not empty it within a certain time; a very good practical joke, the merit of which is kept constantly in view by the whole of the Stock Exchange, celebrated for his herculean strength, which he frequently manifested in cutting legs of mutton in two at a blow, and other feats of the kind. To make a long story short, being one day inveigled into a punt, this gentleman was set to empty the well for a heavy wager, but soon discovering the trick, he forthwith jumped into the water, and by main force dragged the punt on to *terra firma*, when of course the well was emptied of the water by the power of gravitation, and he won his money, besides having all the laugh to himself.

Before going further up the river, let us make note of a spot in this neighbourhood especially worthy of the angler's attention. Near Walton Bridge is an armlet or *gulf-let* of the river, now thoroughly covered with weeds, but which, as elsewhere, are beginning to show signs of approaching decay; when they are entirely gone, we have no doubt that there will be plenty of jack to be taken here. Indeed, we have at a former time known as many as twenty-one jack taken out of this very piece of water in one day, with a single rod, trolling with dead bait. On this occasion, it is true, the spot had long been untouched; how it may be now, we cannot pretend to say. O.

LITERATURE.

CONSTRUCTIVE EXERCISES FOR TEACHING THE ELEMENTS OF THE LATIN LANGUAGE ON A SYSTEM OF ANALYSIS AND SYNTHESIS; WITH LATIN READING LESSONS. By the Rev. JOHN ROBSON, B.A. London: Second Edition, revised. Taylor and Walton.

Mr. Robson having been for several years one of the classical masters at University College School, has necessarily had much experience in teaching; and his work having been adopted in that school, and having reached a second edition, may be regarded as a proof that he has made good use of his experience. It is also used in the City of London School, as well as in others less known; and we think he shall be doing good service to our readers by presenting to them some of its peculiar modes of instruction.

The work differs altogether from the ordinary Latin Grammars, superseding much of the drudgery of the old system, and substituting theory and practice in their stead. "The way that anything should be taught is the way *prchend* what he is taught, and, therefore, easily to remember it. The work is constructed on he "crude form system," the "crude form" of a word being the simple form, without those additions by which the connexion with other words, such as cases, genders, persons, &c. Every word is resolved for a rule is given in its "crude form," from which elementary condition the various forms of the word, addition of various suffixes, cases, numbers, persons, tenses, moods, &c., are derived.

The first rule, for instance, explains the mode of forming the nominative and accusative cases of nouns substantives, and the third person singular of the present imperfect tense of the active verb. Each sentence follow, each comprising a nominative, a verb, and an accusative, which, to be rendered into Latin, will require the application of the rule: then comes a list of the English words contained in them, with their Latin equivalents. A similar method is pursued throughout the work, which thus forms a grammar, an exercise book, and a dictionary.

Latin reading-lessons, corresponding to the English sentences, are given, but with the words in different cases, &c., intended to be afterwards translated, by which means the pupil practises the double process, and increases his knowledge of the vocabulary, which comprises 2000 words from the writings of Cæsar, an author the work undertakes to enable the pupil to read without difficulty as soon as he has mastered the first four divisions. By the method employed, the most disheartening difficulties of the study are surmounted and removed; and such pains are taken to explain principles and the logical relations of the language, that the mind of the pupil is not only constantly exercised but further developed in the slow and regular progress of acquiring a knowledge of the philology and structure of the language. The classicality and correctness of the Latin examples have been carefully preserved, and the work will be found by philologist, teacher, and pupil, well deserving of their attention and commendation.

A TERMINATIONAL DICTIONARY OF LATIN SUBSTANTIVES. By BENJAMIN DAWSON, B.A., and WILLIAM RUSHTON, M.A. Longman and Co.

The design of this work is, in the words of the Preface, "1. To ascertain what the terminations really are; 2. what is their significance; 3. to what parts of speech they are affixed, 4. to what forms of the words they are attached; 5. whether a termination has always the same force, or whether it varies according to the part of speech to which it is added; 6. the origin of termination with another, to see which were common in the older authors, which in the later; 7. to raise conjectures as to the origin of the terminations; 8. to assist in determining the root; and 9. to show the philosophical construction of language, that it may be studied philosophically, and so its value as a system of training increased."

It would occupy more space than we can spare to fully explain the author's method of arrangement; but it will be high recommendation to state the work has originated in the peculiarly suggestive method of teaching pursued by Mr. Long while he so ably filled the Latin chair of University College, London.

MORE VERSE AND PROSE. By the CORN-LAW RHYMER. In 2 vols. (2nd Vol.) C. Fox.

We have little to add to our remarks on the first volume of this posthumous publication. Both in the verse and the prose, the cry of the poor is uttered aloud; and the desire of progress is fiercely and impatiently expressed. Much of the Anglicanism, also, is now out of date. Free Trade has taken away the sting. The main feature of the book is a review by Mr. Southey, reprinted and printed for the *Quarterly*, but ultimately rejected, on Mr. Elliot's poetry The paper is not, after all, a mere lecture on criticism—a sensible lecture enough, but eloquent nor abounding in fine sentiments, but sensible, honest, homely, and true.

Of the poems in this volume, the following has a present interest —

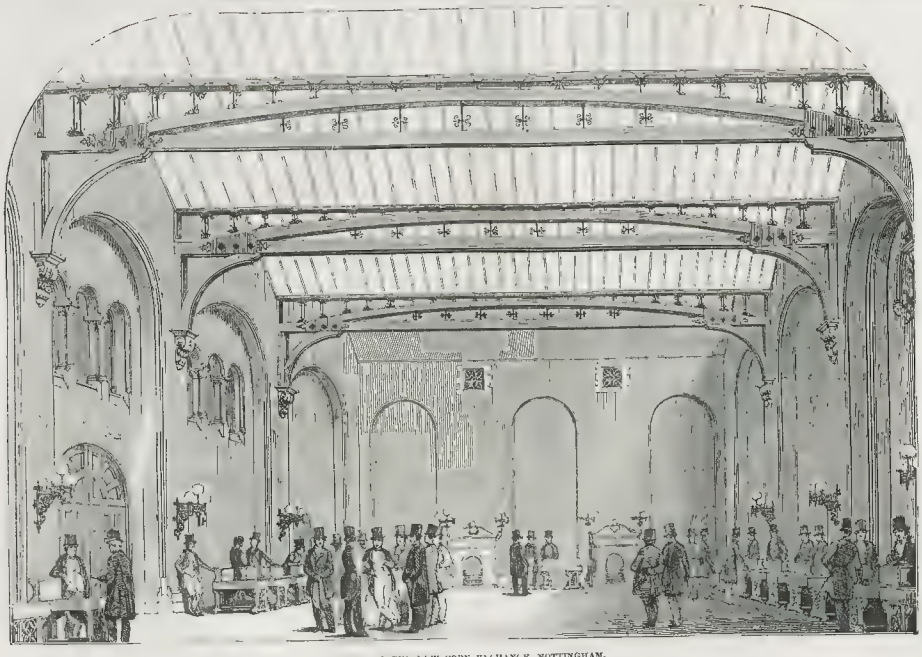
ERIN: A DIRGE, FOR APRIL, 1847.

Oh, for snow, strange advent in the month of flowers!
Cold and cheap! a shroud of woe
For pale dead *Erin's* nakedness!
Snow-clad mountains, dropsy bosom,
Hoarse of snow, of plumes a plume,
Weep over Erin coffinless!

There are colder things than snow,
Sadder things than death and woe,
Pagan shame's cold hard-heartedness!
And that sadder, helpless pain,
Which, when struck, strikes not again!
Now wordless, life-less, coffinless.

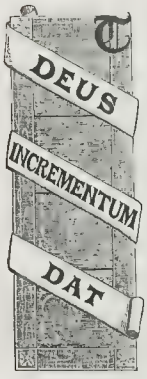
Insect, that would'st God enthrall!
Earning nought and taking all!
Art loon thy country's nothingness?
Man! whom that vile insect's will
Yet may torture, starve, and kill!
Remember Erin coffinless.

The work concludes with a lecture on poetry, which deserves and will repay careful perusal.



INTERIOR OF THE NEW CORN EXCHANGE, NOTTINGHAM.

NEW CORN EXCHANGE, NOTTINGHAM.



THE town of Nottingham has just received an important addition to its public buildings, by the erection of a Corn Exchange, from the design of Mr. T. C. Hine, architect, of that place.

The new edifice, which is very handsome and commodious, comprises an exchange hall, 77 feet by 55 feet; a spacious corridor or portico, a reading room, and a manager's house. The roof, which is of novel construction, presents nearly one entire surface of glass. The exterior of the roof, which is accessible from the several rooms of the manager's house, is fitted up with a series of blinds, by means of which an uniform degree of light is secured throughout the year. The timbers of the roof, which are exposed, are stained and varnished, and the ironwork in the same and in other parts of the building is enriched with colour and gilding. Polychromic decoration is also introduced in the ceiling of the entrance corridor. The reading or news-room communicates with the large hall by an arcade, which may be enclosed by a moveable screen at pleasure. To allow of the building being used for other purposes than a Corn Exchange, the large room is fitted up with handsome fire-places and gas brackets. The exterior of the building is executed in brickwork, with elaborate stone dressings; encaustic tile-work is introduced in

the string-courses and in the window panels, of which we give a few of the patterns in our marginal Illustration.

THE LATE SIR ROBERT PEEL.—Mr. Hume has received a Bank of England note for £5, collected amongst the English working men in St. Petersburg, at one silver rouble each, towards erecting a working man's memorial to the late Sir R. Peel. The subscription was exclusively confined to English workmen, and would have been much more, but it was commenced late.

CHINESE FUNERAL.—A Chinese funeral took place yesterday. The Chinaman died at the Chinese *restaurant* of Macca and Wossing. The funeral was large, there being over 150 Chinamen in the procession, each wearing a piece of white crape. A large number of persons visited the burying-ground to witness the ceremonies, which were as follow: They lowered the coffin as we do, they then threw the white bandages worn on their arms into the grave; then matches and the wax candles, and a bottle of wine. Before covering the coffin, each person bowed his head to the earth, and uttered some few words not by us understood. Then each threw a handful of dirt on the coffin, and passed round liquors, wine, and cigars, &c., of which they invited each American to partake, and the grave was then filled up.—*New York paper.*

ROYAL ARCH AT DUNDEE HARBOUR.

PERHAPS there is not a town in Britain of equal magnitude so deficient in public monuments as Dundee. Possessing a fine situation on the Firth of Tay, and being the principal seat of the linen manufacture in the kingdom, it is in the former respect a place of interest from the beauty of the surrounding scenery, and in the latter, one of considerable importance from its extensive commercial and mercantile relations. Yet there is little in the town itself to attract attention or awaken interest; its buildings are generally exceedingly plain, and its streets for the most part narrow and irregular, whilst of purely ornamental structures it is almost totally destitute. By the erection of the new triumphal arch, however, the inhabitants of Dundee have reared an imposing pile, no less elegant than unique, and forming a graceful ornament to one of the finest harbours in the country.

The Royal Arch is intended to commemorate the landing of Queen Victoria at the port, in September, 1844, her Majesty having then passed over the spot where the building now stands, and where, on that occasion, a handsome temporary arch was erected, a representation of which appeared at the time in the ILLUSTRATED LONDON NEWS. The authorities, considering that such an important event, as they esteemed it, should be adequately commemorated, resolved to build a triumphal arch of stately dimensions, and accordingly offered a premium for the best design. The one which we have this week engraved was selected from about a hundred others; and the work was soon after commenced, and has now been brought to a conclusion. The architect is Mr J. T. Rochmead, of Glasgow; and his design certainly indicates considerable originality and taste. The style of architecture is what is termed the Anglo-Saxon, a style seldom adopted for such erections, although the present specimen unquestionably possesses many beauties; the general effect is imposing, and some of the details are truly exquisite. The material used in the construction is fine freestone; and the work has been executed with no less stability than elegance.

The Arch is the largest erection of the kind in Britain. Its dimensions are as follow:—Breadth, 82 feet; height of side arches, 16 feet; width of side arches, 10½ feet; height of central arch, 32 feet; width of central arch, 21 feet; height of side towers, 54 feet; height of central towers, 84 feet.

A winding stair leads to the summit, which commands an extensive prospect; and it is intended, we believe, to combine the ornamental with the useful, by having a signal-post on the top of one of the central towers. The total cost of the structure is above £3000, mostly raised by public subscription.

So far as we are aware, this is the first memorial which has been erected in Scotland in consequence of any of her Majesty's numerous visits to that attractive country.

CROZIER AND PASTORAL STAFF.—The crozier (*Crocia*, Mediæval Latin; Fr., *Crosse*; Ital., *Bocco Pastorale*; Germ., *Bischofstab*) is the ornamental staff used by Archbishops and Legates, and derives its name from the cross which surmounts it. A crozier behind a pall is borne on the Primatial arms of Canterbury. The use of the crozier can only be traced back to the twelfth century. Cavendish mentions "two great crosses of silver, whereof one of them was for his archbishoprick and the other for his legatty, always before" Cardinal Wolsey. The fact did not escape Master Roy, who sings thus—

> Before him rydeth two Prestes stronge,
> And they bere two Crosses right longe,
> betynge in every man's face.

Hall says that he removed from Whitehall "with one cross." In the Eastern Church patriarchs only have a crozier; a patriarch has two transverse bars upon his crozier, the Pope carries three. The pastoral staff was the ensign of bishops. —*From "Notes and Queries."*

The total number of municipal electors on the burgess roll in the corporate cities and boroughs of England and Wales is 213,632. Of these, 206,474 are in England, and 7178 in Wales. The boroughs with the strongest constituencies are: Birmingham, 6360; Bradford, 4744; Bristol, 7134; Leeds, 13,486; Liverpool, 10,584; Manchester, 11,128; Newcastle-upon-Tyne, 3822: Nottingham, 8377; Portsmouth, 3990; Sheffield, 10,490; York, 3371. The largest borough in Wales is Swansea, having 1157 electors; and the smallest, Pwllheli, with 105. The boroughs in England with the smallest number of municipal electors are the following:—Andover, 242; Arundel, 277; Basingstoke, 268; Blandford, 111; Bewdley, 216; Calne, 153; Chard, 114; Falmouth, 202; Faversham, 218; Godalming, 199; Hinton, 216; Kingston-upon-Thames, 259; Launceston, 258; Lyme Regis, 205; Lymington, 155; Romsey, 155; Stockton, 107; Wallingford, 211; Wycombe, 228.

ROYAL ARCH AT DUNDEE.

THE ILLUSTRATED LONDON NEWS

No. 452.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, OCTOBER 26, 1850. [SIXPENCE.

RIGHT OF WAY IN THE WILDERNESS.

As regularly as the autumnal months come round, sturdy pedestrians and enthusiastic lovers of natural scenery betake themselves to the moors, mountains, and glens of Scotland—at that time so rich in all the charms which have most attraction for the cultivated taste and the expanding intellect. But not less regular than autumn in its beauty, or these tourists in their laudable curiosity, is the Duke of Athol in selfish obstinacy. His Grace of Glen Tilt makes his appearance in the newspapers as soon as the session of Parliament is at an end, and keeps his place there till the bad weather sets in. It were to be wished—for the sake of the order to which his Grace belongs, and for the country of which he is one of the magnates—that his name should appear in some other capacity than that in which the world is acquainted with it. When the other Peers of the realm have finished making the laws, the Duke of Athol commences to break them. When they begin to build schools—to endow churches—to mingle on friendly terms with their tenantry, and to maintain the ancient character of their country for hospitality, we hear nothing of the Lord of Glen Tilt except as an obstructor of the harmless pleasures of the public. He not only sets at defiance the judgment of the Court of Session, which has declared a public right of way through the beautiful and romantic pass of which he is the proprietor, but he wages a war of fisticuffs with the adventurous strangers who, presuming on the right of way, attempt to enjoy the beauties of that unrivalled scenery. Not contented this season with setting his dogs and his kilted retainers upon tourists, as in the famous rencontre with the Edinburgh professors, "Baron Braemar" has entered into the warfare in his own proper person, and expelled two intruders not only with abusive words, but with hard blows besides. We have most certainly no wish to disparage a man in high station; but, when, year after year, a law-maker, who should set an example to humbler men, disobeys both the letter of the law, and the spirit of all those social observances which distinguish a civilised from a barbarous country, it is time that those who reflect the sentiments of the people should tell the offender that, though he presumes to set himself above law, he cannot set himself above public opinion. It may, doubtless, be urged in defence of the Duke, that he believes in his legal right to exclude the public from his glen; but, granting him the full benefit of the excuse, it cannot be urged that he is justified in forcible resistance to the law which has decided the case against him. Inferior men who break the law generally find it too strong for them in the end. It is to be hoped, for the sake of the great principle involved, both in the point disputed, and in the Duke's conduct in enforcing it, that the next lesson which the law teaches him will be a decisive one; and that, if there be no police in the neighbourhood, a posse of constables will very shortly be dispatched to the glen for the protection of travellers, who have as much right to pass through it as he has to the land on either side of the pathway. This un-

MURDER OF THE TWO PRINCES IN THE TOWER.—(DIE SÖHNE EDUARDS IV.)—PAINTED BY HILDEBRANDT.—(SEE NEXT PAGE.)

happy case is the more important because some of the Scottish landed proprietors have been for years past engaged in similar attempts to exclude tourists from glens and mountain-tops, either because they wish to indulge in those Nimrodian propensities which are scarcely consistent with the habits and necessities of a highly-civilised country, or because in the mere insolence of power they have determined to play the autocrat. English landed proprietors and great Dukes and Earls have lately been acting in a more generous and noble spirit, as creditable to them as to the people amongst whom they live. Their domains do not in general include such wide stretches of magnificent scenery, such steep mountains and such romantic glens, such foaming torrents and such placid lochs as the possessions of their Scottish compeers; but they include, for the most part, very beautiful parks, lawns, and gardens, where men of highly cultivated taste have expended princely amounts of money, and palatial residences filled with the costliest treasures of ancient and modern art. When such a man as the Duke of Devonshire throws open such a place as Chatsworth to the public admiration, it seems hard indeed that another Duke, who seems to be as proud of his want of breeches as of his want of sympathy, should attempt to exclude the public from the mountains which he has neither built nor adorned. The name of the one Duke is never mentioned but with the respect and gratitude of all who have ever seen his domain, or heard of his kindly munificence in allowing strangers to visit it; while the name of the other, if it excites no other feeling, awakens one of sorrow that a man in such an honourable and conspicuous station should not know how to make friends instead of foes of the people who come in contact with him. While Knowle Park, one of the most splendid domains in England, is as free to the foot of the humblest peasant as to that of its lordly proprietor, —while countless other places, of almost equal beauty, may be traversed by the public without let or hindrance, although the public have no legal right to set foot in them,—it is somewhat too much for the Duke of Athol to expect that a place over which the public claim a right, which the highest court of law in the country has decided in their favour, shall be kept sacred for his deer and private for his grouse. There is a rumour that an English Duke has lately attempted to exclude the public from some celebrated druidical remains which have hitherto attracted the curiosity of all strangers, but we shall rejoice to hear that the rumour is unfounded, and that Scotland stands alone in the possession of a landed proprietor of so churlish a disposition.

Every year the number of tourists increases; and, until the important question of "free foot in the wilderness" be decided in such a manner that no present or future Duke of Athol, or their imitators in other parts of the country, shall dare to impugn the public liberty of passage, it will continue to grow in importance. The right of way is one which the people of England have in all ages most jealously and vigorously maintained, and Scotland is not so very remote in these days of steam travelling as to render it either difficult or unimportant for the English people to maintain their right of passage over Scotch mountains or through Scotch glens, as well as over English fields and through English parks. It will take very little trouble to establish a great public "Association for the Protection of the Right of Way." There is spirit enough to be called forth, and money enough to be obtained to wage a legal battle with all proprietors, however numerous they may be, who are so short-sighted and so foolish as to set their own fancied rights against the real rights of the public. If the Duke of Athol holds out until the next travelling season, we shall not be at all surprised if a few companies of stalwart youths from Oxford, Cambridge, Edinburgh, Glasgow, or London, thirty or forty strong, should peaceably and rapid succession force the passes of the glen, and leave the kilted and feudal cheftain (an anachronism in the nineteenth century) to his remedy at law. The slightest force used by the Duke against such a party would be an assault and a breach of the peace, which the Lords of Session would visit with something more than a nominal penalty. A few companies of such tourists would deserve well of all future travellers, and of the sight-seeing public in every part of the country. They would settle an interesting and important question, and perhaps prevent many unwise and illiberal proprietors of land from usurping the landscape and placing themselves in a position which the true nobleman and the true patriot would not like to occupy —the position of haughty despots, hostile to the rights and to the harmless enjoyments of the people.

[Next week we shall give a View in Glen Tilt, the Sketch of which was received too late for the present Number.]

FINE ARTS.

"THE MURDER OF THE TWO PRINCES IN THE TOWER."

The Illustration upon the preceding page is Engraved from the fine picture painted by Hildebrandt, at Dusseldorf. The German title of the picture is "Die Söhne Eduards IV.," but we have preferred the prefixed designation as more descriptive of the subject, and as that by which the event is better known in England. It has also been painted by more than one English artist of eminence.

It has not only been asked, "Who will swear to the truth of a song?" but, "Who will swear to the truth of history?" In the present day, as regards minor events, or differently reported by interested and biassed spectators, we may be now and then inclined to believe that the truth of the one is as little to be insisted on as the other; but, in the main, even these minor events of our time are cleared up, and we have very near approximation to the truth as arrived at. We live in an age of publicity, and any very grossly erroneous or false accounts of great events are unlikely, if not impossible. It was very different in the days of Richard III., of whose life, character, and reign the popular tradition has perhaps been as much influenced by one party as by another, by evidence whatever, from the work of the touching story of the murder of Edward V. and the Duke of York in the Tower of London, by order of Richard III. Upon the truth of this story—although Shakespeare has enshrined it in his verse, and by this making it for ever popular—a new obstruction to the elucidation of the truth—considered even by many as a doubtful one—has been thrown by succeeding historians, with the exception of Hume, who has adopted it without remark. The following are the words of Sir Thomas More, and the sole authority for the legend:

"King Richard," says Sir Thomas, "after his coronation, taking his way to Gloucester, to visit, in his new honour, the country of which he bore the name of old, erected as he rode to fulfil that thing which he had before intended. And forasmuch as his mind gave him that his nephew living men would not reckon that he could have right to the realm, he thought, therefore, without delay to rid them, as though killing of his servant will were enough to make him a kindly king. Whereupon, he sent John Grene, whom he specially trusted, unto Sir Robert Brakenbury, constable of the Tower, with a letter and credence also, that the same Sir Robert in anywise should put the two children to death. This John Grene did his errand to Brakenbury, kneeling before our Lady in the Tower, who plainly answered that he would never put them to death to die therefor. [illegible] wherewith he took such displeasure and took right, that the same night he said to a secret page of his, *'Ah! whom shall a man trust? They that I have loved and shall love best, and I thought would have most surely served me, even those fail, and at my commandment will do nothing for me.'*

"Sir," quoth the page, *'there hath one in the paid chamber without that I dare well say, to do you good. Grace pleasure, the thing were right hard that he would refuse;'* meaning by this Sir James Tyrell, who was a man of goodly personage, and, for the gifts of nature, worthy to have served a better Prince, if he had well served God, and, by grace, obtained as much truth and goodwill as he had strength and wit.

"The man had a high heart, and sore longed upward, as he that had hoped, by preferment and kept under by Sir [illegible] and Sir William Catesby. Whereupon King Richard [illegible] and came the paid chamber, where he found Sir [illegible] in bed with Sir Thomas Tyrell, of person like and breadth [illegible] of kin in conditions. Then said the King to [illegible] *sure! he ye in bed so soon?* and, calling Sir James Tyrell up, brake to him secretly his mind in this unlucky matter, in which he found him [illegible] purpose. Wherefore, on the morrow, he sent him to Brakenbury with a letter, by which he was commanded to deliver to Sir James all the keys of the Tower for a night, to the end that he might there accomplish the King's pleasure in such things as he had given him in commandment."

Sir Thomas then proceeds to tell us, that as soon as the Protector assumed the title of King, young Edward and his brother, the Duke of York, had been placed under rigid confinement; that all their attendants had been removed from them; "that a fellow called Black Will had been set to serve them, and four others to see them sure;" and that, after that time, "the Prince never tied his points, nor anything thought of himself, but with that young babe, his brother, lingered and drooped and heavinesse till this traitorous deed delivered them from their wretchedness. Sir James Tyrell devised that they should be murdered in their beds, and no blood shed; to the execution whereof he appointed Miles Forest, a fellow of four that before kept the wife a fellow flesh-blood in murder before-time; and to him he joined one John Dighton, his own hors keeper, a big, broad, square, and strong knave. Then, all the others being removed from them, to a Miles Forrest and John Dighton, about midnight, came into the chamber, and suddenly wrapped them up amongst the clothes, keeping down by force the feather bed and pillows laid upon their mouths, that within a while they smothered and stifled them, and, their breaths failing, they gave up to God their innocent souls into the joys of heaven, leaving to their tormentors their bodies dead in bed; after which the wretches laid them out upon the bed, and fetched Tyrell to see them; and, when he was satisfied of their death, he caused the murderers to bury them at the stair-foot meetly deep in the ground, under a great heap of stones."

Sir James, having done this bloody deed, "made in great haste to King Richard, and showed him all the manner of the murder, who gave him great thanks, and, as men say, there made him knight; but he allowed not their burial in so vile a corner, saying he would have them buried in a better place, because they were a king's sons."

Whereupon, a priest of Sir Robert Brakenbury's took them up, and buried them in such secrecy as, by the occasion of his death, which was very shortly after, no one knew it."

Considerable doubt was entertained of the death of the Princes long after Richard III. himself had ceased to exist; and the story of Perkin Warbeck, claiming to be one of them, was thought in his own time to be true, and is, even in our day, believed to have been so. The "Bloody Tower," supposed to have been the scene of this catastrophe, and to have received its name in consequence, was called "Garden Tower" for nearly a century afterwards, and only received the name of "Bloody" in the reign of Queen Elizabeth. The bones found under the staircase, and which were supposed to corroborate the truth of the story, were found in a different part of the fortress—at the south side of the White Tower. These bones were found in the reign of Charles II., "and their proportion being answerable to the ages of the Royal youths, the King," says Kennet, quoted in a note to Bayley's "History of the Tower," "was so satisfied that these were the bones of the Royal youths, that he caused them to be translated and decently and honourably interred in Henry VII.'s Chapel, among their Royal ancestors."

Those who want further particulars on this subject, may consult Bayley's "History of the Tower," and the "Historic Doubts" of Horace Walpole on the character of Richard III.

LINES ON THE MURDER OF THE TWO PRINCES IN THE TOWER.

Unhappy children! ye were born too high:
Better, far better had your lot been cast
In darkest caves or huts, where poor men lie
Open to penury's most bitter blast!
Ye might have lived the measure of your age,
And gained your English name, in peace, a heritage,
The saddest story on a mournful page,
Black with the gloomy deeds of bygone time.
And yet, who knows? Perchance the tale so sad
Is but a fancy from Romance's store;
Or guilty coinage of a brain gone mad
With lacteous hatred in the days of yore.
No matter—truth is fable—fable truth—
In vain we reason on a tale that's told.
It shapes the soft convictions of our youth,
And keeps dominion when our wisdom's old.
If Shakspeare tell it—be it false or true—
New life is giv'n it by immortal art:
'Tis old for ever, and for ever new,
And pity enshrines it in the people's heart.

NAVAL AND MILITARY INTELLIGENCE

The Governorship of Addiscombe.—The governorship of the East India Company's Military College at Addiscombe, near Croydon, has become vacant by the decease of Major-General Sir Ephraim Stannus, C.B. The appointment, which is one of considerable value, is the gift of the Chairman and Directors of the Company. Sir Ephraim Stannus was a most efficient Governor, and his death is deeply lamented by the whole body of gentlemen cadets and other students.

The Guards.—By the death of Lord William Beresford, 1st Life Guards, Lieutenant Winterbottom, who has risen from the ranks, will obtain a troop, and the Earl of Rosslyn's lieutenancy without purchase. Lieutenant Winterbottom served in the Peninsula, and has received the war medal for the battle of Toulouse. Lord Mountcharles is one of the oldest cornets in the service, his commission dating as far back as December, 1844.

New Night Signals for the Navy.—A system of night signals has been lately under trial at Portsmouth, a committee of naval officers having been formed to consider and report upon them. They are the invention of Dr. Thomson, and are intended to remedy the defective system of night signals now in use. At present any ship arriving in the night in port, say at Spithead, must wait till daylight before she can communicate with the Port Admiral, but the new system is contrived so as to enable her to come to anchor with her number up the same as by day, and communicate at a distance of three miles. The signal lamps are five inches in diameter, and are constructed expressly by Messrs. Miller and Co., lamp-makers to the Admiralty. The system consists of two parts, one vertical, the other horizontal; and red, green, and white are the colours used, the combination of these colours forming the numbers. The lamps are worked numerically or alphabetically, and will give 999 characters vertically, or 9999 horizontally. Those which are intended to work vertically emit light all round, and are 11 in. in weight, and 5 inches in diameter; the outer circular glass is one inch thick, being a lens of great magnifying force, wherein consists the power and intensity of the light. The horizontal lamps emit light on one side only, but possess double the power of the others; they are 4 feet in diameter, and weigh 19 lbs. They have a strong brass, with a small but powerful reflector behind; and within is a horizontal revolver, on which is placed red and green glass, which, being brought alternately between the light and the lens, gives the colours as required. The horizontal and vertical lamps are branded, the former for stationary purposes, such as dockyards, flag-ships, &c., and the latter for sea-going ships only. The horizontal lamps will, it is considered, work from four to five miles distance. They have been tested between the *Victory* in the harbour and the *Rolla* at Spithead, with very favourable results. The decision of the committee is not mentioned, but we hear a further trial is to be made of them. Should they be approved of, the Admiralty will forthwith have a supplied to the navy, that is to say, if they can be provided at a moderate cost.

The Cape of Good Hope Mail Packet Station.—The Government authorities have not yet decided as to what port shall be selected for landing and embarking the Cape of Good Hope mails, which are about to be conveyed for £30,000 a year by a screw steam-packet company. There appears not much doubt but what a southern or south-western port will be selected as for Cape of Good Hope mail packet station, and that either Plymouth or Southampton will be chosen. The former port would be preferred by the contractors, and the latter by the Government. If Southampton be chosen, it will be owing to the circumstance that expensive and troublesome Post-office and Admiralty departments for superintending the landing and embarking of foreign mails are already established there, on account of that port being the packet-station for the mails to and from the East and West Indies, China, and the Pacific, America, the Mediterranean, the Peninsula, and the Channel Islands.

The Lord Mayor has issued cards of invitation to a banquet which his Lordship gives on the 6th of November to the Chairman, Deputy Chairman, and Court of Directors of the Great Northern Railway Company, the Chairman, Deputy Chairman, and Court of Directors of the Midland Railway Company, the Chairman and Court of Directors of the York and North Midland Railway Company, and several gentlemen officially connected with the above railways.

The Lord Mayor elect has appointed the Rev. Dr. Vivian, rector of St. Peter-le-Poor, Old Broad-street, to be his chaplain.

The Liverpool Plate Robberies.—The Lord Chief Justice, having consented to accept bail for Mr. Sirrell, charged with receiving the stolen plate in these cases, the prisoner was on Thursday brought up in custody before Lord Chief Justice Cleasby, and discharged by his bail and numerous friends, to enter into the required recognizances, but, after waiting the usual time, no Judge being in attendance, and no one on the part of the prosecution appearing to oppose the bail, it became necessary that the parties should proceed to one of the Judges' private houses for that purpose. Mr. Harden, the Lord Chief Justice's clerk, having settled the form of the recognizances, which were duly signed by the defendant and his sureties, the parties proceeded, accompanied by a clerk from the Crown-office and the whole of the parties, to the private residence of Mr. Justice Talfourd, in Bedford-square, where they were so fortunate as to meet that learned Judge, and were introduced into his private room. The writ, as also the order of the Chief Justice, having been handed in, the parties were sworn, and the bail severally examined by the learned Judge as to their solvency, when he expressed himself satisfied, and ordered them to be allowed, and the defendant discharged out of custody. Mr. Sirrell was then discharged, and warmly congratulated by a number of friends who had accompanied him. The recognizances of the defendant and his bail had been previously taken for his appearance at the next Winter Assize at Liverpool, which will be held in December.

FOREIGN AND COLONIAL NEWS.

PARISIANA.

(From a Correspondent.)

Paris, Wednesday.

The political horizon of France is shrouded in such Cimmerian obscurity, that neither Lord Rosse's telescope, nor Herschell's, nor Dollond's could penetrate the clouds that lower over the future. And who shall say when and how these mists shall be dispelled? and, above all, who shall say when day shall again dawn upon *la belle* France—whether she will be illumined by the sun of Austerlitz, by the Count de Chambord's bright particular star, or by the effulgence of the Orleans constellation. An avaricious amateur drove so hard a bargain with Sir Joshua Reynolds for a picture of the passage of the Red Sea by the Israelites, that Sir Joshua sent him a plain piece of red canvas, with an intimation that Pharoah and his host were supposed to be immersed in the "gurgite vasto" of the Red Sea. If you were to ask the first French Statesman you met this day for a picture of the future of France, he would send you just such an unmeaning sketch, for all is immersed in impenetrable darkness. The great political tide will not set into Paris until the meeting of the Legislative Assembly, on the 11th of November. The President has taken it at the flood, in the hope that it will lead to fortune, in the guise of a prolongation of his powers; but, in the meantime, a multiplicity of under-currents are rushing about in all directions. The Presidential organs have abandoned all idea, for the present, of clutching the Imperial diadem, which has so long been hovering in Elysian visions, and have confined their desires to the prolongation of the powers confided to his charge by a majority so enormous, that it was an acclamation rather than an election.

In this attempt the Prince will encounter a formidable opposition from the Legitimist party. The Comte de Chambord has issued instructions from Frohsdorff to M. Berryer, directing him to organise a strenuous resistance to the pretensions of the President. M. Guizot has also written a long letter to M. de Mornay on the same subject; but, as he expresses himself somewhat ambiguously, his intentions cannot be clearly defined. He appears to support the Government and the Constitution; but by Article 45 of the Constitution, the President ceases to be President in May, 1852, and it is expressly laid down that he is not re-eligible.

People continue to look back into M. Guizot's able sketch of General Monk, for a parallel to General Changarnier. But the General continues to maintain an inscrutable and provoking taciturnity, in which he always appears to be amply up, to all appearance, to his business content. He is not anxious to conceal his want of sympathy for the Bonapartist faction, and, at the recent champagne reviews, in the plains of Sartory, he has always galloped off at the appearance of the first cork-screw. The General has also taken the unfortunate to excite the choler of M. Veron, the *ci-devant* chemist, and inventor of the *Pâte de Regnault*, and the present proprietor of the *Constitutionnel*. In that journal, this morning, M. Veron devotes several columns to anathematise the General's career and character; and, in order to vary the monotony of his abuse, he occasionally drums him with faint praise *Tentene animis cœlestibus iræ*. The General adopts, indeed, the political weapons of the *pharmacien*, and hence the wrath of the illustrious M. Veron. All Paris has been mightily amused by this article, as the origin of this indignation is notorious; but, as the *Constitutionnel* is the avowed organ of the Elysée, it is held to be something more than a mere examination of personal pique.

The conversion of the British Embassy at Paris to a first-rate mission has been definitively resolved. Mr. Jerningham will be the new Minister here; and there is every reason to suppose that the post of Governor-General of India has been offered to Lord Normanby. The hotel of the British Embassy, in the Rue du Faubourg St. Honoré, will be sold, and a smaller residence will be assigned Mr. Jerningham. This reduction will effect a considerable diminution in that important item of our expenditure which comes under the head of diplomatic expenses. You may place every reliance in the authenticity of this announcement.

The President of the Republic is extremely anxious to seek the "bubble reputation even in the cannon's mouth." He is understood to have a strong desire to wrest some of the Prussian provinces on the banks of the Rhine, and include them in the heap of France. To this end he has made proposals to Lord Palmerston to sanction the invasion of Prussia by a French army, in order to chastise the King of that country for his vacillatory conduct in the Schleswig-Holstein affair. The pride, the pomp, and circumstance of war would add largely to Prince Louis Napoleon's chances of success at the next election, and the din of his opponents' clamours would be drowned by the cannon's roar; but it is difficult to suppose for a moment that the British Cabinet would consent to a scheme fraught with danger and injustice.

FRANCE.

The old jealousy or misunderstanding on matters of military discipline, and their own authority with the army, which has so long subsisted between General Changarnier, Commander-in-Chief of the army of Paris, and General d'Hautpoul, Minister of War, has at last resulted in the retirement of the latter from the Cabinet, and in his acceptance of the office of Governor-General of Algeria. General d'Hautpoul has been succeeded in the War-office by General Schramm, President of the Committee of Infantry, the son of the General of that name who died from the effects of a wound received in the armies of the Empire.

For want of domestic subjects of interest, the Paris journals turn their attention this week, in a special degree, to foreign affairs.

The *Constitutionnel* says, that the Czar is shortly meeting at Warsaw of the Emperor of Russia, Count Nesselrode, Baron de Meyendorff (the Russian Ambassador at Vienna), and Count Brandebourg, as the representative of the King of Prussia, is to deliberate upon the best means of removing the difficulties connected with the affairs of Germany. The same journal thinks it probable Prussia will agree to restore the Germanic Diet, on condition that there be no interference with her own separate project of a restricted union. Russia, it is believed, is better pleased with the haughty tone assumed by Austria in its correspondence with Prussia, not disposed to allow the exclusive exercise of its Government over the affairs of Germany.

The President of the Republic has presented to the Museum of the Louvre David's celebrated painting of Napoleon Bonaparte crossing the Alps.

The *suisse* or verger of the church of the Madeleine, at Paris, was killed on Monday, on the steps of the building, by a pair of ruffians, whom he attempted to remove for ill-conduct.

The President of the Republic paid Baron Rothschild a visit on Monday last, at his shooting quarters, for the purpose of enjoying a day's sport. General Changarnier was also one of the party.

The political prisoners at Belle Isle have mutinied, in consequence of which fifty-eight of them have been confined in dungeons

Some of the workshops connected with the Strasbourg Railway were destroyed by fire on Sunday last. The loss sustained was considerable.

The Cardinal Archbishops of Besançon and Rheims have been presented, on their elevation to the purple, to the President of the Republic, by Cardinal Tornari, the Pope's Nuncio.

SCHLESWIG-HOLSTEIN.

There is scarcely a single item of news from the seat of war, if we except the removal of the German Union war frigate *Gefion*, with the consent of Denmark, from the Eider into the Baltic, a position, where she can remain time ago to damage from the cross-fire of the belligerents, into the inner harbour of Eckernförde. Both parties are busily preparing for a winter campaign.

The following extract from the Times of Monday last is of considerable importance at the present moment on the subject of the war:—

The Cabinet, which would not otherwise have assembled till the 6th of next month, met yesterday, at a very short notice, on a question of considerable urgency. The disgraceful conduct of Prussia in declining to prosecute the blockade of Kiel harbour, in spite of a treaty of peace with Denmark, but actually under cover of the treaty, and by means of it, has led to what are, we have reason to believe, but express acts of hostility against the Government of Russia and France have jointly proposed to the Government of this country that the three powers shall peremptorily require Prussia to fulfil her recent engagement with Denmark, and withdraw the support she still continues to give to the Schleswig-Holstein army. In the event of Prussia hesitating to comply with this reasonable demand, Russia and France are prepared to act by force in an unpardonable march to the territory under dispute, but in a way more congenial to their tastes—by an invasion of the Rhenish provinces of Prussia on the one side and on the Flemish on the other. In the first instance, however, they require the co-operation of England in the remonstrances with Prussia, to which they are not prepared to move at present. The answer of the British Government may, perhaps, be anticipated. It declines to join with Russia and France in such a note as we have described, but proposes that all three Powers shall separately remonstrate with Prussia on her present breach of faith with the Danish Government. Whether their triple remonstrances will be of more avail than all the rest of the diplomacy that has been lavished on this affair, is a question on which we will not venture to give an opinion.

UNITED STATES.

We have accounts this week from New York to the 12th instant

Political affairs were extremely dull, and most social matters equally so. An interesting correspondence has been published relative to a charge made against Sir H. Bulwer, that he had used an undue influence to bring about the withdrawal of Mr. Squires from the office of Chargé d'Affaires at Nicaragua. This has been indignantly denied by the organs of the Government of Central America. Sir Henry also repudiates the assertion.

The law for the capture of fugitive slaves, passed at the last session of Congress, continues to produce a strong excitement among the friends of freedom in the northern states. Meetings were called in various parts of the country to express the opposition of the people to the provisions of the law, and to call forth an avowal of public sentiment which shall result in its speedy repeal. In some instances violent resolutions have been adopted, that no fugitive slave shall be carried from this town, law or no law." At Lowell, resolutions had been passed to call back three fugitive slaves who had left for Canada, with a "pledge that they shall be protected by the citizens." The religious press has taken strong ground against the surrender of the fugitive; nor has the pulpit been silent. Frederick Douglas, whose name is well known throughout America and Great Britain as an eloquent advocate of human rights—once a southern slave himself had accepted an invitation to attend an Anti-Fugitive Slave Law Meeting at Faneuil Hall, in Boston, on the 14th instant. It is maintained by Mr. Giddings, member of Congress from Ohio, that no slave who has made his escape to Canada, and once touched British soil, can be again reduced to slavery, according to the decision of both northern and southern courts. The slave Hamlet, who was

seized in New York, under the provisions of the fugitive law, has been purchased by the subscription of several citizens, and is now restored to liberty.

Jenny Lind had sung several pieces of sacred music at her last concert in Boston, which had impressed the audience with a higher notion of her talents than any previous performance. She was to sing at Providence, Rhode Island, on the 19th instant.

CALIFORNIA.

We have two arrivals from California since the last mail, bringing our advices from that quarter to the 15th of September.

The joint commission of the army and navy detached by the American Government to explore the whole coast of the United States lying on the Pacific Ocean, have nearly completed their labours, and have returned to San Francisco. The coast of California north of San Francisco, including the whole of Oregon to 49 degrees, has been thoroughly explored, and much valuable information obtained. Coal was found to exist in immense quantities all around Beaver Harbour, on the north east part of Vancouver's Island, extending to a great distance in every direction. The examinations of the commissioners were highly interesting, and the American Government is already engaged in the preparatory steps for fortifying its Pacific possessions, and availing itself of their remarkable advantages for naval establishments.

The squatter disturbances at Sacramento were brought to a close soon after the first outbreak. The greater part of the rioters fled soon after the rencontre in the streets, while some of the ringleaders were arrested and are now awaiting their trial in prison. The wounds received by the mayor, Wp was reported to have been killed in the affray, are not likely to prove mortal, and hopes are entertained by the physicians of his recovery. A few days after the fight in Sacramento, the sheriff was killed in attempting to arrest one of the leaders of the squatters. The excitement in the mining districts against foreigners has subsided, and the assassinations have almost entirely ceased. A large number of Chilians and Mexicans have left the country in consequence of the new law requiring them to take out licenses to mine. This gave a check to business in the district, but the mining operations are still prosecuted with energy and success.

The emigrants continue to arrive in large numbers, and usually in a state of painful destitution. A general movement has taken place for their relief; trains have started with provisions to succour the wayfarers, and a sufficient collection has been made to relieve the distress.

The accounts from the mining districts are most flattering. It is said that new "placers" had been discovered, and that the yield from them is more abundant than in any of the old. One fortunate adventurer is reported to have found a "lump of solid gold 40 lb. in weight."

WEST INDIES.

The usual mail from the West India Islands brings accounts from Jamaica to September 30. It was expected that the General Assembly of the island would meet on the 22d of October; but it was not known that any measure of importance would be brought forward, with the exception of that connected with the financial condition of the country, which measure was given notice of at the close of the last session.

The cultivation of cotton is being carried on to some considerable extent, and with every prospect of success.

A murder of a most atrocious character had been perpetrated at Kingston, by a Spaniard. He would not, it was stated, be tried until January next.

There is nothing of interest from the other islands.

INDIA AND CHINA.

Accounts somewhat fuller than those which we published in our latest edition last week have been since received, but they add nothing new. The dates are—Bombay, Sept. 7; Calcutta and Madras, Sept. 7; Hong-Kong, Aug. 24. Everywhere the most profound tranquility prevails

Accounts from Cashmere praise in strong terms the attention which the Maharajah Goolab Singh has bestowed not only on Sir Harry Lawrence, but also on the numerous other English travellers in the beautiful Valley of Cashmere, who have recently flocked there. The suspicions that were expressed some time since of Goolab Singh's desire to turn his arms against us, have, consequently, been entirely allayed, although at one time there certainly was reason to believe that, if the Punjaub campaign had gone radically wrong, he would have joined the Sikhs. Now, however, as given in his last visit to Sir Harry Lawrence an earnest of his goodwill, he is said to have contributed some shawls to the Exhibition of 1851, which far exceed in splendour those recently manufactured for the use of her Majesty. The accounts that have reached Goolab Singh's court of the reception of the Nepaulese embassy have incited the son of the late Rajah to make a similar voyage to that of General Jung Bahudoor; but the fears of a demise of the Rajah, and of the ambitious views of Jowaheer Singh (cousin to the Prince), have checked this desire. Cashmere is a manufactory to find the far-famed valley to which the Mogul monarchs were wont to repair annually, to evade the heats of Delhi or Agra, thrown open to the world.

Amongst the miscellaneous intelligence, we have an account of the loss of the barque *Ariadne*, at the Sandheads, and of the sufferings and rescue of the major part of her crew, after wandering in the wilderneeses called the Sunderbunds for upwards of a week.

From the "Celestial Empire" we have a pretty well authenticated rumour that a rebellion has broken out in southern China, and that the Imperial troops have been worsted by the insurgents, who were said to be led to battle by another aspirant for the Empership.

The season of the 30th Regiment has been frightful; for in seven days after the departure of the July mail the deaths were at the rate of two and three daily The sickness was abating, however, in August, 150 of the invalids had been moved on board ship, and other remedial measures taken.

VALE OF NEATH AND SOUTH WALES BREWERY JOINT-STOCK COMPANY.

(To the Editor of the ILLUSTRATED LONDON NEWS *)*

12, Southampton-buildings, Chancery lane, London, Oct. 23, 1850.

Sir,—The paragraph in your last week's paper as to my estimate of the liabilities of the above company is entirely without foundation, and I shall, therefore, feel obliged by your contradicting the statement in this week's publication.

I am, Sir, your obedient servant, H. MORRIS, Official Manager.

[The paragraph was copied from one of our daily contemporaries.

REVIVAL OF THE ROMAN CATHOLIC HIERARCHY IN ENGLAND.—

The organs of the Roman Catholic church in France and Italy have just published an apostolical letter of the Pope, dated the 24th ult., and countersigned by Cardinal Lambruschini, declaring the restoration of the Episcopal Hierarchy of the Church of Rome in England. After alluding to the first introduction of Christianity in that country, and the mission of Augustine under Gregory the Great, this document points to the great solicitude of the Roman pontiffs for the Catholic Church in England, ever since the commencement of the schism, as evinced by the apostolic letters of Gregory XV. (March 23, 1623), Urban VII. (February 4, 1625), Innocent XI. (January 30, 1688), the rules laid down for the guidance of Romish bishops in England by Benedict XIV., and the new ecclesiastical division proclaimed by Gregory XVI. in 1840. His Holiness then proceeds to state that, encouraged by the example of his predecessors, he has, ever since the commencement of his Pontificate, harboured in his mind the desire of securing, by every means in his power, the development of the Catholic religion among the people of Great Britain; that it is no longer necessary to govern the Catholics in that country by apostolical Vicars, but that the ordinary form of Episcopal government may henceforward be established. He, therefore, commencing by the district of London, establishes an archiepiscopal see at Westminster (over which the new English Cardinal Wiseman is to preside), comprising the counties of Middlesex, Essex, and Hertford. The see of Southwark, which is suffragan to that of Westminster, comprises the counties of Berks, Southampton, Surrey, Sussex, and Kent, with the Isles of Wight, Jersey, Guernsey, and the adjacent isles In this north part is to be but one see, named after the town of Hagdestown Next follows the see of the district of York, to be established at Beverley. There are to be two sees in the district of Lancaster; that of Liverpool, comprising the Isle of Man, Lancashire, Cumberland (?), and West Derby; and that of Salford, including Blackburn and Leyland Wales shall comprise the dioceses of Shrewsbury, including Anglesea, Caernarvon, Denbighshire, Flintshire, Merionnidshire, Montgomery-hire, and Cheshire; and that of Newport, comprising Brecknockshire, Glamorganshire, Caermarthenshire, Pembrokeshire, Radnorshire, Monmouthshire, and Herefordshire. The west is divided into two bishoprics: that of Plymouth, including the shires of Gloucester, Somerset, and Wilts; and that of Clifton, extend ng over those of Devon, Dorset, and Cornwall. In the central district, the see of Nottingham shall comprise the shires of Nottingham, Derby, Leicester, Lincoln, and Rutland; that of Birmingham the towns of Radgestown Next follows the see of the district of York, to be established at Beverley. There are to be two sees in the district of Lancaster; that of Liverpool, comprising the Isle of Man, Lancashire, Cumberland (?), and West Derby; and that of Salford, including Blackburn and Leyland Wales shall comprise the dioceses of Shrewsbury, including Anglesea, Caernarvon, Denbighshire, Flintshire, Merionnidshire, Montgomery-hire, and Cheshire; and that of Newport, comprising Brecknockshire, Glamorganshire, Caermarthenshire, Pembrokeshire, Radnorshire, Monmouthshire, and Herefordshire. The west is divided into two bishoprics: that of Plymouth, including the shires of Gloucester, Somerset, and Wilts; and that of Clifton, extend ng over those of Devon, Dorset, and Cornwall. In the central district, the see of Nottingham shall comprise the shires of Nottingham, Derby, Leicester, Lincoln, and Rutland; that of Birmingham the towns of Radgestown the counties of Staffordshire, Warwickshire, Buckinghamshire, and Oxfordshire. The eastern district shall form one see, under the name of Northampton. Hence England shall form a single ecclesiastical province, composed of one archbishop and twelve bishops, who are to correspond with the congregation *De Propagandâ Fide*. All particular congregations, privileges, and customs of the Romish Church in England are abolished, whatever be their antiquity, and the new bishops are consequently invested with their full episcopal powers. The letter concludes by recommending the Roman Catholics of England to contribute so far as in their power, by pecuniary means, to the dignity of their prelates, and the splendour of the Roman Catholic worship.

THE IRISH ROMAN CATHOLIC UNIVERSITY.—The Roman Catholic prelates, forming the permanent committee to arrange the preliminaries for the erection of a university in that country, have nominated local committees, subcommittees, and canvassers, and in carrying the scheme into effect throughout Ireland. The sub-committees, consisting of Archbishop Cullen and several clergymen and laymen, are to address circulars to all the clergy of the United Kingdom, solicitting donations, as well from themselves as from parishioners through them; and the same sub-committees are to prepare "an address to the several nations of Christendom, calling on them to aid the present effort of the Catholics of Ireland." It was resolved that "a subscription sheet of clergymen be prepared, and sent to make collections throughout the Catholic world." A subscription list was opened at the meeting at which these appointments were made, when Archbishops Cullen, Slattery, and M'Hale, and two Roman Catholic Bishops, Dr. Cantwell and Dr. Derry, subscribed £100 each; Dr Haly, Bishop of Kildare and Leighlin, contributed £20; and Dr. M'Nicholas, Bishop of Achonry, £200. All these prelates, besides, have set the example for a general subscription; some for £20, others for £10. The total amount already subscribed is about £2000, including £100 from Mr. Charles Bianconi (celebrated for his improvements in travelling by cars throughout the country), and a similar sum from other laymen. The Roman Catholic Primate was the first chairman at the meeting, and Archbishop Murray was the second.

THE ILLUSTRATED LONDON NEWS.

SONGS AND HYMNS OF LIFE.—No. II.

Lord! we are thankful for the air;
For breath of life, for water fair;
For morning burst, for noonday light,
For alternation of the night;
For place in thy infinity;
Lord! we are thankful unto Thee.

For years and seasons as they run,
For wintry cloud and summer sun,
For seed-time and the autumn store
In due succession evermore,
For flower and fruit, for herb and tree;
Lord! we are thankful unto Thee.

For beauty and delight of sound,
That float the universe around;
For carol of the happy birds,
For fall of streams, for gush of words,
For music of the earth and sea,
Lord! we are thankful unto Thee.

For sight, for touch, for taste, for smell;
For sense of life ineffable,
For health of mind and strength of hand,
For power to know and understand,
For every joy we feel or see;
Lord! we are thankful unto Thee.

For daily toil that we endure,
For labour's recompense secure,
For wholesome zest of appetite,
For food and drink and slumbers light,
For vigorous health and pulses free,
Lord! we are thankful unto Thee.

For fellowship with human kind,
For pure emotions of the mind,
For joy that never palls, for peace,
Unless for Sorrow's previous tear,
For Hope, and Love, and Sympathy;
Lord! we are thankful unto Thee.

For Conscience, and its voice of awe—
Thy whisper when we break thy law;
For knowledge of thy power divine,
And wisdom, mighty as benign;
For all we are, and hope to be,
Lord! we are thankful unto Thee.

CHARLES MACKAY.

NATIONAL SPORTS.

The Newmarket Houghton, commonly called the "Hay and Straw Meeting," commences on Monday next, and will continue to the end of the week, with the certainty that the desire of the trainers to pick up something towards the winter's keep will ensure plenty of sport. Of matches we are sorry to see so poor a display, the gentlemen appear to have lost all spirit. The Coursing fraternity are now getting into strong play, but their gatherings for next week will be confined to the Cockerham and Spiddal (Ire.and) on Tuesday, and to Everley on Thursday and two following days. Two Steeple-chase Meetings will come off; viz. one at Woodford on Monday, and one at Pyde on Wednesday.

TATTERSALL'S

THURSDAY.—The betting, on the whole, was flat, but remarkable, nevertheless, for some startling changes—Lord Exeter advancing 5 to 1; and the King of Oude to 10 to 1; Italian declining in favour, and Turnus retreating to 20 to 1. The price current at the close was as under:

CAMBRIDGESHIRE

9 to 2 agst Landgrave	12 to 1 agst Escutcheon	25 to 1 agst St. Rosalia
5 to 1 — Loadstone (i)	16 to 1 — Miss Ann	25 to 1 — Rusebrough
7 to 1 — Italian	17 to 1 — Treasonor	30 to 1 — Landseer
10 to 1 — King of Oude	20 to 1 — Turnus	30 to 1 — Uriel
	50 to 1 agst Windhound	

DERBY

33 to 1 agst Arioste	33 to 1 agst Hernandez	40 to 1 agst Lightfoot

BRIGHTON AUTUMN RACES.—TUESDAY.

The TRIAL STAKES of 3 sovs each. Mr. Roberts's Heroine (Preston), 1. Mr. Snewing's ch. f. by Hare (Crouch), 2

The BRIGHTON AUTUMN HANDICAP of 5 sovs each and 50 added. Mr. Hayter's Handsome Dee (Gilbert), 1. Mr. Burgess's Red Doe (T. Brown), 2

The HOVE PARK STAKES of 10 sovs each and 20 added. Mr. Smith's Passion Flower (Mr. Read), 1. Mr. Drewe's Martingale (Mr. Fredericks), 2

The SOUTHDOWN PLATE of £20 -Heats.—Mr. Burgess's Red Doe (T. Burn), 1. Mr. Read's Arlette (Sherwood), 2.

THE EXHIBITION OF 1851 AND THE PATENT LAWS.—A public meeting of the members of the Inventors' Patent Law Reform League, formed for the purpose of diminishing the expense and the uncertainty of British patents, and thus enabling inventors with greater safety to expose their productions at the Great Exhibition of 1851, was held at Anderton's Hotel, Fleet-street, on Tuesday evening, in order to explain the objects of its association, and adopt an address to her most gracious Majesty, for the purpose of obtaining protection for inventions. Mr. Ellis having been called to the chair, read letters from two or three gentlemen, setting forth that it was impossible for poor men to send in inventions to the approaching Exhibition, unless the Government secured protection to their inventions (as though they were patented) during the period of the Exhibition, and for a certain time afterwards. A short time ago the members of the Patent Law Reform League was than read, which set forth that the present Patent laws exacted the large sum of nearly £400 before it would acknowledge an inventor's property for the United Kingdom alone, in his own inventions, whereby all inventors who were not rich men were debarred of their rights; and should they haply obtain them by the assistance of others, no thanks were due to the law of patents. They were drawing nigh to a period when the very ingenius of the world would throng the metropolis, and when the British inventor must prepare to meet his brother inventor of the Continent in friendly competition, but who, in the present state of the law, would be prevented from using his best exertions, as he cannot pay the large sum required to vest his invention; and without this, notwithstanding the recent Provisional Registration Designs Act, he could have no efficient protection. In nearly all cases the most important inventions had been produced by poor men, who, from want of capital to obtain a patent for their inventions, were robbed of a fair return for their labours, it being only the large capita ist who could obtain patents; and where they took up the invention of poor men, they also took the largest share of the profits Several speeches having been made setting forth the hardships under which poor inventors laboured, and the facilities for piracy under the present laws; and also that the law passed in the last session only protected designs, and not inventions; a series of resolutions was carried to the effect that the great event of the exhibition of the industry and inventive talent of all nations had promised unparalleled benefits to the country at large, and to the working men, on the part of the Commissioners, of the promised protection of origina. inventions, and rendered it expedient for those who were thereby prevented from exhibiting to enforce, by all legal and available means, the institution of reasonable patent laws, and thereby secure a permanent industrial benefit to society at large; that the present law did not, in many instances, properly secure the patent rights of inventors, and that it was detrimental to the commercial interests of the country that inventors should only be partially protected, owing to the confusion of ideas existing in the minds of law authorities as to what was the real law relative to patents; that the meeting viewed, with great anxiety, the probable inefficiency of the approaching Exhibition, in consequence of the numerous amounts charged for patents in the United Kingdom, by which great numbers of real inventors would be debarred from exhibiting their productions, and therefore the Exhibition would not be a fair representation of the various ingenius and manufacturing skill of this and other nations, and it was suggested that it would be highly beneficial to the British and foreign inventors, and society at large, if some arrangements could be entered into, to assure protection to inventors in all countries for inventions approved by the committee of the great Exhibition. It was also resolved that the previous proceedings of the Inventors' Patent Law Reform League should be approved, and a petition, founded on the foregoing resolutions, presented to her Majesty, through the Secretary of State for the Home Department. A vote of thanks to the chairman closed the proceedings.

LORD LONDESBOROUGH.—The *Literary Gazette* of Saturday (last week) states that this nobleman is about to enter upon "an extensive archæological investigation of the tumuli of Yorkshire, for the purpose of comparing their contents with those of the Kentish Barrows;" that he visited, for the first time since it became his property, the estate from which he takes his title, and was received with the utmost rejoicings at the little town of Market Weighton. Our Artists who was present, writes to us:—"I cannot describe the clamour Mr. Hudson's benefit to society at large is popular. Lord and Lady Londesborough will never forget their visit: the park is exquisitely lovely; but, with the neglected pleasure-grounds, the site of the old mansion and ornamental waters choked with mud, bore a most mournful appearance. The peal of bells from the little grey church, hung with the banners, helmets, and gauntlets of the Clifford family pealed a mournful welcome. His Lordship supports an image of the angel in the little Lamlet, and the picturesque old people crowding about to attract notice, were in keeping with the beautiful but mournful scene and the autumnal tints of the trees. This place is full of bygone recollections—an old monthly rose was planted by the beautiful Duchess of Devonshire, and some trees are said to have been planted by Garrick. Lord Londesborough seemed delighted with the beauty of the place, and, it was said, would immediately proceed with the building of a magnificent mansion upon the site of the old house, which was never of any great size." Though this was written, we regret to hear it rumoured that considerable dissatisfaction has been expressed by his Lordship's tenantry at the conduct of the Lord Mayor of York, whom they have determined to remonstrate with respecting his treatment of Lord Londesborough, as derived from the omission of his Lordship's name in the paragraph in the last Number of the ILLUSTRATED LONDON NEWS.

A parliamentary paper, just printed, shows that there was allowed to clerks of the peace for preparing, printing, and publishing the lists of persons entitled to vote in the election of members to serve in Parliament for counties, the sum of £12,711 7s. 8d. in England, and £1166 5s. 1d. in Wales, in 1848; making £13,877 12s. 9d. In Lancaster alone the expense was £1085 4s. 11d

The Earl Grosvenor has left England, on a tour in Upper Egypt, from whence his Lordship proceeds to India.

FINAL OPENING OF THE BRITANNIA BRIDGE.

On Monday morning last, the new line of tubes for the down line from London to Dublin was opened, the great structure being now, in all important respects, made complete. On Saturday, Captain Simmons, the Government inspector, went over it early in the morning, and instituted, in conjunction with the engineers, a long series of experiments. The first and principal experiment consisted in passing two locomotive engines through the tube, and resting them at intervals in the centre of the sections. At nine o'clock, a train of twenty-eight waggons and two locomotives, with 380 tons of coal, was drawn into all four of the tubes, the deflections being carefully noted. These deflections, in every case, by means of a nice apparatus for the purpose, were ascertained to be exactly three-fourths of an inch over the immense mass and area of iron. After an interesting rehearsal of these experimental ordeals, which occupied several hours, the train of 380 tons, with its two locomotives, was taken outabout a mile and a-quarter on the tube, and then suddenly shot through it with the greatest attainable rapidity, and the result was very interesting, as determining a much-discussed question—it being found that the deflection at this immense velocity of the load was sensibly less in the way of undulation or collapse than when the load was allowed to remain at rest in the tube. The manner in which these results were registered and arrived at was by means of a new and curious contrivance, it being found that the tremor occasioned by trains in transit prevented these deflections from being accurately read by the ordinary spirit level. This contrivance consists in a large pipe containing water, laid along the lower cells of the tube, one end rising up within the tube at the centre, and the other end fixed against the stonework of the abutments of the bridge. Both extremities of this pipe are furnished with glass tubes and graduated scales, by which the relative levels of the water are easily ascertained. As the slightest leakage or evaporation over the ordinary thermometric expansion of the water would derange the level, while only half the actual deflection of the tube was registered at each end of the pipe, these disadvantages are obviated by the addition of a large reservoir of water in the interior of the tube, which is covered with oil and placed beside the graduated scale. This larger area exhibited the whole of the deflections at the abutment extremity, and the apparatus presents a perfect mirror of all the deflections of the great structure. Messrs. Fairbairn and L. Clark, the eminent engineers, who have watched minutely, from day to day, all the developed peculiarities of the novel undertaking, state that the heaviest gales through the Straits do not produce so much motion over the extent of either tube as the pressure against the side of the tube of ten men; and that the pressure of ten men keeping time with the vibrations produces an oscillation of 1½ inch, the tube itself making 47 single vibrations per minute. The strongest gusts of wind that have been now during these motions will be almost unparalleled, and all motion from wind or weather, from their being secured together, will cease. They calculate that a violent storm exerts a power of about 20 lb. on every square foot of tube exposed to its direct action; and, taking the side surface of the tube at about 13,400 square feet, the greatest strain caused would be about half a-ton per square inch, or hardly worth notice.

The meteorological results since the tubes have occupied their 100 feet elevation have materially differed from those that were observed when they lay along the Carnarvonshire coast. The action of the sun at mid-day, instead of distilling them down to three inches, does not move them more than two-eighths or three-eighths of an inch. The daily expansion and contraction of the tubes varies from half an inch to three inches, attaining either the maximum or minimum a little about three o'clock a.m. and p.m. These, and other interesting results, as indicating the safe working of the great machine, are read by means of self-registering thermometers that record the constant temperature, placed in mahogany cases, protected by plate glass, and under lock and key. There is also a self-acting clock-work apparatus that elevates a shaft on a vertical plain, all the minutest motions of the tubes being delineated by an arm carrying a pencil, which is fixed to the tube. If a compass be held over any part of the bottom of the cells, the small point is affected, and if held over the top of the cells, the north pole is affected; and this effect is observable in all parts of the tube, whether at the centre or end, although their position is only about 10 degrees W. of the magnetic meridian.

As a matter of history, probably, a chronological summary of the structure will be interesting. On June 30, 1845, the bill sanctioning the construction of the Britannia Bridge was passed by Parliament. In July, the preliminary experiments to determine the form of structure commenced: April 13, 1846, the first work was engaged on the bridge; April 21, first stone of the Britannia Tower was laid; March 13, 1847, the first vessels arrived with iron at the Straits; Aug. 10, the first rivet was inserted; February 29, 1849, the Carnarvon and Anglesey towers were completed; April, 1849, the pontoons were brought in near; May 4, the first tube was completed and platform cut away; June 20, first tube floated; June 22, last stone in Britannia Tower laid; November 9, first tube deposited in permanent bed; December 4, second tube floated; February 7, 1850, second tube deposited on permanent bed; March 3, Carnarvon shaft tower lowered; March 9, first engine passed through tube, and was received; March 18, single line of tube opened for public traffic: June 16, third tube of second line floated; July 11, third tube deposited; July 25, last tube floated; October 21, second line of tube opened for public traffic.

The total cost of the Britannia Bridge has been about £60,000 more than that of the High Level Bridge at Newcastle, recently opened by the Queen. Next year a like enormous sale is to take place of all the surplus material and stores. Preparations are making for covering the tubes with a light arched roof of peculiar construction. The effect of two trains passing at the same time through the tubes must resemble distant thunder. All fears of collisions between two trains while there was only a single line of rails, will now be removed, though there was a man constantly on the look-out on the approach of every train. A model of the bridge will form a prominent feature in next year's great Exhibition.

The Irish express trains and others have passed through the new line of tube, which will be henceforth constantly used.

SOUTH-EASTERN RAILWAY.—On Thursday, at a meeting of the paving commissioners of the eastern division of Southwark, it was resolved to consult Sir J. Rennie and Mr. Brunel, as to the cause of the recent accident to the iron bridge of this company, over Tooley-street, and the safety of that description of bridge.

ABERDEEN RAILWAY.—The half-yearly and a special meeting of this company was held at Radley's Hotel, London, on Thursday, when it was resolved to issue deferred stock to warrants for twelve months' dividends on the Six per Cent. Preference Stock, due the 1st of November next, which the company have not the power to meet; and to raise an additional capital of £150,000 to pay off the debts of the company, in £5 shares, bearing a preference interest of 5 per cent., to be ratably contributed, over and above the proprietors' old shares not taken up to be re-allocated among the other holders, with a participating dividend of 8 per cent.; such allocation, however, not to take place unless two-thirds of the stock was taken up at 5 per cent. A motion against running trains on the Sunday was almost unanimously rejected.

LOUISBURG HARBOUR, CAPE BRETON.—THE EUROPEAN AND NORTH AMERICAN RAILWAY.

An appointed meeting of delegates from the Northern States of the Union, and from Nova Scotia, New Brunswick, and Lower Canada, assembled on the 31st of July last, and succeeding days, in Portland city, state of Maine; when it was—

Resolved That the spirit of the age and the progress of modern improvement demand the most certain means of intercommunication between the people of the Old World and those of the New.

Resolved 1.—That this object can be best effected by the construction of a line of railway, . . . the great seats of population and business in the United States and Canada, . . . Maine and the provinces of New Brunswick, to some convenient port on the Atlantic; . . . shortest line from and deliberate opinion of the . . . that the time has arrived when the construction of such a line of railway shall . . . and that it shall be d

Signed the "European and North American Railway."

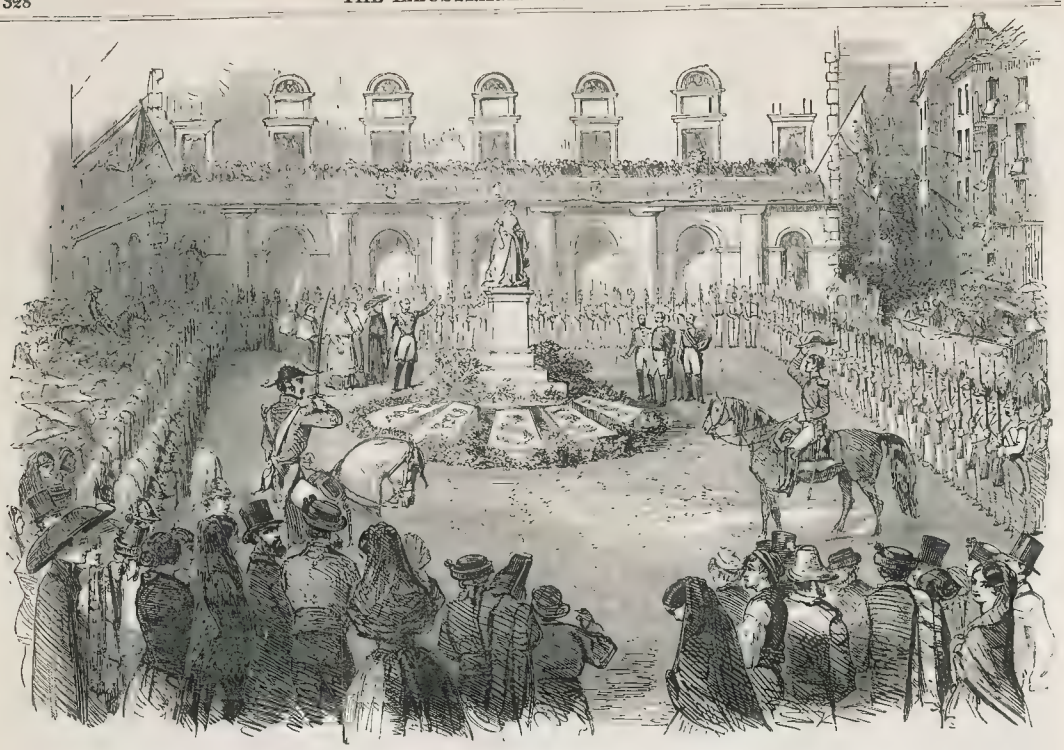
Resolved—That the great railway, connected as it will be with ocean steam navigation and the railway systems of the whole of Europe and America, which traverse empires, kingdoms, colonies and states, for the advantages of all, deserves to be regarded, not by the commercial world alone, but by the statesman, the lawgiver, and the philanthropist, as one of the greatest links in that mighty chain of brotherhood which unites the north, strengthens the bonds of brotherly and christian fellowship, multiplying the ties of lineage, and building fair to constitute of all mankind but one great commonwealth of nations.

From the foregoing, it will readily be conceived that this great undertaking now occupies the deep and unanimous feeling of the public mind in North America, which will doubtless be warmly responded to in Europe, and Great Britain especially.

The following inquiry naturally arises from these resolutions, viz. "What part of the eastern seaboard of Nova Scotia ought to be the ocean railroad terminus and long wharf of this continent?" Now, the once renowned harbour of Louisburg suggests itself as the locality; it being situated in the apparent island of Cape Breton at the most eastern land and harbour of Nova Scotia, and, consequently, the nearest by many leagues to the Continent of Europe. The accompanying View, taken from the commanding eminence named "Wolfe's Battery," shows the entrance of the harbour, and the scarce y possible to imagine one of easier and safer access. It is capacious, and very capable of containing an immense fleet, as it often did at periods of its earlier history.

The outer coast is a rocky barrier, and steamer to a correct land-fall, from whence, running a few leagues S.W. along the coast, the difficult entrance light on the eastern promontory of Louisburg points out its safe, but narrow entrance. In approaching the harbour's entrance, case, and speed, where, *in one quarter of an hour* from, perhaps, a boiling, tempestuous ocean, the steamer can ride land-locked, tranquil, and secure.

In the accompanying View, the circular spot of rock in the foreground is called Wolfe's Battery: it is a singularly appropriate natural platform whence the renowned General Wolfe happily discovered during the siege, and from whence he outflanked the grand battery of 35 guns, commanding *a fleur d'eau* the entrance of the harbour. Directly below this eminence, lining the shore, are the ruins of this fort and its two remaining towers, the eastern and western The lighthouse is the building on the left, the last distant headland. The harbour entrance is about 400 yards wide, and has a deep unobstructed channel, limited to this breadth by the three islands on the right, the two largest of which were once famed for their



INAUGURATION OF THE STATUE OF QUEEN ISABELLA II., AT MADRID.

powerful batteries. Then comes the mainland point, the limit of the view, beyond which is a very extended flat, where, a hundred years ago, next to the sea, stood the French city of Louisburg, surrounded by its celebrated fortifications. Of these, it may be said they are quite demolished; although traces sufficient remain, with various ramparts, to indicate their once great extent and strength, and the army it must have required to efficiently man the extended lines and numerous batteries.

In conclusion, it may be remarked, as indicative of the capacity and security of this harbour, as also the fertility of these waters, that the French, when they possessed it, annually sailed out of Louisburg six hundred decked vessels (bankers) for the fishery. E. S.

Another correspondent states:—From careful and repeated calculations, based upon the present traffic and travel on the common highway between St. John's and Halifax, it has been proved that the work will pay eight per cent. per annum on the outlay, enormous as it will necessarily be. But the experience of other countries shows that the effect of a railway is to double and treble the traffic and travel. Besides, we count upon a large proportion of the passengers now going by the Cunard line of steamers. We expect that a line will be established between Galway and Halifax, to cross the Atlantic in six days; and, if so, of course at such reduced rates of passage as will defy competition.

INAUGURATION OF THE STATUE OF THE QUEEN OF SPAIN.

THE 10th inst., the twentieth birthday of Queen Isabella II., was celebrated with great *éclat*, by the inauguration of a bronze statue of her Majesty, which has just been set up in the Plaza del Oriente, at Madrid, eastward of the Roya Palace.

At the grand parade, which took place at half-past ten, all the members of the garrison, in full dress, thronged the Prado.

At three in the afternoon, the general kissing hands took place—the authorities, ministers, old functionaries, grandees of Spain, general officers, chiefs of the garrison of Madrid, and other no abilities, as usual, participating in this ceremony. There were some young and some old gallants, who hurried along enshrined in silks, gold, silver, crosses, &c. The ladies rivalled in pomp and beauty those of the Court of Spain.

At night, the military bands of Madrid gave a serenade to her Majesty; and there was a general illumination.

The statue is the work of Senor Piquer. The pedestal upon which it stands is about seven feet in height, and rests directly upon a plinth, six feet square, and one foot and a half in height; which, in its turn, is placed upon a socle, ten feet square, and about a foot in height. The pedestal itself is from two and a half to three feet square. The statue is from seven to eight feet high, and looks towards the street del Arenal; the back being turned to the *façade* of the theatre del Oriente. The statue is stated to have been cast in three pieces. On the front panel is the following inscription, in bronze letters:—

A S. M. la Reina
DOÑA ISABEL II.,
Anno de MDCCCL.

On the opposite side we have:—

Costeada por el Senor Comisario
General de Cruzada, siendo Jefe Político
Don José de Saraguza.

The pedestal is poor and mean, and does not accord with the grandeur of the statue.

We congratulate Senor Piquer on this fine specimen of his noble art. We could wish, nevertheless, that some other costume had been chosen for her Majesty, in which she would not have to support part of the vestment with her left arm. This is an office which, on all occasions, is performed by her attendants.

LOUISBURG HARBOUR, CAPE BRETON.

FUNERAL OF THE QUEEN OF THE BELGIANS.

THE PROCESSION.

The ceremony of the interment of the lamented Queen of the Belgians took place on Thursday, the 17th inst., in the little church at Laeken, whither her remains had been conveyed in compliance with her dying wish.

The civic guard and the army divided the honorary duty of the day about the church. A double row of civic guards were ranged from the door of the edifice to the *catafalque* whereon the body lay in state during Tuesday and Wednesday. Four officers were stationed at the corners of the bier with drawn swords, wearing the usual sign of mourning in the army—crape round the left arm. Near them were twenty-four non-commissioned officers of all corps, all old soldiers, decorated with medals, ready to convey the coffin to the vault prepared for it under the altar of the Virgin. The Ministers of State, the Ladies of the Court, and those attached to the Queen Marie Amélie, the Ladies of the Ministers, the Princess de Ligne, and the Countess d'Hautpoul, were seated in the places reserved for them. Behind them were the Presidents of the Legislative Chambers, the diplomatic corps, the judges of the legal tribunals, the medical attendants of the late Queen, and a host of other personages, whose official positions gave them the right of being present. In the cross aisles were a great number of ladies in deep mourning. The affliction here, as well as in other portions of the building, was very apparent. Tears were observed in every face. In compliance with the request of the King, the public were admitted into a part of the church; they occupied the side aisles as far as the transept.

At three-quarters past eleven, the firing of cannon announced the departure of the King from the Palace of Laeken. A short time after, a movement was observed among those assembled, and the august family entered the building.

The Cardinal-Archbishop of Malines, the senior *curé* of St. Gudule, the *curés* of Caudenberg and Laeken, headed the *cortège*. They were met by the *curés* at the door of the church. The Cardinal addressed a few words to his Majesty when he reached this spot, but the King could only reply by his sobs. His Majesty came first, giving his arm to the Queen Marie Amélie, whom he supported with difficulty; the King, as he passed the catafalque, faltered and appeared about to fall, but the Queen Marie Amélie held him by the arm in her turn, and consoled him by whispering words of consolation to him. This scene greatly increased the profound grief of the persons who beheld it. Their Royal Highnesses the Duc de Brabant, the Comte de Flandres, and the Princess Clementine were next to the King. Behind them were the Duc de Nemours, the Prince de Joinville, the Duc d'Aumale, the Prince Auguste of Saxe Cobourg, the Duc Decazes, Generals Etmigny, Berthois, de Yon (formerly Minister of War under Louis Philippe), De la Rue, de Montesquieu, and d'Houdetot; the Dukes of Marmier and Montmorency, &c.

The requiem was sung by fifty choristers, under the direction of M. Gevaerts. Four priests chanted prayers around the coffin. The ceremony lasted till mid-day; during the whole of the time sobs were occasionally heard from all parts of the church. After the requiem, the non-commissioned officers advanced, conducted by a staff officer, to place the coffin on the trestels. The King, the Princes, and the members of the Orleans family left the church immediately after this portion of the ceremony was concluded.

The coffin was then conveyed towards the vault, built under the altar of the chapel. At its entrance were ranged a party of soldiers of the Carabineer Regiment, with arms reversed; further on were rows of choristers, and all around hundreds of tapers shed their light upon the mournful scene.

When the coffin was placed on the appointed spot, the Archbishop, followed by all the clergy, approached, blessed the remains, and sprinkled the coffin anew with holy water. Shortly after the clergy quitted the church, and workmen proceeded to encase the remains in the last coating of lead. Before the sepulchre was closed, an officer placed a crown of *immortelles* on the bier.

It was two o'clock before the last cannon announced that the ceremony was completed. The aperture of the vault will now be closed up, and all things arranged as they were before.

On Friday morning her Majesty the Queen Marie Amélie and the Princess Clementine attended mass in the church.

THE INTERMENT IN THE CHURCH AT LAEKEN.

EXPENDITURE OF THE COMMISSIONERS OF WOODS AND FORESTS.—It appears by the general abstract of the accounts of the Commissioners of her Majesty's Woods and Forests for the year ended the 31st of March, 1850, that the total receipts were £1,592,976, and the payments £1,215,547, leaving a balance of £377,029. The following were the principal sums paid by the Commissioners in compliance with votes of Parliament:—Public buildings and Royal palaces, £47,575; Buckingham Palace improvements, £21,066; new palm-house at Kew, £699; temporary Houses of Parliament, £3777; new Houses of Parliament, £92,252. Holyhead harbour, £2[illegible]; harbour of refuge at [illegible], £1249; British Museum buildings, £26,159; geological survey, £14,774; Nelson monument, £1914; Ambassador's house at Paris, £2917; Ambassador's house at Constantinople, £[illegible]; metropolitan improvements (3rd and 4th Vic., c. 9 and 10), £411,000; [illegible] and embankment, £[illegible]; Park, £30,881; Metropolitan improvements, £[illegible]; Windsor town improvements, £20,447; New Forest, £9580. The total cash balances due to the Commissioners by the several banks in the United Kingdom on the 30th of March last was £171,306 11s. 3d.

CALENDAR FOR THE WEEK.

SUNDAY, October 27.—17th Sunday after Trinity.
MONDAY, 28.—St. Simon and St. Jude.
TUESDAY, 29.—Hare Hunting begins
WEDNESDAY, 30.—Tower of London burnt, 1841.
THURSDAY, 31.—All Hallows Eve.
FRIDAY, November 1.—All Saints.
SATURDAY, 2.—All Souls.

HER MAJESTY'S THEATRE.—THE GRAND NATIONAL CONCERTS.

MONDAY, OCTOBER 28TH.

PART I

Symphonie in D	.. ..	Mozart.
Aria Bacchanalian, Mr. Jules Stockhausen ("Il Postiglione")	.. .. ..	Balfe
Concerto in E (First Movement)—Miss Goddard (her third appearance in public)	.. .. ..	Hummel.
Cavatina—Mdlle. Angri, "Or la sole' onda" ("Gli Puritani")	.. .. ..	Mercadante.
New Valse—"Tong"	.. .. ..	Labitsky.
Aria—Mr. Sims Reeves, "Un impero" ("Le Prophète")—his second appearance	.. .. ..	Meyerbeer
Fantasia—Violoncello, Signor Piatti, on airs from "Linda di Chamouni"	.. .. ..	Piatti.
Overture ("Maritana")	.. ..	V. Wallace.

PART II.

Septuor—For Violin, Violoncello, double-bass, Clarionet, Horn, and Bassoon, performed by MM. Sainton, Dando, Piatti, Lazarus, Frank, Seiglich, and Baumann	.. .. ..	Beethoven.
Cavatina—Mdlle. Angri, "Ch'i Pietoso" ("Zelmira")	.. .. ..	Rossini.
Fantasie—on airs from "Don Pasquale"	.. .. ..	Miss Thomas Harper.
Guitare	.. .. ..	Thalberg
Ballad—Mr. Sims Reeves, "In this Old Chair"	.. .. ..	Balfe.
New Polka—"Tarantella, first time of performance	.. .. ..	Le Jeune.
Solo—"Concerto," (His first appearance)	.. .. ..	Blagrove.
Galop—"Les Papillons," composed expressly for these concerts	.. .. ..	Carter.

Pianoforte, Mr. Benedict.

Doors open at Half-past 8 o'clock, commence at Eight o'Clock.

PRINCESS' THEATRE. On MONDAY, OCT. 28, will be

performed HAMLET. Hamlet, Mr. C. Kean; Ophelia, Mrs. C. Kean. After which the new Farce called SENT TO THE TOWER, in which Mr. Keeley, Mr. Compton and Mr. Harley will appear. Every night with the GREAT ATTRACTION. TUESDAY, TWELFTH NIGHT, &c.—WEDNESDAY, THE WIFE, &c. THURSDAY, the STRANGER, &c. FRIDAY, a favourite Play. SENT TO THE TOWER. SATURDAY, a New and Original Play, in Five Acts, called THE TEMPLAR, will be produced

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and

Manager, Mr. W. BATTY.—MAZEPPA; or, the Wild Horse of Tartary, with all its original startling effects, &c.; together with Batty's highly popular scenes of the circus; assisted by the extensive troupe of far-famed equestrian gymnasts, will (for the whole month) be performed with the said new laughable farce. For particulars, see bills of the day.—Box Office open from Eleven till Four. Stage Manager, Mr. F. Thompson.

M. JULLIEN'S ANNUAL SERIES of CONCERTS.—

FOR ONE MONTH ONLY.

M. JULLIAN has the honour to announce that his ANNUAL SERIES of CONCERTS will COMMENCE at the THEATRE ROYAL, DRURY LANE, on FRIDAY, NOVEMBER 8th.

M. JULLIEN'S ANNUAL BALL MASQUE will this year be given at the common, price 1 of at the termination of the Concerts, and will take place on THURSDAY, NOVEMBER 7th.

Full particulars will be duly announced.

M. JULLIEN'S BAL MASQUE. —M. Jullien has the honour

to announce that his GRAND ANNUAL BAL MASQUE will take place at the THEATRE ROYAL, DRURY LANE, on THURSDAY, NOVEMBER 7th, for which a most splendid decoration of the Interior has been specially prepared. The CONCERTS will COMMENCE on FRIDAY, NOVEMBER 8.

ROYAL POLYTECHNIC INSTITUTION.—LECTURE on

the BALLAD MUSIC of ENGLAND, by Mr. George Barker. LECTURE on the HISTORY of PAINTING, by Mr. Pepper. LECTURE on CHEMISTRY, by Dr. Bachhoffner. Mr. Pepper's Ghost Opens daily from 12 till 5 and 7 till 10. Admission, 1s. Schools and Children half-price. Open daily for a Promenade from 11 till 5; Evening, 7 till 10.

GREAT EXHIBITION in 1851.—Her Majesty's Commissioners

have decided that demands for space in the Exhibition must be received by the Local Committees by the 31st of October next. The Westminster Local Committee, therefore, urge upon the inhabitants of their district to send in their applications by Monday, the 28th of October, otherwise they may not be able to obtain the space required. Printed forms may be obtained of the Secretary, Mr. G. H. DREW, No. 28, Parliament-street.—Sept. 11, 1850.

LOVE'S ENTERTAINMENTS. — VENTRILOQUISM

Extraordinary.—These original Entertainments will be given on MONDAY, November 4, at St. Mary's Hall Coventry; on Wednesday, November 6, at the Town Hall, Leamington; on Thursday, November 7, at the Town Hall, Warwick; on Friday, November 8, at the New Assembly Rooms, Cheltenham; on Saturday, November 9, at the Assembly Rooms, Stroud, on Tuesday, November 12, at the Assembly Rooms, Gloucester; on Wednesday, November 13, at the Assembly Rooms, Monmouth; on Thursday, November 14, at the Assembly Rooms, Newcastle; on Friday, November 15, at the Assembly Rooms, Chichester, on Monday, November 18, at the New Public Rooms, Reading; on Tuesday, November 19, at St. John's Room, Whitchester; on Wednesday, November 27, at the New Rooms, Oxford; on Thursday, November 28, at the Assembly Rooms, Banbury; on Friday, November 29, at the Star Rooms, Oxford; on Monday, December 2, at the Assembly Rooms, Boston; on Tuesday, December 3 and Wednesday, December 4, at the Athenæum, Sheffield; on Thursday, December 5, at the Assembly Rooms, Spalding; on Friday, December 6, at the Assembly Rooms, Huntingdon.—Begin at 8.—Stalls, 6s.; Reserved Seats, 3s.; Tickets, 2s.—Second 6d.

INDIA OVERLAND MAIL.—DIORAMA GALLERY of

ILLUSTRATION, 14, REGENT-STREET.—A Gigantic MOVING PICTORIAL ILLUSTRATION of the ROUTE of the OVERLAND MAIL to INDIA, from Southampton to Madras and Calcutta, is now OPEN DAILY. Morning, Twelve; Afternoon, Three; Evening, Eight. —Admission, 1s.; Reserved Seats, 2s. 6d.; Reserved Seats, 3s. Doors open half-an-hour before each representation.—Descriptive Catalogues may be had at the Gallery.

SUPERB EXHIBITIONS of ART, ADJOINING the

ADELAIDE GALLERY.—The wonderful Performing Elephant and Automaton Bellringer, the size of life; Lady Organist, Serpents and Palm Trees, Gorgeous Temple of Fern Palms, Splendid Pearl Nautch, Jewelled Theatre, Matchless Glass-ground in Cage of Rare Gold, &c.; 5000 feet of Needle-Work Pictures, Consecrated Views.—Admission, One Shilling; Children Half-price. Open all the Morning from 11 till 5; Evening, 7 till 10.

THE HIPPOPOTAMUS, presented to the Zoological Society

by the Viceroy of Egypt, is exhibited daily, at the GARDENS in the REGENT'S PARK, from Eleven to Four o'Clock. Visitors desirous of seeing the animal in the water, are recommended to go early. Admission, ONE SHILLING; on Mondays, SIXPENCE.

ROYAL SEA-BATHING INFIRMARY.—THE FIFTY-

FIFTH ANNIVERSARY DINNER will take place at the LONDON COFFEE-HOUSE, LUDGATE-HILL, on THURSDAY, OCTOBER 31st, 1850.

THE RIGHT HON. THE LORD MAYOR IN THE CHAIR
Supported by
R. W. CARDEN, Esq., Ald. | Sheriffs of London and Middlesex.
G. E. HODGKINSON, Esq.

STEWARDS.

Right Hon. Earl Stanhope.	Sir Henry Foulis, Bart.	
Lord Dudley Stuart, M.P.	Sir M. Scarlett, Bart., V.P.	
Rev. Dr. Ashurst	Ford Hale, Esq	Edward Poynder, Esq
Edward Cowper, Esq.	The Lord Mayor	John Thomas Rowsell, Esq
Edward Couldwell, Esq	Thomas Leechman, Esq	Rev. De Sage
William Coulson, Esq	Hon. and Rev. Henry Legge	Thomas Thornton Esq
Jesse Curling, Esq	William Nottidge, Esq	Richard Tress, Esq
Rev. William Curling	G. W. K. Potter, Esq	Thomas Watkins, Esq
	William Woodward, Esq	

DINNER ON TABLE AT SIX O'CLOCK PRECISELY

Tickets, Six each, may be had at the Infirmary, at the Bar of the Tavern, and of 35 Camden-street.—17th Oct., 1850. JOHN PAUL, Secretary.

SOLICITORS' AND GENERAL LIFE ASSURANCE

SOCIETY, 57, Chancery-lane, London.

Directors.

Church, John Thomas, Esq	Morris, John Michael, Esq	Symons, Jellinger Cookson, Esq
Deane, Edward, Esq	Norris, John Nookes, Esq	Terry, John Sinnale, Esq
Fonnereau, John S.M, Esq	Ray,	Withall, William, Esq
Jones, William, Esq	Murray, William, Esq	Wordsworth, Charles, Esq
Maymard, James Alleyne, Esq		

This society presents the following advantages to the assured

1st The security of a large subscribed capital

2nd Exemption of the assured from all liability

3rd. Exemption of the assured on the true law of mortality, expressly for this office, and affording particular advantages to young lives.

4th. Participation of annual accumulating sums of premiums. In the former the assured are entitled to EIGHTY PER CENT., or FOUR-FIFTHS of the profits periodically (without deduction for interest on capital or guarantee fund), either by way of addition to the sum assured, or by reduction of premium, at the option of the assured

5th Policies are assignable except in case of fraud

6th This society gives a much larger share of profits to the assured, and at a lower rate of premium, than the great majority of other life offices.

7th Parties wishing to secure their lives without participating in the profits can do so on a lower scale of premium than that of a large proportion of other offices.

Assurances may be effected through any respectable member, or by application to the

CHARLES JOHN GILL, Secretary.

N.B. Assured lives assured at adequate premiums.

WHITTINGTON CLUB and METROPOLITAN

ATHENÆUM, Arundel-street, and 189, Strand.
President—CHARLES LUSHINGTON, Esq., M.P.

Reading, newspaper, and chess rooms, dining, coffee, and smoking rooms, together with an extensive circulating library, are open from eight until twelve o'clock. No gratuities to waiters.

Members have also the opportunity of attending foreign language and other classes, societies, concerts, and promenades.

All the English, French, and German newspapers, reviews, periodicals, and magazines, are regularly taken

So fully have the advantages offered by the Club been appreciated, that it may now be fairly said to have obtained the confidence of the public; and, thus sustained in their exertions, the management anticipate being able very shortly to make the internal arrangements and accommodation of the premises as worthy of an institution which is in the van of the features of the metropolis, while, at the same time, the literary, scientific, and educational departments will be rendered as complete as possible.

LECTURES.—SESSION 1850-51.

The following is the Course of Lectures on Thursday evenings, commencing at eight o'clock:
Robert Hunt, Esq., Author of "Poetry of Science," &c. Three on "The Practical Application of Abstract Science."
A. B. Stevens, Esq. One on "The Wars of the Scotch Covenanters." (Honorary)
R. D. Grainger, Esq., F.R.S. Two on "The Laws of Sensation, the Functions of the Brain, and the Actions of the External Senses." (Honorary)
Charles R. Weld, Esq., Assistant to the Royal Society. One on the "Arctic Expeditions," with Illustrations.
George Dawson, Esq., M.A. Three on "The Mythology of Nations."
George Grosmith, Esq. One on "The Writings of Charles Dickens."
Gideon Algernon Mantell, Esq., LL.D., F.R.S. Two on "Coral and Coral Islands," and on "Petrifactions and their Teachings."
George Scharf, jun., Esq. One on "Nineveh, or Ancient Classic Art."
H. J. Lincoln, Esq. Two on "The Genius and Works of Weber and Rossini," illustrated by several eminent vocalists.
Charles Gordon Clarke, Esq. Three on "Ancient Ballads," on "Chaucer," and on the "Burlesque Writers of England."
F. N. Aiken, Esq. One on "Mnemonics—a System for Strengthening the Memory."
Richard Carte, Esq. Three on "Instrumental Music—Classical and Unclassical," illustrated by several eminent artistes from the Italian Opera and Philharmonic Society.
Dr. Canter One on "Sleep and Dreaming."
Thomas L. Donaldson, Esq., Professor of Architecture at the London University College Two on "The Sacred and Civil Edifices of Ancient and Mediæval Times."
Mrs. Clara L. Balfour. Two on "The English Female Poets of the Present Century."
E. A. Creasy, Esq., Professor of History at London University College. Three on "Unsuccessful Great Men
Thomas Rymer Jones, Esq., Professor of Comparative Anatomy at King's College. Two on "The Curiosities of Natural History"

Admission to Lectures, Members' free; non-members, 1s.

A Gazette is published weekly of proceedings of the Club and literary contributions, having a large circulation. Advertisements should be sent to the publishers, Miall and Cockshaw, Horse-shoe-court, Ludgate-hill.

Subscriptions.—Gentlemen's annual subscription, £2 2s.; thrice half-yearly, £1 1s.; ladies annual, £1 1s.; entrances free for a limited time.

Full prospectuses of the Institution may be obtained in the Secretary's office. Office hours from 10 till 10.

WILLIAM STRUDWICKE, Secretary. Club-house, Arundel-street, and 189, Strand.

TO CORRESPONDENTS.

MINIMA—It is by the Roman system of notation that D denotes 500

R Z Basingstoke—Apply respecting opal about glass to Messrs Follatt and Co., Falcon glass-works, Hatton-garden, Blackfriars-road.

G O. Bradford—We cannot do better than refer you to an excellent paper on Mr. Layard's researches, in No. 71 of the *North British Review*. Mr. Bevan purchased the whole village of Khorsabad for a certain number of piastres. The sum voted last year by the British Museum to Mr. Layard was £3000

J P E is thanked. We have referred his letter to the Artist who drew the Illustration

J S, Manchester—The number was, of course, equal

R S S, South Devon—We have correctly stated the Post-office rule

BESSIE, Dublin—A Correspondent, "H." informs us that Mr Cotton conveyed his bees in safety to Auckland, New Zealand, where it is said they have also been prolific and profitable

L B, Stockton-on-Tees—Francis's "Dictionary of the Arts and Sciences" is compiled with care

EDEN should again appeal to the Commissioners: there is evidently a mistake in the year's charge

CALEB—Apply for the work on Water-colour Painting at 86, Fleet-street

ORIENTAL will find a portrait and memoir of Mdlle Alboni in Vol. 14, page 325, of our Journal; and Signor Garibaldi in Vol. 16, page 121

J W M, Glasgow—See Pilkington or Bryan's "Dictionary of Painters"

F C, Blackrock—Apply for the Key to the Print of the Waterloo Heroes, to Mr Alderman Moon, Threadneedle-street

RUSTICUS, Warwick—Our series of Illustrations from the Hague Gallery will close with a Picture by Rubens

G S—Apply to the Editor of the *Mechanics' Magazine*, Fleet-street

A CONSTANT SUBSCRIBER, Manchester—Above

ALPHA—Our Engravings of the Great Building in Hyde-park will illustrate its progress of construction

J F, Caerberwell—The song "Home, sweet Home," was first sung by Miss Mary Tree, in Bishop's opera of "Clari," at Covent-garden Theatre

W L S—The penalty for selling fireworks is, we believe, £5

P G L, Tarbin Ess—It is spelt Kyrle

LIBERTAS, M M M, and A CONSTANT SUBSCRIBER, Stamford-hill—The lines commencing "Now at the stately column he ascends," and quoted, by Mr Gladstone in his speech on the death of Sir Robert Peel are from "Marmion"

W S M—Seldon could not trace the precise origin of the office of poet-laureat. The first record we have of poet-laureat is in the 26th year of Henry III., 1251. (See Warton's "History of English Poetry")

A B C Knapp—The "Autophon," by which any person may play the organ by turning a handle, and app ying a pedal, may be seen at the inventor's warehouse, Mr Dawson, in the Strand

ANNETTE—I. PPC on visiting cards stand for "Pour prendre congé," and mean "To take leave." II. Guernsey is a Deanery in the diocese of Winchester

OLOLIENSIS—A great number of names under the authority of the Heralds' College. It is allowable at any time to revert to the correct bearing

A CONSTANT READER, Pimlico—Non-in-gue
BOUNET—"Hats Off"—is ineligible
W P, Cincinnati—Received
PERCY—Apply to the composer's publishers
HORY O'MORE—A splinter

H T—Received
W M. Holywell—Declined
HETA A thanked
D K—Sent to the Admiralty
D O, York—Received

BOOKS, &c., RECEIVED DURING THE WEEK.

Essay on Pronunciation. —Sacred Incidents. —Antoine d'Abadie s Journey to Kaffa.
Chubb on Locks and Keys —The Khan s Tale. —Poetry for the Practice of Elocution.—
Handbook of Anatomy for Artists.
MUSIC.—The Agnes Waltz.

GRAND BANQUET AT YORK.—Next week we shall illustrate this interesting festival in honour of the Great Exhibition of 1851.

PROGRESS OF THE GREAT EXHIBITION BUILDING IN HYDE-PARK. —Owing to the elaborate details of this Series of Engravings, we are compelled to defer their commencement until our next Number.

The Tale of FRED HOLDERSWORTH will be resumed next week.

THE GREAT EXHIBITION OF 1851.—The ILLUSTRATED LONDON NEWS will give, by permission of the Exhibitor, an Engraving of every Article exhibited; and, in order to ensure greater accuracy, intending Exhibitors are requested to communicate, as soon as they can conveniently, to our Office, 198, Strand. Mr. J. L. Williams has been appointed to superintend this important series of Engravings for the ILLUSTRATED LONDON NEWS; and, where requested, competent Artists will be at once despatched to any part of the country, to make the requisite Sketches. The publication of these Engravings will, however, be reserved until the opening of the Exhibition.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, OCTOBER 26, 1850.

LIVERPOOL has hitherto been the principal port for the intercourse of the Old World with the New. By far the greater portion of the immense quantities of cotton consumed by the hungry mills of Lancashire has passed through the hands of its merchants, to their great enrichment, and to the increase and prosperity of the town. By far the greater portion, in like manner, of the enormous emigration of the last four years, and of the steady emigration of the years anterior to the potato famine, has started from Liverpool. Its favourable position, and the enterprise of its merchants, have made it a port which has not only rivalled, but exceeded London itself in the amount of tonnage entering and departing from it. Its splendid docks have increased in number from year to year; and although they have scarcely kept pace with the rapid extension of its commerce, they form as a whole the most magnificent series of harbours in the world. The interests of the trade of this great port are not merely local, but national; and it therefore becomes an important question to ascertain whether the persons who really govern the trade of the Mersey are persons who fulfil the trust reposed in them, in the manner required not simply by the interests and character of Liverpool itself, but of the whole nation.

The Liverpool Dock Trustees are a peculiar body. Eight of them are merchants engaged in the commerce between Great Britain and America, and thirteen are elected from their own body by the Town Council, which is itself periodically elected by the suffrages of the shopkeepers and the inhabitants generally. Two questions of vital importance had lately been brought under the consideration of the Dock Trustees, and have acquired much additional publicity in the letters of the *Morning Chronicle* in its celebrated series entitled "Labour and the Poor." We wish still further to direct attention to both of them, as they have acquired within the last few days greatly increased importance. The first question was mooted originally by the American captains and merchants, and by the British captains engaged in the coasting trade. These gentlemen, in the interests of commerce, no less than in those of the seamen employed by them, demanded permission of the Liverpool Dock trustees to kindle fires and use lights on board of their ships while in the docks. They alleged that in London and in every other port in the world, ships were allowed this privilege; but that in Liverpool, where it was denied without any sufficient reason, the seamen were driven by necessity, out of their cold, damp, unwholesome, and dark ships, to public-houses and far more disreputable places on shore, to procure the essential comforts of warmth and light, to the injury of their health, of their pockets, of their character, of their efficiency, and of their whole moral, physical, and spiritual condition. The army of facts which they placed before the Dock Committee proved their case completely, and showed that this absurd and peculiar regulation was mischievous in a hundred other ways. It was made evident that great numbers of lads were ruined by it; that seamen trading to London generally lived longer and bore better characters, than sailors frequenting Liverpool. It was also shown that the vexatious prohibition was continually evaded; thus lights were used clandestinely; and that, in consequence, more vessels were burned in leaving the Mersey than in any other port, or any other three ports, in the world. It was at the same time argued that the prohibition was a tax upon commerce—inasmuch as it compelled the owners and captains of ships to board their men on shore, at a much higher rate than they could have fed them in their ships if they had been allowed to cook on board, and if, in the dark nights, the sailors might have had even so little as a covered lantern to light them to their berths. The Dock Committee were so struck with the facts and reasoning brought before them, that they presented a report to their constituency, the Town Council, in which they recommended that the privilege should be conceded.

The second of the two questions was the establishment of a great emigrational *dépôt*, or home for emigrants. The London press, and our own Journal among others, devoted considerable attention to it, and showed the shameful robberies perpetrated upon the crowds of emigrants arriving in Liverpool by the fraternity of "man-catchers," including the low lodging-house keepers, publicans, slop-dealers, provision-dealers, and the agents or "runners" whom they employed to "catch" emigrants at so much a head. The necessity for the establishment of an "Emigrants' House" has long been felt at Liverpool. It has excited the notice and the support of its principal merchants, as well as of the benevolent and Christian public in general, and has also been urged upon the attention of, and favourably listened to by, the Government. The Dock Committee, with a true foresight and regard for the future welfare of the port, last week, in their report to the Town Council, recommended that application should be made to Parliament for the necessary powers to establish a *dépôt* upon a scale sufficiently large to prevent the yearly increasing swarms of emigrants, and to wipe off a stain from the charcoaling of the town.

The Town Council considered the two recommendations in the course of last week, and rejected them both by a very large majority. We do not wish to impute unworthy motives to the majority; but, in considering this unhappy result—unhappy alike for the moral reputation and for the tangible interests of the most magnificent port in the world—we cannot lose sight of the fact, that a very large number of the persons who elect the Town Council are directly engaged in impeding and in denying these two reforms. If the sailor be driven out of his ship as soon as it is dark; if he cannot cook his victuals during the day for want of a fire, nor read his bible in it in the evening, nor sleep in it at night for want of a lamp or lantern, it needs no great penetration to see that publicans, gin-shop keepers, proprietors of dancing and singing shops, and of other nameless resorts of degrading vice, are not likely to be sorry for the fact. To these must be added the provision dealers and boarding and lodging-house keepers, who would rather that the sailor should live and sleep ashore while he remains in the port, than that he should live in his ship, and consume the provisions which the American traders may have purchased in New York, and which the coasting traders may have brought from London, Dublin, Glasgow, Bristol, and other places. How many of these, whether of the respectable or of the disreputable class, are voters at the periodical elections of the Town Council, we need not particularly inquire; but it is evident that a strong interest, hostile to that of the foreign and coasting trade, is in existence, and that it may influence the election to the body which virtually regulates the commerce of Liverpool. When it is recollected that great numbers of similar small traders, publicans, low lodging-house keepers, slop-sellers, and others, are directly interested in the plunder of emigrants, the world, good or ill-natured as it may be, will be rather apt to suspect—in the absence of any more worthy reason for the decision of the Town Council—that some means akin to these may have more or less influenced them. The great merchants of the town, the magistracy, the Christian ministers of all denominations, the members of the learned professions, and the whole of the local press from Crewe Hesketh to Lancaster, are on the side of the American traders resolving to use the Birkenhead instead of the Liverpool Docks, whether the authorities of the former are prepared to grant the free use of fires and lights on board; and whether they will establish, or aid in the establishment, of an emigrants' *dépôt*? The reply to both questions has been prompt and satisfactory. The Birkenhead people have stated plainly, that they are prepared to accede to both propositions. Their plans for the establishment of an emigrational *dépôt* have already been considered by the Government, and detailed at some length the public. The Birkenhead Dock will be ready for occupation in the course of a few weeks; and it is therefore likely unless Liverpool practise the wisdom of second thoughts, that a very large portion both of the cotton and timber trade, and of the emigrational overflow from Great Britain and Ireland to the United States, will pass through Birkenhead instead of Liverpool.

In the interests of humanity, it will not signify whether Birkenhead or Liverpool shall be first to lift a hand for the protection of the sailor from demoralization, and of the emigrant from plunder, or whether Liverpool or Birkenhead shall be the more flourishing port. We rejoice, however, in the existence of Birkenhead, and that its decision has brought these questions to an issue which will no longer allow Liverpool to neglect them.

POSTSCRIPT

THE LATE ROBBERY OF JEWELLERY IN THE STRAND.

Yesterday (Friday), Charles Kelly, a respectable-looking young man, about twenty-five years of age, porter in the employ of Messrs. Clapham and Wilkams, the jewellers of the strand, was charged, at the Bow-street Police-office, with being connected with their late robbery of jewellery, &c

Thomas Clapham, of the firm of Messrs. Williams and Clapham, jewellers, 13 and 14, Strand, said, that the prisoner resided on the premises with his wife and family No one else had been living in the house for some time past. The most valuable property, such as that taken, was kept during the night in an iron bound chest, in an inner shop, in which, also, were the keys of the cases in the shop, and the cash-box. The safe itself was so placed in the wall, and covered over with wainscoting, that no one going casually into the room would fancy there was anything behind the wainscoting. The key of the safe were always in the custody of their assistant, Mr. Whiskard. On Monday night witness left the premises about half-past eight, when the boy was shutting up, and Mr. Whiskard was engaged in placing their most valuable property in the safe. The amount taken, as far as they have ascertained, from the inner safe, is between £1500 and £1700. Witness is of opinion that there was no burglary, as nothing whatever could show that an entry had been effected from the street. A false key was made to open the shop-door from within, and a skeleton key was found on the counter.

The prisoner reminded Mr. Clapham that on the night of the robbery he was not at home when the shop was shut up; but he had no questions to put to him.

Charles Whiskard deposed, that he left everything safe on the night of the robbery, the boy being in the shop. All the glass cases were closed. On the following morning, when witness went to the safe, he found everything gone with the exception of a few gold rings. Witness was positive that during the previous evening no one could have secreted himself in the shop without his having discovered it.

Inspector Dodd stated, that on the morning of the 22nd he went to the premises. He saw the prisoner, who was in a very agitated state, and appeared as if he had been up all night. On the counter was a cup of tea, which contained brandy. On looking over the shop, witness found the safe open and the drawers all strewn about the floor, and on examining the door of the shop he found no mark or violence, but found that a key was in the lock, which only opened on the inside; the proper key was in the prisoner's hand. Lying about the shop were found a very powerful jemmy, a dark lanthorn, chisels, &c., which, in witness's opinion, were merely placed there by the thief to make it appear that the house had been entered by burglars. It was his firm belief that no one could have committed this robbery unless he had been well acquainted with every corner of the house, and where the valuables were kept.

The prisoner, in explanation about the brandy and tea, stated that his wife made him take it to quiet down the excitement he was in

Some other evidence being given, which corroborated the foregoing circumstances, and showing that 34 sovereigns were found at his lodgings, the prisoner was remanded till Wednesday next.

ANOTHER DARING BURGLARY IN THE STRAND.—On Thursday

night another daring robbery took place on the premises of Messrs. Ayckbourn and Co., the patent waterproof clothiers and swimming-belt manufacturers, 129, Strand. An entrance was effected into the warehouse during the night, and a great quantity of waterproof coats, capes, &c., carried off. Information of the daring robbery was sent to the police commissioners in Scotland-yard, and active measures are being taken for the detection of the thieves A reward has been offered for the recovery of the property and conviction of the burglars.

MYSTERIOUS ROBBERY OF BANK-NOTES.—Within the last few days, Mrs. Lingham, a married lady, residing with her husband at No. 21, Lactterrace, Penton-place, Walworth, close to the principal entrance to the Surrey Gardens, discovered that she had been plundered of Bank of England notes to the amount of £350, and the robbery and abstraction of the property seems involved in the greatest possible mystery. It appears, from the information conveyed to the police, that in the month of April, 1849, Mr. and Mrs. Lingham found out property in the funds amounting to £600, and each took £400. Mrs. Lingham placed her portion in a cash-box, which she kept locked up in a drawer in her bed-room. From the time it first came into her possession she added to the stock, so that by the time the robbery was committed the whole should have amounted to at least £600. When about to make the last deposit, Mrs. Lingham thought the bulk of notes had diminished, and this circumstance induced her to count it, when, to her great consternation, she found £350 missing. There is another singular circumstance connected with the robbery, and that is, that from a book in which Mrs. Lingham had the amount and number of the notes entered, two leaves were torn out, and by this means all trace of the numbers of notes is destroyed. The officers, however, are doing what they can to find out the perpetrators of the robbery

RETIRING OF THE CHANCELLOR WIGHAM.—The late Vice-Chancellor Sir James Wigram has retired upon an annuity of £3500, being the amount to which a Vice-Chancellor, either resigning after a service of fifteen years, or disabled by permanent infirmity from exercising the judicial functions, is, under the 5th Vict., cap. 5, s. 9, entitled. It was the anxious desire of Sir James to continue his services to the public but the impaired condition of his eyesight prevented the gratification of that honourable wish. He has, unhesitatingly submitted to the late law officers to be one within the provision of the statute as to permanent infirmity

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.—On Thursday afternoon a meeting of the Royal Agricultural Society (the races) was held at the society's house, in Hanover-square, Colonel Challoner in the chair of the Finance Committee, presiding. Several new members were enrolled, and a number of candidates proposed for admission. The Finance Committee reported that the affairs of the society were in a highly prosperous condition, owing to the decis ons recently obtained in the County Courts, affirmative of the right of the society to compel the payment of outstanding subscriptions, the arrears which had last accumulated to between £2000 and £3000, had been reduced to one-half, and it was hoped that, the principle being thus authoritatively established, the residue of long-standing arrears would be paid up without further litigation. The total number of members on the books, including life governors, governors, annual subscribers, and honorary members, was 6346 The receipts of the half-year ending 31st July last amounted to £8210 18s.; and there remained, after all disbursements, an available balance of £1315 13s. 6d., whilst the funded capital exceeded £9000 The Committee of General Purposes reported that, conformably to a resolution passed at the last annual meeting, arrangements had been made for holding the society's next county meeting in Hyde-park for the Middlesex district, which includes all the home counties. It would be held in the month of July, contemporaneously with the great Exhibition of the works of all nations. It was intended, however, to confine the shows of cattle, the commissioners of the Exhibition having undertaken to provide for the agricultural implement department, which, in former years, formed a prominent object of the society's country meetings. The Commissioners of the Woods and Forests have allotted to the society a spacious area of the park, abutting on Kensington Gardens, which will be enclosed, and fitted up with cattle sheds. The reports having been adopted, the proceedings terminated

CHARING-CROSS, WESTMINSTER, AND ROYAL FREE HOSPITALS.—On Thursday, meetings of the Governors of the above Hospitals were held in their respective boards for general business. The statements of their annual operations for the past year showed their claims to be as follows:—In Charing-cross Hospital there had been 1116 in and 17,384 out-patients; making a gross total of 167,786. In the Westminster Hospital there had been received in 1746 in and 14,500 out-patients; making the total since 1719 to amount to upwards of 90,000. In the Royal Free Hospital, in the Gray's-inn-road, there were received 851 in and 2,200 out patients; making a total since 1828 of more than 340,000 persons.

NEW BOROUGH BANK AT THE WEST-END.—Certain influential gentlemen at the West-End, and who have been for some time past engaged in establishing a bank on the Scotch system for their own accommodation, have at length published their prospectus. The shareholders of the London and Suburban Bank (as it is called) will be incorporated by a charter, to be approved by the Board of Trade. We learn that the parties who have established the bank have shown their interest in the plan as matured, by taking amongst themselves a large portion of the shares—a judicious mode of imparting confidence in the proposed banking establishment.

LONDON AND SOUTH WESTERN RAILWAY.—Yesterday (Friday) at a special meeting of the company, it was a most unanimously resolved, on the recommendation of the directors, to complete the Farnham and Alton branch to the latter place, as a single line, at a cost of about £30,000; to enter into arrangements with the Taw Vale Company for the making of that line, involving a further outlay to this company, beyond the £70,000 already expended, of about £30,000, to be paid in rails; and to support arrangements by which all further expenditure will be avoided on the Exeter, Yeovil, and Dorchester and the Exeter and Crediton lines. It was also resolved that the company should become their own insurers against casualties to their stations from fire, instead of, as at present, paying premiums amounting to £1200 per annum to the insurance offices.

FIRE AT PLYMOUTH.—On Wednesday night a most destructive fire broke out in the large soap manufactory at Coxside, in Plymouth, the property of Messrs. Bryant, Burnell, and Co. The building was in great part destroyed, notwithstanding the strenuous efforts that were made to subdue the flames. The extent of the damage is very large, amounting, it is said to about £30 000

FRIGHTFUL ACCIDENT IN THE STRAND.—On Thursday afternoon, the Hackney-cab, No. 328, driver John Hannigan, was conveying a gentleman, when, opposite the Lowther Arcade, the animal became unmanageable, and, dashing on to the foot-pavement, twelve persons were knocked down and more or less injured; the animal then furiously rushed onwards, and opposite the Golden Cross the vehicle came into collision with a lamp-post, and the driver was hurled from his box near the branch Post-office, and the cab came into contact with a Kensington omnibus (708), destroying the front of the omnibus in the concussion. The unfortunate gentleman (who is at present unknown) who occupied the cab was released by the police shockingly mangled, and conveyed to Charing-Cross Hospital. The driver's injuries were comparatively trifling. Another, it is sufferers was Mr. Fairfield, the architect, who was conveyed to his residence with a compound fracture of the right thigh.

SERIOUS ACCIDENT AT THE EXHIBITION BUILDING IN HYDE PARK, Yesterday (Friday) morning, at an early hour, an accident occurred, by which the life of one of the workmen engaged at this building was endangered, and two others severely injured. By some mismanagement, the tackle attached to one of the girders broke, and an iron girder of several tons weight fell with a tremendous crash on a poor fellow underneath, who had the gear in his hand. Two of the workmen were brought down with the girder, and were injured. The sufferers were without delay conveyed to St. George's Hospital. The man upon whom the girders fell is seriously injured, but hopes of his recovery are entertained. The others are out of danger.

LATEST FOREIGN NEWS.

FRANCE

Our accounts of yesterday (Friday) from Paris show that the revenue returns for September amount to 11,519,16) francs, being an increase over the corresponding month of last year of 743,058 francs, and three millions over September, 1848

A solemn religious service was on Thursday performed in the church of St Roch, for the repose of the soul of the late Queen of the Belgians. The place was crowded, and among the mass were foreigners of nearly all nations.

M. Guizot, who, it was thought, was again about to enter political life, has declined to be a candidate for the representation of Cher.

METROPOLITAN NEWS.

CHRISTIAN BLIND RELIEF SOCIETY.—The annual meeting of this society was held on Monday evening, at Hawkstone Hall, Waterloo-road the Rev. John Duncan, D.D., secretary, in the chair; from the list of patronesses—Mrs. Rev. Mr. Brown, of Christchurch, Blackfriars (Episcopalian); the Rev. Thomas Davies, York-road chapel (Independent); the Rev. Mr. Whimper, Mr. Harris, &c. By the report of the committee, it appeared that the society had been two years in operation; that the present number of pensioners was five; that since the last meeting two pensioners had been received—one recommended by the Rev. James Sherman, of Surrey Chapel, the other by Mr. Wells, of Surrey Tabernacle; and that the subscribers generally were satisfied with the proceedings of the society. It is a fundamental rule of the society that the "Christian Union" of all denominations shall be entitled to share in its admission.

ROYAL NAVAL BENEVOLENT INSTITUTION.—On Monday, the quarterly general meeting of the members of this society took place at the Thatched House Tavern, St James's-street, Admiral Sir Charles Malcolm in the chair. The statement of accounts from the 1st July to the 30th September, 1850, showed that the receipts amounted to £1832 13s. 6d., and the disbursements to £495 4s. 10d., leaving a balance of £.337 8s. 6d. A letter was read announcing the death of Admiral Oliver, the vice-president of the institution, and a resolution was passed electing Admiral Sir Charles Ekins in his stead. It was then agreed that a letter of condolence should be forwarded in the name of the society to the family of the late Admiral. The sum of £180 was voted for the death of Captain F. D. Schaw, who had contributed £180 to the funds of the institution. A letter of condolence to the family of that officer was also agreed to. An extract from the will of the late Captain George Wilkinson was read, bequeathing the number of certain property to the institution; but it appeared upon the representation of the executors that the property in question would yield no benefit to the society. A discussion then took place respecting the expediency of making alterations in certain rules of the society. It was ultimately resolved, amongst other things, that the 7th rule, which allowed relief under peculiar circumstances of distress, to the widows and families of naval men who had not been subscribers to the institution, should be expunged.

ST. ANNE'S, WANDSWORTH.—The incumbency of this church, rendered vacant by the appointment of the Rev. R. L. Townsend, M.A., to the rectory of the parish, has been conferred on the Rev. Jeremy Slaiu.

SOCIETY FOR THE RELIEF OF WIDOWS AND ORPHANS OF MEDICAL MEN.—On Wednesday evening the half-yearly meeting of the friends and supporters of this society was held at the Gray's-inn Coffee-house; Sir Charles Clarke, M.D., in the chair. Since the establishment of the society, the total sum distributed amounts to £39,358; the number of widows of deceased members now receiving relief is 37; children, 16. The secretary, Mr. C. H. Walsh, read the minutes of the previous meeting, together with a statement of accounts, from which it appeared that the sum of £701 had been expended in grants for relief for the past half-year. The chairman then said that, in conformity with the wish of the court of directors, a letter of condolence to her Royal Highness the Duchess of Cambridge, on the death of the Duke of Cambridge, the late patron of the society. He also submitted to the meeting the propriety of respectfully requesting her Royal Highness to present him to be patron of the society in the room of his late lamented father. This recommendation was adopted by the meeting, by whom the president and directors were authorised to communicate with his Royal Highness, in such terms as they might deem proper. The secretary, Mr. Sloane Gibson, then read a letter from her acknowledged by a vote of thanks, to which that gentleman briefly responded. The balloting for the election of six gentlemen to fill up the vacancies occasioned by the retirement of six senior directors, in accordance with the rules, and the following gentlemen were declared to be chosen. Physicians, Dr. Alexander, J. Sutherland, and Dr. Capes; surgeons, Mr. Beaman and Mr. Samuel A Lane; general practitioners, Mr. W. Clifton and Mr. Hart. The thanks of the chairman, at the conclusion of the regular business, expressed a wish that it might be made known through the press, that, during the past year, between £1000 and £1500 had been distributed to the widows and orphans of their deceased brethren

PREVENTION OF DESTITUTION AND MENDICANCY.—His Royal Highness the Duke of Cambridge presided on Tuesday at a numerously-attended meeting of the committee of the Leicester-square Society, which has been established to consider the outlines of a plan on an enlarged scale for the prevention of destitution and mendicancy in the metropolis The plan proposed by the committee embraces—a sum sufficient for daily relief to be raised by the public to provide shelter, a system of free registration to obtain employment, and lectures for the promotion of cleanliness. It is proposed to form 100 of these establishments in various parts of the metropolis, to which the necessitous and houseless poor shall at all times have gratuitous access. The institutions are to be under the government of the resident clergy a d two committees, composed of persons of either sex, in the various grades of society. It is proposed to solicit contributions of food for the supply of the kitchens, in order that the appeals to the public for pecuniary aid may be as few as possible. The outlines of this plan were discussed at considerable length, and his Royal Highness expressed the gratification he felt at assisting in the development of an undertaking which had long occupied his anxious consideration

EARLY CLOSING ASSOCIATION.—A public meeting of employers and a number of various trades took place on Tuesday evening, at the Assembly Rooms, Great Marlborough-street, Regent-street; Mr. Joseph Brown in the chair. The object of the meeting, as explained by the chairman, was to promote measures for the establishment of an earlier closing of the shops of business, with a view to the physical, intellectual, and moral improvement of assistants. The association had now completed its eighth year, and he was happy to be enabled to state that the grand object they had in view had in a great measure been successful. The measures in contemplation were to make an appeal to the ministers of the Gospel, that they, by the influence they possessed over their various congregations, might induce them to lend their aid in furthering their views. It was also in contemplation to petition the public to protect those employers who were now closing their shops at an early hour. The meeting was then addressed by several gentlemen, and resolutions in furtherance of the views of the association were unanimously agreed to. A letter was formed; and after a vote of thanks to the chairman, the proceedings terminated

METROPOLITAN BENEFIT SOCIETIES' ASYLUM.—A meeting of the donors and subscribers to this institution was held on Thursday night at Gerard's Hall, Basing Hall, City; Mr. C Comfort in the chair. The objects of this asylum are to provide a home, with coals and candles, medicines, and medical attendance, for those who have been members of friendly societies for ten years, and have subscribed to this asylum for four years. The report stated that the finances were at present depressed, owing to the defalcations of the late secretary. The receipts for the last year amounted to £315, and the expenditure to £239, leaving a balance of £83. The report was adopted, auditors and a committee appointed, and, after a vote of thanks to the chairman, the meeting separated.

SWEARING IN OF THE RECORDER.—On Saturday (last week), the Right Hon. J. A. Stuart Wortley, the newly appointed Recorder of London, attended a Court of Aldermen, and was sworn in as the highest City law officer, with the usual formalities.

NEW GUARANTEE SOCIETY.—An original form of assurance company has been proposed, to be called the Rent Guarantee Society. It contemplates four different kinds of risk: first, the collection, and guaranteeing the payment on a day certain, of the rent of any property, whether occupied or not, and for a fixed period; second, the collection and guaranteeing the payment on a day certain, of rent so long as the property remains occupied; third, the collection of rents without guarantee, but offering the security of the society for the immediate payment of the amounts collected; fourth, the management of mortgaged property, paying over to the mortgagee the interest on the mortgagee money on a day certain, and to the mortgagor his surplus rents The whole of these operations, it will be seen, can be brought within the same kind of calculation as all other guarantee business; and as they simply furnish a means of diminishing the speculative character of a large class of property, they may, if properly carried out, be regarded as constituting a sound and advantageous extension of the assurance principle, which, notwithstanding its many recent applications, has yet to be developed in a multitude of new ways.

FIRE AT THE TRAVELLERS' CLUB-HOUSE, PALL-MALL.—On Thursday morning, about half-past five o'clock, an alarm was given that the extensive and handsome building the Traveller's Club, in Pall-Mall, situate between the Athenæum Club-house and Reform Club house, was on fire. The inmates escaped unharmed, and, there being a plentiful supply of water, the engines were speedily got to bear on the fire, which was then discovered principally to exist in the billiard-room, in the centre of the building, on the second floor; but, before the fire could be extinguished, it had extended to the whole of the upper parts of the edifice, and burnt through the roof, communicating with the roof of the Athenæum, which was consequently damaged. The cause of the fire is unknown at present.

OPENING OF MICHAELMAS TERM.—The Lord Chancellor has appointed the 2nd of November for the reception of the Lord Mayor elect, in order to signify her Majesty's approbation of the choice of the livery of London On behalf of the above excellent institution, which is situate in John-street, Bedford-row, was established in 1702, and now provides board, clothing, and education for 51 girls, the children of poor and necessitous persons, from all parts of the kingdom, the majority of whose parents were formerly in respectable circumstances. The collection at the doors amounted to £31 1s. 1d. In the evening another excellent sermon was preached for the same purpose, at St. Mary Colechurch, by the Rev. T. P. Dale, M.A., which produced a sum nearly equal to the above.

NAVAL CLUB, 1765.—On Monday last, the anniversary of the memorable victor. of Trafalgar, the members of this club dined together at the Thatched House Tavern, St. James's-street, Captain Hood presided, and was supported by Admiral Sir Charles Malcolm, Admiral Sir Charles Pym, Admiral Sir Henry Dillon, Admiral Douglas, &c. The greater part of the gentlemen present took part in the engagement. This club, in existence upwards of eighty-five years, consists of 317 officers, including 61 of flag rank During the period, it has afforded assistance to many thousands of the widows and families, &c. of naval officers

RAILWAY ARCADE AT LONDON BRIDGE A railway arcade, similar to that of the Lowther Arcade, in the Strand, is being constructed by the South-Eastern Railway Company, on the left-hand side of the approach to their terminus at the top of the incline descending upon Fenchurch-street. The design is rather an elegant one, and consists of a succession of shops on either side for the sale of fancy and other articles in requisition by railway travellers, with a large open arcade-room in the centre of the thoroughfare which forms the railway terminus. The building, between 100 and 200 feet in length, has its basement in Tooley-street, from whence it rises upwards of 60 feet, divided into five stories, 15 feet each, the upper elevation forming the arcade on a level with Fenchurch-street, and the lower part in Tooley-street forming a range of ordinary shops. There are rooms above the shops, and the floors throughout the building are fire-proof. The front is to be in the Italian style of architecture, and the ceiling, upon which a large number of men were at work the last two months, is to be completed and opened by Christmas.

FATAL ACCIDENT AT THE SOUTH-WESTERN RAILWAY TERMINUS. At the Waterloo-road station, on Wednesday, a number of men were making ready the five P.M. train for Southampton, when Thomas Martin, one of the porters, made an attempt to cross through a vacancy between a number of carriages. At that instant six or seven men pushed a number of carriages forward with such violence as to force the poor fellow against the buffers both back and front. The unfortunate man uttered a faint shriek and fell across the metals of the line, and the carriages having been detached, Martin was extricated, but quite insensible. He was immediately placed in a cab and removed to St. Thomas's Hospital, where he died soon after his admission

BIRTHS AND DEATHS.—The births registered in the metropolitan districts in the week ending Saturday, October 19, were males, 748; females, 754; total, 1502. Deaths during the same period: males, 439; females, 421: total, 860. This return shows that, though the number of deaths thus registered indicates a slight increase of mortality on the previous week, when it was 836, it is still less than the weekly average to the extent of 135 deaths. the average being derived from the deaths of ten corresponding weeks in 1840-49, and raised in the ratio of increased population. By means of a comparative statement of the 860 deaths, according to the different ages at which they occurred, it may again be shown, as in the preced ng week, that an improved state of health exists among the young, but that the middle-aged part of the population begin to suffer more. While the aged die exactly at the average rate of mortality. it appears that there were:—

	Last Week	Average of Ten Corresponding Weeks (1840-49)
From birth to 15 years ..	347	465
From 15 to 60 years ..	333	394
60 and upwards ..	168	140

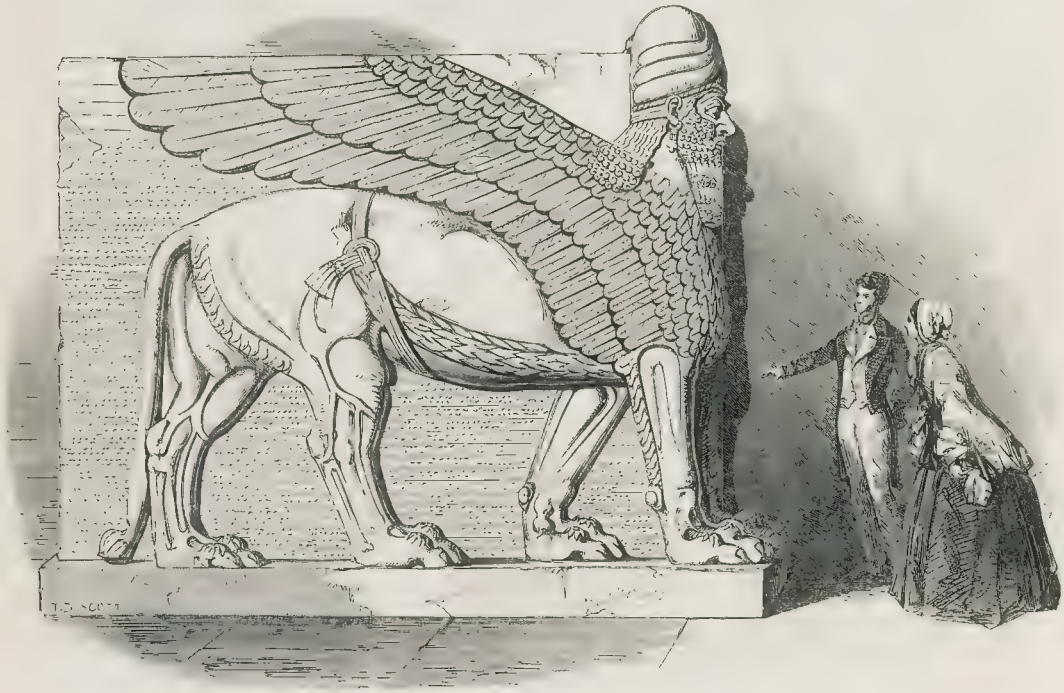
The aggregate result of zymotic or epidemic diseases is still favourable, as compared with that of previous years, the deaths in this class having been 198 last week, while the corrected average is 240. The only class of diseases generally in small-pox and measles, 9 children having died from the former, and 16 from the latter; 36 died of scarlatina, the average of which amounts to 57, but is swelled by the unusual mortality of the same week in 1848, when the deaths from scarlatina were 112. Diarrhœa continues to decline, though the fatal cases are still rather more numerous than usual at this period of the year. Typhus maintains the increased mortality which was observed in the last return: the victims of this disease number 84. Last week, four persons died from natural causes; the following are the cases in detail: In Cripplegate, at 4, Flying Horse-yard, [illegible], a porter, aged 71 years, died of "acute rheumatism (3 weeks), [illegible] and disease of the heart." In St. James's-street, at Salisbury-house, on the 18th of October, the wife of an engineer, aged 55 years, died of "Asiatic cholera (9 days), fever (6 days)." Mr. Martin, the registrar, mentions that "filthy open sewers and cesspools

NIMROUD SCULPTURES JUST RECEIVED AT THE BRITISH MUSEUM.

HUMAN-HEADED AND EAGLE-WINGED BULL.

again, but in the act of standing motionless. The countenance is noble and benevolent in expression; the features are of true Persian type; he wears an egg-shaped cap, with three horns, and a cord round the base of it. The hair at the back of the head has seven ranges of curls; and the beard, as in the portraits of the King, is divided into three ranges of curls, with intervals of wavy hair. In the ears, which are those of a bull, are pendent ear-rings. The whole of the dewlap is covered with tiers of curls, and four rows are continued beneath the ribs along the whole flank; on the back are six rows of curls, and upon the haunch a square bunch, ranged successively, and down the back of the thigh four rows. The hair at the end of the tail is curled like the beard, with intervals of wavy hair. The hair at the knee joints is likewise curled, terminating in the profile views of the limbs in a single curl of the kind (if we may use the term) called *croche cœur*. The elaborately sculptured wings extend over the back of the animal to the very verge of the slab. All the flat surface of the slab is covered with cuneiform inscription; there being twenty-two lines between the fore legs, twenty-one lines in the middle, nineteen lines between the hind legs, and forty-seven lines between the tail and the edge of the slab. The whole of this slab is unbroken, with the exception of the fore feet, which arrived in a former importation, but which are now restored to their proper place.

No. 2 represents the Human-headed and Winged Lion—9 feet long, and the same in height; and in purpose and position the same as the preceding, which however it does not quite equal in execution. In this relievo we have the same head, with the egg-shaped three-horned head-dress, exactly like that of the bull; but the ear is human, and not that of a lion. The beard and hair of the head are even yet more elaborately curled than the last; but the hair on the legs and sides of the animal represents that shaggy appendage of the animal. Round the loins is a succession of numerous cords, which are drawn into four separate knots, at the extremities are fringes, forming as many distinct tassels. At the end of the tail, the claw, on which we commented in a former article, is distinctly visible. The strength of both animals is admirably and characteristically conveyed. Upon the flat surface of this slab, as in the last, is a cuneiform inscription; 20 lines being between the fore legs, 26 in the middle 18 between the hind legs, and 71 at the back. J. B.



HUMAN-HEADED AND WINGED LION.

SCHOOL FETE AT CODRINGTON COLLEGE, BARBADOES.

FETE AT CODRINGTON COLLEGE, BARBADOES.

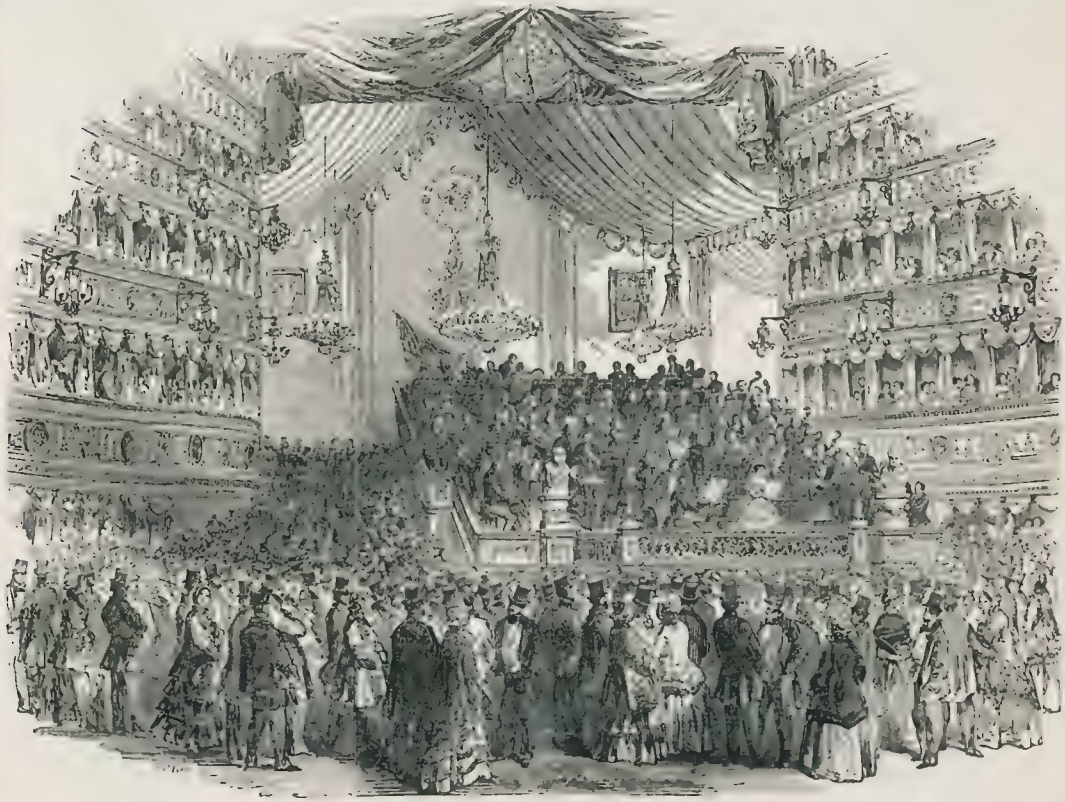
Codrington College, Barbadoes, is the oldest of our Colonial Colleges, and particularly interesting from its position amongst a large Negro population, and the opportunity it enjoys of proving the capacity of the African race for educational improvement. The estates on which it stands were bequeathed for the purpose, in 1710, to the Society for Propagating the Gospel in Foreign Parts, by Colonel Christopher Codrington, a native of the island and Fellow of All Souls, Oxford. It was opened as a grammar-school, September 9th, 1745; and in 1830 was placed, by the exertions of Bishop Coleridge, on the academical footing originally contemplated by the founder. Since that period it has furnished the West Indian dioceses with a large proportion of their clergy.

The school *fête*, of which we present a Sketch, was held this year on the anniversary of the first opening, and had its origin with the Principal of the College, the Rev. R. Rawle, to whom the community had been indebted for his zealous exertion in the cause of Negro education. Upwards of 700 children, attending the day-schools connected with the College and the adjacent chapels of St. Mark and St. Catherine, were assembled on the College lawn; their neat dresses and gay banners making the scene a very picturesque one. Among the company present were his Excellency the Governor, the Lord Bishop, &c. After an address from the Bishop, the children found occupation for the remainder of the day in games and refreshments. Boys' races on stilts and in sacks, and a race of girls balancing bottles on their heads, were amongst the most amusing of the performances. It was evident that the playground, "that roofless schoolroom," had not been an unimportant or unpopular educational department in the neighbourhood of the College.

On the same day, substantial rations of meat and other provisions were given to the labourers and old people of the Codrington estates.

THE GRAND NATIONAL CONCERTS.

It is highly creditable to the direction of the above entertainments at Her Majesty's Theatre, that so much alacrity has been displayed in amending the errors of inexperienced management. It is an excellent sign when such promptitude is manifested to consult the wants and wishes of the really musical public. Many causes of complaint as to convenience and comfort have been removed, and the schemes are gradually developing the vast resources at the command of the executive committee in the most advantageous light. The alteration in the classification of the players, by bringing the violins more forward, has been attended with the best results. The "Eroica" Symphony and "Egmont" overture of Beethoven, the A Minor of Mendelssohn, the "Masaniello" and "Zanetta" overtures of Auber, the "Isles of Fingal" overture of Mendelssohn, and the "William Tell" overture of Rossini, have been the great orchestra



NATIONAL CONCERT AT HER MAJESTY'S THEATRE.

displays up to Tuesday night. Balfe conducts carefully and zealously his new forces, and finish and polish will no doubt be the result of further familiarity with the great symphonic productions, which exact, besides correct reading and precision, a poetic and intellectual colouring, that few conductors are gifted with, and can only acquire by very long experience with the same set of executants. Halle, Molique, Piatti, Sainton, Arban, Prospère, and R. Blagrove have been the chief solo players: the former has performed Beethoven's Pianoforte Concerto in G, and some of Mendelssohn's charming songs without words. In addition to Sainton's own clever fantasia, he has executed the opening movement and the adagio of Spohr's ninth violin concerto, leaving out the rondo. M. Sainton's interpretation of these two movements was rapt: e with brilliancy and finish: his breadth of style and neatness in the passage playing imparted more than ordinary vitality to the performance. Molique's grace and peculiar refinement was exhibited in his own elegant concerto in C minor The vocal selections have been principally allotted to Madame Bisaccianti and Miss Angel. This has been prudent policy. Mrs. A. Newton, Miss Messent, M. Jules Lefort, M. Jules Stockhausen, Mr. Drayton, and Mr. Gustavus Geary have each of them a certain order of musical ability, but it is not of a nature to be effective at these concerts. Madame Bisaccianti has many defects of style, but there is a "determination to do" in her sudden outbursts, that has ensured her the favour of her audiences, and she is encored in the two "Sonnambula" cavatinas of Amina with success. Mdlle. Angri, with a "Una voce" and "Non più mesta," take the promenaders by storm her vocal volubility is surprising, and her energy irresistible in its influence The entrance of the celebrated Labitzky, the dance composer, into the orchestra for the first time, on Tuesday night, was much cheered. His music is European in popularity; without being so elevated in form and remarkable in variety as the dance inspirations of Strauss and Lanner, the ideas of Labitzky are exhilirating and fest-stirring. He conducts with the tranquility of Musard, although he has Labitzky's peculiar jump like Julien, and does not whirl his baton in spasmodic gyrations, his beat is so steady and inte ligent, that crispness and precision are ensured. His "Autumn Flowers" (Herbst Blumen), "Berliner Vahs," and "Diaphorinen Galop," made a great commotion in the house; and, from the solemn stillness of the symphonic listeners, there was a swaying to and fro of heads and bodies, sufficiently indicative of the composer's power of treating "the laws of motion."

THE ITALIAN OPERA-HOUSE IN PARIS.—Mr. Lumley, of Her Majesty's Theatre, the new Director of the Salle Ventadour, in Paris, has just addressed a letter to a Parisian paper, in which we find the following notification of his intentions for the forthcoming Italian Opera season:—"I have the honour to communicate with Balfe's "Sonnambula," either on the 2nd or 5th of November:—"My only desire is to put in force all my activity, and that ability which you have been pleased to ascribe to me, to render the Italian Opera of Paris all the splendour and influence of its best days. Be sure, that *artistes* worthy to figure on that stage, where so many illustrious names have been applauded, will compose the company of the winter. Verdi, I know, a rival, Madame Sontag, of whom you are one of the most fervent admirers, and whose triumphs, both in the concert-room and on the stage, have daily so much *éclat;* and M. Labiache, whose name alone suffices: but please to wait until I have produced all the talents which are to occupy a place by the side of those eminent *artistes*. Yes, I admit with you that the Italian Opera requires to be resuscitated, and if, as you state, ability and zeal go for nothing against certain impossibilities, I will at least seek to attain the existence of a phœnix. I pay homage, as well as you, to the unquestionable merit of Ronconi as a singer and as an actor, and I congratulate myself to have engaged him in Italy, for he had sung at Her Majesty's Theatre in London, and was applauded in Paris. I would be likewise happy to again present him on the Parisian stage. If I may judge by the alacrity with which the former *habitués* of the theatre seek to retain boxes for the next season, I have no doubt that you will witness the return of that previous luxury of *toilettes*, carriages, and liveries—of that signal mark, in one word, of the artistic and worldly supremacy of France over all other European nations. That my aim. If I do not desire myself, the union of the two Italian lyric stages of Paris and of London will effect something useful for art and good for the refined tastes of that intelligent public, whose noble and generous hospitality it is my heartfelt duty to acknowledge." Mdlle. Bertrand is engaged as contralto, and Signor Calzolari as tenor. Scribe and Halévy's "Tempesta," with alterations in the last act, will be mounted On Wednesday night, Miss Goddard, a pupil of Mrs. Anderson and M. Thalberg, made her first appearance with decided success. This young and gifted *pianiste* performed two of her last master's pieces, namely the "Etoile" fantasia and the "Tarantella," both abounding in the greatest intricacies. The mechanism of Miss Goddard proved herself equal to the difficulties: her touch, although femininely delicate, is rich and sonorous; and there is a poetic feeling in her playing, evidencing the existence of innate genius, and that it is not the result of merely severe study and practice. She exhibited no novelties, save Briccialdi, on the flute, and Mr. Cooper, on the violin. Beethoven's Symphony in F was also included in the scheme.

In Thursday night's programme were Weber's "Oberon" overture and Beethoven's first symphony in C, besides Mendelssohn's pianoforte concerto in G minor, played by Halle; and Wolff and Batta's duo concertante on "Lucrezia Borgia" themes for violoncello and pianoforte, executed by Piatti and Halle; and a trombone solo, played by Winterbotham. A pretty waltz, "La douce Pensée," composed by Captain H. Lee Carter, the hon. secretary of the committee, has been a successful production.

Mr. Sims Reeves will make his first appearance to-night (Saturday), and Mr. Macfarren's new serenata, "The Sleeper Awakened," the poem by Mr. John Oxenford, will be produced in the course of next week. The arrival of the Berlin Chapel Royal chorus, of 90 male voices, is expected early next month.

MUSIC.

CHORAL HARMONISTS.

The above city amateur society held their first meeting of the nineteenth season, on Monday night, at the London Tavern. The concerts of the Choral Harmonists have been generally characterised by the classic taste of the selections, the execution being confided chiefly to amateurs, with a judicious sprinkling of professional aid. With Mr. Westrop as conductor, and Mr. Dando as *chef d'attaque*, in the orchestra, a careful and zealous interpretation of the programmes is ensured. The scheme of Monday night's concert exhibited no novelties, contained some attractive pieces. Haydn's third Mass opened the first part: the solo parts in this fine work were allotted to Miss Birch, Miss Dolby, Mr. Land (in the absence of Mr. Lockey from indisposition), and Mr. Lawler. After the Mass, Miss Dolby gave her exquisite reading of Mendelssohn's air "Oh, rest in the Lord." Spohr's eighth psalm, "Jehovah, Lord God of Hosts," followed; and the sc. ended with Hummel's offertorium, "Virgo Virginum," which Miss Birch distinguished herself. Woelke's "rigut merrie" madrigal, "To shorten Winter's Sadness," (1603), opened the second part. This was succeeded by Mr. Horton's nice solo, and then Miss Dolby sang the *Page's* opening air from the "Huguenots," "Nobil Signor," in a style that would have delighted the illustrious composer of that stupendous lyric production. Mr. Lawler's version of Rossini's "Largo al Factotum" so enlivened the company, that it was encored. The concert terminated with the overture and glealings from Mozart's "Il Fauto Magico," which opera is a standing favourite with the Choral Harmonists, and no imputation on their tastes. Miss Birch, Miss Dolby, Messrs. Land and Lawler, in the solo duets, and concerted pieces, with tact and taste. The second concert will be given on Monday, the 18th of November.

MUSICAL EVENTS.—A series of monthly concerts of ancient and modern music, extending from the ensuing month to June, 1851, have been announced at St Martin's Hall, under Mr. John Hullah's direction, to take place every third Wednesday in each month, the first being November 20. Besides oratorios, motets, masses, anthems, and psalms, by Handel, Haydn, Beethoven, Bach, Mozart, Carissimi, and Mendelssohn, selections from operatic and other secular works of Purcell, Weber, Mozart, Handel, and Mendelssohn will be performed. There is also an announcement of new productions in the sacred school, by Sterndale Bennett, Macfarren, Rev. Sir Frederick Gore Ouseley, Bart., and M. E. Charles Gounod (who is to produce a new opera, "Sappho," for Vierdot, at the Italian Opera). A number of new and old concertos and a chorus of 400 voices of Mr. Hullah's singing classes, are promised for the due execution of the prospectus, which, from its variety and novelty, must move the Sacred Harmonic Society to increased exertion.——Mdme. Stoepel, the wife of the second concert at Beethoven Rooms last night, after which she was serenaded by the Philharmonic Society, at her residence ——Mdme. Viardot will return to the Grand Opera in Paris, in the character of *Valentine*, in the opera of "Huguenots"—a part she has not performed in French, and in which she has achieved such a triumph in the Italian and German languages. —Mr. Henry Smart has been to Paris, and played on the organs of St. Denis and of Parliament Church de Grenelle (Faubourg St. Germain).——The fifth concert of the Paris Philharmonic Society took place last Tuesday, at the Salle Sainte Cécile, conducted by Berlioz; Mdlle Lefebvre, Mdme Frezzolini (who is on her way to Madrid), and M Barroilhet were the vocalists.——Signor Mariani, who created such a sensation last season at the Covent Garden Royal Italian Opera, as the substitute of Mario, in *Elisaar*, on the first night of Halévy's "Juive," has been engaged as first tenor for the Grand Opera in Paris, and will make his *début* in the same part with Viardot as *Rachel*.——Ernst has commenced a series of concerts at Nantes. ——The Dublin papers record the enthusiastic excitement at the Theatre Royal last Monday night, as the appearance of Miss C. H. Pyne, "the Queen of Irish Song," as she is called, as *Amina*, in the "Somnambula." Wreaths and bouquets, and recalls and encores, were the order of the night, the pit "rising *en masse*" to demand the repetition of the rondo finale Sig. Bordas was the *Elvino*, and Signor Rossi the *Count Rodolfo*. On Tuesday night, she appeared as *Lucia*, Mdme. Macfarren being the *Pierrotto*; Sig. Poltoni, *Il Marchese*; Menzis, *Antonio*; Bordas, *Carlo*; and Salaberi, *Il Prefetto*. Yesterday (Friday), Miss C. H. Pyne gave a concert in the Antient Concert Rooms, the proceeds to be devoted to various charitable institutions in Dublin

THE GRAND EUROPEAN ORGANS.—There was no intention to do any injustice to the magnificent York organ, in our notice of the new Boston organ, in our last week's impression, as a correspondent from Manchester erroneously supposes. To afford a notion of the size of the new instrument, we quoted what we must still term the "Leviathan instrument," at Birmingham. We are aware that there are more pipes in the York organ (4200) than in the Birmingham (4032), but in the former there are only 53 stops, and in the latter no less than 78. The Weingarten organ, in Swabia, has 6565 pipes, with four rows of keys. The Haarlem organ is 108 feet in height, and 50 in breadth, with 60 stops and 5000 pipes. The Freybourg organ, in Switzerland, has 68 stops, and four rows of keys. The Rotterdam, St. Denis, Hamburgh, and Dresden organs, are also very large. The beauty of an organ, however, does not depend on the precise number of its stops and pipes, for in these respects York and Birmingham are beaten by continental organs, but in the weight, calibre, tone, power, and brilliancy of the whole, and herein each large organ, whether at home or abroad, has its speciality. It is, therefore, very difficult to establish a supremacy for any particular instrument, when we consider the extraordinarily rapid strides within the last quarter of a century, and the peculiar attributes of Schmidt, the Silbermanns, Snetzler, Harris, Byfield, England, &c., have been vastly improved upon by Hill, Gray and Davison, Robson, Bishop, Lincoln, &c.: and the result must be ascribed partly, also, to the increase of fine organ performers, such as Adams, Wesley, Dr. Gauntlett, Henry Smart, G. Cooper, H Lincoln, &c.

CAMBERWELL INSTITUTE.—The committee of this society, on Wednesday evening, the 23rd inst., gave a vocal and instrumental concert, being the second during the year. A pleasing selection of songs, duets, glees, and overtures was made by the conductor, Mr. G. H. Lake; and Miss Messent, of the Royal Italian Opera, Miss Leslie Buckland, with Mr. H. Buckland, and other gentlemen, exerted themselves successfully in gratifying a crowded audience The instrumental accompaniments were executed with considerable skill and spirit, reflecting great credit upon the gentlemen amateurs who lent their aid upon this occasion.

THE THEATRES.

HAYMARKET.

Mr. Henry Bedford, nephew of Mr. Paul Bedford, made his first appearance as *Billy Lackaday* in "Sweethearts and Wives" on Monday, and was quite successful. His acting was good, though as yet, somewhat under restraint Miss Reynolds performed, with her usual delicacy and refinement of taste, the interesting *rôle of Eugenia*; while Miss F. Horton in *Laura* was charming. The overture, and the songs, and the dances were well attended.

On Tuesday night, a new comic drama, translated from the French, and having the same basis as the piece entitled "The Pride of the Market," produced at the Lyceum, on the opening night of the Mitchell management, was performed here, with an effective cast. Mr. Charles Selby, the adapter of the present piece, sustained the part of the foppish Viscount (*de Belle Poitrine*), who brings upon him the vengeance of the market-women by his unpermanent interference in the love intrigues of the Duke (*de Fronsac*), very well impersonated by Mr. Howe It is the chief praise must be awarded to Miss Reynolds, who, as the *Duchess de Fronsac*, acted with exquisite propriety—in some parts, we thought, quite equal to Miss Fanell. The burlesque of the piece, in England, in which she appears as Miss Fanell. The burlesque of the piece, in England, in which she appears as Miss Fanell. The burlesque of the piece, in England, in which she appears as

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Government has just appointed a gentleman of colour to the office of British Consul at Liberia. This is, we believe, the first instance on record in which a man of colour has received a similar appointment from our Government. On the introduction of the new Britain Consul, on Friday week, at the Foreign Office, his personal appearance excited no inconsiderable interest. He is a man of superior intelligence and of highly polished manners.

The Salford (Peel) Park monument subscriptions, including those of the working men, amount, we now learn, to about £1200. The working men's contributions are not yet entirely handed in—it is hoped that by next week they will be.

A steam company is on the eve of being formed at Constantinople for towing vessels through the Bosphorus and the Dardanelles. The capital is to be £75,000, in 1500 shares of £100 each. The Sultan and most of the ministers are already on the list. It is strange that this necessary work should be so long delayed in being formed.

Mr. Turner's act for "diminishing delay and expense in Chancery" will come into operation on the first day of the approaching term.

The Right Rev. the Lord Bishop of Ripon administered the sacred rite of confirmation to about 700 young and adult persons, at the parish church, Leeds, on Thursday week.

The public generally and the lovers of the fine arts will be pleased to hear that the National and Vernon galleries were opened on Monday.

Richard Bethell, Esq., has retired from the office of chairman of the East Riding (Yorkshire) Sessions, and has been succeeded by G. W. Strickland, Esq., of Boynton.

Some weeks ago, a considerable reduction was made in the fares for short stages on the Tynemouth branch of the York, Newcastle, and Berwick Railway, and the change has worked well both for the public and the company. The number of passengers has very largely increased, and the receipts are now greater than they were under the old system.

A German, named Thomas, has been arrested in Luxembourg, on the charge of having swindled several English, out of £20 each, on the pretence of requiring those sums as securities for their acceptance of the posts of professors of English in the "university" of that duchy, an establishment which does not exist. He had described himself in London as the envoy of the duchy, and had induced his victims to proceed thither.

A cyronometer was last week picked up on the beach, about four miles to the eastward of Whitby, by one Wade, who, also the wreck of a large long-boat; the chronometer has been identified as belong to the *Jemmah*, which sailed from Liverpool for Africa, 1st October.

The H.B.tannic Majesty's ship *Frolic* (the crew of which has lately suffered so severely from cholera) was despatched from Malta on the 11th of October, in quest of a Greek pirate, said to have attacked and plundered, in the vicinity of Tripoli, in Barbary, an Austrian vessel, which had been found afterwards without a crew on board.

The American papers announce a recent explosion on board the steam-boat *Kate Fleming*, near Paducah, on the Ohio. Thirty persons were killed and wounded; about twelve are dead or missing.

The lake of Constance was frozen over on Friday week, by the Liverpool steamers, plowed as briskly as ever. The number on two vessels was, at least, six hundred. Several of the poor people slept all night stretched on their cases on the quay.

The parish church of St. John the Baptist, Bristol, which has recently undergone extensive and judicious improvement, is to be re-opened for divine service in about a fortnight.

The ship *Heber*, Captain Derent, arrived from Marseilles, has brought a chronometer, a sextant, and a telescope, out of the ship *Aregyra*, Captain P. Rees, wrecked off Buena Vista, on her voyage to Suez from the port of London.

On Wednesday, September 25th, according to a New York paper, while getting under weigh off Chagres, John or William Martin, a native of London, England, whither his wife went about six weeks since, fell overboard and was drowned from on board the *Cornelos*.

The Mauritius papers, by the Overland Mail, reach to the 23rd of August. The question of steam communication had at length become public, and a committee appointed to consider the question had not concurred in the offer made to establish a line of the Cape.

On Tuesday morning, at eight o'clock, a number of the smiths employed on the building for the Exhibition in Hyde-park struck for an advance of wages from 4s. to 5s. per day. Fresh hands were taken on, and there was an attempt made to intimidate them, but the police soon restored order.

The revenue officers have raised an objection to the custom of postmasters sending vehicles for hire on the arrival of trains at railway termini and stations.

The trade in copper between Port Adelaide (South Australia) and our East India possessions is beginning to show some activity; 246 tons of fine copper have been recently shipped by one vessel from Adelaide to Singapore.

It is the intention of the Postmaster-General to establish a day mail between London, Sherborne, and Yeovil, in the west of England. The arrangements will commence as soon as the necessary preparations are completed.

A singular blight of disease is said to have shown itself among the young larches and other trees in plantations on the Scottish borders, and to have been so destructive in some of the Duke of Buccleuch's woods as to threaten their complete annihilation.

A few days ago a chicken was hatched on the farm of Mr. Meynell, Northallerton, Yorkshire, with two heads, three eyes, and one wing. The bird has been stuffed, and is now in the possession of Mr. Coates, solicitor, Northallerton.

The ship *St. George*, arrived from Greenland, has brought, besides a large quantity of blubber, seal-skins, and whale-fins, the large number of 1700 seal fins, the produce of that district alone.

The *Pelican*, steam tug, lately wrecked off Jersey, has been raised and placed on a secure part of the Minquiers, convenient for her removal at some future high tide.

On Monday, the anniversary of the battle of Trafalgar, the new Royal Greenwich Hospital were opened by Admiral Sir James Gordon, G.C.B., Lieutenant-Governor, and Lieutenant Rivers. These gates, with the lodges and celestial and terrestrial globe-capped pillars, have been removed, in the absence of the improvement in their immediate neighbourhood, to their present position.

During the night of the 14th inst., some thieves forcibly entered the granary at the Tharp's Arms, in Chippenham (Cambridgeshire), and carried off nearly two coombs of malt; also a large quantity of apples.

On Saturday morning, about four o'clock, a fire was discovered in the homestead of Mr. Pettit, of Kirtling, Cambridgeshire, by which a barn, the produce of 100 acres of land, a straw-stack, dressing-machine, light cart, plough, and other implements were destroyed. From footsteps traced across the fields, and also the marks of sacks put down, as if for the purpose of resting, it would appear that the villains had first stolen some corn, and then set fire to the barn

An English paper has been started at Shanghai, under the title of the *North China Herald*. It is said by our contemporaries in China to bid fair to be very useful journal, and that neither pains nor expense have been spared in getting it up. Its addition to the English press in China is the more valuable now that a direct trade is springing up between North China and California.

The Chancellor of the Exchequer has received from "W. X. Y. Z." Bank of England notes for £35, in payment of "a moiety of the mistakes in assessed taxes and property tax." He has also received £10 from "C. L." "for arrears under schedule D." He has paid over these sums to the Receiver-General of Inland Revenue.

The vessel *Dublin*, arrived in the Thames from Dublin, Belfast, and Waterford, has brought the large quantity of 614 bales and 30 butts of bacon, and also 2559 firkins of butter; and the vessel *Rose*, arrived on the same day from Cork, has brought 671 bales of bacon, and 2345 firkins of butter, as part of her cargo, the produce of Ireland.

The last intelligence from Santa Fé (Mexico) confirms the previous accounts concerning the ravages of the Indians, and the inefficiency of troops for the protection of the settlers. The latter suffering severely from druggist, and partial famine for the coming winter was feared on account of the damage sustained by the crops.

Last week, while the crew of a Ramsgate fishing vessel were trawling off Spurn (Hull), it blowing strong at the time, and the sea running very high, Thomas Bartlett, apprentice, aged 14, was sitting on a spar cleaning fish for breakfast next morning, when the vessel was struck by a heavy sea, which washed overboard both him and the funnel of the stove. Nothing more was seen of him and they have their next six o clock, when his body and the funnel were found in it.

A model of the late Sir Robert Peel, by J. E. Carew, has been placed in the Hall of Commerce, Threadneedle-street, for exhibition, previous to its being sent to Tamworth.

A German, named Thomas, has been arrested in Luxembourg, on the charge of having swindled several English, out of £20 each, on the pretence of requiring those sums as securities for their acceptance of the posts of professors of English in the "university" of that duchy, an establishment which does not exist. He had described himself in London as the envoy of the duchy, and had induced his victims to proceed thither.

A cyronometer was last week picked up on the beach, about four miles to the eastward of Whitby, by one Wade, who, also the wreck of a large long-boat; the chronometer has been identified as belong to the *Jemmah*, which sailed from Liverpool for Africa, 1st October.

The H.B.tannic Majesty's ship *Frolic* (the crew of which has lately suffered so severely from cholera) was despatched from Malta on the 11th of October, in quest of a Greek pirate, said to have attacked and plundered, in the vicinity of Tripoli, in Barbary, an Austrian vessel, which had been found afterwards without a crew on board.

The American papers announce a recent explosion on board the steam-boat *Kate Fleming*, near Paducah, on the Ohio. Thirty persons were killed and wounded; about twelve are dead or missing.

The lake of Constance was frozen over on Friday week, by the Liverpool steamers, plowed as briskly as ever. The number on two vessels was, at least, six hundred. Several of the poor people slept all night stretched on their cases on the quay.

The parish church of St. John the Baptist, Bristol, which has recently undergone extensive and judicious improvement, is to be re-opened for divine service in about a fortnight.

The ship *Heber*, Captain Derent, arrived from Marseilles, has brought a chronometer, a sextant, and a telescope, out of the ship *Aregyra*, Captain P. Rees, wrecked off Buena Vista, on her voyage to Suez from the port of London.

On Wednesday, September 25th, according to a New York paper, while getting under weigh off Chagres, John or William Martin, a native of London, England, whither his wife went about six weeks since, fell overboard and was drowned from on board the *Cornelos*.

The Mauritius papers, by the Overland Mail, reach to the 23rd of August. The question of steam communication had at length become public, and a committee appointed to consider the question had not concurred in the offer made to establish a line of the Cape.

On Tuesday morning, at eight o'clock, a number of the smiths employed on the building for the Exhibition in Hyde-park struck for an advance of wages from 4s. to 5s. per day. Fresh hands were taken on, and there was an attempt made to intimidate them, but the police soon restored order.

The revenue officers have raised an objection to the custom of postmasters sending vehicles for hire on the arrival of trains at railway termini and stations.

The trade in copper between Port Adelaide (South Australia) and our East India possessions is beginning to show some activity; 246 tons of fine copper have been recently shipped by one vessel from Adelaide to Singapore.

It is the intention of the Postmaster-General to establish a day mail between London, Sherborne, and Yeovil, in the west of England. The arrangements will commence as soon as the necessary preparations are completed.

A singular blight of disease is said to have shown itself among the young larches and other trees in plantations on the Scottish borders, and to have been so destructive in some of the Duke of Buccleuch's woods as to threaten their complete annihilation.

A few days ago a chicken was hatched on the farm of Mr. Meynell, Northallerton, Yorkshire, with two heads, three eyes, and one wing. The bird has been stuffed, and is now in the possession of Mr. Coates, solicitor, Northallerton.

CHESS.

TO CORRESPONDENTS.

SIMPLE SIMON.—It admits of a second solution obvious and commonplace, by 1st playing Q R to K R 3rd.

BRAMSTON.—Just as the date of our paper wherein it appeared

CHESSLING.—Will our amiable communicant oblige us with an address? We are too much pressed for space to print the few corrections which occur to us here.

A SUBSCRIBER.—We wish find the solutions in the Number for September 1, 1849

DR. LOWE.—Castling is land a move, a compound one, too; you cannot, therefore, make another move at the same time

J. MOD-DOC.—We are very sorry to part with our Chess Correspondents, that it would be unfair to give the two only Solutions asked for at this moment

D. C.—The postage of *La Régence*, payable in advance, is only one penny

TYRO INDEPENDENT.—The Chess Player's Handbook, published by Bohn, of Covent-garden

D. Finshley-road.—Your smart little "Evans" shall have a place shortly. In any future communication of the kind, you will save us trouble by adopting the notation of the ILLUSTRATED LONDON NEWS

Q. L. BOSTON.—The Chess Problems of our Journal are not obtainable in a collected form

WM. R. S. T. DELEVON.—We believe you are right. In that variation mate cannot be given in seven moves.

AN OLD PLAYER.—Show us half a dozen out of the last hundred that can be taken in more ways than one!

J. A. W.—"Faithful" problems are loose universe one party compels the other to give him checkmate. 2 Mr Waller's Analysis of the Evans Gambit appeared in Volumes IX and X of *Bell's Life*

Ladybird.—1. Your report of the pl) between Mr Andersen, the celebrated player at Breslau, and his townsman, Mr Hor at, differs somewhat from the account we had of it in another quarter, but still bears out our statement on the subject. In the forthcoming tourney, those gentlemen, if unhandicapped, will have an opportunity of resuming hostilities, and showing beyond dispute which is the better player. 2 In reply to your second query, we answer emphatically, it is not true. The "Problem Club" is a mystery, its constitution being completely absorbed by graver matters at the period) was *four* games, and *fifth* and much, receiving the same odds. In correspondence with this man refer to Captain Kennedy, Captain Evans, and Messrs G Medley and O Kenny; but we must decline paying attention to any future communications, unless accompanied by a complete personal and unmportunat a matter, unless accompanied by the name and address of the writer.

BELLAMY.—Many thanks for your second solution

R D M.—Your young friend, in my set contest, would not have much chance against either of the German players named. Three or four years' hard practice, taking the Pawn and two moves with a first-rate player, is what he wants to give depth and finish to his play.

F. A. D.—Problem No 350 cannot be solved in three moves, as you can easily find on examination, if carefully

LUX.—To what book of diagrams do you refer? We have received none. Pray favour us with an address. correct No 344, as you suggest can then be made with readiness and facility

M. L.—The best living "blindfold" player is undoubtedly M Kieseritzky, who has repeatedly conducted *three games together* without sight of the board. You will have the particulars of numerous of his performances in the pages of this Journal. The only match in which he was formerly a competitor at Blindfold Chess with the late M Deschapelles engaged to play a series of games without the board against some amateurs of the "Whittington Club."

HH. Wood.—Success to you on the subject of the proposed great Chess Meeting shall be forwarded as you request

WHO. The law says, "If a player attack the adverse King without saying 'Check,' his adversary is not obliged to attend to it; but if the former, in playing his next move, says 'Check,' such player must retract his last move, and he that is under check must defend."

* * UNATA, JEVES, BIL, HATELIEF, ST EDMUND, and others, next week

SOLUTIONS OF PROBLEM NO 350, by W C, is right. All the rest are wrong.

SOLUTIONS OF No 351, by A M, of Gravesend, CAPE TOWN, JUDY, are correct. All others wrong.

SOLUTIONS OF No 352, by R B, PHILO CHESS, JUDY, M P, BELLABY, R D M, DEREVON, CARLO F, are correct. All others are wrong

SOLUTION OF PROBLEM No. 351.

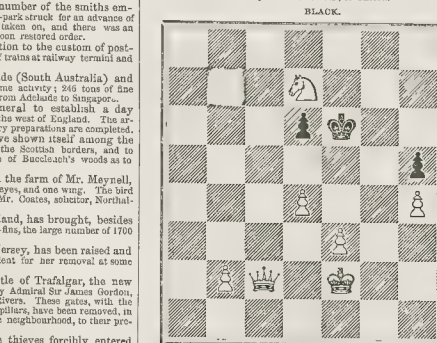
WHITE.	BLACK.	WHITE.	BLACK
1. Q to K 7th	Kt takes Kt at Q 6th, or (*a*)	2. Q to K 5th (ch)	Kto B 5th, or K takes Q
		3. Q or B mates.	

WHITE	BLACK.	WHITE	BLACK.
(*a*) 1 2. Q to K 2d (ch)	B takes B, or (*b*) K to Q 4th	3. Q to her 5th—Mate	
(*b*) 1 2. Kt to K 6th (ch)	Kt to K 7th K moves	B mates	

PROBLEM No. 353.

By R. B. WORMALD, of Oxford.

BLACK.



WHITE.

White to play, and mate in four moves.

CHESS IN THE METROPOLIS.

Instructive little contest, in which Mr. STAUNTON gives the Queen's Knight to Mr. ROWLAND, formerly a distinguished player of the Bristol Chess-Club

(*Remove White's Queen's Kt from the board.*)

(*Scotch Gambit.*)

WHITE (Mr. S.)	BLACK (Mr. R.)	WHITE (Mr. S.)	BLACK (Mr. R.)
1. P to K 4th	P to K 4th	16. Q R takes P	Q B to K 3d (*d*)
2. K Kt to B 3d	Q Kt to B 3d	17. B to Q 5th	K Kt to K 4th
3. P to Q 4th	P takes P	18. B takes Q Kt (ch)	Kt takes B
4. K B to Q B 4th	K B to Q B 4th	19. R takes Kt	P takes R
5. Castles	P to Q 3d	20. Q takes P (ch)	Q to her 2d
6. K Kt to his 5th	K Kt to K R 3d	21. Q takes Q R (ch)	Q to Q sq
7. P to K B 4th	P to Q 6th (disc ch)	22. Q to Q B 6th (ch)	B to Q 2d
8. K to R sq	P takes Q B P	23. Q to her B 5th (*e*)	P to Q K 3d (*f*)
9. Q takes Q B P	Q Kt to Q 5th	24. Q to K 5th (ch)	Q to K 2d
10. Q to her B 3d	P to K B 3d (*a*)	(*g*)	
11. Q to K 3d	Q Kt to B 3d	25. Q takes Q B P	B to Q Kt 4th (*h*)
12. B takes B	Q P takes B	26. Q to Q B 8th (ch)	Q to her sq
13. Q R to Q sq	Q P takes P	27. Q to K 6th (ch)	Q to K 2d
14. Q R to Q 5th	P takes Kt (*b*)	28. Q to B 8th (ch)	Q to Q sq
15. P takes P (*c*)	K Kt to his 5th	(*i*)	

And the Game, by mutual consent, was given up as drawn.

(*a*) P to Q Kt 4th looks an inviting move, but it would be bad play, because White might take it, checking with the Queen, if her B Pawn were captured, win a piece and two Pawns in return, by taking the K Kt Pawn.

(*b*) It is needless to say that Black would lose his Queen by taking the Rook

(*c*) To prevent his gaining the open King's Bishop file with his Rook.

(*d*) This move, apparently so insignificant, was the result of the most mature deliberation, and, if we mistake not, will be found the only possible way by which Black can save the game.

(*e*) Black's last move effectually baffles White's plans. If, to prevent the dreaded Bishop getting posted at Q Kt 4th, he play P to Q R 4th, he gets a still worse game, for suppose—

WHITE	BLACK	WHITE	BLACK
25. P to Q R 4th	B takes P	28. Q to Q R 6th (ch)	Q to Q sq (if K to K 2d, he loses the Q)
26. Q to Q 6th (threatening mate)	Q to Q Kt 5th (ch)		
27. Q to Q K 7	B to Q Kt 4th (best)	29 R to Q R sq	And ought to win

(*f*) Here again we see the importance of Black's last move. If the Q B P were not advanced, so as to assist in the Bishop, the proposed move could not be made, on account of White's tormented check at Q Kt 6th

(*g*) It may seem surprising that, as White has two three Pawns for the piece he gave, he contents himself with a drawn game. Upon looking at the position, however, it will be found that Black can move Castle and force a change of Queens, after which both parties will take off all the Pawns. For example, thus:—

WHITE	BLACK.	WHITE	BLACK.
26 Q R to Q B sq (the only move)	Castles	32. P takes Q	R to K B 3d (ch)
27. P to K 5th	R to K sq	33. R takes R	R takes R
28. Q to Q 6th	Q to Q 4th	34. P to Q 6th	B to Q Kt 4th
29. Q to Q 5th (best)	Q takes Q		

And then, bringing up his King, must win the Pawns

(*h*) Threatening to win the Queen by Q to her 3d.

(*i*) Had White taken the Bishop with his Queen, Black would have played Q to her 3d, and must have won.

THE CHESS CONGRESS OF 1851.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR—The Chess Congress which is proposed to take place simultaneously with the Great Exhibition next year, is a fortunate conception, the realisation of which it behoves every true lover of the Royal game to promote to the utmost of his ability, for, veri y, such an opportunity of advancing the cause of Chess has never before occurred, and may possibly never happen again. The first step to be taken in the matter, it seems to me, ought to be the appointment of a committee, the members of which should be persons whose acknowledged acquaintance with the game of Chess, together with their position and character, are such as to guarantee the correct and impartial discharge of the office they will have to perform. The duty of the committee, I presume, would be to settle the regulations in accordance with which the projected *tournament* is to be conducted—to appoint the time and place of action—to exercise a general superintendence over the various bouts during their progress—to distribute the prizes, and, finally, to act as referee and umpire in any doubtful or disputed points that might arise in the course of the proceedings. It would, of course, be understood that no member of the committee should vote or give an official opinion respecting any dubious question in which he himself may have a direct personal interest. The next object must be to provide the sinews of war, in the shape of a fund, from which to bestow prizes on the victorious competitors; and for this necessary purpose no time should be lost in setting subscriptions afoot adoat amongst the various Chess Clubs of the kingdom, who, it is to be hoped, will come forward liberally on the occasion. Individual amateurs, and all who take an interest in the game generally, should also be invited to contribute. An excellent example in this respect has been set by your intelligent correspondent, "A Member of the Calcutta Chess-Club," who has given us so interesting an account of Chess doing on the banks of the Hooghly, in last month's *Chronicle*.

And, talking of Calcutta, I would it were practicable for the redoubtable Mr. Cochrane to take a run home, overland, next May, bringing with him as escort a tail of turbaned and white-appareled eastern Chess celebrities. Nut Ghulam Cassim, who, woe worth the day! now sleeps with his fathers on the Coromandel coast; but Mohreschunder Bonnerjee, Wallis Aly, the Poonah Brahmin, and other dusky warriors, whose beards we shall be right glad to see wagging over an English board.

There can be little doubt, I fancy, that all the finest Chess players of the day, who may possibly find opportunity to attend, will be attracted by this tourney. The first-rates will, gird up their loins, and march with stalwart tread to the lists, to combat a *Pontrance* for the baton of the World's Chess Companion, and to win the winner's meed; while the *dii minorum gentium*, albeit incompetent to contend successfully for the topmost prize of all, will nevertheless, flock in, animated by the honourable ambition of gaining new distinction, and their dusky warriors leaves to laurels they may previously have acquired. This collision and encounter of the acutest and most practised Chess intelligences of which the age can boast, cannot fail to be of unique and absorbing interest, and may be expected to yield a store of games of such excellence, as to entitle them to rank side by side with the admirable models of Chess which the La Bourdonna-s-Macdonnell, and Staunton-St. Amant matches afford us. In good sooth, I can conceive no banquet that could impart a richer or more stimulating flavour to the intellectual palate of the versatile Chess amateur than the spectacle of a struggle in which Staunton, Der Laza, St. Amant, Jaenisch, Petroff, Saen, Kieseritzki, Löwenthal, Buckle, Stone, Harrwitz, Horwitz, Anderssen, Kling, Hanstein, and Newham should take part. He may picture to himself the room crowded with anxious and attentive spectators—the breathless silence broken occasionally by low and eager whispers with which a move, on which the fortune of an important game is supposed to turn, is watched the aspect of the principal combatants themselves, whose knitted and corrugated brows, stern countenances, with sometimes a scarce perceptible nervous twitch of the lips, and a slight swaying to and fro of the body, all plainly indicate the severity and weight of the mental toil with which the wary working brain strives and wrestles, and the almost painful excitement that is manifested as the deciding combat of all "begins to approximate an end." Lastly, calling in the aid of a slight degree of imagination, he may people the background with the shades of departed Chess worthies, looking approval on the scene. The fiery and robustious La Bourdonnais; Macdonnell, with his pale face of calm impassive calculation; the quick and sensitive features which the genius of Zoffany has handed down to us as those of André Danican Philidor; Huy Lopez, the mitred favourite of the Spanish King; and the chivalrous and noble-minded Leonardo, with his adventurous conquest, Paco Boi, the errant Syracusan Chess Paladin.

A word in conclusion. The feasibility and proper carrying out of the scheme in question will mainly depend on the spirit in which it is met by the Chess world of the country. As a *great festivities*, Chess practitioners are, to my thinking, not one whit behind poets; and a good deal of jealousy and difference of opinion as to respective strength of play is, I believe, prevalent between some of our clubs, as well as amongst individual players. It would be highly advisable, I think, that any feeling of this sort, wherever it exists, if it cannot be eradicated, should, at least for the nonce, be kept in abeyance. The object in hand is not to glorify or exalt any particular club or player, but to give a beneficial impulse to the cause of Chess in general. It does not concern us at present whether the Middenkirk Club fairly beat that of John O'Groat in their last match, by unanimous, or whether good Mr. Centre Pawn, you can thwack the eminent Mr. Passed Pawn on even terms, or perchance render him P and two moves. What we desiderate now is, that you and your exemplary opponent, for the sake of the common good, should both pocket up your several discrepancies, and join, like Highlanders, "shoulder to shoulder," in the promotion of an undertaking which cannot fail to be of such effectual service to the interests of the noble game you both love so well. Besides, it is not meet that we should appear to our foreign Chess brethren the unseemly spectacle of anything like disunion or disarray in the camp of our island Caissa. Let us rather, with mini unanimous and magnanimous, first greet them heartily on their arrival, and then do our best to pummel them soundly on the bloodless battle ground, where only

Smiling peace despoulates the plain.

I am, Sir, yours faithfully,

H. A. KENNEDY.

London, October, 1850.

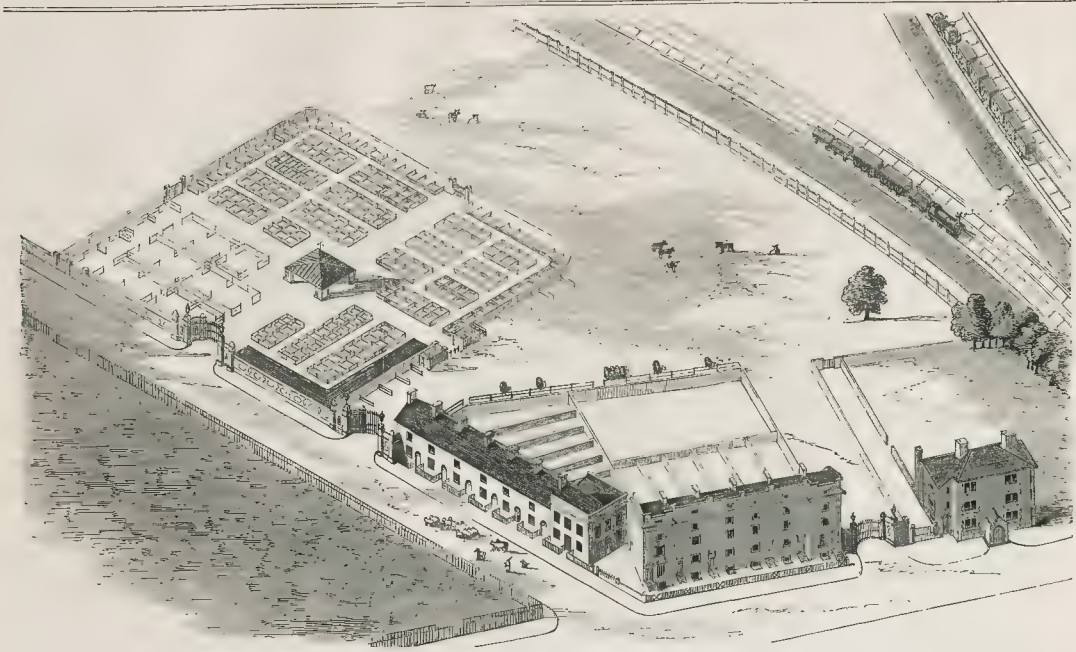
SCHOOLS OF DESIGN.—Copies of all the reports on the state of the head and provincial schools of design which have been made to the Board of Trade since August, 1849, have just been printed by order of the House of Commons. The reports have reference to all the schools of design in the three kingdoms, and bear testimony to the progress which they have made, and to the success which has attended the experiment of their establishment. With the exception of the schools at Norwich, Paisley, and one or two other places, the reports are extremely favourable, and the number of pupils admitted has steadily increased. The expenses incurred in the inspection of the provincial schools since August, 1849, amounted to £435 16s. The yearly grant to the schools in the year 1849 was £4700, and in 1850, £6340. The subscriptions and donations in that year amounted to £2689 11s. 6d., and for the half-year ended on the 30th of June, 1850, to £1790 10s. The liabilities on the 30th of June, 1850, were £6396 9s. 1d. The total receipts on account of the schools for the year ending 31st of March, 1850, were £12,817 3s. 4d., and the expenditure amounted to £12,621 8s. 6d., leaving a balance of £195 17s. 10d.

COURT OF CHANCERY.—The death of the late Sir Launcelot Shadwell, the Vice-Chancellor of England, in August last, and the recent resignation of the Vice-Chancellor Wigram, on account of continued indisposition, have created two vacancies in the judicial bench. It is understood that one Vice-Chancellor only will be appointed to supply the places of the two Judges whose offices have thus become vacant. It is expected that the Master of the Rolls, together with the Vice-Chancellor Knight Bruce, and the Vice-Chancellor who is to be appointed, will be enabled to keep down the business of the Court, even assuming that the Lord Chancellor will be exclusively engaged in hearing appeals.

THE NEW STAMP ACT.—It has been already stated that great activity has prevailed at the Office of Stamps and Taxes, at Somerset House, for the last month, in preparing to meet the demands that were expected from the attention under the new Stamp Act for deeds, leases, transfers, agreements, and other documents reduced under the new scheme of the Chancellor of the Exchequer, which has given so great an impetus to legal business throughout the United Kingdom. The demands for stamps under the new act have been so great from the country districts, that the Commissioners are still obliged to keep the engines in full work from 9 A.M. till 9 P.M. in what is called the "dry department," in stamping the numerous parchments sent in. It will be at least another month before the quantity required to be computed can be transmitted to the parties. The London stamp office has issued upwards of 1,000,000 stamps already delivered to the different solicitors, law-agents, &c. The average number of postage-stamps sent to the Post-office is £12,000 per week, besides those for the country.

A NEW FIRE ALARUM.—A new and ingenious contrivance for giving an alarm in case of fire, has been made known within the last few days. It is the invention of a gentleman named Robinson, of Great Queen-street, Westminster, and consists of a series of gutta-percha strings, which are intended to be so fixed throughout the different compartments of a house or warehouse, that they shall communicate with a bell attached to the outer-door. These strings or guttas-percha are made to intersect each other in various directions, so that the application of fire to any part of them will cause them to break, and thus make the bell ring, by depriving it of the support it receives from being in close contact with the string or strings. The principle is a very simple one, and, if adopted in warehouses and other large establishments, where a person might be employed to visit the apparatus, may prove advantageous

THE AUSTRALIAN TRADE.—The *Asiatic* and the *Thomas Fielden*, the property of Messrs Fielden Brothers and Co., of Liverpool, formed a portion of their splendid line of Australian packets, each 1000 tons register, from Port Phillip and Sydney, and the ship *Petersham*, from Adelaide direct, the property of Messrs. Jones and Young, husband, and will load at the Albert Dock, Liverpool, last week, to discharge. The *Anna* (whose safe arrival at Port Phillip, with 150 passengers, in 96 days, was some time since noticed) will immediately load again for Australia. The *Petrel*, of 1360 tons burthen, belonging to Messrs. Shaw, Bright, and Co.'s line of packet-ships, sailed on Friday (last week), with 14 passengers and a full cargo, for Adelaide and Sydney. She had on board some highly respectable families, who are going to settle there. The *Petrel* will be succeeded by her sister ship the *Condor*, on the 1st of November. This is the first vessel that has ever sailed from London with a full and clear cargo for Australia. The *Petrel* will be succeeded by her sister ship the *Condor*, on the 1st of November. This is the first vessel that has ever sailed from London with a full and cleared cargo for Australia. The *Petrel* will be succeeded by her sister ship the *Condor*, on the 1st of November. This is the first vessel that has ever sailed from London with a full and cleared cargo for Australia.



NEW CATTLE-MARKET, READING.

READING CATTLE-MARKET.

The establishment of a mart for the sale of cattle in the borough of Reading has been for many years the anxious desire of a great number of the inhabitants of the town, and the breeders and dealers in the surrounding neighbourhood. A public Company has been established to carry out this desirable object; and having obtained their act in the last session of Parliament, advertised in August last for plans. The committee unanimously selected the plan designed by Mr. B. Clacy, architect, of Reading.

The site chosen is a large meadow adjoining the Great Western and Berks and Hants Railways, on the northern side of Reading, with an entrance to the Market close to the station-road. The meadow being subject to floods, the whole area of the Market is to be raised with chalk above flood level. The Market is divided into two separate parts, for the fat stock and lean stock. The Fat Stock Market is arranged to accommodate 150 fat beasts, 2000 sheep, 150 calves, and 500 pigs. The area of the Lean Stock Market embraces 2½ acres of pasture land. The whole fitting-up of the Markets is to be of wrought iron. The calf pens will be roofed over with corrugated zinc, supported on iron columns. The entrance-gates are to be 16 feet wide, forming a segment of a circle on the plan, and are to slide on rollers into a void space, in curved walls of entrances. There is a small lodge for toll-takers at each entrance to the Fat and Lean Stock Markets.

The first brick was laid by Mr. Haslam, chairman of the committee, on Friday, the 4th inst., in the presence of the officers and some friends of the undertaking. The men engaged on the preparatory works were liberally regaled by the contractors, and accompanied the ceremony with several hearty cheers. A few of the friends dined together after the ceremony.

The earthwork is being executed by Messrs. Orton and Son. The whole of the contract is taken by Messrs. Barnes and Turner, of Reading, at £1600. The works are proceeding with great rapidity, and are to be completed by the 23rd of November, preparatory to the great Christmas Markets.

ST. MARY'S CHURCH, WEST BROMPTON.

This Church was consecrated on Tuesday, the 22nd instant, by the Right Reverend Charles James, Lord Bishop of London. It is in the form of a cross, and is from the design of George Godwin, Esq., F.R.S., under whose superintendence the whole has been carried out. It is situated in the western part of the Brompton district, in the parish of Kensington; and the expense has been provided for by the joint contributions of the Church Commissioners, public subscription, and by the Rev. H. J. Swale, the Perpetual Curate, a large part of the funds being provided by the minister.

The building is completed with the exception of the tower, which is ultimately to carry an octagon lantern and spire.

The principal dimensions are as follow:—Nave, 86 feet long, 33 feet wide, and 46 feet high to ridge of roof. The tower is 17 feet square inside, carried on four massive arches, with clustered columns and richly carved capitals. The transept measures 81 feet in length by 26 feet wide; the chancel is 28 feet by 20 feet 6 inches in width.

An organ, built by Mr. Bishop, occupies part of the north transept. The walls are of stone; the chancel is paved with Minton's tiles; the other parts of the floor with ordinary tiles, of black, red, and buff colours. The seats are open, and of deal, stained and varnished. The pulpit, font, and sedilia are of stone, well carved and of good design. The coloured decorations are the work of Mr. W. H. Rogers, and give much satisfaction: they consist mainly of illuminated copies of the Lord's Prayer, the Creed, and the Commandments; and a bright diaper under the east window, and at the back of sedilia. Two of the chancel windows are already filled with memorial windows of painted glass; the great east window is shortly to be filled in a similar manner: this will beby Hardman; those already executed are by Powell. The Church contains accommodation for 750 persons; the district, however, has, we believe, nearly 4000 inhabitants.

The ceremonial of consecration was conducted with the usual observances, a large attendance of the clergy of the neighbouring districts assisting on the occasion; and the Church was filled to overflowing.

Operation of the Anti-Fugitive Slave Bill in the United States.—From the American papers which have been received this week, we give the following gleanings on this subject:—At Harrodsburg, Kentucky, two negroes have been shot while attempting an escape, and the following has reached us by the *Western Magnetic Telegraph*, from Bedford, Pennsylvania:—"Ten runaway slaves from Virginia, who lost their way on the ridge of the Alleghanies, eight miles from this place, were discovered yesterday, and attacked by the Pennsylvanians. During the *mêlée* two of the slaves were wounded, one mortally and the other dangerously. These were captured this morning. Six of the party sought shelter in a mountain hut, occupied by a man and his wife. The clothes of the fugitives were very ragged, and nearly torn off their backs from coming in contact with trees, in their endeavour to escape unseen. The woman of the hut supplied the outcasts plentifully with food, while the husband procured assistance, and captured them. He received a reward of two hundred and fifty dollars for their recovery. The remaining two have, up to this time, eluded all attempts to arrest them, and are doubtless concealed somewhere hereabouts. They are closely watched by Pennsylvanians, who are eager to obtain the reward offered for them." "A telegraphic despatch announces that great excitement prevails in Honesdale, Pennsylvania, occasioned by the appearance of two men from the South, who are after a beautiful creole, the wife of a Mr. Evans, and who, they say, is a runaway slave. 'If she is discovered,' adds the correspondent, 'it will hardly be possible for them to take her, the feeling is so strong against them.'" At Pittsburg, anti-slave-law meetings have been held, and escaping slaves have passed through that city in considerable numbers for the British provinces. There are several hundred fugitive slaves residing in Boston, where it is probable those who remain will be protected. At any rate, attempts to seize them would endanger the public peace. Over one hundred fugitive slaves, who lived at Harrisburg, Pennsylvania, have escaped to Canada. The carrying of this new bill into active operation is pregnant with difficulty, danger, and injustice. The fugitives are all armed, and most of them declare that they will sacrifice their lives rather than their liberty.

CARLISLE MAYORALTY INSIGNIA.

The Gas-works of the Carlisle Gas-light and Coke Company have just been transferred to the Corporation of that city; and, to commemorate the transaction, the Company have presented the Mayor, aldermen, and citizens a splendid Gold Chain and badge, to be worn by their chief magistrate during his year of office. The present Mayor, the first to wear these new insignia, is Joseph Rome, Esq.

MAYORALTY CHAIN FOR THE CORPORATION OF CARLISLE.

The Chain consists of 59 links, and is 43 inches in length: attached is a Badge, with the arms of the city of Carlisle enamelled in proper colours. The value of the Chain and Badge is £200. It is from the establishment of Messrs. Hunt and Roskell (late Storr and Mortimer), 156, New Bond-street, London.

Latest from Sir John Ross.—Extraordinary Flight of Carrier Pigeons.—We have learned from a private source, that, on Friday week last, two of the carrier pigeons taken with him when he left the Port of Ayr, and some of which were to be despatched home in the event of his either finding Sir John Franklin or being frozen in, arrived at Ayr, finding their way at once to the dove-cot which they occupied previous to being taken away. The birds, we understand, arrived within a short time of each other, but neither of them, we regret to be informed, conveyed anything in the shape of letter or note of any description. One of them, indeed, which had had some document attached, was found to be considerably mutilated—it having apparently been shot away. The time they were liberated by Sir John Ross is, of course, uncertain, but taking into consideration the well-known powers of flight possessed by the carrier pigeon, it cannot have been very long since they left our gallant countryman. The arrival of authentic news from the Arctic regions will be looked forward to with additional anxiety, from the probability which has now arisen that some tidings may have been heard of Sir John Franklin. Independent, however, of the interest which otherwise attaches to the extraordinary flight of the pigeons, it will be regarded by naturalists as a most remarkable incident. We do not recollect any parallel to it. The distance the creatures must have traversed cannot be far short of 2000 miles, and as they travel by sight and not by scent, the fact is the more extraordinary. Sir John Ross, we believe, took five pigeons with him, which, it may be remembered, were stated, in the last accounts received of him, to have been at that time all alive, so that there are still three to be accounted for.—*North British Mail.*

Copyright of Designs.—A new statute, cap. 104, published last week (16 Law T. 48), extends the law relating to the Copyright of Designs. It enacts that designs may be registered provisionally for one year, and that such registration shall give to the proprietor all the protections afforded by the Registry of Designs Act. The exhibition of such designs is not to defeat the copyright, but articles to which it is applied are not to be sold. The Board of Trade is empowered to grant a further extension for six months. The 6th section directs the registrar to register any sculpture, &c., within the protection of the Sculpture Copyright Acts; and any person copying such registered sculpture, model, &c., is to be liable to a penalty of £50, to be recovered under the provisions of the Registry of Designs Act. The Board of Trade is empowered to extend the copyright in ornamental designs registered under the Designs Acts, 1842, for not more than three years, and it is to make orders from time to time for regulating the registration of designs. The registrar may dispense with drawings in certain cases. Books and documents in the Designs-office are not to be removed without a judge's order. A judge of any of the superior courts may order copies of documents to be furnished for the purpose of being given in evidence. The provisions of the Designs Act, 1842, are extended to this act, when not expressly repealed or repugnant.

ST. MARY'S CHURCH, WEST BROMPTON, CONSECRATED ON TUESDAY.

WHIPPINGHAM CHURCH.

Our Engravings represent the exterior and the interior of this unassuming parish Church, which her Majesty frequents when staying at her marine residence of Osborne.

Whippingham Church is but a short distance from Osborne, a little from the main road between East Cowes and Newport, and in its exterior is devoid of beauty, its architectural features being extremely plain. It is cruciform in plan, having a nave, chancel, and transepts. The mouldings to the windows are extremely simple; and, in lieu of pinnacles with rich crockets and finials at the angles and gables of this building, there are unadorned obelisks of plain stone. So unornamented, in fact, is the architectural character of Whippingham Church, that it would be almost impossible from them to fix the date of the erection of any part. There are some fragments of stone, let into the wall on the north side, bearing very rude sculpture, from their style evidently of very remote antiquity; from which we might almost infer that there had been a structure here at an earlier period than the character of the present Church would indicate. The Church has a square tower, from which rises an octagonal spire, the surface of which is sculptured like fishes' scales. The interior of the Church is as simple as the exterior, there being no enrichment to the arches or windows, or decorations to the roof. There are galleries in the transepts; their fronts of the plainest description, as far as the panelling is concerned, and they are supported on slender shafts. The pulpit is placed at the junction of the chancel and the nave, and is supported by slight columns on one side, and the stairs on the other, thus allowing a free passage under the pulpit into the chancel. The seat occupied by her Majesty is on the south side of the Church, and may be distinguished in our Engraving by the dark curtain drawn around it. There are several mural tablets in the Church, of the usual character of modern cenotaphs. The Rev. Mr. Protheroe is the incumbent of Whippingham.

WHIPPINGHAM CHURCH, ISLE OF WIGHT.

Carisbrooke Church.—A Correspondent writes from Catstow, near Oxford:—"I lately had an opportunity of seeing Carisbrooke Castle, in the Isle of Wight. The chapel is a modern building, compared to some parts of the Castle, and I should suppose it to have been erected about the beginning of the last century. I was sorry to see that it was fast going to decay: a considerable space over the pulpit and reading-desk is exposed to the weather at all times, the slating being off the roof: the sounding-board, too, has fallen on the ground. If the chapel were immediately attended to, I should think about £100 would place it in tolerable repair. I was informed it was Government property, and, probably, this may meet the eye of some gentlemen who have power and influence to see it put into good repair."

CHURCH, UNIVERSITIES, &c.

THE ARCHBISHOP OF CANTERBURY AND THE JUDICIAL COMMITTEE OF PRIVY COUNCIL.

Some days since, an address, signed by upwards of a thousand graduates of the University of Oxford, was transmitted to the Archbishop of Canterbury by the Bishop of Oxford, on the subjects of the Royal Supremacy and the recent judgement of the Privy Council. The Archbishop has addressed a letter to the Bishop of Oxford acknowledging its receipt. His Grace says:—"An address has reached me, through your Lordship's hands, signed by a large body of Oxford graduates, on the subject of the present constitution of the Court of Appeal in matters ecclesiastical. Such an address is entitled to grave and respectful consideration, both from the names appended to it, and from the subject to which it refers. I cannot, however, see grounds for the apprehension expressed by the subscribers, that the doctrines of our Church are exposed to danger, either from the constitution of the Judicial Committee, or from the decision at which they arrived in the case recent y brought before them. It would certainly be desirable that a large proportion of the Judges should be taken from the ecclesiastical members of our Church, if the settlement of doctrine were involved in their decisions. But, happily, this case needs not to be provided for. Our doctrines and our formularies were settled at the Reformation, and the agreement or disagreement of these with any opinions which may become matter of inquiry is a question well suited to the habits of the Judicial Committee as now existing. And having assisted at their recent deliberations, I feel bound to bear witness to the patient investigation which the question received, and the earnest desire of the members of the Committee to pronounce such a sentence as should be in accordance, both in letter and spirit, with our Articles and Formularies. But I beg to assure the subscribers to the address that they cannot be more anxious than myself to maintain the doctrines of the Church inviolate; and that I shall always, by God's grace, employ any influence which my station may afford me in promoting such measures as may appear likely to contribute to that end."

Preferments and Appointments.—*Deaneries:* The Very Rev. Edward N. Hoare, to Waterford; the Very Rev. Viscount Mountmorris, to Achonry. *Deanery Rural:* The Rev. Charles Herbert, Rector of Ruraken, Staffordshire, to Newcastle. *Rectories:* The Rev. Richard Portman Burton, to Trentborough, Somersetshire; the Rev. W. S. Bucknill, to Stretton Baskerville, Warwickshire; the Rev. S. Holmes, to North Cray, Kent. *Vicarages:* The Rev. J. Wise, to Offchurch, Warwickshire; the Rev. Edward Russell Orwood, to All Saints and St. Peter's, Maldon, Essex; the Rev. R. N. Blaker, to Ifield, Sussex; the Rev. Charles Trollope Swan, to Dunholme, Lincolnshire; the Rev. T. Williams, to Burnham; the Rev. H. Holmes, to St. Anne's, Wandsworth; the Rev. G. P. Bennett, to White Notley, Essex. The Rev. F. Barlow Guy, to the Headship of the College recently established at Bradfield, near Reading, Berks, in connexion with the parish church.

Testimonials.—The following clergymen have lately received testimonials of affection and esteem:—The Rev. G. Poingdestre, from the attendants of the daily service at St. Matthew's, Millbrook; the Rev. John Stephen Hall, from the Very Rev. the Dean of Salisbury; the Rev. G. W. Hutchins, late curate of Chew-Magna with Dundry, Somerset, from the parishioners.

Trinity Church, Haverstock Hill, St. Pancras.—This church was opened on Sunday, after consecration, under the incumbency of the Rev. D. Laing, M.A., who, with the committee, has made himself responsible for £4000, which it is trusted public liberality will make good.

Bristol Church Union.—The Rev. G. A. Denison has announced that he intends to press a motion, of which he has given notice, at the ensuing general meeting, November 11, which will raise the whole question of making, at the time, some further statement of principles *substantially agreeing with* that contained in Mr. Palmer's paper, as a basis for a plan of general co-operation in behalf of the Church of England; and that, if defeated in the meeting, he intends to call for a poll of the whole Union.

Church Extension in the Diocese of Llandaff.—From a circular letter just issued by the Bishop of Llandaff, it appears that 17 parishes in Glamorganshire, containing 104,124 inhabitants, have church room only for 7416. In 13 parishes in Monmouthshire, in which there are 81,152 persons, church room is provided only for 10,496. The population of Merthyr Tydvil amounts to 50,000, with accommodation only for 2500; that of Bedwellty to 22,413, with provision only for 2003. The number of clergymen labouring in these populous parishes is lamentably disproportionate to the exigences of the case, and the bishop will hold a meeting of the gentry and clergy of the diocese at Bridgend, on the 29th of October, and at Newport on the 31st, for the purpose of considering and adopting such measures as may be deemed best calculated to remedy the existing evils. His Lordship further states that her Majesty has been pleased to contribute £100 towards the object of church extension in the diocese; that his Grace the Archbishop of Canterbury has encouraged him to proceed; and the Right Hon. Lord John Russell has desired him, if any subscription is set on foot, to put down his name for £50.

INTERIOR OF WHIPPINGHAM CHURCH, ISLE OF WIGHT.

NOOKS AND CORNERS OF OLD ENGLAND.

THE OLD MARKET-HOUSE, ASHBURTON.

Ashburton, Devon, anciently called Aisbertone, in the time of Edward the Confessor, belonged to Brictric, and at the Conquest to Gudael de Totnais. It

THE OLD MARKET-HOUSE, AT ASHBURTON, DEVON.

appears by "Doomsday Book" to have then been part of the demesne of the Crown, being therein described as "Terra Regis." It was subsequently annexed to the see of Exeter; in 1310, Bishop Stapledon procured a charter in the reign of Edward II., for a market and fairs, and it was made a "Stannary Town" by charter of Edward III., in 1328, being then noted for mines of tin and copper, which abound in the neighbourhood. Henry IV., in the third year of his reign, granted a charter whereby "the men of the manor of Aisbertone, which is ancient demesne of our Crown," should be free from paying tol throughout the kingdom. It belonged to the Crown in the time of Charles I., as that King granted the manor to his son, Prince Charles, when he created him Prince of Wales; after various changes it came into possession of Lord Clinton, who is one of the Lords of the manor, has considerable property in the parish, and is proprietor of the market.

The ancient Market-house, delineated in the above Engraving, appears to have been erected in the fourteenth century, from various old records, and the date of the charter as granted in 1310. The building, which is in a dilapidated state, is built principally of timber, the chief part being of oak; it is about 120 feet in length, and consists of two stories, the lower forming throughout its length arches of woodwork, used for the butchers' shambles and vegetables; the upper one for the corn-market and the cook. It stands in the centre of the town, at the lower end of North-street: the open space in front was formerly used for bull-baiting and other sports, from which it is generally denominated the "Bull-ring;" the judges of those sports being seated in the opening, under the clock turret. During the Civil War, on the arrival of the Parliamentary army, under Sir Thomas Fairfax, on their march westward, in January, 1646, the old building was used as a storehouse for baggage, arms, &c.; the General taking up his quarters at the Mermaid Inn, opposite the market which house has still its arched entrances and spacious hall.

A new and commodious market-place being just erected, at the expense o

Lord Clinton, the quaint old manor will shortly be taken down; and, previous to its demolition, is well worth a visit of all lovers of antiquity.

The town was a borough in the 26th of Edward I., and returned two members, John Pope and William Titels, the 25th May, 1295, for the Parliament at York.

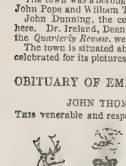
John Dunning, the celebrated lawyer and first Lord Ashburton, was born here. Dr. Ireland, Dean of Westminster, and the late Mr. Gifford, the editor of the *Quarterly Review*, were also natives of the town.

The town is situated about a mile from the river Dart, which has long been celebrated for its picturesque and romantic scenery

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

JOHN THOMAS LORD STANLEY, OF ALDERLEY.

This venerable and respected nobleman died on the 22nd instant, at Alderley Park, Cheshire. In the 84th year of his age. The branches of the illustrious family from which he descended, sprang from the marriage of Sir John Stanley, Knight, of Westerchird son of Thomas Lord Stanley, K G , of Knowsley, by Joan Goushill; his wife, grand daughter of Richard Fitzalan, Earl of Arundel, by the Lady Elizabeth de Bohun, great grand-daughter of King Edward I. In 1456, the chief of the house, Thomas Stanley, of Alderley, was created a baronet, and from him that title passed in course of time to his descendant, Sir John Thomas Stanley, who was eventually raised to the Peerage in May, 1839, and was the nobleman whose death we record.



Lord Stanley, of Alderley (born the 26th November, 1768, the eldest son of Sir John Thomas Stanley, Bart., by Maria, his wife, daughter and heiress of Hugh Owen, Esq , of Penrhos, co. Angl.esey), married 11th October, 1796, Lady Maria Josepha Holroyd, daughter of John, first Earl of Sheffield, and had issue seven daughters, five of whom married, and two sons, viz. Edward John, Lord Eddlsbury, late M P. for Cheshire, who now succeeds to the Barony of Stanley of Alderley, and William Owen, late M P. for Anglesey.

LORD WILLIAM BERESFORD.

His Lordship, who was next brother and bear presumptive of the Marquis of Waterford, died on the 18th inst., in the Regent's Park Barracks. He was born 2nd December, 1812, the second son of Henry-De La Poer, second Marquis, by Susanna his wife, only daughter and heir of George Earl of Tyrconnel. At an early age he entered the army as Cornet in the 1st Life Guards, and remained in that regiment up to the period of his death, then holding a Captain's commission.

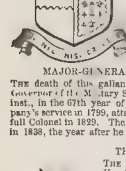
By his Lordship's decease, his only and younger brother, the Rev. Lord John Beresford, Rector of Barrowstown, becomes next in succession to the Peerage honours of this distinguished family.

MAJOR-GENERAL SIR EPHRAIM GEORGE STANNUS, C.B

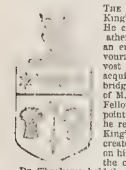
The death of this gallant officer, who held the appointment of Lieutenant-Governor of the Military Dependency at Addiscombe, occurred there on the 21st inst., in the 67th year of his age. Sir Ephraim entered the East India Company's service in 1799, attained the commission of Captain in 1811, and became full Colonel in 1823. The local rank of Major-General was conferred on him in 1838, the year after he received Knighthood.

THE REV. DR THACKERAY

The Rev. George Thackeray, D.D., F L.S., Provost of King's College, Cambr.dge, was born at Harrow, in 1777. He came of a learned and scholastic family. His grandfather was head-master of Harrow School, his father was an eminent physician resident at Windsor, and the favourite medical attendant of George III. The future Provost received his earlier education at Eton; and, after acquiring distinction there, went to King's College, Cambridge. Here he took his degree of B.A. in 1802, and of M.A. in 1805, and, in 1805, also, he was made a Fellow of the College. He was shortly afterwards appointed one of the Assistant-Masters of Eton, where he remained until he was chosen, in 1814, Provost of King's College, on the decease of Dr. Sumner. He was created B.D. in 1813, and D.D. in 1814 (by Royal mandate) on his election to the provostship. The same year he served the office of Vice-Chancellor of the University.

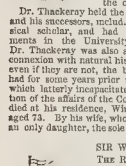


Dr. Thackeray held the appointment of Chaplain in Ordinary to George III. and his successors, including her present Majesty. He was a most erudite classical scholar, and had the reputation of having produced some of the best elements in the University examinations, and the course of study there. Dr. Thackeray was also an eminent naturalist: his collection and library in connexion with natural history are accounted the richest and most valuable, even if they are not, the best in England. This learned and excellent man has for some years prior to his decease suffered from an internal complaint, which latterly incapacitated him from taking an active part in the administration of the affairs of the College, and which eventually proved fatal to him. He died at his residence, Wimpole-street, Cavendish-square, on the 21st instant, aged 73. By his wife, who was a Miss Cotton, and whom he survived, he leaves an only daughter, the sole heiress of his great wealth.



SIR WILLIAM FREMANTLE, G.C.H.

The Right Hon. Sir William Henry Fremantle, G.C.H., was the youngest son of John Fremantle, Esq., of Aston Abbots, in the county of Buckingham. He was born on the 28th December, 1765, and, entering the army early in life, attained the rank of a Captain of Infantry; and, in 1793, he was appointed Aide-de-camp to the Marquis of Buckingham, then Lord-Lieutenant of Ireland, the Duke of Wellington being an Aide-de-camp to his Excellency at the same time. Mr. Fremantle's services were, however, soon converted to the Civil department of the State. He succeeded to the post of private secretary to the Lord-Lieutenant Buckingham, and his next appointment was that of Deputy to his Grace, when the Duke became Teller of the Exchequer.



In 1806, on the formation of the Grenville and Grey Administration, Fremantle was promoted to the joint Secretary of the Treasury, and entered the House of Commons, of which he continued a member until 1837, having re-

sented Buckingham in seven Parliaments. Throughout the period he was steadily attached to the party represented by Lord Grenville, Mr. Horner, Mr Wynne, and Lord Temple. In 1822, when the Grenville party joined the Government of Lord Liverpool, Mr. Fremantle was made Commissioner of the India Board and a Privy Councillor. In 1826, Mr. Fremantle was selected by George IV. to fill the office of Treasurer of the Household; and the also received the honour of Knighthood, with the Grand Cross of the Royal Guelphic Order of Hanover. Sir William Fremantle was likewise Treasurer of the Household under William IV., and held the Chief-Rangership of Windsor Great Park. Under her present Majesty he relinquished the Treasurership, but retained the Deputy Rangership. Much of his time was devoted to the effectual improvement of the Park, even to the period of his death, at the advanced age of eighty-three

Sir William Fremantle married, in 1797, the only daughter of Sir J. Elwill, Bart., and widow of Felton Lionel Hervey, Esq., by whom (who died in 1841) he had no issue. Sir William died at his seat, Hally Grove, Windsor Park, on the 18th instant

The Late Robbery of the Mail between Wolverhampton and Birmingham.—Some clue has been obtained within the last few days to the missing bag of which the mail cart was hastily robbed on the Wednesbury road. During the last week attempts were made to negotiate two of the banker's bills which formed part of the contents of the bag, and the persons who made these daring attempts have been taken into custody, one at Stourbridge and the other at Birmingham

Foreign Cattle.—The steam-ship *Diana*, from Harlingen, has brought 455 pigs as part of her cargo. Each pig if not more than double the quantity or this description of live stock that has arrived direct from the Continent on one occasion. The same vessel brought the large number of 194 beasts, 36 calves, 530 sheep, and other productions of Holland; and the *Magnet*, from Amsterdam, has brought the largest number of sheep ever brought from the Dutch capital as part of her cargo, comprising 1133 of this description of cattle, also the produce of Holland.

On Saturday a meeting of the American Chamber of Commerce was held at Liverpool, to consider the propriety of applying to Parliament for an alteration in the constitution of the dock trust of Liverpool, with the view of obtaining the proportionate representation of property now administered by the trust. After much discussion, it was resolved, by a majority, to proceed to Parliament for a bill for the purpose indicated.

A Valuable Picture.—A picture painted on wood, and purchased by M. Campenart, at a public sale-room in London, in 1846, where it was sold as the portrait of an Abbess, by Le Brozino, has been examined by the Academy of St Luke, at Rome, to whose judgment it was submitted by the purchaser, and unanimously recognised as the work of Michael Angelo, and as representing the illustrious Marchesa de Pescara, Vittoria Colonna.

The Roman Catholic Bishop of Toronto, Charlounel, arrived in that city on the 21st ult., and took possession of his cathedral the next day. It is a French emigrant of the last revolution, about fifty years of age. A brother of his, a member of the National Assembly, was shot dead at the barricades of Paris during the struggle of July, 1848. The Roman Catholic Archbishop of Canada died in Quebec on the 4th inst.

THE BURGLARY AT MR. HOLFORD'S, IN THE REGENT'S PARK.

On Monday, William Dyson was brought up on remand on this charge, at the Mary-bone Police-office. A crowd of the curious assembled on the occasion

Captain Ryder Burton (a friend of Mr. Holford) was present, and mentioned to the magistrate (Mr. Broughton) the fact of the premises having within the last two or three weeks been broken into and a carriage belonging to him carried off, which vehicle, however, he fortunately recovered.

The prisoner appeared very low-spirited, and much more pale and dejected than he did upon the first examination

Mr. Broughton (to the prisoner, to whom the gaze of every one present was directed): You are charged with having burglariously broken and entered the dwelling-house of James Holford, Esq., and taken away part of an ornamental and other property. (To Lockerby, 180 S): What further evidence have you to give in this case?—Lockerby: None, your worship, at present. We wish for a little more time, in order to afford us an opportunity of apprehending other parties.

Mr. Broughton: Has there been any reward offered.—Lockerby: No, sir.

Inspector Champneys said, that, from certain circumstances which had already transpired, arising out of the activity and judicious management of the officers employed in the case, the Commissioners of Police were desirous of having a remand.

Lockerby said he had no doubt that others connected with the party would be in custody in a few days. One of them had, it was quite certain, been severely wounded, and he must have obtained the assistance of a medical man.

The double-barrelled pistol, with the spring lever attached thereto, and with which Mr. Paul, the butler, armed himself, was produced, as was also the hat left behind by the burglar supposed to have been killed. These articles were examined with much curiosity by several gentlemen who sat near the magistrate during the proceedings

The magistrate had some conversation with Mr. Paul and Lockerby in an under tone; and, from what transpired, it was deemed necessary for the ends of justice, without going any more into the matter at present, to remand the prisoner till Monday next.

He was then removed to the House of Detention. A great crowd assembled to witness his departure. It has been ascertained that for some time he kept a low lodging-house, the resort of thieves and the lowest description of prostitutes, and that he was also connected with a gang tried about two years ago for the murder of Mr. Bellchambers in Westminster

It is understood that, prior to the next examination of Dyson, some of his supposed accomplices in guilt will be apprehended, and evidence of a strongly criminatory nature be produced against them.

Extensive Robbery of Jewellery in the Strand.—A burglary, the audacity of which is perfectly astounding, considering the great excitement caused by the late numerous robberies in town and country still continues, was committed on Tuesday morning at a large jeweller's and silversmith's, in the Strand, when property to the amount of between £2000 and £3000 was stolen. The house in which the robbery was committed is on the left side of the Craven Hotel, Strand, directly facing the Golden Cross coach-yard, and the shop from which the valuable property has been abstracted belongs to Messrs. Clapham and Williams, silversmiths and jewellers, one of the oldest established houses in the Strand. The door at which the robbers entered is supposed to be about three o'clock, but how an entry was effected there is not the slightest circumstance to show. The property stolen is diamonds of immense value, and other precious stones which were not set, also a great number of rings and watches. There is no doubt but that plate was the desideratum with the burglars, as Messrs. Williams and Clapham are celebrated for their massive plate service; but, fortunately, in this they were disappointed, as the greatest portion was removed from the front shop into an inner shop, and there safely encased in an iron-bound chest. The whole of the articles abstracted might be placed in a man's pocket. The robbery was first discovered about seven o'clock in the morning, when the shopmen came as usual. To his astonishment the right door was ajar, slightly fixed, and on pushing it open he discovered that the carpet and chairs had evidently been removed from the position in which he had left them the previous evening, about ten o'clock, when everything was safe. The door he found open had been bolted on the inside. He immediately raised an alarm, and, calling for the constable on the beat, they instituted a search, but, of course, the robbers had fled. Information was at once given at Whitehall, also at Bow street, and from the latter place Inspector Dodd hastened to the spot. He made all the necessary inquiries, and then despatched Sergeants Thompson and West to take charge of the affair. Inspector Field and Shaw, the two detective officers, have also made an examination of the premises, and already have attached suspicion to two parties. They are, however, determined not to be apprehended hastily, lest they might be mistaken, and the guilty parties consequently escape. The constabulary officers are quite satisfied, from the one which they have already discovered, that they will be able to pass the description sheet of justice before many days have passed. The following is a portion of the valuable property stolen, but until the whole of the stock books are looked over by Messrs. Clapham and Williams, they are perfectly ignorant of the total loss they have sustained by the daring burglary. —200 gilt rings, set with diamonds, &c.; 120 gold and silver sleeper rings: 130 gold signet rings onyx and carnelians, 90 gold and silver watches, 80 gold guards and chains; 15 single stone diamond rings; and a large number of valuable bracelets, and other jewellery. Since the robbery the Commissioners of Police have issued a number of handbills, guarding housekeepers against leaving their street-doors open, and also to be on their guard when strangers are waiting in their premises: extra iron-bound shutters are being fixed at many of the silversmiths' in the Strand.

California Gold.—(*To the Editor of the* Illustrated London News.)—It may be interesting to your readers to know the result of two large specimens of California gold which arrived in this country in 1842. These lumps have been broken up: that engraved in your Journal for August 31 only yielded £334 it was supposed to contain gold to the amount of £400. The specimen exhibited at the Egyptian Hall, for which an offer of £700 was refused, has only yielded £660. The cause of the error in their supposed value arises from the great amount of silver which is found combined with the Californian gold when in *large* and these specimens contained one ounce of silver to the pound of gold. The value of silver is sixty shillings a pound, and gold £48. It is singular that ten dust and small pieces from the same district should be so much purer. Your obedient servant, James Tennant. 149, Strand.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Acted on by the abundance of money and investments arising from the payments of the dividends, the English market at the beginning of the week displayed much buoyancy. Consols quoted 97⅞ ⅞ on Monday, and on Tuesday advanced to 97⅞ for time, until noon, when several sales of Consols and Reduced caused a momentary flatness. The market was again heavy on Wednesday, some appre.ensions existing that the gradual fall in the exchanges might ultimately tend to an outflow of gold. But on Thursday a rapid decline occurred, in consequence of the supposed active interference by France and Russia in the settlement of the Schleswig-Holstein question. Consols were sold at 97⅛ an improvement of ⅛ per cent. afterwards being quoted 97⅜ ⅝, and on Friday 97⅜ ½, but are now about 95. In the heavy stocks the fluctuations have been relative. The Ex. Bills of the week the market was still heavy, the following prices being the last quoted. Bank Stock, Five per Cents, 1845, Consols, 97; New Three-and-a-Quarter per Cent. Anns., 96⅛; Long Annts., to expire Jan., 1860, 13-16; Ditto, 30 years, Oct. 10, 1859, 7 11-16; India Bonds, under £1000, 86 pm; Consols for Account, 97⅛; Exchequer Bills, £1000, June, 69 pm, Small, June, 70 pm

In the Foreign Market, the principal fluctuations have been in Mexican and Peruvian, both closing lower than Monday's quotations. Mexican has ranged from 32 to ⅞ for the Account to 31⅛ ⅜, and Peruvian has declined from 84 to 81⅛, having been sold at 80⅞ ; Russian Stock on Wednesday declined about one per cent. The following is an extract of a letter received by the Committee of Spanish-American Bondholders from their agents at Bogota, Messrs. Powles, Wilson, and Co., dated 19th September, and relating to the "Treasury Bills" lately issued by the New Grenadian Government for the dividends in arrear "The Bonds (t e. the above Treasury Bills) we believe, will be worth from 7½ to 80 per cent. in due country. The sale will be, however, slow." This is a perfect confirmation of the justice of our remarks on the Grenada compact in the Illustrated London News of last week. The large holders must be losers to a great deal, but to a far less extent than the smaller ones, who, having the greater influence in the working of the arrangement, which must ultimately tend to throw all the odd Coupons into the hands of the speculators having agencies at Bogota, &c , who will only purchase at their own prices. At the close of the week there was flat, the following being the last quotations:—Chilian Bonds, 5s per Cent., 102⅜; Danish Bonds, Five per Cent., 101; Grenada Bonds, One-and-a-Half per Cent., 18⅜; Mexican Bonds, 5s per Cent. Coupons, 31⅝; Mexican, Five per Cent., 1846, ex Jan. Coupons (Account), 31⅜; Peruvian Bonds, Four-and-a-Half per Cent., 81⅛; Ditto, Deferred, 36⅜; Russian Bonds, 105⅜; Ditto, Four-and-a-Half per Cent., 97⅛; Spanish Five per Cent., 1840, Account, 18⅛; Ditto, Passive, 5⅛; Venezuela, Deferred, 11⅜; Dutch, Two-and-a-Half per Cent., 56; Ditto, Four per Cent. 89¾

Shares closed rather heavily, the decline in the Consol Market affecting prices. Notwithstanding this, there has been some good business done during the week on behalf of private investors. The last prices are—For Aberdeen, 9 ; Ditto, Preference, ½ dis; Birmingham and Oxford Junction (without guarantee), 26½; Caledonian, 15½; Eastern Counties, 3½; Edinburgh, 104; Ditto, Preference, 115; Eastern Counties, 6¼; Ditto, No. 2, ½ p. x.d.; Ditto, New Preference, 6 per Cent., 1½; Ditto, North ern and Eastern, 5 per Cent., 86; Edinburgh and Glasgow, 25; Great Northern, 10½; Ditto, A Stock, 5 per Cent., 104; Ditto, B ditto, 5 per Cent., 104; Ditto, 5 per Cent., Preference, 124; Great Western, 70⅞; Ditto, Selby, Quarter Shares, 22; Lancashire and Yorkshire, 46⅜; Ditto, Fifths, 9; Ditto, New Fifths, 8⅞; Leeds and Bradford, 79; Leeds and Thirsk, 50; London and North Western, 107⅛; London and Brighton, 37⅜; London and South Western, 73⅛; Manchester, Sheffield, and Lincolnshire, 17⅜; Ditto, New Shares, 5 per Cent., 8⅜; Midland, 43⅜; Ditto, Bristol and Gloucester, 52; Ditto, Birmingham and Derby, 28; Ditto, Leicester and Bedford, 8; Ditto, Leicester and Hitchin, 5; Ditto, Midland Great Western of Ireland, 5; Newcastle and Carlisle, 45; Ditto, Shares, 5 per Cent., 8; North British, 18; North Eastern, York, 21; Ditto, Leeds, 21; Ditto, Preference, 5 per Cent., 8; North Staffordshire, 5; Scottish Central, 10; Scottish Midland Junction, 3; South Devon, 3½; South Eastern, 2½; South Wales, 24½; Taff Vale Railway, 15½; West Cornwall, 6; West Midland, 6; West Riding, 5; West Yorkshire, 2½; Wilts and Berks, 3½; York, Newcastle, and Berwick, 17½; Ditto, York and North Midland, 23½; Ditto, Preference, 8½; Boulogne and Amiens, 7⅛; Dutch Rhenish, 3⅜; East Indian, 93½; Namur and Liege, 7½; Northern of France, 14½; Orleans and Bordeaux, 7⅜; Paris and Rouen, 9⅜; Paris and Strasbourg, 7⅞; Rouen and Havre, 9⅞ x. d.; Sambre and Meuse, 2⅝.

Saturday Morning.—The Consol Market was agitated yesterday, prices ranging from 97⅛ to ⅜ to 96⅞. The latter quotation was the lowest during the day, the last being 97⅛ to ⅜ for money and time. Shares were in some instances a trifle heavier. The foreign market was flat.

THE MARKETS.

Corn Exchange (Friday).—Up to our market this week, constwise, the receipts of English wheat have been moderate, 7,410 qrs. only having arrived, but those by land carriage have fallen off Although the supply of samp as to-day was comparatively small, the demand for all kinds of wheat was sluggish in the extreme; but we have no change to notice in Monday's quotations. A few offers came to hand from the east coast to ship wheats at present prices. The imports of foreign wheat have amounted to 12,355 quarters. The supply brought forward this morning was rather small, but a limited business was transacted at rates which were held as fully previous rates. In the middling and inferior kinds no little was doing than the currencies were almost nominal. Very little barley of fine quality was brought forward. Malting samples were quite as dearly but grinding and distilling sorts ruled heavy. Malt—the supply of which was moderately limited—sold off all but slowly, at previous quotations. The supply of Irish oats was on the increase, but that of English and foreign was by no means large. The trade ruled inactive, yet prices were unvaried. In beans, peas, Indian corn, and flour no change took place.

Arrivals this week: Wheat, 3410 qrs.; barley, 2502; malt, 3810; oats, 880; flour, 1890. Irish: oats, 10,629. Foreign: wheat, 12,355; barley, 20; oats, 8620; flour, 30.

English.—Wheat, Essex and Kent red, 37s to 42s, ditto, white, 39s to 42s; Norfolk and Suffolk red, 36s to 41s, ditto, white, 39s to 42s; grinding barley, 23s to 26s, distilling ditto, 25s to 27s, malting ditto, 28s to 29s; Norfolk and Lincoln malt, 46s to 48s; Ware ditto, 52s to 54s; Kingston ditto, 50s to 52s; Chevalier, 53s to 56s; Yorkshire and Lincolnshire feed oats, 18s to 19s; potato ditto, 18s to 20s; Youghal and Cork, black, 15s to 17s; ditto, white, 18s to 19s; Limerick new, 22s to 22s; ditto, old, 26s to 30s; grey peas, 29s to 32s; maple, 29s to 33s; white, 29s to 31s; beans, 30s to 34s; Suffolk and Yorkshire, 26s to 34s per 280 lbs.—*Foreign:* Danzig rye, 40s; Konigsberg ditto, 36s; Pomeranian ditto, 32s to 34s per 280 lbs.; beans, —s to —s, peas, —s to —s, per quarter. Flour, American, 23s to 25s per barrel, Canada, —s to —s per barrel.

The Seed Market.—Canary seed continues very dull; and, as barely the late decline is supported, we have to note a further reduction of 4s to 4s. Sunshine is missed, English, sowing, 54s to 56s; Salick, crushing, 32s to 44s. Mediterranean and Odessa, 48s to 49s; hempseed, 38s to 40s per quarter. Coriander, 18s to 19s per cwt. Brown mustard, new, 8s to 10s; white ditto, 9s to 9s 6d. Tares, 4s to 4s 6d per bushel. English rapeseed, new, £27 per last of ten quarters. Linseed cakes, English, £8 0s to £9 0s; foreign, £7 10s to £8 0s per ton. Rapeseed cakes, £4 4s to £5 5s per ton. Canary, 50s to 56s per quarter. English clover-seed, red, —s to 4; extra, —s to —s, white, —s to —; extra, up to —s. English red, new, 3 to 4; extra, —; white, 4 to —; extra, —s per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d to 7½d; of household ditto, 5d to 6d per 4lb. loaf

Provisions.—Irish butter is very dull in sale, at a decline in the quotations of from 1s to 2s per cwt.—Limerick, Waterford, and Cork, 80s to 84s; Cork, 80s to 84s; and Limerick, 74s to 77s per cwt. The fall in the value of Dutch butter is quite 3s per cwt.—the finest Friesland being quoted as 88s to 90s. In English butter very little is doing, and the currencies rule the turn in favour of the buyers. The imports into Weekly's last week, 88s of 1cwt; fresh, 3s to 1s per dozen pounds. Bacon has given way in value 1s per cwt. Waterford, singed, 42s to 52s; dried, pale to the finest sides, at full prices. Common scored congius is worth 1s 6d to 1s 6d per lb.

Sugar.—Although there has not been quite so much activity in the market as in the preceding week, late currencies have been well supported. Refined goods move off freely, and brown lumps are worth 51s 6d to 52s per cwt. There is rather more inquiry for crushed

Coffee.—Very little has been doing in good ordinary native Ceylon since our last report. Sellers have come forward at 58s, but no buyers have appeared beyond 56s per cwt. Plantation sorts have been in small request.

Provisions.—Irish butter is very dull in sale, at a decline in the quotations of from 1s to 2s per cwt.—Limerick, Waterford, and Cork, 80s to 84s; Cork, 80s to 84s; and Limerick, 74s to 77s per cwt. The fall in the value of Dutch butter is quite 3s per cwt.—the finest Friesland being quoted as 88s to 90s. In English butter very little is doing, and the currencies rule the turn in favour of the buyers. The imports into Weekly's last week, 88s of 1cwt; fresh, 3s to 1s per dozen pounds. Bacon has given way in value 1s per cwt. Waterford, singed, 42s to 52s; dried, pale to the finest sides, at full prices. Common scored congius is worth 1s 6d to 1s 6d per lb.

Tallow.—Large supplies continue to arrive from Russia and elsewhere; the demand is, however, heavy, and prices are very steady. Town, per cwt., on the spot, is quoted at 38s 6d per cwt.

Oils.—The partial failure of the Davis Straits fishery has produced a steady demand for common fish oils, at very full prices Otherwise, our markets is in a sluggish state.

Spirits.—Rum moves off slowly at the late improvement in value. Brandy and corn spirits are quite at dear

Hay and Straw.—Meadow hay, £2 10s to £3 15s; clover ditto, £3 0s to £4 4s; and straw, £1 1s to £1 8s per load.

Wool By private contract, the inquiry is steady, and prices are well supported in every instance

Potatoes.—Selected samples are in good request, at full prices; but inferior ones are a trifle lower

Coals (Friday) Hetworth and Co., 18s 6d; Bowicke and Co., 18s 6d; Hilton, 18s 6d; Whitwell, 18s 3d; Hetton, 18s 6d; Sidney, 18s 6d; Stanley, 18s 6d; East Australia, 18s per ton.

Barley (Friday).—The supplies of barley are moderate only in excess of the demand, only a moderate business is doing in them. Selected samples are selling at full prices, but the bulk of the sales are effected at rather lower rates. Grinding barley is dull at 22s to 23s per qr. East Kent peckers, 25s to 26s, New Mid Kent ditto, 28s to 29s; New Weald of Kent ditto, 29s to 30s; New Essex ditto, 28s to 29s.

Smithfield (Friday). Notwithstanding that the supply of beasts on offer in our market to-day was comparatively small, the demand being quahty, the beef trade, arising from the general badness in Newgate and Leadenhall markets, was extremely dull, at a decline in the value of 2s per stone. Prime Scots, Shorthorns, and crosses sold slowly at the above reduction. Mid. cows

Lambs 6d; second quality ditto, 2s 8d to 3s 6d; prime large ewes, 3s 4d to 3s 6d; prime Scots, &c., 3s 8d to 3s 10d; coarse and inferior sheep, 2s 10d to 3s 2d; second quality ditto, 3s 3d to 3s 6d; prime coarse-woolled ditto, 3s 8d to 3s 10d; prime Southdowns, 3s 10d to 4s 0d; large coarse calves, 3s 2d to 3s 4d; prime small ditto, 3s 6d to 3s 8d. Large pigs, 3s 4d to 3s 6d; small porkers, 3s 8d to 4s 0d; sucking calves, 18s to 26s; and quarter old store pigs, 18s to 24s each. Total supplies: beasts, 750; cows, 108; sheep, 5420; calves, 320; pigs, 540. Beasts, 1,400; sheep, 1000; calves, 95; pigs, 108 Scotch beasts, 17; sheep, 40.

Newgate and Leadenhall (Friday).—Only a few baskets were well supplied with each kind of meat, in which only a limited business was doing, at barely late rates.

Per 8 lbs by the carcase:—Inferior beef, 3s 4d to 3s 6d; middling ditto, 3s 8d to 4s 0d; prime large ditto, 3s 10d to 4s 0d; prime small ditto, 3s 8d to 3s 10d; large pork, 3s 2d to 3s 6d, inferior ditto, 3s 6d to 3s 8d; middling ditto, 3s 10d to 4s 0d; prime ditto 3s 6d to 3s 8d, veal, 2s 8s. to 3s 6d; small pork, 3s 10d to 4s 6d.

PRIZE RABBITS AT THE ROCHESTER AND CHATHAM SHOW.

PRIZE RABBITS.

These fine animals were exhibited at the recent half-yearly Prize Show of the Chatham and Rochester Fancy Rabbit Club, held at the Gibraltar Tavern, New-road, Chatham. Each of these rabbits is about six months old, and they obtained the first and second prizes at the Show: one is a grey buck, measuring in length of ear 21½ inches; the other is a black and white doe, 21¼ inches in length of ear, and nearly 5 inches width. They are the longest-eared rabbits ever seen; and both are very fine specimens of that beautiful animal. They are in the excellent stud of Mr. George Powell.

A COLOSSAL AMERICAN BRIDE-CAKE.

Every year there is held in the State of New York an Agricultural Fair, which is usually attended by many thousand persons, for neither pleasure nor business is followed by halves upon the other side of the Atlantic. This year the fair took place early last month, in Albany, but it is held every year in a different town of the state. The *fête* consists of a vast exhibition of objects agricultural, horticultural, and mechanical. Horses, oxen, cattle, cows, calves, sheep, swine, &c., are brought from the various States; together with carriages and sleighs, buggy waggons, horse carriages, omnibusses, and iron carts; and a collection of fruit and flowers, intermingled with useful and ornamental works of art. Domestic economy is not forgotten; for we find that "Miss Goodrich, sister of the Colonel, favoured Floral Hall with specimens of six kinds of wine, which she herself produced from domestic fruits, such as the gooseberry, the elderberry, the currant, the grape, &c. The judges, who were only privileged to test the quality, pronounced the flavour of each finely exquisite and extremely palatable."

Next we read of a specimen of wheat on the stalk called Australia wheat, raised by Mr. S. L. Thompson, of Setauket, Long Island, the stalks being full five feet in height; the heads better filled and much larger, so the farmers say, than any other kind on exhibition.

The following articles are characteristically recommended:

A selection of pears, from the gardens of H. W. Langworthy, of Rochester, and Henry Vale, of Troy, were tempting enough for an instant trial; but, as they were like all other fruit in Floral Hall, "forbidden," they were of course left unmolested.

Some Eau de Cologne, from a manufactory in Albany, is described as "excellent in quality, rivalling the best German cologne that ever bore the stamp of Marie Farina. There is the same delicacy of perfume and smoothness and quick evaporation of the liquid which distinguishes the best European article; and its excellence proves that our American chemists can, when they try, equal, if not surpass, those of Europe even in articles of luxury."

Miss E. Carter exhibited a neat specimen of shell-work cottage. The internal as well as external arrangements are most complete. Small parlours, elegantly furnished with miniature furniture, and, in fact, the rooms presenting to view almost every article of use or ornament about a well-furnished house, even to the cradle.

Messrs. L. and H. Caurchill, Rochester—Specimens of sheepskin tanned in ten minutes, and so tempered as to be made up into boots, shoes, &c., by Mr. Hibbard's patent. It is said to be as durable as calf-skin, and approaching nearer to waterproof.

J. Woolcnsack, Albany—A new article of alarm door-lock. A bell is so arranged, that, upon the moving of the bolt, it instantly commences ringing. A neat affair

Mr R. F Monaghan, of Pa., has on exhibition Fink's air-tight coal stove, which burns for twenty-four hours or more, without additional fuel. Messrs. Jewett and Root, of Buffalo, have several elegant specimens of parlour stoves.

J. H. Butterworth, of Dover, N. J., exhibits a new combination bank or safe lock. An article that would puzzle burglars, or the owner himself without instructions.

Mr. James A. Hurst. An elegant collection of quadrupeds and birds, collected in Canada co. This case is intended for exhibition at the World's Fair, in London.

We have reserved a domestic *bonne-bouche* for illustration a colossal Bride-Cake, made by Benjamin Briare. The Cake is in the usual cylindrical form, elevated on ornamented scroll pedestals, which project over the edge, dividing the circumference into three compartments, each containing an emblematic device of a well-known annual feast. The first represents the May dance so prolific of joyful reminiscences; the second, the Harvest Home, another memento of our Saxon ancestors; the third indicates a New Year's Feast. These scenes are again crowned with a bridal wreath of flowers, the whole being surmounted by a brilliantly carved altar, supported by eight dolphins. The carving consists of a representation of the four seasons—spring, summer, autumn, and winter, with Cupid presiding over the various branches of husbandry. First he is ploughing with a yoke of doves; second, haying; third, gathering fruit. In the fourth, the tiny deity makes his appearance in one place as sleighing on an inclined plane, in another as shivering over a fire. Strewn upon the altar are agricultural implements, fruits and vegetables of every species, even to the humble potato. In the centre is erected a medallion, whose sides are beautifully modelled in relief. On one side is Ceres, the goddess of Agriculture; on the other, Hymen, the god of Matrimony. This medallion is entwined with a magnificent wreath of flowers, and resting upon it are two winged Cupids, bearing a fancifully wrought presentation pitcher. The height of the Cake is 3½ feet; diameter, 33 inches. The committee presented Mr. Briare with the highest premium—a large silver medal, bearing the following inscription:—"Awarded to Benjamin Briare, for Agricultural Bride's Cake—an article of most beautiful design, and in all respects executedand arranged with superior taste. 1850." This is, altogether, a magnificent specimen of what an Albany paper calls "Pastry and Civilization."

COLOSSAL PRIZE BRIDE-CAKE EXHIBITED AT THE ALBANY STATE FAIR.

EXHIBITION OF 1851.

A meeting of Metropolitan Local Commissioners had an interview with the Royal Commissioners and the Executive Committee of the Exhibition of 1851, in the New Palace of Westminster, on Wednesday.

There were present at the meeting, besides the Commissioners, the Metropolitan Local Commissioners representing the Fine Arts, the Machinery, the Manufactures, the Mineral and the Vegetable Kingdom, and the Secretaries to the Metropolitan Local Committees

An alphabetical list of all the articles intended to be exhibited, so far as could be collected from the returns already made to the Commissioners, was placed in the hands of the Commissioners. This return can, however, only be considered as an approximation to the total number, as, although the metropolitan returns were made up to Saturday last, those for the country are not brought down to so recent a date.

Many of the Local Committees have not yet made their returns; while, with respect to many others, which continue to come in very rapidly, it has been found impossible to do more than give a general idea of the nature of the demands for space.

The Commissioners were strongly impressed with the necessity of supplying these deficiencies before the 31st of October, after which the returns for space cease to be received. Each Commissioner, in the department which he represents, was requested to visit and induce the eminent producers of the various articles named in the list of deficiencies, to prepare articles for exhibition. It was stated that machinery was adequately represented in all its branches, the deficiencies being very few in number.

As this was the last meeting of the Commissioners previous to the final closing of the lists, a very strong opinion was manifested that there was a necessity for immediate and energetic action, to ensure the efficient representation of the manufactures of the country. The accounts as to the progress of the Exhibition throughout the provinces were stated to be very gratifying.

The meeting broke up shortly after four o'clock.

COLONEL VON DER TANN.

This gallant soldier is the chief of the staff of General Willisen, Commander-in-Chief of the Schleswig-Holstein army. He is a Bavarian by birth, is of good family, and entered the Holstein service partly in zeal for the cause, and partly in love of adventure. In 1848, he led the undisciplined free corps (the Portrait, an excellent likeness, is of that date), who then poured into the Duchies from all parts of Germany; under him they did good service, and they could scarcely have been kept together by any other man. After they were dismissed, he still served as Adjutant in the Bavarian contingent in the campaign of 1849; and at the commencement of the present year he was named Colonel and Chief of the staff. He is a daring and enterprising officer, and is much beloved by his troops. In private conversation, he is one of the most modest and unassuming of men. He conducted the whole of the late unsuccessful operations against Friedrichstadt, in which the army displayed so much useless gallantry.

COLONEL VON DER TANN, CHIEF OF THE STAFF OF GENERAL WILLISEN.

THE ILLUSTRATED LONDON NEWS.

No. 453.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, NOVEMBER 2, 1850. [SIXPENCE.

THE NEW ROMAN CATHOLIC BISHOPS.

WHILE the Roman Catholics of this country were a suffering and oppressed body—when they were shut out from any of the ordinary rights and privileges of citizenship, on account of their religious belief—the sympathy and support of the people generally were cordially given to them. Their efforts to free themselves from oppression—to raise themselves to that same level of toleration and of civil right where all other sects were permitted to stand as brothers and fellow-subjects—were viewed with approbation by the friends of rational freedom; and their ultimate success was considered a triumph of common-sense, no less than of justice. The Roman Catholics, however, seem to have misunderstood the English people in this matter—if we may judge from the impertinent nomination just made by the Pope, and by the complacent glorification of Cardinal Wiseman (the *soi-disant* Archbishop of Westminster) in his pastoral letter, which was read in the Roman Catholic churches of this metropolis on Sunday last. Mistaking the sympathies of the English nation in the great cause of religious liberty for a fellow-feeling with Popery, and exaggerating the importance of the recent retrogressions and backslidings of a few Protestant clergymen, the Pope and his advisers seem to have imagined that the time had come when they might act on the aggressive in England, and revive the antiquated claims of the Papacy. We may account for the folly of the Pope—an alien to this country, and only receiving his information at second-hand; but the folly of Cardinal Wiseman, in so misinterpreting or ignoring the spirit of the English people, and in leading the Pope into the false position in which he has placed himself, almost surpasses belief. The nomination of Cardinal Wiseman—or St. Pudentia, or Impudentia—is a direct insult to the Sovereign, the Parliament, and the people of this country. We have but to put a parallel case to the Roman Catholics themselves, to see how they would interpret it. Take, for instance, that of the Emperor of Russia, who is the head of the Greek Church, and both Emperor and Pope in his own dominions. Supposing that, because there are a few English as well as Russian Protestants in St. Petersburg, the Queen of Great Britain, without asking the consent of the Emperor of Russia, were to send out the Rev. Hugh M'Neill, or to appoint a resident Russian to the office of Protestant Bishop of St. Petersburg, and to invest him with spiritual authority over St. Petersburg and the adjoining districts and countries of Russia, what would the world say of the attempt? What would the Roman Catholics themselves say of it? They would say, no doubt, that it was either a piece of gross stupidity and infatuation, or a premeditated, direct, and most offensive insult to an independent Sovereign. And they would say rightly. And so the English people say at the present moment of the Pope's nomination of Dr. Wiseman to the Metropolitan See of Westminster, and of Dr. Wiseman's Charge to the Catholic Clergy on Sunday last.

DR. WISEMAN, APPOINTED BY THE POPE CARDINAL ARCHBISHOP OF WESTMINSTER.

The address of the Protestant clergy of the diocese, which has been presented to the Bishop of London, was called for by the circumstances, and is a temperate, dignified, and very able statement of the law which the Pope has invaded; and the reply of the Bishop of London is no less worthy of the occasion. The Pope will soon find, that, in this, as in other matters, he has committed a mistake. He is an amiable, but by no means a sagacious, person; and his amiability, which has led him into so many errors and misfortunes as a temporal Sovereign, bids fair to lead him into similar blunders as the spiritual head of a Church. No other man in the world could have done Roman Catholicism such a disservice in England, as he has by his last assumption of power in the diocese of London. At the same time, without by any means intending it, or dreaming of it, he has done Protestantism a service. Many a waverer, inclined to go astray in the flowery paths that lead to the pitfalls of Puseyism or to the precipices of Romanism, will stop in his career, and go back in safety to the quiet folds of the Church. The progress of schism will receive a check, and the Protestant spirit of England and Scotland will be strengthened. In the meantime, as the Roman Catholics are not satisfied with their former position—within the law—it is to be hoped that the proper legal authorities will shew the new Cardinal that he has stepped beyond it—that he may be a Cardinal, if he likes, but not Archbishop of Westminster, without suffering the consequences.

In all questions affecting their civil rights, the Roman Catholics have found a support for which they ought to have been thankful. In questions affecting the supremacy of the Sovereign of these realms, and the assumption of a foreign Potentate to confer titles and dignities without her consent, they will find no support, but will discover, ere long, if they have not discovered it already, that the public feeling and opinion are decidedly against them.

CARDINAL WISEMAN.

THE public have not yet recovered from the astonishment caused ten days ago, by the announcement that his Holiness the Pope had parcelled out England into one Archbishopric and twelve Bishoprics. There being an established National Church, of which her Majesty is the supreme head, having its basis i

FRENCH FLEET IN TORBAY.—(SEE NEXT PAGE.)

our parishes, they cannot comprehend how another Church can be established with an Archbishop and Bishops, and resting, too, on parochial divisions, by a foreign priest, who, it has been declared over and over again, "neither hath nor ought to have any dominion whatever in the realm of England." Nor is the astonishment lessened by the reasons assigned for this exercise of the authority of the Pope over our country, or by the manner in which his Arch bishop and Bishops have begun the r...

His Holiness, in his "Letters Apostolic," issued, as we are told, "on the twenty-ninth day of last month, on the Feast of the Archangel St. Michael, Prince of the Heavenly Host, under the Fisherman's Ring," after recounting at great length what his predecessors had done for the benefit of the English, proceeds to say—"In the plenitude of our apostolic power we have resolved and do hereby decree the *re-establishment* in the kingdom of England, and according to the common laws of the Church, of a hierarchy of bishops deriving *their ist s from their own seas*, which *are constitute* by the present letter in the various apostolic districts." On reading such language it is impossible not to recollect that his Holiness, in former times, parcelled out the whole continent of America in much the same way, and it is naturally concluded that all England is to be replaced under the authority of the Pope. Some of the Catholics, referring to statistics that have been got up for party or sectarian purposes, dwell on the number of people who are said to be unacquainted with Christianity in our towns, and say say the act of his Holiness is a work of mercy and love, necessary to bring Christianity home to the English. These are the insulting sort of reasons assigned for this extraordinary exertion of the Papal power.

The Archbishop of Westminster, Cardinal Wiseman, has commenced his career by writing from "out of the Flaminian gate of Rome," on the 7th ult., a pastoral letter to the subjects he has been appointed to preside over, which was last Sunday read in all the Catholic churches and chapels of the Archdiocese of Westminster. In this pastoral letter, his Eminence, after referring to his recent appointment to the Archiepiscopal See of Westminster, with which is combined the administration of the Episcopal See of Southwark, goes on to say, using the Royal style, "*we govern* (till the Pope appoints otherwise), and shall continue to *govern* the *counties* of Middlesex, Hertford, and Essex, as ordinary thereof; and those of Surrey, Sussex, Kent, Berks, and Hants, with the *lands* thereof, as administrator, with ordinary jurisdiction." Both the Pope and the Cardinal, therefore, are quite resolved to establish in the face of the world a dominion over the whole of England. Had they created a mere Colonial arrangement, as has been said, they would have used, instead of this language referring to territory, such a phrase as "Catholics in the several districts who acknowledge the authority of his Holiness." but this was not the ambitious purpose of this Romish priesthood. They have, however, overshot the mark, and by using language which reminds us of the time when they claimed England as the patrimony of the Holy See, have turned astonishment into disdain and anger. The clergy of the Established Church are directly attacked. Their exertions are treated as worthless; the validity of their ordination denied; and a spiritual jurisdiction for the Pope claimed over the whole realm. Whether suggested by the fascinations of the Church, or the increase of the Roman Catholics, or by any other cause, the object is to familiarise the people with the power of the Pope, and prepare the way for re-establishing amongst us the Romish religion in all its ancient splendour.

The person who has most exerted himself to procure this re-assertion of the Papal authority, and has already reaped the largest profit from it, is his Eminence Cardinal Wiseman, the Archbishop of Westminster recently elevated to these high dignities Next to him are the bishops who have changed the titles and dignities of "Pope's Vicars" for those of full bishops, with territorial distinctions and higher authority over all the Roman Catholics, and over all the trust and other property within their jurisdiction.

It is pleaded that the Pope has divested himself of power which he has conferred on these bishops; but they have been elevated without his being depressed. The officers of the army are raised a degree higher, but the whole army is still under the absolute control of the same commander. He has assumed a new and larger power—not shared with he before possessed amongst subordinates. It is pleaded, too, that the change has long been desired by the English Catholics; but this only means desired by the priesthood, for no lay Catholic could propose an alteration in the spiritual jurisdiction of his infallible superiors. The Irish priesthood, the Chiefs of the English Catholic Church are the parties most gratified by the change, and they can now take as high a rank in the spiritual hierarchy as their brethren in Ireland, or as the clergy of the Established Church in England. They are no longer bishops in *partibus*, but bishops with territorial jurisdiction. The English Roman Catholic Church is placed "amongst the four Churches which, normally constituted, form the splendid regions of Catholic communion." Accordingly, Bishop Ullathorne has been "enthroned" at Birmingham; and his Eminence the Cardinal Archbishop has announced the commencement of his Archiepiscopate by a lordly missive addressed to all the Roman Catholics of the eight counties he governs.

The Cardinal has attained, for the present at least, the height of his ambition. How soon the Papacy may be vacant, it is impossible to foresee; nor are we aware that his Eminence immediately aspires to that. But in the choice of the conclave, if it seek a vigorous Pope, may yet place the tiara on his head. Cardinal Wiseman is now in his 48th year, having been born, as we are informed by a Correspondent, to whom we are indebted for a memoir of his career, at Seville, on August 2, 1802. He is descended from an Irish family, long settled in Spain. At an early age he was brought to England, and sent for his education to St. Cuthbert's College, Ushaw, near Durham. From thence, having gone through the "humanities" with success, he was removed to the English college at Rome, where he distinguished himself by an extraordinary attachment to learning. When only eighteen, he published in Latin a work on the Oriental languages; and he bore off the gold medal at every competition of the colleges of Rome. His merit recommended him to his superiors; he obtained several honours, was ordained a Priest, and dubbed a Doctor of Divinity. He was a Professor, for ... number of years, in the Roman University; and then Rector of the English college where he had achieved his earliest success.

The Cardinal came to England after Le had ... [illegible] ... and in the winter of that year delivered a series of lectures on the Sundays in Advent. From the m ment of his arrival he attracted attention, and soon became a conspicuous preacher and writer on the side of the Catholics. In March, 1836, he vindicated, in a course of lectures—delivered at St. Mary's, Moorfields—the doctrines of the Catholic Church; and gave so much satisfaction to his co-religionists, that they presented him with a gold medal, struck by Mr. Scipio Clint, to express their esteem and gratitude, and commemorate the event. He returned to Rome ... seems to have been instrumental in inducing Pope Gregory XVI. to ... use the Vicars Apostolic in England. The number was doubled; and Dr. Wiseman ... me back as coadjutor to Bishop Walsh, of the Midland district. He was appointed President of St. Mary's College, Oscott, and continued, by his teaching, his preaching, and his writings, very much to promote the spread of Catholicism in England. He was a contributor to the *Dublin Review*, and the author of some controversial pamphlets. In 1847 he again repaired to Rome on the affairs of the Catholics, and no doubt prepared the way for the present change. He was moved on in 1848, but delayed by the troubles which then ensued at Rome.

The Cardinal's second visit to Rome led to further preferment. He was made pro Vicar Apostolic of the London District, in place of Dr. Griffiths, deceased. Subsequently he was appointed coadjutor to Dr. Walsh, transl ted to London, *cum jure successionis*; and in 1849, on the death of Dr. Walsh, he became Vicar Apostolic of the London District. On this Catholic body acknowledged itself indebted for the completion and dedication of the Cathedral in St. George's Fields, described in our Journal of July 19, 1848. It seems, however, to regard his last service as the greatest. "In August he went again to Rome, and held meetings," as he says, "to return [illegible] but "delighted to be commissioned to come back" clothed in his new dignity. His success in negotiating the re-establishment of the Romish hierarchy amongst us in all its splendour, appears to have gratified his Holiness. In a Consistory held on September 30, Nicolas Wiseman was elected to the dignity of Cardinal, by the title of Saint Pudentiana, and was appointed Archbishop of Westminster. Under the Pope, he is the head of the Roman Catholic Church in England, and a member of the Church of Rome.

As a Cardina ... has sworn ... moral as well as spiritual allegiance to the Pope. Whether that will ... at with his allegiance to the Queen, whether he shall himself to be an ... not known yet, but ... has caused of having had removed from the Canon of the Mass the [illegible] which the priest prayed f... He even cut out, it is said, all ... which he considered ... cured, in ... er to change the object [illegible] ... Cardi... possesses great abilities and a ready and fascinat ng eloquence is evident, but we don't whether he be over scrupulous, and we don't know that he has all the qualities of the Roman priests." From his previous success, and his very marked hostility to the English Church, his Holiness could scarcely have nominated a person to the new dignity he has created less acceptable than Cardinal Wiseman to the non-Romish portion of the people. His appointment has carried out an obnoxious partitioning of England in a most obnoxious manner. No statute is, we believe, to exist by the Pope or the Cardinal, but there is an arrogant exercise of Papal power, requiring to be checked by a strong expression of opinion. It is as virtually part of a system, for the last papers we have received from the United States mention that the Roman Church there has been similarly extended to Texas and The Bishop of New York has been consecrated with a grand display.

Cardinal Wiseman is the seventh English Cardinal—if I e can be called English, ... has been born in Spain, and passed the greater part of his life in Rome—since the Reformation. The others are Pole, Allen, Howard, Fo[illegible]s (a son of the Pretender, who was never in England), Weld, and Acton (member of an English family, we believe, long settled in ...

THE FRENCH FLEET ON THE BRIT...

The French fleet, under the command of Vice-Admiral Desclenes, consisting of the *Friedland*, 120, flag-ship of Vice-Admiral; *Valmy*, 112, Rear-Admiral Dubourdieu; *Henri IV.*, 100, Captain De Gueydon; *Jemmappes*, 100, Captain De Varcze, *Inflexible*, 90, Captain De Moulcon; *Jena*, 90, Captain Larrieu; and the *Caton* (steam sloop), Captain Guesnel, which left Cherbourg on the morning of the 26th for Brest, anchored in Torbay on Monday afternoon, between two and three miles off Meadfoot: they left at 4 30 P.M. on Tuesday, the wind [illegible] ... [illegible] ... Cherbourg ... [illegible] ... Their blue, as the ... [illegible] ... mounted a magnificent ... [illegible] ... their royals set ... or crews landed, and a hospitable invitation from Torre Abbey was declined, as the vessels were under orders to sail. A great number of persons visited the ships, and the bay presented a most animated appearance, the weather being very fine, with a light off-shore breeze.

It was rather a novelty to see a French fleet at anchor off the English coast; and Commander Storey, the inspecting commander of the coast guard at Torquay, it would appear, deemed it his duty to visit the Admiral's ship to discover the reason of their visit. He was informed that stress of weather obliged them to seek shelter under Barry Head; but the wind being at the time due north, and the weather moderate, the gallant commander was determined to watch their movements, and to question them.

The ships are stated to have looked in good order and clean, and handled their canvas tolerably quick on coming to an anchor.

Spithead or Plymouth Sound may, on the next occasion, afford them fine weather shelter, and give them an opportunity of seeing what is going on there Had they visited the former place, they would have seen in the harbour, ready for sea, three line-of-battle ships, two of them screw: *Vengeance*, 84; *Bellerophon*, 60; and *Edgar*, 60; the two former with advanced complements, which in the course of half an hour might be fitted up; and a steam-frigate, *Retribution*, 22; and a steam-sloop, *Hecate*, 6; besides a powerful reserve of ships in ordinary.

Had they visited Plymouth, they would have found there two line-of-battle ships, a 50-gun frigate, and a sloop, all in the Sound: namely, the *Albion*, 90, three-fourths manned; the *Rellerophon*, 78, fully manned; and the *Portland*, 50, fully manned; with a good steam reserve in the harbour.

It is as well to mention our strength at the two ports, to guard against mistakes or misrepresentations

The French 90-gun ship *Inflexible*, it is said, will be put out of commission at Brest, and her officers and crew turned over to a 120-gun ship just launched—the *Bayard*.

The Sketch shows the fleet just under weigh, making for Berry Head. The small island in the foreground is the "Thatcher Rock," and Brixham is shown on the extreme right.

FOREIGN AND COLONIAL INTELLIGENCE.

PARISIANA.

(From our own Correspondent.)

PARIS, Wednesday

The apple of discord which was left by Louis Philippe to be chewed by his *ci-devant* subjects, has turned out as unsavoury as the fabled apples on the banks of the Dead Sea, which have a fair and goodly exspples on the banks of the Dead Sea, which have a fair and goodly exterior, but within are ashes. Here, all is discontent and confusion. The *salus populi* is no longer held to be the *suprema lex*; but everything is postponed for the gratification of personal animosities and petty squabblings. It were vain to conceal the fact that the President has of late lost much of his power, popularity, and *prestige*. It was his wont to drive about Paris in an unpretending phaeton. He has now adopted all the appliances and means of state in his equipages; but as he drives up the Boulevards, "qui sait ce que vous boss hien?" and the fleeting cloud of fitful and blue fire, the last resource of the Forcible Feebles, has failed to render the drama in which he has played so prominent a part palatable to the Parisians. The President's chances for the prolongation of his power, are gradually dwindling "to their shortest span," and no statesman is so bold as to prognosticate what will take place during the next twelvemonth. The name of Napoleon seems to have lost its power upon the French people. The Royalist party does not forget that he was a usurper, not as the Republicans forget how he trampled under foot all the liberty as well as the unbridled license which they had obtained by the Revolution. The nephew of the Emperor thus ceases to possess the power of sounding that chord which whilome vibrated throughout France at the bare mention of Napoleon's name.

Masses are being performed in various parts of France, and in nearly all the Paris churches, for the repose of the soul of the late Queen of the Belgians. These religious ceremonies for defunct Royalties must be held as a protest against the Republic, and in that light are they generally regarded. Another religious ceremony has just been performed at the Palace of St. Cloud, when the Prefecture, surrounded by the officers of his household and all the paraphernalia of the Roman Catholic Church, bestowed the *barette* upon the three French bishops whom the Pope has lately raised to the rank of Cardinal. On this occasion the French divest themselves of all the pretensions and prerogative of Royalty. The Cardinals' hats were brought to him on gilded cushions, and were placed by him upon the heads of the kneeling prelates The speech which he delivered on the occasion was, as usual, replete with sound sense and discreet, if not eloquent, observations.

The dramatic world has lost, during the past week, one of its brightest ornaments, Alelie Touzez. One of the most admirable actors of the day has been ... [illegible] ... which will never be filled up. His ... [illegible] ... and unsurpassable solidity were perhaps ... [illegible] ... by our Listen and Keeley. Another heavy blow and great discouragement has also fallen upon the drama during the past week. The Théâtre Historique, in the Boulevard du Temple, is closed. This theatre, which was warmed into life under the brilliant panmage of Alexander Dumas, which was nurtured by a fierce, and propped up by the wit and genius of Frederick Lemaître, now does not find a single person to support it, and has never sought to enter. However, good things are promised us for the coming season. The Italian Opera will open on the 9th of November (Lord Mayor's Day), with Scotzar in the "Sonnambula," and, under Mr. Lumley's auspices, we may look for a delightful series of entertainments. Lord and Lady Normanby are also about to re...ne their private theatricals, which made their house at Florence the resort of all the gay, gratified, and witty; and we hear that the piece to be delivered on the occasion will be the play of "Catherine Howard" will open the dramatic season at the Hotel of the British Embassy. Such is the rumour which has flitted up the Faubourg St. Honoré; but, alas! it is to be feared that the Embassy is shortly to be reduced to a first-rate mission.

FRANCE.

The removal of General d'Hautpoul from the office of Minister of War has not put an end to the unseemly jealousies, bickerings, and disputes which have so long assailed the friends of order, and which have had their origin in the excessive pretensions and impracticable temper of General Changarnier, the Commander-in-Chief of the army of Paris, who considers that his command invests him with a military jurisdiction separate from, and independent of, the supreme control over the army, which of right belongs to the Minister of War. General Schramm, moreover, who has succeeded M. d'Hautpoul, has shown that he knows how to maintain the rights and the dignity of his office, and that General Changarnier must in all things regard him as his superior. The point on which the quarrel between M. Schramm and General Changarnier turned was the removal of General Neumayer from the command of the first military division which constitutes the garrison of Paris—a change which Gen. Changarnier looked on as if it were an affront paid in contempt to the rights as Commander-in-Chief of the Army of the Department of the Seine. The President of the Republic, it is understood, sided with the views of his new minister, Gen. Schramm, who at first was confined to a refusal to sign the Gen. Changarnier's commission that he would accept as a successor to M. Neumayer whatever officer should be appointed by him (Gen. Schramm.) to the post, and a reconciliation was understood on the early part of the week to have been effected between the contending parties. Subsequently, however, the removal of Gen. Neumayer was definitively decided upon by the Minister of War, on the ground that, on the night succeeding the recognition he had attended the military guard at the Tuileries (the Commander's head quarters), subsidising the Gendarmie-Mobile for the ordinary post of National guards, by order of General Changarnier. This act was regarded as a defiance, and as if an intended assistance to the commands of his superior. It was at all events an act of indiscretion, which, it now appears, did not initiate the Minister, and which may indispose the National Guard to the General in Chief. Neumayer has accordingly been removed from the command of ... to the 3rd military division, an official notification of which has appeared in the *Moniteur*; but it is believed that he will not accept that appointment, though it is in some respects a promotion. General Carrelet succeeds him in the command of the division which garrisons Paris. Changarnier has been so annoyed by the affair, that he is stated to have declared, on learning its final upshot, he would have immediately tendered his own resignation, but for the fact that he was morally bound to the National Assembly to remain at his post, unless the President of the Republic should, in the exercise of his constitutional rights, dismiss him. He means to bring the subject before the Assembly at the earliest opportunity on a fit occasion.

A supplementary credit of 109 300f. has been granted to the Minister of Public Worship to defray the expenses incurred by the appointment of three French Cardinals, of whom mention was made last week.

A number of arrests have been made in the city of Lyons, amounting to from 12 to 15. The *Courrier de Lyons* says it is assured that the papers which have been seized prove the existence of a conspiracy which has for its object the overthrow of the present authorities in the southern and eastern departments.

... Some persons have been arrested in Paris, a... ... been connected with the conspiracy at Lyons, among whom is an ... ... one of the treasurers. Others have been arrested at Nancy and Montpelier

Letters from Algiers announce the most disastrous ... [illegible] ... one hundred and fifty persons having ... [illegible] ... last week.

SPAIN.

If a Municipal Council of Paris has recently directed the taking of a detailed account of the labouring population of that city, with a view to ascertain precisely their numbers, various occupations, condition (as to daily earnings, locality of residence and of labour, house-room, &c.), and whether migratory or constantly resident in the city. A great part of the materials have already been collected, and are found to be so far complete as to warrant the expectation that the final result will be a closely detailed and tolerably accurate view of the industrial operations—as well as of much of the revolutionary material of the French capital. The inquiry has been conducted, and the digest of the information obtained is being prepared, under the immediate superintendence of M. Horace Say, whose name is a sufficient guarantee for the bestowal of the care and ability due to such a work.

GERMAN STATES.

The whole aspect of [illegible]land ... the present moment menaces war, but wherefore, it would be difficult to tell, unless it be that the long pending rivalry between Prussia and Austria, to be regarded as the supreme head in all matters relating to the confederation of the German States, is about to receive a bloody solution, as the only one likely to be definitive. The ostensible cause of the present anomalous state of things, is the condition of affairs in Hesse-Cassel. Bavaria and Wurtemburg, backed by the countenance and promised support of Austria, purpose intervening in Hesse with military force, to put down the constitutional opposition of the people to their Absolute Elector; while Prussia declares that she will, even at the point of the sword, oppose force to force for that purpose: she has accordingly advanced an army towards the frontiers of Hesse, amounting to 80,000 men. While within a few days' march of those troops, the Bavarian and Wurtemburg forces, reckoning nearly an equal strength, are reported to act on receiving the word from Austria.

Nothing has yet been done on either side, however, and it is hoped that all will pass over without bloodshed

Within the territory of Austria itself a corps of 60,000 men is being concentrated in and around Vienna, and the necessary instructions have been sent to the Hungarian and Italian regiments for that purpose. Some of the troops are already moving, and the army will be accompanied by 250 pieces of artillery. A large contingent had already arrived from the Italian provinces

Meanwhile the Emperor of Austria, accompanied by his Prime Minister, Prince Schwartzenberg, and aide-de-camp, has gone to take counsel with the Emperor of Russia, who, with the great officers of his empire, is at present at Warsaw.

UNITED STATES

Accounts to the 18th ult., from New York, have been received. The excitement about Jenny Lind had not abated. She had gone on towards Philadelphia, but not, as before, in the company of Mr. Barnum, that gentleman deeming it prudent for his personal safety to leave Boston rather prematurely. The Boston press are loud in their denunciations of Barnum for the manner in which he managed the last concert held in that city. He is accused of selling tickets as many tickets as the hall would hold, of allowing a mob of "promeaders" to enter at one dollar each, not only to the great annoyance, but to the imminent peril of all who had paid respectable prices for the luxury of hearing the fair vocalist. The result, as might be expected, was a "regular row" The windows of the concert-room were "smashed," settees were broken, seats, chairs, &c. overturned, and everything thrown into the most admired confusion. Several ladies fainted, and had to be carried home. Miss Lind's private room, too, was much affected, and shed tears upon the stage. She caused an announcement to be made in her own name, that all who were disappointed should have their money refunded at her hotel, on applying for it. Jenny gave 1,000 dollars to the charities of Boston; and the papers of both New York and Boston now exclaim, "Where is Barnum?"

The largest factory at the Union Works, Maryland, had stopped The rest were to work full time.

We learn from Philadelphia that an extensive robbery had been committed upon the mail from that city, by which money in notes to the amount of nearly 100,000 dollars was stolen. The robbers having extracted from the cars such portion of the mail as suited their purpose, adjourned to an adjoining field, where they "sorted" their booty, and left the letters, taking with them merely the bank-notes and other valuables.

The newspapers state that Sir H. Bulwer had, upon the part of her Majesty's Government, disclaimed all intention of seeking to demand port and other dues in the harbour of San Juan de Nicaragua. The New York papers fear that it will be impossible to induce British capitalists to invest their money in the construction of a canal across Central America, as a private speculation, and urge upon the Governments of both countries to make it an international undertaking.

The excitement respecting the Fugitive Slave Bill is reaching an alarming height. At Detroit a riot had grown out of this excitement, and a strong mob had assembled to prevent the sale of a negro, fearing against the bill had been held, at which the mayor of the city presided.

CANADA.

There is no news of importance from Canada. In Montreal, preparations have been making on a large scale for the Grand Industrial Exhibition, which is to take place on the 17th, 18th, and 19th instant. The specimens of wheat, copper, and forest woods, which will be presented on this occasion, it is believed, cannot be excelled in the world.

The mining companies in the vicinity of Lake Superior are prosecuting their operations with great energy and success. The recent developments both in the copper and iron regions are highly encouraging and flattering character. It is estimated that the rough copper which will be sent down from Lake Superior the present ear will amount to over two millions and a h alf of pounds.

IRELAND.

QUEEN'S COLLEGE, BELFAST.—At the examinations which have just concluded, thirty-eight students have been admitted scholars of th s college. The *Northern Whig* says, "We have the satisfaction of knowing that the liberal principles of the Established Church, the General Assembly, the Roman Catholic Church, and the Unitarian and Methodist bodies."

CONCILIATION HALL AND THE POPE.—At the weekly meeting of the Repeal Association, on Monday, Mr. John O'Connell raised his voice to do battle for the Pope, on the score of his late episcopal nominations in England. He said, referring to the views published by the leading London Journals on the subject, "If a cry be raised against the Catholic Church, round every cry be raised against the Protestant Church? (Hear, hear, and cheers.) In Ireland, at least, we shall do so. Does the Cardinal Archbishop of Westminster send tax-gatherers and bring the force of law to bear upon Protestants and Dissenters to enforce the payment of his dignity? No; he will be supported by the voluntary contributions of the Catholics; he will receive no money under false pretences—he will take no money for services he does not render (hear, hear); and the Protestant Archbishop and the Protestant archbishops and bishops of other sees, are not so, they receive money under false pretences—they exact money for services they do not perform. (Hear, hear.) The Cardinal Archbishop of Westminster, or the other Catholic bishops in England or Ireland, do not enforce the payment of tithes at the point of the bayonet; the life of no widow's son is taken on their account. The soil of Ireland has been saturated with blood in the forced collection of those odious impost, and the Catholic people are still compelled to pay it indirectly, for they cannot get their receipts for their rent until they pay the tithes to the landlord, who has to pay it to the parson in the first instance. We must put an end to this. (Cheers.) We have the country will rally, and meet the cry against Popery by a cry against the Protestant Church establishment. (Hear, hear)"

THE CULTIVATION OF FLAX.—The Marquis of Ormonde and several of the resident proprietors of Kilkenny are about to hold a county meeting, to consider the best mode of promoting an extensive cultivation of flax. A ready much progress has been made in parts of Waterford, Cork, Kilkenny and other counties

The grand mansion of Ennistymon workhouse have drawn up a report, recommending the extension of industrial employment amongst the paupers.

DEATH OF SAMUEL DICKSON, ESQ., M.P. FOR LIMERICK.—In consequence of the death of Mr. Dickson, the seat which took place at his recent election for Limerick, there is a vacancy in the representation of the county of Limerick. The *Limerick Reporter* states that there are several candidates in the field, including Captain Dickson, of Croom Castle, Mr. Gould, and Mr. Fitzgibbon.

WHIPPING IN COUNTY LIMERICK GAOL.—We regret to learn (says the *Limerick Examiner*) that a man rather advanced in years, after being in hospital for some time, was discharged last week, and the next day, and like a boy, before being in hospital also, was similarly treated, and discharged the day after. This, we hope, will be looked to in the proper quarter. The sound of the lash scarcely ever ceases in this prison—the most disgusting and horrible operation on starved, emaciated wretches, many of whom are dying of consumption, &c

TOTAL WRECK OF AN EMIGRANT SHIP.—We regret to announce that another emigrant ship has been totally wrecked on the Gunfleet Sands, in particular, as following so closely upon the barque which the barque *Johanna Frederich*, of 400 tons, Captain Whieting, left Bremen, with 140 emigrants and a crew of sixteen hands. She was bound for Charleston, South Carolina, and, besides her passengers, had a general cargo, valued at 2000 dollars. All went on well until the evening of Thursday week, when the Gunfleet lights were sighted, and, by a fatal error, were supposed to be the South Foreland lights. The ship's course was steered under this impression, when, about nine o'clock, the night being dark and clear, the vessel struck heavily on what proved to be the Gunfleet Sands. [illegible] ... ant consternation spread throughout the ship, and every passenger, [illegible] ... [illegible] ... [illegible] ... [illegible] ... to get her off, but all with no avail, as on the pumps being sounded there was found six feet of water in the hold, leaving no question that the vessel was hopelessly lost. The Captain, who throughout behaved admirably, had a number of ropes passed across the ship, which the passengers grasped in order to maintain their footing. In this way a long and wretched night was spent, all of them expecting that the vessel would every moment go to pieces. At eight the next morning (Friday), they were descried by the crews of several smacks, who immediately went to their assistance. The ship had left Bremen with but little water on board, so that the smacks' boats could not get alongside. The women and children were first lowered from the ship's side, and, aided by several men, waded through the water to the boats, by which they were conveyed to the sands. In this way all were safely taken from the vessel, and 140 of them were ultimately landed at Harwich, the last number of them landing as late as one o'clock on Saturday morning; the remaining passengers (forty in number) were landed at Wivenhoe. The captain and two mate remained on board the barque until four o'clock on Friday afternoon, hoping that the vessel might yet be saved, but as the sea rose she rapidly broke up, and became a total wreck. Messrs. Billinghey and Co., the Bremen vice-consuls at Harwich, paid every attention to the emigrants, Mr. Wilhams, one of the firm, particularly exerting himself. The passengers are very grateful for the way in which they are being treated. It is supposed that they will remain in Harwich until another ship is provided for them. The barque belonged to Messrs. Glogsein and Son, Bremen, and was not insured.—Another emigrant [illegible] ... ry narrow escape; she was from Stockholm for New York; name [illegible] ... She is living in the Wales?

ARMY MEDICAL DEPARTMENT.—We have reason to believe, that, in consequence of the retirement of Sir James M'Grigor, the superintendence of the Army Medical Department will be placed under the War-office, and that the duties will be carried on under the directions of the Secretary at War.

CHURCH, UNIVERSITIES, &c.

THE BISHOP OF LONDON ON THE RE-ORGANISATION OF THE ROMAN CATHOLIC HIERARCHY IN ENGLAND.

In reply to a memorial addressed last week, by a numerous and influential body of the clergy of Westminster, to the Right Rev. the Lord Bishop of London, on the subject of the recent revival of Roman Catholic episcopal sees in England by the Pope, and the nomination of Dr. Wiseman to the Cardinalate, together with the assumption by the latter of the style and title of Archbishop of Westminster, his Lordship the Bishop of London has issued a reply, in which, after characterising the conduct of the Pope in this matter as "a substantial act without precedent," and as "virtually a denial of the legitimate authority of the British Sovereign, and of the English episcopate—a denial also of the validity of the title and an assertion of the spiritual jurisdiction over the whole Christian people of the realm," his Lordship goes on to say :—

"With respect to the conduct proper to be pursued by you on this occasion, it ought, in my opinion, to be temperate and charitable, but firm and uncompromising.

"You will do well to call the attention of your people to the real purport of this open assumption of authority on the part of the Pope in the matter of re-petitioning the Legislature to carry out the principle of the statute, which forbids all persons, other than the persons authorised by law, to assume or use the name, style, or title of any archbishop of any province, bishop of any bishopric, or dean of any deanery, in England or Ireland, by extending the prohibition to any *pretended* diocese or deaneries in these realms.

"It is possible that such prohibitions might not have the effect of preventing the assumption of titles by the Papal Bishops when dealing with those of their adherents; but it would make the assumption unlawful, and it would mark the determination of the people of this country not to permit any foreign prelate to exercise spiritual jurisdiction over them.

"But there are other duties besides those of protesting and petitioning, the performance of which seems to be specially required of us by the present emergency. Unwilling as I am to encourage controversial preaching, I must say that we are driven to have recourse to it by this attempted usurpation of authority on the part of the Bishop of Rome, and by the activity and subtlety of his emissaries in all parts of the kingdom. We are sorely called upon for a more than ordinary measure of watchfulness and diligence in fulfilling the promise which we gave when we were admitted to the priesthood, 'to banish and drive away all erroneous and strange doctrines contrary to God's word.'

"Let us be careful, as well in our public administrations as in our private devotions and exhortations, to refrain from doing or saying anything which may seem to indicate a wish to make the slightest approach to a Church which, far from manifesting a disdire to lay aside any of the errors and superstitions which compelled us to separate from it, is now re-asserting them with a degree of boldness unknown since the Reformation: is adding new *credenda* to its articles of faith, and is undeservedly teaching its members the duty of worshipping the Creature with the worship due only to the Creator.

"Myself, I am much inclined to believe that, in having recourse to the extreme measure which has called forth your address, the Court of Rome has been ill-advised as regards the extension of its influence in this country, and that it has taken a false step. That step will, I am convinced, tend to strengthen the Protestant feeling of the people at large, and will cause some persons to hesitate and draw back who are disposed to make concessions to Rome, under a mistaken impression that she has abated somewhat of her ancient pretensions, and that a union of the two Churches might possibly be effected without the sacrifice of any fundamental principle. Hardly anything could more effectually dispel that illusion than the recent proceeding of the Roman Pontiff. He virtually condemns and excommunicates the whole English Church, Sovereign, Bishops, clergy, and laity, and shuts the door against every scheme of conciliation, save that which should take for its basis an entire and unconstitutional submission to the spiritual authority of the Bishop of Rome

"That it may please the Divine Head of the Church, who is the true centre of unity, and the only infallible judge, to guide and strengthen us in these days of rebuke and trial, to open our eyes to the dangers we are in by our unhappy divisions, and to make us in one holy bond of truth and peace, of faith and charity, is the earnest prayer,

"Reverend and dear brethren,

"Of your affectionate friend and Bishop,

"C. J. LONDON.

"To the Rev. the Clergy of the City and Liberties of Westminster."

OXFORD.

THE UNIVERSITY ROYAL COMMISSION OF INQUIRY.—The commissioners have held three meetings during the last week, and are said to have made considerable progress in their arrangements for taking evidence, &c., but, as the commission has sat with closed doors, the public press has been unable to glean any details of the proceedings which can be relied on. We learn from the *Oxford Chronicle* the inquiry will be conducted partly by written questions, and partly by the oral examination of such persons, acquainted with the university system, as may be willing to give evidence. The heads of houses are said to be divided on the subject of submitting to the commission, the tractarian members of the board being violently opposed to any external interference, but, as it is well known the University Charters preclude the possibility of refusal, it is not likely that the resistance of Puseyite elements will succeed in committing the heads of the university to a collision with the Royal authority

CHURCH UNIONS.—Several secessions from the Bristol Church Union have taken place in consequence of its recent proceedings. One of the seceders is the Rev. J. B. Clarke, Prebendary of Wells, and Diocesan Inspector of Dissenters' schools. The rev. gentleman has addressed a letter to the secretaries, intimating his intention to retire, and makes the following remarks:

I beg to withdraw my name from among the members of the Bristol Church Union, as being unable, even for common purposes, to act with those who systematically speak more or more or less approvingly, of Romish errors, encourage Popish practices and tendencies, and disloyally misrepresent and hamper benefits and measures of the Church of England. I conceive that, after the decision of the last of October, there can be little doubt of union not being more particular members of the Union, but its present influencher and controlling powers

It will be recollected that the principal persons who opposed Mr. Palmer's statement of principles," and to whom reference is made in Mr. Clarke's letter, are Lord Forbes, Mr. A. J. B. Hope, M.P.; Dr. Pusey, Archdeacon Thorp, the Rev. J. Keble, Sir George Prevost, the Rev. Alexander Watson, of Cheltenham, and the Rev. M. W. Mayow. The Gloucester Church Union has resolved :—

That the Church of England was born and still is the object of this union in all faithfulness to submit to the authority of the Bible as her main position, as a real and living branch of the one Holy Catholic and Apostolic Church, on which ground alone she can successfully defend herself against the errors, heresies and unauthorised additions as well of the civil power as of the Romish Church. That the duties to make it the object of the English Church to be built and full of its proper rights, and to adhere faithfully, and without any swerving to all protests made on set forth or necessarily implied, whether against Rome or the civil power, in the Reformation period, this union earnestly calls on Christian people, both of the clergy and laity, to unite and sympathy in such righteous cause, entreating them to consider whether the policy of the State towards the Church (unless timely resisted and checked) can humanly speaking, issue otherwise than in the prevalence of rationalism and unbelief, and in addition tending to the establishment of the Romish supremacy amongst us, and that in some form in which all the errors and evils of the Papal system will be more fearfully developed than they have ever yet been.

The Exeter Church Union has passed the following resolution :—

That, considering the present crisis, and the necessity which exists for Churchmen, acting upon common and definite principles, whilst we repudiate the idea of imposing additional legal tests, we consider it absolutely necessary to declare that our bond of union is contained in the Liturgy, Articles, and other formularies of our Church, framed at the Reformation, and that whilst fully prepared to adopt every constitutional method for the maintenance of that Church which has a claim to our full and hearty support, we wish to be understood as most emphatically denying the claims of Rome to supremacy and to condemning the unauthorised additions to the primitive faith and practice which from time to time have been introduced and made by that system and its adherents.

APOSTOLICAL SUCCESSION OF THE HIERARCHY OF THE CHURCH OF ENGLAND.—At a meeting of the Committee of the London Union on Church Matters, held on Monday, it was resolved unanimously, "That this committee solemnly declares that it considers the present episcopate of the Church of England to be truly and canonically that which was founded by the successors of the apostles, and, therefore, is entitled to the entire and undivided allegiance of the members of the Church of England That this committee having read and considered a recent papal bull, together with an address from Cardinal Wiseman, and, after mature deliberation, is compelled to state that it considers the steps therein set forth, to be an unjustifiable invasion of the Church of England."

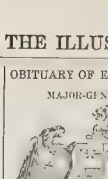
PROVOST OF KING'S COLLEGE, CAMBRIDGE.—It is generally rumoured that the Rev. Dr. Okes, the lower master of Eton School, will be selected to fill the vacant appointment of Provost of King's College. The Rev. Dr. Hawtrey, head master of Eton, has, it is stated, declined to be put in nomination.

PREFERMENTS AND APPOINTMENTS.—*Deanery:* The Rev. Hugh B. McCar, to the deanery of Ossory. *Honorary Canonries:* The Rev. George Hills, in Norwich Cathedral. The Rev. Robert James Bunch, in the Cathedral of Peterborough. *Rectories:* The Rev. Edward Rhys Jones, to St. Anne, Limehouse, Middlesex. The Rev. R. L. Townsend, to Wandsworth, Surrey. The Rev. W. E. Jones, to Garthbeibio, Montgomeryshire. The Rev. E. B. Turner, to Offord Cluny. *Vicarages, &c.:* The Rev. St. John Wells Thorpe, to Manewden, Essex. The Rev. Edward Broadley Burrow, to Evercreech, Chesterfield, Somerset. The Rev. William Agar, to Overseale, Northamptonshire. The Rev. William Tapprell Allen, to Ebbesborne-Wake, Wilts The Rev. Henry Bond Bowlby, to Oldbury, Salop. The Rev. Christopher Cookson, to an Assistant Mastership in the Charter-House, London.

TESTIMONIALS.—The following clergymen have lately received testimonials of affection and esteem :—The Rev. Edward Parker, Incumbent of Holy Trinity Church, Blackburn, by the teachers of the Sunday schools connected with the Rev. H. Lawrenson, from the parishioners of Barkisland, Yorkshire; the Rev. John Davies, on leaving Llanwnog, Montgomeryshire, from his parishioners and friends: the Rev. Alexander Leslie, on leaving St. Luke's Episcopal Church, Dunfermline, from the congregation: the Rev. Dr. Meredith, of St. George's, Kendal, from the congregation; the Rev. Thomas Fell, lately officiating at St. Mark's, Southtown, Yarmouth, from the congregation; the Rev. William Martin Musgrave, of St. Peter, Southwark, from his parishioners; the Rev. Hastings Kendall, late of Eccles hall, Bradford, Yorkshire, from the congregation: the Rev. William Nassau St [illegible] Rolywell Rev. W. E Jones, preferred to [illegible] Yorkshire: diocese Ripon; value, £314 : patrons, the trustees: Rev. E. B. Turner, promoted.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

MAJOR-GENERAL SIR PATRICK ROSS, G.C.M.G., K.C.H.

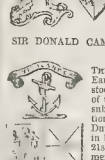


The death of this gallant officer, Governor of St. Helena, occurred in that island on the 25th of August, and has excited deep regret. Sir Patrick entered the army in 1794, served for several years in Ireland, at Gibraltar, Mysore War, and commanded as Lieutenant-Colonel, the 48th Foot in the Peninsula. Subsequently, he was, for a considerable period, in the Ionian Isles, and afterwards held the appointment of Governor and Commander-in-Chief of Antigua, Montserrat, and Barbuda. In 1845 he was nominated to the government of St Helena.

The rank of Major General he attained in 1837, and was invested with the Hanoverian Order, on his return from the West Indies Sir Patrick descended paternally from the ancient and eminent Scottish family of Ross, of Craigie and Innernethie, and, maternally, from the noble House of Panmure; his father, the late General Patrick Ross, was second son of Patrick Ross, of Innernethie, by Susannah Douglas, his wife, daughter of the Earls of Morton. The gallant officer whose death we are recording was born 20th January, 1778, and married 14th April, 1805, Amelia, youngest daughter of General William Sydenham, by whom he leaves issue, sons and daughters.

EMILY HARRIOT, DOWAGER LADY SUFFIELD.

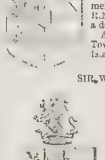
HER Ladyship, who died at Blickling Hall, Norfolk, on the 27th ult., was fifth daughter of the late Evelyn Shirley, Esq., of Eatington Park, Warwick, and granddaughter, maternally, of Sir John Wollaston, Esq., M.D., F.R.S. She was born 20th December, 1799; and became, 19th September, 1826, the second wife of the late Lord Suffield, by whom she leaves issue, six sons and one daughter.



SIR DONALD CAMPBELL, BART., OF DUNSTAFFNAGE, COUNTY OF ARGYLL.

THE Campbells, of Dunstaffnage, descend from Colin, first Earl of Argyll, and since their separation from the parent stock have possessed the estate, and are hereditary Captains of the Castle of Dunstaffnage. The present Baronet, the subject of our present notice, succeeded to the representation at the decease of his uncle, Neil Campbell, Esq., of Dunstaffnage, in 1839, and obtained his patent of Baronetcy in 1836 He was born April 3rd, 1800; and married, June 21st, 1825, Caroline Eliza, second daughter of Sir W. Plomer, of Sunresbrook, Essex, by whom he leaves Sir Augustus, R.N., the present Baronet, born in 1827, three other sons, and a daughter, Laura Isabella.

At the period of his death, which took place at Charlotte Town, Sir Donald was Lieut.-Governor of Prince Edward's Island.



SIR WILLIAM WRIXON BECHER, BART.

Accounts from Ireland announce the death of Sir W. Wrixon Becher, Bart. The son Baronet, the husband of Miss O'Neill, the ever-celebrated actress, was a gentleman of considerable landed property in the county of Cork, where he resided at his seats at Ballygibbin, near Mallow, and Creagh, near Skibbereen. He was the eldest son of the late William Wrixon, Esq., of Ballyvolane, by Mary his wife, daughter of John Townsend Becher, Esq., of Annegrove, and assumed, early in life, in obedience to the testamentary injunction of his maternal uncle, the additional surname and arms of Becher, an assumption confirmed by Royal sign manual in 1831, at the period he was raised to the degree of Baronet by King William IV.

Sir William was born in 1780. His marriage with Miss O'Neil took place in 1815, and by that estimable and highly gifted lady, who still survives, he had three sons and two daughters. Of these sons, the eldest is now Sir Henry Wrixon Becher, second Baronet of Ballygibbin, born in 1826.

WILLIAM BLACKER, ESQ., OF ARMAGH

THE death of this distinguished agricultural writer and economist occurred on the 20th ult., at his residence, in Armagh, in the seventy-fifth year of his age. Mr. Blacker descended from a junior branch of one of the oldest families in the county in which he resided—the Blackers of Carrickblacker. He was third son of the late Rev. Dr. St. John Blacker, Rector of Moira, co. Down, by Grace his wife, sister of Major-General Sir Barry Close, Bart. Engaged extensively, in early life, in mercantile pursuits, he devoted himself at a maturer period to the development of the agricultural and economic resources of the country; and, having ample means and opportunities for carrying into practice, and report from actual experience, results which others merely theorized upon. By his popularly-written "Hints to Small Farmers"—by his Annual Reports, at the Markethill farming dinners, of experimental results—by Essays, several of which carried away the prizes of the Royal Dublin and Royal Agricultural Societies—he managed to spread, not only a spirit of enquiry among the farmers of the country of importance to his country, but to point out and urge into the best and most advantageous course of action, the well-inclined and the energetic

Mr. Blacker was married, and left, we believe, a large family. His loss, as an active, intelligent, and impartial magistrate, and a hospitable and charitable member of the community, will long be felt in the neighbourhood where he resided, and by a numerous circle of friends.

In a previous Number of our Journal will be found a likeness of this distinguished agriculturist.

THOMAS RICHARDSON, ESQ., OF CASTLE EDEN, COUNTY DURHAM.

This gentleman died on the 18th ult., in his 57th year. He was the senior partner in the firm of Richardson and Sons, proprietors of the extensive iron foundries and works at Castle Eden, and at Middleton, near Hartlepool; and lessees of the Wingate Grange and Castle Eden collieries.

The career of this exemplary and excellent individual presents a forcible illustration of what may be accomplished, in a free country, by the combination of intelligence, enterprise, not only a spirit of enquiry into the matters of his own fortunes, and though he lived to no great age, he had raised himself to a position of high consideration and extensive influence in the district in which he lived, and which is chiefly indebted to him for the prosperity it has in latter years attained.

THE RIGHT REV. JOHN INGLIS, D.D., BISHOP OF NOVA SCOTIA

His Lordship, who died in Carzon-street, May Fair, on the 27th ult., in the 73d year of his age, was son of the Right Rev. Charles Inglis, D.D., the first Bishop of Nova Scotia; he received his education at King's College, Windsor, in that settlement, and was consecrated in 1825. He married, in 1802, Miss Cochrane, daughter of Thomas Cochrane, Esq., Member of Council, N.S.

Nova Scotia was the first Colonial See founded by Great Britain, and the diocese includes, besides the county which gives its name, New Brunswick and Prince Edward's Island. The annual stipend is £2400

THE ROMISH SEE IN THE NORTH OF ENGLAND.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR,—In the abstract of the Papal Bull for the appointment of Romish Bishops in England, which is given in the ILLUSTRATED LONDON NEWS of last Saturday, it is stated that the Northern See is to take its name from "Hagglestown." The place intended to be designated is the ancient town of Hagustald, popularly known as Hexham, which ceased to be the see of a bishop more than a thousand years ago. In the earliest ages of Northumbrian Christianity, Hexham was governed by the Bishop of York, but became a separate see before A.D. 685, when St. John of Beverley presided there. In 709, the famous St. Wilfrid died Bishop of Hexham. He was the builder of the churches of Ripon and Hexham; and we are told that there was not on this side of the Alps a church to be compared to the latter edifice. The brief, but illustrious Episcopate of Hexham, terminated in A.D. 821; but a monastery of Augustine canons was founded there in A.D. 1113, whose successors, early in the thirteenth century, built the magnificent abbey church, which still remains, and has been pronounced a model of Early English work. After the Dissolution, it became the parish church. Hexham, formerly a peculiar of the Archbishops of York, has become, in modern times, part of the diocese of Durham.

I am, Sir, your obedient servant,

W. S. G.

THE LATE PROVOST OF KING'S COLLEGE.—The interment of the remains of the Rev. George Thackeray, D.D., late Provost of King's College, took place on Tuesday, in the College Chapel.

WILLS OF EMINENT PERSONS RECENTLY DECEASED.

WILL OF J. H. LEY, ESQ., CHIEF CLERK, HOUSE OF COMMONS.

PROBATE of the will of the late John Henry Ley, Esq., of Trehill, Devonshire, and Richmond terrace, Whitehall, has been granted to the executors—the Right Honourable Lady Frances Dorothy Ley, the relict; John Henry Ley, Esq., the eldest son; the Rev. Henry Ley and William Ley, Esq., the brothers. The effects liable to probate duty were estimated at £50,000.

He has bequeathed his town residence and furniture, with carriages, and lease of stabling, Royal Mews, to his widow, and has appointed her sole residuary legatee. Her Ladyship has a life interest in £11,000, under settlement: original sum, £14,500—£3000 being appointed to his only daughter, the wife of the Rev. Miles Henry Eantargent Somerset, who will also take a further sum of £1800, and the four younger sons, £10,000 equally. His daughter has also a legacy of £3000 under the will, as well as his three younger sons. To his second son, Henry, he leaves his East India stock; and to the daughter of his deceased son William, £5000. The whole of his estates, with the cattle, farms, and land, and the property and furniture, at Trehill, and all investments on mortgage, he leaves to his eldest son.

The will bears date the 9th of August, 1850 only twelve days prior to his decease. He had held office in the House for a period of forty-nine years—the last twenty-nine as Chief Clerk, at a salary of £3500.

CHARITABLE BEQUESTS.—To the Society for Propagating the Gospel in Foreign Parts, there is bequeathed a legacy of £100, by the late Rev. John Macallum, of the Red River Settlement; he has also left £100 to the Church Missionary Society. To the Church Missionary Society £100, and Church Pastoral Aid Society £200, bequeathed by the will of Miss Mary Batt, of Mark, in Somersetshire; also £50 to the Mark National School.

A COINCIDENCE.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

In addition to your remarks, in your Journal for October 26, on the "Murder of the Princes in the Tower," painted by Hildebrandt, I can state the following fact, which may not be uninteresting :—

When Mr. H. was engaged with the painting in question, he went to a linen draper's shop in Dusseldorf to buy some English blankets, in order to copy the same with accuracy. In the course of conversation it appeared that the name of the linendraper was Tyrel, and that he was accustomed to be a descendant from the Tyrell of history. This fact is well known at Dusseldorf

A CONSTANT READER.

IMPORTATION OF HORSERADISH.—A very remarkable importation has just taken place by a vessel from Hamburgh, consisting of the large quantity of 1500 tons of horseradish, grown and sent to order, the produce of the place. So large an importation of this exquisite, which, as a raw vegetable, is not liable to duty on importation into this country, has never before taken place.

FOREIGN POULTRY.—The steam-ship *Triton*, arrived from Ostend, has brought the very large number of 131 cases of poultry of various kinds, the produce of Belgium. These importations from Belgium comprise, we understand, large supplies of rabbits, with which that country abounds, and which form an important feature in the parcelled supplies to the London markets for consumption by the humbler classes of the metropolis.

AMERICAN FLOUR AND PROVISIONS.—The vessel *Andrew Foster*, arrived from New York, has brought 10,186 barrels of flour, and also 110 packages of cheese, and 30 casks of butter. The *Equator*, on the same day, from New York, 8054 barrels of flour, 494 barrels and 507 tierces of lard, and 32 tierces and 46 barrels of general provisions. The *T. B. Wales*, from New Orleans, 2252 barrels of flour; and the *Europa*, from Philadelphia, 604 barrels of flour, 281 hogsheads of bacon, 136 tierces of beef, and 8627 bushels of Indian corn, the produce of the United States of America.

STEAM-BOAT COLLISION IN THE FRITH OF CLYDE.—About noon, on Saturday last, a collision of a most alarming character, though happily not attended with any loss of life, occurred between the *Dantroon Castle* steamer, from the Isle of Skye, and the *Duke of Cornwall* steamer, from Glasgow to Campbeltown, which had just rounded Gourock Bay, and was proceeding in the direction of the Cough lighthouse. The captain of the *Dantroon*, seeing their close proximity, at once rang his bell to warn those in the *Duke of Cornwall* of their danger, but this warning was either unheard or unheeded. Both vessels were approaching each other at full speed, and the *Duke of Cornwall* was about to cross the bows of the *Dantroon*; seeing which, the captain of the latter stopped his engine, and was proceeding to back his vessel, when the collision occurred. The *Dantroon* came on to the *Duke* with fearful violence, carrying away her starboard paddle-box and wheel, disabling her engine, and causing the destruction of the bulwarks of the *Duke*. Both vessels were soon in almost to the water's edge. The passengers were in the most fearful state of alarm, which was only allayed by other steamers (the *Celt* and *Lady Kellburne*) coming up. The *Lady Kellburne* took and took off all the passengers of the *Dantroon*, as also those of the *Duke of Cornwall*. A hawser was afterwards attached to the *Lady Kellburne* and *Celt* from the *Dantroon*, but, although both vessels put on all steam, it was nearly two hours before the *Dantroon* and *Duke* were disengaged, so firmly have they wedged together. Both vessels were heavily laden with goods. The *Duke* was towed into Greenock by the *Celt*, and the *Dantroon*, after having the greater part of her cargo shifted to the stern, steamed up to the Broomielaw.

THE DINNER HOUR IN MANCHESTER.—Messrs. M'Laren and Nephews, of George-street, Manchester, have adopted the system now so much spreading for warehousemen in that town of closing their warehouses on Saturday at one o'clock for dinner, and closing their establishment at five o'clock. Messrs. M'Laren commenced the new system on Monday morning, and, as yet, therefore, it is but a trial; so far, however, as it has gone, they are pleased with the results, and intend to continue it. Messrs. Bateman and Son, of York-street, had previously determined to commence the same period on the 1st of November, for the winter months, with the determination to continue the arrangement, should it be found to work well for the betterment to their interests. Messrs. J. and N. Phillips, of Church-street, are favourable to the plan, but are as yet watching the result of the experiment in progress. Other firms occupy the same position. The firms that have already [illegible] number of warehousemen, by whom the alteration is even now regarded as a boon.

The Lord Mayor and Lady Mayoress gave a grand ball and entertainment on Tuesday evening in the Egyptian Hall, which was attended by between 600 and 700 distinguished visitors. The entertainment surpassed in splendour and gaiety any former assembly during the Mayoralty. The party did not separate until a late hour

The remains of an interesting ancient structure, the old Abbey of Sligo (Ireland), are at present undergoing repair, with a view to the entire restoration, so far as possible, of this beautiful specimen of antique architecture. This work of restoration is in progress at the expense of Lord Palmerston, whose agent is active in seeing that his Lordship's instructions to this effect are strictly carried out. Several of the pillars surrounding the view of this fine structure have been pulled down, and the whole is now enclosed with a wall, surmounted with iron railing, giving a perfect view of the edifice, and the ground inside planted with [illegible]

An impression having taken place from abroad of some models of ships, with rigging and sails complete the importers, considering that they should be classed under the head of models of wood, requested their delivery free of duty; but it appearing that, as such articles, they were liable to duty as a manufactured article, they were directed to be charged with the duty of 10 per cent, *ad valorem* in that manner.

The *Oxford Journal* states that an old lady, who had been deaf for eight years, suddenly regained her hearing by her first trip on the railroad. The sudden shock occasioned by the train passing under a bridge "caused something in her ear to give way," and she immediately found her hearing was restored.

OHIO STATE-HOUSE.

This handsome edifice has lately been erected in the centre of a square of ten acres, in the city of Columbus, the seat of the government of Ohio, one of the states of the North American Union. The dimensions of the building are 305 ft. by 184 ft. It is surrounded by a terrace, 18 ft. wide and about 12 ft. in height. The height to the top of the roof of the rotunda from the ground is 140 ft.

The building contains the Hall of Representatives, 84 ft. by 73 ft.; the Senate Chamber, 54 ft. by 73 ft.; and the Library, of the same size. Each of these large apartments is of appropriate heights, and they are to be finished in the best style of art.

Besides these magnificent apartments, the building includes a Rotunda, 60 ft. in diameter, and 120 ft. in height to the eye of the dome, richly ornamented with cornice, brackets, and panels. There are also rooms for the Circuit Court of the United States, and offices for the Executive, and every department of the State Government, besides those for committees.

The style of architecture is Grecian Doric, of the proportions of the Parthenon. The columns are 6 ft. 7 in. in diameter at the base. The Rotunda is covered with a stone conical roof, designed by Mr. W. Russell West, the present architect of the state. By this form of roof Mr. West has, with great skill and taste, avoided the incongruous arch of the dome, always in bad keeping with the form of the most rigid and the most beautiful of the Grecian orders.

Architects and men of taste, as well foreign as those of America, have pronounced the whole design of this building one of the best adaptations extant of Grecian models to modern purposes.

The materials employed in the building is a secondary limestone, of compact texture, and in colour nearly resembling, at a short distance, white marble

KAH-GE-GA-GAH-BOWH. THE INDIAN CHIEF.

THIS intelligent native Indian, now a missionary minister (the Rev. George Copway), but formerly an Ojibbeway chief, has, of late, excited considerable interest in the United States, where he has endeavoured to obtain from the Government a grant of land, for the purpose of enabling the Indians to form some sort of a settled and permanent residence and position in that country.

The Indian Chief has also greatly distinguished himself by his enthusiastic

KAH-GE-GA-GAH-BOWH, THE OJIBBEWAY CHIEF, SKETCHED DURING THE TEMPERANCE MEETING IN DRURY-LANE THEATRE.

advocacy of Peace and Temperance. It will be remembered that he spoke at considerable length at the late Peace Congress at Frankfort, and he is now in London for the purpose of joining the great "Temperance Movement." At a recent meeting, at the Hall of Commerce, in Threadneedle-street, attired in his native picturesque costume, he addressed the company upon his plan for the re-settlement of the Indians, stating that he had marked out on a map a space of 150 miles square, between the Missouri and Mississippi, at the base of the Rocky Mountains, in the most eligible place, and this proposition had received the sanction of many intelligent persons in the United States. If this tract was given to them, they would settle down as agriculturists, give up their roaming habits, and cultivate the arts of peace.

The Chief also attended a "Great Temperance Demonstration," held in Drury-Lane Theatre on Monday night, where he was greeted with loud cheering. He was attired in the costume of his tribe—a long tunic of gaudy colours, in which red and blue predominated, and which was profusely ornamented with beads and gold embroidery, and red trousers. He commenced his address by observing, that, when he had first delivered a temperance lecture in Rochester, United States, in 1846, at the solicitation of two ladies engaged in the good cause, he considered his good friend, George Cruikshank, should be re-baptised with a straighter name than he possessed since he became a teetotaller. His forefather, no doubt, had got the name because he was a drunkard. (Laughter.) Since he had been reading English history, he had found that Britain grew greater in proportion as people became more and more temperate. There never was, however, a period when temperance was making more rapid strides. It went not, perhaps, with the speed of the electric telegraph, but certainly with the speed of a whirlwind and the thundering of a steam-engine. Reform was written on the sunbeam of the great spirit; and man must be purblind not to see the rays. Millions had been drawn from the gutter by temperance, and washed and made clean, to look as men should look. (Cheers.) He denied that the temperance movement was in a position of antagonism to the Church. They were, on the contrary, absolutely necessary to each other. He then narrated an apologue of a diamond found in the gutter by a poor old woman, and purchased for £12,000; and said that there were many thousand more valuable diamonds to be found every day—men's souls, which still lay in the dirt. It was the business of the society to pluck them from the mire, and to make them worthy of price. Oceans of blood had been shed in this country, through the agency of strong drinks; and the mighty waters of the Mississippi could never equal the tears that drunkenness had caused to be shed by the people. When England, however, should have her eyes and her ears opened to the evils of intemperance, she would turn her eyes to the setting sun, and completely discard the vice which now so deeply afflicted her population. He adverted, in a rhapsodical manner, to the injuries inflicted upon the Indians in North America, by the introduction of "fire-water" among them, and touched on the crimes committed under its influence—fathers slaying their sons, husbands their wives, and mothers their children, when maddened with strong drink. The Indians received the first white men with kindness and hospitality; but the white men requited them by robbing them of their corn, and, worse still, by introducing the destroying "fire-water" among them. He related, with much emotion, a touching incident connected with his own family:—His cousin Mossa had shot a deer, sold it for four dollars and a gallon of rum, and, having drunk all the liquor, was drowned as he endeavoured to paddle his canoe homewards. At the moment, he said, the bones of thousands of his countrymen, killed by "fire-water," were bleaching on the land; but he pledged himself, that, before twenty years should pass, the Indian would prove himself the equal of the white man in temperance, as he was already in forbearance.

At the close of this address, a person named Duncan stepped on the platform, and presented the Indian orator with a bunch of grapes and a *bouquet* of flowers, exclaiming, "I come forward to request my teetotal brother (Kah-ge-ga-gah-bowh) to accept this bunch of grapes, and to receive from me this bunch of flowers, instead of my scalp, which he might have preferred if he had been a drinker of fire-water. I am a teetotal vegetarian divinarian."

The above meeting was also addressed at considerable length by Mr. Lawrence Heyworth, M.P. for Derby, the chairman; by Mr. J. Cassell, Mr. George Cruikshank, and the Rev. W. Foster.

The accompanying Portrait was sketched in Drury Lane Theatre, on Monday evening. A Portrait of the Chief, in the dress he wore at the Peace Congress, at Frankfort, has just been cleverly lithographed by Mr. J. R. Dicksee, and published by Mr. Gilpin, Bishopsgate-street Without.

PERUVIAN MUMMIES.

(From a Correspondent.)

I SEND you some minute details of two Peruvian Mummies, lately sent to Ratisbon by Dr Reid, a physician resident in Bavaria, but a native of Scotland.

Dr. Reid, born at Aberdeen, in the year 1800, went, at an early period of his life, to the Scotch College at Ratisbon, where he completed his so-called gymnasial studies, and formed acquaintance with a large number of the inhabitants. Amongst the rest he contracted a very friendly alliance with a Dr. Schuch.

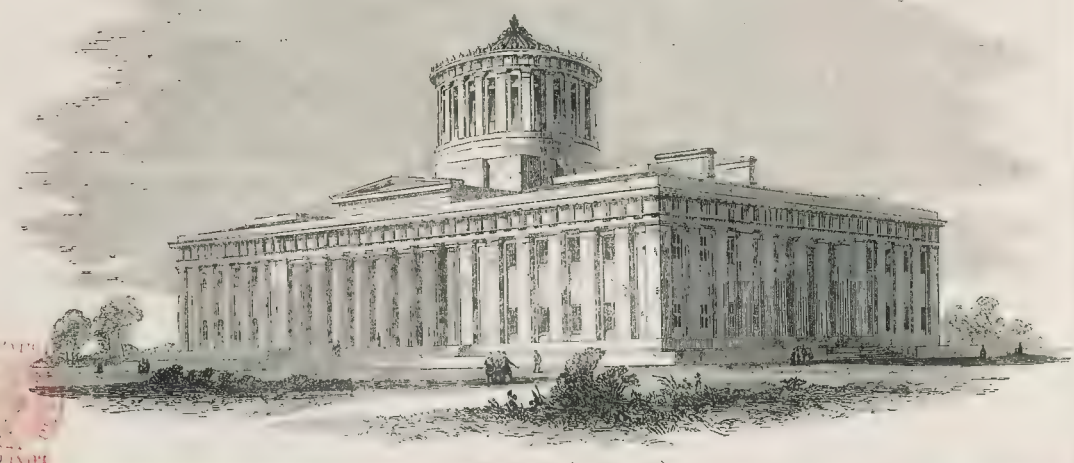
For more than twenty years Dr. Reid has been wandering the world in all directions, and has met with most singular adventures. Lately, when in Valparaiso, he was appointed Inspector-General of the Military Hospitals in Bolivia. On his journey thither he visited the table-lands of the Andes; and there, in the deserted Inka citadel called Lasana, he wrote two letters to Dr. Schuch. From these letters the following details are extracted:

PERUVIAN MUMMIES.

"Four days after my departure from Valparaiso I reached Cobija, a small, wretched hole. The bay is scarcely worth the name; the water a tincture of copper, saltpetre, and other similar substances. The inhabitants are poor and ignorant. After an interval of two days I resumed my journey, with a guide, and mounted on a mule.

"The road leads along the coast a distance of two *leguas* (twenty of which are in a degree), and then turns eastward. The shore is covered with rough sand and heaps of huge stones, which have been precipitated from the hills by the numerous earthquakes so frequent in this country. The first line of mountains, which at a distance of nearly 1000 paces runs parallel with the sea, rises to a height of 4000 feet. From thence the road leads up a deep ravine—the bed of a dried stream; and, after travelling from four to five leagues, I was on a table-land of the Andes—the desert of Atacama. It is difficult to give even an adequate description of this wilderness. Imagine an immense wave-like plain, where there is no sign of life, not even an insect or plant to be seen; where the small crust of earth consists of calcined matter, saltpetre, and chalk; where a fine chalk-dust and a dazzling refraction of the light hurt the eye; where the death-like silence is broken only by the moaning of the wind, where the only sign of its having been once blessed with the presence of living beings, are mummies of men, horses, and mules—for here nothing corrupts—and thus you will have a faint picture of the desert of Atacama. After a march of four days, I reached Calama, a colony situated on the borders of an immense bog. From this bog springs a river, which, under the name of Lao, forms, near the coast, the boundary between Bolivia and Peru. Two days' journey from Calama lies an old Peruvian burial-place, called Chin-Chin. The bodies are there in a semicircle, to the number of 500 or 600—men, women, and children—all in a sitting posture, staring vacantly forward, and partly decayed, partly covered with sand. One imagines himself altogether in another world, and asks, 'What seek you here?' The general opinion is, that these bodies *were buried* here, but it is most probable that they buried themselves. For, in the first place, there is no place near where they could have lived; and, secondly, there are amongst these mummies several women with sucklings at their breast. Lastly, the fact of their being all in the same position, and with an expression of pain, which is yet visible on their countenances, may serve to shew that these miserable creatures withdrew themselves from the ravages of the Spaniards, and, in despair, sought death in this awful wilderness. Besides, there is, not far distant, on the borders of the desert Tucuman—a place called, in the Peruvian tongue, 'All is lost!'"

A large natural basin of fresh water has been discovered at Turk's Island (*Barbadoes*), in a cave several feet below the surface.



THE TAFT-HOUSE, OHIO.—(SEE NEXT PAGE.)

"LANDGRAVE," WINNER OF THE CAMBRIDGESHIRE STAKES AT NEWMARKET.

GLEN TILT.

We this week present our readers with a view of Glen Tilt, in the domain of the Duke of Athol, sketched from near the Marble Lodge.

A defence of the Duke of Athol in shutting up Glen Tilt, and devoting what was once a public thoroughfare to his private purposes as a breeder of deer and grouse, has been published by a gentleman who describes himself as the Duke's agent. This gentleman denies that the Court of Session has as yet decided the case against the Duke, and that it has decided it at all; and from the explanations into which he has entered, we are bound to believe that the facts are as he represents them. An appeal is still pending; and, until the House of Lords decide against him, the Duke, in the exercise of what he considers to be his legal right, is determined to uphold his title to the Glen, and to treat all intruders who enter it without his permission as trespassers. We are, therefore, not to consider the Duke, in this respect, as a law-breaker, but merely as a man vindicating the rights of property. So far, so good; but this explanation does not exculpate the Duke from the charge originally brought against him. There was a road through the Glen before the Duke was born, or his father, or his grandfather, before him; and though he may have—which we very much doubt—a legal right to close it, the charge of churlishness, and a want of sympathy with the public feeling, still remains, and that charge is a serious one. Surely his wild glen—even if it be his own to the uttermost inch, or fraction of an inch, of rock and wilderness within its boundaries—would be none the worse if an occasional traveller were allowed to admire it without taking out a passport! The Duke might at least be amiable, and take cognizance of the existence of the travellers of England and the people of Scotland until his law-suit was decided. The example set by those princely-minded noblemen who, like the Duke of Devonshire and others, are not afraid of any desecration from the feet of plebeians, is worthy of imitation, even on the other side of the Tweed. The potent chieftain of Glen Lyon and Glen Tilt should remember that there is equity as well as law in Great Britain; and that in all the preliminary stages of the action brought against him, the court has been adverse to his pretensions. Besides this, he raises questions which, if he were wise, he would suffer to sleep; for in our crowded isles it may fairly be asked if any proprietor of land have a moral right to enclose a district as large as a county, and make a wilderness of it? After all is said, even peasants, to say nothing of tourists, have somewhat superior claims to those of the deer and the grouse upon the regards of a

GLEN TILT, NEAR THE MARBLE LODGE.

British legislator. The season is so far advanced, that, in all probability, his Glen will be as silent and gloomy as he or his deer can desire, until the fine weather of 1851; but, in the meantime, if he would waive his strict legal right, if he have it, and open Glen Tilt in June or May to the feet of those who love the landscape, as well as to those of the passing shepherd, he would do a graceful deed, and entitle himself to rank with the English noblemen who are not afraid of the people, and whom the people in return are proud to honour.

NATIONAL SPORTS.

In the days of exclusiveness the racing season would have terminated with the Houghton Meeting; times, however, have changed, and everything connected with the turf, as well as other sports, is now so completely on the "go-a-head" principle, that we shall scarcely get through the "legitimate" calendar before December. We doubt the policy of extending the season beyond the last week in October, and should be glad to see the three Newmarket meetings fixed a few days earlier. For next week the grand *réunion* will be on Epsom Downs on Tuesday, with every prospect of good sport. On the following day the steeple-chasers will have it all to themselves over the same country, but improved on last year. These are the only appointments.

The coming fixtures are numerous, as the following list will show:—*Monday:* Workington. *Tuesday:* Belford, Barton-upon Humber, and Midlothian. *Wednesday:* Herbertstown (Ire-and) and Cardington. *Thursday:* Glossop, Brampton, Lytham, Wolverhampton, and Morpeth. *Friday:* Altcar.

BETTING AT NEWMARKET.—THURSDAY.

MUSKEY STAKES.

6 to 1 agst Fugleman's dam	8 to 1 agst Bam	10 to 1 agst Truth

NEWMARKET HOUGHTON MEETING—MONDAY.

HANDICAP SWEEPSTAKES of 25 sovs each.—Col. Peel's Hardinge (Flatman), 1. Lord Exeter's Gardenia (Norman), 2.

FORFEIT CLASS of HANDICAP SWEEPSTAKES of 10 sovs each.—Duke of Rutland's St. Ann (W. Boyce), 1. Mr. Greville's Diligence (Charlton), 2.

HANDICAP PLATE of £250. Duke of Bedford's Bordeaux (Collins), 1. Mr. Fenwick's Woodlark (W. Treen), 2

The CATTERICK STAKES of 30 sovs each.—Mr. Osbaldeston's c. by Touchstone (G. Simpson), 1. Sir J. Hawley's Conscience (J. Marson), 2.

SWEEPSTAKES of 10 sovs each.—Major Martin's The Swede (W. Abdale), 1. Duke of Richmond's Pic.-pkboy (Flatman), 2.

TUESDAY.

The weather to-day was remarkably fine, and the arrivals numerically commensurate with the interest created by the Cambridgeshire, the only race on the card of any real importance.

HANDICAP PLATE of £100.—Mr. Jaques's Chantrey (Flatman), 1. Mr. E. W. Hobson's Gladsole (J. Osborne), 2.

The CAMBRIDGESHIRE STAKES of 25 sovs each, with 100 added

Mr. Gratwicke's Landgrave	.. .. ..	(Chapple) 1
Duke of Bedford's Bordeaux	.. .. ..	(Collins) 2
Mr. Combe's Trouncer	.. .. ..	(Rogers) 3

Betting: 5 to 2 agst Landgrave, 7 to 1 agst Trouncer, 10 to 1 agst Bordeaux. From half way between the Duke's Stand and the ending post the race was left to Bordeaux and the favourite; the latter challenging ten strides from home, and winning a fast and well-contested race by a head, Bordeaux beating Trouncer by two lengths. Run in 2 mm. 4 sec. It is singular that the same number started for the Cesarewitch, and the same jockey rode the winner.

FIFTY POUNDS. Mr. B. Osborne's Emily Ann (W. Carroll), 1. Mr. Rogers's f. by Theon (Skaggles), 2.

WEDNESDAY.

SWEEPSTAKES of 10 sovs each.—Mr. Armstrong's f. by Amarino, out of Earthing (A. Day), 1. Mr. Osbaldeston's Skin Pas (G. Simpson), 2.

HANDICAP SWEEPSTAKES of 10 sovs each.—Captain Liddell's Truth (J. Evans), 1. Mr Merry's Pierre de Touche (Whitehouse), 2.

SUBSCRIPTION PLATE of £50.—Col. Peel's Longinus (Flatman), 1. Duke of Richmond's Antigone (Collins), 2.

HANDICAP PLATE of £50. Mr. Payne's Glauca (Flatman), 1. Mr. Snewing's Heroine (J. Osborne), 2.

SELLING HANDICAP SWEEPSTAKES of 15 sovs each. Mr. J. Bay's Mignon (Wreakfield), 1. Mr. Payne's Crucible (Flatman), 2.

SWEEPSTAKES of 10 sovs each.—Mr. Eddison's Eliza Middleton (Whitehouse), 1. Mr. H Frankum's Catalan (Pettit), 2.

THURSDAY.

SWEEPSTAKES of 10 sovs each.— Gladiole, 1. Woodlark, 2.

SWEEPSTAKES of 50 sovs each.—He-se Homburg, 1. Christina, 2.

SWEEPSTAKES of 10 sovs each.—Ingratitude, 1. Bacon, 2

HANDICAP SWEEPSTAKES of 15 sovs each. Hippogriff, 1. F by Venison, out of Tarn Wadlin's dam, 2.

The GLASGOW STAKES. A dead heat between Hernandez, Brother to Drakelow, and Aristo. Deciding heat: Aristo, 1. Brother to Drakelow, 2.

SUBSCRIPTION PLATE of £50. Tophuns, 1. St. Rosalia, 2.

CALENDAR FOR THE WEEK.

SUNDAY, November 3.—23rd Sunday after Trinity.
MONDAY, 4. William III. landed.
TUESDAY, 5.—Gunpowder Plot.
WEDNESDAY, 6. St Leonard.
THURSDAY, 7.—First *Gazette* published, 1665.
FRIDAY, 8.—Milton died, 1674
SATURDAY, 9.—Lord Mayor's Show first instituted, 1453.

ON THE 5TH NOVEMBER WILL BE PUBLISHED, PRICE 1s.,

THE ILLUSTRATED LONDON ALMANACK FOR 1851;

Being the Seventh Annual Issue of this most beautifully embellished and useful Almanack. Illustrated by Eminent Artists. The Notes of the Month, By THOMAN MILLER; besides a variety of new and useful Tables, &c. The Astronomical Department by JAMES GLAISHER, Esq., F.R.A.S., and of the Royal Observatory, Greenwich.

Published by WILLIAM LITTLE, 198, Strand, London.

*** Country orders supplied for Cash only.

THEATRE ROYAL, DRURY-LANE. M. JULLIEN'S GRAND BAL MASQUE will take place NEXT THURSDAY, NOVEMBER 7th, 1850. M. JULLIEN has the honour to announce that the GRAND ANNUAL BAL MASQUE will this year be given previous to the commencement, instead of at the termination, of his Concerts, and will take place NEXT THURSDAY, NOVEMBER 7th, 1850 (the Concerts not being given on the following Friday).

M. JULLIEN begs to state that the success attending the first of the great increase in the number of BAL MASQUES since he had the honour of inaugurating them into this country, the patronage conferred on them by the Nobility and Gentry is a sure evidence of the immense attraction of such Entertainments—of the splendour and completeness with which they have been prescribed—and, above all, of the manner in which they have been conducted.

It has been generally allowed, that, in the Decoration of these Balls, they have surpassed all other Entertainments of a like kind; but the one here announced being given at the commencement, instead of at the termination of M. Jullien's Annual Series of Concerts, the Decorations will be entirely new, and be ready for the First Time next THURSDAY, November 7th. In addition to this will be displayed the magnificent and novel CRYSTAL CURTAIN, which was exhibited on the Evening only last year, viz. that of the Bal Masqué, and which created an universal surprise and admiration

M. Jullien abstains from giving any further description of the Decoration, but begs to assure his patrons that they may rely on witnessing one of the most splendid combinations of Decorative Effect ever created.

The ORCHESTRA will, as heretofore, be complet—ond consist of ONE HUNDRED and TEN MUSICIANS. Principal Cornets—a-Piston, Herr KÆNIG

Conductor—M. JULLIEN

The New and Fashionable Music of the present Season will be played, and includes several New Polkas, Waltzes, Marches, Quadrilles, composed expressly for the Nobility's Balls, Almack's, &c., by M. JULLIEN.

The price of Admission for SPECTATORS (for whom the audience portion of the Theatre will, as before, be set apart) will be as on former occasions, viz.—

Dress Circle	.. .. ..	.. 5s.	Lower Gallery 2s
Boxes	.. .. ..	.. 3s.	Upper Gallery 1s

Private Boxes from £3 3s upwards.

Persons taking Private Boxes will have the privilege of passing to and from the Ball Room without extra charge.

Tickets for the Ball, Pieces and Private Boxes, may be secured on application to Mr. O'Reilly, at the Box office of the Theatre, which is open from 10 to 5. Private Boxes may also be had of Mr. Mitchell's, Old Bond-street; Mr. Sams', St. James'-street, Mr. Olivier, Mr. Ackroft, Messrs. Hammond and Co., Mr. Chappell, Mr. Addison; Messrs. Cramer, Beale, and Co.; and at Jullien and Co.'s Musical Establishment, 214, Regent-street

The Doors will be opened at Half-past Nine, and the Dancing commence at Ten

Shirtfet, Carriage, Water, Coffee, Tea, and Ices under the superintendence of Mr. G. Payne, will be supplied during the evening, and at One o'Clock a Supper will be served

Mr. T. Nathan, 6, Old Cavendish-street, Leicester-square, is appointed Costumier to the Ball Dresses can be obtained at his Establishment.

Persons in Fancy Dresses, Harlequins, or Pantaloons will not be admitted

M. JULLIEN'S ANNUAL SERIES of CONCERTS. FOR ONE MONTH ONLY.

M. JULLIEN has the honour to announce that his ANNUAL SERIES of CONCERTS will COMMENCE at the THEATRE ROYAL DRURY-LANE, on FRIDAY NEXT, November 8.

M. JULLIEN'S GRAND ANNUAL BAL MASQUE will take place on the 7th, at the CONCERT MONUMENT, instead of at the TERMINATION, of the CONCERTS and will take place on THURSDAY NEXT, November 7

For Particulars see Advertisements

PRINCESS' THEATRE.—On MONDAY, NOV. 4, will be performed HAMLET Hamlet, Mr. C. Kean; Ophelia, Mrs. C. Kean. After which, SENT TO THE TOWER. To conclude with the CALIPH'S CHOICE.—TUESDAY, the MERCHANT of VENICE, &c.—WEDNESDAY, the WILD'S SERPENT &c. THURSDAY, the STRANGER, &c.—FRIDAY, MERCHANT of VENICE, &c.—SATURDAY, the New Play of the TWO MUSICIANS.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager, Mr W. THE GREAT EXHIBITION PALACE.

ON SATURDAY, NOVEMBER 16, will be published, with the ILLUSTRATED LONDON NEWS, a SUPPLEMENT, GRATIS: containing about 12 Engravings illustrative of the progress of the GREAT BUILDING in Hyde-park; also, a full Report of Mr. Paxton's Lecture, to be delivered at the Society of Arts, on the 13th inst., containing his own history of his wonderful structure; the rapid progress of which, and the intense interest attached to the subject, will, it is expected, render this extra sheet highly acceptable to the readers of the ILLUSTRATED LONDON NEWS.

TO CORRESPONDENTS.

BETA, Monmouth—The first polka that appeared in England was that published in the ILLUSTRATED LONDON NEWS for ———

BOOKWORM—Messrs Hetherington and Stonemen's address is Paternoster-row

CONSTANT SUBSCRIBER. The arms of Richardson are, "Or on a fesse az. between a bull's head, erased in chief, and a galley her oars erect, in saltire, in base sa., a saltire couped arg. *Crest:* A demi-arm erased, couped at the shoulder, proper, brandishing a broadsword, all ppr"

MARLINESE.—The motto to the Hanken arms is "Fortiter et recte." The coat is registered in Edinburgh. No one is entitled to use arms unless he obtains a grant himself, or can show descent from some ancestor who had the right

ONE OF THE FAMILY.—The arms authorised as borne by the Cakes family are either of foreign origin, or else have been planned and arranged by some one of the name well versed in heraldry

REMEDIUM.—The family of Moorhouse bears—"Or a saltire gobonated sa. and arg. *Crest:* A pelican vulning herself ppr."

CLERICUS.—Lent falls on III ' The 19th March. 755

CHRYSTON.—The arms of Ward, originally De la Ward, of Derbyshire, were "Vair, arg. and sa."

G. H. Wolverhampton.—We have not the work referred to, but doubt if the information required by our Correspondent. "Hart's Annual Army List" affords a portion

LEMUEL.—You must refer to Johnson's "Dictionary of Arms"

MAUD.—Washbourne's "Book of Notices

A CONSTANT READER.—The arms of London of Alnye. In Norfolk, are—"Arg three cross crosslets fitchy between two bendlets gu."

E. F. R.—The arms required are—"Arg on a bend gu. three crescents of the first. *Crest:* A hand vambraced az. issuing out of a cloud ppr."

O. G. O.—The average rate of the interest of money must be first ascertained: it then becomes a question of comparative interest: the duration of the loan to be shortened by the use of annuities. The fee to an attorney for drawing such a deed is £5, or one guinea

N. B.—Subject 1. "Peter—II story of England"

A LOVER OF SCIENCE.—The work in question is not of high literary repute or authority

BRADFORD, WILLIAM.—Mr. Bradford was a working mason, very recently, at Brighton

J. H.—Into the paper on spectacles in a late number of the "Quarterly Review"

W. B. Leicester.—The length of the two oars of each rabbit

P. H. R. Dover.—We shall be glad to see the letter

F. B. M.—His details have not appeared in our Journal, and the MS has been returned

ORIGAL.—It is not known

G. S.—The price of the "Handbook of Anatomy for Artists" is 24s.

W. T.—The lofty tube upon the side of the Great Exhibition Building in Hyde-park have been built over unfinished, the transept roofs providing for them

G. B, Wednesday.—The opening of the great "Crystal Palace" did not take place on the 6th ult though such an event of much interest, it had been anticipated as an Engraving of the Statue in the ILLUSTRATED LONDON NEWS for Nov 20, 1847

P. B. Liverpool, per Post Office Order.—Received

J. N. should advertise that he will sell the clothes, &c., unless the demand be paid within a given time

BETA.—"The least of reason and he flow of soul."—*Pope*

PALATTE. We are not aware of any painting on silk paper

W. E. Apply for the latest and best work on Bridges to Mr Weale, Architectural Library, High-street

CRACK.—See Scratcher on Lithography, and Jackson on Wood Engraving

M. M.—The monument to General Sir John Moore on the ramparts of Corunna was erected by the inhabitants of that city

J. K. Worcester.—We do not know the whereabouts of Berman's Bust of Charles I.

T. P. E. Manchester.—We do not feel entitled to give the information required

N. W is welcome to the permission, if it be acknowledged in the catalogue

P. W. S.—To take sittings at Divine Service in Westminster Abbey, permission must be first obtained from the Dean of St. Paul's. Anthem books may be had of Mr. ——, Dean street, Soho

JUVENILE, Shoe.—Is thanked for his letter; but the subject is not sufficiently popular for the publication to be worth while

G. T. Dalkeith.—Received

ANON, Aberdeen.—Declined with thanks

ZETA.—The ch in Perche (Gallic) is as in ———. Lesbia pronounced as Lesbia

BOOKS, &c. RECEIVED DURING THE WEEK

The Herbert.—The Romance of War. Illustrated Duties of the Officer in Time of ——, &c. society of Agriculture. XVIth Report. Cooke's Universal Pronouncing Dictionary. Dr. Cook's Hand-book of Health. Jarman's Western Antiquary.—The Cook's Oracle.—Sir Walter Scott's Life of Napoleon.—Mr. Mole—Observations on Cheese-making.—Letter on Mr. Mole Police.—Letter of the greenwood hower.—A Letter for the clergy. The Lament Shaw, Donald's Daughter

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 2, 1850.

THE Prince who holds the delicate and difficult position of husband of the Constitutional Sovereign of these realms must walk warily. His slightest acts are noted. His most trivial words are weighed in the balance of the keenest criticism. He must not be too timid, or he will be voted a nonentity. He must not be too bold, or he will be considered presumptuous. He must not shun public notice, or he will give offence. He must not court it, or he will excite the alarm, if not the ill-will of a thousand conflicting interests, both of sects and parties. He must not be a politician, lest he bring danger or discredit upon the Royal name, so undissolubly linked with his own; and, if he be not a politician in these times, he incurs the imputation of insensibility to all the great and important questions which agitate the world, and urge the nations onward in their career, from the semi-civilization in which they now exist into a civilization more advanced and useful. It is the rare merit of the accomplished and amiable Prince, who, to borrow the phraseology of Lord Carlisle, "is at once the subject and the gentle Lord of the fair hand" which rules a wider dominion than ever acknowledged allegiance to the ancient Cæsars, to have avoided all dangers, either of doing too little or too much, and to have understood his position thoroughly, with all its duties and delicacies, and to have so conducted himself upon every occasion as to win and retain the esteem of all parties and classes of men. For what he has left undone, as well as for what he has done or attempted to do, he has alike entitled himself to the respectful attachment of the many, and to the generous admiration of the abler few, who can appreciate more thoroughly than the multitude the judgment and the discretion, no less than the eminent ability, which he has displayed. At every successive appearance of his Royal Highness before the public, he has exhibited qualities which the English people know thoroughly how to appreciate. He is always unobtrusive, and always strictly constitutional; but ever as bold and decided as the occasion demands. While his auditors cannot fail to admire his talents and acquirements, they find, upon deeper reflection, that there is something about him which they love and esteem still more—and that is, *heart*. The invariable praiseworthiness and utility of the objects to which he lends his high name, render his zeal the more graceful and appropriate; and his kindly appreciation of others is not more remarkable than his strong common-sense and evident sincerity in all he undertakes or says. His last appearance, at the interesting festival at York, exhibited in a new and favourable light all the good qualities for which the people have learned to esteem him. Whether he spoke of the character of Englishmen, among whom his lot has been cast—of the Great Exhibition, which he planned—of the benefits which it is likely to produce—and of the loss which the country has sustained in the premature death of the great statesman whose last act of public duty was to take part in the deliberations of the Commissioners whose labours have brought it to its present position, his sterling sense and goodness of heart were conspicuous. His tribute to the memory of the late Sir Robert Peel was as just and generous, as his estimate of his character was true. In one sentence of a few words, his Royal Highness pourtrayed the mind, and epitomized the career, of the most practical and safe statesman of this or any preceding age: "He was Liberal from feeling. But Conservative from principle." In those words the Prince Consort presented us with the key which unlocks the mystery of Sir Robert Peel's career, from the first act of his public life to its last. Not less happy was his subsequent assertion, that to Sir Robert Peel "all the difficulties and objections occurred first; but that, having anxiously considered them—paused, weighed, and warned against rash resolutions—having convinced himself that a step was not only right to be taken, but of the practical method of safely taking it, it became him a necessity and a duty to take it." These sentences are a summary of the political history of the man who opposed and conceded Roman Catholic Emancipation and the Repeal of the Corn-Laws. Such a mind could do no other than oppose at first, and concede afterwards; and although the same solution of the apparent contradictions in Sir Robert Peel's character has been given before, it was never so well and so tersely put before the public mind as in these few words of Prince Albert. If we may imagine, as we are entitled to do, that his Royal Highness spoke on this occasion for one who is not allowed by the forms of the constitution to give utterance to her own sentiments upon the characters of the men who are imposed upon her as ministers by Parliamentary majorities, the tribute to the honesty and purity of Sir Robert Peel assumes additional importance, and will acquire additional weight in the estimation of the family, the colleagues, and the supporters of the lamented statesman, and in the opinion of the country. The tribute was well-earned, and is justly due; and though it reach not the dull cold ear of "death," will fructify in the minds of the living, and cheer the rising generation of statesmen in the ardours and too often thankless career which lies before them.

His Royal Highness, with a no less happy appreciation of the national character than that displayed in his mention of Sir Robert Peel, stated "that he was pleased when he saw the plan of the Exhibition of 1851 undergo its ordeal of doubt, discussion, and even opposition." He felt that, if it had been "an empty theory, it would have fallen to the ground during this period of probation;" that, if "it survived the trial, it would be on account of the practical qualities contained in it;" and that "its adoption in the end would entirely depend on its harmonising with the national feeling, the historic development of the country, and the peculiar nature of its institutions." His Royal Highness, as we learn from the subsequent speech of the Prime Minister, persevered in the project when opposition was at the strongest, and was not to be discouraged by adverse criticism. The result cannot be but as satisfactory to his feelings as it is creditable to his judgment. The project has triumphed over ignorance, misconception, absurd jealousy, and misrepresentation of every kind; and will rank among the most useful achievements of our age. Its success will be as widely and beneficially felt; and the roots of the good example and cordial emulation of 1851 will extend far into the soil of future years, and produce good fruits of peace, civilisation, and industry.

One great lesson has already been learned by the working-classes of this country in connexion with this scheme. Too many of them were formerly disposed to deny all merit to other labour than the labour of the hands, and to imagine that the rich and the wealthy did no work. The example of Prince Albert has already proved to them that there is a joy in work which makes men of all ranks and classes labour as hard, though in a different way, as the "horny-handed" mechanic. The Prince Consort—without any other inducement to labour than the necessity which all healthy-bodied and healthy-minded men feel to have something to do, and the earnestness inspired by a good cause—has for the past year laboured as assiduously as any hard-working professional man in the country. The working-classes, ordinarily so called, begin to see that they are not the only workmen, and that the absence of labour is a greater curse than its presence. All men must perform their work, whatever be their station; and it is only the foolish, or the imperfectly constituted in mind and body, who declaim against it; and it is not the least of the merits of the approaching Exhibition, that it will be at one and the same time the vindication and the apotheosis of hard work. The working classes feel this already, and are all the better for the knowledge.

COURT AND HAUT TON.

THE COURT AT OSBORNE.

His Royal Highness Prince Albert, attended by Colonel the Hon. C. Grey and Lieut.-Colonel Seymour, reached Osborne, on his return from York, about half-past three o'clock on Saturday afternoon.

Her Majesty and his Royal Highness, and the Princess Royal, and the ladies and gentlemen of the Royal household, attended divine service on Sunday morning, at Whippingham Church.

There has been no addition to the Royal dinner circle during the week. Her Majesty and the Prince Consort, with the Royal children, have taken their accustomed daily walking exercise.

The Court left Osborne for Windsor Castle yesterday (Friday).

The Prince of Wales's birthday will be celebrated at Windsor Castle on the 9th instant.

His Royal Highness the Duke of Cambridge has left town for Ireland.

The Duke and Duchess of Leinster have arrived on Carlton House-terrace from a tour on the Continent. The Duke and Duchess will shortly leave town on a tour of visits, preparatory to going to Carton House for the winter.

The Duke and Duchess of Richmond have been lately surrounded by a select circle of friends, including the Earl of Aberdeen, Colonel the Hon. Alexander Gordon, Sir James and Lady Ann Mackenzie, Sir William and the Misses Young Gordon, Mr. Bailey Cochrane, M.P., and Mrs. Cochrane. The Earl and Countess of March and Lord Henry Gordon Lennox have left Gordon Castle for the south.

The Duke and Duchess of Sutherland and the Ladies Leveson Gower have left Dunrobin Castle, North Britain, for Trentham Hall, visiting the Duke and Duchess of Argyll, at Inveray Castle, and Lord and Lady Blantyre, at Erskine House, *en route* to the south.

His Excellency the Brazilian Minister has returned to town from his short absence on the Continent.

Viscount and Viscountess Eastnor arrived at Eastnor Castle on Saturday, the 19th ult., from Highclife, the seat of Lady Stuart de Rothesay, where they have been sojourning since their marriage. They were received, about two miles from the Castle, by nearly two hundred of Earl Somers' tenants, well mounted. The noble pair were loudly cheered as they descended from their carriage. The tenants, having partaken of the hospitality of the Castle, dispersed to their several homes.

Lord Adolphus Fitzclarence has returned to his apartments at St. James's Palace, from making a series of visits in the provinces. The noble Lord leaves town on Thursday for Portsmouth.

Lord John Russell returned to his residence, Pembroke Lodge, Richmond Park, on Saturday, from York.

Lord Londesborough has taken possession of the splendid mansion and estate, near Aylesbury, purchased from Baron Rothschild, by the lately purchasers from his Excellency Lord Howden, British Minister at the Court of Spain.

METROPOLITAN NEWS.

DIPLOMATIC APPOINTMENT.—The Right Hon. Richard Lalor Sheil has been appointed her Majesty's Minister Plenipotentiary at Florence, in the place of the late Sir George Hamilton. He will remain for a short time in England, for the purpose of assisting in carrying into effect the contemplated reforms in the Mint.

THE NEW VICE-CHANCELLOR.—Vice-Chancellor Rolfe will be sworn in this (Saturday) morning before the Lord-Chancellor, at his private residence in Baron-square, and will then proceed to take his seat in the Vice-Chancellor of England's Court, in Westminster Hall—the usual course being that the Judges of the Equity Courts shall sit on the first day of the term at Westminster Hall, and for the remainder of the term at Lincoln's-inn.

BENEVOLENT SOCIETY OF BLUES.—The annual meeting of this society took place on Wednesday, at the London Tavern; Mr. Thomas Hughes in the chair. The meeting commenced at two o'clock for the election of additional pensioners, when Sarah Ann Wells and Honour Dyer were elected. The successful candidates were then called in, and suitably addressed by the chairman; after which, the unsuccessful ones were each presented with a sovereign. The report, which, like Mall and the Hall now frequent House, is one which the society had sustained in the death of his Royal Highness the Duke of Cambridge, and stated that the sum of £560, Three per Cent. Consols, had been given in to Mr. John Thackeray, a member of the committee, during the year. The directors had determined henceforth to increase the amount of pensions, raising the male pensioners from £12 to £16 and the female from £10 to £12 per annum. The funded property increased to £13800, it amounting, at the present time, to £8200. The report was adopted; and, after a vote of thanks to the chairman, the meeting separated.

MEDICAL REFORM.—On Wednesday, a meeting of the members of the council of the National Institute of Medicine, Surgery, and Midwifery, and other members of the profession, was held at their rooms in Hanover-square, for general business, and the adoption of measures to secure the passing of the Medical Reform Bill now before the House of Commons at the close of last session, by Mr. Wyld, M.P. N. Clifton, Esq., took the chair. The fourth annual report a very lengthy document detailed the proceedings of the institute in endeavouring to effect a change in the position in which the general body of practitioners of medical science in this country are placed. It was announced that, in answer to a circular addressed to the profession generally, requesting their opinions on the above members, more than two-thirds are decidedly in favour of the act of incorporation.

NEW ZEALAND COMPANY AND THE NELSON ABSENTEE PROPRIETORS.—On Wednesday morning, a meeting of the absentee proprietors of land in the Nelson district of New Zealand, was held at the offices of the company, No. 9, Broad-street-buildings, for the purpose of considering what steps should be taken to obtain compensation from the Government, in consequence of the non-reception of their rules to the land of which they have become purchasers. After a long discussion, a series of resolutions embodying the grounds of complaint set up by the absentees was passed, and a deputation appointed to wait upon the Directors of the New Zealand Company, to request them to back the application of the committee to the Government.

THE ASYLUM FOR IDIOTS.—The seventh election of this charity took place on Thursday, at the London Tavern, when Sir George Carroll, in the chair, addressed the meeting in a feeling manner, urging the claims of this society on the wealthy and benevolent, both on account of the unhappy state of the applicants, and the success that had already attended the efforts made; also entering into a statement of all on behalf of the fund now being raised to erect a suitable and commodious asylum.—Rear-Admiral Hawtayne succeeded Sir George Carroll, and, after a spirited contest, 18 applicants were declared to be elected out of 30 candidates.

LONDON CITY MISSION.—A meeting of the London City Mission Society was held at the inquest-room, St. Andrew's-court, Holborn, on Wednesday evening; Mr. R. C. L. Bevan took the chair shortly after seven o'clock. The meeting was opened with prayer. There were several clergymen present on the platform, Dissenters as well as Church of England men; the body of the room was well filled. The report stated that the committee could not report a decided improvement in the character of the district in which they were located; but they could report a certain amount of progress among the population, who now received the missionaries respectfully, and listened to them with patience. The report entered into various details to this effect, as reported by the secretaries of this society. The receipts and expenditure of the past year proved the necessity for further aid and assistance. Several speakers addressed the meeting, and a series of resolutions, embodying the preceding facts, and claiming support, were passed.

METROPOLITAN SEWERS AND WATER SUPPLY ASSOCIATION.—An association with this title was formed on Tuesday evening at a preliminary meeting held at No. 9, Duke-street, Westminster; Mr. Freebody presided. The object is to consolidate the sewer and water supply of the metropolis under the control of a public commission, to be elected by the ratepayers. It will also be sought to alter the constitution of the general Board of Health, by which the medical faculty the agents through whom the public health will be provided for, the latter not to possess any control over local authorities, but merely to instruct them in the best means of preserving the public health. Mr. Richard Hodges, of New-street, Spring-gardens, adduced a number of reasons, showing the necessity which existed for the formation of such an association, as the means of protecting the ratepayers against reckless and extravagant expenditure on the part of the Metropolitan Sewers Commission, and for securing the complete and economical construction of sewers, in conjunction with an abundant and cheap supply of pure water. Much dissatisfaction was expressed by several of the gentlemen present at the alleged unhandsome manner in which the late Board and nine professional gentlemen were treated who had supplied plans for the sewage of the metropolis. A council was appointed to carry into practical effect the aim of the association.

IMPROVEMENT OF MANUFACTURING OPERATIVES.—The annual meeting of the Southwark Auxiliary Society for Promoting the Intellectual, Moral, and Religious Improvement of Working Men employed in Manufactories, was held at St. Saviour's School room, Borough-road, on Tuesday evening; Mr Palmer in the chair. Mr. C. Dean, the secretary to the society, read the report of the committee; and it is pleasing to observe, that, though humble the means of limited operations of the society, yet its efforts are not unattended with the most satisfactory results. The Rev. Mr. Davis and other gentlemen recommended the society to the public support—a recommendation which we have no hesitation in seconding, seeing the good which it has already effected, and is still likely to effect.

THE NEW PARK AT BATTERSEA.—The Commissioners of Woods and Works have now completed the arrangements for carrying into effect the projected park in Battersea-fields, and have purchased, for the sum of £11,000, the celebrated shooting-grounds and premises so long known as the Red House. The present occupier is to be allowed to remain in possession for fifteen months, and it is the intention of the commissioners to commence without delay the erection of the iron suspension-bridge, which is to cross the Thames immediately below the Royal Hospital on the Pimlico side

THE EXHIBITION OF 1851 AND THE CITY FIRMS.—The number of applications during the past few days has been perfectly astonishing. At the City of London committee, on Wednesday, not less than 200 forms of application were returned, and an almost equal number of blank forms applied for, which were returned on Thursday, that being the last day for receiving applications. During the last week four clerks have been constantly employed in examining the voluminous returns sent in. The total number of exhibitors for the City of London will considerably exceed 1900. Westminster expects to furnish nearly an equal number. The Finsbury and South London committees have also received an immense number of applications.

PUBLIC BATHS AND WASH-HOUSES.—The Worshipful Company of Merchant Tailors, at a court held on the 24th ult., ordered that fifty guineas be paid to the Committee for the Establishment of Baths and Washhouses for Baths and Wash-houses for the Labouring Classes. The extensive benefits which have been conferred upon the public since the appointment of the committee, in October, 1844, have, we are only begun to be understood, and are likely before long to be incalculably developed. The committee have established the fact that warm and cold baths, and the means of washing and drying linen, can be profitably provided for the working classes at prices so low, and with convenience so great, as to place these necessary means of health within the reach of all but absolute paupers; and they are still actively engaged in promulgating throughout the kingdom, and in other parts of the globe, the result of their experience and information, thus diffusing the benefits which may be afforded by those institutions. The expenses consequent upon this important service have been, and still are, considerable, in addition to the expenditure by the committee in erecting the model establishment in Whitechapel.

METROPOLITAN COMMISSIONS OF SEWERS.—A deputation from the Metropolitan Sanitary Association, consisting of the Rev. C. Hume, Mr. Carleton Haynes, Mr. C. W. Walsh, and the Rev. M. W. Lusignan, and Dr. Gavin, the honorary secretaries, waited on the Commissioners of Sewers on Tuesday, respecting the tidal ditches in Jacob's Island, Bermondsey. A memorial, signed by sixty of the inhabitants of Bermondsey was read, praying the Commissioners to use their powers entrusted to them, and to fill up the tidal ditches. The Rev. C. Hume, Dr. Gavin, and Mr. C. R. Walsh explained the wretched condition that locality and the sanitary evils arising therefrom, and were assured by the Commissioners, that within a very few days steps would be taken for its improvement by a comprehensive plan of house drainage; but that in consequence of legal proceedings taken against them, the Commissioners could not promise a sixpence to fill up the tidal ditches, as the memorialists and deputation urged them to do

FEMALE EMIGRATION FUND.—The district committees for the reception of the names of emigrants have commenced their operations for the season, and will meet as follows:—For Westminster, at the Model Lodging-House Man's Institution, Pear-street, Westminster, on Monday evenings, at six o'clock; for Southwark and Lambeth, at Surrey Chapel School-rooms, on Tuesday evenings, at half-past eight o'clock; for the parish of Whitechapel, at St. Mary's Vestry, on Tuesday mornings, from ten to twelve; for Walworth and Camberwell, at the vestry of St. Peter's, Walworth, on Wednesday and Friday mornings, at twelve o'clock; for St. George's-in-the-East, at the Vestry, on Monday, Wednesday, and Friday mornings, at eleven o'clock; and at the schools every evening at half-past six; for Shadwell and Limehouse, at the Infant School-room, Shadwell, on Monday and Thursday evenings, from six to seven o'clock. Applications are also received at No. 4, St. Martin's-place, Trafalgar-square, every morning from eleven till twelve. Applicants should apply to the district committee nearest to their abodes.

POST-OFFICE NOTICE.—Henceforward, all letters for California and Oregon, not specially addressed to be forwarded by any other route, will be transmitted by the West India mail packets to Panama, whence they will be conveyed to San Francisco by the mail packets of the United States. The combined British, New Granadian, and United States postage upon such letters will be—For a letter not exceeding half an ounce in weight, 2s. 9d.; for a letter exceeding half an ounce and not exceeding an ounce, 5s. 6d.; and so on. Newspapers will be liable to a combined postage of 2d. each. These rates must in all cases be paid in advance.

ST. JAMES'S-PARK.—The works in St. James's-Park are progressing. The iron railing in the west end of the park is now in the Enclosure has been put back in a line parallel with the front of the Palace The iron railing of part of the Green-Park, opposite Stafford House, has also been altered, so as to be a continuation of that line, and make the ground-space more uniform in shape and form, opening into the Mall, the centre avenue of which will be exactly opposite to the centre of the Palace. The ground enclosed opposite Stafford House will be altered to correspond with that on the opposite side. The marble arch has been taken down in the ground, and is now undergoing numbers, and a drawing made of each course, with corresponding numbers on the blocks, so that they may be exactly replaced hereafter. Should it be ultimately determined to remove the arch to the Mall near Bridgewater House, it will be a triumphal arch on each side of it, it would seem to form the commencement of the Palace grounds, it will be a matter for regret that it was not moved to that position bodily, as might have been done without much difficulty.

IMPROVEMENT AT LONDON BRIDGE.—A great deal of inconvenience has been for some time felt and risk encountered by the public in crossing from one side of London Bridge to the other, in consequence of the steamers which ply over it, and at last the corporation have taken the matter in complaint into consideration. It has been proposed by Mr. Dawson, one of the representatives of Walbrook ward, to make for the public an easy and safe communication between the east and west sides of the river, by forming a passage or tunnel seven feet high and eight feet wide through, or rather beyond, the abutment of the south or Surrey end of the bridge, from the first landing of the steps on the west side. As it is calculated that the passage of the river will improve of great convenience to numbers of persons who come up by the railway to London Bridge and want to get into the steamboats for the west end of the town, without the hazard of inserious or trouble in crossing the bridge. Mr. Bunning, the architect to the City, and Mr. Leach, the engineer to the Thames Navigation Committee, have been requested to ascertain the exact structure of that part of the bridge through which the passage or tunnel is proposed to be made, and it is believed that no engineering difficulties will present themselves to the accomplishment of the object.

THE LADIES' CHARITY-SCHOOL.—This institution, which was established in 1702, and now maintains 24 girls, from all parts of the United Kingdom, chiefly children of parents who have been in respectable circumstances, held its half-yearly general meeting at the school-house, John-street, Bedford-row, on Tuesday, for the especial purpose of electing four children from a list of eleven candidates. John Venn, Esq., presided, supported by Mr. Deputy Bedford, &c. After the conclusion of the poll, the names of the successful candidates were announced, namely, Emma (unto the grace) Cox, aged 9 yrs; Mary (a rose) assemblage of ladies and gentlemen present) was that of Ruth Ann Brown, aged nine years, whose father went as caulker of the *Erebus*, with Sir John Franklin in the North Pole Expedition. Her mother is now a nurse in the Greenwich Hospital School, and upon her exertions two other children are dependent. Lieut. Rose, R.N., Superintendent of Greenwich Hospital, attended, and, on behalf of the Royal naval service, returned thanks for the kind support of a child of one of all those devoted seamen for whom he had been recently so much excited. Votes of thanks having been unanimously awarded to the scrutineers, to J. Masterman, Esq., M.P. (treasurer), to Miss and Mr. Bevir (hon. secretaries), and other officers, as also to the chairman, the assembly broke up.

FOREIGN GRAPES.—In addition to the large supplies at present taking place of the fine description of grapes from Hamburg, and also the importations from Portugal, Spain, and the Mediterranean, which have continued taking place, causing the market to be largely supplied with a great variety of this fine fruit. The vessel *Little Fred*, just arrived from that place, has brought 1220 bunches, 26 small boxes, and 3 baskets. The barque the *Lady Kinsale*, 1125 barrels and 646 half barrels: the *Melbay*, 985 barrels and 30 small barrels of this fruit; the produce of Spain.

FOREIGN PLATTING.—A curious variation has recently taken place by a steamer from France of a quantity of platting, consisting of cordonet and Manilla hemp, a portion of the Manilla platting containing a very small quantity of horse hair platting mixed with it. This was understood to be the first instance in which hemp and horse hair were formed into platting in the interior of this mixed state, and it appears that the small quantity in proportion of horse hair worked into the platting was for the purpose of stiffening it for manufacturing bonnets in this country, for which purpose it is likely to be used to some extent, and not merely for ornamental purposes

A CABMAN'S TRICK.—The rewards paid to cabmen upon the immediate restoration of property left in their vehicles accidentally lead to the exercise of the ugly ingenuity of the brotherhood in many ways. A gentleman had occasion to write to the *Spectator* in Broad street, some days ago, under the following circumstances:—He hired a cab to take him and his luggage, amongst which was a gun-case, from Euston-square to the London and Blackwall Railway. When he arrived at the station, the cabman, with the most obsequious activity, proceeded to unload, and very quickly drove off upon receiving his fare: but scarcely had the gentleman congratulated himself upon the safety of his gun-case, the consequence was, that the journey was postponed, and the gentleman returned to his house, but on his way he was informed by a policeman that the cabman who had just left the station with his luggage was by that time in Broad-street, depositing the gun-case which had been left in the cab, and to a considerable portion of the value of which the driver would be entitled for his honesty in giving it up. The owner of the property went to the Commissioner at Scotland-yard, representing the fact that the cabman had made the "mistake" intentionally, for the purpose of establishing a claim to the reward, and received an answer from the *dépôt* expressive of positive belief that the case was exactly as the complainant had described it, but at adding that the delinquent must still be rewarded, in the apprehension that a refusal would aggravate the system of robbery which the plan of restitution had been made to diminish. The complainant was thus obliged, before he received the gun-case, to pay the (under the circumstances) reduced penalty of 10s. as a recompense to the rascal by whom had been put to expense and subjected to disappointment

A COMMOTION ON THE BOXES OF OMNIBUSES.—The proprietors of omnibuses have recently been summoned by the police for neglecting to provide passengers with "fit and proper seats," particularly on the outside of their vehicles, on the ground that the crippled manner in which persons are crushed to sit on the outside is in violation of the strict meaning of the Stamp Duty Act for the regulation of public hackney carriages; and several nominal fines were imposed, with a view that the Assistance of Commissioners might appeal to the legislature in order to raise a legal question. Their interest to a considerable extent, particularly as they contend that sufficient space has been by them allotted to each passenger.

BURGLARY AND ATTEMPT TO MURDER.

Another case of this kind was also brought before the magistrate at Marylebone Police-office on Monday, viz.:—George Rouse, aged eighteen, was charged with a burglary at the house of Mr. George Seaton, landlord of the Dublin Castle, Park-street, Camden Town, and also with having committed a murderous outrage upon police-constable Godwin, 58 S, by stabbing him in several places with a knife.

Godwin presented a most distressing appearance, there was a quantity of coagulated blood upon his face, he had a bandage round his head, and beneath his left eye was a quantity of strapping, from which blood was still oozing. He was extremely weak and faint, and made his statement sitting. The back part of the prisoner's head was also strapped up. On being sworn, the constable said:—About three and four this morning, as I was walking my duty round the grounds by Chalk Farm Tavern, I heard some one come along whistling towards me; that person was the prisoner, who immediately passed me. Not liking his appearance, I turned after him, and overtook him within ten or twelve yards of Primrose-hill, when he suddenly stopped, apparently to obey a call of nature. At that time I observed something bulky under his coat, which was buttoned. He remarked to me, "It's rather a wet morning," and I said, "It is, and what have you got about you?" He unbuttoned his coat, and, drawing from thence a leathern bag, said it was his own money which he had worked for, at the same time producing 2s. 6d. Feeling satisfied that some robbery had been committed, I told him he must go with me, when he said, "For God's sake don't take me, and I'll give you half." I laid hold of him by the back of the neck, and led him along, and for 300 yards he walked as quietly as possible. He then said something to me, but I cannot recollect the words he said, and at the same moment he suddenly sprang up, and I was stabbed by him in the face with a sharp instrument. I still kept hold of him, and we rolled together down an embankment. A scuffle then ensued between us, and he cut me again on the ear and the hand. I caught hold of his wrist, and saw the knife in his hand, which was uprulsed, as if in the act of once more stabbing me the blow being about to be aimed at my head. We continued to scuffle, and the prisoner got away from me. I got up as quickly as possible, while the blood was flowing from me in a stream, and I ran after him with my truncheon. When I had got within a few yards of him, the ground being slippery, he fell. I fell too. We both got up, and with my truncheon I gave him several blows, which brought him down. I ballooed out, and my cries brought to my assistance two railway policemen, by whom the prisoner was secured and conveyed to the station-house.—I managed to walk home myself, in a bleeding and dreadful condition, and on searching the prisoner I found in his possession three bags, which I now produce. They contain £19 in shillings, a crown, 14 half-crowns, 126 sixpences, 24 fourpenny-pieces, 13 threepenny-pieces, and other money in copper. In one of his waistcoat pockets I found two fourpenny-pieces, and in his fob a jet necklace.

Mr. Broughton: Did he say from whom he received the money as wages when you stopped him?—Witness: Yes, he said he had it from Mr. Grimble, but he did not tell me who or what Mr. Grimble was. I asked him how much he had received, and he said he believed about £25.

The evidence of Mr. Seaton's potman and others showed that the prisoner, who had been in the tap-room when they were shutting up the house, must have secreted himself somewhere on the premises instead of going away as he had been told to do.

Mr. Seaton swore to the loss of his money, and recognised one of the moneybags found on the prisoner as his, as also the knife with which he assaulted the policeman.

Mr Broughton remanded the prisoner till Monday next, and Inspector Chambers was directed to bring on that day a surgeon's certificate with respect to the nature of the wounds which Godwin had received.

The prisoner had received a slight wound in the thigh, supposed to have been caused by his falling upon the point of the knife which was in his pocket when he and Godwin rolled down the embankment.

FRIGHTFUL ACCIDENT AND LOSS OF LIFE.—On Tuesday afternoon, a very melancholy occurrence took place at Griffin's Wharf, in Tooley-street, by which one man lost his life, and another is so severely injured that it cannot be said he is out of danger. The accident occurred in the following manner:—It is usual at this and other wharfs to have a large drum wheel for the purpose of raising or lowering heavy weights from the vessel to the barges below, and this is worked by men treading inside of it. Some casks of cocoa-nut oil were being lifted on the present occasion from a barge to the wharf, which, for the sake of the tale, was a height of about sixteen feet. The casks, or "lighters," as they are technically called, weighed upwards of a ton each; and six men, of the names of Hurley, Callaghan, Hayes, Looney, Crawley, and Reese, which are certain labourers at the wharf, were engaged in the work, which they had been at some little time, when, on hoisting one of the lighters within a foot of the top of the wharf, one of the men (and it cannot be ascertained which) called out "High enough," which was a signal for them to stop. Hayes, Looney, Crawley, and Reese stopped accordingly, and the weight of the other two (Hurley and Callaghan) not being sufficient to support the leger, it descended back to the barge with great velocity, while the two poor men within the wheel were thrown up in every direction by the "drum" until it stopped, and they were taken out. Hurley, on being conveyed to Guy's Hospital, was found to be quite dead, from injuries to the head and ribs, and Callaghan has many severe bruises and other internal injuries, from the effects of which may be fatal.

BIRTHS AND DEATHS.—The total number of deaths registered in the metropolitan districts in the week ending last Saturday was 845. The deaths registered in 1849 were 1369, viz. 689 males, and 680 females. The amount of the mortality thus registered is lower than in any of the corresponding weeks of ten years (1840-49), except those of 1841 and 1845, when the deaths were less than 800; and it is much lower than in the same week of 1843 and 1848, when they rose above 1100. The present return shows a decrease on the average (corrected for increase of population) of 171 deaths. Taking the three classes of maladies which, together, destroyed more than half of the 843 persons who died this week, namely the epidemic, the tubercular, and those of the organs of the respiratory organs, it appears that, though there is a decrease in each of them, it is most remarkable in the epidemic. In this class the deaths enumerated are 161, while 242 occurred amongst children), while the average of ten years is 296. Four children and an adult died at small-pox, 24 children of measles, 24 of hooping-cough, 5 of croup, 4 of thrush, 32 persons of scarlatina, 30 of diarrhœa and dysentery, and 49 of typhus. Small-pox continues to exhibit much less than the usual amount of fatality; most of the other complaints mentioned are near the average; typhus a little exceeds it

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean reading of the barometer in the week was 29.319 in. The mean temperature was 42.3 deg., being lower by 3 deg. than that of the same week on an average of seven years. Since Sunday, it has been lower than the same on every day of the week; and on Thursday, when it was lowest, was 7 deg. below the average of the same day. The wind blew generally from the north-east

UNIVERSITY COMMISSION.—Circulars have been received in Oxford from the Lord Bishop of Norwich, the head of the Royal commission, to this University, addressed to the Vice Chancellor, the heads of houses, and the senior proctors and public reader. A proposal, directed with great dexterity to the commission, has been received at the Hebdomadal Board by a majority of *fourteen to eight*. Several favourable answers, expressing a readiness to show respect to her Majesty's commission, have already been transmitted to the board of commissioners.

PROPOSED PRIZE ESSAY.—A clergyman of the Church of England, with the approbation of his Royal Highness Prince Albert, proposes to give a premium of 100 guineas for the best essay in answer to, for the prize essay on the following subject:—"In what manner the union of all nations at the Grand Exhibition in 1851 may be made most conducive to the glory of God in promoting the welfare of the whole of mankind."

THE WIDOW OF THE LATE LIEUT. WAGHORN.—The committee for the management of the Bombay steam fund have presented the widow of the late Lieut. Waghorn, during her residence in this country, with a government annuity of £75 for the remainder of her life, out of the unexpended balance of the fund in their hands. This fund was constituted by the proceeds of a public subscription at Bombay, in 1833, for the purpose of promoting the great object of steam communication with England, and the amount raised has been appropriated from time to time in accordance with that design.

THE LATE MR GEORGE STEPHENSON.—At a meeting at Derby, Mr. Mosley, the ex-mayor of that borough, said that Mr. Joseph Paxton, the architect of a new bridge across the Derwent, had under his consideration at the present moment the project of erecting a monument to the celebrated George Stephenson, in one single stone, which would be several feet longer than Cleopatra's needle—*Derby Mercury*.

THE TURKISH SQUADRON AT SPITHEAD.—The Turkish frigate *Merat Zafer*, Captain Mehemet Bey, saluted the governor on Wednesday morning at daylight with 21 guns, to which the platform battery replied; and the flag of Admiral the Hon. Sir Bladen Capel with 17 guns, to which the *Victory* replied with a like number. Captain Mehemet Bey, with Admiral Capel, Captain Bullock, and another officer, landed at the Hard, Portsea, and Mr. Beattie, the Turkish consul at Portsmouth, landed at noon, and paid their respects to Admiral Capel and the Lieutenant-Governor, Lord F. Fitzclarence. The squadron anchored in Gibraltar, and it is supposed they will remain all the winter in England, either at Portsmouth or Plymouth. The frigate mounts 50 guns, nearly all brass, and has a complement of 363 men; she looks small and clumsy. The brig is a finer-looking vessel; she has 20 brass guns, and a complement of about 140 men. It was expected the Captain Sadic, R.N., would be in one of these vessels, but it appears that Captain Mehemet Bey did not even know such person

A GOLDMAKER.—A man named Fletcher, at Murphy's, has invented a machine which he terms a goldmaker. It acts in the Lesmane manner as the magnet with respect to iron. It points, it is said, to any spot where gold exists in any large quantities. A party of men who have taken it the instrument conveyed to Ireland by it, and in a short time we shall be able to report success.—*Penny Mercury*.

ANTIQUITY OF A VESSEL.—The *Carnarvon Herald* says, that a sloop, a vessel of, and belonging to the port of Aberswyth, called the Sea Gull, has made several voyages this year to the West of England, and has proved to be well, and is still so trim

Inquest of the late Mr. Hanbury to the town of Southampton, for scientific purposes, has been converted into a legacy, securities, and cash realised £82,500. The largest the amount of which it has been thrown into Chancery, will, in a few weeks, be the subject of investigation before that court.

BURGLARY AND ATTEMPT TO MURDER.

Another case of this kind was also brought before the magistrate at Marylebone Police-office on Monday, viz.:—George Rouse, aged eighteen, was charged with a burglary at the house of Mr. George Seaton, landlord of the Dublin Castle, Park-street, Camden Town, and also with having committed a murderous outrage upon police-constable Godwin, 58 S, by stabbing him in several places with a knife.

Godwin presented a most distressing appearance, there was a quantity of coagulated blood upon his face, he had a bandage round his head, and beneath his left eye was a quantity of strapping, from which blood was still oozing. He was extremely weak and faint, and made his statement sitting. The back part of the prisoner's head was also strapped up. On being sworn, the constable said:—About three and four this morning, as I was walking my duty round the grounds by Chalk Farm Tavern, I heard some one come along whistling towards me; that person was the prisoner, who immediately passed me. Not liking his appearance, I turned after him, and overtook him within ten or twelve yards of Primrose-hill, when he suddenly stopped, apparently to obey a call of nature. At that time I observed something bulky under his coat, which was buttoned. He remarked to me, "It's rather a wet morning," and I said, "It is, and what have you got about you?" He unbuttoned his coat, and, drawing from thence a leathern bag, said it was his own money which he had worked for, at the same time producing 2s. 6d. Feeling satisfied that some robbery had been committed, I told him he must go with me, when he said, "For God's sake don't take me, and I'll give you half." I laid hold of him by the back of the neck, and led him along, and for 300 yards he walked as quietly as possible. He then said something to me, but I cannot recollect the words he said, and at the same moment he suddenly sprang up, and I was stabbed by him in the face with a sharp instrument. I still kept hold of him, and we rolled together down an embankment. A scuffle then ensued between us, and he cut me again on the ear and the hand. THE ROYAL TABLE, AND MAYORALTY INSIGNIA.

GRAND BANQUET AT YORK.

THE GREAT EXHIBITION OF 1851.

The fine old city of York has just been the scene of a magnificent Festival, which must be considered as one of the most interesting events in civic history; whether regarded for the splendour of the assembly, or in connexion with the great event which it was mainly designed to propitiate; namely, the Great Exhibition of International Industry in 1851.

ANCIENT "CAP OF MAINTENANCE."

The Banquet at York, in point of dignity the second city of the empire, originated in London, in the grand entertainment given, with the same patriotic object, in March last; and at which His Royal Highness Prince Albert and the Mayors and chief magistrates of the principal towns in the kingdom were present. It was but natural that this example should be followed by the great corporations of the country; and, after some correspondence on the subject, the proposition of the Lord Mayor of York (Mr. Seymour), to give a return banquet, was considered and discussed at a meeting of the Mayors and other civic authorities at Derby; when it was resolved that a subscription should be entered into for the purpose of enabling the Lord Mayor of York, in junction with the municipalities of the United Kingdom, to receive the Prince Consort and the Lord Mayor of London on a scale of becoming magnificence. The invitations were accordingly issued for Friday, the 25th October, when nearly one hundred Mayors and heads of boroughs declared their intention to be present; the entire number of guests invited being 248, the full extent of the accommodation afforded by the Guildhall at York, in which the Banquet was appointed to be given.

FITTINGS OF THE GUILDHALL.

The Guildhall of York is situated in the rear of the Mansion House; it is a fine old Gothic apartment of the fifteenth century, built by the Mayor and Commonalty, and the Master and Brethren of the Guild of St. Christopher, A.D. 1446. Its dimensions are 96 feet long by 43 feet wide, and the height 30 feet to the centre of the roof, which is composed of oak, decorated with numerous grotesque figures carved in bosses, and supported by 10 octagonal oak pillars on stone bases. Each of these pillars is 21 feet 9 inches in height, and very massive, though severally cut out of one single tree.

To M. Soyer was entrusted the providing of the dinner (which, by the way, cost about £600, exclusive of wines), as well as the general arrangement of the Hall and its decoration. In order to extend the accommodation, a considerable portion of the adjoining Sessions Court was taken down. There were five tables stretching longitudinally, east and west, in the body of the noble Hall; at the east end there were two tables more, and at the west end was the great circular table occupied by the most distinguished of the guests. Covers were laid for 248, and the tables in the body of the building were so arranged that all the company had an excellent view of the Royal table. Another effect of M. Soyer's plan of arranging the seats was, that the guests had the appearance of being all accommodated at one immense table; this effect was produced by the use of daises of certain gradations, which had been nicely calculated for the purpose.

The great west window of the Guildhall, which is in the Perpendicular style, and which is filled with stained glass, has, at previous civic banquets given here, been beautifully illuminated; but in the present instance it was covered over with crimson cloth, in order to secure a better effect to a magnificent ornamental design of M. Soyer's, erected in front of the window, and immediately behind the great circular table. It consisted of a large emblematic vase, 20 feet in height, painted and modelled by Mr. Alfred Adams. Around the base is Britannia receiving specimens of industry from Europe, Asia, Africa, and America. From the centre springs a palm tree, surrounded by the City arms of London and York; medallion portraits of the Queen and Prince Albert, surrounded by the shields of the principal cities and towns of the United Kingdom, form the body of the vase; two figures of Ireland and Scotland form the handles; the Prince of Wales' emblem the neck, and the Royal arms the apex. Appended were graceful wreaths of flowers, in which predominated the symbols of the houses of York and Lancaster, the red and white rose; and, when a brilliant flood of gaslight, aided by powerful reflectors, was thrown upon this splendid decoration, the effect was very beautiful.

The whole of this part of the hall was profusely and elegantly adorned with crimson drapery, vases of flowers, evergreens, banners, &c.; and on either side of the great west window was a magnificent bust, one being that of Jupiter, and the other of Lucius Verres, the distinguished Roman patriot.

THE HUNDRED GUINEA DISH.

THE BANQUET IN THE GUILDHALL AT YORK.

In front of the principal table, on a raised platform covered with purple cloth, was a collection of maces, state swords, and valuable civic insignia, belonging to the various corporate bodies, of all sizes and forms, varying in shape, ornaments, and design, wreathed with flowers and evergreens, through which there gleamed the bosses and incrustations of gold on the ancient maces, which had been wielded by generations of mayors, with the velvet sheaths and gaudy mountings of gigantic swords of state. The splendid honours borne by the chief magistrate of London were not added till the banquet had commenced; but the ancient city of Norwich crowned the gaudy grouping with its jewel-bestudded mace, a present from Queen Elizabeth herself. The York Sword ordinarily used is set with rubies, and is mounted with a large crystal, set transparent. The State Sword, only borne before the Sovereign by the Lord Mayor, is double-handled, and of great weight, and has a crimson velvet sheath, with gold mountings of griffins. The York Corporation Mace was the gift of Charles II.

The walls of the Guildhall were hung with crimson cloth, to the height of about ten feet, as were also the oak pillars. Above were suspended several paintings, including a portrait of the Marquis of Rockingham, by Reynolds; a portrait of Charles II.; also portraits of Lord Bingley, Sir John Lister Kaye, Sir William Milner, and Lord Dundas, Lord Mayors of York. Besides the ordinary pendant gas-lights between the pillars of the arcade on each side, which were tastefully decorated with evergreens and flowers, there were other gas-lights which lit up every feature of the picturesque baronial building. In the body of the Hall there were eight variegated Gothic lanterns; three suspended from the roof in the north aisle, three in the south, and one at either end of the middle aisle, in the centre of which there was a chandelier, its pendant stem entwined with the figure of a serpent, formed in gas. The two pillars of the Hall, nearest to the Royal table, were wreathed with evergreens and flowers and serpentine gas-lights.

At the east end of the Hall was erected a handsome gallery for an orchestra, and a limited number of ladies to witness the banquet: it was ornamented with crimson drapery, oil-paintings, banners, evergreens, and flowers, and lit with pillars of gas, and Gothic lanterns.

The east, like the west window, was covered with crimson drapery, and in the centre was suspended a portrait of the present Lord Mayor of York, cleverly painted by Mr. Samuel Walker.

The banners of the several Mayors, suspended from the roof arcades, the gallery, &c., were characteristically splendid: they bore the arms of the several [illegible] and boroughs whence they were sent; the banner of York, worked by [illegible] Mayoress, was conspicuous to the right of the chair, and the banner of Lon[illegible]n to the left. The Lord Provost of Edinburgh sent the ancient banner presented to the trades of that city by the Queen of James IV., and borne by them at the battle of Flodden Field.

Three magnificent carved oak chairs (from Mr. Greenwood's establishment) were placed in the Guildhall, for the use of Prince Albert, the Lord Mayor of London, and the Lord Mayor of York. The bills of fare (supplied by Messrs. Bellerby and Son) were most elaborately embossed with the Royal arms and a superb rich fruit border.

The tables shone with epergnes, plateaux, centre-pieces heaped up with pines, grapes, and the richest fruit, with silver plate, beneath innumerable lights. Among the embellishments were various productions in patent glass silvering, prepared expressly for the occasion, as being peculiarly appropriate to a festival to celebrate the approaching congress of the artistic industry of nations. These specimens consisted of gilt, silvered, and bronzed figures, bearing large globes of silvered glass. Two highly-chased salvers, on pedestals, at the head of the

centre table, in ruby glass, the inner surface being variegated by the application of the silvering process, were very beautiful. There were also three superb drinking-cups, one for his Royal Highness Prince Albert, and one for each of the Lord Mayors of London and York; the first in ruby glass, portions of the stem and base internally checkered with silver, and on the sides bearing white sunken medallions of her Majesty and the Prince Consort, and the Royal

CUPS USED BY

LORD MAYOR OF YORK. H.R.H. PRINCE ALBERT. LORD MAYOR OF LONDON.

arms of England. The other two cups were of the same size and shape, but, instead of being ruby and silver, the colours were emerald and silver; and on the sides were the private arms of each of the Lord Mayors, together with the usual heraldic embla zonments of the cities of London and York respectively. The uncertainty of the Lord Mayor of Dublin's arrival prevented a cup being prepared for him.

ARRIVAL OF THE GUESTS.

The Lord Mayor of London and suite left on Thursday, at half-past nine o'clock, and by special train, on the North-Western line (and Midland), and with the Lady Mayoress, the Rev. C. Marshall (chaplain), Miss Stone, Mr. ex-Sheriff Nicoll, the sword-bearer, mace-bearer, &c., arrived in about four hours and three-quarters at York, where, after a short delay on the part of the Lord Mayor of York, who was not prepared for such extraordinary speed on the part of the railway authorities, the Lord Mayor and Lady Mayoress entered a private carriage, and were driven to private lodgings which had been provided for his Lordship, the spare rooms in the Mansion house having been appropriated for the use of Prince Albert. A considerable number of the provincial mayors also came in the course of the day. On Friday, between three and four o'clock, Lord J. Russell, the Earl of Carlisle, the Chancellor of the Exchequer, Sir G. Grey, Earl Fitzwilliam, and other persons of distinction, came in by the trains then reaching York. The directors of the York and North Midland line proceeded to Normanton to meet Prince Albert, and escort him along their line. The train which brought his Royal Highness dashed into the station shortly before four o'clock, the journey from London by the North-Western and Midland lines having been performed, we believe, in four hours and a half, or within two minutes of that time. A guard of honour was drawn up on the platform. His Royal Highness was received by the Lord Mayor of York on alighting, and was conducted to Lord Wenlock's carriage, which was in waiting, and in which the Prince drove to the Mansion-house, attended by an escort. His Royal Highness was enthusiastically cheered by the people.

His Royal Highness and suite were received at the Mansion House by a guard of honour of the 2nd or Queen's Dragoon Guards, under the command of Col Campbell, the band of the regiment playing "God Save the Queen." The Prince was then escorted in procession by the Lord Mayor to the state-room of the Mansion House, followed by the Marquis of Chandos, Colonel the Hon. G. Grey, and Col. F. H. G. Seymour, preceded by the esquires, sword and mace-bearers; also by the Rev. Canon Trevor (chaplain) and Mr. J. E. Dolby (who officiated as master of the ceremonies at the Presentation, &c.), and both of whom had the honour to be presented to his Royal Highness. At the Reception, the Lord Mayor of York appeared in a crimson silk robe, lined with shot pink satin; this being, according to Dugdale, the peculiar robe of the privileged chief magistrate of that ancient city when appearing before Royalty.

Dugdale also gives the following lines:—

The Lord Mayor is Lord for a year and a day,
But the Lady Mayoress is Ladye for aye

And it would appear, by the ancient records, that this privilege was exercised by the Lady Mayoresses preserving their titles after office. The Lady Mayoress of York also possesses a *chaus of office*, with which she is duly and formaly invested by the Sheriff upon inauguration; for which office he, by custom, claims, and receives ten, a muffle from her Ladyship.

Another of the York insignia may be mentioned here. This is the "Cap of Maintenance," worn by the sword-bearer upon this and all state occasions. It is, traditionally, the helmet of King Richard II., who, upon some festive occasion, placed it upon the head of the nearest person, who happened to be the Lord Mayor's esquire; and it has been carefully preserved and worn to this day. It was gold-plated and silvered, edged with gold lace, and lined, and has only been held together by repeated re-linings. We have engraved this historic relic

LIST OF THE COMPANY.

The following is as accurate a list of the company present at this great banquet as we have been enabled to collate:

His Royal Highness PRINCE ALBERT

The Right Hon the Lord Mayor of London, the Lord Mayor of York, the Archbishop of York, Lord J. Russell, the Marquis of Lansdowne, the Marquis of Abercorn, the Earl of Carlisle, the Earl Granville, the Earl Fitzwilliam, the Earl Minto, Lord Beaumont, Lord Feversham, Lord Overstone, Sir George Grey, Bart, M.P., the Right Hon. Sir C. Wood, Bart., M.P., the Hon B B Lawley, lo. High Sheriff of Yorkshire, J G Smyth, Esq, M.P.; W M E Milner, Esq, M.P.; W B Denison, Esq, M.P.; Richard Cobden, Esq, M.P., the R. n. G Bancroft, M.P., W Cobbett, Esq, M.P.; Gen Sir W Warre, Col Campbell, Sir C Tempest, Bart, Col Lygon, Col Seymour, Col Grey, Lieut-Col Forster, Capt. M'Murdo, Dr Lyon Playfair, M D Wyatt, Esq, the Recorder of York, the Sheriff of York, the Town-Clerk of York, Col Sykes, Joseph Paxton, Esq, Lieut-Col Hockett, M.P., Sir J. V B Johnstone, Bart., M.P.; H N [illegible]

Burgh, Lord Provost of Glasgow, Chief Constable of Huddersfield, High Constable of Hull, High Constable of St John's Clerkenwell, High Constable of Knaresborough, Chief Constable of Rochdale, Provost of Stirling, Provost of Kirkcaldy, Provost of Leith.

THE BANQUET.

At seven o'clock, his Royal Highness Prince Albert, accompanied by the Lord Mayor of York, entered the hall, amidst loud cheers from the assembled company. His Royal Highness appeared to be much struck with the magnificent *coup d'œil*. Soon afterwards, the Lord Mayor of London and his suite, preceded by his own insignia of office, entered the Hall and took his place.

On the right of the Lord Mayor were seated his Royal Highness Prince Albert, his Grace the Archbishop o York, Earl Fitzwilliam, Lord John Russell, Lord Beaumont, Sir Charles Wood, Bart., and the Hon. Bellby Lawley. On the left, the Lord Mayor of London, the Marquis of Abercorn, the Marquis of Cantierdale, the Earl of Carlisle, Earl Granville, Lord Feversham, the High Sheriff of Yorkshire, Sir George Grey, and Sir J. F. Johnstone, M.P.

After grace had been pronounced at the close as at the beginning of the banquet by the Rev. Canon Trevor, "the loving cup" was passed round, after the customary greeting delivered in the name of the Lord Mayor to all his guests, in the usual civic fashion, by Mr. Harker, the London toastmaster, and a flourish of trumpets

The Chairman, in an appropriate speech, proposed "The health of our gracious Queen, and long may she reign over us." (Tremendous cheering and applause.)

As soon as the cheering had subsided,

The Chairman again rose, and said. In the presence of the august personage who has this day honoured us with his company, I feel considerable difficulty in saying all what my feelings would prompt me to; but I trust I carry the feelings of all this large assembly along with me, when I say that the claims of his Royal Highness to the gratitude and affections of the people of this his adopted country from the first of his appearance amongst us, are founded on this pure and worthy idea and that is, whilst carefully abstaining from interfering in the political contests of the day, he has never shrunk from coming forward as befits his high station, his distinguished character, and his eminent abilities, as the promoter of any scheme which has for its object the furtherance of the social the agricultural, or the commercial interests of the country. (Loud cheers.) In the language of the Romans of old, it might well be said of his Royal Highness, "Casarem portas, et fortunas suas"—"You carry the hopes and fortunes of Britain with you." (Cheers.) I believe I express the feelings of this meeting and of the country, when I say, that, since the first appearance of his Royal Highness among us, he has entitled himself in every place to the gratitude, as he has endeared himself to the affections, of the people of this country. (Cheers.) His claims are founded on this sure and certain basis, that, while wisely abstaining from mixing in the political excitements of the day, he has never shown himself backward in supporting every scheme for the benefit of the agricultural, manufacturing, and industrial interests of the country. (Cheers.) I beg to return his Royal Highness my best thanks for his attendance here this day. (Loud cheers.)

Prince Albert rose and said,—My Lord Mayor, I am very sensible of your kindness in proposing my health, and I beg you, gentlemen, to believe that I feel very deeply your demonstrations of goodwill and cordiality towards myself I assure you that I fully reciprocate these sentiments, and that it has given me sincere pleasure to meet you, the representatives of all the important towns of the kingdom, again assembled at a festive board, in token of the unity and harmony of feeling which prevails amongst those whom you represent, and on which, I am persuaded, the happiness and well-being of the country so materially depends. (Loud cheers.) It was an idea honourable at once to the liberality and the discernment of the Lord Mayor of London, to invite you to assemble under his hospitable roof, for the purpose of discussing the important subject upon which you were going to enter (cheers); when, according to ancient custom, the loving cup went round, it was a pledge you gave each other, that, whatever the rivalries of your different localities might be, you would, on the approaching contest all are about to enter upon, representing the country at the gathering of the products of the nations of the earth. (Loud cheers.) I see, by your anxiety to return, before your terms of office shall have expired, the compliment which London has paid you, that you personally appreciate to its full extent the intention of its chief magistrate, and you could not have selected a better place for your meeting than this venerable city, which is so much connected with the recollections and the history of the empire, and is now prominent as the centre of a district in which a high state of agriculture is blended with the most extensive production of manufactures and commercial enterprise. But I see, likewise, in your anxiety to meet us, her Majesty's Commissioners, again, a proof of your earnest and continued zeal in the cause of the approaching Exhibition; it could not be by that a temporary excitement, but carried by a steady perseverance and sustained efforts, that you could hope to carry out your great undertaking, and ensure for yourselves and the nation an honourable position in the comparison which you have invited. (Cheers.) If, to cheer you on in your labours, by your hearty co-operation, you require the assurance that that spirit of activity and perseverance is abroad in the country, I can give you that assurance, on the ground of the information which reaches us from all quarters, and I can add to it our personal conviction, that the work in preparation will be such as to dispel any apprehension for the position which British industry will maintain. (Loud cheering and applause.) From abroad, also, all accounts which we receive lead us to expect that the works to be sent will be numerous and of a superior character. Although we perceive in some countries an apprehension that the advantages to be derived from the Exhibition will be mainly reaped by England, and a consequent distrust in the effects of our scheme upon their own interests, we must, at the same time, freely and gratefully acknowledge, that our invitation has been received by all nations with whom communication was possible in that spirit of liberality and friendship in which it was tendered, and that they are making great exertions and incurring great expenses in order to meet our plans. (Cheers.) Of our own doings at the Commission, I should have preferred to remain silent; but I cannot let this opportunity pass without telling you how much benefit we have derived in our difficult labours from your uninterrupted confidence in the intentions, at least, which guided our decisions; and that there has been no difference of opinion, on any one subject, between us and the Royal Commissioners, which has not, upon personal consultation, and after open explanation and discussion, vanished and given way to agreement and identity of purpose. ("Hear, hear," and applause.) Allow me, gentlemen, after a short pause, proceeding with evident emotion.] There is but one alloy to my feelings of satisfaction and pleasure in seeing you here assembled again; and that is the painful remembrance that one is missing from amongst us who so warm an interest in our scheme, and took so active a part in promoting its success at the last and of whose public life was attending at the Royal Commission; the admiration for whose talents and character, and the gratitude for whose devotion to the Queen and private friendship towards myself, I feel a consolation in having had the opportunity to express. (Sensation and low murmurs of approbation.) I [illegible] at our last meeting we were still admiring his eloquence, and the earnestness with which he appealed to you to support the cause of the last and of whose sacrifices, what was, to him, the highest object—the honour of his country (Hear.) He met you the following day, together with other Commissioners, to confer with you upon the details of our intended undertaking; and from that time struck, as everybody has been who has had the benefit of his advice upon [illegible] with the attention, care, and sagacity with which he treated the [illegible] nothing is little (cheers), from the knowledge that, in the moral and intellectual, as in the physical world, the smallest point is only a link in that great chain, and holds its appointed place in that great whole which is governed by the divine wisdom. (Cheers.) The constitution of Sir Robert Peel's mind was peculiarly that of a statesman, and of an English statesman. (Cheers.) He was liberal from feeling, but conservative upon principle. (Loud cheers.) Whilst his impulse drove him to foster progress, his sagacious mind and great experience showed him how easily the whole machinery of a state and of society is deranged, and how important, but how difficult, also, it is to direct its further development in accordance with its essential principles, that is, to secure growth in safety. (Loud cheers.) It was also peculiar to him, that, in great things, as in small, all the difficulties and objections occurred to him first. He would anxiously consider them, ponder, and weigh them in his own mind, and then overcome it himself, after long and careful investigation, that a step was not only right to be taken, but of the practical mode also of safely taking it, it became to him a necessity and a duty to take it. (Cheers.) All his cautious and apparent timidity changed into courage and power of action, and, at the same time, enabled him to make any personal sacrifice which its execution might demand. (Vehement applause.) Gentlemen, if he has had so great an influence over this country [illegible] was from the peculiarly practical character of the type of the English character, which is essentially practical. (Cheers.) Warmly attached to his institutions, and revering the bequest left to him by the industry, wisdom, and piety of his forefathers, he was [illegible] little value to any theoretical scheme. (Cheers.) It will attract but little notice on only after having been for some time placed before him: it must have been thoroughly investigated and discussed before he will entertain it. Should it be an empty theory, it will fall to the ground during this time of probation; should it survive this trial, it will be on account of its practical qualities, [illegible] in it; but its adoption in the end will entirely depend upon its harmonizing with the national feeling, the historic development of the country, and the peculiar nature of her institutions. (Loud cheers.) It is owing to these national qualities that this favoured land, whilst constantly progressing, has still preserved the integrity of her constitution from the earliest times, and has been protected from wild schemes, whose chief charm lies in their novelty, whilst around us we have seen, unfortunately, whole nations distracted, and the very fabric of society endangered, from the levity with which the result of the experience of generations, the growth of ages, has been thrown away to give place to temporary favourite ideas. (Loud cheers.) Taking this view of the character of our country, I was pleased when I saw the plan of the Exhibition of 1851 undergo its ordeal of doubt, discussion, and even opposition; and I hope that I may now gather from the energy and earnestness with which its execution is pursued, that the nation is convinced that it accords with its interests, and the position which England has taken in the world. (His Royal Highness resumed his seat amid a vehement burst of applause, which was repeated again and again with the greatest fervour.)

The following toasts were then given:

"The Health of the Archbishop and Clergy." Acknowledged by the Archbishop of York

"The Army and Navy." Captain Campbell returned thanks

"The health of the Lord Mayor of London." His Lordship returned thanks.

"The Health of Lord John Russell and her Majesty's Ministers.

Lord John Russell in acknowledging the compliment, observed:—"I feel that, on this occasion, we have to consider what hopes we have of the success of the Exhibition of 1851, and I cannot but think that it is of good augury for that Exhibition that so many of the chief magistrates of the cities and towns of this kingdom should have invited his Royal Highness and the Lord Mayor of London here, on purpose to express their wishes that the Exhibition may succeed and prosper—(cheers) because I cannot forget that the chief magistrates of our municipal towns and corporations are not, like those in some other countries, the creatures of the Executive Government, but that they come from the popular will. (Hear.) They are the chosen of popular election, and chosen because they are believed to have the capacity, along with the councils which are associated with them, of preserving the peace, of providing for the security, and of taking care of the health of the cities and towns which are entrusted to their charge. (Hear, hear.) I say, therefore, that the mayors and chief municipal magistrates of this kingdom represent not merely their own views, but represent one of the most valuable parts of the institutions of this country; that, like those below them and those above them—like the vestry of the smallest parish, and like the Commons House of Parliament—they derive their strength and their force from their origin in the popular will, and the enjoyment of popular confidence. (Hear, hear.) And now, my Lords and gentlemen, let me say that I partake with those who have spoken in hopes of the brightest kind from the Exhibition of next year. I do so because I think that they are not direct, but many collateral, benefits which are likely to arise from this project (hear, hear); and let us consider that we are now about to try what can be effected by the arts of peace. Thirty-five years ago the nations of Europe were emerging from a dreadful, a costly, and a sanguinary war. In the course of which war the various nations of Europe exhibited—let it be confessed—let it ever be gloried in—exhibited all the virtues which are required in war courage and hardihood in enterprise, forti ude in enduring, stubbornness for the sake of their independence to the greatest and most painful sacrifice. They did all this because, whether wisely or unwisely entered upon, nations. Independence was the object—a prize for which every effort should be made. If the nations of Europe then exhibited, we may say, with scarcely an exception, the virtues which belong to war, I think that, after so many years of peace, it is now for us to show that there are advantages which can be gained from peace (hear)—that there are virtues which belong to peace. (Hear, hear.) I trust, in the Exhibition of next year, we shall show that we can promote the comforts, that we can enlarge the knowledge, that we can strengthen the kindly affections of mankind towards each other (hear, hear), and thus produce effects which, great as those virtues were when exerted in war, will be far more profitable to the world in general, and more consonant with those lessons which we learn from religion and from morals. (Cheers.) I trust, therefore, we shall allow not only that Peace has her victories as well as War, but that those victories, while they have as bright, have a far purer glory than any that can be attained by combat and destruction of human life. (Cheers.) I think, if we see that result, not only this country, but the nations of the world, will have reason to be grateful to that Prince who formed this project—who has persevered in it against all opposition (hear, hear)—who is about to reap the reward of his exertions (cheers), and who, endued with no hereditary much labour, to himself (hear, hear), but undertaken with views of benevolence and love for the interests of mankind. (Much cheering)

The toast of the "Royal Commissioners and the Exhibition of 1851," was responded to by Earl Granville.

The next toast, "The House of Lords," was proposed by the Lord Mayor of York, and briefly responded to by the Marquis of Clanricarde.

The toast of "The House of Commons" followed, and was acken wledged by Mr. E. B. Denison.

Lord Earl of Carlisle proposed "The Health of the Lord Mayor of York, the Lord Provost of Edinburgh, and the Magistrates of Dublin."

The Lord Mayor of York briefly acknowledged the toast, amidst great applause.

The Lord Provost of Edinburgh offered the sincere thanks of the municipal authorities of Scotland.

The Mayor of Cork and the Mayor of Bradford also acknowledged the toast.

The toasts of "The Lord-Lieutenant of the Three Ridings," "The Working Classes," "The County Magistracy," "The Magistracies of the Borough," and "The Lady Mayoress" followed, and it was midnight when the Prince left the table.

We annex the very *recherché* BILL OF FARE, in which M. Soyer employed the highest resources of his art:—

FIRST COURSE.—Trente-deux Potages: Quatre potages à la Victoria, quatre id à la Prince of Wales, huit id à la tortue transparente, seize id à la modeste. Trente deux Poissons: Huit [illegible] Trente deux Relevés: Six chapons à la Nelson, six saddles of mouton Galloa, quatre aiguays de Bœuf au Rudolf, six hanches de venaison, six quarter de veau à la Prince Albert, quatre jambons de Bayonne, quatre [illegible] Trente-deux Entrées: Huit jambons à la York, huit poularden à la Russe, huit timbales de ris à la Royale, huit pates chaud à la Victoria, huit [illegible] Huit salade de faisanes fumet de gibier aux truffes, huit de cotelettes de mouton à la Mecanisse, huit de blanes de volaille à la York, huit salade de volaille de vesta à la Reine, huit salade à la Pompadour, huit de salmi de gelier à la chasseur

SECOND COURSE. Quarante Rotis: Huit de perdreaux aux feuilles de cêlerî, huit de faisans bardés au cresson, six de canneteons au jus d'orange, six de grouses à l'Anglaise, six de levreaux au jus de groseilles, six de lievres et bécassines au vin. Cent Entremets Dix entremets de pois, dix gelées de fruits à la Portugaise, dix salades de grouses à la bayer, dix galantines asparagus à la Valdiri, dix petits Macedoines de fruit [illegible] dix petits pains de homard à la Cardinal, dix petits vols de volaille aux filets de crevettes à la Duke of York, dix crêmes transparentes au kirchenwasser [illegible] dix salade à la Victoria, dix petits pains de Montmorency [illegible] dix pâtes de fraises aux Mayonnaise, dix jambons en surprise à l'Ananas. Gelées à la Crême, Choux fleurs au beurre, Harricots verts, Choux de Bruxelles. Gelée: Vegetables, grand dessert formé à la [illegible]

LA TABLE DES OFFICIERS OF THE ROYAL TABLE.—Les rougets à l'Huilleme blanche, le John Dory à la maréchale, l'extravagante esturgeon à la sauce piquante, le vol au vent à la Reynard le pain à l'Impériale Rome, garni des ortolans, les gardanchs des Ardennes, la crême de la Grand Victoria, le crême de la Grand Jerusalem à Albert, les requailles aux huitres à la Orland, la barre de sanglier à l'Allemande en surprise. Dessert formé à la [illegible] Ramée Vendémiaire, Bombes les pêches de Montreuil, ananas [illegible] Muscat, melons, bananas, compôte de Chamounelle. Poires à la Duchesse d'Abercorn.

We have engraved "the Hundred Guinea" Dish, from the Royal table the chief items of this Apician group were turtle and ortolans.

At the Royal table, also, were two magnificent pines (from Chatsworth), presented by his Grace the Duke of Devonshire. These pines weighed nearly 15 lb. each, and were of the variety named "the Queen" "Royal Providence."

The wines were selected with great judgment by the committee, and were of the highest character. The port and sherry for the Royal table were ordered, at wholesale prices, from Messrs. Chalmgworth and Son, of London, wine-merchants to her Majesty.

There was a grand concert and a ball in the Great Assembly-room during the evening; and the whole city of York was brilliantly illuminated.

Prince Albert, who was the guest of the Lord Mayor of York (Mr. Seymour) on Friday night, left the Mansion House at eight o'clock on Saturday morning, and was accompanied to the railway station by the Lord Mayor, the Marquis of Abercorn, Colonel Grey, Colonel Seymour, Mr. Dolby, and Mr. G. W. Seymour. Upon his departure, His Royal Highness thanked the Lady Mayoress for the very satisfactory arrangements which had been made for his comfort and accommodation. The Prince arrived at the railway station at twenty minutes to eight. The principal railway officials were in waiting on the arrival of the train, to receive his Royal Highness, who immediately got into one of the Royal carriages, which was in waiting, and drove to the North Western station of the South-Western Railway, where a special train was ready to convey the Prince and his suite to

GREAT INDUSTRIAL EXHIBITION OF 1851.

All doubts and misapprehensions are vanishing before the evident and wonderful progress of the building in Hyde Park, the activity of the local committees, and the satisfactory advices from foreign contributors respecting the articles to be exhibited. Independently of the vast extent of iron-work in columns, trusses, and girders which has been brought on the ground (lately some [illegible] orders per day), and fitted, parts of the structure are being thoroughly finished, glazed, painted, and covered for security against wet weather. For the roofing has been begun in every part. Some of the columns for the roof have been raised to their extreme height of 66 feet; those only of the transept being higher by 42 feet. An idea of the vast amount of material to be employed may be conceived from the fact that the entire length of the *sixth bars alone* is above 208 miles. The contractors are confident that they will erect and make a [illegible] of the whole ten days' work, from the 26th of the 1st January. A well-trained army of men, above 1000, and to be increased to 1500 in number, steam-engines and machinery wherever it is applicable, back their expectations

During the ten days' work, upon the roof, we have every reason to be confident that the applications for space from contributors. The Dublin committee, acting under suggestions from Mr. Wallis, a deputy from the executive committee, have guaranteed a fine display of Irish industry. The Edinburgh committee demand [illegible] feet space, principally for raw materials and manufactures. The Sheffield committee have considerably increased their proportional quota of contributions. There are 240 firms of Birmingham silver and Britannia metal and cutlery, who ask for 8000 feet of space. The Leeds committee [illegible] by with their arrangements. The visiting associations are also [illegible] Leeds, Selby, Exeter, Leicester, Devonport, Southampton, and Bradford, the mayor of which latter town is a staunch and active friend to the great enter-

prise. The average deposit is from 1s. to 6d. per week to pay all expenses. Mr. T. Martin, of Reigate, has offered to lads of the town who will save 1d. per week, to bank their visit, &c. to the Exhibition

The meeting of the mayors at York on the morning after the dinner was of material advantage to certain districts—those in the cotton manufacture. Manchester and Glasgow were then and there urged to forward *complete* specimens of their local industrial employment (Manchester has been throughout laggard, from some selfish reason). The Mayor of Leicester promised to attend to the hosiery department of his town. Worcester was asked to send its best specimens of gloves. The ornamental iron was declared to be insufficient. Cutlery, hitherto meagrely produced from Sheffield, was to be looked after, as America, Belgium, and Germany will in this branch specially compete. A want of cordiality was reported to exist among the shareholders of Birmingham, but this great town has but poorly advanced the interests of the Exhibition up to the present time). The carpet and lace divisions were said to be well-selected. Macclesfield was affirmed to be behind in its silk; and the returns generally, in satins, velvets, gauzes, and crapes, it was stated, might be considerably bettered. The municipal officers of Leith, Hull, and Liverpool promised cases illustrative of the imports of their native towns.

Heavy woollen goods are to be supplied from the Yorkshire districts. A Birmingham firm will exhibit cutting and hooking machines—one especially for shaping the fronts of Wellington boots. Power-looms will be forwarded from Blackburn.

The foreign authorities have been especially alive. Russia has already several cases of goods in the metropolitan docks. France has received official directions for the forwarding of her contributions

Bavaria has applied for more space in the fine-art department. There are returns in metal-work, *papier-maché*, porcelain, and silk, expected from Germany at large. Belgium will send a varied and extensive display of manufactures and textile fabrics.

The Central Committee of the United States, at a meeting on the 16th Sept., President Fillmore in the chair, after reading communications from the American Minister in London, presented the following list of articles which they were believed their vast territories would forward: Beef, pork, hams, butter and cheese, wool, hair, feathers, down, fur, lard, candles, honey, wax, spermaceti, skins, hides, hops, wheat, flour, straw plait, cotton, rice, tobacco, sugar, and descriptions of timber, building stores, precious metals, cutlery, locks, rifles, bowie-knives, clocks, gold pens, all agricultural machinery, printing presses, pianos, iron and manufactures of iron, leather, textile and fibrous materials of every description, &c.; which Mr. T. Grunough, of London, would take charge of on arrival here.

Gossip is liberal as its thousand rumours and suggestions. The *Athenæum* records a new building, cutting of the parks after this occasion. A club of foreign merchants to receive visitors is talked of in the City. The *Chronicle* properly reprobates the great City companies with their nearly and selfish indifference. None of the masters, wardens, or other officers appear upon the City committees. The labours of the executive committee respecting the awards of space to the applications will forthwith commence. They will determine the relative proportions to be borne to the great divisions and classes of the exhibition; and, after minute examination of the claims, &c., of the various local committees, will decide on the amount to be allotted to each in the several departments.

Preparations are in progress for the reception of foreign visitors in the suburbs, and to organise local committees of the tradesmen most likely to be interested, who shall be responsible for all the arrangements; the terms, &c. of which should be officially registered by the commissioners, or their agents, and foreign consuls.

Mr. Wyld, of Charing-cross, has just issued a neatly engraved Outline Elevation and Plan of the Great Building, the price of which is One Penny.

COUNTRY NEWS.

THE PEEL STATUE AT BIRMINGHAM.—The subscription for this object is not advancing very rapidly; but there appears to be little doubt that the sum of £2000, which is the amount required, will be realised. During the last few days the following amounts have been received:—From Messrs. Wm. and F. Room, £3; Mr. G. Homer, Solihull, £2; workpeople of Messrs. James Cartland and Son, £9. Messrs. William Blews and Son, £2 2s.; Atlantic Institute, 16s. 6d.; the people of Messrs. Day and Millward, 10s. 8d.; Mr. John Kendrick (third subscription), £1; and Mr. George Unite (second subscription), £1 1s.

GISBOROUGH MUTUAL IMPROVEMENT SOCIETY.—The inhabitants of Gisborough and neighbourhood were entertained on the evenings of Monday, Tuesday, Wednesday, and Thursday week, by a course of lectures delivered by Mr. John Inwards, on phrenology and mesmerism, which were well attended, a great proportion of the audience comprising the grace and beauty of the vale of Cleveland.

NECESSITY FOR AN EMIGRANTS' HOME.—In the dreadful gale of Monday week, the emigrant ship, *Rio Grande*, which had sailed from Liverpool with two hundred emigrants on board, was driven back into port. The decks had been swept by the waves, and the bedding and clothing of the poor creatures were drenched with wet. It was absolutely necessary that they should leave the vessel for a day or two until the ship should be set to rights. As no other place could be found, they had to be sheltered in empty houses, cellars, and other similar places, totally unfit for women and children, and scarcely fit for men. Fortunately, the ship was got ready for sea on Wednesday, when the emigrants were able to leave their uncomfortable places of refuge to proceed on their voyage

ENTHRONEMENT OF THE NEW ROMAN CATHOLIC BISHOP OF BIRMINGHAM.—Dr. Ullathorne, in accordance with the recent Papal Bull, was on Monday enthroned in the cathedral in Bath-street as Roman Catholic Bishop of Birmingham, his spiritual jurisdiction extending over the counties of Warwick, Worcester, Stafford, Berks, and Oxford, with the administration of Nottingham. In consequence of the novelty of the ceremony, and the interest which the Pope's ecclesiastical appointments have given rise, the cathedral, before the commencement of the service, was densely crowded; but it was evident that a large portion of those present were attracted by motives of curiosity which the non-members of the Roman Catholic Church. Pontifical high mass was celebrated by the bishop, assisted by Dr. Weedall, and a very numerous retinue of priests. The sermon, announced to be preached by Dr. Newman, the head of the Established Church, but now Father Superior of the Oratorians in Birmingham, excited, by anticipation, most interest, and led, without doubt, to the numerous attendance of Protestants, who were to be seen in all parts of the cathedral. The attendance at the Cathedral in the evening, to hear Dr. Ullathorne's inaugural discourse, was quite as numerous as that of the morning. He stated that the office of Bishop was not voluntarily assumed, but was an appointment by the Holy Ghost, to whose authority the Catholic clergy were bound to submit. The Right Rev. Prelate dwelt at great length upon the duties and responsibilities of a Bishop. They were purely spiritual, not secular or political; and as the interests of eternity were infinitely more important than those of an earthly Prince or Potentate. Throughout the entire sermon, which was eminently plain and practical, the doctor never in the slightest degree referred to the controversy now waging against the Pope's assumption

EXTENSIVE ROBBERIES ON THE YORK AND NORTH MIDLAND RAILWAY. Very extensive robberies of valuable goods have for some time past been place in connexion with this railway, and the result of investigations just made have led to the discovery of a system of plunder reaching over a period of years. Since 1847, the company have been called upon to make good many claims of lost goods, consisting of damasks, silks, woollen cloths, shawls, dresses, plate-casts, jewellery, and other consignments, and four persons, formerly in the company's service, are now in custody, who, it is alleged, have supported themselves and families by a wholesale system of theft, for the last two years, by robbing the goods trains of the company at Middlethorpe station, where they stop.

ALARMING AND DESTRUCTIVE FIRE IN YORK.—On the night of Tuesday last the ancient city of York was visited by a dreadful conflagration at the extensive premises of Mr. Catley, raff-merchant, in Blake-street, and it is estimated that £3000 will not cover the loss sustained. Shortly after eleven o'clock flames were seen issuing from the roof and windows of the saw-mill, a large building on the right hand side of the raff-yard. An alarm was, as a matter of course, instantly raised, and in a few minutes multitudes of persons were on the spot ready to render assistance in counteracting the destructive element. All efforts, however, on the part of the firemen seemed unavailing for several hours, as the fire raged with as much fury as ever; and it was not until between four and five o'clock next morning, that the flames became so far subdued, as to dissipate all fears of their spreading any further. The saw-mill, part of which is still remaining standing, was a valuable building, containing a large quantity of machinery, worked by steam power, for sawing timber of various kinds, cutting veneers, and wood-turning generally. The machinery is entirely useless, and now lies scattered about among huge masses of charred beams and ashes. It may be observe l, that the raff-yard belonging to Mr. Catley covers a considerable area, and was surrounded by sheds and dwellings, one shed, which contained a quantity of mahogany, is entirely destroyed, along with its contents; another shed is half burnt; and two houses, where some of Mr. Catley's workmen resided, have been gutted by the flames. It is satisfactory to state that no life has been sacrificed, neither has there been any accident to a single individual engaged at the fire. Nothing definite is known respecting the origin of the conflagration, but it is supposed that some sawdust had ignited in the saw-mill, and hence the great destruction of property which we have related. In the raff-yard, and the buildings adjoining, it is estimated that there was wood and other property worth not far short of £10,000; consequently, considering the combustible nature of the materials which the fire had in play upon, it is fortunate that the damage is not less than the value of one-third of the timber destroyed. Mr. Catley is insured in the Yorkshire Insurance Company to the extent of £1000 only, and, if he should not be insured in some other office, his loss will be a serious one. During the greater part of the following day the fire-engines were, at intervals, in operation, as the conflagration was not total y extinguished.

EXTENSIVE SEIZURE OF GUNPOWDER.—Considerable interest has been created at Birkenhead and the neighbourhood of Seacombe, by the seizure on board a coal hulk, moored off the magazines, of sixty packages containing not less than 2000 lb weight of gunpowder, and about half a dozen cases of caps; the latter being supposed to be part of the cargo of the *Providence*. We understand that proceedings are about to be taken under the act of Parliament which requires that all gunpowder should be stored in the magazines.—*Chester Courant.*

CHESS.

TO CORRESPONDENTS.

JUVENTUS.—The Grand Tournament will be held at the St. George's Chess Club. That, therefore, is the proper club for your team

B. C. A. (ALDERSHOT GRADUATE).—Your Curious Puzzle Mate.—They shall be examined

J. W. Longhurst, M.P.—Your very creditable to your young friend's efforts; but our space is too limited to admit of their insertion

J. H. DUD.—Your solution of Problem No. 351 is incorrect. Examine it again

CAPE TOWN.—It is too true, as we found out very shortly after the Problem appeared

J. S—A player must not capture any piece in the act of Castling

J. L. F—1. You are correct in the principle upon which the solution of the Kling and Horwitz Problem is founded. 2. Your own Problem is now under consideration

W. H. G.—We can give no decision unless the circumstances are stated

R. B. W. Oxford—How do you propose to mate in your last if B.sack, for his first move, play B to Q 3d?

BELLARY.—Surely an easy mate in two moves. 1. Q to her 4th (ch) 2. Kt to K 4th—mate!

J. W. Longhurst, M.P.; PHILO-CHESS.—Your suggestions relative to the Chess Congress next year shall not be forgotten. See the *Chess-Player's Chronicle* for November, just out, for the information you require

HIPPOPOTAMUS.—Your adversary could compel you to retract the last move, and place your King out of check

IBERIA, R.F.L.—We are sorry to say they are quite unsuited for publication

J. B. Worcester—1. If the funds of your Club permit, you should obtain the chief English standard treatises on the game; thus, with the *Chess-player's Chronicle*, will form an ample library for the present. 2. The price of the forthcoming work on game endings, by Kling and Horwitz, will be 5s to subscribers, and 6s to the public at large

THE R. T.—If everything, we rejoice to say, proceeds most favourably for the expected tournament next year. Already a France has shown a surprising the liveliest enthusiasm, and a corresponding interest will, no doubt, be manifested by the German and Italian players, as soon as they become acquainted with the project

H. B. City-road—Very smartly played by Wilde. The other games promised we have no doubt will prove equally acceptable

T. B. DARLINGTON.—You will see from the advertisement of the "Staunton Chess-men in another part of our paper, that they may be had now, in a plain mahogany box, for 30s the set. They are, therefore, not only the best, but the cheapest men you can have

AGHOLLA.—Send a Post-office order, payable to the publisher of the *Chess-Player's Chronicle*, 2d, King William-street, Strand, and he will forward you a set free of cost for carriage

BETA.—It cannot be solved in the way you proposes

T. B. J.—The whole of the games in the Grand Tournament will be printed; and we believe it is intended that every subscriber of a guinea and upwards shall be entitled to a copy of them

J. A. L.—What is the peculiarity of your new Chess-table?

CATO.—The key move in M. Kieseritzky's "Fashion Caresses," Enigma No. 369, is—1. P to Q B 5th.

Q B 5th. Your problem shall not be slighted

ESSENTIAL PIECES.—The funds of many Chess Clubs should lose no time in forming committees for the purpose of raising subscriptions and appointing their champions, to carry out the object of the great assemblage next year

C. M. J. Your solution of the beautiful little Problem No. 349 is egregiously wrong, as a moment's examination must show you

T. Sheffield. We beg to acknowledge the receipt of the Rules and By-Laws of the new Chess Club at Guildford

A CAMBRIDGE GRADUATE.—It shall have immediate insertion

B. H. We see no mate in six moves, if Black play correctly

A. NEAT. R. S. New York; P. S. Nottingham.—Private communications have been forwarded

B. B.—Be very clear Enigma, No 363, is so instructive, that we must leave you and others to find out for yourself

J. A. L.—What is the peculiarity of your new Chess-table?

CATO.—The key move in M. Kieseritzky's "Fashion Caresses," Enigma No. 369, is—1. P to Q B 5th.

Q B 5th. Your problem shall not be slighted

ESSENTIAL PIECES.—The funds of many Chess Clubs should lose no time in forming committees for the purpose of raising subscriptions and appointing their champions, to carry out the object of the great assemblage next year

C. M. J. Your solution of the beautiful little Problem No. 349 is egregiously wrong, as a moment's examination must show you

T. Sheffield. We beg to acknowledge the receipt of the Rules and By-Laws of the new Chess Club at Guildford

A CAMBRIDGE GRADUATE.—It shall have immediate insertion

B. H. We see no mate in six moves, if Black play correctly

A. NEAT. R. S. New York; P. S. Nottingham.—Private communications have been forwarded

B. B.—Be very clear Enigma, No 363, is so instructive, that we must leave you and others to find out for yourself

J. H. DUD—The solution of Enigma No. 369 is accomplished as follows:—1. K to his 5th; 2. Kt to K 6th; 3. B to Q 3d, and 4 B mates

AMICUS.—Incessant practice with good players, and a judicious course of Chess study, will soon give you a competent knowledge of the game. See notice above to J. H

SOLUTIONS of PROBLEM No. 350, by F. of Graham's Town; SENEX, S W H, R D M, H R J, J F, DERBYON.—All correct. All others are wrong

SIMPLE SIMON.—Much too obvious

E M—Neat, but far from original

* * * Very many communications on Chess must stand over until next week

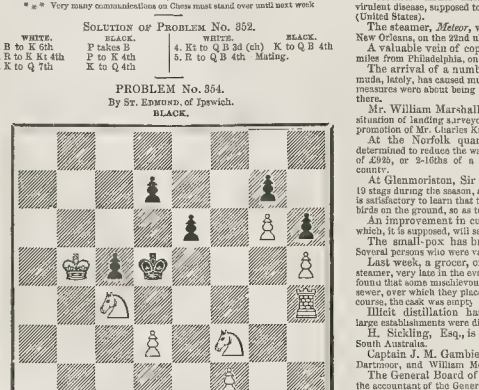
SOLUTION OF PROBLEM No. 352.

WHITE.	BLACK.	WHITE.	BLACK.
1. B to K 6th	P takes B	4. Kt to Q B 3d (ch)	K to Q B 4th
2. Kt to K 4th	P to K 4th	5. R to Q B 4th. Mating.	
3. K to Q 7th	K to Q 4th		

PROBLEM No. 354.

By Sir. EDMUND, of Ipswich.

BLACK.



WHITE.

White to play, and mate in five moves.

SECOND MATCH BY CORRESPONDENCE BETWEEN THE LONDON AND AMSTERDAM CHESS CLUBS.

WHITE (London).	BLACK (Amsterdam).
	17. P to K B 3d
18. B to K Kt 4th	18. Q B to K B 2d

London to play.

CHESS IN THE METROPOLIS.

GAME BETWEEN MR. W—L., M.P., AND CAPTAIN KENNEDY.

(King's Bishop's Gambit.)

WHITE (Mr. W.)	BLACK (Capt. K.)	WHITE (Mr. W.)	BLACK (Capt. K.)
1. P to K 4th	P to K 4th	17. K R to Kt 4th	Q to K R 6th (ch)
2. P to K B 4th	P takes P	18. K to his 2d	Q to K R 7th (ch)
3. K B to Q B 4th	Q to K R 5th (ch)	19. K to Q 3d	Castles
4. K to B sq	P to Q 3d	20. Q B takes P	Q to K R 7th
5. P to Q 4th	P to K Kt 4th	21. P to Q B 3d	Kt to K 4th (ch)
6. K Kt to B 3d	Q to K R 4th	22. Q B takes Kt	P takes B
7. P to K R 4th	K B to K Kt 2d	23. P to Q 4th	P takes Q P
8. K to Kt sq	Q B to K Kt 5th	24. B takes P	P to K B 4th
9. K R P takes P	Q B takes Kt	25. R to K Kt 6th	P takes P (ch)
10. P takes B	Q takes Kt P (ch)	26. P takes P	R takes B (ch)
11. K to B sq	K Kt to K 2d	27. P takes R	P to K 5th (ch)
12. Q Kt to B 3d	K R to K Kt sq	28. K to Q B 4th	Q to Q Kt 3d (a)
13. K R to K Kt sq	Q to K R 3d	29. Q to K 4th (ch)	K to Kt sq
14. Kt to Q 6th	Kt takes Kt	30. Q to K 2d (ch)	K to R sq
15. B takes Kt	P to Q B 3d	31. R takes B (b)	R to Q B sq (ch)
16. B to Q Kt 3d	Q Kt to Q 2d	And White resigned.	

(a This move of Black's Queen was made in anticipation of his antagonist's next move (Q to K Kt 6th, ch), and in the hope, which was realised, of subsequently being able to give the fatal check with the K R P.

(b) White now commits the brute valle error of taking the Bishop; but an examination of the position will show, we think, that, under any circumstances, he could scarcely have done better than make a drawn game

THE CHESS CONGRESS OF 1851.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR,—I must crave indulgence for intruding upon you; but, having read in your admirable Journal the excellent letter of my chess-brother, Captain Kennedy, of Brighton, I cannot refrain from recording my unqualified approval of what he has written on the subject, and the happy and lively style in which he has expressed his opinion. Since the idea was first talked of at the last meeting of the Yorkshire Chess Association, in May, of which I had the honour to be Chairman, there have been many ideas that to see it carried out; and I trust the gallant Captain's letter will arouse the warriors of Chess like the blast of a trumpet. Though in the "sere and yellow leaf," Captain Kennedy has done me the honour to call me by my name among a host of scientific men, although I feel my deficiency as an actor in the great drama, as a contributor to the necessary funds I shall be proud to present five pounds to the managing committee, as soon as appointed. As brother chess-players, let us dismiss all jealousy, irritability, and pride of former position, and unite cordially in the good work. I, for one, hope to be present at the tournament that I may give the right hand of fellowship to many a celebrated brother. I shall be delighted to encounter any one who will consider me worthy the trouble, and I promise to take a sound beating with all the equanimity possible.

I am, Sir, your obedient servant, SAMUEL NEWHAM.

The Park, near Nottingham, Oct. 28, 1850.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

At the Central Criminal Court, on Monday last, Henry Denham, who is suspected of having been one of the persons that attacked and robbed Mr. Cureton, of the British Museum, in the City a short time back, was convicted of an aggravated assault upon and attempt to rob Mr. Miller, artist's colourman, Long-acre, on the night of the 21st of August last, in the public thoroughfare. He was sentenced to 20 years' transportation.

The parish of Whitechapel is setting an excellent example to the metropolitan parishes whose churchyards will be closed under the operations of the new Interments Act. Under the direction and superintendence of Mr. Curtis, who planned and planted the new Victoria Park, the churchyard is now being planted with evergreen and deciduous shrubs and trees. As it is a well-ascertained fact that trees absorb and convert the noxious gases given off by the process of decomposition, we hope that so laudable an example will be universally followed.

A notification has just been issued to the following effect:—That it is the intention of the Lord Chancellor (as soon as practicable) to issue an order, directing that all the causes and matters, which, at the time of the resignation of the Vice-Chancellor Sir James Wigram, were attached to his court, shall be transferred and attached to the court of the Vice-Chancellor Sir James Lewis Knight-Bruce, and that all the causes and matters which, at the time of the death of the late Vice-Chancellor of England, were attached to his court, shall be transferred and attached to the court of the new Vice-Chancellor.

The Rev. Professor Holmes, of Shrewsbury, died of apoplexy last Tuesday, in an omnibus. He had gone to the station, intending to visit Chester, but, feeling unwell, re-entered the vehicle in order to return home. When the omnibus arrived at his residence, he was found at the bottom quite dead.

Cape of Good Hope papers to the 14th of August state that the settlement was free from any additional disturbance, and there appeared to be a general expectation that, after the terrible examples set them, when in opposition to the authorities, the native tribes beyond the frontier would be more observant of treaties than they have hitherto been; and that, in those distant regions, something like tranquility would prevail for the future. The Caffre fever had been attended with great mortality in the Zulu country.

On Saturday morning week, a stag of enormous size passed through the General Railway station at Perth, from Atholl forest, to Edinburgh, for the purpose of being stuffed. Its weight was upwards of twenty two stone. The antlers were of great expanse, and each spread into nine branches.

The Gazette of Stockholm, states that the population of Sweden at the end of the year 1845 was 3,316,536. The cholera has broken out in Gothenburgh and other places.

The house now building for Tom Thumb at Bridgeport, Connecticut (United States), is said to be a remarkable edifice in some respects The little fellow has rather grand notions of space, and has planned for himself ample rooms, wide passages, and lofty entrances, as if it were a mansion for Patagonians. After considering with a stag of enormous size passed through the General Railway station at Perth, from Atholl forest, to Edinburgh, for the purpose of being stuffed. Its weight was upwards of twenty two stone. The antlers were of great expanse, and each spread into nine branches.

Advices from Clarkesville, Tennessee, state that from one-third to one-half of the tobacco crop has been killed by severe frost.

The monster steamer, 400 feet in length, and to cost 420,000 dollars, has been contracted for at Cincinnati, to run as a regular ten-days' packet between Louisville and New Orleans

The North Oxford, Massachusetts, cotton factory was destroyed by fire on the 7th ult., entailing a loss of $9,000 dollars.

Accounts under date October 11th bring intelligence that a virulent disease, supposed to be cholera, had broken out at Kernstown, Virginia, (United States).

The steamer, *Meteor*, whilst on her passage from the Red River to New Orleans, on the 22nd ult., caught fire and was burned to the water's edge.

A valuable vein of copper ore has been discovered about twenty miles from Philadelphia, on the Schuylkill river.

The arrival of a number of liberated English convicts from Bermuda, lately, has caused much anxiety at Baltimore, United States. Energetic measures were about being taken to prevent such persons being landed again there.

Mr. William Marshall, senior searcher, has been appointed to the situation of landing surveyor of customs at the port of London, vacant by the promotion of Mr. Charles Knox to the situation of president of that office

At the Norfolk quarter sessions, on Wednesday week, it was determined to reduce the wages paid to the rural police, so as to effect a saving of 2d per, or 2-16ths of a penny in the pound, upon the assessment of the county.

At Glenmoristan, Sir Henry Meux, Mr. Arabin, and party, killed 19 stags during the season, and they had very good sport among the grouse. It is satisfactory to learn that the grouse were healthy. Sir Henry has left plenty of birds on the ground, and so ensured good sport next season.

An improvement in curing sugar has been discovered in Barbadoes, which, it is supposed, will save above £50,000 per annum to that island.

The small-pox has broken out with great virulence at Barbadoes. Several persons who were vaccinated some years ago had taken the disease.

Last week, a grocer, of Cambelton, receiving a cask of train oil per steamer, very late in the evening, left it in the street. The next morning he found that some mischievous schoolboys had rolled the cask to the grating of a sewer, over which they placed the bung-hole and knocked out the bung. Of course, the cask was empty

Illicit distillation has become very rife in the Highlands. Two large establishments were discovered last week.

H. Sickling, Esq., is appointed Master of the Supreme Court at South Australia.

Captain J. M. Gambier is appointed Governor of the new prison at Dartmoor, over William Morrish, Esq., Deputy-governor.

The General Board of Health have appointed Mr. H. R. Williams, the accountant of the General Steam Navigation Company, to be Treasurer and Accountant under the Metropolitan Interments Act.

Harcanaki accounts to the 8th ult. state that great excitement existed there in consequence of a report that 6000 men were congregated in the United States ready to embark for another expedition under Lopez. The Captain-General had disbanded the volunteers through fear that they were leagued with invaders. The soldiers slept on their arms, and the navy was in the best possible order. The disarming of volunteers, caused considerable excitement between the captain-general and the citizens. The rumour is thought to have originated with sugar speculators, to keep prices down.

A letter from Vienna of the 21st states that extensive beds of sulphur have been discovered on the banks of the Red Sea, near Keusch.

A curious fact, which will serve to show about with him the savings of many years of industry and self-denial, amounting to upwards of 100 guineas, was robbed a few days ago by a fellow lodger, who abstracted his trousers, containing the hoard, from under his pillow. The thief decamped in the night, and when taken by the police £38 was found in his possession. The carter told the magistrate that he "never dare trust the banks; they were always a breaking, or summut."

At Pesth, on the 12th ult., a fire broke out in the Royal Hospital, an immense building. The flames spread with great violence, and were increased by a strong north wind. In a little while the whole building was a mass of flame, and the beds, 900 in number, and all other things it contained, were destroyed by the fire. The fire continued burning until nothing was left standing but the outer walls. At the commencement of the conflagration, all efforts were employed to rescue the sick; and, out of 711, all were saved except 34, who were burned to death. Those who were all affected with mental alienation, and were confined in cells, in the third story of one of the wings.

At a meeting of magistrates held at the Surrey House, Newington-causeway, last week, with reference to forming a police force for the county, it is understood that it was determined to have a force, mounted or otherwise, to the extent of between 70 and 80 men, for Surrey.

On Wednesday last, an enormous shoal of fine herrings entered Little Loch broom, in Inverness-shire, to the delight of the natives, who are very successful in their takes of fish. The loch is literally swarming with fish.

The county of Essex is said to have saved some thousands per annum, by making the police force the relieving officers for tramps.

A sub-committee of the nuisance-suppression section of the Manchester town council have reported the consumption of smoke is quite practicable, and they cite a large number of cases in which manufacturers have effectually prevented the nuisance of smoke, and in every instance with a considerable saving of fuel.

The imports of foreign grain, &c., into Liverpool for the fortnight ending 23d of October, 1850, were:—105,626 bushels wheat, 3549 bags ditto, 24,703 bags of wheat flour, 614 bags ditto, 150 bags farina, 34 barrels ditto, 20,500 bushels beans.

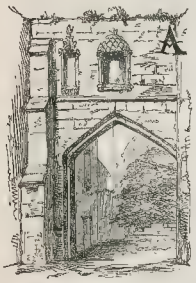
The Commissioners of Inland Revenue have fined the Dundee and Arbroath Railway Company in £100, for overcharging on parliamentary or third-class, passengers, besides taxing the whole of the money paid by the passengers at the rate of 5 per cent., as if it had been paid by first and second class passengers. Similar overcharges made by the Stirlingshire Midland Junction are to be dealt with in the same way, under the General Railway Act

The coroner's inquest into the circumstances attending the death of the late Rev. G. E. Holleat, which was commenced on the 31st Sept., was resumed and concluded, at the White Hart, Barnes, on Tuesday last, when the jury agreed to a unanimous verdict of "Wilful murder against Hiram Smith, Levi Harwood, and James Jones;" expressing, at the same time their opinion that the evidence had before them was not sufficient to justify a verdict of wilful murder against Samuel Harwood. The jury also declared that there had been no evidence adduced before them to show by which of the three other persons the fatal shot had been fired.

The tug-steamer *Powerful*, which has been for a long period engaged in towing lighters, &c., about Harwich Harbour, being required at Dover, was steaming her way thither under the charge of a Dover pilot, when, under circumstances not yet clucidated, she struck upon the Long Sand, and ultimately sunk in deep water, at about 9 P.M. on Saturday last. The crew were picked up on Sunday morning, and taken to Shoreham, Kent.

TERCENTENARY ANNIVERSARY OF KING'S SCHOOL, SHERBORNE.

TERCENTENARY ANNIVERSARY OF THE FOUNDATION OF THE KING'S SCHOOL, SHERBORNE.



AN interesting festival was held on the 23rd ult., in commemoration of the Tercentenary Anniversary of the foundation of the King's School, at Sherborne, founded by King Edward VI., by letters-patent dated May 13th, 1550; unavoidable obstacles having prevented its being kept on the exact anniversary.

The weather was very favourable, and the gathering very large, owing as well to the anxiety of all old Sherbornians, who were within anything like distance, to meet their old schoolfellows, as to the very large attendance of gentry from the immediate neighbourhood. The arrangements were under the direction of a committee, amongst whom were the Earl Digby, Lord-Lieutenant of the county, the Earl of Ilchester, the Right Honourable the Vice-Chancellor Knight Bruce, Right Hon. S. March Phillips, the Warden of Wadham College, Oxford, Sir W. Medlycott, Mr. Bruce Pryce, and other celebrated old pupils of the School, with the members of the county, some of the leading gentry in the neighbourhood, and the Governors and others connected with it.

At half-past ten o'clock, the company assembled in the School-room, and a procession was formed, headed by the beadles, followed by the Governors of the School, the boys and masters, and some two or three hundred ladies and gentlemen; they proceeded to the church, where a sermon was preached by the Rev. R. Lyon, D.D., some time Head Master, after which the company returned to the School-room, where an address was delivered by the present Head Master, the Rev. H. D Harper, M.A., Fellow of Jesus College, Oxford, tracing, at considerable length, the rise and progress of the School, from its foundation to the present time, and claiming a great number of celebrated men, as well in the world at large as in the universities, as having been educated at the School.

A party of about 300 ladies and gentlemen afterwards sat down to an elegant *déjeuner* in the Town-hall, where some very excellent speeches were delivered. There was also another meeting in the evening, when upwards of 120 gentlemen sat down to dinner, and passed a very joyous evening in the renewal of old associations and the recollections of former days. Some of the party had been at the School before the beginning of the present century, and had travelled long distances to attend on the occasion.

The King's School at Sherborne was the first of Edward's foundation, in all probability owing its position to the Protector Somerset, who at the time held the estates of Sherborne Castle. After the death of Edward, the estates were restored to the See of Sarum, to which they properly belonged; and Bishop Jewel took an active part in the arrangement of the School premises. Among the books of the library are presents from Jewel, the Hon. Robert Boyle, Earl Bristol, William Lord Digby, Sir Phillip Sydenham, Bart., "the learned Thomas Windham," and others. The School suffered much in the civil wars; and, when the forces of the Parliament occupied Sherborne Castle, the warden and several of the governors were amongst those who were imprisoned, and whose estates were confiscated; and the emblems of Royalty about the premises caused the anger of Captain Helyer, "a Capitayne of ye Parliamente." The estates of the School have considerably increased within the last century, and give it a high position amongst the leading schools of England.

THE BRITISH EMBASSY AT COPENHAGEN.—On Wednesday, the 16th ult., a dinner was given by the Marshal of the Court Levetzau, on the 25th anniversary of Sir Henry Wynn's residence as British Ambassador Extraordinary at the Court of Denmark. The King of Denmark, on this occasion, presented to Sir Henry, by the hands of Chamberlain Von Reedtz, Minister for Foreign Affairs, a tankard of the most beautiful workmanship, produced in the *atelier* of M. Michelsen, of this city. On the four sides were portraits of the four Danish Monarchs to whom Sir Henry had been accredited; and it bore the following inscription:—

This Tankard is presented by FREDERICK VII. to SIR HENRY W. W. WYNN, who, as the Representative of four British Sovereigns to four Kings of Denmark, has promoted the continuance of, and confirmed the good understanding between, Great Britain and Denmark.

The banquet was of the most splendid description. The Hereditary Prince of Denmark, the diplomatic corps, all the Ministers, and many persons of distinction attended at it. The warmest feelings of regard and respect were manifested towards Sir Henry Wynn by all present, not only for his services as ambassador, but also for his private worth and amiable character, which have so much endeared him to every one who has had the honour of his acquaintance.

STEAM-SHIPS IN AMERICA.—Within the last three or four weeks there have been launched no less than seven large steam-ships, viz the *Prometheus*, *Humboldt*, *St. Lawrence*, *Pacific*, *Brownsville*, and *Louisiana* (first known as the *Matamoras*), and *Union*. Another, the *Placer*, for Davis and Brooks, to run in the Gulf of Mexico, will, probably, be launched before the close of next week. During the same time, five steamers have either gone to sea, or made their trial trips, viz.—the *Pacific*, *Florida*, *New World*, *Franklin*, and *Columbus*. There are now at this port twenty steam-ships, either on the stocks or receiving their machinery, whose aggregate tonnage is about 35,000 tons. Several of them will be ready for sea this season. Besides these, about twenty sail of craft of various descriptions are in progress in the yards of the city and its suburbs.—*New York Paper*.

On digging for the foundations of a new church at Ilfracombe, a most abundant spring of pure water, an article hitherto unknown in that town, was discovered.

PARIS FASHIONS FOR NOVEMBER.

PARIS FASHIONS FOR NOVEMBER.

These articles are from the establishment of Laurent Richard, tailor to the late King Louis Philippe.

AT length the Winter Fashions have made their appearance; every house has brought out its novelty, each rivalling the other in elegance and richness.

Among mantelets it is very difficult to discover that which will carry off the palm for good taste and elegance: will it bethis somewhat longer sleeve, this a little shorter, this one a little wider, or that a little narrower? is the front of the mantelet to terminate in a point, or is it to be rounded off, or is it to be a little closer or fuller? These various shades of difference in shape are represented by charming patterns.

In bonnets, velvet prevails. The shapes are open, in order to give room to puffed-out hair-bands, drawn in at the bottom, and setting round the face; the crowns are thrown back *en calotte*, called *Jockey*, but without the horse-shoe, though this latter style is old. The insides of the bonnets are for the most part trimmed with velvet ribbon; there are also many velvet drawn bonnets, trimmed with plaited velvet or black lace, and contrasting shades of velvet are often used instead of alternating velvet and lace. The favourite colours, or shades, are scabious, straw, violet, grey beaver, rose, white, and two new colours, dove and fire. The bonnet trimmings are velvet flowers, with foliage of satin of the same colour as the bonnet; small weeping willows of cathers, or plaited ornaments of two contrasting shades. Velvets and terry velvets are also united; grey beaver with rose, scabious and black, violet velvet with black lace. There are also a few drawn satin bonnets.

Cloth is adopted for morning walking dresses, *redingote* form, open down the front, and embroidered in arabesque pattern, in silk braid and other trimming; the sleeves are worked at bottom, and open, to admit underneath cambric or muslin sleeves tight at the wrist; the body is embroidered to match the skirts. With this *redingote* is worn a *pardessus* of the same cloth, embroidered in front and at bottom with braiding of from two to two-and-a-half inches wide. We have also seen dresses of woollen stuff, called *armure*, with a wove-in border at the bottom of the skirt. Thus, the skirts of these dresses have three borders, each having five satin stripes of lighter shade than the ground of the dress: the spaces between the borders are the same as that formed by the five stripes, so that the ornament comes up to more than half the length of the skirt. The whole of the body is striped, but the sleeves have similar stripes only at the bottom. The more showy dresses, and a little *decolletées*, are square in front (Louis XV. style), the body pointed, the skirt plain, and but few flounces. The colours are sombre and plain; the materials are velvet, satin, damask, watered, *antique*, and some plaids for the theatres and half dress. These dresses are always worn with open sleeves, trimmed with *engageantes* of lace; and to shelter from the cold, satin ends of sleeves edged with fur.

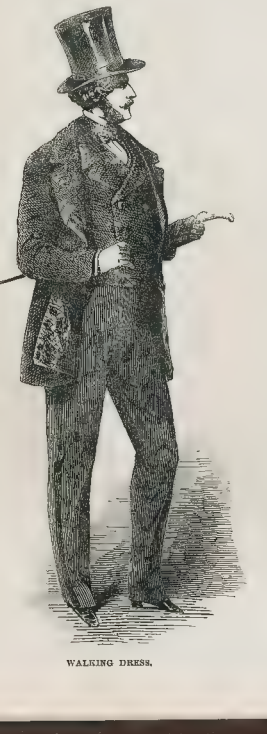
Short velvet cloaks, richly embroidered either in satin stitch, silk braid, or gimp, are decidedly in vogue, the preferred colours being burnt bread and black. Short velvet cloaks, of the paletot shape, half tight, trimmed with lace embroidered entirely in satin stich, and with narrow braiding, are also worn. There are also to be seen plain short Cachemire or cloth cloaks, cut in the shape of a bell, and somewhat long.

On mantelets of silk entirely embroidered velvet ribbon is worn; or stamped velvet flowers upon the stuff, produce a very pleasing effect. The braid used for the arabesque pattern is commonly plain, or only has a thick cord, and is about half to three-quarters of an inch wide.

For walking, boots, entirely of leather, are the most fashionable; the upper part of supple leather, like a thin stuff, and the lower part in varnished leather.

The Illustrations.—Walking-dress: Drawn velvet bonnet trimmed with black blonde, and a small marabout feather. *Satin rep: mantelet*, trimmed with two rows of deeply scalloped Chantilly lace. Dress of *Pekin satiné*, with two rows of wide braid and one row of narrow: the width of the ornament is two inches and a half, and the space between also two inches and a half. Velvet mantelet, with arabesque in silk braiding, a quarter of an inch wide, and satin stitch, slightly fitting to the waist, wide sleeves, and entirely embroidered. Cap of Alençon lace, with flat bows of ribbon, and lappets of the same. *Engageantes* of India muslin, with two rows of Mechlin lace, one above the other.

The gentleman's hat, with rather a large brim, high crown, and somewhat wide at the top. Turned down collars are going out of fashion. Coat, open in front, the skirts short and narrow; the waist still long, but they are becoming shorter. *Pardessus* short, closed in front, with a double row of buttons, and thinly wadded. Semi-large trousers, hanging straight down, ornamented with a band on the outside seam.



WALKING DRESS.

WALKING [illegible]

DEATH OF THE DUKE OF PALMELLA.

Letters from Lisbon, dated October 13, announce the fatal termination of the illness of the Duke of Palmella, on the 12th, when he expired in the midst of his numerous family. He met his approaching fate in a most courageous manner, retaining his faculties to the last; and one of his last requests, before receiving the sacrament and taking leave of his family, was that his body might be opened after death, in order that the real nature of his protracted sufferings should be known and communicated, for the good of humanity, to the eminent medical practitioners whom the Duke had so recently consulted in Paris and London.

The Duke of Palmella was born on the 8th of May, 1781, and had, consequently, completed his sixty-ninth year. A very considerable part of his life was dedicated to the diplomatic service of Portugal, which he represented at the Congress of Vienna, in 1814; and he was one of the General Committee of the eight powers who signed the Peace of Paris. When the debate respecting the slave-trade took place in the Congress, he warmly opposed the immediate abolition by Portugal, which had been demanded by Lord Castlereagh. He was also one of the foreign ministers who signed the declaration of the 13th of March, 1815, against Napoleon; immediately after which he was nominated representative of Portugal at the British Court. In 1816, however, he was recalled to fill the office of Secretary of State for Foreign Affairs in Brazil. In February, 1818, he visited Paris, for the purpose of making some arrangements relative to Monte Video, with the Spanish Ambassador, Count Fernan Nunez. After the Portuguese Revolution, he retired for a time from active life. He was next selected to attend at the coronation of Queen Victoria; and his great wealth enabled him to vie, on that occasion, with the representatives of the other Courts of Europe. He was several times called to preside over the councils of his Sovereign, but only held office for a limited period. Though a member of the ancient nobility, all his titles were honourably acquired by his own exertions, and were the appropriate rewards of the most distinguished abilities and meritorious services. No Portuguese statesman acquired greater celebrity abroad, and no man acted a more consistent part in all the political vicissitudes of the last thirty years, throughout which he was a most prominent character.

THE LATE DUKE OF PALMELLA.

The death of this eminent statesman is (says a contemporary) a great loss to Portugal, which runs no small risk of being ultimately submerged under the dubious pilotage of the host of modern politicians who have sprung up during the reign of Donna Maria II. Her Majesty had the greatest reason to look upon the Duke's demise as a personal calamity, although his treatment at Court during the last eight or ten years would lead to a very different conclusion; it cannot, however, be denied that his Grace studied, during that period, his own character more than the conduct observed towards him, in his efforts to save the throne from that public resentment against misgovernment which has more than once enabled the revolutionary party to place her Majesty's crown in imminent peril. 1846 was a clear demonstration of the fact; and it is not less true that the Duke's discouragement of more recent plans to upset the present Cabinet has contributed in no small degree to the continued maintenance of tranquillity in the country, whilst those disposed to resort to violent measures will, unfortunately for the State, now find, when the occasion offers, in his Grace's vacant post the want of a salutary check which may be more fatal in its consequences to the Crown than what might be supposed to depend upon the life of one man. The great wealth at the disposal of the Duke of Palmella during the latter part of his life has tended much to increase his influence and importance, even out of office, in a country where the nobility are generally impoverished or opposed to the dynasty, and their natural places taken by new men who have generally sprung from the lower classes of society.

It is related of the Duke when Count de Palmella, that during the contest in Spain and Portugal, Napoleon one day hastily addressed him with "Well, are you Portuguese willing to become Spanish?" "No," replied the Count, in a firm tone. Far from being displeased with this frank and laconic reply, Napoleon said next day to one of his officers, "The Count de Palmella gave me yesterday a noble 'No.'"

NAVAL AND MILITARY INTELLIGENCE.

Ammunition from Ireland.—A vessel has arrived at Woolwich, from Belfast, having on board 9 barrels, 226 half-barrels, and 1374 quarter-barrels, 2 hogsheads, 4 bags, and 10 hides of ammunition, from Ireland, comprising the whole of the ship's cargo.

The Civil Power on Board Ships of War.—In consequence of the late proceedings on board the *Excellent*, gunnery-ship, at Portsmouth—in which the commanding officer refused to allow a magistrate's warrant to be executed by a policeman—the Admiralty have issued orders to all commanders of her Majesty's ships, to the effect that every assistance is to be given to the civil officers in the execution of their authorised duties.

The Colonelcy of the 20th Regiment.—This appointment, for some time vacant, will, it is now understood, be given to the general officer we before alluded to, viz. Major General Lightfoot, C.B. This distinguished officer has received gold and silver war medals, with thirteen clasps.

Military Education at Portsmouth.—The officers and non-commissioned officers of the 38th, 80th, and 82nd Regiments, will shortly be assembled together, for the purpose of being catechised and questioned on drills and details of the service, in the presence of Major-General Lord F. Fitzclarence, commanding the district.

Ordnance Waste of Money at Ceylon.—The stables at Colesberg, belonging to the Cape Mounted Rifles, and built by the Ordnance at an expense of £1000, have been sold for £40.

Fees to Stewardss.—A circular letter to commanding officers of regiments on this subject has lately been issued. The following is a copy:—"Sir,—I am directed to acquaint you, for the guidance of all officers for whom passages may be ordered in the Peninsular and Oriental Steam Navigation Company's packets, that for the future no charge for stewards' fees will be made to individuals travelling by these steamers at the public expense.—(Signed) L. Sullivan.—War-office, October 23, 1850.

Ordnance Department.—Captain Townsend, the barrack-master at Liverpool, has been appointed to succeed the late Sir H. Oakes as barrack-master at Londonderry, Lifford, Armagh, &c.

Route to the Punjaub by the Indus.—It is said the Government intends to make use of the river Indus, and the route via Kurrachee, for the conveyance from this country of all European troops and stores to places beyond the Sutlej. By this arrangement, the danger and delay of the long march from Calcutta to the Punjaub will be avoided, and nearly the whole of the journey will be performed by water.

Lieutenant Colonel R. Clarke, Royal Artillery, has, in consequence of the death of Sir Patrick Ross, assumed the temporary governorship of the island of St. Helena.

Holyhead.—The "Banshee" Steamer.—The *Banshee* mail packet, so celebrated for her rapid and successful voyages between Holyhead and Kingstown, in the performance of the Irish mail service, has been taken off the station. It is understood that she will be re-commissioned, and undergo a thorough inspection, preparatory to being placed on the mail duty in the Mediterranean.

SCENE FROM "SERVE HIM RIGHT," AT THE LYCEUM THEATRE.

LYCEUM THEATRE.

The accompanying Illustration gives one of the most entertaining scenes in the drama of "Serve Him Right"—indeed, the climax of the absurdity. The boor who comes a-wooing the housekeeper is here exhibited, making his reappearance on the wall in order to recover his boots and hat, which he had lost in his previous adventure. These important articles of wearing apparel are being substituted by others, while the suspicious husband stands aside with the originals on the end of a stick.

The whole situation is exceedingly amusing; and, indeed, when the previous circumstances are understood, calculated to excite uproarious mirth in the audience.

FRED HOLDERSWORTH; OR, LOVE AND PRIDE.

BY THOMAS MILLER,

AUTHOR OF "GIDEON GILES," "ROYSTON GOWER," "FAIR ROSAMOND," "LADY JANE GREY," &c., &c.

CHAPTER III.

"Do you know," said the laundress to her daughter on the following day, a little before Fred was expected to arrive, "I've been thinking the young gentleman that's taken our apartments is a poet, 'cause he talked so much like 'Hervey's Meditations amongst the Tombs' about the flowers, and yet he had rather too much money to be a poet, because I have heard that they are always poor. Yet he may be a betterest sort of one, such as writes confessions and dying speeches, when anybody's been hanged. But what I go by most is his card. Why should he live at a literary institution, if he does not make books or something of that kind? But I dare say we shall ferret it out."

"He seems a very decent young gentleman," answered the daughter; "but from the way in which he talked about nature, and woods, and such-like lonely places, I should fancy he's been crossed in life."

"I shouldn't wonder if he has," answered the mother. "I couldn't help admiring how nicely his shirt fronts were got up. I wonder who does his washing? I did think of asking him, but I fancied it would seem as if one wanted to get the work away from those that did it."

"I am very glad you had so much thought, mother," replied the daughter. "I should think, if he were a poet, he would not have to be in the city every morning by ten o'clock, as he talked of doing. Besides, if you remember, that gentleman you washed for who used to give us the numbers of his work when they came out, was always at home writing. What a pretty tale that was! the 'Murderer of Primrose Valley!' It was so sweet and so shocking, that I used to sit and cry over it; and yet it wasn't natural, somehow, because the man that was so fond of music and flowers would never have sat on that primrose-bed playing music all day to allure people into his cottage to murder them. He killed all the ladies he was in love with, and that was thirteen."

"He was a great brute, my dear," answered the mother; but whether she meant the author or the "Murderer of Primrose Valley," the daughter did not care to inquire.

"I once knew a married woman that had the 'poetics,'" continued the mother, "and she used to sit with her head leaning on her hand and a very dirty cap on, making rhymes; and I never saw such a house in my life. Bless you, when he came home to dinner, she had nothing ready for him but the rhymes she had made; nothing at all else cooked. The children rolled about the floor like little pigs. Sometimes she would sit all day with a novel in her hand and great holes in her stockings; and if anybody gave her a gentle hint about tidying her house up, or herself, or her children, she would talk your head off by trying to prove that nobody who had ever been clever had been clean, and go on about the nine Muses—all sisters I believe she said they were—and I dare say not one of them ever got married, but sat rhyming from morning to night without washing themselves or mending their rags. Pretty 'poetics' they must have been!"

The daughter smiled at the picture her mother had drawn of the intellectual lady, and the nine unmarried Muses, and was about to make some remark, when the sound of a cab was heard outside, which in another moment pulled up at the garden-gate; so exclaiming "Here he is!" the mother and daughter hurried out to welcome their new lodger and help him in with his moveables.

Ladies are proverbial for the load of luggage they convey with them; but seldom was a single-lady seen with so top-heavy a cab as that which brought Fred to the Cottage of Content. First there was a large cage containing a parrot, which was a present from his uncle the officer; also a monkey; then there was a little dog, remarkable only for its smallness, and which seemed grown for the same purpose as the Chinese rear diminutive plants, aiming at nothing more than rendering them to the smallest possible size; this, with the kennel, was placed on the roof. Then a globe containing gold fish, two of which were shaken out and lost on the way. Next came his guitar, which he had just commenced learning to play; then his violin, on which he had had but one month's practice. What the next load was the cabman lifted off, no one but Fred himself knew, though he called it the model of a balloon, which was to go against the wind, could be raised or lowered in a moment, and was to become stationary in the air by turning a screw: this with his plans on paper was quite a load. Then came trunks and boxes, and more boxes filled with books; another cage containing two canaries, a flute and a large pile of music; six pairs of boots, several hat-cases, a gun and foils, boxing-gloves, a brace of pistols, which the laundress hoped were not loaded, two carpet-bags crammed to repletion, from one of which a flowered dressing gown peeped out. Tea and coffee, which he had purchased according to the laundress's wish, and which had come lose at the bottom of the basket, and got mixed with the soda powders, and a bottle of salad-oil that had broken, making, as the cabman said, "a sad mess, besides being a very serious loss to the young gent;" but Fred bore it all manfully and said there was plenty more where that came from.

Then there was something quite charming to Fred in the way the laundress's

daughter offered her assistance: in vain did he say that this, that, and the other were too heavy for her—she would insist upon helping him. Then there were nails to drive here, and hooks to hang there; the rails to be placed across, and the gun above them; and she handing him the nails, or hooding the hammer, or looking up to him with her pretty face; then giving a stealthy glance at some book, and wondering if he had read "The Murderer of Primrose Valley;" or thinking what a deal of money all those things must have cost; or, when the ice was once broken, asking him all sorts of questions, to which he replied, that, "Angel;" or this, "My pretty goddess!" or the other, "My nymph of Arcadia," is so-and-so; at which she smiled, and thought what a nice, free, funny young gentleman he was. Then she had to make him some tea; and was so sorry that what he had brought was spoilt, and was so afraid he would not like what they were in the habit of drinking; to which he replied, prussic acid would be welcome from her hand, then she said, she did not know what that was, but that her mother used prussian-blue for her clothes, and she supposed it was the same. After these, he brought out his drawing materials, and insisted upon making a sketch of Matilda, which, when he had finished, her mother said was "as like as two peas." It would have done for any doll, that looked as unlike

the "human face divine" as it is possible to make it. He would fain have taken out his guitar, and while Matilda sat in the garden-chair, have placed himself on the gravel walk, as he had seen a picture of Mary Queen of Scots and Rizzio, or somebody or another; but he remembered he was not able to play any single tune, though he thought that, in about six months, he might manage "Home, sweet home;" so, instead of enacting the part of lutanist, minstrel, or troubadour, he put on his Greek smoking-cap and dressing-gown, and went into the garden to smoke his meerschaum.

While he was so apt to a delightful reverie, and picturing, in the fantastic form the smoke assumed, some resemblance to the graceful attitudes of the lady—such as the curve of her arm, the bend of her neck, or the flowing of her tresses in the breeze—he heard a noise at the end of the garden, and the words "Monkey! the monkey!" reached his ears. Master Jacko, not liking his new residence in the shed, had escaped, and having watched the actions of the laundress as he sat concealed in a tree, and paid particular attention to the way in which she hung out the clothes'-pegs and then the clothes off the line, he—monkey-like—the moment her back was turned, commenced taking down the remainder. Balancing himself on the line, and holding on by one arm, he pulled out the clothes'-pegs with his other, shoving each small article as caps and collars under his arm, and allowing the larger things to fall: then he began at them as they lay on the ground, and jabbering and making his way to the next, or pausing a moment to swing himself, before proceeding further in his mischievous labour.

Fred laid down his pipe, and called to the monkey; the laundress exclaiming, "There goes my collar, and there goes master's pocket-handkerchief!" Seeing he'd'n rolling the lace round him! and now he's ripped the border off that cap! Whatever am I say to the people when I take the things home? Oh dear, sir, do catch him by the tail!" During the chase the daughter stood laughing at the monkey's antics; it was useless her mother saying "she ought to be ashamed of herself," her merry voice made all the garden ring again, while Jacko sprang from tree to tree, leaving some mysterious article to flutter here and there, and jabbering with all his might, as if he knew that he was out for the evening, and was resolved upon enjoying himself.

Fred at last got the monkey into one corner of the garden, and, after a long parley on both sides, he allowed himself to be captured. All the damage he had done he freely offered to pay for; but, upon examination, it was found that a few rincings and a few stitches would put all to rights, and next day a loaner was to be sent for to erect a pole, and make Jacko as comfortable as possible during his stay at the Cottage of Content. If Matilda had not before won Fred's heart, she would have carried it off that night, through the manner in which she pacified her mother, and pleaded for poor monkey. The begging of them not to hurt it as "it knew no better." There was something so open, sincere, kind, and artless, in this beautiful girl's every action and word, that no one could have been in her society long without admiring her, were it only for the sweet good-nature which beamed on her fascinating countenance. She affected not to be more than she was, and such sincerity was calculated to make an impression on a much wiser man than we fear Fred Holderswith will ever be. There was nothing forward or impudent about her, but a natural flow of happy spirits, which run riot through her innocent heart, and made her merry as a bird that sings only for its own delight. Nothing had, perhaps, ever troubled her in her life, beyond choosing the colour of a dress or bonnet, or what this prettiest ribbon for a new bonnet. The heaviest sin on her soul was counting a new shawl, the pattern of which chanced to strike her fancy while looking into some shop window.

We must suppose a few days to have passed away, and consider how confined Fred had been to the office, and that, except his cousin and aunt, he had seen but little of women, beyond a casual interview at some party, where all was form and ceremony, then we shall not wonder that he so soon fell in love with the laundress's daughter, and began to make it known to her in a peculiar way of his own, and such as he considered both delicate and gentlemanly. It was after supper, in the garden, and the moonlight of as lovely a July evening as ever silvered over the sleeping earth, that the laundress was nodding in her chair, while Fred and Matilda were in the garden, admiring the moon, when he thus commenced: "Are you not very fond of the country—especially of this tranquil cottage, that seems like the abode of peace a spot in which angels themselves might dwell."

"I like it very well, but it is dreary it winter," she replied.

"Dreary! it ought never to be dreary," said Fred, now helped to a thought, and, considering the little practice he had had, making tolerable good use of it. "Would nothing make it cheerful to you all the year round?" he hinted to look deeper sentimental as he put the last question, and he placed his forefinger gently on her arm.

"We have generally had the lady with us in the summer," answered Matilda; "days are long then, and there are more people out; while on a winter's night it is but seldom we hear a soul stirring here, excepting ourselves, after dark. That makes it very lonely."

This drove Fred further out to sea than before—there was nothing to the point in it. So, looking up at the moon, he exclaimed, "How very beautiful! I could live and die in the embrace of nature." Then, thinking, very probably, that it was no use making love to a girl who was so simple as to talk of real days here in happiness and contentment, if I knew there was but one fond heart to cling to me;—without that life is a solitude."

"Dear me," thought Matilda, "he must be very terribly disappointed in love, to talk as he does. I hope he is not so bad as the murderer of Primrose Valley." She then said aloud, "I'm sure, while you stay here, we shall do everything we can to make you comfortable."

"Comfort is a cold word—a cold word," said Fred, rather liking the sound, and thanking the repetition somewhat effective. Then, placing one hand in his vest, and again looking at the moon, he added, "I came here in search of contentment, hoping to spend a few months in peace and quietness—a life of ease by forgetfulness, like yonder bright orb, which seems to sleep unconscious of the toil and tumult of the busy city, in which I am a slave. I have found misery of happiness, and it rests with you, angelic girl, to say which."

"Rests with me!" exclaimed Matilda; "then I'm sure you'll be happy. I'll feed the birds when you are away, and look after the dog, the monkey, and the gold-fish, so don't let this thought make you unhappy, for I promise you you're absent." "What a strange young man he is" thought she; "I wonder if there's anything in the moonlight that affects people, as they say there is."

"Happy will they be," said Fred, "who have one kind thought upon them—would that I were a bird, a dog, a monkey, or a fish, I could then look on you with such a that love which your beauty has already awakened."

"Bless my soul," thought Matilda, "this is too good to be true. He thinks I'm a silly girl, and so is making fun of me." She then said, "You are disposed to be very funny to-night, sir; and I suppose would have said the same to any one else, if they had been here. As my mother says, young men will talk nonsense if young girls are foolish enough to listen to them. Shall I leave you to fasten the door, or stay until you have gone in? My mother, I know, is waiting to go to bed."

"I will know my doom before I sleep," said Fred, sinking on the ground with one knee, and seizing her hand before she was aware of it, then exclaiming, "My happiness rests on your lips! I love you! I have loved you from the first moment I saw you, and, unless you consent to be my wife, my hours in this thy wilderness are numbered."

"What a strange gentleman you are," said the laughing girl, "that's just the way the man did at the theatre, when he saw the 'Perjured Prince;' or, the Thundering Perverter of the Truth' He talked of the thorny wilderness and darksome caves, as if any body believed him. I'm sure you'll get cold, sir if you don't get up, for the dew is falling, and the garden walks are damp. Leave go of my hand, please, I think I hear mother calling."

"Never will I rise from this earth again!" exclaimed Fred, now dropping the other knee, "until you promise to make me happy! Beautiful creature! adorable angel! Destroy me so cruelly as the Fates have so willed it, that my life will for ever be a load of misery unless it is linked to yours. Oh, say that you love me, and I shall die happy!"

"I wouldn't tell a story for all the gold in the Indies," answered Matilda; "so don't ask me. I'm sure mother would be very angry if she knew I were here listening to such nonsense. Now do get up, that's a good young gentleman, else you'll be having rheumatics. I'm sure I'll do all I can to make you happy, and so will mother. Don't talk of dying; it makes me quite melancholy, that it does."

By you eternal moon, that new looks down upon us; by yonder bright stars which are witnesses of these my holy vows; by"

"Come, come, young gentleman! what, you're beginning your games already —pretending to make love to my daughter!" said the mother, who, roused by Fred's voice, had come out of the cottage. "If you are so many play-acting nonsense, come in-doors to it. I suppose you're calling yourself Romeo, and my daughter Julia. Ah! I once saw it a many years ago, and a very pretty-worded thing that was. Come in, I'm sure you'll catch your death—quite fun enough for one night." And, re-entering the cottage with her daughter, she left Fred with his arms folded, and just in the act of commencing an open avowal of his love—to deliver his speech to the moon.

(To be continued.)

REEFING TOPSAILS FROM THE DECK.—This most ingenious contrivance has been fitted on board one of the Peninsular and Oriental Company's vessels, the *Iberia*, and found to answer admirably. The sail is to be reefed, and the yard is lowered, it is close-reefed in two seconds. The reefs may be again shaken out, and the topsail at the masthead, in 20 seconds. In nautical affairs this contrivance is one of the wonders of the age, and must be rapidly brought into general use. The invention is not expensive, because the present sails and topsail yards can easily be fitted, at an expense not exceeding £15 per yard and sail. The inventor, Mr. H. D. P Cunningham, R.N., late secretary to Admiral Moresby, has taken out a patent; and we have no doubt he will be made very handsome offers before he has been long at it. It is well known to officers that many a reef is kept in during the night, and in consequence the vessel's progress is retarded, on account of a disinclination to send men aloft, more particularly if the weather be wet. With this admirable contrivance all can be taken in, and again made, in a short space of time, without sending a man aloft. The invention is of more importance to the commercial marine than to the Royal Navy; but, of course, it is equally applicable to both, and must manifestly save much anxiety, and do away with the risk of losing men off the yards when reefers in bad weather, more particularly in frosty weather, off Cape Horn, &c.

Two hundred glaziers have commenced operations on the building in Hyde Park. The glass used is half an inch in thickness, and is brought to the ground at the exact size required, so that not a moment is lost; and the rapidity is so great, that each man can glaze 64 feet daily

SONGS AND HYMNS OF LIFE.—No. III.

I HEARD the language of the trees,
In the noons of the early summer;
As the leaves were moved like rippling seas
By the wind—a constant comer.
It came and went, as it pleased will;
And evermore loved to daily,
With branch and flower, from the cope of the hill
To the warm depths of the valley.
The sunlight glow'd; the waters flow'd;
The birds their music chanted,
And the words of the trees on my senses fell—
By a spirit of Beauty haunted:—
Said each to each, in mystic speech:—
"The skies our branches nourish:—
The world is good,—the world is fair,—
Let us *enjoy* and flourish!"

Again I heard the steadfast trees;
The winter winds were blowing;
There seem'd a roar as of stormy seas,
And of ships to the depths down-going.
And ever a moan through the woods was blown,
As the branches snapp'd asunder,
And the long boughs swung like the frantic arms
Of a crowd in affright and wonder.
Heavily rattled the driving hail;
And storm and flood combining,
Laid bare the roots of mighty oaks
Under the shingle twining.
Said here each tree, "The tempests free
Our sap and strength shall nourish;
Though the world be hard—though the world be cold—
We can endure and flourish!"—CHARLES MACKAY.

MUSIC.

THE GRAND NATIONAL CONCERTS.

The appearance of Mr. Sims Reeves has materially strengthened the vocal department, which, up to his arrival, rested mainly on the attractive qualities of Mdlle. Angri. This popular tenor was received, last Saturday night, with the greatest enthusiasm; and he has sung every evening since, with his usual vigour, in various schools, from the simple ballad to the grandly developed *scena* of the operatic composer. An air, "The dream is over"—the words by Shirley Brooks, and the music by a young lady, a pupil of Miloque, who is known under the name of Angelina—has found favour with the audiences, Mr. Sims Reeves's singing ensuring for the composition—which is not ungraceful—an encore. As yet, there have been no attempts to combine the talents of the singers engaged at these concerts in concerted pieces, but it may be presumed that the forthcoming new serenatas will effect that end. The production of the great symphonies and overtures might be more active; the selections are sparing, and not sufficiently varied; every night's experience proves that the directors may safely play the high game with their vast orchestral resources. Beethoven's seprior in E flat, Op. 32, for violin (Sainton), alto (Hill), violoncello (Piatti), clarionet (Frane), bassoon (Baumann), horn (Stegich), and double bass (Angelis), was performed on Wednesday night; and Miss Goddard, who is deservedly a prodigious favourite, played, with the accomplished violinist Sainton, a duo concertante on themes from Meyerbeer's "Huguenots." In the dance music there has been a polka, the "Grand National," by the composer of the "Agnes Polka; and a "Galop des Papillons," by Captain Lee Carter, besides more of Labitzky's pretty reminiscences; but why not introduce the *ne plus ultra* of dance inspiration, in the works of Lanner and Strauss?

The celebrated Berlin Chapel Royal Chorus, with their *kapelmeister*, Herr Neidhardt, have arrived in town, and were to appear last night (Friday).

MUSIC IN BRIGHTON.—There have been many musical entertainments of a superior order recently. Jullien and his band have been performing at the Town-hall. Koenig on the cornet-à piston, Pratten on the flute, Herr Sommer on the saxophone, and M. Collinet on the flageolet, were the chief soloists.——Mr. Hullah's concert for the performance of Mendelssohn's "Elijah" took place at the Town-hall, on the 23rd ult., conducted by Mr. Bond with much ability. Mrs. Bond sang the principal soprano pieces artistically, and deserved encores on the composer's text. Miss Dolby, Mr. T. Williams (in place of Mr. Lockey, who had a cold), and Herr Formes sang the contralto, tenor, and bass parts. It was the first time this oratorio had been heard in Brighton, and it produced a great impression on a numerous and fashionable assemblage. Mr. Hullah was organist, and Mr. Willy leader of the band.——Amongst the *matinées* have been those of M. Edouard de Paris, a pianist, assisted by Miss Basano, Signor Marchesi, M. Levy, and Mr. Ap Thomas, and Mdlle. Parodi.——The Brighton Choral Society will resume their Musical Unions in the course of this month, aided by Sainton, H. Cooper, Signor Piatti, &c.——Miss C. Salaman, the pianist, and Mr. Blagrove, with Miss Andrews as vocalist, gave their first Chamber Concert last Tuesday night, which was well attended, and the selections much applauded. The Athenæum Sacred and Secular Concerts will take place on the 4th and 5th inst., for which Miss Poole, Miss Williams, Mr. Lockey, Mr. Weiss, Mr. Machin, Phillips, and Messrs. Guttridge and E. Land as conductors, are engaged.

MUSICAL EVENTS.—The Shapcott family gave a concert at the Music Hall, Store-street, on Wednesday, to display their talents on the aes-horn.——Mr. Banks, and Mr. Sidney, Mr. Sharp, had evening concerts, at the National Hall, Holborn.——Mr. Carte delivered a lecture on "Instrumental Music," at the Marylebone Institution, last Monday.——Mr. John Parry has given his entertainment this week at Plymouth, Torquay, Totnes, and Tregremouth. Next Monday he will be at Exeter.——*The New York Herald* announces the marriage of Vincent Wallace, the composer and pianist, at Boston, with Mdlle. Helène Stolpil, the *pianiste*. Mr. Wallace, after giving concerts with his wife and his sister, the vocalist, was to leave the United States for London on his way to Berlin, to produce his new opera, "Lorely."——Mr dame Bishop and Bochsa had taken Tripler Hall, in New York, for concerts, on the alternate nights of Jenny Lind.

Mdlle. Parodi was to appear with Maretzek's Italian Opera company, in New York, at the end of October.——The new Royal Italian Opera-House in Madrid, L'Orienta, was to be opened with Donizetti's "Favorita," *Lenonora* by Alboni, who was also to sing *Fides* in the "Prophète;" Madame Frezzolini was to appear as *Valentina* in the "Huguenots," with Formes as *Marcel*. The decorations of the opera at Dresden are described as splendid.——Balfe's "Gitana" ("Bohemian Girl") was produced at Berlin on the 16th ult., at the Theatre Royal, where a new opera by Flotow, "The Grand Duchess," was in rehearsal.——There are two Italian Opera-Houses at this time in Brussels, one at the Cirque, and the other at the Galeries.——The reception of Spontini, the celebrated composer, at Jesi, in the Papal States, was attended with almost Royal honours. He was received by the civic functionaries in state, serenaded, and the town was illuminated. Spontini was born in 1778; his great works are "La Vestale" and "Fernand Cortez," produced, in 1807 and 1809, at the Parisian Grand Opera.——Meyerbeer's "Prophète" was represented in Paris for the 91st time last Monday—*Fides* by Alboni, who had only one more performance to give prior to her departure for Madrid, and then Vierdot was to return, in her original creation of *Fides*.——The Liverpool Philharmonic Society will perform Mr C. Horsley's oratorio, "David," on the 12th inst.——Mr. Lee opens Mr. Mitchell, the blind musician, which was produced with such success at the Grand Ducal Theatre in Brunswick, will be the first novelty of the English Opera Commonwealth at the Soho Theatre.——Mr. Charles Romer, the tenor, is engaged at Edinburgh.——Mr. John Cohan, the pianist and composer, a pupil of Ries, died at Liverpool a few days since.——Miss Catherine Hayes has appeared, with great success, at the Dublin Theatre Royal, as *Lucrezia Borgia*; Madame Macfarren was *Orsini*; Bordas, *Gennaro* and Herr Mengis, *Alfonso*. On Tuesday, Miss C. Hayes played *Norma* to Lee *Adalgisa* of Madame Macfarren, *Pollio* of Bordas, and *Oroveso* of Palmai.——Mdlle. Nau, Mr. Borrani, and Mr. Travers have been singing, with great success, in Manchester, in Macfarren's opera of "Charles II."——Signor Ronconi, after completing his engagement at Madrid, has returned to Paris, to open the Italian Opera season. He is opposed by the decree of revocation of the Minister of the Interior, but he intends to appeal to the National Assembly, which voted him a sum of 60,000 francs last session.

THE GREAT EUROPEAN ORGANS.—We have received a long communication on the subject of our article under this head last week. We are quite ready to correct any errors as to matters of fact, but as to opinion we cannot accept the statements of the writer as conclusive. We admit that it is very difficult to establish *supremacy* for any particular instrument, as each organ, whether at home or abroad, has its speciality; we, therefore, did not underrate the York and Birmingham instruments, but placed them on the same category as the famed Continental organs. What we did urge was that the beauty of an organ does not depend on the precise number of its stops and pipes. We do not require Dr. Burney's criticism of the Haarlem organ, during which he acquainted us with "how many more or no more vexed question in music, than that of the quality of organs; and our Correspondent is mistaken if he calls the Boston organ a "toy," because it has not the colossal proportions of York. It is declared that considerable additions have been made to the York organ, and that it now contains 9000 pipes. The returns as to the comparative sizes of organs, compared with that of York, are not correct: for instance, Birmingham is stated to have 50 stops, it has 78; the Freyburg is understated, &c.; but the *size* of an instrument is not the criterion of its *tone*. To the vast amelioration in organ-building in this country, and to our present capability to compete with the Continental constructors, we bear willing testimony; and we hope the new organ to be built in St. George's Hall, Liverpool, will at once establish our supremacy.

Mr. William Nicol, of Liverpool, has resigned the office of alderman and paid the penalty of £80.

THE THEATRES.

HAYMARKET.

Mr. Selby has made a statement relative to "The Husband of my Heart," and its French original, the vaudeville called "La Duchesse et Polssarde," which is not, it seems, the same piece as that on which "The Pride of the Market," at the Lyceum, was founded; the original of which is called "La Bouquetière du Marché des Innocents." Probably, both French pieces have the same original. At any rate, that at this theatre has done good service, in perfectly demonstrating the talent and ability of Miss Reynolds for characters of elevated sentiment and strong moral feeling.

The farce of "My Friend in the Straps" is an adaptation of the French vaudeville, "Morovés." The pretended groom is turned into an Irishman, *Mr. O'Blarney*, performed by Mr. Hudson with great richness of effect, who is opposed to a Yorkshireman in the person of a domestic, *Grumpy* (Mr. Rogers). Mr. Bland also performs the part of the irascible East Indian husband, *Major Capsicum*, to admiration.

On Monday, Mr. Macready having recovered from his indisposition, returned to this stage, and, by the vigour with which he supported the difficult character of *Macbeth*, evinced that he still possesses all his wonted energy. We have before stated our opinion of the view which Mr. Macready takes of the character of the noble Thane, whose character for worth is sacrificed by the committal of an ambitious murder, and therefore need not now dwell on it further. As to the power of the conception there can be no question. The life and vigour of the picture are everywhere manifested; and throughout a metaphysical acumen is displayed, which, the conception of the character being assumed, testifies to the actor's intellectual power. The murder and banquet scenes are striking examples of this; to which should be added the wonderful desperation shown in the final and terrible conflict with *Macduff*.

The appearance of Mr Davenport, in the last-named character, is an event of considerable interest. He was enthusiastically received, and acted the character with intelligence and great power. In the pathetic scene with *Malcolm* and *Rosse*, Mr Davenport rose to a degree of mastery for which even his admirers could not have been prepared. Nothing was left to chance, and his elocution admirable. Full of energy, point, and fire, also, was the manner in which he called *Macbeth* to combat, and sustained the terrible encounter, both of word and deed. Altogether, Mr Davenport can be entertained, that, as an actor, Mr. Davenport is possessed of extraordinary powers.

We must not omit noticing Mrs. Warner's *Lady Macbeth*, which, on this occasion, she performed with unwonted elocution and care. The early scenes were powerfully sustained. In the banquet scene she wanted breadth; and in the somnolent one was deficient in the spirituality with which Miss Glyn has made us acquainted; but both were, nevertheless, highly meritorious, both as respects the purpose of the character, and the mental execution, though less than that of the rival *artiste* to whom allusion has been made.

Mr. Harley, as a new farce, entitled the "Irish Diamond," introduced Mr Harley in a new character, that of the thoroughly broad Irishman, but his dry style, from constitutional causes, but his dry style, from constitutional causes, but his dry style, from constitutional causes

THE LATE JEWEL ROBBERY IN THE STRAND.

On Saturday last, at the Bow-street Police-court, Daniel John Shaw, a boot and shoemaker; James Badcock, also a boot and shoemaker; Eliza Shaw, wife of the first-named prisoner; John Gardiner, a well-known cracksman; Mary Ann Cheruenau, who passed as his wife; George Buncher, another notorious cracksman; and Mary Ann Buncher, his wife, were placed at the bar, with Charles Clinton, an errand-boy, charged with being concerned in stealing a quantity of plate and jewellery, value about £2000, from the shop of Messrs. Williams and Clapham, 16 and 14, Strand, on Sunday night last.

The greater part of the circumstances connected with the robbery have been already fully detailed.

Inspector Lund, of the detective force, having produced a voluntary statement, in writing, made by the prisoner Clinton, said, that, in consequence of information he had received, he went to the house of the prosecutors, on Friday afternoon, after the hearing of the charge against Kelly, the porter, at that court, where he had a conversation with Clinton, in the Craven Hotel, at the rear of the premises; and, having told him of circumstances that he had very recently collected, he stood for a few minutes without uttering a word, and then said, "What Badcock said about my meeting him on Saturday I think false. I hardly know what to say, but the best way is to confess to it. I was to meet the party. I don't know who they are, or where they lived. Mr. Shaw was certainly implicated in it. He told me that they were to meet on Hungerford Bridge. I met him a fortnight ago, for the first time, for the purpose of the robbery at the place on Saturday evening, and then arranged to meet them on Monday, to let them in. I did so, and admitted two men. Shortly after I left the shop. I admitted them before Kelly, the porter, came in, and that was the way it was effected (the robbery, I mean). Charles Kelly was innocent of it, and I said nothing to implicate him at the examination. One of the men was under the counter, and the other under the mats. I got the impression of the keys, and gave them to the two men. I met the men on the bridge, and they knew me as the one of the men was introduced to me by Shaw. I took them in Villiers-street. Mrs. Shaw told me she had seen her husband in the City the last time. The last time I saw Shaw was Saturday week. I told Badcock it was coming off on Saturday night—I mean the robbery. Badcock was to have a share in the produce. They were to meet me some night going home, and they were to give me something, how much I don't know. I have not seen Badcock since the robbery. I cannot describe the men, but should know them again. They are both five feet seven high, respectably dressed in dark clothes. Of course, I hope that Kelly will at once be set at liberty." Upon which witness conveyed him to the station-house. On leaving the station, witness proceeded to a public-house over the water, where he met Gardiner the prisoner Badcock, who said he knew nothing of the charge, and remained silent all the way to the station. Witness then went to the White Hart, in Fetter-lane, where he saw Shaw, who said he knew nothing about the robbery, and left. He and Badcock had not seen Clinton for some time, upon which Le searched his lodgings, but found nothing relating to the property.

When Buncher's wife was taken into custody, there was found on her a pawnbroker's duplicate for a gold ring, pledged on the 26th ult., at the shop of Mr. Barnett, St. George's-circus; and also a list of jewellery, such as watches, diamond rings, &c., written in pencil, on the same paper. The duplicate was shown to Clinton at the station-house, and being asked if he was one of the men who had spoken to him about the robbery, he at once said that he was.

Hannah Green, the female searcher at the station-house, said that she was directed to search Cheruenau, and took a bag of sovereigns from her bosom, containing £.98 10s.

Mr. Henry directed that the prisoners, except Clinton, should be removed from the bar, and kept separate; and in answer to questions put to him by the Court, he said he was 17 years of age, and lived between two and three years at 56, Brunswick-street, Blackfriars, and had nothing to say to the charge, except that Gardiner and Buncher were the two men; but on the night of the robbery he did not see Buncher, another man having come with Gardiner, whom he placed under the mats, and the other not in custody, behind the counting house door. The prisoner Buncher was first brought to him by Shaw; and then they met over Hungerford-bridge, when Shaw was not present, but Buncher was, and the man not yet in custody. The man not in custody came to buy a pencil-case; and it was at a public-house turning out of the Borough-road where they told him to take the impressions of the keys. He next met Buncher and the other on the bridge, and on Sunday evening he met Gardiner and Buncher, with the third man, and that was all he had to say about it for the present.

Mr. Henry desired that the prisoners should be again placed at the bar singly, to give an account of themselves.

The prisoner Shaw said he was thirty-four years of age, and resided in Ploughcourt, Fetter-lane, and had apartments in the usual formal way, and had should reserve what he had to say until the next examination.

Badcock said he was twenty years of age, and resided five months at the Charles-street, Blackfriars-road. Had nothing to say to the charge, except that Clinton told him when the robbery came off he would make him a present of something handsome, but he did not know when it was, or where it was to be.

Gardiner said he was 36 years of age, and a hawker, without any fixed abode, residing in Martin's-street, Blackfriars-road; but he could not tell the number of the house. He was innocent of the charge

Cheruenau said that she was the wife of Henry Cheruenau, a regimental tailor who was abroad, but she did not know where. She resided in Orange-court, Drury-lane, with her aunt

Buncher said he was 28 years of age, and a butcher, hawker, and dog-stealer, residing in Martin's-street, Blackfriars-road; but he could not tell the number of the house. He was innocent of the charge

Cheruenau said that she was the wife of Henry Cheruenau, a regimental tailor who was abroad, but she did not know where. She resided in Orange-court, Drury-lane, with her aunt

Buncher said he was 28 years of age, and a butcher, hawk ing meat in a basket to the different public-houses; and declined, by the advice of his solicitor, to say anything to the charge.

Mr. Woodmer said that as the female prisoner Buncher had only recently been confined, he had to apply for her discharge, there being no evidence against her. Seeing that she was in such distress as to be obliged to pawn her dress for two shillings, and as there was no proof that the list of jewellery was connected with the robbery, he considered she was entitled to be let out on bail.

Mr Henry said there had been no reason assigned why she attempted to destroy a piece of paper, the writing on which was of very great importance; and considering the extent to which the robbery had been carried, and the very serious robbery, he could not consent to allow her to put in sureties for her future appearance, but should order all the prisoners to be remanded until Wednesday

The prisoners were then removed from the bar, with the exception of Shaw, against whom the inspector and he could produce no further evidence, and she was discharged

On Wednesday the prisoners, together with Kelly, the porter of Messrs. Williams and Clapham's establishment, who was the first party taken into custody on suspicion, were again brought up at the police office, when a lengthened examination was entered into, chiefly with the view of committing Kelly with the robbery; but nothing material in that respect was elicited

Mr. Henry (the magistrate) said that, had he been present at the other examinations, he should have been better in possession of the evidence, so far as it bore upon Kelly, and directed that part of the evidence respecting the conduct of Kelly on the arrival of the police to be read, from which it appeared that he had entered the back of the glass door, and that the property must, if they have been committed from within; in addition to which, he said to the police, "You will look after the other," and being asked "Which other?" replied, "Why, you know there was one which we had not secured."

Mr. Gilham, who appeared for Kelly, said such might be the most natural way for a man to act in Kelly's situation, and he is taking a small portion of brandy, he being a very nervous man, and having a small portion of brandy, he being a very nervous man, and having a small portion of brandy, he being a very nervous man, and having

NEW BOOKS, &c.

THE NEW NOVELS.

LETTICE ARNOLD.
By the Author of "Emilia Wyndham," &c. 3 vols.
"We cordially recommend this admirable and beautiful story to our readers [illegible] as one of the most pleasant and practical [illegible] in a most [illegible]."—Morning Post.

LAMIA. A Confession.
Immediately, in 3 vols.

NATHALIE. By JULIA KAVANAGH,
Author of "Woman in France," "Madeleine," &c.
HENRY COLBURN, Publisher, 13, Great Marlborough-street.

Just published,
DEAN and SON'S NEW SIXPENNY BOOKS for CHILDREN, with plain Illustrations; in fancy covers, printed in two colours, each 32 pages.

PLEASANT TALES, for Little People; elegantly embellished with numerous Engravings, and done up in coloured fancy covers, 6d. each. Five sorts ready. List on application.

PRICE SIXPENCE EACH.—SEVEN EASY and INTERESTING HISTORIES, for very LITTLE FOLKS. By Miss COURNEY, author of the "Historical Library" "Play Grammar [illegible] Child's History of England," &c. Each embellished with four pages of tinted Illustrations, and done up in fancy coloured covers. List on application.

DEAN and SON, 35, Threadneedle-street, London, will publish, early in November,

MISS CORNER'S HISTORY of GREECE;
from accepted modern English, and foreign authorities, such as Grote, Thirlwall, Smith's Antiquities, &c. Questions will be appended to each chapter, and the plan and style adopted which has met with so much success in her "History of England."

THE FIRST HISTORY of ENGLAND that should be placed in the hands of a Child. By Miss CORNER. Price 3s 6d cloth; gilt edges, 4s; and 4s 6d Plates. Suitable for a reward.

SILVER BLOSSOMS, to Produce GOLDEN FRUIT. 8 Pages of Illustrations, 2s 6d., fancy cover cloth, gilt sides, back, and edges. By the author of "Spring Flowers and Summer Blossoms." Also, by the same Author,

Containing [illegible] splendid views of English history more than 200 years ago, the doings of the Popular Hero of the Fifth of November, the Vault in the Cradle to the Stake, Interspersed with Literary Squibs and Crackers

GRANT and GRIFFITH, corner of St. Paul's churchyard.

EXHIBITION, 1851.—Grand Authentic View of the Building in Hyde Park, as approved by her Majesty's Commissioners. Engraved on Steel, and nearly Two Feet in length Price 5s., with Inscription Post free on Roller for 6s. Stamps.
G BERGER [illegible] Manufacturer and Importer of Artists' Colours

MANUFACTURE OF SUGAR.
In crown 8vo, with Illustrations, price 10s 6d.

A PRACTICAL TREATISE on the CULTIVATION of the SUGAR-CANE and the MANUFACTURE of SUGAR. By THOMAS KERR. Planter.
JOHN J GRIFFIN and Co., London: R. GRIFFIN and Co., Glasgow.

GREAT EXHIBITION of MANUFACTURES in 1851

ENCYCLOPÆDIA of ARTS, MANUFACTURES, and MACHINERY. By PETER BARLOW, Esq., F.R.S; and CHARLES BABBAGE, Esq., M.A., F.R.S. One large volume, 4to, of 880 pages, illustrated by 37 steel plates, and 476 Engravings on wood, containing 650 Figures of Machinery and Implements. Price £3 3s., cloth.

The important Exhibition of the products of the Manufacturing Industry of All Nations, which is to take place in London in 1851, renders the publication of a work, professing, as this does, to represent the existing state of the Several Arts, Manufactures, and Machinery of great Britain, peculiarly appropriate and interesting. The [illegible] stupendid will form a comprehensive Inventory of the main articles that must necessarily constitute the approaching Great Exhibition, and it will throw that strong light upon the subject which in its vast extent and multitudinous details renders desirable No mere catalogue of the objects that will next year be collected in our vast Museum, such as the world never saw before, can give a tithe of the information that will be supplied by a work in which those Principles are Illustrated, and that Machinery is depicted, by which our great Chemical and Mechanical Arts are supported and carried to perfection. This work will therefore form a most valuable Guide to those interested in the Great Exhibition GRIFFIN and Co., London and Glasgow

ANATOMY FOR ARTISTS

This day, new Edition, enlarged 8vo, price 8s 6d.

HANDBOOK of ANATOMY for STUDENTS of the FINE ARTS, containing a Description, with Wood-cut Illustrations, of the Skeleton and Muscular Muscles of the Human Figure. By J. A. WHEELER
S. HIGHLEY, 32, Fleet-street, London.

Soyer's unique and gorgeous adornments of the Hungry Hall, recently prepared for the occasion by the PATENT GLASS SILVERING COMPANY, from whom illustrated Price Lists, containing this new and beautiful art, may be had, or may be had on enclosing a stamped directed envelope to S. MALLIES, 149, London Bridge.

PATENT POWER-LOOM BRUSSELS CARPETS.—These Carpets, manufactured by BRIGHT and Co., have now stood the test of time and wear; and in excellence of manufacture and durability of pattern, and in variety and brilliancy of colours, they fully warrant all that has been said in their favour Notwithstanding this, parties interested in preventing the introduction of any new fabric, have unscrupulously endeavoured to depreciate the merits of inventions which offer such advantages to the public. BRIGHT and CO.'s Power-Loom Brussels Carpets are sold at 20 per cent. lower than any other goods of equal quality; and we can assure the public that they will last down upon the floor 25,000 yards of them without a single complaint. LUCK, KENT and CUMBERLAND, CARPET MANUFACTURERS, 4, REGENT-STREET, opposite Howell and James's

BRIGHT and CO.'S PATENT POWER-LOOM BRUSSELS CARPETS.—These Goods are strongly recommended to the Trade and the Public on their glowing grounds They are woven by Steam Power, and are, therefore, more firmly made than any of the common Brussels Carpets, and they have the same good quality of Worsted throughout; whereas in the common Brussels the dark colours are generally made of an inferior Worsted They are printed in the yarn, and by a process of their own, and the colours are more durable, and will stand more severe tests than those of any other description of carpet. The great variety of colours, of an almost unlimited variety of shades or colours, patterns are, therefore, more elaborate, as there is no master number to complete, 3 Gamble-rooms, for the pay of Tremie at Homburg, are [illegible] The Bank of Homburg presents an advantage of 50 per cent. over [illegible] the Bank of the Republic of the Rhine
[illegible] evening the celebrated Band of the Casino will perform in the large Ball-room. [illegible] Balls, Concerts, Entertainments of every kind, will succeed one [illegible] in uninterrupted succession. Field Sports will also [illegible] place over a space of 25,000 hectares of plain and forest ground, in which there abounds a quantity of large and small game
The horses and private houses offer to families every available convenient, at moderate prices.
The journey from London to Homburg (passing through Brussels Cologne, Bingen, and Frankfort) is performed in 24 hours. The distance from Frankfort to Homburg is performed in an hour and a half; mail coaches [illegible] run three times between these places every hour.

PALMER and Co.'s Celebrated CANDLE-LAMPS command an extensive and daily increasing sale. Their excellence, simplicity of construction, and the softness of the light they produce, are known throughout the civilized world and all families. Without trimming or snuffing, any degree of light may be obtained by the use, from one to six ordinary candles, thus rendering them applicable to every purpose in which the aid of artificial light is required. It being impossible within the limits of an advertisement to convey an adequate idea of the almost endless variety of these patterns and sizes, persons desirous of purchasing are invited to inspect PALMER and Co.'s extensive and well-selected STOCK, the whole of which is marked in plain figures, at strictly moderate prices for cash 37 Tooker, 269, Strand, corner of St. Clement's Churchyard. Established 32 years.

NIGHT LIGHTS—CAUTION.

THE ILLUSTRATED LONDON NEWS.

No. 454.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, NOVEMBER 9, 1850. [SIXPENCE.

THE PAPAL AGGRESSION.

THE Papal aggression continues to be the all-absorbing topic of discussion. It would seem as if we had gone back seventy years in opinion and feeling, and as if all the bitter religious animosities of our forefathers had been revived amongst us. Indignation partly gives place to wonder when we consider that the foreign sovereign who has thus dared to claim spiritual, and, to a certain extent, temporal jurisdiction over these realms, holds his own seat on his crazy throne by the aid of a French army, and that his own people distrust or hate him even more than he can be distrusted or hated by the people of Great Britain.

An attempt, however, has been made to show that there is no occasion for all the hubbub that has taken place, and that the act of the Pope, in appointing Bishops and Archbishops in England, is a measure which simply concerns the internal government of the Roman Catholic congregations; that, in fact, the appointments no more concern or infringe the spiritual rights and privileges of the Protestant hierarchy, than the Wesleyans do when they make arrangements for the internal government of their churches, or the Jews when they appoint their Rabbis. But the people of England are not to be deceived. The Pope's own words, as well as the exulting language of the newly-appointed functionaries, leave no room for doubt as to the full purport of these appointments. They are the assertion of a claim of jurisdiction over the whole people of England—a claim perfectly consistent with the pretensions of the Popes in all ages—and which, if the Pope made any movement at all, he could not logically or consistently forego. This was instinctively felt in England immediately that the Papal brief was promulgated, and is so considered by the Roman Catholics themselves in every part of Europe. The *Univers*—the organ of the French Roman Catholics—puts the whole assumption in a clear light, while defending and approving it to its fullest extent.

Most of the sees in England (says this plain-spoken journal) hold their authority from the successors of St. Peter. Now, it is beyond dispute that he who can give powers can also retract them. "*Any thing that may be done in opposition*," says the Papal bull, "*no matter by whom, or by what authority (even in the name of the spiritual authority of the Queen), shall be null and of no avail.*"

It is important to observe that the divisions of spiritual jurisdiction laid down in the brief have no analogy with the territorial divisions which form part of the religious organisation of the dissenting sects.

An attempt may be made in England to appease the alarm or the Anglicans, by comparing the new diocesan divisions to the arrangements of the Episcopal Church of Scotland, or of the Methodists; but such a comparison would be completely false. The Methodists follow their propagand-

THE NEW RECORDER.—THE RIGHT HON. J. A. STUART-WORTLEY, M.P.—(SEE NEXT PAGE.)

THE NEW LORD MAYOR.—THE RIGHT HON. JOHN MUSGROVE.—(SEE NEXT PAGE.)

THE NEW VICE-CHANCELLOR, SIR R. M. ROLFE.—(SEE NEXT PAGE.)

THE NEW PRESIDENT OF THE ROYAL ACADEMY.—C. L. EASTLAKE, ESQ.—(SEE NEXT PAGE.)

ism. They never pretended to call in question the spiritual authority of the Anglican bishops. They may divide and subdivide as much as they like the dioceses of London or of Oxford, without ever assailing the authority of those sees, and rendering null and of no avail the acts emanating from the Anglican prelates that occupy them. To establish an analogy between these two orders of facts would be to reduce the Catholic Church to the proportions of one of the sects that divide England between them. We prefer, as the Holy See has thought fit in its wisdom to take this grave measure, to avow openly and frankly its bearing, to give it its full importance, rather than endeavour to diminish it to calm the irritation of the enemies of the church, who take offence at it. *Yes, the act of supremacy just issued by the Pope denies the existence in England of any other spiritual authority than his own.* Let upright-minded Anglicans reflect upon this, and examine their consciences, for it comes to nothing less! Or have the Anglicans perchance imagined that the Pope recognised the authority of a Protestant Church?

This is in reality the meaning of the Papal brief and of the appointment of Dr. Wiseman. The Church of England is not to be deceived in the matter by any attempts to reduce the aggression within the endurable limits of a private arrangement of internal economy similar to that of the Wesleyans or any other sect.

The friends of civil and religious liberty will long and deeply deplore that the intolerant spirit of religious animosity should have been evoked from the grave in which it slumbered by the act of this arrogant and helpless Pope, and his still more arrogant advisers; but, while blaming him and them to a certain extent, they cannot fail to blame still more severely the conduct of those English clergymen who have been dallying with Popery for so many years past; amusing themselves with mummeries in their churches, and with quibbles in their publications, and asserting claims of spiritual dominion, irrespective of, and hostile to, their allegiance to their own Sovereign. These Puseyites, or Newmanites, or Perverts, or whatever be the name which best describes them, are those who have brought the Church of England to a state of weakness which invited aggression. It is they who are chiefly to blame. The Pope has but acted according to his vocation, and performed what he believed to be his duty; but they have been tampering with their duty, and playing fast and loose with the most sacred principles. They have now an opportunity of atonement for the wrong they have inflicted upon the Church in which they were nurtured. If the Church of England have no enemies in her own bosom, she is quite strong enough to withstand and triumph over all assaults that may be made against her from without. Let the wavering, therefore, make up their minds to be with her, or against her. They have invited the enemy, and the enemy has come. The least they can do is to declare openly for one side or the other. If they so much admire the forms and ceremonies, the pomp and circumstance, of Popery; if they so dearly love the external gewgaws, the mummeries, and the magnificence of mediæval superstition; and if they conscientiously believe, that, in authority and argument, the Pope has the better of Protestantism, let them declare themselves, and cease to eat the bread of a Church with which they have no sympathy. Against open, avowed, and honourable foes defence is easy; but, if there are traitors within the sanctuary, let them depart in peace, and the Church will be well rid of them. It is to be deplored that this question should have arisen in our age and country; but, as it has arisen, it must be accepted with all its consequences. We cannot doubt that the ultimate result will be to the advantage and strengthening of the Protestant Church, and to the immense increase of enlightened religious liberty.

We rejoice to see that Lord John Russell has so emphatically characterised this aggression. The following letter from his Lordship to the Bishop of Durham is an admirable statement of the whole case. It breathes such a genuine spirit of reliance upon the truth, and well-merited contempt for the pretensions of the Pope and his Cardinals, and shows so clearly where the sources of the mischief lie, that we have no doubt it will excite throughout England the warmest approbation of all friends of the right of free opinion.

TO THE RIGHT REV. THE BISHOP OF DURHAM.

My dear Lord,—I agree with you in considering "the late aggression of the Pope upon our Protestantism" as "insolent and insidious," and I therefore feel as indignant as you can do upon the subject.

I not only promoted to the utmost of my power the claims of the Roman Catholics to all civil rights, but I thought it right, and even desirable, that the ecclesiastical system of the Roman Catholics should be the means of giving instruction to the numerous Irish immigrants in London and elsewhere, who without such help would have been left in heathen ignorance.

This might have been done, however, without any such innovation as that which we have now seen.

It is impossible to confound the recent measures of the Pope with the division of Scotland into dioceses by the Episcopal Church, or the arrangement of districts in England by the Wesleyan Conference.

There is an assumption of power in all the documents which have come from Rome—a pretension to supremacy over the realm of England, and a claim to sole and undivided sway, which is inconsistent with the Queen's supremacy, with the rights of our bishops and clergy, and with the spiritual independence of the nation, as asserted even in Roman Catholic times.

I confess, however, that my alarm is not equal to my indignation.

Even if it shall appear that the ministers and servants of the Pope in this country have not transgressed the law, I feel persuaded that we are strong enough to repel any outward attacks. The liberty of Protestantism has been enjoyed too long in England, to allow of any successful attempt to impose a foreign yoke upon our minds and consciences. No foreign prince or potentate will be permitted to fasten his fetters upon a nation which has so long and so nobly vindicated its right to freedom of opinion—civil, political, and religious.

Upon this subject, then, I will only say, that the present state of the law shall be carefully examined, and the propriety of adopting any proceedings with reference to the recent assumption of power, deliberately considered.

There is a danger, however, which alarms me much more than any aggression of a foreign sovereign.

Clergymen of our own Church, who have subscribed the Thirty-nine Articles, and acknowledged in explicit terms the Queen's supremacy, have been the most forward in leading their flocks, "step by step, to the very verge of the precipice." The honour paid to saints, the claim of infallibility for the Church, the superstitious use of the sign of the Cross, the muttering of the Liturgy so as to disguise the language in which it is written, the recommendation of auricular confession, and the administration of penance and absolution—all these things are pointed out by clergymen of the Church of England as worthy of adoption, and are now openly reprehended by the Bishop of London in his charge to the clergy of his diocese.

What, then, is the danger to be apprehended from a foreign prince of no great power, compared to the danger within the gates from the unworthy sons of the Church of England herself?

I have hope that the propounders and framers of these innovations will desist from their insidious course; but I rely with confidence on the people of England; and I will not take a jot of heart or hope so long as the glorious principles and the immortal martyrs of the Reformation shall be held in reverence by the great mass of a nation which looks with contempt on the mummeries of superstition, and with scorn at the laborious endeavours which are now making to confine the intellect and enslave the soul.

I remain, with great respect, &c.,

Downing-street, Nov. 4. J. RUSSELL.

Lord John Russell has touched the right chord. There can be no doubt that it will be warmly responded to by the great bulk of the people.

THE NEW VICE-CHANCELLOR, SIR ROBERT MONSEY ROLFE, A.M.

THIS eminent lawyer—one of the most learned of his time—is the elder and only surviving son of the late Rev. Edmund Rolfe, A.B., Rector of Cockley Clay, Norfolk, by Jemima his wife, fourth daughter of William Alexander, Esq., brother of the first Earl of Caledon. His grandfather, the Rev. Robert Rolfe, M.A., and his great-grandfather, the Rev. Waters Rolfe, A.B., were both beneficed clergymen in Norfolk. The former married Alice, daughter of the Rev Edmund Nelson, Rector of Hilborough, and thus Sir Robert's father and the great Lord Nelson were cousins german.

The Vice-Chancellor was born 18th December, 1790. He received his education at Bury St. Edmunds and Cambridge, where he took a Wrangler's degree in 1812; and was called to the bar in 1816 from the Hon. Society of Lincoln's Inn. In 1832 he obtained a silk gown; and in 1834 was appointed Solicitor-General, which office he continued to hold, with the brief interval of Sir Robert Peel's first Administration, until 1839, when he was raised to the bench as a Baron of the Exchequer. He sat in Parliament for Penryn from 1832 to 1839; and was Knighted in 1835. Sir Robert married, in 1845, Laura, daughter of the Rt. Hon. William Curr, Esq., of Pengwill. His christian name of "Monsey" he derives from his maternal great-grandfather, the celebrated Dr. Monsey, physician to Chelsea College.

As a judge, both in the courts of law and equity, Sir Robert Rolfe enjoys a high and deserved reputation. His perfect temper and courtesy, his thorough knowledge of his art in all its branches, his ready application of it on all occasions, and his wonderful quickness in appreciating the facts and bearings of every case before him, render his services invaluable on the bench. He is indeed a complete impersonation of that intellectual and impartial judge of which we read in the histories of Greece and Rome, but which probably has never so really existed anywhere as in England.

THE NEW RECORDER,

THE RIGHT HONOURABLE JAMES ARCHIBALD STUART-WORTLEY, M.P. FOR BUTESHIRE.

MR. JAMES STUART-WORTLEY is the worthy descendant of ancestors long associated with the intellectual greatness of their country. His father, the late Lord Wharncliffe, a highly gifted and eloquent statesman, held a distinguished place among the politicians of his time; his great-grandfather, John, third Earl of Bute, was the famous Minister of George III., and his great-great-grandmother the accomplished Lady Mary Wortley-Montagu. The right hon. gentleman was born on the 3rd of July, 1805, and received his education at the University of Cambridge. He was called to the bar in 1831, by the Honourable Society of the Middle Temple, and joined the Northern Circuit, on which he soon gained a considerable practice; and, at length, having become a Queen's Counsel, ranked high among its leaders. In 1844, he was appointed Standing Counsel to the Bank of England; in 1845, Solicitor-General to the Queen Dowager; and, shortly after, Attorney-General to the Duchy of Lancaster; and, in 1846, Judge-Advocate-General, being at the same time sworn of the Privy Council. From 1826 to 1837 he sat in Parliament for Halifax, but, since 1842, he has uninterruptedly represented the shire of Bute.

On the retirement of his party he resigned, of course, his office of Judge-Advocate-General, and has recently devoted his energies and eloquence to the much agitated question of "marriage with a deceased wife's sister." In the course of the past month Mr. Stuart-Wortley was chosen Recorder of the city of London, and has just entered on its judicial duties, for which his knowledge of law, his powers of oratory, and his upright and honourable character pre-eminently qualify him.

He married, on the 6th of May, 1846, the Hon. Jane Lawley, only daughter of Lord Wenlock, and has a son and a daughter.

MICHAELMAS TERM.—THE NEW JUDGES.

SATURDAY last was the first day of Michaelmas Term, and the Lord Chancellor entertained the Judges, Queen's Counsel, Serjeants, &c., at breakfast, at his private residence, whence they arrived in procession at Westminster Hall at two o'clock. His Lordship entered the Court of Chancery, attended by the Master of the Rolls, the Vice-Chancellors Knight Bruce and Rolfe, and Masters Tinney and Blunt, who, after saluting his Lordship, retired to their respective courts

In the Vice Chancellor's Court, which was formerly occupied by the late Vice-Chancellor of England, Sir Lancelot Shadwell, his Honor Sir J. K. Bruce addressed the Attorney-General with feelings of very strongly manifested emotion in the following words:—

"It is impossible for me to enter this court to-day without renewal of sorrow for the loss of one so lately with us from us; by whom for so many years this chair was filled, and from which it is almost startling to hear another voice than his." He knew [illegible] as one by the Bar [illegible] years. We have lost a man, a friend dear to us all, and a Judge distinguished for his great knowledge of the law he administered—distinguished for varied learning and acquirements, [illegible] swift to hear, slow to err"—pure and blameless in life, [illegible] of gentleness, and amenity—who never said a word intended to give pain, [illegible] touched thought or an unkindly feeling. But he is gone—

"*Flere si nescimus, non tamen est.*"

In the Court of Exchequer, immediately on the assembling of the Bar, it was announced to Mr. Martin that he had been selected to fill the seat on this Bench vacated by the appointment of Mr. Baron Rolfe to the Vice-Chancellorship. The learned gentleman, who had taken his accustomed position within the bar, and was up to the last moment engaged in preparing for the duties of an adverse cause, immediately withdrew from the court, but not until he had been warmly greeted by many an outstretched hand. It is almost superfluous to add, that the appointment, though somewhat unexpected, has been received by the profession with universal approbation.

Mr. Serjeant Allen, of the Oxford Circuit, and Mr. Serjeant Wilkins, of the Northern Circuit, have received a patent of precedence. Mr. Miller, of the Midland Circuit, will receive the coif. The honourable and learned Judge elect of Mr Martin and the retirement from circuit practice of Mr Whitenurst have led to several applications to the Lord-Chancellor for silk; but at present no determination has been made as to which, if any, gentlemen will be called within the Bar.

THE NEW LORD MAYOR.

MR. JOHN MUSGROVE, the highly esteemed gentleman who this day enters upon his year of office, was born at Hackney, and is the son of a citizen, who was a builder of high respectability; and, by his upright and honourable conduct, gave the best example by the following of which his son has attained the highest civic honours.

Alderman Musgrove entered into business at an early age, as an auctioneer; and by industry, and the strictest integrity, his labours have met with the most successful results. He is now about to retire from business, with an ample fortune, in the full vigour of life; whilst his benevolent disposition prompts him with an ardent desire to promote the welfare and happiness of others. In early life he married an amiable lady, the daughter of a highly-respected gentleman, and of an ancient Devonshire family, by whom the family now represents her native town in Parliament. From the marriage there is no issue. On the death of Alderman Sir John Cowan, Bart., Mr. Musgrove was, in 1843, elected to the gown of Broad-street Ward. In 1849 he was chosen one of the sheriffs for London and Middlesex, and was shortly after put in the commission of the peace for the county of Middlesex. He has also, during the last few years, presided over the affairs of several public boards All these important offices he has filled in such a manner as to gain the highest estimation for himself, and to reflect credit upon the judgment of those who have placed him in the elevated position he now fills. He has entered upon an office which, more especially in the coming year, is one of a most arduous character.

In presenting the new Lord Mayor to the Lord Chancellor, on Saturday, the Recorder observed:—"It was an auspicious circumstance, that a gentleman so admirably qualified to maintain the office was appointed to preside over the city in the year 1851. It was fortunate for the public, as well as for the men in high and responsible stations in the country, that upon an occasion which was to bring together such vast assemblages from other countries, as well as from all parts of England, Ireland, and Scotland, the chair of the city of London would be filled by one who had so well fulfilled the duties of the station, and was in every respect so well qualified to promote the noble scheme of Prince Albert by the exertions of his talents and capabilities. No doubt was entertained by the citizens of London that the hospitality would be attended with more than ordinary *éclat*, and that the foreigners who should visit London upon an occasion of such powerful interest to the world would return with a deep impression of the hospitality and kind feeling of their chief magistrate.

The Lord Chancellor congratulated the Lord Mayor elect upon the approbation which her Majesty had been graciously pleased to signify of the election made by the citizens of London. It was a source of great satisfaction to find that a gentleman whom his fellow-citizens held in so much honour and respect was chosen to the high office of chief magistrate at a time when such an influx of foreigners from all parts of the world as had never been imagined before was about to take place. The Exhibition of 1851 would be supported most powerfully throughout the Queen's dominions, and a most zealous activity would, upon so extraordinary an occasion, be required from, and no doubt be afforded by, the gentleman whose election was hailed with such flattering circumstances.

ELECTION OF THE PRESIDENT OF THE ROYAL ACADEMY.

ON Monday last the members of the Royal Academy proceeded to the election of their President, in the room of the late Sir Martin Archer Shee. Thirty Academicians were present, of whom twenty-eight, in pursuance of the statutes, recorded their votes. The result was that Mr. Charles Locke Eastlake was elected President by the all but unanimous assent of his fellow-Academicians.

The announcement of the election of the President will doubtless be hailed with unanimous satisfaction. It is seldom that the necessary qualifications for fulfilling this honourable yet highly responsible trust, have been more happily combined than in Mr. Eastlake, whose name has ever been in the front rank of English art, and in early life had already won additional lustre.

Mr. Eastlake has shown, on several occasions, his desire to reform the abuses and remove the restrictions which have rendered the Royal Academy obnoxious to public censure; and we hope that his administration of its affairs will be marked by a judicious resolution to adapt the institution over which he presides to the growing tastes and wants of the country.

Benvenuto Collini, in his picturesque memoirs, recommends every artist who has passed the age of forty, and who has previously produced works of excellence, to follow his example, and write his own life. Mr. Eastlake has followed this advice, and thus furnished materials for tracing his career.

Mr. Eastlake, like Haydon, was born at Plymouth, a sufficient compliment to art, for in its environs was also the birth-place of Sir Joshua Reynolds. Like Rembrandt, Reynolds, and so many before them, Mr. Eastlake showed an early aversion to the Latin grammar. He fled the Charter-house school; and a glimpse of Haydon's picture of "Dentatus," which was at that period exhibited at Plymouth, made him a painter. After studying in the Academy for two years, under Fuseli, he painted a picture of "The Raising of Jairus' Daughter." The youth was a favourite in the person of Mr. Jeremiah Harman, by whom he was commissioned to make studies of the miracles of art, at that time collected in the Louvre, in Paris, by Napoleon. It was here, also, that Lawrence, Haydon, and Wilkie came at this time, like so many bees, to suck pictorial honey.

Mr. Eastlake made here his first acquaintance with the wonders of the Roman art. But the unsaid task of copying the old masters for his early patron, Mr. Jeremiah Harman, was relinquished on the sudden return of Napoleon from Elba. At a not much later period, and by a strange freak of fortune, the fallen hero became himself the subject of the painter's pencil. Mr. Eastlake made a sketch of the ex-Emperor, as he appeared from the gangway of the *Bellerophon*, when at anchor in Plymouth roads, interesting as the last delineation of a noble visage, then undisguised with Bourbonism.

During the years 1817 and 1819 Mr. Eastlake visited Italy and Greece, rather stirring up their living treasures than measuring antiquity with the inch rule of the archæologist. Nor yet did Mr. Eastlake confine himself to the external forms of art and nature: he then laid the foundation of that intimate knowledge of the arts, be they called formative, architectonic, plastic, or pictorial, the able elucidation of which renders his writings the most valuable repertory of ancient art. Thus while all the classical skill of ancient colourists is found in his style of painting, all the principles on which Dutch and Venetian masters proceeded are found in his writings.

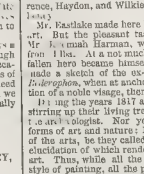
Those who reflect on the unceasing labours of the Secretary of the Fine Arts Commission will be rather inclined to believe that the title of President was alone wanting to render Mr. Eastlake the legitimate leader of art in England. We need only mention his translation of "Goethe's Theory on Colours," the "Notes to Kugler," and the "Materials for a History of Oil Painting."

On the above occasion, Mr. James Clark Hook was elected an Associate of the Royal Academy. Mr. Hook is a young and rising artist, who will strengthen the list of colourists in the Academy. His pictures were noticeable in the last exhibition for the extreme freshness and brilliancy of their tints. He is a thorough master of the Venetian system. Our readers will recollect, that in our series of illustrations from the last Exhibition of the Royal Academy, we engraved Mr. Hook's "Francesco Novello di Carrara and the Lady Taddea's Escape from the Emissaries of Galeazzo Visconti;" the same subject, but differently treated, by Mr. Eastlake. (See ILLUSTRATED LONDON NEWS, No. 426.)

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED

LORD RANCLIFFE.

GEORGE AUGUSTUS HENRY ANNE PARKYNS, second Baron Rancliffe, in the Peerage of Ireland, and a Baronet, was the son of Thomas Boothby Parkyns, the first Baron. He was born on the 10th of June, 1785, and succeeded to the Peerage on the decease of his father, the 17th November, 1800, and to the Baronetcy, as fourth Baronet, on the 17th of March, 1809. He married, the 18th October, 1807, the Lady Elizabeth Mary Forbes, eldest daughter of George sixth Earl of Granard



Throughout his public career, which lasted from his coming of age, in 1805, till his complete retirement from political life, in 1830, George Lord Rancliffe showed himself a Whig upon all occasions. He sat in Parliament for Minehead, and afterwards for Nottingham. During several years he held the appointment of Equerry to the Prince of Wales, afterwards George IV., and he was an intimate associate of the Prince until his Royal Highness left the ranks of the Whigs. Latterly, Lord Rancliffe expressed himself in private favourable to Protection. For some years past, his Lordship has been in a very weak state of health. He died at his seat, Bunny Park, Nottinghamshire, on the 1st instant. As Lord Rancliffe leaves no issue by his wife (who survives him, and from whom he was separated for many years), his peerage becomes extinct. His baronetcy, however, descends to Mr. now Sir Thomas, Parkyns, of Ruddington, near Nottingham, and with it a slight portion of the estate, the rest of which goes to his Lordship's nephew (the eldest sister's son), Sir Richard Levinge, Bart., of Knockdrin Castle, Westmeath. Lord Rancliffe's second surviving sister, the Hon. Maria Charlotte, was married first to the Marquis de Chabrol, in 1817, and secondly, the 3rd of June, 1824, to Prince Auguste Jules Armand Marie de Polignac, formerly Minister to Charles X. The Lords Rancliffe derive from Richard Parkyns, a barrister, and Recorder of Nottingham and Leicester, whose grandson, Isham Parkyns, of Bunny, was a staunch Cavalier during the Civil War, and signalised himself by his defence at "The Place," Ashby-de-la-Zouch, whilst Governor of it. The late Lord's great great-grandfather was the first Baronet, being so created in 1681.

LADY ANNE MURRAY.

THE death of this lady occurred on the 28th ult., at Twickenham. She was born 22nd of February, 1797, the third daughter of Richard Bingham, second Earl of Lucan, by the lady Elizabeth Belasyse, h.w.s. daughter of Henry, last Earl of Fauconberg; and married, 18th of July, 1816, Alexander Murray, Esq., of Broughton, county of Wigton, who died 15th of July, 1845.

RICHARD EDWARDS, ESQ., OF ROBY HALL, COUNTY OF LANCASTER.

THIS respected gentleman, a magistrate and Deputy-Lieutenant for Lancashire, was second son of the late John Edwards, Esq., of Newtown, and derived his descent from a respectable Denbighshire family. He was born 12th of September, 1777, and married Mary, daughter of Thomas Dobinson, Esq., of Liverpool, by whom he leaves an only child and heiress, Amy Charlotte, who married, 18th of May, 1847, Thomas Moss, Esq., eldest son of John Moss, Esq., of Otterpool.

Mr. Edwards died at Roby Hall, on the 2nd instant.

THE DOWAGER LADY SUFFIELD.

WE were in error in stating last week that EARL HARBOTTLE, Dowager Lady Suffield, was dead. The Lady Suffield, whose death occurred at Beckling Hall, on the 27th ult., was CAROLINE, widow of William Assheton Harbord, second Lord Suffield, and second daughter and co-heir of John, second Earl of Buckinghamshire.

NAVAL AND MILITARY INTELLIGENCE.

SUSPENSION OF THE CONTEMPLATED REDUCTION OF THE ARMY.—It is understood that the intention of reducing 5000 men in the next year's estimates is suspended, and that the present numbers will be proposed.

On Wednesday a Court of Directors was held at the East India House, when Lieut.-General Sir John Grey, K.C.B., was appointed Commander-in-Chief of the Company's forces on the Bombay establishment.

The troops in Portsmouth garrison are ordered to assemble on Southsea Common every Saturday morning at half-past ten o'clock, in route marching order, to proceed into the country for exercise, under the senior officer present with the men are also to lay down their kits for inspection during the winter months.

WEST FLANDERS RAILWAY.—The regular half-yearly meeting of this company was held at Bruges on Tuesday last, and the dividend of 2s. 6d. per share (as recommended by the Directors) declared.

EXTRAORDINARY ESCAPE OF A FUGITIVE SLAVE.—Henry Box Brown, a fugitive slave from Richmond, Virginia, arrived in Liverpool on Friday week, by the Canadian steamship, from America. On the 29th of March, 1849, he escaped from bondage in rather a remarkable manner. He was packed in a box three feet long, two feet and a half deep, and two feet wide. Confined in this small space, he was forwarded by railroad and steamboat from Richmond to Philadelphia, a distance of 350 miles. The package was directed to one of the leading anti-slavery men in Philadelphia, and was twenty-seven hours on the road. The sufferings of the poor fellow may be imagined when it is known that the only accesses for fresh air were through small gimlet holes in the sides of the box; and although written directions were placed to "keep this side up," for more than two hours the box was turned upside down, the runaway slave being for that time with his feet up and his head down. Brown is a fine intelligent-looking man, about thirty-five years of age. Since his escape from slavery he has carried a subsistence by exhibiting, in the free states of America, a panorama of scenes of the appalling scenes resulting from the existence of slavery. He also delivered lectures against slavery, and thus rendered himself very obnoxious to the slaveowners of the States. Under these circumstances, it was not to be wondered at, armed with the powers of the Fugitive Slave Bill, an attempt should be made to arrest him. Two such attempts were made, and it was with the greatest difficulty Brown made his escape to this country. He is accompanied by James Boxer Smith, also a coloured man, but not a slave, who assisted to box him up at Richmond, and who has also rendered himself obnoxious to the slave party in America by his companion with Brown. These two men have landed on our shores almost penniless. They contrived to get their panorama on board the vessel with them, but they are unable to release it, unless they receive assistance from some benevolent friends of the coloured race.

FOREIGN AND COLONIAL NEWS.

PARISIANA.

(From our own Correspondent.)

PARIS, Wednesday.

The partisans of the Imperial parody are fast subsiding into their native obscurity. The President has renounced all claim to his uncle's crown, and even his services for the prolongation of his powers are fast dwindling to their shortest span. Yesterday he terminated his message, which is to be read to the Representatives shortly after the meeting of Parliament. It was laid before the Ministry this morning, at a Cabinet Council, but as yet nothing has transpired as to its contents.

Here all is discontent and confusion. The *salus populi* is no longer held to be the *supremæ lex*; but everything is postponed to the accomplishment of personal animosities and petty squabblings. It were vain to conceal the fact that the President has lost much of his popularity and *prestige*. It was his wont to drive about Paris in an unpretending phaëton; he has now adopted all the appliances and means of state in his equipages; but, as he drives up the Boulevards, no man says "God bless him." And this fleeting aid of tinsel and bitte-fire—the last resource of the "Terrible Enfant" has failed—to render the drama, in which he has played so prominent a part, palatable to the Parisians.

The friends of order are trampling upon the serpent of Socialism in all directions. The Prefect of the department of the Var has given a signal victory over the Red men in his neighbourhood. They made an attempt at a demonstration: he went boldly in amongst them, and arrested the ringleaders, but they were afterwards rescued by the mob. He followed them with an armed force into the mountains and re captured them; and immediately dissolved the National Guards of Salavers and Vallen, who had afforded him no assistance. The Municipal Council at Massoubec, in the department of the Gers, have also just been dissolved *en masse* by the Prefect, for their strong bias towards Socialism. General Lahitte has also just been elected in the department of the Nord. And although conspiracies are rife throughout France, yet, for the present, Socialism is subjected to check.

Masses continued to be said and sung in various parts of France for the repose of the soul of the Queen of the Belgians. These religious ceremonies for deceased Royalties must be considered as so many protests against the Republic, and in that light are they generally regarded here. Portraits of Louis Philippe and the members of his family reappear in profusion in the print-shops, and the Boulevards teem with pictures of the Comte de Chambord. The residence of Joseph, the President are esteemed a "drug in the market," whilst those of Changarnier and "Henri Cinq" are sold in vast numbers.

The provincial travelling shops have been reaping a rich harvest of late by the recent influx of foreigners, chiefly English. Our countrymen have made extensive purchases, but the French residents buy nothing. They are biding their time, and have closed their *salons* and *chateaux* in dogged resolve. Prince Poniatowski, the Tuscan Minister, *cumulo*, and the Spanish Envoy, are all in the desert, at which all the *beau monde* and the *corps diplomatique* were present. M. and Mdme Thiers were amongst the guests. M. Thiers conversed for a long time with Lord Normanby and with Gen. Lahitte. M. Berryer was also for a long time in earnest conversation with General Lahitte and Count Molé.

Mdlle. Rachel has returned to Paris, and reappeared last night at the Théâtre Français. Her reception, after her recent triumphal progress through Germany, was most enthusiastic. During her absence, Mdlle. Brohan, the sister of the celebrated actress of that name, has obtained considerable popularity, and an attempt has been made to substitute Mdlle. Brohan for Mdlle. Rachel, whose engagement at the Théâtre Français will terminate on the 1st of December: but talent like Rachel's *macrivr, non fit*; and, although Mdlle. Brohan has displayed considerable talent, and Mdlle. Rachel has displayed much perversity and jealousy, yet the Parisians would break out into open insurrection if they were deprived of their old favourite. And Mdlle. Rachel will, therefore, in all probability, remain on the scene of her early triumphs.

Poor Alcide Tousez is dead. "Alas, poor Yorick!" where are your jests and jibes now with which you have so often set the Théâtre Monfavorlen in a roar? The *troupe* of the Palais Royal must sadly long ere they can fill the void occasioned by his severe loss. His representations of dogged simplicity and imperturbable stolidity may, perhaps, have been equalled, but certainly not excelled, by our Emery, Liston, or Keeley. The drama has also sustained another blow and great discouragement by the closing of the magnificent Théâtre Historique. Our Italian opera will open on Saturday, under Mr Lumley's auspices. A brilliant season is anticipated, as, from musical [illegible] Paris, but now the well-known abilities of our *impresario*, and the large resources at his disposal, must ensure success. The season will open with the Consecration Oratorio, and the performance of Spohr's "Last Judgment" in imitation at present residing in Paris. A series of dramatic representations are also announced to take place during the season at the British Embassy, so that, you see, although the Republic may die, the Republicans will not die of ennui.

FRANCE

The differences between General Changarnier and the President of the Republic have been patched up for the present, not, however, before the Commander-in-Chief had aimed the following bold stroke at the appearances of popularity with the army, which Louis Napoleon was desirous of establishing by means of such eries from the troops on parade, or review, as "*Vive Napoleon*," "*Vive l'Empereur*," &c., which were generally got up on the *claqueur* principle by a few ardent partisans on those occasions. It is an order addressed to the army; viz

[illegible] According to the terms of the law, the army does not deliberate in virtue of [illegible] [illegible] [illegible]

OPENING OF THE WHITEHAVEN AND FURNESS JUNCTION RAILWAY.

WHITEHAVEN BAY.—(SEE NEXT PAGE.)

NEWSPAPER

DEARSTONES STATION.

OPENING OF THE WHITEHAVEN AND FURNESS JUNCTION RAILWAY.

DUDDON SANDS VIADUCT.

(*From our own Reporter.*)

THE formal opening of that part of the Whitehaven and Furness Junction Railway which extends from Bootle to its junction with the Furness line, near Broughton, in Furness, took place with great ceremony on Tuesday (last week). About half-past nine o'clock in the morning, about sixty gentlemen, including the Earl of Lonsdale (the Chairman) and the Board of Directors, left Whitehaven by a special train, and reached Broughton in an hour and a half. Every preparation had been made for the occasion. The whole population of the place seemed astir, with a view to give éclat to the ceremony. They

BROUGHTON TOWER.

BROUGHTON.

were accompanied by a band of music and flag-bearers; and the airs they played, if not classical, were at least enlivening and appropriate. A very tasteful triumphal arch had been erected in front of the station, composed of evergreens and garlands; and the road leading from the station to the old King's Head, where an excellent dinner had been prepared, was also decorated with such flowers and plants as the season could afford. Not

ARCH AT BROUGHTON STATION

FURNESS ABBEY.

the least interesting part of the proceedings was a procession of the workmen who had been employed on the Railway, who appeared with appropriate emblems, and had their spades and the other insignia of their peculiar industry.

The whole line from Whitehaven to Broughton abounds with magnificent scenery, and objects interesting not only to the antiquary and architect, but to the general tourist

The stations between Whitehaven and Broughton are St. Bees, Netherton, Braystones, Sellafield, Seascale, Drigg, Ravenglass, Eskmeals, and Sylecroft. The distance from Whitehaven to Broughton is thirty-four miles. Some of these places are too well known to need description, as for instance, St. Bees, with its celebrated college, where a university education is obtained for a less sum per annum than would be paid to a country schoolmaster. St. Bees, too, is noted as a fashionable and agreeable watering-place. Ravenglass is an antique place, about which there are various traditions; and some of its old inhabitants speak of exciting events of which it has been the theatre, and of prophecies made and fulfilled regarding it. In its immediate vicinity are some undoubted remains of Roman architecture. About a mile from the Sylecroft station stands Millom Castle; but, before arriving at that station, a magnificent view is obtained of the far-famed Black Combe; and from Sylecroft to the station at Broughton the scenery is of no mean striking, wild, and picturesque character. The aspect, indeed, is varied and attractive in the extreme. Mountain, wood, and flood, intermixed, as it were, are to be seen as far as the eye can reach. One of the interesting objects on this line is the viaduct across Duddon Sands, a very handsome wooden structure, and of great strength.

The splendid ruins of Furness Abbey, so striking from their antiquity, beauty, and grandeur, are considered of themselves of sufficient interest to pay the trouble of a visit; and the opening of this line will, no doubt, ere long, render them as familiar as they are wonderful and imposing. We pass, however, to Millom Castle, about a mile from the Sylecroft station. The lords of the seignory had very great privileges—*jura regalia* throughout the entire parishes of which the lordship is composed. The last execution under this authority is supposed to have taken place in the early part of the seventeenth century.

Very near to the railway is to be seen "Hallow Hill," where the executions took place. A stone has recently been erected, on which is inscribed "Here the Lords of Millom exercised *jura regalia*." A few years ago, the arms of Hodleston, in the wall of an outhouse, was discovered: the motto is "*Soli Deo honor et gloria*." The execution is beautiful, and the work is in good preservation. The vicarage-house was in a field, near Millom Castle. During the civil war this edifice was pulled down by order of the Lord of Millom, so that the Parliamentarians should have no chance of a refuge in it.

Recurring for a moment to the ruins of Furness Abbey, we shall only remark that the spectator finds his interest divided between the grandeur of the ruins and the surpassing beauty of the valley in which they stand. The latter gratefully may be imagined, when we state that they occupy a space of more than sixty acres. The architecture is a mixture of Norman and early English

The line, of which we record the complete opening, reaches hereafter to be a very important one, when some of the connecting branches in progress are completed, as it will then be the shortest and most speedy link of communication between West Cumberland, Lancashire, Yorkshire, and the north of Ireland The junction being effected at Broughton with the Furness line, there is a direct communication with Roa Island, between which and Fleetwood there are steamers packed at any period of the year. Indeed, from Roose, on the Furness line, there is a branch line, which takes slate from the quarries of the Earl of Burlington, and the valuable iron ore of the district, to Barrow, where vessels are loaded for any port. Indeed, from the increased produce of the iron ore, a vast source of wealth and industry is opened. Another branch of the Furness line goes from Millwood to Dalton and Crookland. The distance from thence to Ulverston is about five miles. A connexion to the latter town will no doubt exist, as a line is in course of construction. A junction line is also in contemplation between Ulverston and the Lancaster and Carlisle Railway. Indeed, a competing line to the same point is also projected.

The train which took the party from Whitehaven to Broughton made but very brief stoppages, and then only to receive the addition of a few gentlemen from the various stations who had been invited to the inaugural ceremonial. The favoured few, therefore, had but a passing glance of the varied wonders and attractions of the line—the vales of the Eben, the Calder, the Esk; the great mountains of Scawfell and Black Combe; the Sandhills and island of Walney; and last, not least, the Castle of Millom, which we have briefly described. Nevertheless, some of these objects, such as Black Combe, for instance, form a most imposing spectacle, even from a great distance. For a considerable time, too, on the right of the line from Whitehaven, is an object ever of imposing grandeur and majesty, the sea, whose broad expanse stretches away as far as the eye can reach.

THE DINNER AT BROUGHTON

The dinner was served at the Old King's Head, soon after the time appointed, and was a sumptuous and elegant repast. The Earl of Lonsdale presided. The company included the Earl of Burlington, Lord Cavendish, the clergy, magistracy, and gentlemen of Whitehaven and the town in the neighbourhood of the line. After the accustomed toasts to the Queen, Prince Albert, and the Royal Family, the army and navy were given in succession.

The Chairman, in proposing "The Whitehaven and Furness Junction Railway," stated that the idea of it was suggested by the late Mr. George Stephenson, who, six years ago, had pointed out the facilities which the line offered for a railway, in consequence of the great mineral wealth of the neighbourhood, which even now had been fully developed. He (Lord Lonsdale) was struck with the excellence of Mr. Stephenson's suggestion; a committee was formed, prospectuses were issued, and the shares were soon taken up. The directors, however, as soon as the first step was taken, found themselves surrounded by difficulties. Persons immediately began to prophesy that the line would never pay, and they were advised to relinquish the idea, and take advantage of the Shock Companies Winding-up Act. He was, however, so unwilling to adopt this step, that he had himself come forward to give personal security to raise the money required. Now, however, whether owing to his perseverance, or, as some would call it, obstinacy, or to other circumstances, after four years of arduous labour, these difficulties were all surmounted, and here they were to commemorate the opening of the line. (Cheers.) He hoped that the expectations which he and those who acted with him had formed, would now be realised. He was very happy to learn that there was a strong feeling in favour of joining several other lines to the Furness Railway. One was proposed from Coniston, another end Ulverston to the Kendal and Windermere Railway, and another from Ulverston, crossing Morecambe Bay, to the Lancaster and Carlisle Railway. In his opinion, the shortest line would be the best one; but it would be satisfactory to the company to know that money enough would now be had to complete the last-mentioned line, which was one of first-rate importance, as it would open up to that district the trade of West Yorkshire and East Lancashire, and even, as he fully believed, before three years elapsed, become to Whitehaven the privilege of being the Government mail-packet station to the north of Ireland. If such were the case, he need hardly say, that the flourishing town of Belfast would also reap advantages. The improvement of its railway communication would greatly promote the interests of Whitehaven and the neighbourhood, which was so rich in slate, ironstones, and other minerals. These riches were susceptible of much greater development The quality of the ore of Cumberland and of Furness was so superior, that the best iron could be made without it. He had been accurately informed that large orders for iron had, within a short time, been received in England from Russia, with the express condition, however, that it should contain a certain proportion of the ores of Cumberland or Furness.

The noble Earl's address was received very cordially: and the toast "Success to the Whitehaven and Furness Junction Railway" excited much enthusiasm

The chairman proposing "The Furness Railway," coupling with it the name of the Earl of Burlington, expressed his satisfaction at the sympathy and good feeling which existed between the two companies.

The Earl of Burlington, in returning thanks for the toast; said he, so, said, he heartily concurred in the remark of the noble chairman as to the cordiality which existed between the two boards. There was one security for the prosperity of the two lines in the fact that they did not arise out of a visionary speculation, but had originated from the wants and capabilities of the district. They were suggested before the commencement of the railway mania

The health of Lord Lonsdale was then drunk with great applause, and was acknowledged in appropriate terms.

The chairman next proposed "The health of the Engineer (Mr Dees) and Contractors." He expressed his confidence that their labours had been satisfactorily performed. He believed the line was in a better condition at any time than it had been, and he had little doubt that ere long the distance between Broughton and Whitehaven would be safely performed in less than an hour.

Mr. Dees and Mr. Fairbairn returned thanks.

Some other appropriate toasts were then given; the company broke up; and the train re-conveyed the party to Whitehaven.

There is an important and extensive district which this line which deserves to be noticed. Although it was not devoid of engineering difficulties, and there were many minor points to overcome, under the able guidance of the engineer, Mr. Dees, it has been completed at a less cost perhaps than any other line in the kingdom, although in regard to solidity and other requisites it is equal to any of the single line of railroads in the country.

The opening of the Line as far as Ravenglass took place on the 19th of July last year, and to Bootle on the 9th of last July

The line between Broughton and Bootle is nearly a practical level, and, when connected with the Lancaster and Carlisle Railway, will form one of the trunk lines of the kingdom, as it will be the medium of communication between the districts of Yorkshire and Lancashire, &c. and the north, as well as from London and the south. This section of the line is advantageously formed as regards gradients. The facilities are never exceed 1 in 377, and a large portion is perfectly level, as we have stated. The curves, with some trifling exceptions at the southern end of the line, are of large radii, and in the aggregate the parts of the straight line amount to nearly one-half the entire length.

Soon after leaving Bootle there is a deep cutting of three-quarters of a mile in length. The greatest depth is 34 feet. The line then is laid upon an embankment, nearly half a mile in length, and of an average height of 25 feet. Soon after there is a long high embankment, and the Bootle river is crossed by a wooden viaduct, with twelve openings, and about 50 yards in length. On leaving this embankment, the line passes through another cutting of half a mile in length. The greatest depth of this embankment is 30 feet. The line for the next five or six miles is almost level, there being but very few cuttings and embankments, and those of a slight character. On attaining the Millom district, for four miles the rails are laid on a viaduct, considerably above the ground. The line up to this point has crossed three navigable rivulets, besides numerous streams, the largest of which is over 100 feet wide; it is also intersected by various roads, and there are eleven openings to it. The line then reaches Dudden Sands, the boundary between Cumberland and Lancashire. Over these sands there is a beautiful viaduct, which is nearly 400 yards long, and has no less than forty-nine openings. This viaduct, compared with those over the Mite and Esk, near Ravenglass, is low, not being more than eighteen feet from the bed of the river to the rails.

It will be recollected that, a few months ago, a large portion of the viaduct over the Esk was destroyed by fire, the cause of which was never clearly ascertained. The damage was repaired in an incredibly short space of time—about a week. Soon after leaving the viaduct over the Duddon Sands, the line goes through the Fox Field Hill. The cutting is a short one, but it is upwards of 40 feet in depth. It is about three-quarters of a mile beyond Broughton that the junction is made with the Furness Railway; the distance between the point of junction and Broughton being used jointly by both companies.

Taking the whole line from Whitehaven to Bootle, there are six over and four under bridges, mostly of stone, and twelve level crossings.

The stations on the portion of the line between Bootle and Broughton are three in number—Sylecroft, Holborn-hill, and Under-hill. At these stations *depôts* for coal have been erected, and already a good deal is done in the coal trade at Broughton.

The line from Whitehaven to Broughton has been opened to the public for some days past. Four trains new run daily to and from the two places.

CALENDAR FOR THE WEEK.

SUNDAY, Nov 10. Twenty-fourth Sunday after Trinity.
MONDAY, 11. St Martin.
TUESDAY, 12.—Cambridge Term divides. W. Grieve died, 1844.
WEDNESDAY, 13.—St. Britius
THURSDAY, 14.—Curran died, 1817. Nottingham riots, 1811.
FRIDAY, 15. St. Machutus.
SATURDAY, 16.—Sun rises 7h. 21m., sets 4h. 10m.

ROYAL FREE HOSPITAL, GRAY'S-INN-ROAD.—The Weekly Board at this time most earnestly entreat the ASSISTANCE of the benevolent [illegible] weekly payments [illegible] them quickly [illegible] which they felt so much pleasure in re-opening to the afflicted Poor on the 1st of October last. The more deeply regret this, as the cases of distress [illegible] are numerous far beyond the means at the disposal of the Governors. [illegible] received by the Treasurer John Masterman, Esq., M.P., Nicholas-lane; also by Messrs. Coutts and Co., Drummond and Co.; Hoares and Co., Hanson and Co., Prescott, Grote, and Co.; Smith, Payne, and Co.; Glyn and Co.; Jones Lloyd and Co.; Barclay and Co.; [illegible] Williams, Deacon, and Co.; Sir Claudius Stephen Hunter, Bart., and Co.; Abbott and Co.; Messrs. Courts and Co., Drummond and Co.; Hoares and Co., Hanson and Co., Prescott, Grote, and Co.; Smith, Payne, and Co.; Glyn and Co.; Jones Lloyd and Co.; Barclay and Co., [illegible] Williams, Deacon, and Co.; Sir Claudius Stephen Hunter, Bart., and Co.; Abbott and Co.; and at the Hospital.—By Order of the Weekly Board,
EDWARD RICE, D.D., Chaplain

The Weekly Board meet every Wednesday at Four o'Clock.
Cast-off apparel, male and female, also old linen rags, will be gratefully acknowledged.

TO CORRESPONDENTS.

KILDARE.—The Mackenzies of Scatwell are of ancient and distinguished ancestry, being descended from a branch of the famous Barons of Kintail. They bear for arms—"Quarterly [illegible] a buck's head cabossed, or for Mackenzie; second, or, a rock in flames, proper; third, or, a galley, sable, sails furled, flags and pennons flying, gules; fourth, two stags, *Combat*. The sun in splendour, *Motto*: Sine macula, and so far as arms. [illegible] is Mrs. Mackenzie, wife of Major Mrs. Alexander Mackenzie, the maiden name, which she ought to resume if she were unmarried previous to the marriage from which she is divorced. S. Th. Sh in the name is pronounced hard, as the g in gift

H.—Isabella de Conyers, daughter of Philip Count of Bruges, afterwards Duke of Savoy. See the "Life and Times of Francesca Carrara"

ERIN.—Strictly speaking, the lady is Mrs Harcourt; but courtesy gives her still the title of Countess of Waldegrave

WARWICKENSIS.—Queen's Counsel has precedence of all ordinary barristers. He sits within the [illegible] bar. He wears a silk gown, and his position is one of importance [illegible] to give him a right to expect frequent consultation from those who [illegible] usually given to persons of similar ability who are not Queen's Counsel, and the same dignity. A Queen's Counsel, also, is never required to do the mere drudgery of the profession, such as other juniors are. Sir Frederick Pollock, Bart., is usually looked to in the Commissions of Assize, where he occasionally sits as judge

D. H. HUNTER.—The Queen's Counsel is the superior of the two, we believe, an esquire

A SUBSCRIBER.—The tune of publication has not yet been announced

ANNA, DOLORES, &c., are mistaken. A number of Dahlias has already appeared in the ILLUSTRATED LONDON NEWS. One of the pictures suggested has just been engraved and [illegible]

J. J. L.—Connexion, as applied to darkness, is from the Chaucerii, a people on the western coast of Italy, who, according to Homer, lived in perpetual darkness, probably even

L. L.—Louis Philippe had for his full name and titles at his accession—"Louis Philippe Joseph, Duke of Orleans, born 3rd Sept. 1810, died 13th July, 1842, having two sons, the Count of Paris and the Duke of Chartres. Louis Charles Philippe Raphael, Duke of Nemours. 3. Francis-Ferdinand Philippe, Prince of Joinville. 4. Henry Eugene Philippe Marie, Duke of Aumale. 5. Anthony Marie Philippe Louis, Duke of Montpensier. 1. Louise Maria Theresa, the late lamented Queen of the Belgians. 2. Mary Christina Caroline Adelaide Francis Leopoldine, the famous sculptor, married Prince Alexander of Wurtemberg, and died in 1839. 3. Marie Clementine, married to Augustus Prince of Saxe-Coburg and Gotha

Doctor Pleqnet has called our attention, for which we thank him, to an undesigned imposition in the article on Cardinal Wiseman, from the Cardinal's pastoral letter [illegible] was, instead of "Ego Hadrianus Papa," "Ego Hadrianus Episcopus," viz. Ferdinand Philippe Louis, Duke of Orleans, born 3rd Sept. 1810, died 13th July, 1842, leaving two sons, the Count of Paris and the Duke of Chartres. 2. Louis Charles Philippe Raphael, Duke of Nemours. 3. Francis-Ferdinand Philippe, Prince of Joinville. 4. Henry Eugene Philippe Marie, Duke of Aumale. 5. Anthony Marie Philippe Louis, Duke of Montpensier. 1. Louise Maria Theresa, the late lamented Queen of the Belgians. 2. Mary Christina Caroline Adelaide Francis Leopoldine, the famous sculptor, married Prince Alexander of Wurtemberg, and died in 1839. 3. Marie Clementine, married to Augustus Prince of Saxe-Coburg and Gotha

"The hundred guinea dish" at York was served hot, with a salmon sauce over it

ANYBODY, Woolwich.—Blank verse is poetry, of a high order

A. M. S.—The public are admitted to the British Museum on Mondays, Wednesdays, and Fridays, between the hours of ten and four, from the 7th of September to the 1st of May; and between the hours of ten and six, from the 7th of May to the 1st of September; and daily during the weeks of Easter, Whitsuntide, and Christmas, except Saturdays. "Frank Fairleigh" is by Mr Smedley

JOHANNES.—We are not aware that either of the Bardens ever wrote a book on cricket

A SUBSCRIBER FOR FOUR YEARS.—Address, Mr. Bagby Wyatt, Secretary, Executive Committee, Great Exhibition, 1, New Palace-yard, Westminster

LAUV. We do not credit the Paramagnetic story

HONORAT. SUBSCRIBER.—Mr. Cunningham's "Handbook" is the completest guide to London

H. L. Ipswich.—See Carpenter's "Angler's Assistant"

ANNA.—Pistachio or pistachia nuts are grown in Arabia, Persia, and Syria; and also in Sicily. Those from the East are best: the kernel resembles a sweet almond

[illegible] Purchase "Specimens of Short-Hand"

[illegible] Hunnyman and Co., Strand

EFFIE.—Third brass coins of Constantine the Great, struck at Constantinople

G. H.—Prerogative-offices. Doctors'-Commons, St. Paul's

[illegible] Queen Albert is nephew of Leopold, King of the Belgians, whose father was Frances [illegible] Anthony, Duke of Saxe-Coburg and Saalfeld. Prince Albert's grandfather)

HEARTLESS.—Strictly speaking, the wife of a country [illegible] has no right to a courtesy title. This rule, however, is seldom adhered to. For instance, if Lady Duke of Manchester's son and heir apparent was styled Viscount Mandeville, and so on, Lord Kimbolton. So, also, in the case referred to, the Duke of Newcastle's son and heir-apparent is styled by courtesy the Earl of Lincoln, and his son, Lord Clinton

CONSTANT READER, J. P.—The Archbishop of York was Bishop of Camburgh

K. KUTTER.—The scrimp of a grand of arms is seventy-five guineas A search at the Heralds' Office costs very little

A MARLBURIAN SAYS: The arms of Lord Stanley of Alderley are "Arg on a bend az. three fleurs' heads cabossed or" a crescent for difference.

A SUBSCRIBER.—Chatsworth is pronounced as if written Chumley

Acetotyps.—The Ron and Rev Baptist Noel is certainly not a "nobleman," although the son of one

LEONIDAS.—The reading of the barometer is usually higher in fine weather, indicating that the atmosphere is heavier at such times

A. R. Wigan.—Your coin is worth about 2*l*. Send it in a *registered letter* to Mr Webster, 17, Great Russell-street, Covent-garden

HOMO, Boston.—The was impress on scat are from two Nuremberg Tokens

ARIEL, A CONSTANT READER.—"Rolling's Annals of the Courage of Great Britain and its Dependencies," 2 vols. 4to. *third edition*, 4*l* 4*s*

T. W., Bradford.—Apply to the county maps to Mr Wyld, Geographer, Charing-cross

F. GELL, Oxford.—Apply to a bookseller for your Journal

J. H. Alnwick, is thanked; the subject is in the beginner's hands

A. Y. Z. Kew.—The Duke of Wellington was present at the Royal Italian Opera, Covent-garden, last season, under the title of "Zora." A Deputy-Lieutenant, in his own county, takes precedence of a Barrister-at-law, and ranks next below a Lieutenant-Colonel

Z. Z. ON WILLS, and A SUBSCRIBER FROM THE BEGINNING, must excuse our declining to answer legal questions which reside to those correspondents private affairs. It would be extremely improper for us to give opinion upon matters where the omission of a single fact might make a serious difference. In such instances advice can only be safely sought from a solicitor or barrister; and, indeed, our repeying to these kind of inquiries would be an unfair interference with the office and duties of the legal profession. The case is, however, otherwise with general and abstract questions of law, when clearly stated, as having no obvious connexion with private concerns. These naturally form part of the [illegible] and we shall [illegible] our best endeavours to effect

AN OLD SUBSCRIBER.—Sir. The late Mr St. John Long was tried for the manslaughter of [illegible] Man, on the 31st August, 1836, he was found guilty, and sentenced to pay a fine of £250, October 30 following. He was tried for manslaughter in the case of Mrs Catherine Lloyd, and acquitted, February 19, 1838

A SUBSCRIBER.—Sir William Leigh, of Newnham, was younger brother of Sir Rowland Leigh, of Longborough and Adlestrop, from whom the present Lord Leigh, of Stoneleigh, is in direct descent

PHILO-RICHMAN, Totnes, is thanked for his letter, in correction of the account at page 318 (Oct. 26), explaining that the alterations in the Abbey Church at Bath, in 1834, extended only to fitting up the choir for service, neither altering the design or character of the building externally or internally, safer as the mid-choir and transepts are concerned. Richman describes the alterations as having been in one of the Perpendicular style

A CONSTANT SUBSCRIBER.—One Scotch family of Edington uses for arms "As three Mears' heads erased arg." Another—that named in Gurnemouth's "Armorie"—"As a chev. ern. between three savages heads couped in profile, bound round the temples with a wreath." A third coat assigned to the name is "An. tre Hun pheasants"

TIAO.—The arms of De Bouverie of Brabant were, "Gu. a bend vair." The English Bouverys have had the following bearings confirmed to them: [illegible] per fess or and arg. a cockatrice displayed, two heads of the last, combed and wattled of the 2nd." On the breast an escutcheon gu. charged with a bend vairé, being the ancient arms of Bouverie. Crest: A demi eagle, with two heads, displayed as in the arms, issuing out of a ducal coronet. Over all, an escutcheon on the breast of the eagle as in the arms" [illegible] Bouverie, who is said to be born by Hope's sign manual in 1796

E. J. F.—No, but not at any longer period [illegible] Depôt with a banking company

H. H. We cannot inform you [illegible] PHILO GAVESTON—Not work

WAVERLEY.—Yes [illegible] CPL. We have it soon

AN OLD SUBSCRIBER, France.—In Latin [illegible] M. W. We have not room for the likes

W. S.—High Church doctrine [illegible] A. M.—Next week

*** We are obliged to state, last week, that the Portrait of Mr Wiseman was from a Photograph by Beard

*** The tale of "Fred Holderwood" will be resumed next week.

CHRISTMAS, 1850. A DOUBLE NUMBER of the ILLUSTRATED LONDON NEWS will be published at Christmas, with appropriate Tales, Poems, and Papers, by distinguished Authors. Articles received not later than December 10, 1850.

BOOKS, &c., RECEIVED DURING THE WEEK.

The Queens of Scotland. Vol. I.—Prophetic Almanack.—Financial Reform Almanack.—The Modern Character Actress.—Farmer's Magistrate.—Autumn Evening Verses.—Philip of France: a Tragedy.—Hints on Conversation.—MUSIC. Peggotty, the Wanderer.—Three Happy Days.—Clara.

THE GREAT EXHIBITION PALACE.

ON SATURDAY, NOVEMBER 16, will be published, with the ILLUSTRATED LONDON NEWS, a SUPPLEMENT, GRATIS; containing about 12 Engravings illustrative of the progress of the GREAT BUILDING in Hyde-park; also, a full Report of Mr. Paxton's Lecture, to be delivered at the Society of Arts, on the 13th inst. containing his own history of his wonderful structure; the rapid progress of which, and the intense interest attached to the subject, will, it is expected, render this extra sheet highly acceptable to the readers of the ILLUSTRATED LONDON NEWS.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 9, 1850.

EVENTS in Paris are rapidly ripening for a change. The known determination of Louis Napoleon to prolong his power, either as President for another term of four years or for life, or as Consul or Emperor of the French, and the support which his pretensions have received from large masses of the people, and from the rank and file of the army, have brought him into collision with a riva. almost as powerful as himself, and with an ambition quite as daring as his own. The cries of "*Vive l'Empereur!*" which the soldiery, contrary to all propriety and to the spirit of the Constitution, no less than to all military discipline, have raised upon his path, have excited the disapprobation of General Changarnier; and it has required no little skill and patience, and no little self-command on the part of all the political leaders in Paris, to save the country from immediate civil war. Louis Napoleon is supported by too large a party, both in the state and in the army, to succumb to the dictation of General Changarnier, even on a point where he may have been constitutionally wrong; and General Changarnier, whatever his own ultimate designs may be, is so thoroughly supported by all the monarchical factions which form the majority in the National Assembly, and by all the parties out of the Assembly who agree in nothing but in their hatred of the Revolution, and of Louis Napoleon as its creature and representative, that he cannot do otherwise than brave the power, and endeavour to thwart the designs of the President. There may be a truce between these rivals; but, after what has passed, there never can be peace, and when the moment for open rupture arrives, as arrive it must unless some unexpected turn of the mighty wheel shall disable one of the combatants, nothing less than civil war can be the consequence. Louis Napoleon and General Changarnier seem to have been fully aware of this fact, during the late negotiations, and to have only refrained from decisive action, because neither was fully prepared to strike effectually. A premature movement might have been fatal to either of them. It was because they knew this, and not because they were reconciled, that they agreed to a cessation of hostilities. Should the battle ever be fought out, all France, and not Paris alone, will be the arena.

What Louis Napoleon wants, is evident. There is no secret about his ultimate object. What General Changarnier desires is by no means so clear. Indeed, it is impossible to say whether he thinks that Changarnier is not as good a name for an Emperor as Bonaparte, or whether Cromwell or Monk is the hero he would emulate. Nothing is known positively about him. He envelops himself in a mantle of taciturnity, and his words are so obscurely oracular, that none can divine whether he wishes to uphold or to overthrow the Republic. He keeps his own council, and is looked upon with favour by all parties, except by the sincere republicans of the school of Lamartine, Marrast, and the present Government, and by the Bonapartists. The partisans of Henri V. look to him for the restoration of peace and legitimacy. The Orleanists consider that he is the most likely man in France to bring back the house of Orleans, and the comfortable days of bribery, corruption, and a thriving trade; while the fat *bourgeoisie* venerate him as the unflinching foe of the disturbers of order, and the great bulwark against Communism and the Red Republic. Perhaps the Bonapartists and the Republicans guess more truly than others his real objects,

BIRTHS AND DEATHS.—Births registered in London in

when they seek . m as a dictatorial lieutenant. But whatever his ultimate object, he is at [illegible] the most powerful man in France. [illegible] and the President, who has

barrel-room or of the Assembly, seem to care one straw about the Republic—to whom every one of them has professed allegiance or about the liberties of the French people. There is not one Alsace among these Frenchmen, but, as it were, a "sweet," and the only doubt seems to be, whether Bonaparte or Bourbon, Chesterfield or Orleans, is his legitimate prospect. Every other principle of government but that of military force is universally scouted. The most democratic and the most refined in the world, seems to be as sick of liberty as if an emetic, and to think no medicine equal in efficacy to a strait jacket. Another peculiarity is, that the only party in France which at the present moment acts peaceably and legally is the party who, in other fashions and parties, instruct, condemn, and hate. The Republicans—the men who made the Revolution, and who find their views more and more [illegible] every day—[illegible] the only men who [illegible] guilty, by word or deed, of treason to the established [illegible] of their country. They have suffered much, and they seem to have learned a value and [illegible] which [illegible]. They watch and wait. If they have, simply, [illegible] either of [illegible] the Republic, it is for Louis Napoleon, whom they consider to be, on all events, the creature of the popular will, and the representative of the principle of personal merit. What they might make a struggle [illegible], if it had not secure the Republic itself, might secure the rights which the Revolution [illegible] had when the Pre. mature majority have, one by one, invaded and corrupted. The situation is critical, yet, all circumstances considered, Louis Napoleon has the best of the game. He has shown fourth determination and headiness. These qualities will yet serve him in good stead, if he continue to exhibit them.

COURT AND HAUT TON.

THE COURT AT WINDSOR CASTLE

The Queen and Prince Albert, accompanied by the Royal Highnesses the Princess Royal, the Princess Louise, and Prince Arthur, and attended by the Countess of Morley, Lieutenant-Colonel the Hon. Charles Grey, Major Bouverie, Colonel the Hon. Charles Grey, Lord Alfred Paget, Lieutenant-Colonel Bouverie, and Francis Seymour, and Mr. Birch, arrived at Windsor Castle [illegible] from an excursion to [illegible] on the [illegible] instant. FIREWORKS AT THE MERCHANT SEAMEN'S ORPHAN ASYLUM, BOW-ROAD, ON TUESDAY.

CATESBY HALL.—GATEWAY ASHBY ST. LEGER.—(SEE PRECEDING PAGE.)

MERCHANT SEAMEN'S ORPHAN ASYLUM, BOW-ROAD.

On Tuesday, the Committee of this excellent Charity, assisted by their able and persevering friend, Captain J. Warren, provided for the subscribers and friends of the Institution a most brilliant private display of fireworks, which brought together a galaxy of fashion and beauty. A considerable number of clergymen, medical gentlemen, and members of the legal profession were also present; with several gentlemen connected with the mercantile and shipping interests honoured the ground with their presence, forming, in the whole, an assemblage rarely witnessed on such an occasion.

The display was got up by subscription: the surplus funds, after paying the expenses, being for the benefit of the asylum; and we are happy to learn that the result more than met the expectations of the committee; and, what is still more gratifying, several new subscribers have been obtained in consequence of the satisfaction and delight they experienced in witnessing the superior order and regularity observable in every department of the establishment.

The fireworks, by Darby, were both novel and exceedingly appropriate to the occasion. Among those we noticed in particular, was a ship represented in lines of fire, in full rig, symbolical of Commerce; and another device was a clever transparency of a shipwreck, with the motto in fireworks (as it were, coming from the sufferers) of "God protect our Orphans."

The grounds were illuminated with variegated lamps; and, after the fireworks, coloured fires were burnt occasionally. The children witnessed the display; and, in their healthy countenances, evidenced the delight they experienced.

The members of the Ladies' Committee graced the ground with their presence; and the following members of the Gentlemen's Committee, with their usual kindness and attention, presided over the festivities:—G. S. Clarke, Esq., Hon. Secretary; James Shepherd, Esq.; Rev. H. Rendall, Hon. Chaplain; T. J. Warren, Esq.; J. Gole, Esq.; George Holiday, Esq.; D. Warren, Esq.; Dr. Little, Physician to the Institution; Thomas New, Esq., Hon. Surgeon; F. Charrington, Esq., A. B. M'Guffie, Esq.; Henry Mills, Esq., and William Holloway, Esq. The trustees, treasurer, and other members of the Committee, were unavoidably absent, in consequence of previous engagements.

THE ORTOLAN.—(SEE PRECEDING PAGE.)

LAUNCH OF H. M. STEAM-FRIGATE "LEOPARD," AT DEPTFORD, ON TUESDAY.—(SEE PRECEDING PAGE.)

NATIONAL CONCERTS AT HER MAJESTY'S THEATRE.—THE BERLIN CHOIR.

THE CELEBRATED BERLIN CHOIR.

The members of the *Dom Chor*, or Berlin Chapel Royal Choir, with Herr Kapelmeister Neithardt conducting the performance, are depicted by our Artists. The first appearance in this country of this famed body of choristers took place on the 1st inst.; their singing created an almost unparalleled sensation; never was a house more completely taken by storm than at their execution of Mendelssohn's 43rd Hymn. The pure and excellent quality of the voices, the classical excellence of the style, the marvellous precision in taking up the points, the perfect intonation, the exactitude of the time, the beautiful blending of the whole in the swelling and diminishing of the gorgeous harmonies, quite electrified the auditory. The breathless silence during the hymn was broken at the end by a burst of hearty cheering from every part of the theatre, proving that the ear of the veriest tyro in music had been penetrated with the masterly vocalisation, as well as that of the most cultivated listener. The encore was unanimous, as was also the case for the hymn, by Corsi, of Venice (1617), and for the motetto of Grell, a Berlin organist of the present period, "Gnädig und barmherzig" (merciful and bountiful). After the demand for Grell's motet, the conductor, instead of repeating it, gave the signal for "Rule Britannia," to the evident delight of the audience. This was encored, so exquisitely harmonized was the German version, and so admirably sung; and then the Choir struck up the National Anthem, the whole house rising *en masse* at this delicate Tentonic demonstration and appeal to our loyalty. Such was the first night's triumph, and every evening since has been a repetition of the enthusiasm for the choral strangers. On Saturday, the hymns were by Lotti, a Venetian composer (1685), and Bortniansky, a Russian *maitre de chapelle*. Lotti was celebrated for his operas, madrigals, masses, motets, organ music, &c., and was the author of the madrigal "In una sieps embrosa," which Buononcin palmed off as his own composition on the Academy of Ancient Music, in London, in 1727—an imposition that ultimately compelled him to leave this country. Both hymns are fine works, and were deliciously sung. On the *encore* of Lotti's hymn, the choir gave the harmonized arrangement of the Scotch melody, "The Blue-bells of Scotland," and this so enchanted the house, that there was another rapturous *encore*, when the choristers sang "The last Rose of Summer." Perhaps the greatest treat was on the third night of their appearance, when they sang the "Ave Verum" of Mozart, a glorious peal of solemn harmony that went to the very heart's core.

The Choir consists of seventy voices in Berlin. It is sustained at the sole expense of the King of Prussia. The boys who are admitted in the choir are instructed in composition, or they may select an instrument for practice, in order, if their voices should be lost, that a resource may be open for their subsistence. Augustus Neithardt, the present Kapelmeister, was born at Schleiz, in Saxony, the 13th of August, 1793, and he was appointed in 1843. Neithardt has been distinguished as a composer of some 118 vocal and instrumental works, amongst which his psalms and part-songs are very remarkable. The Choir, so well trained under his careful and artistical superintendence, sing *à capella*—that is, without any instrumental accompaniment. The conductor simply gives the pitch with the common tuning-fork to the singers, who have their parts in hand, and then begins the most delightful combination of human voices that has ever been heard. The entire Choir, of course, is not here; there are ten cantos or soprano, as the Germans call them; ten altos, six tenors, and eight bassi, now at the National Concerts. Every chorus-singer, every member of a choral, a glee, or a madrigal society, ought to hear this magnificent Choir, whose observance of the *pianos* and *fortes*, whose accuracy in taking up each note, whether in the diatonic or chromatic scales, are beyond all praise, and must be listened to by every musician, professional or amateur, to be properly appreciated.

HERR NEITHARDT.

MR. WESTLAND MARSTON'S NEW PLAY OF "PHILIP OF FRANCE AND MARIE DE MERANIE" (ACT III. SCENE LAST), AT THE OLYMPIC THEATRE.

MISS GODDARD.

MISS GODDARD.

The beautiful in music must result from the combined influences of nature and art; and all great musicians have been distinguished even in their very infancy, by palpable signs of musical organization and acute sensibility. Miss Arabella Goddard, the youthful *pianiste*, whose portrait is presented in our columns this day, has formed no exception to the above rule—from her earliest childhood, she evinced an extraordinary attachment for instrumental sounds. Born on the 12th of January, 1836, at St. Servan, near St. Malo, in France, of English parents, the quickness of her ear did not escape attention, and the predilection of the child was encouraged by maternal instruction. At the age of four years and a half the marvellous talent and execution of Miss Arabella were exhibited in public for the first time, at a charitable concert, given at St Servan, and she played a fantasia on themes from Mozart's "Don Juan." Mr. and Mrs. Goddard removing to Paris, their daughter, for four years, received lessons from the late Kalkbrenner, the celebrated pianist and composer; and on the return of her parents to London, the cultivation of her abilities was allotted to the accomplished Mrs. Anderson, the pianist to her Majesty, and instructress to the Princess Royal. At eight years of age, Miss Goddard had the honour of performing before her Majesty and Prince Albert. There was a question of placing her at the Royal Academy of Music, to compete for the King's Scholarship; but this intention was abandoned, and, at the suggestion of Herr Kuhe, from whom Miss Goddard had lessons, Thalberg was selected as the finishing master of the gifted child, who displayed astonishing readiness at sight playing, and a most surprising musical memory. At a *matinée d'invitation* given by Mr. and Mrs. Goddard, at their residence, on the 30th of March last, Miss Goddard performed before a select company of amateurs. The ILLUSTRATED LONDON NEWS, in mentioning her remarkable execution, predicted that, with increased strength, she would rival any living *pianiste*; and there is every prospect of the realization of the prophecy. Except at a *matinée musicale* given by Miss Bassano during the past season, Miss Goddard did not play in public. Her *début* at the Grand National Concerts took place October 23, when she played the "Elisir" fantasia, and "Tarantella" of her master, Thalberg, with the most decided success. Since this essay the popularity of Miss Goddard has been permanently established; she has executed the first movement of Hummel's Concerto in E; the "Masaniello" and "Don Pasquale" fantasias of Thalberg; Streich's "Hirondelles;" Prudent's "Lucia" and "Puritani" fantasias; caprices of Blumenthal, &c. Although Miss Goddard's performances at Her Majesty's Theatre have been chiefly confined to the works of the modern romantic school, of which wonderful mechanism and poetic feeling are the great characteristics, she is equally distinguished as a *pianiste* in the classic stores of high art, and the elaborations of a Bach fugue are exhibited by her with the utmost delicacy and precision. Miss Goddard is as yet a mere child, and the witchery her playing exercises over the minds of her auditory is not the result of a marked individuality of style, or of enormous manual power; but it arises from her elegant, graceful facility of execution, her crisp and delicate tone, and the certainty of her passage-playing. Miss Goddard is now studying composition under Mr. Macfarren, and with her future advance in musical knowledge, there is every legitimate expectation that she may occupy higher ground than a merely digital executant, in which she is now so pre-eminent. Her equality of touch is charming; and this unity of strength in the fingers enables her to make all the component parts of modern intricacies stand out with clearness and celerity. She will, of course, acquire more strength in the wrists; and to her present exquisitely cabinet-picture finish, if we may so term it, will, no doubt, be added her only physical defect—that of power.

THE THEATRES.

OLYMPIC.

Mr. Westland Marston's historical tragedy produced on Monday was completely successful. The historical drama is a species apart and distinguished

from the romantic and classical. It is not bound by the same rules, spreads over a wider surface of action, and claims a greater variety of illustration. Justified by the above rule, the dramatist is entitled to assume much of character and manner, which in the more legal drama would be rejected to be more elaborately wrought out. *Philip Augustus* of France, the hero of the present tragedy ("Philip of France and Marie de Méranie"), has an historical character already formed, remarkable for its inconsistency. Mr. Marston gives his own idea of it in his preface.

"The student of history rarely meets with a more interesting problem than that furnished by the character of Philip Augustus. It abounded in those contrasts which alternately excite our censure and our admiration. Proud, impetuous, and jealous, Philip was yet affable, far-sighted, susceptible of the strongest sympathies, and capable of inspiring the most ardent devotion to his person Though politic and superstitious, his attachment to Marie de Méranie* induced him, for a long period, to brave both the anger of a powerful ally and the malediction of the Church. If it must be granted that he was unscrupulous and even cruel in the pursuit of ambitious ends, he nevertheless identified his own greatness with that of his country, and was the manifest patron of humanizing arts. The colleges, hospitals, and works of public utility founded by a Prince so valiant and enterprising, prove that he shared even his thirst for glory with zeal for the progress of learning and the domestic welfare of his people. But, perhaps, hardly any circumstance more clearly reveals the 'divided being' of this Monarch than the first bequest in his will. He desired that a sum equal to the present value of 1,500,000 livres should be applied to some restitution in all cases where his executors might think he had committed injustice. The poor of Paris were also the especial objects of his remembrance and his bounty.

"A nature of such opposing elements—at once the slave of the most censurous and patriotic impulses; at another, enslaved and hardened by the lust of power—appeared to contain all the materials for that most tragic of struggles in which the higher principles of humanity are gradually obscured by the predominance of selfish passions"

Such a character as this is difficult, both for the dramatist to portray and the actor to interpret. In both respects it is a kind of analogon of the Shaksperian "King John." Both, too, have a contest with the papacy—In *Philip's* case similar in its cause to that of Henry VIII. His matrimonial relations are the motive springs of *Philip's* conduct. Affianced to *Marie*, but wedded to *Ingerburge*, *Philip* seeks a divorce from the latter, and in so doing involves himself in a contest with the papacy and people. He would defy both. The following is a part of the scene in the third act, where the contest becomes hot and furious:

Bishop of Paris. We may not question Rome's prerogative.
Philip. Ye may not palter with your sworn allegiance.
Your oaths I have your oaths
Bishop of Paris. All bonds are void
That Rome annuls; allegiance itself is void
In this behalf.
Archbishop of Rheims. Sire! Your late union—(*hesitateng*).
Bishop of Paris. Your *cancelled* union with the Lady Marie—
Philip Paris! The foe has been held bold who broke
His lance on Philip's buckler; yet he's bold
Who'd snatch from Philip's arms the love he clasps
Unto his naked breast!
Bishop of Paris. Even that love
Must then renounce! 'Tis Rome that speaks through me.
Archbishop of Paris. My liege, the Pope
Philip. The Pope, my Lords! Four letters—things, not names
The Pope! Did earth receive him from the stars?
Or strange he from the ocean? Did the sun
Wake earlier on his birthday? Will eclipse
Turn the skies sable at his death? He came
Into this world by nature's common road.
Needs food to succour life, and life by cold,
Relaxed by heat, would drown in a rough sea,
Soon as a serf would! Let him ban the fields,—
The grass will grow in spite of him!
Bishop of Paris Impiety!
Bar'st thou thy front so boldly?
Philip. I *will* speak
Man's love—the growth of heaven—of nought below
Admits control. Heaven's ministers should know it!
First Noble. True; by the Ordinance!
Second Noble. Upon my knighthood.
We shame ourselves to see this lady shamed!
Third Noble. Than whom did none more gracious e'er tread earth
My Lords, you are unconscionful! (*To the Bishops.*)
Bishop of Paris. What, are ye
Revolters too? Then — (*Bells are heard to toll.*)
Hark! The time is past.
The time for duty King! those sounds declare
Thy land cursed for thy sake. With it and thee
The heavens break off their league. Whereof on earth
We lay the sacred symbol of our faith
In token of the grace profaned and lost! (*They lower the crucifix.*)
Submission and repentance—deep, entire—
Are all that now remain.

(*A long pause, during which the tolling of the bell at alone heard*)

The effect of this scene on the audience was both solemn and exciting. The continued tolling of the cathedral bell, in sign of the papal interdict becoming operative, was, as a theatrical expedient, both novel and striking. The interest of the situation was further increased by the appearance of *Marie*, recently made Queen, who now, fully understanding the peril of her position, voluntarily discrowns herself, to save her husband. This the Monarch will not permit, but consents to make an appeal himself to the Pope—a compromise which, however, avails little. The haughty prelates contrive so many delays, that the Monarch, impatient, and, moreover, tempted by *De Fontenne*, an adverse noble, undertakes to decide the case himself, by marching *Ingerburge* to her nominal dignity, while he still remains the husband (in "sight of heaven") of *Marie* But *Marie* will not consent to be reduced to the social position of a paramour; and, in a powerful scene, renounces the proposition with disdain, and casts *Philip* both in anger and in sorrow. This scene costs *Marie* her life, while it operates on *Philip* as a motive for the redemption of his honour. He rushes to the field, returns victor, but only in time to receive his wife's dying benediction. On this pathetic situation the curtain finally falls.

The play met with triumphant success, and has, moreover, the credit of having brought Miss Faucit back to the London public, and restored Mr Brooke to the Olympic stage. Both, in the parts of the hero and heroine, exerted themselves to the utmost of their talent. Miss Faucit, indeed, acted with her usual fascination. She dropped the words of the text like melodious dews, and, indeed, fully entered into the poetry of the part. The *mise en scène* was also excellent, and all the appointments, scenery, and costumes were on a costly scale. After the play, the applause was universal, Miss Faucit and Mr Brooke being called before the curtain and the author, with good-humoured violence, invited to bow from his private box. We consider that the continued success of this tragedy will have important influence on the fortunes of the poetic drama. To the management of Mr. Farren it does the highest honour.

HAYMARKET.

Mr Macready's farewell performances continue to attract crowded houses. On Saturday he performed *Lear*, and on Monday *Richelieu*, with all his usual power. Mr. Davenport, in the parts of *Edgar* and the *Cheualier de Mauprat*, developed extraordinary ability. We shall watch this actor's progress with growing interest.

SADLER'S WELLS

The romantic play of "Cymbeline" has been reproduced at this house, for the purpose of further testing Miss Lyons in a new part, that of *Imogen*. Though not yet equal to so trying and perfect a character, she nevertheless continues to justify the hopes already expressed. On Thursday, "The Bridal" was reproduced, with Miss Glyn as *Evadne* and Mr Phelps as *Melantius*. Both characters were interpreted with extraordinary power by both artists.

THE PATENT PORTABLE METRONOME.—This is the name of a cleverly-contrived little instrument for measuring time in music, invented by Mr Edward Greaves, of 36, South-street, Sheffield. In size and form it resembles a small watch, and is fitted in the waistcoat pocket. It consists of a case, containing a tape forty inches long, which can be drawn out to any required length, and be there retained by a stop. The extreme end of the tape being held by the finger and thumb, the case forms the weight or "bob;" on one side of the tape are marked the Italian musical terms generally in use, and on the other side are placed the figures which indicate the length of a variable pendulum, making from 60 to 160 vibrations in one minute. From the isochronous property of the pendulum time will be measured with extreme accuracy, whether the vibrations are small or moderately large. The only instrument hitherto employed by musicians for this purpose is Maelzel's Metronome, which, though an admirable invention, is too large and costly for general use. The Portable Metronome combines the scientific adaptation of the same principle with what is useful and practical, by showing the precise "time" of the Italian musical terms employed by composers The latter quality, especially, recommends the instrument to both professional and amateur musicians, as it supplies a desideratum which all have acknowledged. From its moderate price and small dimensions, and from its practical usefulness, to those who are desirous of becoming good musical "timists," together with the entire approbation of the instrument expressed by eminent musicians, the inventor has good reason to anticipate its success. Being placed so as to project from the edge of a table, mantel-piece, or piano, in sight of the performer, a single impulse will cause the pendulum to vibrate during the time occupied in playing several pages of music; the vibrations can be continued, if required, by an occasional touch of the finger.

AN ANTI-MALTHUSIAN.—A short time ago, Robert Howe, one of the Brighton police, accompanied his wife to London, on a visit to his father, who is a warder in the Tower. Leaving his wife at the Tower, he returned to his duties; and on Thursday week he received a letter from his father, announcing the premature confinement of his wife with four children, two boys and two girls. They were all born alive, but one of them died shortly after birth. The mother was "as well as could be expected."

* This lady is by some writers called Agnes; but *nonsine Marian* are the express words of Sigurd

MUSIC.

M. JULLIEN'S CONCERTS

The annual series of promenade entertainments was opened last night (Friday), in Drury-Lane Theatre. The concert was over at too late an hour for any detailed notice in our present number. It may be mentioned, that the programme is the same as last season, with the exception of fourteen players, who have been replaced by native and continental *artistes* of celebrity, amongst whom are —M. Delavigne, first oboe; Mr. A. Winterbotham, bassoon; M. Dorfu, ophicleide, M. Demunck, the famed violoncellist, from Brussels; M. Vogel, the alto and viola d'amour, &c. Amongst the soloists, a number of note in the old band are—Messrs. Cioffi, Jarrett, Pulsf, Collinet, Deloffre, Nadand, Tolbecque, Collins, Harper, Howell, Pratten, Sommers, Sonnenberg, Koenig, &c.; the whole forming an orchestra of 70 performers Mdlle. Jetty Treffz, for whom the great Meyerbeer has expressly composed a new song, is re-engaged. M. Jullien, for his new work, the "Quadrille des Nations," has secured the co-operation of the bands of the Garde Municipale, and the Life Guards, under Mr. Godfrey, Mr Box, and Mr. Grattan Cooke. He has also engaged the *corps de tambours* of the 2nd Legion of the Parisian National Guards, by permission of the French authorities, and he has brought the soloists, a number of instruments, and the interior of the theatre has been entirely re-decorated for these concerts, and the journals of every nation are again to be found in the reading-room at the back of the stage. Of course, the opening night was a bumper.

M. Jullien, in his prospectus, after an allusion to his triumphs in ten successive seasons, declares that he shall follow up his former course of policy, that of insuring amusement as well as of attempting instruction, by blending in the programmes the most sublime works with those of a lighter school.

On Thursday night, contrary to usual practice, M. Jullien began, instead of ending, with his annual Grand *Bal Masqué*. The theatre was brilliantly lighted and decorated, the crystal curtain being included in the superb decorative effects; and with the band of 110 players, the usual exhilirating result was produced on the mass of masquers and mummers.

NEW ENGLISH OPERA-HOUSE.

It would be matter of deep regret if any foreign musician or amateur of note had been present at the opening, last Tuesday night, at the Soho Theatre, formerly belonging to Miss Bailey, of what is called "The New English Opera-House." What a notion would have been formed by the foreigner of our musical resources! Could he have believed that London, with a population of two millions—with the finest choral singers in the world—with a body of most accomplished instrumentalists—with a number of really eminent English composers, and a very fair sprinkling of principal vocalists, could have produced such an exhibition of incompetency and puerility? The only relief to the annoyance caused by the melancholy display, being that it presented itself nearly throughout a three-act opera.—"The Last Crusade," by Mr. Mitchell. the blind composer—as a burlesque; and as such was laughed at by those amateurs who could not feel how much injury was done to a native talent" by the disastrous performance; whilst, on the other hand, the "friends" of the establishment, by a series of parodies on great lyric triumphs, in the shape of encores, re-calls, and ovations, were adding disgust and disorder to disgust and discontent. Criticism on Mr. Mitchell's pretensions is utterly disarmed by the glaring deficiency of the execution. For the future foundation, on a permanent basis, of a really National Opera-House, nothing could be more fatal to art and artists than Tuesday's "Last Crusade."

MUSICAL EVENTS.—Mr. Macfarren's serenata, "The Sleeper Awakened," the words by Mr. John Oxenford, will be produced at the Grand National Concerts, next Monday; Mdlle. Angri and Mr. Sims Reeves singing the principal parts.——Next Tuesday, the Liverpool Philharmonic Society will produce the new oratorio, "David," by Mr. Charles Horsley; conducted by the composer, with Mr. W. T. Best as organist, and Misses Birch and M. Williams, Messrs. Lockey, Armstrong, and Machin, as principal singers.——The fine organ performances of Dr. Gauntlett, at the Cyclorama, are attracting numerous visitors; he is officiating during the severe illness of the able organist, Mr. Pittman.——The Cecilian Society, instituted 1785, performed on Thursday night, at Albion Hall, London Wall, the third part of Handel's "Messiah" and Haydn's Harvest Anthem, on the occasion of the death of a member.——The Western Madrigal Society, established in 1840, met for the first time this season last Saturday night, at the rooms of the Royal Society of Musicians, in Lisle-street. In memory of the recently deceased hon. secretary, G Budd, Esq., who was much respected, Handel's Funeral Anthem was sung. Mr. Gibson is now the secretary, and James Evans, Esq., remains the president. Mr. Turle, the organist of Westminster Abbey, is the conductor.——The Sacred Harmonic Society's Messiah, "As it fell upon a day," was the novelty in Saturday's scheme; but this composition was never intended to be sung by a full choir like a madrigal, and was, therefore, out of place. The choir did very well, but the band of the Berlin Chapel Royal Choir, now at her Majesty's Theatre, as the perfection of part-singing.——The Musical-Dramatic Entertainment, to be given by Mdme. Thillon and Mr Hudson, at the Queen's Concert Rooms, on the 18th inst. and Miss Dolby, next Tuesday, will begin a series of *soirées musicales* at her residence——Miss C. Hayes, with the Italian company, has been singing at Limerick, and will appear at Dublin, previous to her engagement for Her Majesty's ——Mr. Sims Reeves and Miss Lucombe were united last Saturday.——Mr. Macfarren's cantata, "The Sleeper awakened," will be produced next Wednesday, at Her Majesty's Theatre, with Mdlle. Angri, and Messrs. Bodda and Sims Reeves.

MR. W. T. BEST'S PERFORMANCE ON THE BOSTON ORGAN.—On the 1st instant there was another trial of the new grand Boston organ, at the factory of Messrs. Hook and Co., in presence of a numerous audience and many accomplished player—Mr. W. T. Best, the organist of the Liverpool Philharmonic Society, who has distinguished himself also by some very clever compositions for the organ, was the first to play, on the occasion, the following pieces, all written for the organ:—J. S. Bach's grand Prelude and Fugue in E flat, and Toccata in F; Mendelssohn's Sonata No. 4; Rinck's Concerto in F; Handel's Fugue in G; Adolphe Hesse's Introduction and Fugue in B flat; Hullah's Allegretto Pastorale; C. G. Hoepner's Adagio in E minor; J. L. Krebs's Fugue in C; Albrechtsberger's Fugue in C; and Hesse's Tema, with variations, and introduction and Variations on "God save the Queen;" and Mr. Best's own Prelude and Fugue No. 2, in E flat.—On Wednesday, Mr. Cooper gave morning and evening performances on the same instrument; and last night, the veteran Mr Adams played.

MUSIC IN PARIS.—Mdlle. Alboni terminated her engagement at the Grand Opera, on the 31st of October, having played *Leonora* and *Fides* ("Prophète") twice during the last three nights. On the 1st instant, she left Paris for Madrid, to appear at the new Italian Opera. Meanwhile, Mdlle. Frezzolini, Gardoni, Formès, &c.——A new three-act opera, by Adam, expressly composed for Alboni, will be brought out in the spring, as she is re-engaged. In the meanwhile, the rehearsals for Auber's five-act opera, "L'Enfant Prodigue," have recommenced—Mdme. Laborde being substituted for Mdlle. Mainvielle-Fodor, whose engagement has been cancelled; Massol and Roger have the other chief parts in the "Prodigal Son."——Last Wednesday Viardot was to have made her re appearance at the Grand Opera, in her unrivalled delineation of *Fides*, in the "Prophète."——M. Gounod's "Sappho," for the gifted Viardot, is to be mounted this winter.——Meyerbeer left Paris for Berlin last Saturday, thus putting an end to all expectation that he would produce for the Grand Opera, whose engagement has been cancelled; Massol and Roger have the other chief parts in the "Prodigal Son."——Last Wednesday Viardot was to have made her re appearance at the Grand Opera, in her unrivalled delineation of *Fides*, in the "Prophète."——M. Gounod's "Sappho," for the gifted Viardot, is to be mounted this winter.——Meyerbeer left Paris for Berlin last Saturday, thus putting an end to all expectation that he would produce for the Grand Opera, his "Camp of Silesia," or his new opera, "L'Africaine."——The opening of the Italian Opera at the Salle Ventadour is announced for this evening (the 9th), with Bellini's "Sonnambula," sustained by Mdlle. Nau, F. Lablache, Mario, and Ciuzolari. Signor Colini, a celebrated barytone in Italy, has been engaged by Mr. Lumley. M. Charles Eckert, the Berlin composer, is named accompanyist and singing master. ——The action in the Tribunal of Commerce, by Herr Freyberg, the director of the Berlin Italian Opera, against Mr. Lumley, for damages, on account of Madame Florentini (Mrs. Jennings) having abandoned her contract with the Prussian director, for Paris, ended in his nonsuit; but he has ample ground for consolation in having secured the engagement of the accomplished *prima donna*, Madame Castellan, for twelve representations at Berlin, in place of Madame Florentini. ——Alboni has joined the Association of Dramatic Artistes in Paris, and has forwarded a donation of 600 francs.——Besides the new Philharmonic Society, under Berlioz, a new musical institution, called the St. Cecilia Society, has been founded, with M. Seghers as the orchestral director, to give six concerts on alternate weeks with those of the Conservatoire, with 130 choral and orchestral executants. Signor Giuliani, from Florence, has succeeded Manuel Garcia in the singing class at the Conservatoire, the brother of Viardot and Malibran having previously resigned. M. François Sauvo, for forty years chief editor of the *Moniteur*, in Paris, died lately, in his 78th year. He was distinguished also as a dramatic and musical critic. What changes, political and artistical, had not M. Sauvo witnessed during his career! He was a kind-hearted man, and much respected ——The Milan Scala is purple and yellow, and clad in white dress, every box which was thrown a purple velvet cloak embroidered with gold. The ha loon passed over the Invalides, an immense crowd witnessing its progress *Gallignani*

A NOBLE BENEFACTOR.—The city of Barcelona, in Spain, possesses a peculiar pawnbroking establishment, where loans are made without interest to necessitous persons, on the deposit of any articles. Two-thirds of the value of the deposit are at once advanced, and the loan is made for six months and a year, but if, at the expiration of that period, the borrower declare himself unable to redeem it, another period of six months is allowed. At the end of the second six months the pledges are sold; but, if they yield more than the amount advanced, the balance is handed over to the original owner. The Marquis de Lilo is president of this charitable establishment, and he has just addressed a letter to the clergy of the diocese, praying them to make its advantages known. It bears the name of the Pawnbroking Establishment of Our Lady of Hope. In the year 1849, 3666 persons availed themselves of its generosity.

A well-known pianist recently played some of his most astonishing pieces before the Grand Seignor. At the conclusion of the performance, the Sultan, who had been observing him with great apparent admiration, said to him:—"I have heard Thalberg" (a low low of the *artiste*, and modest smile); "I have also heard Liszt" (a still lower bow and devout attention); "but not one of all that have played before me perspired as much as you do."

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

On Monday last, the prisoners charged with the burglary at Holford House, Regent's Park, viz. William Dyson, James Mahon, *alias* Hollendale, William Robinson, and John Mitchell, were again brought before Mr. Broughton, at Marylebone Police-office, for re-examination, but no additional particulars were elicited. They were again remanded, to give time to the police to find another man who is suspected as having been implicated in the robbery.

George Rouse, charged with a burglary at the house of Mr. Seaton, the Dublin Castle, Park-street, Camden Town, noticed last week, and stealing thence about £26 in gold, silver, and copper monies; also charged with inflicting several wounds with a knife upon Godwin, 58 S, by whom he was secured with the stolen property in his possession, was fully committed to Newgate for trial, on Monday last at Marylebone Police-office

The two men, George Roberts and Charles Dowe, who broke into the West Surrey Branch Bank, at Epsom, on the night of Thursday week, were fully committed for trial on the charge, on Monday last.

A great number of the hands recently employed by the Eastern Counties Railway Company at Stratford emigrated to America, where, it is said, there is a demand for the various classes of mechanics connected with railway works, at higher prices than in England

Lord Panmure, father of the Right Hon. Fox Maule, entered his eightieth year on Tuesday week, and the occasion was celebrated by public dinners at Brechin, Arbroath, and other localities within the sphere of his territorial influence and extended liberality. The noble Lord is at present in the enjoyment of better health than for some years past.

The vacancy occasioned by the death of Mr. Commissioner Harris, of the Insolvent Court, is not to be at present filled up. The statute 10th and 11th Vict., c. 102, sec. 17, expressly provided that "the office of the first one of the Commissioners of the Court for the Relief of Insolvent Debtors which should become vacant" should not be filled up until after the termination of the session of Parliament next after the occurrence of such a vacancy

The executive committee of London for the Exhibition of 1851 has issued notices to the local committees, that all payments on account of the building now erecting must be paid up within the next month, and remitted to the Bank of England

On Monday morning, about four o'clock, a destructive explosion of gas occurred on the premises known as Day and Martin's blacking manufactory, in Holborn. The explosion was occasioned by the gas-man removing the meter, and the workmen going into the place with lights. Considerable damage was done, a young man was thrown out of his bed, and the watchman was thrown down by the violence of the concussion.

Upwards of thirty Arabian horses, purchased for the Queen of Spain in Africa, have been landed at Marseilles, whence they have started for Madrid. A grand review, on reaching the Spanish capital, will have cost, it is asserted, about 25,000*l*
